GREEK LANGUAGE.—Theodore, archbishop of Canterbury A.D. 668, who was sent to Britain by Vitalian, brought a collection of Greek documents with him, and imparted a knowledge of the language to several of the natives. Charlemagne was able to read it, and about the year 1000 it was employed by a congregation of Greek refugees in Toul, in the celebration of their religious worship. It continued a living language at Constantinople until the city was captured by Mohammed II., in 1453. It was taught at Paris in 1458, and was printed at Milan in 1481. Cornelio Vitelli taught it at Oxford in 1483, and William Grocyn, the first eminent English professor of the language, commenced his efforts to diffuse a knowledge of Greek at the same place in 1491. The first Greek lecture was established at Oxford in 1517. The language was first taught in Scotland, at Montrose, in 1534. During the 17th century it was much neglected; but Kister and Fabricius restored the study of the language. The most eminent English Greek scholars are Richard Bentley, 1662—1742; Parr, 1747—1825; Burney, 1757—1817; and Porson, 1759—1808.
GREEN-BAG INQUIRY.—This is the name given to an investigation into the nature of the contents of a green bag full of papers, alleged to be of seditious import, which was laid before Parliament by the Prince Regent Feb. 3, 1817. On the 4th both houses appointed secret committees, who presented their reports Feb. 18 and 19. Bills for the suspension of the Habeas Corpus act, and for the prevention of seditious meetings, were moved on the 24th, and the Habeas Corpus Suspension Act passed March 3. The bill for restraining seditious meetings was passed March 25.

GREENLAND (North America).—This country was probably discovered and inhabited by settlers from Norway, at least as early as A.D. 890, as Gregory IV. published a bull in 895, in which especial mention is made of the Greenlanders. The Iceland Chronicle, and other authorities, however, fix its discovery in the year 982. In 1122, Arnold became the first bishop of Greenland, and in 1256 the inhabitants attempted to throw off the yoke of the Norwegians. In 1376 part of the coast was explored by Martin Frobisher, and in 1665 and succeeding years the names sent expeditions to colonize the country. They all failed, until the Norwegian missionary Hans Egede arrived there in 1721, and founded Godthaab. In 1733 the Moravians established a mission, and the small-pox carried off 3,000 of the natives. The country was explored by Captain Scoresby in 1822, and by Captain Graab between the years 1829 and 1831.

GREENOCK (Renfrewshire).—In 1635 Charles I. granted a charter to John Shaw, erecting the lands of Wester Greenock, and the town and village of Greenock, into a burgh of barony, and in 1670 Sir John Shaw, son of both, Abbott, continued granting charters, incorporating the lands of Fandart with the barony of Wester Greenock, under the title of the burgh of Greenock. The first harbour at Greenock was built between 1707 and 1710. James Watt was born at this place, Jan. 19, 1736. By a charter granted Sept. 2, 1751, the election of the magistrates was intrusted to the inhabitants, and the magistrates themselves received considerable enlargement of authority. This charter is the basis of the prosperity of Greenock. The town-hall was erected in 1766, from Mr. Watt's designs, and the gaol in 1810. The new east harbour was commenced in 1806 and finished in 1811, and the west quay was rebuilt and enlarged between 1807 and 1811. The Chamber of Commerce and Manufactures was incorporated by royal charter in 1813. The dry, or graving dock, was commenced in August, 1813, and completed in September, 1823. Sir Francis Chantrey's statue of Watt was erected in 1832. Victoria Harbour was commenced in 1846, and opened in October, 1850.

GREEN PARK (London) was first inclosed in the reign of Charles II. by Le Notre. In 1767 it was reduced in size by George III., who wished to enlarge the gardens of old Buckingham House.

GREENWICH HOSPITAL (Kent).—This institution occupies the site of a former royal palace, which appears to have existed as early as the reign of Edward I. The park was commenced by Humphrey, duke of Gloucester, in 1433, and in 1465 the park and palace were bestowed by Edward IV. on his queen, Elizabeth Woodville. Henry VII. enlarged the palace and founded a convent. Henry VIII. was born here June 28, 1491, and married to Catherine of Aragon June 8, 1509. Queen Mary was born here Feb. 8, 1515, and Queen Elizabeth Sept. 7, 1533. It was also the scene of Henry's marriage with Anne of Cleves, Jan. 6, 1540, and of the death of Edward VI., July 6, 1553. In 1654 the palace became the residence of the Lord Protector; but it reverted to the crown in 1660, and was enlarged by Charles II., who did not live to carry out his plans in relation to the building. The patent for the erection of the hospital was granted by William III. & Mary, Oct. 25, 1694, and the foundation-stone of the new buildings was laid by John Evelyn, June 30, 1696. In December, 1704, the hospital was sufficiently advanced to receive forty-two seamen as inmates. Among the sources whence the funds for this noble institution were derived, may be mentioned, a duty of sixpence per month from every seaman, first levied in 1696; the forfeited property of the pirate Kidd, in 1705; and the estates of the last Earl of Derwentwater, in 1735. The infirmary was erected in 1763. The commissioners became a body corporate by a charter dated Dec. 6, 1775. The chapel, dining-hall, and other portions of the hospital, were destroyed by fire Jan. 2, 1779. The chapel was rebuilt, and opened Sept. 20, 1789. A portion of the infirmary was also burnt down in 1811. The Painted Hall was established in 1823. The accommodation of the hospital is for 2,710 pensioners; but in 1859 there were only 1,600 inmates. The annual revenue is between £150,000 and £160,000.

GREENWICH OBSERVATORY (Kent).—This institution stands on the site of a tower built by Duke Humphrey. It was founded Aug. 10, 1675, in consequence of the need for more correct tables of the moon and fixed stars than were afforded by the observations of Tycho Brahe. Mr. Flamsteed was the first astronomer royal, and the observatory was for some time known as Flamsteed House, in consequence. In 1725 a mural quadrant was erected, a zenith sector was added in 1727, and in 1750 the institution was enriched by many valuable instruments. Since Nov. 30, 1767, the observations made here have been published annually. Troughton's mural circle was erected in 1812, and his transit-instrument in 1816. The magnetic observatory was erected in 1837 and 1838, and the new south dome for the altitude and azimuth instrument in 1844. The electric time-ball in the Strand was erected, and made to act simultaneously with that at...
Greenwich observatory in August, 1852. A splendid equatorial, designed by Airy, was completed in the spring of 1860.

**GRE**

**President of the Council...Earl Granville.**

Privy Seal ............ Duke of Marlborough.

Principal Secretaries of State (see Calendar.) .... Earl of Halifax.

Admiralty ............. Earl of Egmont.

Secretary at War ...... Mr. Ellis.

Ordinance .............. Marquis of Granby.

The duke of Bedford took Earl Granville's place as president of the council Sept. 2, 1763. This ministry was dissolved in July, 1765. (See Rockingham (First) Administration.)

**GRESHAM COLLEGE (London).—This institution was founded by Sir Thomas Gresham, who gave the Royal Exchange to the corporation of London and the Mercers' Company, on the condition that they instituted a series of lectures on divinity, civil law, astronomy, music, geometry, rhetoric, and physic, May 24, 1575. He died Nov. 21, 1579, and the lectures commenced in his house, which he bequeathed for the purpose, in June, 1597. The first Gresham College was pulled down in 1768, and the site used for the Exchequer Office. The lectures were delivered in a room over the Royal Exchange, until the present college was opened, Nov. 2, 1843. The Royal Society held its meetings at this institution from 1662 to 1710.

**GRETNA GREEN (Scotland).—This village, in Dumfriesshire, at a short distance from the English frontier, was long notorious for irregular marriages. The Fleet marriages having been declared illegal in 1754, runaway lovers repaired to Scotland, and a celebrated Fleet parson advertised his removal to Gretna. He was succeeded by an old soldier named Gordon, who in his turn was followed by Joseph Paisley, called "the blacksmith," originally a weaver, and at one time a tobaccoist. He died in 1814. By 19 & 20 Vict. c. 196 (July 29, 1856), Gretna Green and Border marriages were abolished. It provided that, after Dec. 31, 1856, "no irregular marriage contracted in Scotland by declaration, acknowledgment, or ceremony, will be valid, unless one of the parties has his or her residence in Scotland, or had lived therein for twenty-one days next preceding such marriage; any law, custom, or usage to the contrary notwithstanding."

**GRIEVE ADMINISTRATION was formed soon after the resignation of the Wellington Administration, Nov. 16, 1830. The cabinet consisted of**

- **Treasurer** ............ Earl Grey.
- First Secretary of State (see Calendar.) ..... Earl of Liverpool.
- Privy Seal ............ Lord Durham.
- Chancellor of the Exchequer .... Viscount Althorp.
- Home Secretary ............ Viscount Melbourne.
- Foreign Secretary .......... Viscount Palmerston.
- Colonial Secretary .......... Viscount Goderich.
- Admiralty .......... Sir James Graham, Bart.
- Secretary at War ...... Mr. C. Grant.
- Board of Trade .......... Lord Auckland.
- Postmaster-General .... Duke of Richmond.
- Chancellor of the Duchy of Lancaster .......... Lord Holland.
- Without office .......... Earl of Carlisle.

The Hon. E. G. S. Stanley, afterwards earl...
of Derby, as chief secretary of Ireland, and Lord John Russell, as paymaster of the forces, were made members of the cabinet. Having been defeated on an amendment to their Reform Bill in the House of Lords, this cabinet resigned, May 9, 1832. The Opposition refused to form an administration, and the Grey cabinet was restored. The Hon. E. G. S. Stanley became colonial secretary March 28, 1833, Sir John Hobhouse taking his place as chief secretary for Ireland; and Viscount Goderich, afterwards earl of Ripon, succeeded Lord Durham as privy seal, April 3, 1833. This ministry was dissolved July 9, 1834. (See Melbourne Administration.)

GREYTOWN, or SAN JUAN DE NICARAGUA (Central America).—This town, which was originally founded by the Spaniards, was declared a free port under its present title, Jan. 1, 1851. It was bombarded by a United States ship of war in 1854, in retaliation for an alleged insult to the American consul.

GRISON (Switzerland).—In May, 1424, the abbot and lords of Upper Rhaetia met the deputies of the Swiss valleys, and the towns of Itanz and Tusiis, near the village of Trons, and there formed a league, which received the name of the Grison, or the League of the Grisons, from the colour of the smocks worn by the deputies. Gradually the name extended to the lands and its inhabitants, who formed an alliance with the Swiss cantons in 1497. In 1499 they defeated the troops of the emperor Maximilian at Malsheraid, and in 1512 they took possession of Valteline, Chiavenna, and Bormio, south of the Alps. The Grisons received the Reformation early. In 1603 they formed an alliance with Venice for the protection of Valteline against the Spaniards; but in 1620 the natives of that province rebelled against them, and the territory fell into the hands of Spain. A forced treaty was concluded in 1622, by which Valteline and Bormio were surrendered to the hands of the inhabitants of the Grisons annihilated; but in September the inhabitants rose in arms, and compelled the Spaniards to retire. Valteline was restored to the Grisons in 1639. In 1797 the Italian provinces were again wrested from them by Napoleon, and in March, 1799, their country was overrun by the French. The Grisons became a canton of Switzerland by the Act of Mediation in 1803.

GROATS were first ordered to be coined A.D. 1227 and 1249. Their proper value was fourpence, but the term was occasionally applied to coins of different worth. Thus Stow, under the year 1304, speaks of "a groat, the value of which was 12d." Half-groats were first coined in 1351. The modern fourpenny piece was struck in the reign of William IV.

GROCERS’ COMPANY (London).—The original title of this company was "Pepperers," who are mentioned as a separate fraternity in the time of Henry II., though the guild probably originated at a much earlier date. The present company was founded June 12, 1345, and the name "grocers," which first appears in a petition of the Commons in 1361, was not adopted by them till 1376. The meaning of the term is somewhat disputed, though it is most probably a contracted form of "engrossers," the name applied to dealers in any ware, who by monopoly or other means, contrived to raise the price of their goods. The hall was founded May 8, 1427, and the company received its first patent of confirmation in 1429. The great fire of 1666 seriously damaged the hall, which was restored in 1668-9, by Sir John Cutler. In 1681 it was again in ruins, and was renovated by Sir John Moore, and in 1824 it was let to the Bank of England. The present hall was built in 1822, and repaired in 1827.

GROCOW (Battle).—The Poles defeated the Russians at this place, near Warsaw, after an obstinate contest that lasted two days, Feb. 19 and 20, 1831. The Russians lost 7,000 and the Poles only 2,000 men.

GRODNO (Poland).—This town is of ancient and uncertain origin. In 1184 it suffered considerably from a fire, and in 1283 was taken by the Teutonic knights. The Russians made a futile attempt at its capture in 1366. Grodno was a seat of the Polish diet from 1673 to 1752. In 1708 it was taken by Charles XII., and in 1793 the greater part was destroyed by fire. The Russians seized it in 1792, and erected it into the chief town of Lithuania in 1795. It has since been made the chief town of a province of the same name.

GROG.—Admiral Edward Vernon, after the reduction of Porto Bello, Nov. 21, 1739, introduced the use of rum-and-water amongst his crew. "In bad weather," according to Mr. Vaux (Notes and Queries, i. p. 52) "he was in the habit of walking the deck in a rough grogram cloak, and thence had obtained the nickname of Old Grog in the service. This is, I believe, the origin of the name grog, applied originally to rum-and-water."

GROningen (Holland).—This town was founded towards the latter part of the 6th century, and possessed some commercial influence in the 9th century, when it was seized and destroyed by the Northmen. In 1110 the town was rebuilt, and subsequently formed part of the Spanish dominions. In 1576 it was incorporated with the United Provinces, but it afterwards fell again into the hands of the Spaniards, from whom it was finally wrested by Prince Maurice in 1594. The citadel was erected in 1607, and the university founded in 1614. In 1678 Groningen repelled a siege by the elector of Cologne and bishop of Munster. The institution for the deaf and dumb was founded in 1790, and the town-hall in 1793. In 1795 it was seized by the French, under General Macdonald. The Hôtel de Ville was built in 1810.

GROSS-BEeren (Battle).—Bernadotte, commanding an allied army, defeated Napoleon I. and the Saxons at this place, near Berlin, Aug. 23, 1813.
GROSS GLOGAN (Prussia).—The Prussians took this city, on the Oder, A.D. 1741. The French invested it in October, 1806, and it surrendered early in December. The allies blockaded it Aug. 17, 1813, and it capitulated April 10, 1814.

GRUB STREET (London) was inhabited, before the discovery of printing, by text-writers, who wrote all sorts of books then in use. John Focie, the martyrlogist, John Speed, the historian, and other authors, resided in Grub Street. Memoirs of the Society of Grub Street appeared in 1737. Its name was changed to that of Milton Street in 1830.

GUADALAJARA (Spain).—A corruption of Guadalichara or Guadalarruca, the name bestowed upon this town by the Moors, who captured it A.D. 714.

GUADALOUPE (West Indies).—This island was discovered by Columbus A.D. 1493. In 1635 it was seized by the French, and on Jan. 29, 1793, was taken by the English, who restored it in 1793. It was again seized by them in 1794 and Feb. 5, 1810, when it was proposed to cede it to Sweden; but at the peace of 1814 it was restored to France. The English again captured it Aug. 10, 1816, and finally surrendered it to France July 23, 1816. Guadaloupe suffered severely from an earthquake in 1843.

GUADIX (Spain).—This is said to have been the seat of the first bishopric erected in Spain. Ferdinand of Castile captured it in December, 1489.

GUALIOR, or GWALIOR (Hindostan).—This town was under the government of rajahs as early as A.D. 1006. In 1197 it was taken by the Mohammedans, and in 1235 submitted to Alumsh, king of Delhi. In 1519 it was taken by Ibrahim Lodhi, the last Patal emperor of Delhi, and in 1543 it was surrendered to Sher Khan, the Afghan. Gualior was taken by the British, under Major Popham, Aug. 3, 1750. In 1794 it was seized by Madhjatoorasia, and in 1803 a treaty was concluded, by which it was to be surrendered to the British. As this treaty was not observed, the town was again invested by the English under Sir Henry White, who effected its capture Feb. 5, 1804. In 1806 it was again ceded to Scindia; but it was recaptured by the English under Sir Hugh Gough, Dec. 29, 1813.

GUAM, or GUAHON.—One of the Ladrones, discovered by the Portuguese Fernando Magellan, A.D. 1521.

GUANO.—Prescott maintains that the Peruvians made great use of this valuable manure before Peru was visited by the Spaniards. Herrera refers to it in a work published in 1601, and in another published in 1606. It was brought by Ulloa in 1748, and first brought to Europe by Humboldt in 1804. It is chiefly obtained from the Chincha and Lobos islands, situated off the coast of Peru. In 1839 the sole right to ship guano for nine years was sold to a private firm by the Peruvian and Bolivian governments; but the contract was cancelled by the government of Peru in 1841. The monopoly has, however, been recently revived. Guano was discovered on the island of Ichaboe, on the coast of Africa, in 1843, and by the next year the whole stock was exhausted. Large deposits of this manure were discovered in Van Diemen's Land in April, 1861.

GUARDS.—The celebrated Scotch guards of the kings of France were enrolled by Charles VII. A.D. 1433. The English yeomen of the guard were instigated by Henry VII. in 1486. The four troops of horse-guards were enrolled in 1660, 1661, 1693, and 1702; the foot-guards in 1660,—the second regiment is the celebrated Coldstream Guards (q. e); the horse grenadier guards in 1693 and 1702. The French National Guard was instituted in 1789, the Imperial guard in 1804, and the Garde Mobile in 1838.

GUARDS' CLUB (London).—This club is restricted to officers of the household troops. The house, designed by Mr. Henry Harrison, was commenced in 1848.

GUASTALLA (Italy).—This Italian duchy passed into the hands of the dukes of Mantua A.D. 1677, and in 1746 fell under the dominion of Austria. In 1748 it was ceded to the duke of Parma by the treaty of Aix-la-Chapelle, and in 1796 was incorporated with the Italian republic by Napoleon. In 1815 it formed a portion of the appanage of the empress Maria Louisa, and in 1847 was ceded to the duke of Modena. The battle of Guastalla was fought near the chief town of the above duchy, between the French and Sardinian forces under Charles Emanuel III., and the Austrians, Sept. 19, 1793, when the latter were defeated.

GUATEMALA (Central America).—This country was discovered by the Spaniards A.D. 1502. In 1524 they founded the town of Old Guatemala, or Guatemala-la-Vieja, which was overthrown by earthquakes in 1541 and 1773. After the latter disaster, the town of New Guatemala was founded in 1776, and the old town was rebuilt in 1799. In 1821 the colony revolted from Spain, and became a federal republic in 1823. Its limits were diminished in 1839 by the cession of Honduras, and in 1846 each of the states forming the confederation adopted an independent government. Guatemala is governed according to the constitution of Oct. 19, 1851, by a president and legislative chamber. The bishopric of Guatemala was established in 1533.

GUEBRES, Parsees, or Fire-Worshippers.—The Guebres of Persia, and the Parsees of Bombay, are descended from the fire-worshippers of antiquity, a sect which arose about B.C. 2120, and was suppressed about B.C. 330. It was restored by Ardeschir Badekhun A.D. 225, and again proscribed by the Mohammedans in 652, when Yazdjid III. was deposed and slain. A large number of his subjects emigrated to Gujarat, in India, where they were known as Parsees, or Persians. The modern Guebres are chiefly confined to the city of Yazd, in Persia.
GUELDerland (Holland).—This duchy was sold to Charles I., duke of Burgundy, A.D. 1472, and reverted to the empire as an escheated fief in 1603. In 1528 it was held by its duke as a fief of Brabant and Holland, and in 1533 the succession was settled on the duke of Cleves. In 1579 it took part in the Union of Utrecht, and in 1672 submitted to the French, who evacuated its borders the following year. It was re-admitted to the Union in 1674, and received an amended constitution in 1748.

Guelphic Order.—This Hanoverian order of knighthood was founded by the Prince Regent, Aug. 12, 1815. The statutes were amended May 20, 1841.

Guelphs. (See Guelfs.)

Guerraude (France).—After the celebrated battle of Auray, fought Sept. 29, 1364, between the forces of the two pretenders for the duchy of Brittany, John of Montfort and Charles of Blois, in which the latter was slain, a treaty was concluded at Auray. The interdict on Charles V. was lifted April 12, 1365. It left Montfort in quiet possession of the duchy, which was to revert to the widow of Charles of Blois in case Montfort died without heirs.

Guernsey (English Channel).—This island was called Holy Island in the 10th century, owing to the numerous monks who inhabited it. In 1035 it was shared between Nigellus, or Néel, viscount of St. Sauveur, and Earl Robert of Normandy. Cornet Castle was founded about 1204, and St. Peter's Church consecrated in 1312. Queen Elizabeth founded Elizabeth's College in 1563, and Fort George was commenced in 1775. The French have made numerous efforts to take Guernsey, the last of which occurred in 1780.

Guex, or "Beggars," was the name contemptuously applied by the count of Barlaimont to the confederate nobles of the Low Countries, who presented a remonstrance against the Inquisition to the governoress Margaret, April 5, 1566, and was adopted by them as the name of their party the same evening. In 1568 they defeated the Spaniards at Heiliger Lee, but later in the year were themselves compelled, by the duke of Alva, to disband their forces. In 1570 they petitioned the diet of Spires against the cruelties of the Spaniards; and, in 1572, were refused asylum in Denmark, Sweden, and England. In 1572 they again proved victorious, and seized Briel and Flushing, Rammekeins, Middleburg, and Arnemuiden also surrendered to them in the two following years. The celebrated William, prince of Orange, was a member of this party. There were also the Wild Gueux, a band of Dutch Protestants driven into outlawry and plunder by Alva, in 1568, and the Water Gueux, a party of privateers, who commenced their ravages in 1569.

Guiana (S. America).—This country was discovered by Columbus, in August, 1498, and visited by Vincent Pinzon in 1500. The first town, St. Thomas, of Guiana, was founded by Diego de Ordas in 1531, and the Dutch established their settlement of New Zealand in 1590. Sir Walter Raleigh visited Guiana in 1595, and commenced his exploration of the country, in the hope of discovering rich gold-mines in 1617. Slave labour was introduced into the country in 1621. The three colonies of Demerara, Essequibo, and Berbice, were united and first called British Guiana in 1803. (See Berbice, Demerara, and Essequibo.)

Dutch Guiana. (See Surinam.)—French Guiana.—The first French settlements in Guiana were formed in 1604. In 1699 their colony was seized by the English and Portuguese, who restored it to France in 1816.

Guinée, or Guinéen (France).—This province, situated to the north of Gascony, with which it is often confounded, comprised part of Aquitania, which name, according to some authorities, became corrupted into Guinée. Bordeaux was its capital. What was left of it after the death of Louis XIV. passed into the possession of the English, May 20, 1259, A.D. The French seized it in 1293, and it became the subject of many struggles, until it finally came into the possession of France in 1463.

Guildford (Surrey) is first mentioned in the will of Alfred the Great, who bequeathed it to his neighbour Athelwald. In 1036 it was the scene of the murder of the Norman friends of the Saxon atheling Alfred, by order of Godwin, earl of Kent; and, in 1216, its castle was taken by the French dauphin Louis. The town received its charter of incorporation from Edward III., in 1387. The Royal Grammar-school was founded in 1590, and Archbishop Abbot's Hospital in 1619. The market-house was erected in 1758, the prison finished in 1822, and the Guildford Institution founded in 1844.

Guildhall (London) was founded A.D. 1411, and the kitchen was erected in 1501. It suffered much from the great fire of 1666, but was rebuilt in 1669, though the King-street front was not restored till 1789. The statues of Gog and Magog were set up in the hall in 1708. The allied sovereigns were entertained here at a civic banquet, June 18, 1814, and the emperor and empress of Russia received a similar compliment, April 19, 1855.

Gilds.—English guilds were originally political in their nature, arising from the Anglo-Saxon custom of frank-pledges. Trade guilds existed as early as the time of Athelstan (A.D. 925—941), one of the earliest being the Gilda Theutonicon, or Steelyard Merchants, who were established in England before 967. The Knigten guild existed in the reign of Edgar (967—975), and received a charter of Edward the Confessor (1041—1066). These are the most important of the ancient guilds, though there were many others. The substitution of the term livery company for that of guild was made in the reign of Edward III.
GUILLOTINE.—This instrument of decapitation was invented in 1785, by Joseph Ignace Guillotin, a celebrated French physician. It was first employed April 25, 1792. The inventor was himself condemned to suffer by this machine, but was delivered by the counter-revolution of 9 Thermidor (July 27), 1794.

GUIPARRAS (Portugal), founded B.C. 500, was made the capital of Portugal A.D. 1107.

GUIANA (Africa).—This name is applied to the whole west coast of Africa between Cape Verge on the north, to Cape Negro on the south. It was first discovered by the Portuguese A.D. 1446, but the whole coast was not completely explored till 1484. The English first traded with Guinea in 1530. They renewed their attempts in 1553, but the adventurers died from the unhealthy climate, without effecting any negotiations. A second expedition was, however, equipped in 1554, which met with better success, and in 1588 a company was chartered by Queen Elizabeth for the sole object of trading to this country.

GUIRS. — So called because they were originally made of gold brought from the coast of Guinea. Guineas and half-guineas were first struck A.D. 1663, the device being an elephant, to signify the country whence the gold was brought. Quarter-guineas were first coined in 1718. The last coinage of guineas took place in 1818. The value of this coin has varied considerably at different periods. When first struck it passed for 20s.; but in 1695 its worth had increased to 30s. It was reduced to 25s. March 25, 1696, and to 22s., the following 10th of April. Its value was finally fixed at 21s., by a proclamation of Dec. 22, 1717. The guinea was gradually withdrawn after the introduction of sovereigns in 1817.

GUINEGATE (Battle).—Henry VIII., at the head of an English army, defeated the French at this place, in Artois, Aug. 16, 1513. The enemy fled with such precipitation that it is usually called the Battle of the Spurs.

GUINES, or GUINES (France).—It was near this town, in Picardy, that Henry VIII. and Francis I. met in 1520, at the celebrated Field of the Cloth of Gold (q.v.)

GUISTAN.—This peace between Persia and Russia was concluded Oct. 12, 1513. Persia ceded to Russia a number of governments in the Caspian Sea, and the whole of Dagesthan, at the same time renouncing all claims to Georgia, Mingrelia, and other provinces.

GUISSMEN (Prussia).—Frederick William I. erected this small village into a town A.D. 1732.

GUN.—The Armstrong gun, invented by Sir William Armstrong, was adopted by the British artillery service, Feb. 26, 1859. (See Artillery, Cannon, &c.)

GUN-COTTON.—In 1846 Schönbein exhibited specimens of this material to the British Association at Southampton; but the method of its preparation was not published till the enrolment of the patent in April, 1847. It was found applicable to military and mining purposes, owing to its liability to spontaneous combustion, but has proved of great service in photography. (See Colloid.)

GUNPOWDER.—This substance was known to the Chinese at a very early period. It appears to have been employed against Alexander the Great by some Hindoo tribes, B.c. 355, and to have been applied to military purposes in China A.D. 85. It is described in an Arabic MS. of the year 1249, and also in the works of Roger Bacon (1270), who is regarded by some as the author of the invention, though other authorities ascribe it to the Greek Iain Barthold Schwartz, in 1320. Its exportation from England was prohibited by Henry V. in 1414, and in 1625 its manufacture was monopolized by Charles I. Restrictions as to the quantity manufactured at a time, or stored in one place, were imposed by 12 Geo. III. c. 61 (1772), which prohibited dealers from keeping a stock of more than 200 lb.

GUNPOWDER PLOT.—This conspiracy of the papists, to destroy the king, lords, and commons, while assembled in parliament, by means of gunpowder, was contrived by Robert Catesby in the spring of 1604. He was joined by Thomas Winter, who, on the 22nd of April, secured the co-operation of Guy Fawkes, a native of Yorkshire, and a soldier of fortune. In furtherance of his scheme, Catesby hired a house close to the old palace of Westminster, and began to mine under the palace Dec. 11. They were, however, compelled to relinquish their mining; but hearing that a cellar under the house was to let, Catesby hired it, March 25, 1605. Thirty barrels and two hogsheads of gunpowder were concealed here under sticks and fagots. Everything was now prepared for the execution of the plot, which was arranged for Nov. 5, on which day parliament was to be re-opened, when an anonymous letter sent to Lord Montague, Oct. 26, to warn him, led to the disclosure of the whole affair. This letter was laid before James I., Nov. 1, and he at once inferred that the threatened danger was from gunpowder, and ordered that the cellars beneath the parliament house should be searched. This was done on the evening of the 4th, when Fawkes was discovered in charge of the vault, with dark lantern and matches, ready to fire the mine. The other conspirators fled to Holbeach House, in Worcestershire, where they were attacked Nov. 8. Catesby, Percy, and the two Wrights, fell sword in hand, and the others were made prisoners. Their trial commenced Jan. 27, 1606, and on the 30th, Digby, Robert Winter, Grant, and Bates, were executed in St. Paul's Churchyard. Thomas Winter, Rookwood, Keys, and Guy Fawkes, suffered in Old Palace Yard, Westminster, on the 31st; Henry Garnet, the Jesuit, was tried March 23, and executed at St. Paul's as an accessory, May 3.

GUTTA PERCHA.—The properties of this Malayan tree were known to the natives of Malacca and the neighbouring countries.
before they were discovered by Europeans. The tree was first described by Doctor Montgomerie, of Bengal, in 1842, and in 1843 Doctor D’Almeida exhibited a specimen of its insipissated juice to the Royal Society of Arts.

**GUY’S HOSPITAL (London).—**This institution was founded a.d. 1722, by Mr. Thomas Guy, bookseller, who devoted £18,793.16s. 1d. to the erection of the building, and £219,499. 0s. 4d. to its endowment. His statue was erected in the court Feb. 11, 1734. The front of the building was new-faced in 1778, and in 1829 its funds were increased by a legacy of £196,115, bequeathed by Mr. Hunt, of Petersham.

**Gymnastics.**—According to Plato, the Lacedaemonians established the first gymnasium, and during the classical era, every important town possessed a similar institution, where the young practised racing, wrestling, boxing, &c. Saloon compiled a code of laws especially for the regulation of gymnasium, about B.C. 594. The first French gymnasmum, for the instruction of the army in physical exercises, was founded at Paris a.d. 1818.

**GymnosopHite.**—This was the name given by the Greeks to a sect of Hindoo philosophers who were remarkable for the asceticism of their manners and doctrines. They wore no clothing, taught the transmigration of the soul, and exhibited the most surprising contempt of death. Calanus burnt himself to death in the presence of Alexander the Great, about B.C. 325.

**Gypsies.** were for a long period supposed to be of Egyptian origin, their very name being a corruption of the word Egyptians; but it is now generally believed that they are the descendants of some Hindoo Parials who were exiled from their country by Tamerlane at the commencement of the 15th century. They first appeared in Europe, in the Danubian provinces, in 1417. In 1418 they are found in Switzerland, and in 1422 in Italy. They appeared in France in 1427, in Spain in 1447, in England about 1512, and in Sweden in 1514. By 22 Hen. VIII. c. 10 (1530), they were ordered to quit the country, and severe ordinances were also issued against them by 1 & 2 Phil. & Mary, c. 4 (1554), and 5 Eliz. c. 20 (1562), which made their continuance in England for more than a month a capital felony. In 1660 they were expelled from France, and in 1691 from Spain; but, in spite of all legislative enactments, they still exist in all the countries of Europe. The oppressive statutes against them in this country were repealed by 23 Geo. III. c. 51 (1785), by 1 Geo. IV. c. 116 (July 25, 1820), and by 19 & 20 Vict. c. 64 (July 21, 1856). Mr. Borrow commenced the translation of the Bible into the Rommanny dialect (the language of the gypsies) in 1836.
IIAI

HAD

IIAI

William IV. c. 22, s. 9 (Sept. 22, 1831). The regulations respecting hackney coaches are embodied in 16 & 17 Vict. c. 33 (June 28, 1853), and 16 & 17 Vict. c. 127 (Aug. 20, 1853). The Lost-and-Found Office, for recovery of goods left in hackney coaches, was established by 55 Geo. III. c. 159, s. 9 (July 11, 1815). Haddington (Scotland) was created a burgh by David I., who reigned A.D. 1124—1153. It was destroyed by John, king of England, in January, 1216, and, having been rebuilt, was again burned in 1244. Edward III. burned it in 1355. The English took possession of Haddington in 1544, and again in 1548, and were compelled to retire in October, 1549.

Haddington (Battles).—The most celebrated was fought July 3, 323 A.D., between Constantine and Licinius, during the civil wars that followed the abdication of Diocletian, in which the latter was defeated. It was in this action that Constantine is said to have thrown himself into the river Hebrus with only twelve horsemen, and to have vanquished an army of 150,000 men.—Near this city Valens was defeated by the Gotits, with immense slaughter, Aug. 9, 378. Gibbon says this battle, in which the emperor Valens perished, "sustained in actual loss, and far surpassed in the fatal consequences, the misfortune which Rome had formerly sustained in the fields of Canne."

Haddington (European Turkey).—This city is referred to by ancient authors under the name of Uscudama. It received its present title from the emperor Hadrian, by whom it was restored and raised to considerable splendour. It was the scene of a great victory gained by Constantine over his rival Licinius, July 3, 323 A.D., and of the defeat of the Romans by the Goths, and the death of the emperor Valens, Aug. 9, 378. It withstood a siege by the Goths the same year, but surrendered to the Bulgarians in 813. Hadrianople was erected into a bishopric by Constantine I. Its first bishop died in 380. Frederick I. Emperor of Germany, stormed it in 1190, and it was taken by the Turks, under Amurath I., in 1360. In 1366 it became the capital of the Ottoman empire, which rank it retained until the capture of Constantinople by the Mohammedans in 1453. The Russians effected an entry into Haddington Aug. 20, 1829, and retained possession till Sept. 14, when the treaty of Haddington was signed. By this treaty the Danubian principalities were restored to the Porte, and confirmed in all privileges granted by former treaties. Russia received free right of commerce throughout the Turkish empire, with liberty to pass the Dardanelles; and Turkey agreed to pay 1,500,000 Dutch ducats for the expenses of the war, and 10,000,000 ducats as compensation for losses sustained by Russian merchants. The city suffered severely from the plague in 1836 and 1837. The Turks call it Edrenen, and it is generally known under the name of Adrianople.

Haddington Wall.—The Roman fortification, of which some remains still exist, extended from the Solway Frith to the mouth of the Tyne, and consisted of a stone wall and parallel earthen rampart, about sixty feet apart. Spartianus declares that Hadrian built a wall eighty miles long, dividing the Romans from the barbarians, and that Severus constructed a wall across the island. The generally received opinion, therefore, is, that Hadrian built the earthen rampart (A.D. 121), and that Severus, to strengthen it, constructed the stone wall (205—210). Mr. Bruce, in his work on the Roman wall, contends that both the earthen rampart and the stone wall were constructed by Hadrian, and that though Severus may have repaired this fortification, he built no wall himself. This is also called the Picts' wall.

Hague (Holland).—The Binnenhof, or court of Holland, was founded A.D. 1249. The town originated in the erection of a hunting-lodge of the counts of Holland in 1250. In 1528 it was pillaged by Maerten van Rossum, and in 1580 was the scene of the abjuration of Spanish supremacy by the States-general, and was made the residence of the stadtholder, and the centre of government. The cannon-foundry was established in 1683. In 1672 the brothers Cornelius and John De Witt were literally torn to pieces by the enraged populace. The city was seized by the French, and the stadtholder compelled to take refuge in England, Jan. 19, 1795. In 1806, Napoleon I. transferred the title of capital to Amsterdam; but the government was restored to the Hague on its evacuation by the French in 1813. Several important treaties have been signed at the Hague; viz., between England, France, and Holland, to maintain the balance of the North, May 21, 1559; between Holland and Portugal, May 7, 1669; and between Holland, the emperor, and Brandenburg, against France, July 25, 1672. A twenty years' truce was signed here June 20, 1694. The Hague congress of the Iranian princes, and French and Austrian commissioners met in 1690 and 1691. The Grand Alliance was renewed here in 1696, and the Triple Alliance in 1717. A treaty was concluded at the Hague with the French, May 16, 1795.

Haddington College (Hertfordshire) was founded by the East-India Company for the education of cadets. The first stone was laid May 12, 1806, and in April, 1809, the building was completed. The college was closed in 1869.

Hainaut (Belgium) was governed by a regular succession of counts from the time of Regnier I., who began to reign about 960. In 1436 it passed into the hands of Philip the Good, duke of Burgundy, and by the treaties of the Pyrenees, Nov. 7, 1659, and of Nimeguen, Sept. 17, 1678, part was ceded to France, and now forms the province of French Hainaut. In 1793 the rest of the territory was surrendered to France, and formed into the department of Jemmapes. In 1814 it was allotted to the Low Countries, and in 1830 was incorporated with Belgium.
HAIF

HALIFAX (Yorkshire) is first named in a grant of the 12th century, and was a seat of the woollen manufacture as early as 1414. In 1443 the town only numbered thirteen houses, which had increased in 1540 to 520. The free grammar-school was founded by Queen Elizabeth in 1583. Archbishop Tillotson was born here in 1690. Halifax was anciently remarkable for possessing the right of executing any thief who stole property of the value of thirteen pence halfpenny within its limits. The instrument used in the execution resembled the guillotine, and the town possessed and exercised this right from about 1230 to 1650; after which there is no record of its use. The Piece-hall was erected in 1779, Trinity Church in 1795, the gaol in 1828, the infirmary in 1836, and the general cemetery was established in 1837. The People's Park was presented to the town by F. Crossley, and opened in August, 1857.

HALIFAX ADMINISTRATION.—Immediately after the accession of George I, the treasury was placed in commission with Lord, afterwards the earl of Halifax, at the head (Oct. 5, 1714). The office of lord high treasurer has not been revived. The ministry was thus constituted:

Treasury

Lord Halifax

Lord Chancellor

Lord

Privy Seal

Wharton

Chancellor of Exchequer

Sir R. Onslow, Bart.

Principal Secretaries of State

Mr., afterwards Earl of Townshend

Admiralty

Earl of Oxford

Secretary at War

Mr. Pitt

Ordinance

Duke of Marlborough

Paymaster-General

Mr., afterwards Sir R. Walpole

Hallam states that Lord Townshend was the actual prime minister. The marquis of Wharton died April 12, and the earl of Halifax May 19, 1716. (See Car fighter, Ad

HALLE (Saxony).—This Prussian town was founded in the 9th century, and was erected into a city by Otho II. in 981. St. Ulrich's church was built in 1339, and the cathedral founded in 1520. The university was established in 1694, and the orphan-house in 1698. A battle was fought here between the French and Prussians, Oct. 17, 1806. The latter were defeated, and the town was seized by the French, who retained it till 1814, when it was restored to Prussia. In 1815 the university was united to that of Wittenberg, and the building for the incorporated institution was erected in the suburbs of Halle in 1834.—A treaty between the Protestant princes of the German empire was concluded here in 1610.

HALLELUJAH VICTORY.—This name was given to a victory gained by some newly-baptized Britons over their enemies, A.D. 429, because they commenced the struggle with loud cries of "Hallelujah." Germanus, bishop of Auxerre, was their leader on this occasion.

HAIFE

HAINAULT FOREST (Essex).—This wood, which owed its chief celebrity to the Fairlop oak (q.v.), was disafforested by 14 & 15 Vict. c. 43 (Aug. 1, 1861).

Hair.—The Egyptians shaved the head, but the Greeks and Romans esteemed the hair of such honour that it was offered to the gods in gratitude for escape from shipwreck. Curling with iron was practised by females among the Greeks and Romans, and by both sexes among the Phrygians. The early Greek Christians offered the hair to God. Long hair was esteemed by the Goths; but the English of the 9th and 10th centuries wore it short. The Danes and Normans wore it long; but in the 14th, 15th, and 16th centuries, it was cut short. Wigs became common in the 17th century. Strange fashions of dressing ladies' hair in the 18th century, began about 1760, moderated towards 1790, and had nearly declined before 1800.

Hair-powder.—Gold dust was occasionally used by the ancients for this purpose, but the usual material for it was to dye the hair. Powder is said to have been introduced by Mary of Medicis; its introduction by L'Etoile a.d. 1588. The hair-powder tax was proposed by Mr. Pitt, and levied by 35 Geo. III. c. 49 (April 30, 1785).

HAKLUYT'S ISLAND (Polar Seas) was discovered by Baffin a.d. 1616.

HAKLUYT SOCIETY, named after Richard Hakluyt, celebrated for his labours in collecting the materials for a history of British voyages and discoveries, was instituted Dec. 15, 1846.

HALBERSTADT (Saxony) was the seat of a bishop a.d. 914. The cathedral, commenced in 1235, was completed in 1491. The diet of Halberstadt elected Otto IV, emperor in 1298. It was annexed to Brandenburg by the treaty of Munster, in 1648. The French captured Halberstadt in January, 1758. It was ceded to France in 1807, and was afterwards restored to Prussia at the peace of 1814-15.

HALIARTUS (Battle).—Lysander was slain in this battle, fought between a confederacy of Grecian states and Lacedaemon, B.c. 395.

HALICARNASSUS (Asia Minor).—This town of Caria was of Dorian origin, and is famous as the birthplace of Herodotus, B.C. 494. The celebrated tomb of Mausolus was erected B.C. 353, and the city was taken by Alexander the Great B.C. 334. Halicarnassus was a bishopric in the primitive church, and sent a bishop to the council of Chalcedon, A.D. 451. The site of the ancient town was discovered in 1839 by Lieutenant Brock, and many interesting sculptures have been disinterred, and deposited in the British Museum.

HALIDON, or HALIDOWN HILL (Battle).—Edward III. defeated the Scottish forces at this place, near Berwick, July 19, 1333.

HALIFAX (Nova Scotia).—This town was settled a.d. 1749, by adventurers from England. It was the seat of the first commissioner of trade and plantations. It was declared a free port in 1817. The college was founded in 1820.
HALLEY'S COMET.—This comet is memorable as having established the periodical return of certain of those bodies. Halley was led to form this idea from observing the comet in 1682, and comparing its orbit with those of the comets of 1531 and 1607, which he found identical. He consequently inferred that the three comets were only three appearances of the same body, and announced this opinion in 1705, and having convinced himself of the truth of his theory by laborious calculations, he predicted that it would again appear in 1759, which proved to be the case. The mean period of this comet takes in accomplishing its orbit 76.1 years.

HALYS, (Battle,) between the Medes and Lydians, on the banks of this river, in Asia Minor, was interrupted by the eclipse of Thales. The years B.C. 603 and 601 are assigned by some as the date of this eclipse; but Airy has proved it to have occurred May 23, B.C. 584, which is consequently the day of the battle.

HAM (France).—This fortress, on the Somme, was built by the count of St. Pol, A.D. 1470. It was the prison of the unpopular ministers of Charles X. in 1830, and of Louis Napoleon in 1840, after his attempt upon Boulogne. He effected his escape May 25, 1846.

HAMADANITERS.—Arabian princes of the tribe of Hamadan, who ruled over Mesoopotamia from A.D. 892 to 1001.

HAMBURG (Germany).—This free city was founded by Charlemagne, A.D. 809, and speedily attained great influence on account of its commerce. In 1241 it concluded a treaty with Lübeck, which subsequently became the basis of the Hanseatic League, and in 1269 it received the right to frame its own laws and enforce its execution. A provincial council of ecclesiastics met here in 1406. The town extended its borders to the right bank of the Alster in 1500, adopted the Reformation in 1535, and in 1618 was released from its former subjection to the dukes of Holstein. The bank was founded in 1619, and the church of St. Michael in 1751. In 1768 the city was finally released from all subjection to the house of Holstein, and in 1770 the emperor confirmed its right to the rank of a free city. In 1799 the Irish rebel Napper Tandy was surrendered to the British government by the Hamburghers, and in 1801 the city was occupied by the Danes. In 1802 all the Hanoverian property in Hamburg was surrendered to the city, which suffered severely, in consequence of the blockade of the Elbe, in 1803. French troops occupied Hamburg from 1806 to 1809, and in 1811 it was annexed to France as capital of the department of Bouches-d'Elbe. The French relinquished Hamburg in 1813; it regained its old constitution May 26, 1814, and joined the Germanic Confederation June 8, 1815. The gymnasia were founded in 1840. A terrible fire, which broke out May 5, 1842, destroyed 2,000 houses and property to the

amount of £7,000,000. A new constitution was adopted in 1848, and in 1851 the city was occupied by an Austrian force. An inundation of the Elbe laid the greater part of the city under water, Jan. 1, 1855. A commercial panic occurred in 1857. The Assembly adopted a constitution based on the parliamentary system, with representative government, the members of which are elected by popular suffrage, Aug. 11, 1859.

HAMMERSMITH (Middlesex).—This village is first noticed in the early part of the reign of Henry VII. The church was founded A.D. 1691. In 1656, Hammersmith was the scene of Miles Syndercomb's conspiracy against Cromwell. The suspension-bridge was founded by the duke of Sussex, May 7, 1825, and opened to the public Oct. 6, 1827. The parish of Hammersmith was separated from that of Fulham in 1834.

HAMPSDEN CLUBS.—Associations under this name were formed throughout the country A.D. 1816. Their professed object was parliamentary reform. A report of a committee of both houses, presented Feb. 9, 1817, declared these clubs to be revolutionary.

HAMPDEN COURT (Middlesex) was built by Cardinal Wolsey, and presented by him to Henry VIII. A.D. 1526. Edward VI. was born here, Oct. 12, 1537; and his mother, Jane Seymour, died here the following Oct. 24. The ecclesiastical conference between the presbyterian and episcopal clergy assembled at Hampton Court, Jan. 14 to 18, 1606, and Charles I. was detained a prisoner from August 24 to Nov. 11, 1647. The grand front of the palace was commenced by Sir Christopher Wren in 1690, and completed in 1694. George I. fitted up the hall as a theatre in 1718. The celebrated vine was planted in 1769, and the public were permitted to visit the place in Nov. 1838.

HANAPEER OFFICE.—An obsolete department of the Chancery Court, which derived its name from the practice of keeping writs in a hamper or basket, "in Hanaperio." The emoluments of this office were granted by Charles II. to Lord George Fitzroy and his male descendants, or, falling such issue, to the earl of Southampton and his male descendants, or to the earl of Euston, afterwards the duke of Grafton, these noblemen being the king's sons by the duchess of Cleveland. The Hanaper Office was abolished by 5 & 6 Vict. c. 103 (Aug. 10, 1842).

HANAU (Germany), in Hesse-Cassel, was erected into a town A.D. 1303, and the territory of which it is the capital was made a county in 1429. It was fortified in 1528, and received a large addition to its population in 1598, in consequence of the numerous Fleming Protestant refugees. The new town was founded about 1600. Hanau was besieged for nine months by the Imperialists, under General Lamboi, who was compelled to retire June 13, 1636. Numerous French Protestants settled there in 1635. In 1736 the county was divided between Hesse-Cassel and Hesse-Darmstadt, but soon passed under
the exclusive power of the former. It was erected into a principality in 1803, seized by the French in 1806, united to the duchy of Frankfort in 1809, and ultimately restored to Hesse in 1813. The battle of Hanau, between Napoleon I., with about 70,000 men, and the Austrian and Bavarian army, under General Wrede, was gained by the former, Oct. 30, 1813. The loss was very severe on both sides.

HANDKERCHIEFS.—The first musical festival in memory of this composer commenced in Westminster Abbey A.D. 1784, the centenary of his birth. It lasted five days. The second day's performance was held at the Pantheon, and the receipts amounted to 11,842 guineas. Similar festivals were held on various occasions; and another on a large scale took place in Westminster Abbey, June 24, 26, 28, and July 1, 1834. A commemorative festival took place at the Crystal Palace June 20, 22, and 24, 1859. The chorus and band numbered 3,158 performers, the audience 61,260 persons, and the receipts amounted to about £30,000. Two rehearsals had been held at the same place June 15, 17, and 19, 1857; and July 2, 1858. The total number of visitors at the three days of the first performance was 48,418, while on the last occasion nearly 20,000 persons attended.

Handkerchiefs were unknown to the Greeks, but were used by the Anglo-Saxons, and during the Middle Ages. Laced handkerchiefs came into fashion in the reign of Queen Elizabeth.

HANGING.—This punishment is mentioned as the sentence of thieves, in a charter of the reign of Edgar (A.D. 959—974). The pirate William Marsh, executed in 1242, was the first person who was hanged, drawn, and quartered. The term "drawn" meant that the criminal was drawn on a hurdle to the place of execution. The old custom of hanging the bodies of criminals in chains was abolished by 4 & 5 Will. IV. c. 26 (July 25, 1834).

Hango (Finland).—Peter the Great gained his first naval victory over the Swedes off this village, in Finland, July 27, 1714. Here the Russians fired on an English flag of truce, killing six men, and wounding several more, June 5, 1855.

Hanover (Germany) was given to Hermann Billing by Otho the Great (A.D. 970), and passed into the possession of Henry the Black, duke of Bavaria, in 1107.

A.D. 1533. Lutheranism is adopted.
1614. The city of Hanover becomes the capital.
1692. Hanover is made an electorate.
1714. The elector succeeds to the English throne as George I.
1720. The walls of the city are levelled.
1735. Hanover is included in the convention between France and Prussia, for the neutrality of the North of Germany.
1801. April 3. It is occupied by the Russians.
1803. The bishopric of Osnaburg is annexed.
1811. Napoleon Bonaparte seizes Hanover.
1815. France cedes it to Prussia.
1827. It is again seized by the French.
1810. Part of the country is annexed to Westphalia.
1813. It is restored to its rightful elector, George III.
1814. Oct. 12. Hanover is erected into a Kingdom.

Hanover.

A.D. 1513. Part of Lauenburg is ceded to Prussia, in exchange for East Friesland and Harlingen.
1616. Now the duke of Cambridge is appointed lieutenant-governor.
1619. A new constitution is formed, on the model of the English.
1813. Oct. 5. George IV. visits Hanover.
1833. A new constitution is adopted, which confers more influence on the people.
1837. June 20. In consequence of the law of Hanover limiting the royal succession to male descendants, Ernest, duke of Cumberland, becomes king on the death of William IV.
1845. The Pantheon, Arsenal is built in the city of Hanover.
1848. The king abolishes the censorship of the press, and grants a new constitution.
1857. The new theatre at Hanover is erected.
1861. May 20. The king abolishes free institutions, by order of the federal diet.
1867. Dec. 31. Some of the jewels brought by George II. to England, in 1714, are restored to Hanover. Their value is estimated at £100,000.
1869. July 12. The State dues are abolished.

ELECTORS OF HANOVER.

1665. George Louis (George I. of England).
1727. George Augustus (George II.).
1769. George William Frederick (George III.).

KINGS.

A.D. 1814. George William Frederick.
1829. George Augustus Frederick (George IV.).
1830. William Henry (William IV.).
1837. Fredrick Augustus (duke of Cumberland).
1831. George V.

Hanoverian Supremacy.—Elizabeth, daughter of James I. of England, married Frederick V. elector palatine, A.D. 1613. Her daughter Sophia was born in 1630, and married Ernest Augustus, afterwards elector of Hanover, in 1658. By the Act of Settlement, 13 Will. III. c. 6 (1701), she was declared the next heir to the English throne after the descendants of William III. and of Queen Anne. Sophia died May 28 (O.S.), 1714, and on the death of Anne without issue, Aug. 1, 1714, her son, George Louis, elector of Hanover, succeeded to the English throne as George I.

Hanseatic League.—This union of German seaport towns was instituted about A.D. 1140, for the protection of their commercial interests, although the actual signing of the league did not take place till 1241. Henry III. conferred several immunities on this association in 1266, and in 1348 it possessed sufficient power to carry on a successful war with Denmark respecting the Sound dues. The League attained its greatest power about 1370, when it numbered 64 confederate and 44 allied cities. In 1448 they were at war with England, but had their privileges in that country restored in 1474. They were, however, finally abolished by Queen Elizabeth in 1575. In 1601 the Dutch supplanted them in the Mediterranean, and in 1630 their commerce was seriously injured by the invasion of Germany by the Swedes under Gustavus Adolphus.
The maritime law of this league was not published in a complete form till 1614, when its power had already begun to decline. In 1624 it originated maritime insurance companies, and in 1723 opened its ports to foreign commerce. The only towns still retaining the title of Hanse towns, are Bremen, Hamburg, and Lübeck. The merchants of the Hauz towns were called Hansards.

**HARBOURS.**—The improvement of harbours, docks, and piers, is regulated by 10 Vict. c. 27 (May 11, 1847).

**HARLEQUIN.**—The story of Harlequin, a minor character in the Italian commedia dell'arte, is not clearly recorded. It is supposed that he was a copy of Harleian Library, the invention of Mss. and pamphlets was formed by Mr. Harley, afterwards earl of Oxford, who died May 21, 1724. It was purchased from his trustees for £10,000, by the government, who received authority from 26 Geo. II. c. 22 (1753), and it is now in the British Museum. The “Harleian Miscellany,” a collection of the most interesting documents and tracts in the Harleian Library, first appeared in 1744. Another edition was issued in 1809.

**HARLEQUIN.**—The account given by Menage that this term is derived from a celebrated Italian actor, who appeared at Paris in the reign of Henry III. (a.d. 1547—1589), and received the name of Harlequin, or Little Harlay, from his constant attendance at the house of M. de Harlay, is incorrect, as the word was in use before that period. Dr. Clarke, who traces its origin to classical times, says that Harlequin is Mercury.

**HARLEY (LORD OXFORD’S) ADMINISTRATION.**—Godolphin was dismissed Aug. 8, 1710, the treasury being put in commission, with Lord Powlett at its head, and Harley, afterwards earl of Oxford, was made chancellor of the exchequer, Aug. 10, 1710, and lord high treasurer May 29, 1711. Lord Cowper resigned the great seal Sept. 25, 1710, and it was placed in commission until Oct. 19, when Sir Simon, afterwards Lord Harcourt, was made lord keeper, becoming lord-chancellor April 7, 1713. Harley’s associates were Lord, afterwards Earl Dartmouth, and Mr. St. John, afterwards Viscount St. John and Bolingbroke, secretaries of state. Earl Dartmouth, on accepting the privy seal in 1713, was replaced by Mr. Bromley. The Hon. G. Granville (afterwards Lord Lansdowne) became secretary at war Sept. 28, 1810: he was succeeded June 28, 1712, by Sir William Wyndham, Bart., who was followed by Mr. Francis Gwyn, Aug. 21, 1713. Sir William became chancellor of the exchequer Nov. 1, 1713. Dr. Robinson, bishop of Bristol, and afterwards of London, became lord privy seal April 28, 1711. The chancellorship of the exchequer was given to Hon. Mr. Benson, afterwards Lord Bingley, June 14, 1711. Oxford and Bolingbroke quarrelled, and the former was dismissed July 27, 1714. (See Shrewsbury Administration.)

**HARMONICA.**—Musical glasses are mentioned in a work published at Nuremberg a.d. 1651. The instrument was improved by Franklin in 1780. It first became known at Paris in 1765. John Stein invented a stringed harmonica in 1788.

**HARMONISTS.**—This religious sect was formed by the brothers George and Frederick Rapp, who emigrated from Württemberg to the United States in 1803, when they founded the town of Harmony, in Pennsylvania. In 1815 they built New Harmony, in Indiana, which was purchased by Robert Owen in 1824, in which year the Harmonists removed to a new settlement, which they named Economy. Community of property and the absence of marriage are the distinguishing features of this sect.

**HARNES.**—The invention of harness has been ascribed to Erichthonius, king of Athens, b.c. 1487. In the Middle Ages white harness was much used.

**HARP.**—Jubal is said to have been “the father of all such as handle the harp and organ,” Gen. iv. 21 (b.c. 3204). The harp was common in Egypt as early as b.c. 1500, and the instrument was introduced into Ireland at an early date. The Saxons and other northern barbarians possessed it when they first came into contact with the civilized inhabitants of Europe in the 5th century, and the Welsh are said to have used a harp of twenty-six notes in the 6th century. Erard’s pedal harp was patented in 1784, and his double-action harp in 1808.

**HARPER’S FERRY (Virginia).**—This village is the seat of a large state armory, established a.d. 1798, which was destroyed by the Federal commissioners to prevent it from falling into the hands of the Confederate states, April 18, 1861. It was the scene of the negro insurrection under Captain John Brown, Oct. 17, 1859.

**HARPONULLY (Hindostan).**—The rajah of Harponully became tributary to Hyder Ali a.d. 1774, and to Tippoo in 1786. On the fall of Seringapatam, in 1799, Harponully fell into the hands of the Nizam, by whom it was assigned to the East-India Company in 1800.

**HARRISBURG (Pennsylvania).**—The capital was founded a.d. 1785. It was incorporated 405.
in 1808, and made the chief town of Pennsylvania in 1812.

HARROGATE, or HARROWGATE (Yorkshire).—The "Old Spa," a chalybeate spring, in High Harrogate, discovered in 1571 by Captain Slingsby, was surrounded by a terrace in 1586. The waters from the "sulphur wells" of Low Harrogate were used both internally and externally before 1700. The "Crescent water" was discovered in 1783, and the Cheltenham water in 1819. The first inn was built at Harrogate in 1867.

HARROW-ON-THE-HILL (Middlesex).—Wulfrid, archbishop of Canterbury, purchased Harrow, then called Herges, and other lands, a.d. 822, for the purpose of restoring them to the church of Canterbury. The town, given in 1545 by Archbishop Cranmer to Henry VIII., in exchange for other lands, was granted by him to Sir Edward, afterwards Lord North, in 1546, and it continued in his family until 1636. The free school was founded in 1555 by John Lyon, a gilt-court, and part of the building was destroyed by fire Oct. 22, 1838.

HARTFORD (Connecticut).—This town, originally established by the Dutch a.d. 1633, received its name from a colony of English who settled there in 1635. It was incorporated as a city in 1784.

HARTWELL (Buckinghamshire).—The principal manor was bestowed by William the Conqueror on his natural son, William Peverell. Henry II. seized the estate in 1155. Louis XVIII. of France resided in the manor-house of Hartwell from 1809 until the restoration in 1814.

HARUSBICKS.—Priests in ancient Rome, instituted by Romulus about B.C. 750. They pretended to foretell future events by inspecting the entrails of animals. When abolished by Constantine I., a.d. 336, their number amounted to seventy.

HARWICH (Essex).—The Danes were defeated by the Anglo-Saxons in a naval battle off Harwich, a.d. 885. The town received a charter from Edward II. in 1315; this, after having been confirmed by several sovereigns, was extended in 1694. Isabel, queen of Edward II., landed here in 1326 with her son, Prince Edward. Edward III. sailed from Harwich in 1340, and gained an important victory over the French fleet off Sluys. The duke of York defeated the Dutch fleet near Harwich June 3, 1665. The Dutch lost twenty-four ships, and 3,000 men were made prisoners.

HANOVER (Battle).—The French defeated an allied army of British, Dutch, and Hanoverians at Hanover, July 25, 1757.

HASTINGS (Battle).—William of Normandy sailed from St. Valery Sept. 26, 1066, and arrived at Pevensey Sept. 28. His army, amounting to 60,000 men, landed and formed a camp at Hastings. Harold II., having marched to the north to encounter the Norwegians, whom he defeated at Stanford Bridge, Sept. 25, hastened to the south, and arrived in sight of the invader Oct. 13, 1066. The battle was fought at a place then called Senlac, now Battle, near Hastings, Saturday, Oct. 14, when, after an obstinate struggle, which lasted from sunrise to sunset, Harold II. was slain, and the Normans remained masters of the field. In 1067 William I. founded an abbey near the place where the victory was gained. It was dedicated to St. Martin, and is known as Battle Abbey.

HASTINGS (Sussex) was known by this name, at least as early as a.d. 780. Athelstan established a mint here in 925. It was burnt by the French in August, 1377. The town-hall, built in 1700, was rebuilt in 1823.

HARWOLFORD (Sea-fight).—Harold Harfager, of Norway, defeated the Vikingi, a.d. 875.

HAT, as an article of man's attire, was invented at Paris, by a Swiss, a.d. 1404. Hats were fashionable in France in the latter part of the reign of Charles VI., who died in 1422. Charles VII. is reported to have worn a white felt hat at his entry into Rouen in 1449. The pope of Rome was in the habit of sending "blessed hats" to princes and commanders of armies who deserved the gratitude of the Roman Catholic church. These hats were of violet silk, lined with ermine, and embroidered with gold and jewels. They were blessed by the pope, in solemn conclave, on Christmas-eve. The last hat of this description was given to General Daun, after the capture of Hochkirch in 1758. The crowns of the hats worn at the commencement of the 18th century were round. The Jews of Spain were formerly compelled to wear yellow hats. In many towns of Germany, bankrupts had to wear green and yellow hats. Hats were first manufactured in London by Spaniards in 1610; and came into fashion, and were taxed in 1785. The tax was repealed in 1811.

HATFIELD (Battle).—Henry IV. defeated the Percies, who had risen in arms against him, at this place, about three miles from Shrewsbury, July 28, 1403. Henry Percy (Hotspur) was killed in this action, sometimes called the battle of Shrewsbury.

HATFIELD (Hertford).—A council was held here Sept. 17, 680, against the Mono- thelites, at which Theodore, archbishop of Canterbury, presided. Hatfield, in the 10th century, was granted by Edgar to the abbey of Ely, and when the latter was made a bishopric, in the reign of Henry I., the manor-house became one of the residences of the bishop, and was on that account called Bishop's Hatfield. Elizabeth, who afterwards purchased it, was kept prisoner at Hatfield from 1555 till her accession in 1558. The left wing of the old palace was burned to the ground Nov. 27, 1835, and the dowager Marchioness of Salisbury perished in the flames.

HATRAH (Hindostan).—This town, ceded to the East-India Company by Dowiet Rowe Scindia, a.d. 1803, was besieged and taken by the British, March 1, 1817. Since its subjection to the English, its prosperity has materially increased.
HAT

HATS. (See Caps and Hats.)

HATTEMISTS. — The followers of Pontian van Hattem, an enthusiast, who spread his peculiar doctrines in Zeeland, towards the end of the 17th century.

HAVANA (Cuba). — This city, founded A.D. 1511, by Diego Velasquez, was taken by a French pirate in 1536. It was afterwards repeatedly seized by the Buoaneers. The university was founded in 1728. The English took Havana Aug. 14, 1762, and restored it to Spain the following year. Havana was probably erected into a bishopric soon after its foundation, as its second bishop died in 1528. In 1795 the remains of Columbus were removed from the cathedral of St. Domingo, where they had been deposited in 1536, to the cathedral at Havana. Three hundred and fifty houses were destroyed by a fire which broke out in this town Feb. 10, 1828.

HAVRE DE GRACE (France). — A fishing village converted into a town by Louis VII. A.D. 1609.

Francis I. fortified it, commenced the port, and gave it the name of Francis-copolis. It was placed in the hands of Queen Elizabeth by the Huguenots in 1562. It was besieged by the constable de Montmorency, who captured it June 28, 1563; and it was bombarded by the English in 1679, in July, 1694, in 1729, 1754, and 1795. Captain Oliver, of the Melopomene, made fruitless attempts to destroy the French fleet off this town, July 23 and Aug. 1, 1804. The town was injured by the shot fired into it on the occasion. In 1652 statues of Bernardin de St. Pierre and Casimir Delavigne, who were natives of the town, were erected; and in August, 1854, Havre was made the capital of the new department of Seine-Maritime. The old ramparts were removed in 1856, and, since 1853, two large forts have been erected on the heights above the town.

HAWKERS AND PEDDLARS. — These itinerant merchants first appeared in England about A.D. 1300. They are classed with rogues and vagabonds by 39 Eliz. c. 4 (1597), and were first compelled to obtain a license by 2 & 3 Will. III. c. 27 (1693). The annual duty, fixed at £4 by 50 Geo. III. c. 41 (June 2, 1810), was made payable to the commissioners of stamps by 1 & 2 Will. IV. c. 22, s. 75 (Sept. 22, 1831).

HAWKING AND FALCONRY. — The Greeks obtained from India and Thrace their first knowledge of hawking with birds of prey. Gibbon (ch. xiv.) remarks: "This favourite amusement of our ancestors was introduced by the barbarians into the Roman provinces." The art, common in Italy, is mentioned in the Roman laws, and in writings of the 4th and 5th centuries. Ecclesiastics were prohibited from hawking by the council of Agda, a.d. 568; and by Charlemagne in 769. A charter was granted by Ecgberht, king of the Mercians, to the abbey of Abingdon in 821, prohibiting persons from carrying hawks on the lands of the monks. The emperor Henry is said to have been called the Fowler, from having been found luring his hawk when his election to the empire was announced to him in 919. Falconry was carried to great perfection in the 12th century. Stealing hawks was made felony by 37 Edw. III. Before the close of the 17th century falconry was utterly neglected. Demetrius, physician to Michael VIII. (Paleologus) in 1270, is one of the oldest writers on falconry. His book was first printed at Paris in 1612.

HAYMARKET THEATRE (London) was first erected a.d. 1702, on the site of the King's Head inn. It was rebuilt and made a theatre in 1767. Fifteen persons were killed, Feb. 3, 1794, by a crowd rushing into the pit. The tailors of London created a riot here in 1805 on account of a farce, supposed to be insulting to that trade. The existing edifice was commenced in 1820, and opened July 4, 1821.

HAYTI, or HAITI (West Indies). — This island, which forms one of the Leeward group, was discovered by Columbus in December, 1492, and named by him Hispaniola. It was afterwards called St. Domingo, which was finally changed to its native title, Hayti, in 1803.

HAYTI. — A.D. 435. Hayti is conquered by the Spaniards.

1492. St. Domingo is founded.

1692. The island is attacked by Drake.

1693. The western coast is seized by the French.

1695. The French appoint a governor.

1727. St. Domingo is seized by the French by the treaty of Ryswick.

1722. The negroes rebel.

1725. They again revolt.

1726. The French abolish slavery in the island. Sept. 19. An English force arrives to protect the whites.

1795. July 22. Spain, by the treaty of Basel, surrenders her possessions in Hayti to the French.

1798. The British and French troops evacuate the island.

1801. July 1. The negroes declare themselves independent.

1802. Jan. The French invade Hayti, which they reduce to subjection, and compel the negro general, Toussaint-Louverture, to surrender, May 3.

1803. The negroes expel the French, and declare the island independent.

1804. The negro Dessalines is proclaimed emperor as James I.

1806. Oct. 17. James I. is assassinated by his subjects, who place his lieutenant, Christophe, at the head of affairs.

1811. June 2. Christophe and his wife are crowned king and queen, Petion retaining the presidency of half the island.

1812. Death of Petion, who is succeeded by Boyer.

1822. Boyer becomes president of the whole island.

1823. April 17. France recognizes the independence of Hayti.

1839. Dec. 23. The republic accedes to the conventions of Nov 20, 1831, and March 23, 1833, between Great Britain and France, for the suppression of the slave trade.

1843. Boyer is overthrown.

1852. April 18. Faustin I. is crowned at Port-au-Prince.

1855. Dec. 10. Faustin is repulsed by the troops of St. Domingo, and threatened with revolution by his own subjects.
1583. Dec. 22, Faustus is deposed. Dec. 23. A republic is proclaimed under the presidency of Geef. 1861. March 18, Hayti is declared to be united to Spain.

HEARTH-MONEY (Tax).—Fumage or rogue, vulgarly called smoke-farthings, were, according to Domcasday Book, paid for every chimney in the house. Edward the Black Prince, after his French victories, imposed a tax of one florin on every hearth in his French dominions. The tax was first established, by sanction of parliament, by 13 & 14 Charles II. c. 10 (1662). It was repealed by 1 Will. & Mary, sess. 1, c. 10 (1689).

HEAT, or CALORIC.—Little was known as to the phenomena of heat, till Dr. Black delivered his chemical lectures at Glasgow in 1757. He discovered the doctrine of latent heat, which he publicly announced April 25, 1762. Dr. (afterwards Sir William) Herschel announced the substantiality of heat May 15 and Nov. 6, 1800; and, in 1802, his experiments were repeated and confirmed by Sir Henry Englefield. The next important discoveries were made by Mr. (afterwards Sir John) Leslie, who published his theory of the radiation of heat in 1804, which was brought to greater perfection in 1813, by Delaroche, of Geneva.

HEBREWS, (Epistle to the,) was written by St. Paul, according to the best biblical critics, A.D. 61 or 62. Some writers refer it to A.D. 58. The letter was probably intended for the church at Alexandria, for in the Roman catalogues, from the end of the 2nd century, it is described under the title of "Epistola ad Alexandrinos."

HEBRIDES (Scotland).—These islands, long subject to the kings of Norway, became independent A.D. 1089. In 1153, Somerled, lord of these isles, invaded the mainland, and attempted to dethrone Malcolm IV. Having been defeated, he was killed in a second attempt made in 1163. They were ceded to Scotland in 1206. Magnus, their last independent chief, died in 1265, and they were held by chieftains in vassalage to the king of Scotland until 1346, when their ruler, John of Isle or Islay, assumed the title of "Lord of the Isles." James V. brought them under the dominion of Scotland. In 1748, the abolition of all heritable jurisdictions put an end to the power of the chieftains of the Isles. Dr. Johnson visited these islands in 1773.

HECATOMES, or the Sacrifice of One Hundred Oxen, is supposed to have originated in each of the hundred cities of Lycaonia sending a bullock for the general sacrifice, or in each of the hundred cities of Peloponnesus making a similar contribution towards a sacrifice to avert the plague. Pythagoras (B.C. 658-556) is said to have offered a hecatomé on discovering the 47th proposition of the first book of Euclid.

HECLA (Iceland).—Forty-three eruptions of this volcano are on record since A.D. 900. Of these five were simultaneous, or nearly so, with eruptions of Vesuvius, four with eruptions of Ætna, and one with an eruption both of Ætna and Vesuvius. An eruption that commenced in June, 1784, lasted until May, 1785. Sir Joseph Banks visited Hecla in 1772, and Sir George Mackenzie in 1810.

HEDGES MOOR (Battle).—Lord Montacute, brother of the earl of Warwick, at the head of a Yorkist army, defeated Queen Margaret at this place, near Wooler, April 28, 1464.

HEGIRA.—This era dates from the flight of Mohammed from Mecca to Medina, which happened during the night of Thursday, July 15, A.D. 622. The era commences July 16.

HEIDELBERG (Baden), but a village A.D. 1235, was enlarged by Robert, count palatine, in 1362. It was plundered by the Bavarians in 1622. The Swedes captured it in 1653, and they retained possession till the peace of Westphalia in 1648. It was sacked by Turenne in 1674, and ravaged by the French in 1674 and 1665. The electors removed their residence to Mannheim in 1717. Heidelberg was ceded to the grand-duchy of Baden in 1802. Its university, the most ancient in Germany except that of Prague, was founded in 1386. The famous Heidelberg turn was constructed in 1751. It is the largest wine-cask in existence, measuring 36 feet long and 24 feet high, with a capacity of 800 hogsheads, or 283,200 bottles. It has remained empty since 1769.

HEILBRONN (Württemberg) was founded by Charlesmagne A.D. 805, and came under the dominion of the see of Wurzburg in 1225. It was raised to the rank of a free imperial city in 1360, and was taken by a storm in the War of the Peasants, 1525. The Protestant League of Germany was formed here in 1594, and a treaty between Sweden and the Protestant states of Germany was concluded here in March, 1633. It was made over to the king of Württemberg in 1803.

HEILIGER LEE (Battle).—The Spaniards were defeated by Louis of Nassau and the Dutch patriots near the monastery of Heiliger Lee, or the "Holy Lion," May 23, 1568.

HEIDEL (Holland).—The Dutch admiral Van Tromp was killed off the Holder Point, A.D. 1653. The English, having captured the Dutch fleet, Aug. 90, 1793, took possession of Heidel. They retired in October of the same year.

HELena, St. (Atlantic), was discovered May 21, 1502, by Juan de Nova Castella, a Portuguese. It was occupied by the Dutch, some time after 1610. They removed their colony to the Cape of Good Hope in 1651, when St. Helena fell into the possession of the English. The Dutch captured it in 1665 and in 1673, and on both occasions were speedily expelled. Charles II. granted it to the English East-India Company in 1673. In 1816 it was made the abode of the emperor Napoleon I., who landed on the island Oct. 16, 1815, and resided there until his
death, May 5, 1821. His remains were removed to France in 1840.

HELGA (Battle).—The Swedes and Norwegians defeated Canute near this river, in Denmark, a.d. 1025.

HELIER, St. (Jersey), was founded by the Normans, a.d. 837. The parish church was built in 1341. Fort Regent was commenced in 1560, and completed in 1806. Elizabeth Castle, erected in 1688, received great additions in 1836. The Court-house was built in 1647. St. Helier was surprised by the French, Jan. 6, 1721. The harbour pier was completed in 1819. Queen Victoria visited St. Helier, Aug. 28, 1846, and again Aug. 13, 1859.

HELIGoland (North Sea).—This island was a dependency of the duchy of Holstein, until captured by the English, Sept. 5, 1807. It was definitively assigned to England by the treaty of Kiel, Jan. 14, 1814, and ceased to be occupied as a military post in 1821.

HELIOMETER was first suggested by Ræmer about a.d. 1678, and was described by Savary in 1743. Bouguer constructed his heliometer in 1746. It was improved by Dollond in 1753, and by Ramsden in 1777.

HELIOPOLIS. (See BAALEBEC.)

Hellenists.—Jewish colonists who settled in Egypt, after the destruction of the kingdom of Judah, about b.c. 606. Their number was increased by the Jewish colonies planted by Alexander, b.c. 336.

HELLESPONT. (See DARDANELLES.)

HELL-FIRE CLUBS.—Three secret associations under this name, to which about forty persons, of both sexes, belonged, existed in London a.d. 1721. Their tendencies and mummeries were believed to be similar to those of the Mohocks, forbidden, under high penalties, in 1711. A royal proclamation, dated April 28, 1721, interdicted such associations.

HELMETS were worn by the ancient Egyptians and Assyrians, and by the Greeks, Romans, and Etruscans. The Britons did not use them before the Roman invasion, and they were rare among the Franks and Germans. The Anglo-Saxons wore four-cornered pyramidal helmets of leather, and the Danes, conical protections of metal, which also formed part of the armour of the Saxon nobles at Hastings. The nasal-piece was added in the 10th century, and cylindrical flat-topped helmets were introduced in the 12th, the earliest specimen being one worn by Charles the Good of Flanders, a.d. 1122. Fan crests became general in the 13th century; the round-topped helm came into fashion about 1270; and the sugarloaf-shaped helmet about 1290. Bell-shaped and broad-brimmed helmets were sometimes worn in the 14th century, though they never became general. In the 15th century helmets of osir boulli and wicker-work were worn by archers; and in the 16th century the close helmet, or burgonet, was introduced, and mask-visors of grotesque design were in vogue. An attempt was made during the reign of Charles II. to invent a head-covering answering the double purpose of a helmet and a hat.

HELMSTADT (Brunswick).—A university was founded here a.d. 1576. It was suppressed by Jerome Bonaparte in 1809.

HELOIS.—The inhabitants of the town of Helos, in Laconia, captured by the Spartans b.c. 700. They were employed either as domestic slaves, cultivators of the land, or in the public works; and, being cruelly treated, often rose in rebellion. This was the case during the great earthquake b.c. 494, and in the Peloponnesian war b.c. 420. The term was afterwards applied to all captives condemned to servitude.

Helsingborg (Battle).—The Swedes defeated the Danes at this town, in Sweden, March 10, 1709. A convention between Great Britain and Sweden was concluded here Aug. 31, 1805.

HelsingforS (Russia), built by Gustavus I. in the 16th century. The Russians burned it in 1723 and in 1741. It was ceded to Russia in 1809, and they made it the capital of Finland in 1819.

Helvetic Republic.—The title of the government established in Switzerland by its French conquerors in April, 1798. (See Switzerland.)

Helvetii.—This Celtic tribe inhabited the country now called Switzerland, and under their leader Divico defeated L. Cassius Longinus, and compelled his army to pass under the yoke, b.c. 107. Orgetorix led them into Gaul b.c. 61, and they were totally defeated and cruelly massacred by Julius Caesar on the banks of the Saône, b.c. 58.

Helmstedt (Holland).—William, prince of Orange, sailed from this port for England, Oct. 19, 1688. It was taken by the French in January, 1795, and was evacuated by them Dec. 5, 1813.

Hemp.—This plant has been grown in Bengal from the earliest ages, and was woven into cloth by the ancient inhabitants of Thrace. It was introduced into this country about A.D. 1139. Its cultivation was ordered by 24 Hen. VIII. c. 4 (1532). Its growth in the North American colonies was encouraged by 3 & 4 Anne, c. 10 (1708).

Hensbury Hill, or Hengestdown (Battle).—Egbert defeated the Northmen at this place, in Cornwall, A.D. 835.

Hennebon (France).—The succession to Brittany was disputed by Charles of Blois, nephew of Philip VI., king of France, and John de Montfort, A.D. 1341. Charles of Blois besieged De Montfort's wife Jane, in the town of Hennebon, in 1342. This heroic woman was on the point of surrendering the town, when the English fleet, conveying reinforcements under Sir Walter Manny, entered the harbour.

Hennotic, or Edict of Union, was published by the Greek emperor Zeno A.D. 482, for the purpose of reconciling the rival
churches of Alexandria and Constantinople. Felix III. condemned it in 483, and it was revoked by Justin I. in 518. (See Acacians.)

Henry III. — The followers of Henry, a monk and hermit, who attempted to effect a reform amongst the clergy in the 12th century. He quitted Switzerland, travelled through Bordeaux and Poitou, and arrived at Toulouse in 1147. Eugenius III. condemned his views at the council of Rheims, March 21, 1148, and committed Henry to prison, where he died.

Henry the Younger, the youngest son of William I., was born at Selby, in Yorkshire, in 1068. He was chosen king at Winchester, Aug. 3, and crowned at Westminster, Sunday, Aug. 5, 1100. He married Maud, daughter of Malcolm, king of Scotland, Nov. 11, 1100. She bore him a son and a daughter,—William, duke of Normandy, who perished by shipwreck, Nov. 25, 1120, and Maud, married to Henry V., emperor of Germany, Jan. 7, 1111, and, after his death (May 22, 1125), to Geoffrey of Anjou, Aug. 26, 1127. She received homage as future queen, Dec. 25, 1126, and contested the crown with Stephen. Henry the First's queen, Maud, died at Westminster, May 1, 1118; and Feb. 2, 1121, he married Adelais of Louvain, who survived him, leaving no issue. Henry died at Rouen, Sunday, Dec. 1, 1135. He was named Beaumellec.

Henry the Second, the eldest son of Geoffrey of Anjou, and Maud, daughter of Henry I., was born at Mans, in Maine, March, 1133. He was crowned at Westminster, Dec. 19, 1154. He married Eleanor, the divorced wife of Louis VII., Whitsunday, May 18, 1152. They had five sons and three daughters,—William, born in 1152, and died in 1156; Henry, born Feb. 26, 1155, died June 11, 1185; Matilda, born in 1156, married to Hugues II., count of Champagne, Mar. 4, 1168, and died June 28, 1189; Richard (see Richard I.); Geoffrey, born Sept. 23, 1158, killed at a tournament Aug. 19, 1186; Eleanor, born in 1162, married to Alfonso III., of Castile, in 1170, and died Oct. 31, 1214; Joanna, born in October, 1165, and died in September, 1199; and John (q.v.), afterwards king. Henry II. died at Chinon, July 6, 1189. He was named Fitz-Empress.

Henry the Third, eldest son of King John and Isabellas, was born at Winchester, Oct. 1, 1207; was crowned at Gloucester, Friday, Oct. 28, 1216. He married Eleanor of Provence, Jan. 14, 1236, by whom he had six sons and three daughters. Of these, five, namely, Robert, John, William, Henry, and Catherine, died young. Edward (see Edward I.) was born June 18, 1239; Margaret was born in 1241, married to Alexander I. of Scotland, Dec. 26, 1251, and died in 1275; Beatrice was born in 1242, and died in 1275; and Edmund was born in 1245, created earl of Lancaster, and died in 1286. Henry III. died at Westminster, Wednesday, Nov. 16, 1272, and was buried in the abbey, Nov. 20. In 1258 his widow Eleanor became a nun at Amesbury, where she died June 24, 1291. Henry III. was surnamed Winchester from the place of his birth.

Henry the Fourth, the only son of John of Gaunt, was born at Bolingbroke in 1366, was acknowledged king on Tuesday, Sept. 30, 1399. In 1390 he married Mary de Bohun, by whom he had four sons and two daughters; namely, Henry V. (q.v.); Thomas, born in 1389, created duke of Clarence in 1412, and was killed at Bauge, March 22, 1421; John, born in 1390, created duke of Bedford in 1415, and died Sept. 14, 1455; Humphrey, born in 1391, created duke of Gloucester in 1414, and died in February, 1447; Blanche, born in 1392, and died May 22, 1409; and Philippa, born in 1393, married to Eric XIII. of Denmark, and died Jan. 5, 1430. Henry's first wife, Mary, died in 1394, and Henry married Joan of Navarre, widow of John V. of Brittany, April 3, 1402. The marriage was celebrated at Winchester, Feb. 26, 1403. She had no children, and survived the king, dying in 1437. Henry IV. died at Westminster, Monday, March 20, 1413. He was surnamed Bolingbroke.

Henry the Fifth, the eldest son of Henry IV., and his wife Mary, was born at Monmouth, Aug. 9, 1388. He ascended the throne March 21, and was crowned at Westminster, April 9, 1413, and married Catherine of France, June 2, 1420. She bore him one child, Henry VI. (q.v.), and survived her husband, who died at Bois-Vincent, Aug. 31, 1422. He was named Monmouth.

Henry the Sixth, the only son of Henry V. and Catherine of France, was born at Windsor on Dec. 6, 1421, proclaimed king Sept. 1, 1422, and crowned at Paris Dec. 17, 1428. He married Margaret of Anjou, April 22, 1445. They had one son, Edward, born Oct. 13, 1453, was killed at Tewkesbury, Saturday, May 4, 1471. Henry was called the 'Good'; he died April 13, 1470; and again deposed April 14, 1471. From that time he was kept in the Tower, where he was probably put to death in June of the same year. His queen, Margaret, survived him, and died in penury at Dampierre, Aug. 25, 1481. Henry was named Windsor.

Henry the Seventh, son of Edmund Tudor, earl of Richmond, and Margaret, daughter of John Beaufort, duke of Somerset, was born at Pembroke Castle, Jan. 21, 1456. He was proclaimed king after the victory on Bosworth Field, Aug. 22, 1485, and was crowned Oct. 30. He married Elizabeth of York, Jan. 18, 1486, thereby uniting the houses of York and Lancaster, that had long contested the right to the crown. They had three sons and four daughters, of whom Edmund, Elizabeth, and Catherine died in infancy. Their other children were Arthur, born at Winchester Sept. 20, 1486, married Catherine of Aragon Nov. 14, 1501, and died April 2, 1502; Margaret, born Nov. 29, 1489, and died in 1541; Henry, who became king (see Henry VIII.); and Mary, born in 1498, married to Louis XII. of France Oct. 9, 1514, and died June 26, 1533. Elizabeth died
February 11, 1509. Henry VII, died at Richmond, April 21, 1509.

Henry the Eighth, the second son of Henry VII. and Elizabeth of York, was born at Greenwich June 28, 1491; succeeded to the throne April 22, 1509; and was crowned at Westminster June 24, in the same year. He married Catherine of Aragon, his brother Arthur's widow, July 6, 1509. The marriage was pronounced null and void May 23, 1533. Henry had married Anne Boleyn in January, 1533, and this union was declared lawful May 23, 1533. Anne's marriage was set aside May 17, and she was executed May 19, the king marrying Jane Seymour May 20, 1536. Jane Seymour died Oct. 24, 1537, and Henry married Anne of Cleves Jan. 6, 1540. This marriage was pronounced invalid July 10; abrogated by parliament July 24; and Henry married Catherine Howard July 28, 1540. She was executed Feb. 12, 1542; and Henry married Catherine Parr, a widow, July 10, 1543. She survived him, dying in Sept. 1544. In addition to children who died in infancy, Henry had, by Catherine of Aragon, Mary (q.v.); by Anne Boleyn, Elizabeth (q.v.); and by Jane Seymour, Edward (see Edward VI.). Henry died at Westminster, Friday, Jan. 28, 1547.

Heptarchy.—This word, which signifies the government of seven rulers, is applied to the divisions of England under the Saxons. The first Saxons to arrive in England was that of Kent, founded A.D. 455. The erection of Sussex into a kingdom in 491, established the Diocrychy, which became a Triarchy, on the foundation of Wessex in 519. The commencement of the states of Essex and East Angles, in 527, made it a Pentarchy, which became a Hexarchy when Ida founded Bernicia, in 547, and a Heptarchy on the establishment of the British kingdom of Deira, in 559. An eighth state, Mercia, formed in 586, constituted the Octarchy, which continued till 670, when the union of Deira and Bernicia into the single kingdom of Northumbria, restored the Heptarchy. The seven kingdoms were gradually united under one by Egbert and his successors. (See Britannia and England.)

Heraclea (Magna Graecia) was founded B.C. 432. The Romans were defeated near this city by Pyrrhus, B.C. 290.

Heraclea, or Minoa (Sicily).—Little is known concerning the early history of this town, which was repeopled by the Dorians B.C. 510. It was an important place during the first and second Punic wars.

Heracleia Pontica (Asia Minor) was founded by the Megarians, B.C. 986. The inhabitants supplied the 10,000 Greeks under Xenophon with vessels to carry them back to Cyzicus, B.C. 401. The republican government of the city was overthrown by Cleodorus, B.C. 390. Heraclea furnished succour to Ptolemy against Antigonus, B.C. 307. The Roman consul Aurelius Cotta sacked and plundered the city B.C. 74.

Heracleonites.—A Gnostic sect, the followers of Heracleon, a pupil of Valentin, that arose in the 2nd century.

Heracleides, the descendants of Hercules, who, after his death, B.C. 1209, were expelled from the Peloponnesus, and took refuge in Attica. The return of the Heracleides, B.C., 1104, forms a celebrated epoch in ancient chronology, as marking the transition from the heroic or fabulous ages to the period of authentic history.

Heraldry.—The origin of heraldry has been claimed for the Egyptians, Greeks, and other ancient nations, but it is of much later date, and probably arose from the devices painted on German banners. Blazonry was introduced by the French, whether in the time of the Merovingians, who became extinct in 754, or in the 9th or 10th century, is uncertain. Family bearings were established among the kings of the Heptarchy. Heraldry, as a science, was not introduced into England till 1147; crests were borne about 1286. Heralds, as now established, were instituted by Richard III. in 1483, and were incorporated March 2, 1483.

Heralds' College (London).—This institution was incorporated by letters patent of Richard III., dated March 2, 1483. Queen Mary gave Derby House for the purposes of the college, July 18, 1554; and this being destroyed in the great fire of 1666, the present edifice in Doctors' Commons was erected by Sir Christopher Wren in 1683. The college consists of the three kings-at-arms, viz., Garter, Clarenceux, and Norroy; of six heralds, —Lancaster, Somerset, Richmond, Windsor, York, and Chester; and of four pursuivants, —Rouge Croix, Blue Mantle, Portcullis, and Rouge Dragon.

Herat (Afghanistan) in the time of Alexander was the capital of an extensive province. From A.D. 1150 to 1220 it was the residence of the Gourides. This city was taken from the Persians by the Afghans in 1715. It was retaken by Nadir Shah in 1731; and recovered by the Afghans in 1749. The Persians attacked it in 1833 and 1838, without success. It was surrendered to the Persian general Sultan Murad Mirza by Issa Khan, after a long siege, Oct. 26, 1856. The Persian troops evacuated it July 27, 1857.

Herculaneum (Italy).—This ancient city of Campania had Hercules for its reputed founder, and was undoubtedly of great antiquity. It suffered severely from an earthquake A.D. 63, and was entirely overwhelmed by an eruption of Mount Vesuvius, Aug. 24, A.D. 79. A second settlement, formed near the site of the buried city, met with a similar fate A.D. 472. Even the situation of Herculaneum was forgotten. In 1709 some fragments of statues, &c., were discovered in sinking a well, and in 1738 the theatre was discovered and explored by Colonel Alcubier. A description of the city was published by the Academy of Naples at the expense of the government, under the title of "Antichità di Ercolano" (1757-92).

Hereford (Herefordshire) was the seat of
of a bishop A.D. 676. A cathedral was built here in 825, rebuilt in 1030, and destroyed by Griffin, when he pillaged the city, in 1055. The present edifice was commenced in 1079. The town was pillaged by the Welsh, under Griffin, Oct. 24, 1055, and was taken by King Stephen in 1141. The parliamentary troops captured it in 1643. It was incorpo-
rated Oct. 9, 1189, and its last charter is dated June 14, 1697.

HERETICS.—St. Augustine defines heretics as those "who, when they are reproved for their unsound opinions, contumaciously resist, and, instead of correcting their pernicious and damnable doctrines, persist in the defence of them, and leave the Church and become her enemies." In the primitive Church they were not regarded as Christians: marriages between them and the orthodox were prohibited in 366 by the council of Laodicea; and the Theodosian Code, promulgated in 438, deprived them of the benefit of sanctuary. The most important heretical sects will be found under their respective titles. By 25 Hen. VIII. c. 14 (1533), offences against the see of Rome do not constitute heresy. All former statutes on the subject were repealed by 1 Eliz. c. 1 (1559), which rendered it an ecclesiastical offence, only to be judged in ecclesiastical courts. The burning of heretics was abolished by 29 Charles II. c. 9 (1676). Persons relapsing from Christianity into a belief in more than one God, or a denial of the sacred Scriptures, were rendered liable to sundry civil disabilities, and, on persistence in the offence, to imprisonment for three years, by 9 & 10 Will. III. c. 32 (1698).

HERMANNSTADT (Transylvania) was founded by the Saxons, A.D. 1160. The Austrians were defeated near this town by the Hungarians, Jan. 21, 1849. The Russians occupied this town July 21, 1849, were driven out Aug. 5, and regained possession, having defeated the Hungarians with much slaughter, Aug. 6.

HERODIANS, mentioned by Matthew (xxiii. 16) and Mark (iii. 6, xii. 13), are believed to have been the adherents of Herod the Great, appointed governor of Galilee by Antipater B.C. 47. After he had obtained the throne, B.C. 40, he gained numerous par-
tisans among the Jews, and they were probably formed into a sect under his death, B.C. 4 (March 13). Dr. Martin Luther translated the word Ἡρωδιαῖος into "Diener des Herodes," servants of Herod. They were a political party rather than a religious sect.

HERERA (Battle).—The Carlists defeated the queen's troops near this place, in Aragon, August 24, 1837.

HERRING FISHERY.—The Scotch were extensively engaged in this fishery in the 9th century A.D., and the Dutch first practised it in 1164. By the Statute of Herrings, Edw. III. st. 2 (1387), the sale of the fish at sea was prohibited, and the trade was placed under the control of the chancellor and treasurer. This statute mentions Yarmouth as the great seat of the herring fishery. The method of curing the fish with salt was in-
vented by Beukels, a Dutchman, who died in 1397. The Society of the Free British Fishery was incorporated in 1749 for the regulation of the herring fisheries, and a similar company was formed in 1786, but neither met with much success, in spite of the extravagant bounties granted for their encouragement. By 43 Geo. III. c. 110 (June 25, 1808) commissioners were appointed, whose business was to superintend the cleansing, packing, &c. of the herrings, and in 1830 the bounties were discontinued.

HERINGS, (Battle of), fought at Roveroy, near Orleans, Feb. 12, 1420, between the English and the French, the latter being defeated. The French endeavoured to cut off a convoy of provisions for the army besieging Orleans, and for this reason the action was called the battle of Herrings.

HERTFORD (Hertfordshire).—A castle was built here in the reign of King Alfred. A council was held at Hertford, Sept. 24, 673. Edward the Elder erected another castle in 906, which was granted by Edward III. to John of Gaunt in 1345. The earliest authenticated charter of Hertford was granted by Elizabeth, in 1588; and that by which it was governed was granted in 1680.

HERTFORD COLLEGE (Oxford).—Hertford Hall was in existence in the reign of Edward I. and in 1312 was conveyed to Walter Stapleton, bishop of Exeter. It became a dependancy of Exeter College; was re-established in 1710, and was raised into a perpetual college by royal charter, Aug. 27, 1740. It was dissolved in 1818.

HERULI.—This Teutonic tribe, from the coast of the Baltic, descended the Danube to the Black Sea, A.D. 200, and sailed through the Hellespont, in 500 ships, in 262, when they began plundering the cities of Greece, burning, among others, the famous temple of Diana at Ephesus. They were met near Athens by Dexippus, who routed them in 267. They again wandered northward, invaded Italy, and overthrew the Western empire in 476. The Longobardi almost destroyed them in 512, and their name is mentioned for the last time in history at the defeat and death of Teias by Narses, in March, 553.

HERZEGOVINA, or HERZEG, (European Turkey).—This province, which originally formed part of Croatia, was incorporated with Bosnia A.D. 1326. It was seized by the Turks in 1463. It was formally ceded to the porte by Austria at the peace of Carlowitz, Jan. 26, 1699, and was overrun by a band of Montenegrins in October, 1855.

HESSE (Germany).—This country was originally peopled by the Catti. In the time of Clovis it formed part of Thuringia, but in A.D. 902 was under the government of a count of Hesse. It afterwards passed by marriage into the possession of Louis I. of Thuringia (1130-1140), and on the extinction of his male descendants in 1247, was erected
Elizabeth founded a free grammar-school here in 1598.

Hieracim, or Hieratics.—The followers of Hierax, an Egyptian bishop of Leontopolis, who taught towards the close of the 3rd century. He was an ascetic.

Hieroglyphics, literally "sacred engravings or sculpture," are believed to be the oldest mode of writing known to mankind.

The invention is usually attributed to Athotes, b.c. 2122. The simplest form of hieroglyphics, the phonetic, continued in general use in Egypt till the time of the 22nd dynasty, or about b.c. 1000, when the hieratic character was introduced. This was employed till the commencement of the 25th dynasty, about b.c. 800, when a new form, the demotic, came into use.

It was employed till the Christian era, when it was finally superseded by the modern Coptic. At the time of Clement of Alexandria, a.d. 211, hieroglyphics had passed into the condition of a dead language.

The last notice of them is by Horus Apollo, of Phenebatis, a.d. 500. Subsequently all knowledge of hieroglyphics totally disappeared, till the discovery by M. Bouchard, in 1799, of the Rosetta stone, a tablet bearing a decree in honour of Ptolemy Epiphanes, issued b.c. 196, gave a clue to their interpretation.

The Rosetta inscriptions were partly deciphered by Silvestre de Sacy in 1801, by Akerblad in 1802, by Champollion le Jeune in 1814, and principally by Young in 1817-18.

Champollion published his Grammar of Hieroglyphics in 1816, and his Dictionary in 1814.

High Commission Court.—This tribunal was established by 1 Eliz. c. 1, s. 18 (1559), to exercise jurisdiction in matters of an ecclesiastical nature. It sat for the last time at St. Paul's, Oct. 22, 1640, and was finally abolished by 16 Charles I. c. 11, s. 3 (1641). James II. attempted to revive it.

Highness.—This title, borne by Henry VII. and Henry VIII., was relinquished towards the end of the latter's reign for the style of "your majesty." It was conferred on the prince of Orange by Louis XIV. in 1644. The prince of Condé was the first to assume the title of Serene Highness.

High treason.—The highest offence known to English law, defined and regulated by 35 Edw. III. st. 5, c. 2 (1350). By 7 & 8 Will. III. c. 3 (1695), persons accused thereof were to be prosecuted within three years of the alleged offence, unless it was a plot to assassinate the sovereign. Trials for this crime are conducted in the same form as trials for murder by 39 & 40 Geo. III. c. 93 (July 28, 1800). The punishment for high treason, according to 54 Geo. III. c. 146 (July 27, 1814), is drawing on a hurdle, hanging, and quartering, which may be commuted to simple decapitation if the sovereign pleases. Petty treason having been abolished by 9 Geo. IV. c. 31, s. 2 (June 27, 1829), the term high is not now used, the offence simply being styled treason.

Hildeshem (Hanover).—A bishopric, founded at Elze a.d. 312, was removed to
Hildesheim a.d. 822. The cathedral was founded in 818. It was secularized, and taken possession of by the king of Prussia, in 1803. It was incorporated with the kingdom of Westphalia in 1807, and annexed to the kingdom of Hanover in 1813, the annexations having been confirmed by the Congress of Vienna in 1814-15.

Himera (Sicily) was founded by a colony from Zancle, b.c. 648. A great battle was fought near the city, between the Carthaginians and the Sicilians, the latter being victorious, b.c. 480. Some new colonists, of Doric extraction, arrived here b.c. 476. It was raised to the ground by the Carthaginians, b.c. 406. Many of the inhabitants returned, and founded a new city near the site of Himera, b.c. 405. Agathocles was defeated at Himera b.c. 310. (See Therte.)

Hindostan, or Hindustan, signifying, in the Persian language, the country of the Hindoos, has been applied by geographers to that part of India called the Peninsula within the Ganges, extending from Cape Comorin to the Himalaya mountains. (See India.)

Hira (Chaldea).—This ancient city, which is now known as Medischal Ali, was founded by the Arabs a.d. 190. It was destroyed by Saad Ben Abi Veas in 689, and has never regained its former importance. Gibbon (ch. ii.) says that "Hira was the seat of a race of kings who had embraced the Christian religion, and reigned above 600 years under the shadow of the throne of Persia."

Historiographer Royal.—This office was revived by Charles II. a.d. 1660, in favour of James Howell. In 1665 Bernard Andreas was historiographer to Henry VII.

History.—Bacon divides human learning into history, poetry, and philosophy. Oral tradition was the mode in which historical facts were at first transmitted from one generation to another. The Old Testament is the earliest historical work in existence. Herodotus, born b.c. 484, and called the "father of history," is the earliest classical historian. With reference to the period at which Ancient history terminates and Modern history commences, a writer in Blackwood (vol. xxxii. p. 790, note) remarks,—"It has repeatedly been made a question at what era we are to date the transition from ancient to modern history. This question merits a separate dissertation. Meantime, it is sufficient to say in this place that Justinian in the 6th century will unanimously be referred to the ancient division; Charlemagne in the 8th to the modern. These, then, are two limits fixed in each direction; and somewhere between them must lie the frontier line. Now the era of Mohammed in the 7th century is evidently the exact and perfect line of demarcation; not only as pretty nearly bisecting the debateable ground, but also because the rise of the Mohammedan power, as operating so powerfully upon the Christian kingdoms of the south, and through them upon the whole of Christendom, at that time beginning to mould themselves and to unite, marks in the most eminent sense the beginning of a new era."

Hittites.—This nation was descended from Cheth, or Heth, the second son of Canaan, b.c. 3200. "Uriah the Hittite" was one of the thirty composing David's body-guard, b.c. 1048. The Egyptian annals refer to a very powerful confederacy of Hittites in the valley of the Orontes, with whom Sither I. waged war, b.c. 1340, and whose capital, Ketzeh, near Emesa, he conquered. Solomon compelled them to pay tribute about b.c. 1000 (I Kings ix. 20).

Horat-town (Australia), the capital of Tasmania, or Van Diemert's Land, was founded in 1804. It was thrown open to free settlers in 1819.

Hochkirchen (Battles).—The Austrians defeated Frederick II. of Prussia at this place, in Saxony, Oct. 14, 1758. Napoleon I. gained a victory here over an allied Russian and Prussian force May 22, 1813.

Hochst (Battle).—The imperialists defeated Christian I. of Brunswick at this place, near Mayence, June 20, 1622. The Austrians defeated the French at the same place Oct. 11, 1755.

Hochstadt (Battles).—The emperor Henry IV. was defeated in the plains of Hochstadt a.d. 1081. The French and Bavarians defeated the imperialists here Sept. 18, 1703.

Hohenburg (Battle).—The emperor, Henry IV. of Germany, defeated the rebellious Saxons in this battle, fought June 9, 1075.

Hohenfeldburg (Battle).—Frederick II. of Prussia defeated the Austrians under Prince Charles, at this village of Silesia, June 4, 1746.

Hohenlinden (Battle).—The French and Bavarians defeated an Austrian army at this village, in Bavaria, Dec. 3, 1800. The former lost 9,000, and the latter 18,000 men in the battle. The French and Bavarians took 97 pieces of cannon and 7,000 prisoners.

Hohenlinden Convention was concluded Sept. 28, 1800, between Austria and France. The fortresses of Philipburg, Ulm, and Ingoldstadt were given as securities to Napoleon Bonaparte, and a suspension of arms for forty-five days, commencing Sept. 21, was agreed upon.

Hohenstaufen.—The founder of this house was Frederick von Buren, who lived about a.d. 1040. His son fought valiantly under the emperor Charles IV. in the battle of Mecznburg, 1090, and received the hand of the emperor's daughter Agnes, together with the dukedom of Swabia, in 1081. Conrad, his grandson, was elected emperor of Germany Feb. 22, 1188. Conrad was succeeded as emperor by his nephew, Frederick I., surnamed Barbarossa, 1152-90; and the imperial throne was occupied by his son and grandson till 1254. The sole
and last survivor of the Hohenstaufen race, Conradin, tried to regain the family heritage; but having been defeated in the battles of Benevento, Feb. 28, 1266, and of Tagliacozzo, Aug. 29, 1268, he was made prisoner and beheaded at Naples, Oct. 23, 1268.

HOHENZOLLERN.—This, the royal house of Prussia, was founded by Count Thassilo, who built the castle of Zollern, afterwards called Hohenzollern (High-Zollern), a.d. 800. The castle was greatly enlarged by Frederick, the first count of Zollern, in 980. Frederick III. gained the title of prince and the government of Nuremberg in 1273. In the 16th century the house separated into two branches, the younger of which subsequently became kings of Prussia, while the elder remained princes of Hohenzollern. Frederick VI., of the younger line, received the province of Brandenburg from the emperor in 1316. His successor acquired the terems of Prussia in 1560. Another Frederick made himself king of Prussia January 18, 1701. The principalities of Hohenzollern-Hechingen and Hohenzollern-Sigmaringen, for many centuries in the possession of the elder line, were united with Prussia by treaty, March 20, 1850.

HOLLAND.—This country was, in the time of the Romans, inhabited by a warlike tribe, called the Batavi.

A.D.

692. Holland is invaded by Pepin Herilost, mayor of the palace to Dagobert II., of Austrasia.

735. The country becomes tributary to France.

993. The county is made hereditary.

1010. It is invaded by the Normans.

1151. The Hollanders establish large colonies south of the Elbe.

1291. Florence V., count of Holland, claims the throne of Scotland.

1329. The county is transferred to the family of Holstein.

1334. Guy of Flanders seizes Zealand and North Holland, from which he is expelled by the young prince William.

1348. Rise of the Kabbeljauwen and "Hocks," the former term designating nobles, who support William, and the latter the people and citizens, who espouse the cause of his mother Margaret.

1339. The Kabbeljauwen rebel, are besieged in Delft, and defeated by Albert, heir to the county.

1418. Marriage of the Countess Jacoba with John of Brabant. Rotterdam and South Holland are surrendered to John of Bavaria.

1419. Jacoba and John of Brabant obtain a divorce, and Holland suffers from an inundation.

1429. Jacoba marries Humphrey, duke of Gloucester.

1453. Holland passes under the power of Philip of Burgundy.

1451. Ghent revolts against the government of Philip.

1477. Mary of Burgundy marries Maximilian of Austria, which brings Holland under Austrian dominion.

1488. The Hocks invade Holland.

1490. They are expelled.

1451. Holland is the scene of serious civil strife, known as the "Bread-and-Chess war."

1457. Friesland is conferred on Albert of Saxony.

1510. Holland is involved in a war with the House of Burgundy.

</table>
HOLSTEIN (Battle).—The Danes were defeated at Holm, in Kent, A.D.902. By some authorities the date of the action is referred to 904.

HOLMBY (Northamptonshire).—The Scotch army having delivered Charles I. to the English commissioners, Jan. 30, 1647, he was conducted under a guard to Holmby. From this place the king was removed June 4, 1647, and conveyed to Childerside, near Cambridge.

HOLMFIRTH (Yorkshire).—During a heavy flood, the Liberry reservoir, at Holmfirth near Huddersfield, burst at half-past two in the morning, Feb. 5, 1852. Between 90 and 100 persons perished, and the damage to property was estimated at £600,000.

HOLSTEIN (Germany).—Charlemagne wrested this country from its Saxon inhabitants, and erected it into the margraviate of Nordalbingia, about A.D. 811. It was conferred upon Adolphus, count of Schauenburg, by the emperor Conrad II., in 1030, and in 1106 or 1110 was permanently erected into a county under his descendant Adolphus I., by Lothaire, duke of Saxony. It was for many years harassed by Danish invaders, who were finally expelled in 1227, and in 1226 it received the duchy of South Jutland as an hereditary fief. The house of Schauenburg becoming extinct in 1450, the States elected Christian of Oldenburg, king of Denmark, for count, March 3, 1460. In 1474 Holstein was erected into a duchy, and in 1544 it was divided between the king of Denmark and Adolphus of Holstein-Gottorp, whose duchy was again divided, on the death of Christian Albert in 1695, between his sons Frederick IV., who succeeded as duke of Holstein, and Christian Augustus, first duke of Holstein-Kutin. In 1751 the house of Holstein-Kutin succeeded to the throne of Sweden, and in 1792 to that of Russia, the grand-duke of Russia being also duke of Holstein-Gottorp. In 1773 the grand-duke of Russia ceded all his possessions in Holstein to the king of Denmark, and the whole duchy has ever since been an appanage of the Danish crown. On the dissolution of the German empire in 1806, Holstein was incorporated with Denmark, and in 1813 it was taken by the Swedes, who restored it in 1814. Provincial states for the government of Sleswig and Holstein were appointed by a law of May 25, 1831. In 1839 ill-feeling arose between the duchies and Denmark, in reference to the Danish succession, and this dissatisfaction was increased in 1844, by the demand of the German inhabitants of Sleswig to be united with Holstein, while the Danes desired union with Denmark. The Provincial States appealed to the German diet, Aug. 3, 1846, and the resolution, of which the object was the separation of the duchies from Denmark, commenced at Kiel, March 24, 1849. The general assembly of the States met at Rendsburg, April 3, and voted the annexion of the duchies to the German Confederation, and a Prussian force entered Holstein April 6, to assist in carrying this proposition into effect. The result was the Sleswig-Holstein war, which continued till the end of 1850, when the duchies tendered their submission to Denmark. The provincial diets were restored Jan. 28, 1852.

HOLSTEIN-GLÜCKSBURG (Germany).—This duchy was founded by Philip, son of John the Young, duke of Holstein-Sonderburg, in 1622. The dukes of Holstein-Glucksburg became extinct on the death of Frederick Henry, March 13, 1779.

HOLSTEIN-GOTTORP.—This duchy was founded a.d. 1544, by Adolphus IX., son of Frederick, duke of Holstein, and was governed by its own dukes until it was ceded to Denmark by Paul Petrowitz, Nov. 16, 1773.

HOLSTEIN-PLON.—This branch of the ducal family of Holstein was founded a.d. 1622, by Joachim Ernest, son of John the Young, duke of Holstein-Sonderburg, and became extinct on the death of Frederick Charles without male issue, Oct. 10, 1761.

HOLY ALLIANCE.—This celebrated compact, between the emperors of Russia and Austria and the king of Prussia, was signed at Paris, Sept. 26, 1815. It expressed the intention of the contracting sovereigns to continue in the bonds of Christian union, and recommended their subjects to "fortify themselves daily in the principles and exercise of the duties which the divine Saviour has taught men," as the only means of securing lasting and real happiness. The duke of Wellington declined to sign this compact.

HOLY BROTHERHOOD, or the SANTA HERMANDAD, an association for the maintenance of the public peace and the protection of property, was instituted at Aragon about the middle of the 13th century, and fully organized a.d. 1438. It was established in Castile in 1232. A similar league was entered into by the cities of Castile and Leon in 1295. Kindred associations were organized in various parts of Spain at subsequent periods. The Hermandad in Valencia raised an insurrection there in 1520-21.

HOLY CROSS, or the COAT OF ARMS, said to be the coat mentioned in John xix. 23, which Christ wore at his crucifixion, a.d. 29. A holy coat is said to have existed in Galatia in 580; another in Jerusalem in 589; another at Oviedo in 800; another in 899 at Santiago de Compostella; another in 1014 at Ghent; another in 1066 at London; another in 1115 at Mayence.
another in 1217 at Bremen; and another in 1513 at Trèves. This last-named coat was declared to be the true garment of Christ by an apostolic decree of Pope Leo X., dated Feb. 1, 1514. Another holy coat appeared at Argenteuil, in France, and Pope Gregory XVI., Aug. 22, 1843, declared this garment to be the one worn at the crucifixion. Bishop Arnoldi of Trèves exhibited in 1844 the coat kept in his cathedral to an immense concourse of people, and this act provoked much controversy in the Roman Catholic church.

HOLME (Anglesey).—A religious house is said to have been erected here by Maedlyn in the latter part of the 6th century. The "college" was probably built by Hwfa ap Cynddelw, a contemporary of Owen Gwynedd, who began his reign A.D. 1137. A school was founded in 1745; baths, and an assembly-room, were introduced in 1770. An act was passed in 1809 for erecting a pier and improving the harbour; and it was made the chief packet-station for Ireland in 1830.

HOLY ISLAND, OF LINDISFARNE.—The see of Lindisfarne was founded in this small island A.D. 634. The Danes assailed the church in the year 787, and destroyed it Jan. 8, 794. The island was invaded by Malcolm III., king of Scotland, in 1061. The castle was taken by adherents of the Pretender in 1715, and it was dismantled in 1819.

HOLY LEAGUE, formed Oct. 4, 1511, by Pope Julius II. with King Ferdinand and the Venetian republic, to protect the territories and to maintain the authority of the Romish church, and to expel the French from Italy. The emperor Maximilian and Henry VIII. of England afterwards acceded to it. Ferdinand concluded the truce of Orthes with Louis XII. of France, April 1, 1513, and thus broke up the league. The Holy League of Castile was formed at Avila in July, 1521. (See COGNAC, LEAGUE.)

HOLY PLACES (Palestine).—The first of these, the church of the Holy Sepulchre, built upon Mount Calvary, was founded by the empress Helena, mother of the emperor Constantine the Great, A.D. 326. The church was partly destroyed by the Persians in 614. It was rebuilt, and various "Holy Places" were added by Modestus, superior of the convent of Theodosius, in 630. The structures, again destroyed by Hakim in 1010, were rebuilt in 1045. The holy places were occupied by the crusaders in 1099; again burnt by the Saracens in 1244, and re-erected in 1292. On the 12th October, 1506, a fire broke out in the chapel of the Armenians, and destroyed nearly the whole of the sacred edifices. After long negotiations with the Porte, permission was given to erect a new church, which was consecrated in 1810. A fearful tragedy occurred at the church of the Holy Sepulchre in 1834, when nearly five hundred people, pilgrims to the Holy Fire, were crushed to death. The guardianship of the Holy Places has long been a matter of dispute between the Greek and Latin churches; Russia espousing the cause of the former, and France that of the latter. In 1690 the Holy Sepulchre was allotted to the Latins, and a treaty on the subject was signed between France and the Porte in 1740. A serious outbreak occurred at Jerusalem in 1759 between the followers of the rival churches, and an imperial edict was soon after issued placing the holy sanctuaries under the protection of the Greek church. France and Russia interfered in 1819, and in 1820 the French commissioner sent to inquire drew up a list of the Holy Places. The French government made certain demands May 28, 1850, and most of these were on the point of being conceded in 1851, when Nicholas, emperor of Russia, required from the sultan of Turkey a strict adherence to the status quo ante. Negotiations were carried on for some time, and the other European powers offered their mediation: but the emperor of Russia thought this a favourable opportunity to attempt the overthrow of the Turkish dominion, and his ambassador quitted Constantinople May 21, 1853.

HOLYROOD (Edinburgh).—The abbey and palace were founded A.D. 1128, by David I. of Scotland. In 1607, John Bothwell, commissary of this place, was advanced to the peersage under the title of Lord Holyroodhouse. The abbey was destroyed by the duke of Somerset in 1547, and nothing left standing but the body of the church, which, in its turn, was plundered and despoiled by the mob in 1688. Rizzio was murdered in one of the apartments of the palace, March 9, 1566. Charles I. was crowned here June 18, 1633. In 1768 the roof fell. The existing palace of Holyrood was designed by Sir William Bruce in 1669. The French royal family took up their residence here in 1786; and Queen Victoria held a court at Holyrood, Aug. 30, 1850.

HOLY SEPULCHRE (Order of the).—This military order is said to have been founded by St. James, A.D. 69, to guard the Holy Sepulchre against unbelievers. Other authorities date its origin from the time of Helena, mother of Constantine I., about 326, and others from the reign of Godfrey of Bouillon as king of Jerusalem (1099—1100). It was most probably instituted by Pope Alexander VI. in 1496. It was re-constructed by Louis XVIII., Aug. 19, 1814.

HOLY WATER.—The custom of sprinkling churches, &c., with consecrated water is traced by some to the time of the Apostles. It is referred to by Pope Alexander I. (A.D. 109—119) in such a manner as to infer that it was then an established custom.

HOLYWELL (Wales), named after the well of St. Winifred. The parish church was founded in 1769. The Holywell Level, or great lead-mine, was opened in 1773.

HOMERIDE, OR SONS OF HOMER, were numerous in the island of Chios, and in Asia Minor, B.C. 1000. Lycurgus, on his journey to Asia, is said to have received from this famous fraternity the first fragments of the poet's
works, which were introduced into Greece B.C. 890. Pisistratus and Hipparchus collected the rest B.C. 590.

HOMERITES.—In the middle of the 4th century A.D., the princes of the Arumites joined to their titles that of king of the Homerites, an Abyssinian colony in Yemen. They entered into an alliance with Justinian I., for the protection of the Christians in Arabia, A.D. 581. The kingdom lasted sixty-seven years.

HOMILDON HILL (Battle).—Henry Percy, surnamed Hotspur, inflicted a humiliating defeat upon the Scots (who had invaded England in July), at Homildon Hill, near Wooler, Sept. 14, 1402. The earl of Douglas and several Scottish nobles were taken prisoners.

HOMILIES.—The practice of compiling homilies commenced A.D. 796, when Charlemagne ordered Paulus Diaconus and Alcuin to discourse upon the New Testament. The famous "Homiliarium of Charlemagne was made public in 805. The English Book of Homilies was brought out in two parts; the first, containing "twelve homilies, published in 1547, by Cranmer, in the reign of Edward VI.; and the second by order of Convocation, in 1563, during the reign of Queen Elizabeth.

HOMEOPTATHY.—This system of medicine was first advocated by Dr. Samuel Hahnemann, A.D. 1796. His "Matière Médicale Pure" was published in 1820, and his "Theory of Chronic Diseases and their Remedies," in 1829. He died at Paris, July 12, 1843, aged 88.

HOMOIOUSIANS AND HOMOIOUSIANS.—The former of these terms was applied to the Arians, and the latter to the orthodox party, at the council of Nice, June 19 to Aug. 26, 325. The Arian war-cry at the council of Seleucia, Sept. 27, 359, was Homoioousion.

HONDSCHOOTE (Battle).—The French defeated an Austrian and Dutch force at this place, Sept. 8, 1793.

HONDURAS (America) was discovered by Columbus A.D. 1502. British settlers first established themselves here in 1648. Having extended as far as the river Belize, they were attacked by the Spaniards in 1659, 1678, 1718, and 1754. The result was a treaty of peace in 1763, by which the colonists were allowed to remain. The Spaniards made another attempt to expel the British settlers in 1779, and having captured several, sent them to the Havana, where they were confined till 1782. In 1784 Great Britain obtained certain rights, and the territory of Belize was declared a British colony. The Spaniards assailed it, but without success, Sept. 3 and 10, 1798. The present constitution was voted in 1853.

HONDURAS (America).—This republic formed part of the Spanish kingdom of Guatemala, until A.D. 1821, when its inhabitants received their independence, and, with other American states, entered into a confederacy. The union was dissolved in 1839, and Honduras became an independent state. Great Britain ceded the Bay Islands to Honduras by treaty in 1860.

HONEYMOON.—The practice of distinguishing the first month after marriage by this title probably arose from an old custom of drinking mead in, a beverage made of honey, for thirty days after a nuptial ceremony.

HONNEFLEUR (France).—This town of Normandy was taken from the English by Charles VII. A.D. 1440, and in 1562 was seized by the Calvinists, who were compelled to quit it the same year by the duke of Aumale.

HONG-KONG (China).—This group of rocky islands, situated at the mouth of the Canton river, about 100 miles from the city of Canton, was ceded to Great Britain Jan. 20, 1841, and formal possession was taken Jan. 26. Hostilities having been renewed, it was ceded in perpetuity to Great Britain by the treaty of Nankins, signed Aug. 29, 1842. Hong-kong was regularly constituted a British colony June 26, 1843. (See Victoria.)

HONSTEED, THE (May 25, 1766).—"Evil be to him that evil thinks," the motto of the order of the Garter, is said to have had its origin in an exclamation made by Edward III. on picking up a garter belonging to the countess of Salisbury, at a ball, A.D. 1349.

HONITON (Devonshire).—The parish church was founded A.D. 1432, by Courtenay, bishop of Exeter. Assizes were held here in 1590, when seventeen criminals were executed. The lace manufactury flourished as early as 1630. Fairfax entered Honiton with his army, Oct. 14, 1645. The new parish church, commenced in 1835, was completed in April, 1838.

HONOLULU, OR HONORU (Pacific), the chief town of the Sandwich Islands, was first visited by Captain Cook, February, 1779. A missionary station was established here in 1820. A treaty of friendship between Queen Victoria and the king of the Sandwich islands was signed at Honolulu, July 10, 1851.

HOOD.—The length of the monastic hood was regulated by a council at Aix-la-Chapelle, A.D. 817. A dispute respecting its proper form caused great dissensions among the Cordeliers, and divided them into two parties in the 13th century. The weaker party was expelled from the convents by force of arms in 1514. It was condemned by John XXII., and four of its adherents were burned by the Inquisition at Marseilles in 1518.—Bishops and canons were forbidden by the council of Paris, March 9—14, 1347, to wear hoods of silk or velvet.

HOOPS are mentioned as portions of ladies' dress by Gosson, A.D. 1596. They were first called fardingales, which appear to have been of smaller proportions. In a scarce book, entitled "The London Tradesman," published in 1747, the following occurs: "Some will have it that Semiramis wore one of them in her famous expedition,
and some other antiques will have us believe the queen of Sheba was dressed in one full five yards in circumference, at her first interview with Solomon.” Crinoline made of horsehair, brought into fashion in 1835, is the modern hooped petticoat.

HOPS.—The common account that hops were first brought to England A.D. 1234 is incorrect, as they were cultivated in this country during the 15th century. The term hop-grounds first occurs in the statute-book in 1552. In 1603 the cultivation of hops had become general.

HORATIUS and CURIATIUS.—The Albanians having invaded Rome B.C. 670, it was resolved to decide the contest by a battle between three champions on each side. Three twin brothers having been found in both armies, the Romans named the Horati and the Albans the Curiatii, the issue of the struggle was intrusted to them, and the Curiatii having been vanquished in the fight which followed, Alba was forthwith united to Rome.

HORN.—Ashburnham (xi. c. 41) mentions the use of horns as drinking-cups as a very ancient custom. The exportation of horns from Great Britain was prohibited by 4 Edw. IV. c. 8 (1464). This act was repealed by 1 James I. c. 25, s. 44 (1604). The Horners were incorporated by Charles II. Jan. 12, 1638.

HORNBOOKS, consisting of a single sheet of paper mounted on wood and protected by a transparent sheet of horn, were formerly extensively used in the education of children. Such books were very common in the Elizabethan period; but as they had no dates attached to them, it is impossible to give a precise account of their use.

HORNCastle (Battle).—Sir Thomas Fairfax and Oliver Cromwell defeated the royalist forces at Horncastle A.D. 1643.

HORNSPIPE.—This dance is believed to be identical with the monocheros of the ancient Greeks. It derives its name from having been danced by the ancient Britons to the music of the Welsh pi-b-corn, or hornpipe.

Horns were used at a very early period as musical instruments, and were employed by the Jews in the proclamation of the jubilee. Chromatic horns were first made in Germany early in the 18th century, and horns on which it was possible to play in all keys were introduced into England by the Messings in 1740. The instrument was much improved in 1772 by Spandau.

HORSE-GUARDS.—The royal regiment of horse-guards was raised by Charles II. A.D. 1661. It first mustered in Tottal Fields, Westminster, Feb. 16, 1661, and was first under fire in the Monmouth insurrection, July 4-5, 1685. On the landing of the prince of Orange at Torbay, Nov. 5, 1688, the regiment was sent against him, met the prince’s army at Arminox Nov. 13, was repulsed, and many of the officers and soldiers went over to the enemy. The regiment was re-organized by William III. Dec. 17, 1688. The Horse Guards, Westminster, was built in 1758.

HORSEMANN.—This art probably originated with the Egyptians, who are the earliest known possessors of horses, B.C. 1706 (Gen. xiv. 17). It passed from them to the Phoenicians, by whom it was imparted to the Greeks before the institution of the Olympic games, B.C. 1460, as chariot and horse-races constituted a prominent feature of those festivals. Gibbon mentions the Scythians as consummate masters of the equestrian art, and adds that it was commonly believed that it was their custom “to eat, to drink, and even to sleep, without dismounting from their steeds.” The rise of modern horsemanship depended greatly on the tournaments of the Middle Ages, which became common soon after the accession of Charles the Bald, A.D. 840. The present mode of shoeing horses was introduced into this country by the Normans at the time of the Conquest. Several statues have been passed for the improvement of horses the first of which was 27 Hen. VII. c. 6 (1558). Horse-stealing was made a capital offence, without benefit of clergy, by 37 Hen. VIII. c. 8, s. 2 (1545); and the penalty was commuted to transportation by 2 & 3 Will. IV. c. 62 (July 11, 1832). The first horse-tax was imposed by 24 Geo. III. c. 31 (1784).

Hortensian Law.—This law, which conferred legislative power upon the plebeians of Rome, was passed B.C. 268.

Horticultural Societies.—The Horticultural Society of London was founded A.D. 1804, and incorporated by royal charter in 1809; the Edinburgh society was founded in 1809, and the Dublin society in 1816. The Transactions of the London society were first published in 1812, and their gardens at Chiswick were commenced in 1822. The orchard and great part of the gardens were completed in 1824, and the arboretum was finished in 1825. The annual exhibitions were instituted in 1831, when only fruit was exhibited. In 1833 the show was extended to flowers. The new gardens of the society at Kensington were opened by Prince Albert, June 5, 1861. The Royal Society of Horticulture of Paris was founded June 11, 1827.

Hospitalers, or Order of St. John of Jerusalem.—This celebrated military order originated in a monastery, chapel, and hospital, founded at Jerusalem by some merchants of Amalphi, A.D. 1048. In 1099 the hospital received increased territories from Godfrey de Bouillon, who transferred its government from the monks to his knights. In 1100 they established a house at Clerkenwell, London, and in 1113 were confirmed as a spiritual order by Pope Pascal II. The Hospitalers greatly distinguished themselves in the crusades, especially at Jerusalem in 1152, Ascalon in 1153, and Hittin in 1187. In 1290 their order was united with that of St. Samson of Jerusalem. They conquered Rhodes Aug. 15, 1309, and from their settlement in that island are sometimes called the Knights of Rhodes. Their
wealth was much increased in 1311 by the addition of the possessions of the suppressed Templars, which were granted them by the council of Vienna. In 1321 they defeated the Turks in a great naval battle, and in 1341 took Smyrna. They took Alexandria in 1365, and in 1480 compelled Mohammed II. to retreat from Rhodes, which he had besieged with 100,000 men and 180 ships. In 1485 the possessions of the dissolved orders of the Sacred Tomb and of St. Lazarus were bestowed upon the Hospitalers. In 1522 they were compelled to quit Rhodes by Soliman II., who besieged their garrison of 600 knights and 4,500 soldiers, with a force of 140,000 men and 400 vessels, and in 1530 they were allowed to settle in Malta by the emperor Charles V. Hence they are often spoken of as the Knights of Malta. The order was suppressed in England by 32 Hen. VIII. c. 24 (1540), and lost all its privileges in France, Sept. 19, 1792. In 1798 it was expelled from Malta by the French, and has never recovered its political importance.

HOSPITALS.—Institutions similar to Chelsea Hospital, for the support of decayed soldiers, were known at Rome, where they were called Meritoria. The first hospital of celebrity was established at Cæsarea by the emperor Valens, between the years A.D. 370—380. St. Ephraim, who died in 381, or St. Fabiola, in 400, is the reputed founder of infirmaries supported by voluntary contributions. A foundling hospital was instituted at Milan in 787, and an hospital for orphans at Constantinople in 1090. The most important hospitals are mentioned under the places where they are situated. St. Bartholomew's, Bethlehem, St. Thomas, Christ's Hospital, and Bridewell, are known as the five Royal Hospitals, which were united by a patent of administration in 1557, and placed under the care of the Corporation, but with a distinct government, by 22 Geo. III. c. 77 (1782). The following is a list of the London hospitals, with the date of their foundation.

Host (Elevation of the).—The date at which the custom of elevating the elements of the Eucharist previous to distribution was introduced, has given rise to considerable controversy. Some authorities assert that it originated in the 4th century, some that it was unknown till the 12th, while others fix its commencement A.D. 1201. The custom of ringing a bell during the elevation was introduced in 1225, and the miracle of the bleeding host is said to have occurred in 1290.

HOTTENTOTS.—This African race, the aboriginal population of the southern portions of Africa, first became known to Europeans A.D. 1498, and was very numerous when the Dutch began to form their settlements at the Cape. Their number has, however, been much reduced by the small-pox, which committed fearful ravages in 1713, and from other causes. Missionaries were first sent to them in 1736. A revolt of the Hottentots, which broke out in June, 1861, was promptly suppressed by General Somerset.

House-Duty.—A tax of two shillings was levied upon all houses, except cottages, by 7 Will. III. c. 18 (1698). It was raised to three shillings, and frequently varied, until 3 Geo. IV. c. 30 (1820). It was reimposed, in place of the window-tax, by 14 & 15 Vict. c. 36 (July 24, 1851).

House of Commons.—The earliest instance of the assembly of knights, citizens, and burgesses as members of parliament, occurred Jan. 20, 1265, the parliament of 1268 having been exclusively composed of barons. They were not again summoned till the parliament of Nov. 12, 1294, and were established as a necessary part of the legislature by the declaratory statute of York, in 1322. Various statutes have been passed to regulate the amount of property necessary to enable a man to sit in the House of Commons, all of which were repealed by 21 & 22 Vict. c. 26 (June 25, 1858). The House of Commons was for many years the candidate of its place of assembly. Our earliest knowledge on this point is that the parliament of April 30, 1343, met in the Painted Chamber, Westminster. In 1376 the Chapter-house is mentioned as the usual meeting-place, and in 1457 Edward VI. granted St. Stephen's chapel for the purpose. This building was destroyed by fire Oct. 16, 1834, and the Commons took possession of

121
their new house Nov. 4, 1852. The following table exhibits the number of representatives now composing the House of Commons:

**House of Lords.**—The bishops and archbishops of England have composed a portion of the great council of the nation from the time of the Saxons, and they, with the barons, formed the king’s council from the Conquest to the reign of John. The personal privilege of the peers was determined in 1341. The House of Lords was abolished by the Long Parliament, Feb. 6, 1649, but constituted part of the first parliament after the Restoration, April 25, 1660. The House of Lords has had various places of assembly. The first record on the subject states that in 1343 it met in the White Chamber, Westminster. The Painted Chamber was also a frequent place of assembly. Its place of meeting is first styled the “House of Lords” in 1543. The old palace of Westminster having been destroyed by fire, Oct. 16, 1634, the present Houses of Parliament were erected in its stead. The peers took possession of their new house April 15, 1847. The number of members in the House of Lords is always liable to increase, owing to the royal prerogative of creating new peers. The following is a pretty correct statement of its present numbers:

</table>

**Houses of Parliament, or New Palace of Westminster.**—The earlier parliaments met in various places, chiefly at Westminster, but occasionally in provincial towns. The original buildings where the business of the House of Lords was transacted, were destroyed by fire, Oct. 16, 1834. The first stone of the new building was laid April 27, 1840. The House of Lords was opened April 15, 1847, and the House of Commons Nov. 4, 1842. Big Ben, the bell for the clock tower, was cast Aug. 6, 1856, and proved a failure. The Victoria Tower was completed in 1857. Sir Charles Barry, the architect of the New Palace of Westminster, died May 12, 1860.

**Hudson (New York).**—This city was founded by settlers from Rhode Island and Massachusetts A.D. 1754, and received its charter of incorporation in 1785.

**Hudson’s Bay (North America).**—A sea was discovered by Sebastian Cabot A.D. 1512, and was rediscovered by Hudson, from whom it derives its name, in 1610. The Hudson’s Bay territory was first explored by adventurers from Canada. Prince Rupert sent a vessel with colonists to the territory in 1668. Charles II. incorporated the Hudson’s Bay Company, May 2, 1670. A rival association, called the North-West Company, was formed out of several smaller ones in 1787. The two companies were united in 1821. An extended license for trading over the continent east of the Rocky Mountains was given to the company May 13, 1838. The English government granted Vancouver Island to the Hudson’s Bay Company in August, 1843.

**Hue and Cry.**—This mode of exerting alarm was in use among the Romans. Cesar speaks of a case, n.c. 50, in which an alarm was carried 160 miles in 16 hours. The hue and cry, a legal mode of procuring the arrest of offenders, was introduced into England at an early period, and by 13 Edw. I. c. 4 (1285), the hundred in which the offence was committed was held liable until the felon was caught. By 27 Eliz. c. 13 (1585), the hue and cry was ordered to be effected by both horsemen and footmen; and by 8 Geo. II. c. 16 (1735), constables, &c., refusing or neglecting to make hue and cry were to pay a fine of 2s. The Highland mode of raising the hue and cry, called the cross terrier, or from a cross, was carried 32 miles in three hours in 1745. The “Hue and Cry,” issued three times a week by the Police Court, was first published early in the 18th century.

**Huesca (Spain).** The ancient Oca, a town of the Iberges, is mentioned by Strabo, under the name of Iloescan. Sertorius founded a school here n.c. 77. Pedro I. of...
Aragon took it, after his victory over the Moors at Alcapsa, A.D. 1066. The university was founded in 1354.

Huguenots.—This was the name given to the French Protestants in the 16th century. Its etymology is unknown, some deriving it from Hugus, a noted Calvanist of Geneva, and others from the German eidenosen, confederates. They were first persecuted in France in 1559, and in 1651 they received the name Huguenots, and resorted to arms for protection. A large number of them were barbarously slaughtered at Vassy, March 1, 1562. The massacre of St. Bartholomew (q.v.) occurred Aug. 24, 1572. In 1598 they were protected by the Edict of Nantes (q.v.), and received additional religious liberty by the Pacification of Nines, July 14, 1629. Louis XIV. revoked the edict of Nantes, Oct. 23, 1685, and the Huguenots were unable to enjoy free exercise of their religion till the National Assembly restored freedom of conscience, Aug. 24, 1789.

Hull, or Kingston-upon-Hull (Yorkshire).—In a grant made by Matilda Camin to the monks of Melza, A.D. 1160, Hull is described as the "Wyk of Myton." Edward I. bought it from the monks in 1293, and called the place "King's town upon Hull." Edward I. visited the town May 26, 1300. It was ordered to be made a fortress, by a charter of Edward II., in 1322. The walls were repaired and strengthened by Sir Michael de la Pole in 1377. The free grammar-school was founded 1482, and the first hospital was erected in 1517. The town was taken by Hallam, "the pilgrim of grace," 1537. The merchants of Hull embarked in the whale-fishery in 1598. Lister's almshouses were founded in 1642, the old dock was built 1775, and the first stone of the new dock was laid Oct. 19, 1775: it was opened Sept. 22, 1778. The Marine Hospital was established in 1787; the new work-works were erected by the corporation in 1831, and the Hull and Selby railway was opened July 1, 1840.

Hulsenian Lectures.—Sermons upon the evidences of Christianity, or the difficulties of Holy Scripture, were instituted by the will of the Rev. J. Hulse, who died in 1760. The funds were inadequate until 1820, when the Rev. C. Benson delivered the first course.

Humane Society (Royal).—This society, instituted for the recovery of persons from drowning, was founded in London, by Drs. Hawes, Fothergill, and Cogan, A.D. 1774. In 1851 there were 221 depôts for drags, &c. in connection with this institution. A Humane Society was established in Holland in 1767.

Hummiliati, a peculiar order of monks, founded by a number of Italian noblemen A.D. 1154. They subjected themselves to the rule of St. Benedict, and their statutes were revived in 1151, and confirmed by Innocent III. in 1200. Females were admitted to this order in 1225. A considerable laxity of discipline having arisen, Pius V. suppressed the society in 1571.

Hungary.—The precise nature of the division of a country into hundreds is not known; it existed in Germany at a very early date, and was established among the Franks in the 6th century. Alfred the Great (870—900) is said to have introduced the hundred system into this country. All statutes relating to men composing a hundred were repealed by 7 & 8 Geo. IV. c. 27 (June 21, 1827); and hundreders are rendered liable for damages committed by rioters by 7 & 8 Geo. IV. c. 31 (June 21, 1827).

Hungary.—This country includes part of the ancient provinces of Dacia and Pannonia.

H.G. 35. The Romans, under Octavius, first invade Pannonia.

A.D. 8. The country is reduced to a Roman province by Tiberius.

337. It is invaded by the Vandals.

376. The Huns defeat the Goths on the Dniester.

433. They establish their supremacy in Hungary.

450. On the death of Attila, it is seized by the Gepide.

507. It passes into the power of the Lombards.

698. The Avars expel the Lombards.

738. Hungary is conquered by Charles-magne, and united to the Western empire.

889. The Magyars, or Hungarians, establish themselves in Hungary, under their prince Arpad.

934. The Hungarians are defeated by Henry the Fowler, emperor of Germany.

935. They are subdued by Otho the Great, at Augsburg.

1000. Stephen I. embraces Christianity, and receives the title of king.

1013. Hungary is ravaged by the Poles.

1139. Bula II. has his eyes put out, by order of his uncle Coloman.

1162. The king is seized by the usurpers Ladislaus and Stephen.

1222. Andrew II. publishes the charter known as the Golden Bull of Hungary.

1235 to 1245. The Tartars ravage the country.

1290. The country of Hungary is assasinated.

1348. Louis the Great invades Naples.

1370. Hungary is Great is elected king of Poland.

1383. Mary, daughter of Louis the Great, is proclaimed king of Hungary.

1385. Mary marries Sigismund of Brandenburn.

1390. Sigismund subdues Bajazet, and exacts tribute from Moldavia and Wallachia.

1396. Sept. 38. Sigismund sustains a severe defeat from Bajazet at Nicopolis.

1400. Representative government is established in Hungary.

1410. Sigismund of Hungary is elected emperor of Germany.

1437. Albert, duke of Austria, succeeds to the Hungarian throne.

1443. John Hunniades defeats the Turks at Nissa.

1444. The Hungarians sustain a severe defeat from the Turks at Varna.

1456. Death of John Hunniades.

1490. On the death of Matthias Corvinus, the Hungarians elect Ladislaus VI., king of Bohemia, for their sovereign.

1515. The emperor Maximilian secures the succession of Hungary.

1526. Louis II. is defeated and slain by the Turks at Mohacs.

1529. Hungary is overrun by the Turks.

1570. Hungary is definitely annexed to the dominions of the house of Austria.

1600. The Turks seize Canissa.
HUNGARY

A.D.

1000. The Protestant Union is formed in Hungary.

1041. The emperor Matthias abdicates the throne of Hungary.

1083. Sept. 8. The Hungarian crown and insignia are discovered and removed to Vienna.

1548. The emperor pursues his campaigns against the Turks. Sept. 28. Hungary is recovered.

1552. The Turks again invade Hungary.

1559. Jan. 26. By the treaty of Carlowitz, the Porte to Austria surrenders its claims to Hungary.

1738. The Hungarian revolution commences.

1748. The Turkish treaty is signed.

1794. War with Turkey is renewed in Hungary.

1839. The diet assemble for the first time in Hungarian.

1879. The diet attempts to substitute the Magyar language for the Latin throughout Slavonic Hungary.

1853. Sept. 8. The Hungarian crown and insignia are discovered and removed to Vienna.

1854. Jan. 1. State documents, law pleadings, &c., in Hungary are ordered to be transacted in the German language.

1856. July 12. A decree for the political offenders of 1848 and 1849 is published.

1857. May 12. The emperor and government of Austria visit the Hungarian dominions.

1858. Sept. 7. The emperor publishes a patent regulating the interior administration of Hungary.

1859. March 31. The chambers at Augsburg reject the emperor's patent, which he accordingly withdraws May 18.

1861. Jan. 10. The emperor publishes an imperial manifesto against the election of refugees, &c. Feb. 26. A new constitution for the Austrian empire is published. April 6. The Hungarian diet is opened, and demands an Austrian ministry. June 6. A Slavonian diet assembles at St. Martin, and decides to maintain their nationality separate from the Magyars. June 12. The case of the emperor and Austria v. Day and Kossuth is decided in the Chancery court, in favour of the plaintiff, 100,000,000 Hungarian notes being ordered to be destroyed. Sept. 30. The assembly of the Comitat of Pest is prevented from meeting by an armed force.

SOVEREIGNS OF HUNGARY.

Stephen I. 1000. Charobert, or Charles
Peter I. 1028. Robert, of Anjou 1068
Abo 1041. Louis I. 1039
Peter (again) 1044. Mary 1038
Andrew I. 1047. Sigismund 1033
Bela I. 1061. Albert of Bavaria 1028
Salomon I. 1064. Albert of Bavaria 1028
Gyeye I. 1074. Elizabeth 1039
Ladislaus I. 1077. Ladislaus II. 1041
Coloman 1095. Stephen II. 1114
Bela II. 1131. Ladislaus III. 1150
Gyeye II. 1141. Louis II. 1016
Ladislaus and Stef.线路
Ferdinand I. 1126. Ferdinand I. (alone) 1549
Bela III. 1173. Maximilian 1568
Emeric. 1186. Rodolph 1572
Ladislaus II. 1201. Matthias I. 1608
Andrew II. 1205. Ferdinand II. 1618
Bela IV. 1235. Ferdinand III. 1625
Stephen IV. 1270. Ferdinand IV. 1647
Leopold 1273. Joseph 1687
Andrew III. 1290. Charles 1713
Wenceslaus 1301. Maria Theresa 1741
Otho 1305. (The succession is identical with that of the emperors of Germany and of Austria.)

HUNGERFORD (London).—The first market was built a.d. 1680. The present edifice was founded June 18, 1831, and opened July 2, 1833. The suspension-bridge, designed by I. K. Brunel, was opened on Friday, April 18, 1845.

HUNGEN. —This fortified post, at the bridge of Hungen, near Basel, in Switzerland, was destroyed, in accordance with the provisions of the treaty of Baden, Sept. 7 (O.S.), 1714. In 1796 the French restored the works, in which they were besieged by the Imperialists, Jan. 25, 1796, and capitulated Feb. 1. The victors entered a few days after, when they found the place a mass of ruins. The allied armies invested Hungen in January, 1814; and by the 3rd article of the treaty of Paris, concluded Nov. 20, 1815;
the fortress was ordered to be demolished. It was a place of great strength, and was called the gate of Alsace.

**Huns.**—Historians are not agreed as to the origin of this famous barbaric tribe. Niebuhr considers them to be Mongolians; Humboldt, Ugrians; and Zeuss, Latham, and Dr. W. Smith, Turks. They invaded China about B.C. 201; and after haranguing that empire for a succession of years, were finally expelled about A.D. 93. They subsequently migrated to the plains of Tartary; and about the year 100 defeated the Alani on the banks of the Tanais. They defeated the Goths on the Dniester in 376, and attained their highest glory during the reign of Attila, A.D. 433–434. They invaded the Eastern empire in 441, ravaged Gaul (where they were defeated by Aetius at Chalons) in 451, and crossed the Alps into Italy in 452. After the death of Attila their power declined.

**Huntingdon.**—Edward the Elder erected a castle here A.D. 917. A priory of Black Nuns, dedicated to St. Mary, was established in 973. St. Mary’s church was rebuilt in 1620, and the county gaol was erected in 1829.

**Hunty Hill (Battle).**—The earl of Hunty defeated the rebel earl of Crawford at this battle, fought on a level muir near Brechin, May 18, 1452.

**Hurst Castle.**—On the rupture of the negotiations at Newport, the council of the army seized Charles I., Nov. 30, 1648, and conveyed him to Hurst Castle, whence he was removed, Dec. 18, to St. James’s.

** Hussars.** Light cavalry, first in use among the Magyars, A.D. 1610, and so called because the twentieth nobleman in each province was compelled to attend the call to arms. Tilly introduced hussars into the Austrian army; and at the battle of Breitenfeld, in 1631, had five regiments of them in the field. Luxembourg formed a troop in France in 1692; and Frederick William I. of Prussia organized two regiments in Prussia, 1730. The first hussars forming part of the English army were enrolled by William III. during the war in Flanders in 1693; but the same troops were afterwards called light dragoons, and only employed temporarily, and on foreign service. The first British regiment of light cavalry raised for permanent service was the “King’s Regiment of Hussars,” now called the 15th hussars, formed by Colonel George Elliot in 1759, by order of George II.

**Hussites,** the followers of John Huss, burnt at Constance July 6, 1415. Upon receiving the news of his death, several nobles and knights formed an association, Dec. 2, 1415. This party obtained the majority at the parliament of Prague, Sept. 5, 1416, and being opposed by the emperor, they took the field, and appointed Ziska as their leader, March 10, 1418. Active war commenced in 1419. A schism occurred in 1420. (See Caxton.) The battle of Prague was gained by Ziska, July 14, 1420; and in the still more brilliant victory of Deutschbrod, Jan. 8, 1422, he totally annihilated the emperor’s army. The Hussites overran the whole of Bohemia and Moravia, and were on the point of marching upon Vienna, when the sudden death of Ziska, Oct. 12, 1424, put a stop to their plans. They gained two more battles,—at Aussig, June 15, 1426, and at Mies, July 21, 1426; but, weakened by internal disputes, they were induced to sue for peace. After long negotiation, the treaty of Iglau was concluded between the emperor Sigismund and the leaders of the Hussites, July 5, 1436. Though this treaty did not put an end to the struggles of the Protestants in Bohemia, yet from this time the name of Hussites was no longer applied to them.

**Hustings.**—This term was apparently applied by the Anglo-Saxons to courts held within a house or building, to distinguish them from such as were held in the open air. Edward II., the Conqueror, granted such a court to the city of London A.D. 1052. Lincoln, Winchester, York, and other places, also possessed courts of hustings.

**Hutchinsonians,** the followers of John Hutchinson, who was born A.D. 1674, and who died Aug. 26, 1737. “Thoughts Concerning Religion,” published at Edinburgh in 1743, contains an exposition of the views of this religious sect.

**Huy** (Belgium) was taken by the English and Dutch, Sept. 26, 1694. The duke of Marlborough captured it Aug. 27, 1703. The French took it in 1706, and Marlborough recaptured it July 12, in the same year. It once more fell into the hands of the French, Aug. 20, 1746. (See Abbot of Huy.)

**Hyacinth.**—The plant received its name from Hyacinthus whom, according to the legend, Apollo slew and transformed into a flower. It is indigenous to the Levant, and grows abundantly round Aleppo and Bagdad. It was first cultivated by the Dutch, probably at the commencement of the 16th century, and is mentioned in England by Gerard in 1696. Parkinson enumerates eight varieties in 1692. Double hyacinths were first grown by Peter Voerhelm at the commencement of the 18th century.

**Hyctsos, Hyksos, or Shepherd Kings,** a tribe of Arabian or Scythian shepherds, who overran Egypt more than 2000 years B.C., and maintained their supremacy for about 260 years, when they were expelled by Tuthmosis II., king of Thebes. Some authors deny the existence of the Hyksos; others suppose them to represent the captive Jews in Egypt; and various theories have been circulated on this perplexing subject. (See Egypt.)

**Hydaspes (Battle).**—Alexander the Great defeated Porus on the banks of the river Hydaspes, the modern Jelum, B.C. 327.

**Hyde Park** (London), formerly the “Manerium de Hyde,” belonging to the monastery of St. Peter’s, Westminster, A.D. 1355, was enclosed about 1545. Cottages existed here in 1655. The custody of Hyde
HYD
Park, "with all the lodges, houses, and edifices in the same," was granted in 1560 to Sir Edmund Cary, knight. The House of Commons resolved that Hyde Park should be sold, Dec. 21, 1632, and Sir Henesage Finch, solicitor-general, obtained a grant of part of the park in 1661. Queen Anne enclosed another portion in 1705, and Queen Caroline another in 1730. In consequence of the Gordon riots, troops were encamped here in 1780. The volunteers formed a camp in 1799. The statue of Achilles, "inscribed by the women of England to Arthur, duke of Wellington, and his brave companions in arms," was erected in Hyde Park June 18, 1822. The triple archway and gate at Hyde-Park Corner was constructed from the designs of Burton in 1829. The bronze equestrian statue of the Duke of Wellington, by Wyatt, was erected in 1846. The Marble Arch was placed at Cumberland Gate in March, 1851. Riotous assemblies met in this park to denounce Lord Robert Grosvenor's Sunday Trading Bill, June 24 and July 1 and 8, 1855. Turbulent meetings were held, in consequence of the high price of bread, Oct. 14, 21, and 28. The queen reviewed 18,000 rifle volunteers in Hyde Park, June 23, 1860.

HYDERABAD (Hindostan), the capital of Hyderabad and the Nizam's dominions, was founded by Kootab Shah, about A.D. 1585, being then called Baumuggur. It was taken and plundered in 1657 by the troops of Aurungzebe.

HYDROGEN.—The combustibility of this gas was known early in the 18th century, when it was often exhibited as a curiosity; but little was ascertained as to its real nature till the time of Henry Cavendish, who published an account of its most important properties in the Philosophical Transactions, May 12, 1766.

HYDROMETER.—This instrument for ascertaining the weight of fluids was probably invented by Archimedes, who was killed B.C. 212, though it is not mentioned till the time of Hypatia, about A.D. 415. It was afterwards forgotten, and was not revived or re-invented till the end of the 16th century.

HYDROPATHY, or the cold-water cure, was in use among the Arabs, and recommended by Rhazes, A.D. 920. The system also flourished in Italy, having been advocated by Avicenna in 1030; by Barzi in 1450; by Savonarola in 1460; and by Cardan in 1540. From Italy it passed into Germany, where it found zealous disciples in Hildanus (1560—1600), and Von der Heyden (1630-43); and thence to England, where Floyer (1649—1714), George Cheyne in 1725, and Lucas in 1750, strongly advocated the system. At Malta Padre Bernardo, the self-styled "medicus per acque," made a great sensation in 1724; and at Paris the celebrated Tessot in 1760 advocated in eloquent language the use of cold water as a universal panacea. During the present century, the principal advocates of hydropathy are Dr. James Currie (1770-1805), and Vincent Preissnitz, a peasant's son, who established his famous cold-water cure establishment at Gräfenberg in 1825. He began with two patients, and in 1829 his system was in full operation.

HYPOTHESES. The phenomena connected with water were but little studied by ancient philosophers. Archimedes announced the equal force with which each particle of a fluid mass is pressed when in equilibrio, b.c. 250, and Ctesibius and Hero invented the siphon force-pump and pneumatic fountain about A.D. 120. Galileo (1564—1641), Castellio (1577—1644), Torricelli (1608—1647), and Pascal (1623—1662) contributed to advance the science. Hallam says the science was entirely created by Castellio and Torricelli. The motion of waters in rivers and canals was first studied by Guglielmini, who published his work on the subject in 1691; and the nature of the oscillation of waves was taught by Newton in 1714. Daniel Bernouilli's theory of the motion of fluids was published in 1738, and Coulomb published his law of resistance in 1800. Professor Airy suggested an improved theory of fluids in 1830. Scott Russell's experiments on the motion of ships and waves were published in 1837.

HYGROMETER.—Various instruments for testing the humidity of the atmosphere have been from time to time invented. The most general are the hair hygrometer of Saussure, who published an account of his instrument A.D. 1783, and the whalebone hygrometer of M. de Luc, which was described in 1788.

HYMNS, or songs of praise to the Deity, were in use among the Hebrews as well as the Greeks. The "Te Deum" and "Benedictus" are in our liturgy both called hymns. The former is supposed to have been written by St. Ambrose, A.D. 380. According to some authorities, St. Hilary, bishop of Poitiers, who died A.D. 368, was the first who composed hymns for the church. The use of hymns was authorized by the fourth council of Toledo, Dec. 9, 633.

HYRCANIA (Asia).—This ancient province was situated to the south of the Caspian Sea, and varied considerably in size and importance at different periods. Little is known respecting its history. It appears that the inhabitants were rendered subject to the Assyrians at an early date, and that a troop of 6,000 of them formed part of the army with which Darius resisted Alexander the Great, B.C. 334. Hyrcania was occupied by the Parthians B.C. 244. Christianity was introduced during the 5th century.

HYSLES (Battle).—The Argives defeated the Lacedaemonians near this town B.C. 669. The Lacedaemonians destroyed the town B.C. 417.

HYTHE (Kent), one of the Cinque Ports, was, according to Leland, once "a very great town" both in length and extent, and contained ill paroches, that now be cline destroyed." St. Bartholomew's Hospital was founded by Hamo, bishop of Rochester, A.D. 1336. The town-hall and market-place were rebuilt in 1794.
I. JAMBOICS.—Iambic verse was so called from Jamb, an attendant at the court of Meta-
nira, wife of the king of Sparta. She is said to have amused the goddess Ceres, whilst on her
sad pilgrimage in search of her daughter Pro-
serpine, with her witty stories and allusions, and her poetical talent. It is generally used in
satirical compositions, and often figuratively
to signify satire. The Greek poet Archilochus
was the first who wrote in iambics. He
flourished about b.c. 708.

IBERIA (Asia), the modern Georgia,
anciently formed part of the Persian empire,
and passed under the power of Alexander the
Great b.c. 331. The Romans first came into
contact with the Iberians b.c. 65, when Pompey
led an army against them, and compelled
them to sue for peace. Instigated by Tiberius,
the inhabitants invaded and subdued Ar-
menia, a.d. 35, and in 115 they made a show
of submission to the Romans. Christianity
was introduced during the reign of Constan-
tine I. (323–337), and in 365 the Romans re-
signed the sovereignty of the country, which
subsequently declined into a Persian province.
It was annexed to the Eastern empire by
Herachius in 623. Iberia was erected into a
bishopric about the pontificate of Gregory I.
(590–604). (See GEORGIA.)

Ice.—The manufacture of artificial ice was
known to the Greeks and Romans. The
custom of cooling beverages with saltpetre
was general in Italy in the 16th century. In
the 17th “ice cups” were introduced into
France and Spain. A new mode of producing
ice by chemical means was invented by Mr.
Walker in 1782. Leslie introduced the em-
ployment of sulphuric acid for the same
purpose in 1810. Harrison patented an ice-
making machine, in which ether and salt
are used, in 1857. Tudor first established
the trade in ice at Boston (U.S.) a.d. 1806.
It has grown to such an extent, that there
are sixteen companies for the exporta-
tion of the article in that town. Many of
the “ice farms” of the states of New York
and Massachusetts are reputed to be as
valuable as the rice-fields of Georgia. The
French ice trade dates from 1559, when
some Paris speculators constructed a range
of ice-houses near Auteuil, in the Bois de
Boulogne.

ICELAND (North Atlantic Ocean).—The
discovery of this island is attributed to a
Norwegian pirate, named Naddodr, who
was cast by a tempest on its coast, a.d. 861.
It was then called Snia-land. Gardar cir-
cumnavigated it in 864, and gave it the name of
Gardarsholm. In 874 it was colonized by
a band of Norwegians under Ingolph. Its
inhabitants were converted to Christianity
towards the end of the 10th century. In
1261 it was united to Norway, and in 1397
was ceded to Denmark, to which country it
still belongs. It received the Reformation
in 1551. The commerce of Iceland was de-
cleared free to all Danish subjects in 1787, and
to foreigners in 1855.

Ice House.—The motto of John of Luxemburg,
king of Bohemia, inscribed upon his
helmet found upon the battle-field of Crecy,
July 10, 1346, where he fell, fighting under
the French banner. The motto was adopted
by Edward the Black Prince, who took the
plumed helmet from the head of the Bohe-
mian monarch. The heirs to the English
crown have retained the device, as well as
the plume of three ostrich feathers. Sir
H. Nicholas holds a somewhat different
theory on this subject. (See Feathers.)

ICON ION (Asia Minor).—Paul and Bar-
nabas preached in this ancient city, now
called Koniah (Acts xiii. 51), a.d. 45, from
which they were compelled to flee, on ac-
count of a conspiracy against them (Acts xiv.
1–6). Councils were held here in 238 and
378. It was made the metropolis of Lycaonia.
The Saracens captured it a.d. 1074, and
founded the kingdom of Iconium or Roum.
The Crusaders took it in 1070, and again
under Frederick I. (Barbarossa), June 10,
1190. The Mongols seized it in 1244, and the
Turks in 1307. The battle of Koniah was
fought near this place, between the army of
the sultan and that of the pacha of Egypt,
Dec. 21, 1852. The latter was victorious.

ICONOCLASTS, or Breakers of Images.—
The custom of exhibiting images of the
Saviour and of saints in churches, intro-
duced about the third century of the Chris-
tian era, met with strong opposition in the
Eastern empire, under Leo III., or the
Isaurian, who issued an edict prohibiting the
worship of all statues and pictures which
represented the Saviour, the Virgin, and the
saints, a.d. 726. A second decree, com-
manding the destruction of all images, and
the whitewashing of the churches, appeared
about 728. The attempt of an official to
destroy a statue of the Saviour caused an
insurrection, which spread to Greece and the
Ægean islands. Gregory II. denounced this
crusade against images in a letter to Leo
III. in 729. Another letter followed. Con-
stantine Copronymus, the successor of Leo
III., renewed his edict, and summoned the
third council at Constantinople (Feb. 10 to
Aug. 8, 754), which issued a decree against
the worship of images. The controversy raged
with great heat, and a council met at
Constantinople, Aug. 1, 786, was dissolved on
account of the violence of different parties.
It met at Nicaea (second council) Sept. 24,
and lasted till Oct. 23, 787. The Iconoclats
were anathematized, and the worship of images
was re-established. A council at
Constantinople, in 814, annulled all decrees
made against the Iconoclasts. After much
resistance and many struggles, the Greeks
restored the worship. A council was held
at Constantinople Feb. 18, 842, when the
decrees of the second council of Nicaea were
accepted, and the Iconoclasts denounced.
A solemn festival was appointed, and the
whole of the clergy of Constantinople went
in procession to the church of St. Sophia,
IDE

III

to commemorate the event. The eighth general council, held at Constantinople Oct. 5, 869, to Feb. 28, 870, anathematized the Iconoclasts.

Ides, in the ancient Roman calendar, were eight days in each month, the first of which, consecrated the Idus, fell on the 15th of March, May, July, and October, and on the 13th in the other months. The ides came between the calends and the nones, and were reckoned backwards. Thus, the 14th day of March, May, July, and October, and the 12th of the other months, was called the day before the ides. This mode of reckoning time is still retained in the chancery of Rome, and in the calendar of the Breviary. The Ides of March have become celebrated in history as the date upon which Julius Caesar was assassinated, B.C. 44.

Ides, or Idizi (Treaty).—Idolatry in some form or other was practised by all the nations of antiquity. It was conveyed from Egypt to India about the 17th century B.C., and thence to North Europe about the 6th century B.C. The earliest mention of idols occurs Gen. xxxi. 19 and 30, B.C. 1739. Constantine I. ordered the destruction of idolatrous temples A.D. 330, and Honorius abolished idolatry throughout the Roman empire in 409.

Iddstott (Battle).—The Danish forces under General Von Kragh defeated the Sleswig-Holsteiners under Willisen, at this village of Southern Denmark, July 24 and 25, 1850. The loss on both sides amounted to about 8,000 men.

Idumea. (See Edom.)

Idglau, (Treaty.) was concluded at this town, in Moravia, between the emperor Sigismund and the Hussites, July 5, 1436. The latter obtained a general amnesty and the free exercise of their religion. The treaty was based upon the compactata of Prague made in 1433.

Ildeforest, St. (Treaties).—Several treaties have been signed at this town of Old Castile, in Spain. The first, between Spain and Portugal, was concluded Oct. 1, 1777, and confirmed March 31, 1778. An offensive and defensive alliance between France and Spain was concluded here Aug. 19, 1796, and a treaty between the same powers, by virtue of which France obtained Louisiana, was signed Oct. 1, 1800.

ILTerGIS (Spain).—This town was taken and destroyed by Publius Scipio, B.C. 206.

IliuM, or Ilion (Asia Minor), the real name of the city of Troy, or Troja; the latter, a Roman appellation, being, strictly speaking, the name of the district. Ilium is supposed to have stood on a height at the southern extremity of the plain of Troy, close to the modern village of Bunarbashi. This ancient Ilium, generally believed to have been captured and destroyed after a siege of ten years, B.C. 1184, is distinguished by the epithet vetus, from Ilium Novum, or New Ilium, a village which Alexander the Great, after the battle of Granicus, B.C. 334, ordered to be enlarged and called a city. Fimbria captured it B.C. 85. After the battle of Pharsalia, B.C. 48, it was visited by Julius Caesar, who conferred upon the inhabitants numerous privileges, and, in remembrance of his victory, instituted the Ludi Trojan., to which Virgil refers in the Æneid.

Illinois (United States).—The French settled in this country in the 17th century. It was ceded to England in 1763, and separated at the revolution of 1776. It formed part of the territory of Indians from 1800 to 1809, in which year a division took place, and in 1818 Illinois was admitted as the twentieth state of the Union.

Illuminati.—The name of Illuminati, or Enlightened Men, was adopted by several secret political societies of a revolutionary tendency, which sprung up in Spain and Belgium during the 17th and 18th centuries. The best known was the order of Illuminati, established in Ingoldstadt, Bavaria, May 1, 1776, by Adam Weishaupt. The openly-declared tendency of this association was the extirpation of the Jesuits and the diminution of the papal influence. It soon became very powerful, and was suppressed by decrees issued June 22, 1784, and March 2 and Aug. 16, 1785. Mirabeau was one of its disciples. Its agents visited Paris for the purpose of illuminating France. For many years after its suppression, the society of Illuminati lingered on under the name of the German Union. The favourite saying of the Illuminati was,—"The last king ought to be hanged with the entrails of the last priest."

Illuminati, or Alumbados.—This sect of Spanish heretics first appeared A.D. 1575, but was soon suppressed, owing to the execution of its chief members by the Inquisition at Cordova. They reappeared at Seville in 1623 or 1627.

Illumination and Illuminated Books. —The art of decorating manuscripts is of considerable antiquity, and was practised by the Romans. Cicero commends Marcus Varro for having adorned his works with the portraits of more than 700 persons. Varro flourished B.C. 116–28. The most ancient illu

Illumination, or Illumicium (Europe).—This name was anciently applied to all the countries on the east coast of the Adriatic. In the 4th century B.C. the northern portions
of Illyria were visited by the Gauls, who expelled the natives and drove them to the south. Philip II., king of Macedon, waged war with the Illyrians b.c. 367, and the Romans sent an army against them, and compelled them to sue for peace, b.c. 233. The second Illyrian war commenced b.c. 219, and also terminated in favour of the Romans. The Dalmatae revolted from the Illyrians b.c. 180, and formed the independent state of Dalmatia; and the remaining country was reduced into a Roman province by L. Anicius, b.c. 168. It became an imperial province b.c. 11. (See Dalmatia.)

Immus—Worship. (See Iconoclasts.)

Imbros (Aegean Sea).—An island, inhabited at an early period by the Pelasgians, was annexed to the Persian empire b.c. 500. It afterwards belonged to the Athenians. Mohammed II. subdued it in 1457.

Immaculate Conception.—The dispute in the Roman church on this subject commenced about A.D. 1140, the Franciscans supporting, and the Dominicans opposing, the dogma. In 1834 the discussion was revived at Paris by the Dominican John de Montesano, and having been continued with great bitterness, resulted in the exclusion of the Dominicans from the university of Paris in 1838. It also occasioned great discussion during the pontificates of Paul V. (1605—1621), of Gregory XV. (1621—1623), and of Alexander VII. (1665—1667). Pius IX. wrote letters on the subject Feb. 2, 1849, and May 20, 1850, and it was made an article of faith of the Roman church by a bull promulgated in 1854. The feast of the Immaculate Conception has been annually celebrated since the 12th century. It received the sanction of the council of Basel in 1431, and was ordered to be celebrated by Sixtus IV. in 1476.

Imme, (Battle,) fought at this village, near Antioch, June 7, 218, when Elagabalus defeated Macrinus.

Impeachment is the accusation of a member of parliament of treason or other crimes. The earliest example of an impeachment is the case of the Lord Chancellor Pole, earl of Suffolk, in 1386. By 12 & 13 Will. III. c. 2, s. 3 (1700), no pardon under the great seal is pleasurable to an impeach-

ment by the Commons in parliament. Persons impeached of high treason are allowed counsel by 20 Geo. II. c. 30 (1747).

Imperial Chamber.—A supreme tribunal of the empire, established by Maximilian at the diet of Worms, a.d. 1495. It was a paramount court of justice, and consisted, at its first formation, of a chief judge, who was to be chosen among the princes or counts, and of sixteen assessors, partly of noble or equestrian rank, partly professors of law. They were nominated by the emperor, subject to the approbation of the diet. Hallam says: "The functions of the Imperial Chamber were chiefly the two following. They exercised an appellant jurisdiction over causes that had been decided by the tribunals established in states of the empire. But their jurisdiction in private causes was merely appellant. The second part of the chamber's jurisdiction related to disputes between two states of the empire. But these two could only come before it by way of appeal." The police of the circles had to enforce the sentences pronounced by the Imperial Chamber. It lasted three centuries.

Imperial Guard.—The Consular Guard received this title on the accession of Napoleon I., in 1804. It originally numbered 9,775 men, but was gradually increased, till in 1814 it included 102,708 men. This guard was disbanded on the restoration of Louis XVIII. in 1815, but it was again enrolled by a decree of Napoleon III., May 4, 1854.

Imprisonment for Debt.—Clergymen in the performance of their duties, and members of parliament, are exempt from arrest for debt. (See Clergy, and Fer-

bars' arrests.) By 12 Geo. I. c. 29 (1726), no arrest for debt could take place unless the cause of action amounted to £10 in superior, or 40s. in inferior courts. The restriction was extended to £10 in inferior courts by 19 Geo. III. c. 70 (1779). By 51 Geo. III. c. 124 (July 2, 1811), £15 was the lowest sum recoverable by imprisonment, and by 7 & 8 Geo. IV. c. 71 (July 2, 1827), it was fixed at £20. Arrest on mesne process was abolished except in the case of the debtor's attempting to quit England, by 1 & 2 Vict. c. 110 (Aug. 16, 1833). By the Absolving Debtors' Arrest Act, 14 & 15 Vict. c. 52 (Aug. 1, 1851), absolving debtors who owe £20 or upwards are liable to arrest.

Improprations.—Impropriation is def-
first arose in Italy during the 12th century. Serafino d’Aquila, the first improvisatore of note, was born in 1466, and died in 1500. The two blind brothers Brandolini excelled at Florence as improvisatori, in the 15th century.

Incense of Frankincense was commonly employed by the pagan nations of antiquity in their religious sacrifices. Incense was also much used by the Jews, who were prohibited from burning it except in the ceremonies of the law (Exod. xxx. 34—38), B.C. 1491. Incense was not used during the first three ages of the Christian church, but is referred to by the Apostolical Canons, which are believed to date from about A.D. 550. The early Christians abhored its use in public worship, regarding it as a part of the worship of idols. Its use was, however, permitted at funerals.

Incipient (Firth of Forth).—This island having been fortified by an English force, was captured by the French, A.D. 1548. A returning light was placed on the island in 1805.

Income and Property Tax.—The first income-tax was levied in 1512 to defray the expenses of the war with France. It was imposed upon the commons, who were rated at two-fifteenths, and the clergy at two-tenths. Mr. Pitt’s income-tax was also levied to defray the expense of a French war, by 39 Geo. III. c. 13 (Jan. 9, 1799). It imposed a graduated series of rates on all incomes of £600 per annum and upwards, and was repealed by 42 Geo. III. c. 42 (May 4, 1802). It was, however, virtually restored by the Property-tax Act, 43 Geo. III. c. 122 (Aug. 11, 1803), which imposed a rate on all incomes of £600 per annum, 5 per cent. on incomes of £150 being the standard. The rate was increased to 6½ per cent. by 45 Geo. III. c. 15 (March 18, 1805), and to 10 per cent. by 46 Geo. III. c. 65 (June 13, 1806). This tax expired in 1816, government being defeated, on the motion for its renewal, by a majority of 37, on the 19th of March. Sir Robert Peel’s rate of sevemence in the pound was levied by 5 & 6 Vict. c. 35 (June 22, 1842), for three years. It was continued three years longer by 8 & 9 Vict. c. 4 (April 5, 1846), and again for three years by 11 & 12 Vict. c. 8 (April 13, 1848). It was renewed for one year by 15 & 16 Vict. c. 12 (June 5, 1851), and for another year by 15 & 16 Vict. c. 20 (May 28, 1852). By 16 & 17 Vict. c. 34 (June 28, 1853), it was arranged for the rate to undergo a gradual diminution, and to expire in seven years, and the tax was also extended to Ireland; but in consequence of the Russian war the plan was abandoned, and a double rate was imposed by 17 & 18 Vict. c. 10 (May 12, 1854). An addition of twopence in the pound on incomes of more than £150 and of three halfpence on those between £150 and £200, was imposed by 18 & 19 Vict. c. 20 (May 25, 1855). These rates were reduced to sevemence and five- pence in the pound by 20 Vict. c. 6 (March 21, 1857), and increased to ninepence and sixpence-halfpenny by 22 & 23 Vict. c. 18 (Aug. 13, 1859). By 23 Vict. c. 14 (April 3, 1860), they were further increased to ten-pence and sevemence. A select parliament- ary committee to inquire into the present mode of assessing and collecting this tax, with a view to its more equitable adjustment, was appointed Feb. 19, 1861. In the financial statement made by Mr. Gladstone, April 15, 1861, a reduction of a penny on the tenpenny rate was proposed.

Incorporated Law Society of the United Kingdom was instituted A.D. 1827, and incorporated by charter in 1831. It was placed upon a new basis and re-incorporated Feb. 26, 1845.

Indemnity.—An act of indemnity, passed May 20, 1690, exempted from penal consequences the instruments of popery and arbitrary power during the reign of James II. In addition to the regicides, thirty-five persons were by name exempted in this act. Various statutes render it incumbent upon most government officers to take certain oaths as a necessary qualification for their office; but as this would prove very troublesome in many instances, an act of indemnity is passed every year to exempt persons from any omission in this respect. Indemnity bills are also passed to release government or its agents from the consequences of illegal acts which circumstances may have rendered necessary. Bills of this kind were passed on behalf of the advisers of the embargo on the exportation of corn, Dec. 16, 1766; also to indemnify officers who arrested persons during the suspension of the Habeas Corpus Act, April 10, 1801, and March 10, 1818; and for the violations of the currency laws by the suspension of the Bank Charter Act in 1848 and 1857.

Independents, or Congregationalists.—The term Independents was applied to several sects of dissenters, principally Brownists, about A.D. 1640. Jacobs and Brown are said to have established the first Congregational assembly at Leyden in 1616. The colleges for the education of Independent ministers in this country are Western College, Plymouth, founded in 1752; Rotherham College, Yorkshire, in 1756; Brecon College in 1769; Cheshunt College in 1783; Airedale College, Bradford, in 1784; Hackney Seminary in 1796; Lancaster College in 1806; Springhill College, Birmingham, in 1838; and New College, St. John’s Wood, London, in 1850.

Index Expurgatorius.—A list of books considered pernicious by the Roman church was prepared by the Inquisition, A.D. 1559, by order of Paul IV., and received the sanction of the council of Trent (1545 to 1563). In 1665, Pius V. appointed a committee for the express purpose of continuing this catalogue.

India (Asia).—The term India is believed to be derived from Sindhu, the Sanscrit name of the river Indus. Some writers believe that those early navigators the Phoenicians reached India by way of the Red
Sea. The ancient Greeks had but a feeble acquaintance with India. Hecateus of Miletus is the first historian who speaks of the country (h.c. 549—486).

B.C.

2000. The worship of Bramah is introduced about this time.

1900. The country is ravaged by the Mahabharata Maratha empires.

1800. Buddhism is introduced, according to Sir W. Jones.

1528. The territory north of the Indus is subdued by the Persians.

1537. Alexander the Great overruns the Punjab.

A.D.

78. The era of Salivahan commence.

117. Saheb ud Deen founds the Mohammedan empire in India.

1599. Ind is becomes independent, on the death of Saheb ud Deen.

1217. Zenghis Khan commences his invasion of India.

1598. The country is invaded by the Mongols, who sustains a complete defeat at Delhi.

1638. Conquest of Malabar.

1659. Bombay is the north and the Deccan are acknowledged to be independent.

1683. The 'tartars, under Tamerlane, ravage India, and sack Delhi.

1757. Jumur is annexed to the Indian empire.

1767. Vasco de Gama doubles the Cape of Good Hope, and discovers the passage to India.

1753. The Portuguese obtain a footing in Cochin, the commencement of their power in the East.

1829. Baber founds the Mongol dynasty in India.

1857. The British attempt to reach India by the North-east and North-west passages.

1843. Cabul is overrung.

1855. Humayun is restored, by the assistance of the Persians.

1879. Sir Francis Drake lands in the Moluccas.

1886. Akbar conquers Cashmere.

1888. An overland expedition to India is undertaken by the Levant Company.

1893. Akbar annexes Sind.

1898. Bombay is made the East-India Company (q. v.) receive their first charter.

1902. May 3. The first English fleet sails from Torbay.

1912. Jan. 11. The English are permitted to establish factories at Surat, Ahmedabad, Cambey, and Cogro.

1914. The English defeat the Portuguese in Bomb.

1617. The Danes settle in Tranquebar.

1823. Shah Jehan rebels.

1835. The English are allowed to trade with the Portuguese ports in India.

1641. Fort St. George is founded.

1648. Rebellion of Sevajee, the founder of the Maratha empire.

1659. Aurungzebe dethrones his father, Shah Jehan, and succeeds in his stead.

1664. The French East-India Company is established.

1669. The English company obtains Bombay island.

1709. Sevajee ravages the Mongol dominions.

1830. Death of Sevajee.

1857. Bombay is made the chief establishment in India. The French establish Pondicherry.

A.D.

1598. Calcutta is purchased by the East-India Company.

1719. Bahadar Shah marches against the Sikhs.

1721. An East-India Company is founded at Ostend.

1725. The Swedish company is formed.

1748. The English fail in an attempt on Pondicherry.

1749. Oct. The French are made rulers of eighty-one villages near Pondicherry.

1750. The Rohillas defeat the imperial forces.

1752. The Punjab is ceded to Ahmed Shah.

1760. Feb. 16. The English fleet, under Admiral Pococke, compels Lally to retire. April 6. The subahdar of the Deccan cedes a large portion of his territory to the British, and agrees to allow no French settlements in his dominions. Nov. 29. The French are expelled from Wandewash. Dec. 10. The English seize their fort at Carnagoly.

1761. Feb. 10. Arcot is taken by the British.

1764. Feb. 11. The English army in India mutinies, but is reduced to subjection by Major Maitland. Oct. 23. The battle of Buxar (q. v.).

1765. May 19. The nabob of Oude becomes tributary to the British. Aug. 12. The emperor constitutes the Company the Dewanee or receivers of revenue of Bengal, Bahar, and Oudh.

1766. Nov. 12. Treaty with the Nizam of the Deccan, by which the British obtain the Northern Circars.

1780. A famine in Bengal carries off nearly a third of the population.

1782. April 13. Warren Hastings succeeds to the government of Bengal. Dec. 28. The Mahratta enter Delhi, and compel the emperor to make important concessions.

1779. The Mahratta confound great ravages.

1784. April 1. The British defeat the Rohilla army. Dec. 28. Salsette and Bassein are seized by the British.

1784. March. Peace is concluded with Tipppoo.

1786. Sept. Guntur is ceded to the English by the Nizam of the Deccan.

1790. May 7. Tipppoo enters Travancore, which he places under his protection. June 1. A treaty is concluded with the Mahrattas against Tipppoo. July 4. Tipppoo is defeated by the English and the Mahrattas, and takes Bednore.

1792. March 26. Peace is concluded with Tipppoo, who surrenders his two eldest sons as hostages.

1793. Courts for civil and criminal causes, and circuits, are appointed, and judges' fees abolished. Pondicherry is again taken by the English.

1794. March 29. Tipppoo's sons are restored.

1795. Allahabad is ceded to the British.

1802. March 25. Pondicherry is restored to France by the treaty of Amiens. June 4. The nabob of Purnuckabah cedes his territories to the British. Dec. 31. By the treaty of Bassein, the Peishwa cedes a large extent of territory to the British, and agrees to hold no intercourse with other foreigners.

1804. Feb. 27. The treaty of Boornahpore is concluded with Scindia. April 16. War is declared against Holkar. Oct. 8. Holkar lays siege to Delhi, but is compelled to retreat. All Holkar's possessions in the Deccan are subdued by the British. Nov. 14. Death of General Frazer, at the battle of Deig, in which he defeats Holkar.

1807. Jan. 31. A mutiny breaks out among the troops stationed at Velleore. 800 Sepoyos are executed.

1808. War commences with Travancore. Dec. 31. The Travancore army is defeated by Colonel Elphinstone. Feb. 25. All the lines of Travancore are stormed by the British, and the war is ended. Aug. 23. A mutiny is quelled at Sevareilly. Oct. 20. Tipppoo is defeated at Seringapatam, and the treaty of Bangalore is concluded.

1812. The Pindarries shake off the Mahratta authority, and assert their independence.

1813. July 1. The India trade is thrown open by the treaty of Chilka.

1814. Nov. 1. War is declared against Nepaul.

1815. April 27. The whole of Kamaoon is ceded to the British. Dec. 3. The treaty of Segoulee concludes the war.

1819. The vizier of Oude throws off his allegiance to the Mongol ruler, and establishes an independent government.

1829. Dec. A decree for the abolition of sutteeism is published.

1830. March 18. The Bombay papers first mention the elevation of native Hindoos to the magistracy. April 16. The rajah of Coorg is deposed.

1846. Jan. 28. The Sikhs sustain a severe defeat at Alivali (q. v.).
A.D. 1848. Feb. 10. They are defeated at Sobron (g.v.). Feb. 22. Sir Hugh Gough takes formal possession of Lahore. March 9. Peace is restored by the treaty of Lahore.

A.D. 1851. Jan. 29. The Pees Eao, ex-rebels, of the Mahrawtas, dies at Bithoor. The continuance of his pension is refused to his nephew Nana Sahib. Oct. 29. Disputes having occurred with the Burman empire, a British fleet arrives at Rangoon.

GOVERNORS-GENERAL OF INDIA.

A.D.

INDIA (United States), separated in 1809 from Illinois, with which, from 1800, it formed a territorial government, and was admitted into the Union as an independent state in December, 1816.

INDIANAPOLIS, the capital of Indiana, was founded in 1821.

INDIAN COUNCIL.—This council for the government of India, erected by 21 & 22 Vict. c. 106 (Aug. 2, 1855), to supersede the Board of Control, consists of fifteen members, eight of whom are appointed by the Queen, and seven by the directors of the East-India Company. They receive an annual salary of £1,200, retain their office during good behaviour, and are not permitted to sit in parliament. The first meeting of this council was held in 1855.

INDIA-ROUBBER, or CAOUTCHOUC, was first brought to Europe by M. de la Condamine, A.D. 1738. An account of the substance, as used by the natives of South America, was presented by him to the Academy of Sciences at Paris in 1736. A further report was given in 1761, by Messrs. Herissant and Macquer, to the French government, and by its order M. Grossart made several successful experiments, the results of which were published in 1768. The first allusion to the subject in English literature is by Joseph Priestley, in a work printed in 1770, in which India-rubber is recommended as good for "wiping from paper the marks of a black-lead pencil". The substance came into more general notice some ten years after, when it was sold in the shape of bottles, at the rate of about a guinea the ounce. Macintosh succeeded in dissolving India-rubber, and applying it to waterproof clothing. The first patent obtained by him for these celebrated "Macintosh toshes" bears date 1823. Barnard took out a patent for caoutchouc in 1833. The sulphuration of caoutchouc, a valuable invention, is due to Goodyear, who took out a patent for the same in 1839.

INDICATION.—This term was originally applied to a tribute of corn exacted by the Romans every fifteen years; but it was afterwards used to denote the period at which the payments were made. The institution of indications dates at the earliest from the time of Constantine I., A.D. 312; but the first instance of their use is mentioned in the Theodosian code, under the reign of Constantius, who died in 361. The peace court adopted computation by indications about 800, the commencement of the first indication being referred to Jan. 1, 318.

INDIGO.—Beckmann is strongly inclined to believe that what Dioscorides calls indicum, and Pliny and Vitruvius indicum, is our indigo. Muratori speaks of a treaty in Latin, A.D. 1193, between the people of Bologna and Ferrara, in which indicum is mentioned as an article on which duty must be paid. Marco Polo met with it in Asia, A.D. 1285, and published a description of the plant and its uses after his return to Europe in 1298. An act was passed in the reign of Elizabeth, authorizing searchers to burn indigo in all dye-houses and other places where it could be discovered. This act remained in force till the time of Charles II. Indigo was so little known on the continent that some proprietors of mines in the Hartz mountains obtained authority in 1705 to dig for the article in the hills near Halberstadt. Its use was prohibited in Languedoc in 1598. The cultivation of indigo commenced in Carolina in 1747.

INDORE (Hindostan).—Mulhar Rao Holkar obtained a grant of the territory of Indore A.D. 1735. The town of Indore was founded by Asla Bace, A.D. 1764. A great battle was fought here on Oct. 14, 1801, when Holkar was defeated by Scindia, a powerful Mahratta chieftain, who destroyed Indore. Murray captured the town, which had been restored, Aug. 24, 1804. By the treaty of Mundeose, Jan. 18, 1818, the British extended their protection to Holkar, the ruler of Indore.

INDULGENCE.—According to Bingham, anciently an indulgence was no more than the power which every bishop had of moderating the canonical punishments which, in course of penance, were inflicted upon sinners, and not any pretended power of delivering souls from the pains of purgatory, by virtue of a stock of merits, or works of supererogation, of which the Pope is become the sole dispenser. Valentinian commenced the practice of granting, on Easter Sunday, a general release to all except the worst criminals, A.D. 367. This act of grace was continued by the emperors, and called their indulgence. The papal system of indulgences originated with Pope Gregory VII. in 1077, and they were granted by the council of Clermont to the Crusaders Nov. 18—29, 1095.
They were sold publicly in all parts of Europe on the occasion of the jubilee in 1300. The doctrine of indulgences was made an article of faith by Clement VII. in 1534. Indulgences were farmed out for fifteen years to Tetzel in 1502. The Tax-book of Indulgences was published at Rome in 1514. Luther denounced the traffic Oct. 31, 1517. The council of Trent framed a new law of indulgences, Jan. 13, 1546.

**INDUSTRIAL SCHOOLS.**—The first attempt to introduce these institutions into this country was made at Norwood by Mr. Aubin, A.D. 1836. The Industrial Schools Act, 20 & 21 Vict. c. 48, for the care and education of poor children, was passed Aug. 17, 1857.

**INFANTICIDE.**—This practice was permitted in ancient Greece and Rome, but was prohibited by the progress of Christianity. It prevailed to a frightful extent in India and the Pacific archipelagos; but it is becoming extinct, owing to the benign influence of Christianity. In 315 Constantine I. took a forcible step for its suppression, by providing for the maintenance of children whose parents were too poor to support them; but it was not treated as murder till the reign of Valentinian (364—375). By 21 James I. c. 27 (1623), the concealment of the death of an illegitimate child was made legal proof that it had been murdered. This law was repealed by 43 Geo. III. c. 55 (June 24, 1803).

**INFANTRY.**—The Jews, the Egyptians, and the Persians, amongst ancient nations, devoted considerable attention to the formation of their infantry. Cyrus (B.C. 559—529) clothed his foot-soldiers in armour. The Greek phalae and the Roman legion first came into collision at the battle of Heraclea, B.C. 280. On the decline of the Roman empire, the barbarians relied principally upon their infantry. The Franks borrowed the square, employed with such success at the battle of Tours, A.D. 732, from the Romans. The Anglo-Saxon forces were composed chiefly of infantry. During the Middle Ages, infantry was but little used. Louis VI. (A.D. 1106—1137) formed the communal militia in France, and his example was followed by Frederick I. (1152—1190) of Germany, and Henry II. (1154—1189) of England. This fact is the principal reason of the establishment of infantry as the chief arm in war. The battle of Bovines, July 27, 1214, was the first entirely decided by modern infantry, and led to the establishment of this force in all the states of Europe. Infantry was for some time composed of irregular bands; and Charles VII. of France was the first to organize a standing army, in 1444. Francis I. increased this army to the number of 12,000. The battles of Biberach, Oct. 2, 1496, and of Calderso, Oct. 29 and 30, 1506, were fought solely by infantry.

**INFANT- SCHOOLS.**—The first establishment of this kind was opened by James Buchanan at New Lanark, A.D. 1815. Mr. Robert Owen providing the means for the undertaking, Mr. (afterwards Lord) Brougham and Lord Lansdowne introduced them at London in 1819, and the success achieved by Mr. Wilderspin in their management, led to their general adoption throughout the kingdom. The Home and Colonial Infant School Society was founded in 1836.

**INFERNAL MACHINE.**—An apparatus filled with gunpowder or other explosive materials for the destruction of human life and property. The Italian engineer Federico Gianibelli was the first to employ these engines, which he did at the siege of Antwerp by the Spaniards, 1585. In modern times, infernal machines have been repeatedly employed, especially in France, for the purpose of assassination. The most celebrated instances of this kind are, the attack upon Napoleon Bonaparte, Dec. 24, 1800; that upon Louis-Philippe, July 23, 1835; and one upon Napoleon III. and his empress, Jan. 14, 1858. The Russians employed infernal machines against the British fleet in the Baltic in 1854 and 1855.

**INFIRMARIES.**—These institutions were unknown before the Christian era. Julian, observing the charitable institutions of the Christians, founded similar establishments for the sick poor, which were called Xenodochia. The clergy were the first to establish houses for the reception of the sick. Fabiola, a Roman lady, a friend of St. Jerome, established one at Rome in the 5th century. (See HOSPITALS.)

**INFORMERS.**—The custom of paying a portion of a fine imposed for an offence, to the person by whom the offender has been exposed, has created the business of common informers. They were very numerous in Greece and Rome, and much discouraged by Titus (A.D. 79—81) and Trajan (98—117). By 18 Eliz. c. 5 (1576) and 27 Eliz. c. 10 (1584), informers were compelled to appear in person, and if they withdrew the action, were condemned to pay the costs. For compounding without permission of the court, they were to be imprisoned in the pillory for two hours, pay a fine of £100, and be incapacitated from suing in future. By 31 Eliz. c. 5 (1589), no prosecution can take place on information, in cases where the penalty is divided between the informer and the crown, when a year has elapsed since the commission of the offence. An act to prevent malicious informations in the court of King's Bench was passed in 1692 (4 & 5 Will. & Mary, c. 18).

**INFRAESTATIONS.** (See Calvinism.)

**INGOLSTADT (Bavaria).**—This strongly-fortified town has been frequently besieged. By the 13th secret article of the treaty of Campo-Formio, Oct. 17, 1797, the emperor agreed to surrender Ingolstadt and other
German fortresses. The university, where the celebrated Dr. Faustus studied, was founded in 1472, and in 1800 was transferred to Landshut.

INGOUR (Battle).—Omer Pasha, at the head of a Turkish army, passed this river, in Asia Minor, Nov. 6, 1555, and assailed a strong Russian force. The latter was defeated with the loss of 1,250 in killed and wounded. The Turks lost about 400 men.

INGRIA (European Russia).—This province was invaded by the Poles A.D. 1579, and by the Swedes A.D. 1609. Peter the Great invaded it in 1703, and it was ceded by Sweden to Russia at the peace of Nystadt, Aug. 30, 1721.

INK.—The ink used by the ancients was of a viscid nature, being chiefly composed of ivory-black and gum. A varnish of wax was also employed, especially in the 9th century A.D. The Anglo-Saxon black inks of the 9th and 10th centuries are remarkable for their excellence. Gold and silver inks were sometimes employed, and red ink is very common for capital letters, &c., though no MS. is entirely written with it. Indian ink was first made in China about A.D. 800, and was first perfumed about 1100. Sympathetic inks were known to the ancients, and a method of secret correspondence is mentioned by Ovid in the Art of Love, B.C. 2. Inks of this character were invented by Peter Borel in 1653, Le Mort in 1654, and Waizt in 1705. The French Academy of Sciences appointed a commission for the discovery of an indelible ink, which published two receipts for the purpose, May 30, 1831.

INKERMANN (Battle).—During the Crimean war, the Russians, nearly 50,000 strong, assailed the weakest part of the English position facing the harbour of Balaklava and the cervices of Inkermann, Nov. 5, 1854. For six hours, 8,000 British troops encountered at various points, and resisted, the assault of this overwhelming force. The French came to the support of the English, and the Russians were driven back with great slaughter. The English loss amounted to 3,000, and that of the French to 1,726 men. The Russians lost about 12,000 in killed and wounded.

INLAND REVENUE. (See EXIST.)

INNS were established in Egypt B.C. 1707. Herodotus ascribes the introduction of inns to the Lydians. They existed among the Romans, who frequently used the chequers as a sign. The city of Herculeanum is said to have contained 900 public-houses. Tiberius (A.D. 14—37) prohibited inkeepers from selling any baker’s goods, and Nero (54—68) restricted them to the sale of boiled vegetables. By 27 Edw. III. st. 1, c. 3 (1355), commissioners were appointed to inquire into impositions by inkeepers, and by 11 Hen. IV. c. 2 (1409) inkeepers were prohibited from being officers in the customes. The latter act was enforced by 20 Hen. VI. c. 5 (1442).

INNS OF COURT AND CHANCERY.—According to Pearse (Inns of Court and Chancery, p. 51), “the inns of court are voluntary societies, for ages submitting to government analogous to that of other societies of learning.” They are four in number; viz., the Inner and Middle Temple, Lincoln’s Inn and Gray’s Inn, and they have apprenticing to them the nine inns of Chancery; viz., Clement’s Inn, Clifford’s Inn, Lyon’s Inn, New Inn, Furnival’s Inn, Thavies’ Inn, Symond’s Inn, Barnard’s Inn, and Staple’s Inn (q.v.).

INNSBRUCK, or INNSBRUCK (Austria), the capital of the Tyrol, a very ancient city, was taken by Maurice of Saxony in 1552, by the Bavarians in 1703; but they were driven out in a few days, and the French took it in 1805, and ceded it to Bavaria. The French and Bavarians were expelled April 15, 1809. They regained possession May 19, 1809, and were expelled, after a desperate battle around the city, May 29. Innsbruck once more fell into the hands of the French, and was taken in July, 1809, but was rescued Aug. 12, 1809. The emperor Leopold I. founded a university at Innsbruck A.D. 1672, and the palace was erected by Maria Theresa in 1770.

INOCULATION for small-pox was introduced into England from Turkey, about A.D. 1721, by Lady Mary Wortley Montagu. It was tried as an experiment on seven condemned criminals, who submitted to the operation on condition that their lives should be spared if they survived. The royal family were inoculated in 1726, and the practice was afterwards generally adopted. On the discovery of vaccination (q.v.), it was abandoned, and was finally prohibited by 3 & 4 Vict. c. 29, s. 8 (July 23, 1840).

INQUIST.—This ecclesiastical tribunal dates from the mission of Pierre de Castelnau against the Albigenses A.D. 1204. In 1215 St. Dominic was appointed the first inquisitor-general by the fourth Lateran council, and in 1233 the so-called Holy Office received a definite constitution from Pope Gregory IX. Sicily received the Inquisition in 1224, Aragon in 1233, Venice in 1240, France in 1255, and Castile and Leon in 1290. The modern Inquisition was formed in Castile by a bull dated Nov. 1, 1478. The tribunal was erected in September, 1460, and commenced its operations at Seville, under the inquisitor-general Torquemada, Jan. 2, 1481. It was firmly established in Spain by two bulls of Sixtus IV., Aug. 2 and Oct. 17, 1483. In 1540 the Holy Office was established in Portugal; and in 1571 it was introduced into Peru and Mexico by Philip II., whose reign is known as the Spanish reign of terror, owing to the numerous victims sacrificed to the Inquisition during its progress. It was suppressed in France by the edict of Nantes in 1598, and was abolished in Tuscany and Naples in 1752. Napoleon I. published an edict for suppression in Spain, Dec. 4, 1808, and the Cortes also ordered its abolition, Feb. 12, 1813; but Ferdinand VII. restored it July 21, 1814. The acts of the Inquisition were burnt at Goa, by order of
John, regent of Portugal, May 27, 1815, and the office was finally abolished in Spain in 1820. The total number of victims of the Holy Office is quite unknown. In Spain alone it is estimated by Llorente that 32,000 persons were burnt, 17,000 burnt in effigy, and 281,000 condemned to other penalties. The last sufferer condemned to the flames was a woman, burnt at Seville Nov. 7, 1781, for having made a contract with the devil. This tribunal was abolished by the provisional government of Tuesday, Nov. 16, 1859.

Inquisitors of the Press were instituted by Pope Sixtus IV. (1471-1484). No work was to be printed without their permission.

Insolvency.—The first act for the relief of insolvent debtors was passed by the Long Parliament. A court for their relief was temporarily established by 33 Geo. III. c. 102 (July 10, 1813), which was continued by several acts till June 25, 1820. New measures for their relief by means of the court were adopted by 1 Geo. IV. c. 119 (July 26, 1820), and the numerous laws on the subject were amended and consolidated by 7 Geo. IV. c. 57 (May 26, 1826). Insolvent debtors, aldermen, or councilors of boroughs, are compelled to vacate their office by 5 & 6 Will. IV. c. 76, s. 59 (Sept. 9, 1835). By 5 & 6 Vict. c. 116 (Aug. 12, 1842), insolvent debtors whose liabilities are less than £200 may obtain relief by the Bankruptcy Court. This act was amended by 7 & 8 Vict. c. 99 (Aug. 9, 1844). By the new Bankruptcy and Insolvency Act, 24 & 25 Vict. c. 134 (Aug. 6, 1861), the business of the Insolvent Debtors' Court is transferred to the Court of Bankruptcy.

Institute (French).—The name Institut National was given to five eminent scientific, literary, and artistic societies, each having its own separate administration, which were united by decree in 1795. They held their first public session in 1796. These societies are the Académie Française, established by Cardinal Richelieu a.d. 1634, composed of forty members, and having under its charge the compilation of the Dictionnaire; the Académie des Inscriptions et Belles-Lettres, founded by Louis XIV. in 1663, and composed of an uncertain number of members and foreign associates; the Académie des Beaux-Arts, founded in 1664, composed of forty members, and divided into five sections,—painting, sculpture, engraving, architecture, and music; the Académie des Sciences, founded by Colbert in 1666, having sixty-five members, divided into eleven sections, and publishing the results of its activity in a periodical called Annales, and literary series of memoirs; and the Académie des Sciences Morales et Politiques, established by a decree of Louis-Philippe, of Oct. 25, 1832, numbering thirty members, and divided into five sections,—philosophy, jurisprudence, political economy, history, and moral philosophy. In 1803 the constitution of the society was changed; in 1806 the name was changed to Institute of France; and in 1811 to that of Imperial Institute.

Insurance, of Assurance.—Some authorities are of opinion that it was introduced into Europe by the Jews, a.d. 1182; whilst others state that it arose in Lombardy about 1280, and was brought to London about 1350. The earliest ordinance respecting insurance is dated Barcelona, 1435. The next was published at Florence in 1523. The emperor Charles V. of Germany issued the "Caroline code" in 1551; his son, Philip IL, added a number of new decrees concerning insurance in 1563 and 1566. The preamble to the first English statute on this subject (43 Eliz. c. 12), passed in 1601, states that insurance had been "time out of mind an usage amongst merchants." Louis XIV. of France issued an ordinance on the subject in 1681. Dr. Barton set up the first insurance office against fire in 1696, afterwards called the Hand-in-Hand. The Amicable Society General Insurance was established by charter in July, 1706; the Union Fire Office in 1714; and the Westminster Fire Office in 1717. The first companies for marine insurances, the Royal Exchange Insurance and the London Insurance, were established June 22, 1720.

Interdict. (See Excommunication.)

Interest, in use among the ancient Greeks, was restricted to 12 per cent. by a law of Solon, b.c. 550. It was regulated by law in India, b.c. 324, and was reduced to 4 per cent. at Rome, b.c. 29. It was prohibited by a law of Richard I. a.d. 1197, but was apparently legal at the signing of Magna Charta, as it was then declared not payable by minors. It was again prohibited by 3 Hen. VII. c. 5 (1436), was fixed at 10 per cent. by 37 Hen. VIII. c. 9 (1545), and was prohibited again by 5 & 6 Edw. VI. c. 20 (1552). Legal interest at 10 per cent. was restored by 13 Eliz. c. 9 (1570), and after undergoing successive reductions, was ultimately settled at 5 per cent. by 12 Anne, sess. 2, c. 16 (1713). All restrictions were repealed by 17 & 18 Vict. c. 90 (Aug. 10, 1854).

Interim.—Several decrees have been issued bearing this title. The first, published by the diet of Ratisbon, July 29, 1541, referred the religious disputes of the Germans to the arbitration of a general council. The second, known as the Augsburg Interim, issued by Charles V., was read before the diet of Augsburg, May 16, 1548, and failed in its object of reconciling the Roman Catholics and the Protestants. The Interim of Leipsic was promulgated by the elector Maurice of Saxony, Dec. 22, 1549, and was accepted by some Protestants. Charles and Maurice resorted to arms to support their respective decrees, and the emperor was compelled to revoke his interim in 1552.

Interim Treaty.—This treaty between Austria and Prussia was signed Sept. 30, 1849, but was not to take effect till May 1, 1850. Its object was the maintenance of
the Germanic confederation, and of the peace of Germany.

INTERLUDE.—A species of dramatic composition between the moral plays and the modern drama was, according to Disraeli (Amenities, i. 349), "called the interlude, or a play between, to rest by its pleasantry the intervals of a luxurious and sometimes a wearisome banquet. The most dramatic interludes were the invention of John Heywood, who flourished A.D. 1521—1565, the jester of Henry the Eighth." Heywood was in fact the inventor of the interlude.

INTERNATIONAL COPYRIGHT.—The benefit of international copyright was secured to authors in certain cases by 1 & 2 Vict. c. 59 (July 31, 1838), which was extended by 15 Vict. c. 12 (May 28, 1852). A treaty on the subject was concluded with France in 1851, one was signed with the United States, Feb. 10, 1859, and with Hamburg in 1854.

INTERNATIONAL EXHIBITION OF 1851.—In 1851 it was resolved by the council of the Society of Arts that the holding of decennial industrial exhibitions would be of national benefit. Circulars were accordingly sent to the foreign exhibitors of 1851, to ascertain their views respecting a similar undertaking in 1861; but, in consequence of the Italian war, the Society of Arts, in June, 1859, passed a resolution for the postponement of the scheme. The sudden termination of the war induced them to resume their efforts, and the year 1862 was suggested as the date of the exhibition. In February, 1860, Prince Albert signified his desire to further the undertaking, and a guarantee fund was opened, which soon amounted to £430,000. In June the commissioners of 1851 gave permission for the new building to be erected on the ground purchased with the surplus fund of the old exhibition, and in February, 1861, the trustees were incorporated by charter, as the Royal Commissioners of the Exhibition of 1862. The building, designed by Captain Fowke, was commenced March 9, the contractors being bound to complete it by Feb. 12, 1862. Its principal front is of brick, 1,200 feet long and 50 feet high. Brick wings recede at each end, between 500 and 600 feet, and the parallelogram included between these erections forms the industrial exhibition, built of iron, wood, and glass. The immense domes at each end of the building measure 160 feet in diameter and 250 feet in height, being the largest structures of the kind in existence. Including the large wooden galleries forming the machine department, the Exhibition buildings cover an area of more than 23 acres.

INTERREGNUM.—This period lasted from the execution of Charles I. till the restoration of Charles II., being an interval of little more than eleven years. On the king's execution, Jan. 30, 1649, a republic was proclaimed, which lasted till the expulsion of the parliament by Cromwell, April 20, 1653, after which he exercised absolute power as lord-general. He surrendered his power to a convention appointed by himself, July 4, but was reinstated by them Dec. 12, and proclaimed lord-protector of the Commonwealth Dec. 16. A new settlement was adopted May 23, 1657, by which Cromwell received full powers to appoint his successor. He died Sept. 13, 1658, and was succeeded by his son Richard, who resigned the protectorate in May, 1659. The regal authority was restored in the person of Charles II., May 29, 1660.

INVERLOCHRY (Battle).—The royalist troops, commanded by the marquis of Montrose, defeated Argyle and the Covenanters at this place, in Scotland, Feb. 2, 1645.

INVERNESS (Scotland) was one of the capitals of the Picts during the 6th century. Its first charter was granted by Malcolm Canmore, in 1067. Robert Bruce captured it in 1313, and Donald, Lord of the Isles, burned it in June, 1411. The bridge over the Ness was built in 1586; and the old castle was destroyed by the rebels in 1746. The town-hall was founded in 1708, and the assembly-rooms were erected in 1789. A disastrous earthquake occurred in 1816, and an inundation of the river Ness in 1848, which swept away the old bridge. The new suspension-bridge was opened in 1859.

INVESTITURE.—The whole right of investiture by the temporal sovereign was abrogated by a decree of Gregory VII. at a council held at Rome, Feb. 24-25, 1075. The decree deprived every bishop, abbot, or inferior ecclesiastic who should receive investiture from any lay person. The claim led to many contests in Europe. The emperor Henry V. gave up the right of investiture in a treaty signed at Rome Feb. 12, 1111. Another dispute having arisen on the subject, it was once more settled by the concordat of Worms, 1122, which was ratified by the Lateran council in 1123. The Norman kings refused to concede the right, and Urban II. threatened excommunication. Anselm of York attempted to persuade Henry I. to submit in 1103. At a council held at London, Aug. 1, 1107, it was agreed that bishops should do homage to the king, but not receive investiture from him. It led to frequent contests between the temporal and secular powers.

INVOCATION OF SAINTS.—The practice of imploring the intercession of the dead became general in the Romish church during the 5th century. It is first enjoined in the canons of the English churches in the year 994.

IODINE.—This substance was discovered in 1811 by Courtois, a saltpetre manufacturer at Paris, who described it to the Institute of Paris on the 6th of December, 1813. It received its name from the Greek Ἴον, violet-coloured, and has been successfully employed in the treatment of several diseases.

IOHN HAY, or IOGOLMILL (Argylesire).—This island, one of the Hebrides, is celebrated for the ruins of the cathedral, &c., founded by St. Columba A.D. 565. It was
twice sacked by the Danes. In accordance with an act passed by the Scotch convention of estates in 1561, the ecclesiastical buildings on this island were destroyed. Shakespeare, referring to it as the ancient place of sepulture of the Scottish sovereigns, says that Duncan's body was

"Carried to Colme-kill,
The sacred stowhouse of his predecessors, And guardian of their bones."

Macbeth, ii. sc. 2.

IONIA (Asia Minor).—This country is said to have been peopled by Greek colonists about B.C. 1054. After founding Colophon, Ephes, Miletus, and other important cities, the Ionians obtained possession of Smyrna about B.C. 700, and the country soon attained a high degree of prosperity. At the commencement of the reign of Cressus, B.C. 560, it was subject to the Lydians, but it was conquered by Cyrus B.C. 557. The inhabitants made unsuccessful efforts to regain their independence, B.C. 500 and 496, and they assisted the Greeks against the Persians at the battle of Mycale, B.C. 479. The Persian yoke was at length shaken off by the battle of the Eurymedon (q.v.), but the peace of Antalcidas again imposed it upon the Ionians, B.C. 387. On the destruction of the Persian empire by Alexander, Ionia became subject to Macedonia, and afterwards formed part of the Roman empire, B.C. 133.

IONIAN ISLANDS (Mediterranean).—Cephalonia, Cerigo, Corfu, Ithaca, Paxo, Santa Maura, and Zante, with their dependencies, were erected into the republic of the Seven United Islands, March 21, 1800. It was to pay a moderate tribute to the Porte, and its independence was guaranteed by Turkey and Russia. By the ninth article of the treaty of Amiens, March 25, 1802, Napoleon recognized this republic. The French captured them in 1807, and Russia ceded them to France by a secret article of the treaty of Tilsit, July 7, 1807. The French garrisons surrendered to an English force in 1809, and by a treaty between Great Britain and Russia, signed at Paris Nov. 5, 1815, they were formed into an independent state, called the United States of the Ionian Islands, under the protection of England. The Prince Regent, afterwards Geo. IV., ratified their constitution July 11, 1817, and it was proclaimed Dec. 28. A university for this republic was founded at Corfu in 1823. In 1848 and 1849, Lord Seaton, the lord high commissioner, introduced numerous changes in the constitution; a free press, vote by ballot, and a very extended suffrage, being among the number. In 1851 Greece became the official language of the Ionian government. In 1855, owing to the dissatisfaction of the inhabitants, Mr. Gladstone was despatched on a commission of inquiry. He arrived at Corfu Nov. 23. The legislative assembly proposed the annexation of their republic to Greece, Jan. 27, 1856, and presented a petition to that effect, Jan. 30, which Mr. Gladstone rejected Feb. 5. General Sir H. Storks succeeded as lord high commissioner, Feb. 17, and Mr. Gladstone embarked for England Feb. 19.

IONIC Sект.—This school of philosophers was founded by Thales of Miletus, who was born B.C. 635. His two cardinal doctrines were that the whole world is a living being, produced from a seed, and that water is the grand origin of all things. The succession of philosophers of this school is very indefinite. Anaximander, Anaximenes, and Heraclitus, are usually classed among its teachers.

IOWA (United States).—The French settled in this part of America A.D. 1686. Iowa was made a separate territory in June, 1838, and was admitted into the Union Aug. 4, 1846.

IRUS (Battle).—Ptolemy Soter, Cassander, Lysimachus, and Seleucus Nicator, having entered into a confederacy against Antigonus, their armies met at this village, in Phrygia, B.C. 301. Antigonus, who was in his eighty-first year, was defeated and slain.

IRWICH (Suffolk) was pillaged by the Danes A.D. 991, and again in 1000. A hurricane destroyed many churches Jan. 1, 1287. The grammar-school was founded in 1527; the gaol was erected in 1790, and the Hall of Commerce in 1845.

IRELAND.—Its most ancient name is Eri, or Erin. The Greeks called it Ierne, and the Saxons Ireland, or Ireland. For several centuries, i.e. from the 2nd to the 10th, the island bore the name Scotia, and the inhabitants were called Scots. The term Hibernia came into use at a later date. No authentic records of its early history exist.

A.D.
2. Reign of Conary the Great.
90. The Fir-Rí, or Belgaris, Inhabitants of great part of Ireland, revolt under Caiubre Cínnecht, whom they raise to the throne.
258. The Irish form a settlement in Argyleshire, Scotland.
396. The Irish invade Britain, and cross over into Gaul.
452. St. Patrick arrives in Ireland.
453. Death of St. Patrick.
684. The Irish hospitably receive foreign students.
848. Ecgfrid, king of Northumbria, invades Ireland.
795. The Danes invade Ireland.
844. The Danish chief Turgeus is slain, and his countrymen are expelled, but soon return.
1014. April 23. Friday. Brian Boru defeats the Danes at the great battle of Clontarf (q.v.).
1102. Magnus, king of Norway, invades Ireland, and is defeated and slain.
1154. Henry II. of England obtains from Pope Adrian IV. a grant of Ireland.
1166. Dermot MacMurchad, king of Leinster, is expelled from his kingdom.
1168. He flees to England, and receives a promise of assistance from Henry II.
1173. Henry promulgates the bull of Pope Adrian.
1217. May. Henry makes his son John lord of Ireland.
IRE

A.D. 1185. April 1. John arrives in Ireland, and ravages Ulster.
1210. King John invades Ireland, and introduces the feudal system into Ulster (p. vi). 
1534. Henry II. makes a grant of Ireland to his son Edward, prince of Wales.
1570. The native rise in rebellion, and massacre many English.
1588. The "Statute for the state of Ireland" is passed.
1595. The country is divided into counties.
1615. May 25. Edward Bruce, brother of Robert Bruce of Scotland, invades Ireland, and is soon afterwards slain in Dundalk.
1629. Insurrections break out in the south of Ireland.
1631. September 1. Richard II. invests Robert de Vere with the sovereignty of Ireland.
1639. Oct. 2. Richard II. lands at Waterford with a force of 4,000 cavalry and 30,000 archers.
1655. March 10. The king of Tyrone and other northern chiefs do homage to Richard at Drogheda. 
1657. The king's knights many of the native noblemen of Dublin. He returns to England in the summer, leaving Roger Mortimer as viscount.
1658. July. Mortimer is defeated and slain by the natives at Kelis, in Kilkenny.
1659. June 1. Richard again lands at Waterford.
1659. Richard Plantagenet, duke of York, takes shelter in Ireland.
1665. The parliament of Trim orders Irishmen living near English settlements to adopt English costumes and surnames, and pass an act to prevent anybody to kill thieves and robbers without trial, unless clad in English apparel.
1672. The Brotherhood of St. George is instituted for the protection of the English in Ireland.
1694. May. A German force lands in Dublin to support the claims of Lambert Simnel, who is crowned king the next year. (See Dunlap.)
1594. Sir Edward Poyning obtains the passing of the act which bears his name. (See Poyning's Act.)
1598. O'Connor takes the lord-deputy prisoner.
1604. June 11. Lord Thomas FitzGerald, earl of Kildare, rebels against Henry VIII.
1515. Feb. 3. Execution of Lord Thomas at Tyburn.
1516. Henry endeavours to force Protestantism upon the Irish.
1541. Henry assumes the title of king of Ireland, former English sovereigns having governed as its lord.
1546. Local jurisdictions are instituted, and native sheriffs appointed.
1550. The French endeavour to obtain aid from Ireland against the English.
1560. Shane O'Neill quarrels with the earl of Sussex, the lord-lieutenant.
1537. O'Neill is murdered by the Scotch.
1572. Sir Thomas Smith fails in an attempt to colonize parts of Ulster with English settlers.
1579. The rebellion of FitzMaurice is suppressed, and its leader slain.
1580. The fortress of Smerwick, garrisoned by 700 Spaniards and Italians, is taken by Lord Grey and Admiral Winter, who put the defenders to the sword. Sir Walter Raleigh conducted the massacre.
1575. Revolt of Hugh O'Neill, earl of Tyrone.
1590. Sept. The earl of Essex concludes a truce with Tyrone, and thereby incurs the severe displeasure of Queen Elizabeth.
1591. Tyrone receives assistance from Spain.
1593. March 20. Tyrone tenders his submission, and receives a full pardon.

IRE

A.D. 1600. The English Parliament concludes with the Irish council at Drogheda.
1605. Rom. Cath. priests are expelled from Ireland.
1607. Tyrone goes to Rome, where he soon afterwards dies. James I. commences the setting up of laws and order in Ulster (p. vii).
1608. Sir Cabir O'Doherty's insurrection is suppressed.
1650. May 29. Cromwell leaves Ireland under the government of Ireton.
1651. Oct. 29. Ireton takes Limerick, where he dies, Nov. 25.
1652. May. The garrison at Carrickfergus mutinies.
1681. Oct. 3. The Treaty of Limerick concludes the war.
1704. March 4. The Popery Act against Roman Catholics is passed.
1723. Nov. Wood receives his patent for coinage halfpence. (See Draper's Letters.)
1738. Nov. 9. The rebellion is discovered by the ravages of the Killeney ganging of robbers.
1756. The Stellos' insurrection breaks out.
1768. The Roman Catholic Relief Bill is passed.
1778. The Act is established in Ireland.
1798. Legislative independence is secured. (See Foynes' Act.)
1783. The order of St. Patrick (p. vii) is founded. The Giuseppe attempt to establish a colony in Waterford. (See Genefay.)
1793. The Society of the United Irishmen is founded.
1796. Napper Tandy goes to America.
1795. Sept. 21. The first Orange lodge is formed at Armagh.
1798. The rebellion gradually subsides, having cost the lives of 50,000 Irishmen and 30,000 English soldiers.
1807. July 2. The Act of Union receives the royal assent (39 & 40 Geo. III. c. 67).
1801. Jan. 1. The union is effected.
1806. A gang of rioters, known as the Thresher, does great injury to tithe corn.
IRE

1815. Insurrectionary movements occur in Tipperary.

1821. April 28—May 16. George IV. visits Ireland. During the last three months of the year the country is disturbed by terrible outrages, which occur chiefly in the counties of April, Food riots occur in Tipperary, and Cavan.

1822. Whiteboy outrages are very frequent, and the failure of the potato crop causes a famine.

1825. June 21. The currency is assimilated with that of Great Britain by 6 Geo. IV. c. 79.

1829. April 13. The Roman Catholic Emancipation Bill is passed (10 Geo. IV. c. 7).

1832. April 25. The Catholic Reform Bill is passed (3 & 4 Will. IV. c. 88).

1833. July 31. The first Irish Poor Law Bill is passed (1 & 2 Vict. c. 56).

1845. March 10. The first of the great repeal meetings assembles at Trim.

1844. Jan. 15—Feb. 12. Trial of Daniel O'Connell and others at Dublin for sedition. He is found guilty, and sentenced to one year's imprisonment, and a fine of £2,000.

1845. Sept. 23. The Irish National Board of Education is established. The failure of the potato crop occasions another famine and government spends more than £350,000 in the relief of the sufferers. The country is in a very unsettled state.

1846. April 26—May 1. The Six-mile Bridge affaire (See Six-miLE Bridge. Sept. 10) A meeting for the establishment of religious equality in Ireland is held at Dublin, by Irish members of parliament.

1854. Feb. 28. SoliOth O'Brien receives a pardon, but is not permitted to return to the United Kingdom. Sept. 15. A railway train, in which a party of Orangemen is travelling from Londonderry to Enniskillen, is thrown off the line by obstructions placed there for the purpose: fortunately but few casualties are occasioned.

1855. Numerous murders occur this year.

1861. April 8. The census is taken, and the population returned at 5,764,543 persons. Aug. 22 to 29. The Queen and Prince Albert visit Ireland.

LODGE-LIEUTENANT.

During the earlier periods of its subjection to English rule, Ireland was governed by officers of various titles, and most frequently by a lord chief justice. The following is a list of the lords-lieutenant:

A.D.

1189. Edward, prince of Wales, afterwards Edward I.

1384. Philip de Courtenay.

1336. July 4, Roger Mortimer, earl of March.
1432. Sir Thomas Stanley.
1435. Lionel, Lord Wels (never went to Ireland).
1445. John Butler, earl of Shrewsbury.
1446. John Talbot, earl of Shrewsbury.
1455. Ric. 2d. duke of York (again).
1458. Prince Edward.
1459. John de la Pole, earl of Lincoln.
1459. Jasper of Hatfield, earl of Pembroke and duke of Bedford.
1449. Sept. 11. Henry, duke of York, afterwards Henry VIII.
1468. Prince Henry (again).
1470. Thomas Howard, earl of Surrey.
1764. April 27. Sir Hugh Smithson Percy, afterwards earl of Northumberland.
1765. June 5. Thomas, Viscount Weymouth (never went to Ireland).
1785. Aug. 7. Francis Seymour, earl of Hertford.

IRE

1784. June 3. Charles Manners, duke of Rutland.
1790. Jan. 5. John Fane, earl of Westmoreland.
1836. April 23. Marquis of Normandy.
1852. Feb. 27. Earl of Glastonbury.

IRE

LEDUM.—This metal was discovered by Mr. Smithson Tennent, A.D. 1703.
1797.—Tubal Cain is spoken of as the “instructor of every artificer in brass or iron,” B.C. 3204 (Gen. iv. 22). The manufacture of the metal was practised by the Egyptians about B.C. 1706, and the ore was discovered on Mount Ida, by the Dactyls, about B.C. 1406. The Romans were acquainted with iron at an early date, and derived large quantities from Elba and Spain. Its manufacture was encouraged by them in Britain, where iron-mines were in operation B.C. 54. Bath became the great centre of the British manufacture about A.D. 120. The exportation of iron was prohibited by 28 Edw. III. c. 5 (1354), and the importation of manufactured iron goods which could be made at home was restricted by 1 Rich. III. c. 12 (1483). In consequence of the destruction of forests to obtain fuel for the manufacture, the erection of iron-works was restricted by 23 Eliz. c. 5 (1561). Lord Dudley obtained a patent for carrying on the manufacture with coal instead of wood in 1619; but owing to the opposition of other iron-masters, and the indifference of the government, he was unable to bring his invention to perfection, and as his death it was forgotten. It was revived and successfully introduced at Coalbrook Dale by Darby in 1713. Cort's patent for rolling iron was dated Jan. 17, 1758, and for puddling, Feb. 13, 1784. The hot-blast was discovered by Neilson in 1827. Bessemer's process for converting crude iron into manufactured iron and steel without fuel, created great sensation in 1856, but did not fulfil the expectations.
of its inventor. The following table exhibits the total produce of the various English iron-mines in 1858:—

**IRON CAGE.—** Louis XI. was betrayed at Ponsonne, Oct. 10, 1468, by the Cardinal de la Balue, whom he had raised from a low condition, to Charles the Bold of Burgundy, and was compelled to sign an ignominious treaty, Oct. 14. On discovering his treachery, in 1469, Louis XI. confined him for ten years in an iron cage eight feet square, in the Château d'Ouzain, near Blois. This punishment was at that time common in Spain and Italy. For Bajazet's confinement in a similar manner, see ANGORA.

**IRON CROWN OF LOMBARDEY** consisted of a band of gold, set with jewels and a thin circle of iron, which was said to have been made from a nail of the Holy Cross, given by Pope Gregory I.; was first used in the coronation of Agilulf, King of the Lombards, A.D. 561, and afterwards in the coronation of Charlemagne in 774. It was used at the coronation of thirty-four sovereigns. Napoleon I. was crowned at Milan with this crown, May 26, 1805, when he instituted the order of the Iron Crown. It ceased in 1814, but was renewed by the emperor Francis of Austria, Feb. 12, 1816.

**IRON MASK** (the Man with the) was a mysterious state prisoner in France, who always wore a black velvet mask, which completely concealed his face. He was at first confined at Pignerol in 1662 or 1663; he was removed to Exilles in 1681; to the island of St. Marguerite in 1657; and finally, in 1698, to the Bastille, where he died Nov. 19, 1703. He was everywhere attended by M. de St. Mars; and although the slightest attempt on his part to reveal his real name would have met with instant death, he was uniformly treated with the greatest courtesy and indulgence. Various attempts have been made to ascertain the identity of the man with the iron mask, but without success. Some affirm that he was the duke of Verandois, a natural brother of the dauphin. Voltaire published an account of him in 1751. In 1759 it was announced that he was the duke of Beaufort; and in 1768 St. Foix suggested that he was the duke of Monmouth, who had been executed in England. In 1770 he was identified with Count Mathioli, secretary to the duke of Mantua; and shortly afterwards he was reported to be an illegitimate son of Anne of Austria by Cardinal Mazarin or the duke of Buckingham. The last theory on the subject appeared in 1837, and suggested that he was the statesman Fouquet, whose death was believed to have occurred just before the mysterious prisoner arrived at Pignerol. He has also been considered as a twin brother of Louis XIV.

**IRONMONGERS' COMPANY.—** This, the tenth of the twelve chief companies of London, was incorporated by Edward IV. A.D. 1463. The hall was erected from the designs of Thomas Holden in 1748.

**IRON SHIPS.**—In 1833 and 1834 two iron steamers were built by Mr. Fairbairn, of Manchester, for passenger traffic on the Humber; and in 1836 iron造船wards were opened at St. I'lllwall, on the Thames. In 1837 the General Steam Navigation Company started the Rainbow, an iron vessel built by Mr. Laird, of Deptford, and the material has since been adopted in the construction of ships, and generally steam vessels.

**IRRIGATION.**—Brande states, "It is as old as human civilization, and some of the first machines which we read of in history are those for raising water from the Nile for irrigating the lands on its banks." So celebrated was Egypt for its fertility, that Abraham during a famine went there to procure corn, b.c. 1920 (Gen. xii. 10). The Spaniards were surprised at the canals and subterraneous aqueducts on a large scale which they found in Peru when they conquered it in the 17th century. (See CANALS, &c.)

**IRUN (Battle).**—The British Auxiliary Legion defeated the Carlist forces at this town, in Spain, May 17, 1837. Irun was captured and pillaged.

**IRVINGITES.**—This sect was founded by the Rev. Edward Irving, who was born A.D. 1792, and joined the Scotch church in 1819. In 1821 he removed to London, and created a great sensation by his preaching at Cross Street, Hatton Garden; and in 1825 he published "Babylon Fulfilled," and appeared as the founder of a new theological school. The first utterances of the "unknown tongue" in London were heard in 1830; and in 1833 Mr. Irving was expelled from the Scottish church for heresy. He immediately established a church in Newman Street, and died Dec. 8, 1834. In 1835 the sect numbered seven congregations in London; and in 1838 the apostles, as certain of the new hierarchy were called, visited the continent with a view of diffusing their doctrines. The liturgy of the sect was framed in 1842, and enlarged in 1847; and in 1852 lighted candles and incense were prescribed as essential parts of the ritual. The church in Gordon Square was erected in 1853.
founded this city, named after the queen of Spain, A.D. 1463. It was abandoned when St. Domingo rose to importance.

ISA (Asia Minor).—This country was invaded by the Romans B.C. 78, and reduced to submission. The inhabitants afforded an asylum to the emperor Zeno during his exile from Constantinople, A.D. 475, and rebelled against Anastasius I. in 498. Iasuria was conquered by the Saracens in 550, but it was recovered by Leo III., the Iconoclast, who founded the Isaurian dynasty of eastern emperors, which lasted from 717 to 797.

Ischia (Mediterranean Sea).—This island, which belongs to Naples, was colonized at a very early period by Etruscan and Chalcidian settlers, and by the Syracusans A.D. 474; but it was deserted in consequence of a violent eruption of Mount Epeus, B.C. 470. Ischia was seized by the Saracens A.D. 813 and 847. It was sacked by the troops of Pisa in 1135, became the seat of a bishopric before 1179, and was taken by the emperor Henry VI. in 1191. The last volcanic eruption took place in 1302. In 1495 Ferdinand II. sought refuge here from his rival Charles VIII.; and, in 1544, the island was plundered by the pirate Barbarossa. The Duke of Guise seized it in 1547; and it was taken by the English and Sicilians in 1508. Ischia suffered severely from an earthquake Feb. 2, 1828.

Isernia (Battle).—The Neapolitan forces were defeated by the Sardinians under Cialdini, at this place, the ancient Æsernia, in South Italy, Oct. 17, 1860.

Isle of Man (Irish Channel) was governed by a succession of Norwegian kings, A.D. 1092 till A.D. 1294, and was invaded by Alexander III., king of Scotland, in 1266, and the conquest by the Scots was completed in 1270. They ruled it until 1290, when the inhabitants claimed the protection of Edward I., who immediately took possession. It was recovered by the Scots, under Robert Bruce, in 1322, and reconquered by the earl of Shaftesbury in 1340. Henry IV. granted it to Sir John Stanley in 1403. James I. bestowed it upon William, sixth earl of Derby, in 1610. It fell, in 1736, by inheritance, to James, second duke of Athol, who sold it for £70,000 to the British government, in 1765. A further sum of £135,000 was paid to the Athol family in discharge of revenue, in January, 1829.

Isle of Pines (Pacific Ocean).—The French took possession of this small island A.D. 1853.

Isles, (See of the,) which comprised the Hebrides and the Isle of Man, was erected A.D. 390, Amphibalus being the first bishop. Iona (q. v.) was the seat of the bishopric, and the priests formed an important section of the church of the Cuneddes (q. v.) This see, with the other Scotch bishoprics, was sup-

promised on the abolition of prelacy in Scotland, July 19, 1859. Argyile and the isles were united into a distinct post-revolution bishopric in September, 1847.

Islington (London).—This large parish is mentioned in Doomsday-book as the village of Isendon. It was the scene of the arrest of Henry VI. by the earl of Warwick A.D. 1465, and was frequently visited by Henry VIII., who published a proclamation for the preservation of the game here, July 8, 1545. Queen Elizabeth also frequently visited the village. In 1666 its fields afforded shelter to about 200,000 persons, who were rendered houseless by the Great Fire. The first stone of St. Mary's Church was laid Aug. 28, 1751, and that of the New Independent College at Highbury, June 28, 1825. The Islington Literary and Scientific Society was established in February, 1833, and the building founded April 10, 1837. The new cattle-market was opened Jan. 9, 1849. The first stone of the new buildings was laid March, 1854, and they were opened June 13, 1855.

Isly (Battle).—The French defeated the army of the emperor of Morocco at Isly, Aug. 14, 1814.

Ismail (Moldavia).—This strongly-fortified town was taken by the Russians Aug. 6, 1779; Suwarrow stormed it Dec. 22, 1790, when a barbarous massacre of the inhabitants was perpetrated; and it was again taken by the Russians Sept. 26, 1809. It was finally ceded to Russia at the peace of Bucharest, May 28, 1812. It was ceded to Moldavia by the 20th and 21st articles of the treaty of Paris, March 30, 1856. The Russians blew up the fortifications before retiring.

Isfahan, or Isfahan (Persia), formerly the capital, was taken by Timour A.D. 1387. The Turks captured it in 1547. Shah Abbas made it the capital of Persia in 1590. The Afghans seized it in 1722; it was retaken by Nadir Shah in 1727, and ceased to be the residence of the kings of Persia in 1794. Isfahan was devastated by an earthquake July 11, 1957.

Israel (The).—On the revolt of the ten tribes (1 Kings xii. 1—19), B.C. 975, the Jewish territory was divided into the kingdoms of Israel and Judah. The kingdom of Israel lasted from B.C. 975 till the captivity of the ten tribes, B.C. 721. Some authorities assign the revolt of the ten tribes to B.C. 990. (See Jews and Judah.)

ISSUS (Battles).—Alexander the Great defeated the Persians, led by Darius, near this city, in Cilicia, in October, B.C. 333. Arrian states that 110,000 Persians fell in this battle. The emperor Severus defeated Nicator at the same place A.D. 194. Heracleius pitched his camp on this day A.D. 622.

ISTALIP (Afghanistan).—This town was captured and destroyed by an English army Sept. 29, 1842.

ISTHMIAN GAMES are said to have been instituted by Sisyphus, brother of Athamas, king of Corinth, B.C. 1236, and re-organized by Theseus, B.C. 1234. They were held regularly every third year from B.C. 584, and in the Isthmian solemnities, B.C. 228, the Romans were privileged to take part. They were discontinued after the destruction of Corinth by Lucius Munnius, B.C. 146, and were re-established by Julius Caesar B.C. 60. They finally ceased after the sack of Corinth by Alaric, king of the Goths, A.D. 396.

ISTRIA, or HISTRIA.—The inhabitants of this Adriatic peninsula are referred to by Livy as having been engaged in piracy, B.C. 301. Their territory was invaded without success by the consul M. Claudius Marcellus, B.C. 158; but it was reduced to subjection by C. Claudius, B.C. 177. Istria subsequently passed under the domination of the Heruli, A.D. 476; of the Ostrogoths in 489; of the Greek empire in 522; of the Lombards in 751; and of Charlemagne in 774. In 997 it formed a league with the towns of Dalmatia against the pirates of Narenta; and in 1420 it was annexed to the territories of the Venetian republic. It was annexed to Austria by the treaty of Campo-Formio, Oct. 17, 1797; formed part of the kingdom of Italy in 1809; it was declared an integral portion of the Austrian empire by the treaty of Schönbrunn, Oct. 10, 1809; and was ultimately restored to Austria by the treaty of Paris, May 30, 1814, and the congress of Vienna in 1815.

ITALIAN REPUBLIC.—This title was given to the Cisalpine Republic, Jan. 25, 1802, when Napoleon Bonaparte was elected president for ten years. A new kingdom of Italy was erected March 18, 1805.

ITALY.—The etymology of the name Italia is very doubtful, some authorities deriving it from a mythical Enorian or Pelasgic chief called Italus, and others from an old Greek word signifying an ox, and applied to the country to indicate the numerous herds of cattle by which it was tenanted. Originally only the southern point of the peninsula was so distinguished.

B.C.
2450. The mythic reign of Saturn is said to commence about this year.
1710. A confederacy of Arcadian, under Ennius, settle in Italy, and found the state of Gnotria, or Magna Grecia (q.v.).
1293. A Pelasgic colony crosses from Greece into Italy.
1258. Evander conducts a band of Arcadian colonists into Italy.
1240. Reign of Latins in Italy.
1191. Abbea arrives in Italy, and founds the city of Lavinium, which he makes his capital.
1192. Ascanius builds Albus Longa (q.v.).
885. Tiberinus, king of Alba Longa, being defeated on the banks of the river Albus, drowns himself in its stream, which is named Tiber in consequence.
773. April 21. Romulus founds Rome (q.v.).
A.D.
476. Odosce abolishes the Western empire, and founds the Gothic kingdom of Italy.
479. The Lombards appear in Italy.
488. The Ostrogoths, under Theodoric, seize Italy.
493. March 5. Assassination of Odosce.
535. Justinian lays claim to Italy, and declares war against Théodatus, its Gothic sovereign.
538. The Franks appear in Italy.
589. Italy is subjected to the Eastern empire by Belisarius.
541. The Goths revolt under Totila.
552. July. Totila is defeated and slain by Narses at Tagina.
554. Narses completes the overthrow of the Gothic monarchy in Italy, and establishes the exarchate of Ravenna.

finally ceased after the sack of Corinth by Alaric, king of the Goths, A.D. 396.
570. Alboin founds the kingdom of the Lombards. (See LOMBARDY.)

584. The Franks invade Italy, but are repelled by Aethelberht, king of the Lombards.

593. The Lombards besiege Rome, and commit great ravages.

600. Italy is overrun by the Slaves and Avari.

633. Charles II., emperor of the East, invades Italy, and is defeated by Grimoald, of Lombardy.

637. The Venetian republic is founded under its first doge. (See VENICE.)

729. Alboin is defeated in favour of image-worship and against Leo the Iconoclast, cut out in Italy.

735. The exarchate of Ravenna terminates.

751. Pepin annexes Ravenna to the see of Rome.

774. Charlemagne invades Italy, and overthrows the kingdom of the Lombards.

800. Dec. 23. Charlemagne is crowned emperor of the West, at Rome.

818. Italy revolts from Louis le Débonnaire, but is reduced to subjection.

843. By the treaty of Verdun, Italy is allotted to Lothaire, emperor of the West.

866. The Saracens invade Italy and sack Rome.

875. Dec. 23. On the death of Louis II. the empire of the West reverts to Charles the Bald, king of France.

899. Italy suffers severely from Meclem and Hungarian invaders.

901. Rudolph II. of Burgundy invades Italy.

928. Pepin is delivered from the Hungarians by payment of a ransom of ten bushels of silver.

951. Otto of Germany invades Italy.

968. Dec. 2. Otto is crowned emperor of the West, Germany and Italy being united under one sovereign.

982. July 13. Apulia and Calabria are restored to the Eastern empire by the battle of Basientello.

1016. Italy is invaded by the Normans.

1033. The Normans receive Calabria and Apulia as a fief of the Holy See.

1058. Robert Guiscard expels the Moors from Italy.

1073. The dispute respecting papal investitures commences. (See GERMANY.)

1081. Henry IV. of Germany invades Italy, and overruns Tuscany.

1090. Henry again invades Italy, and takes Mantua.

1107. Milan becomes a republic.

1110. Henry V. of Germany invades Italy with an army of 30,000 men, to enforce his claim to the investiture of the pope.

1115. Matilda of Tuscany bequest her territories to the pope.

1122. The dispute concerning the investiture terminates.

1132. The emperor Lothaire invades Italy.

1137. Roger, king of Sicily, is expelled from Italy.

1154. Oct. Frederick I. (Barbarossa) invades Italy.

1157. The cities of Lombardy form a league against Frederick I.

1176. May 29. Frederick I. is defeated by the Lombard confederacy at Legnano.

1183. The independence of the Lombard cities is secured by the peace of Constance.

1190. Henry VI. of Germany invades Italy in pursuit of his designs on Sicily.

1204. The feuds of the Guelfs and Ghibellines are introduced into Italy.

1210. War commences between Venice and Genoa.

1220. Frederick II. of Germany becomes king of Italy, and fixes the capital of his kingdom at Naples.

1226. War again commences between the emperor and the Lombard league.

1230. Dec. 18. Death of Frederick II. at Fiorenzoal, near Benevento.

1231. Rise of the Medici family.

(See Genoa, Lombardy, Milan, Modena, Naples, Parma, Rome, Sardinia, Sicily, Tuscany, Venice, &c.)
JACOBIN, or BRETON CLUB (Paris).—
One of the numerous political associations that came into existence just before the first French revolution. The members at first styled themselves "Friends of the Constitution." When they met at Versailles, they received the name of the Breton Club, from the fact that the deputies from Brittany took the lead in their proceedings. In October, 1798, the sittings of the club were transferred to the monastery of the Jacobin friars at Paris, when the public were first admitted to its conferences. In 1790 this club increased rapidly in numbers; in 1791 the funeral of Mirabeau was attended by 1,800 of its members; and in 1792 it wielded a pernicious influence over the government, and assumed the title "The Society of the Friends of Liberty and Equality." It was suppressed after the fall of Robespierre in 1794.

JACOBITES.—This name, generally applied to the advocates of extreme democratic opinions, took its origin from the members of the Breton, or Jacobin Club, formed in Paris A.D. 1789.

JACOBITES (Ecclesiastical History).—A Christian sect which arose during the 5th century, and maintained that Christ had but one nature. They were thus named from Jacob Baradæus, bishop of Edessa, and apostle of the East, who restored the sect about A.D. 545. From this man, Mosheim remarks, as the second father of the sect, all the Monophysites in the East are called Jacobites. Baradæus died in 573. A small section of the Jacobites joined the Roman Catholics in the 17th century, but the majority remained firm in the faith of their ancestors. Riddle enumerates amongst the remains of oriental sects or Christian communities existing in 1837, the Syrian Jacobites living under their patriarch at Antioch. Roger of Wendover mentions a new sect of preachers called "Jacobites," because they imitated the life of the apostles, who sprang up A.D. 1198, under the auspices of Pope Innocent III. They were mendicants, and suffered great privations.
Mosheim believes the sect ceased to exist soon after the council of Lyons, in 1274.

Jacou, St., (Battle,) was fought at this hamlet, near Basle, A.D. 1444, when the Swiss defeated a French force of superior numbers.

Jacquard Loom, for weaving figured fabrics, is named after its inventor, Joseph Marie Jacquard, who was born at Lyons, July 7, 1752, and died Aug. 7, 1834. He first conceived the idea of the loom in 1790, and in Sept. 1801, the jury of the exhibition of products of industry awarded him a bronze medal. In the same year he secured a ten-year patent for his loom. A net-making machine which he devised also brought him a gold medal, awarded at Paris in February, 1804. English manufacturers have recently effected important improvements on the Jacquard loom.

Jacquerie, so called from the cant phrase Jacques Bonhomme, applied to the peasantry, was a terrible insurrection of this class against the nobles, that broke out in France, May 21, 1358. Many thousands of the unhappy insurgents were slaughtered, and the insurrection was speedily suppressed.

Jaein (Spain), supposed to be the ancient Aurg, is the capital of a province which nearly coincides with the Moorish kingdom of Jaen. It was captured, after a long siege, by Ferdinand, in 1243. The French general Cassagne captured and sacked Jaen in June, 1808. Its cathedral was erected in 1525, on the site of a Moorish mosque demolished in 1492. A new road to Granada was completed in 1528.

Jaffa, or Yaffa (Syria).—This fortified town, the ancient Joppa, was probably founded by the Phenicians, about B.C. 1400. It was made a bishopric by Constantine I., A.D. 332; was captured by the caliph Omar in 636, and by the Crusaders in 1099. It was the scene of a great battle between the Saracens and King Baldwin of Jerusalem in 1102. Richard Cœur de Lion encamped here in 1191. Saladin attacked Jaffa, July 26, 1192. He was compelled to retire, but gained possession of the town in 1198. It was retaken, and strongly fortified by Louis IX. of France, in 1258. The Mameluke sultan Bibars took it in 1267. Bonaparte invested Jaffa March 4, 1799, and took it by storm March 7. Four thousand prisoners were put to death March 10, 1799. Mehemet Ali obtained possession of the city in 1832; but it was restored to the Turks in 1840. It suffered greatly from an earthquake Jan. 21, 1857, and again July 17, 1845.

Jajce (Bosnia).—This important fortress having fallen into the hands of the Turks, was wrested from them in December, 1468, by Matthias, after a siege of three months. It was retaken by the Turks in 1528.

Julia (Battle).—The Saracens defeated the Persians in this battle, for the 4th time, 637.

Jamaica (West Indies).—This, the largest of the British West-Indian islands, was discovered by Columbus, May 3, 1494, and called by him St. Jago, after the patron saint of Spain. Jamaica, the Indian name, signifies the Isle of Springs.

Jody, St., (Battle,) fought at this hamlet, near Basle, A.D. 1444, when the Swiss defeated a French force of superior numbers.

Jodocus Shirley, commander of an English squadron, captures the island.

John de Esquibal.

Jury of the exhibition of products of industry awarded him a bronze medal.

Jamaica, by the treaty of Madrid.

Jamaica, by the treaty of Madrid.

Jamaica, the Indian name, signifies the Isle of Springs.

Jameos, St., (Battle,) was fought at this hamlet, near Basle, A.D. 1444, when the Swiss defeated a French force of superior numbers.

John de Esquibal.

Jury of the exhibition of products of industry awarded him a bronze medal.

Jamaica, by the treaty of Madrid.

Jamaica, by the treaty of Madrid.

Jamaica, the Indian name, signifies the Isle of Springs.
the destruction of Whitehall Palace by fire, Jan. 4, 1698. It was partly destroyed by a conflagration Jan. 21, 1809.

JAMES'S (St.) PARK (London) was first inclosed and drained by Henry VIII. in 1530. Rosamond's Pond was filled up in July, 1770. A great display of fireworks took place in the park Aug. 1, 1814. Two pieces of cannon were placed here as trophies in 1816. Gas-lamps were first introduced into the park in 1822, and the "Chinese Bridge" was demolished in 1827.

JAMES'S (St.) THEATRE (London) was constructed by Beazley, architect, for Graham, the celebrated singer, and opened in Dec. 1835.

JAMES THE FIRST, the only child of Lord Darnley and Mary queen of Scots, was born at Edinburgh, June 19, 1566. He was proclaimed king of Scotland, under the title of James V., July 24, 1567, and was proclaimed king of England March 2, 1568. He married Anne, daughter of Frederick II. of Denmark, in 1590, and they were both crowned at Westminster July 25, 1603. They had three sons and two daughters; viz., Henry, born Feb. 19, 1593, and died Nov. 6, 1612; Elizabeth, born Aug. 19, 1596, married to the elector-palatine Feb. 14, 1613, and died Feb. 13, 1662; Charles (see CHARLES I.), and Robert and Mary, who died in infancy. The queen died March 1, 1619, and James I. died at Theobalds, near Cheshunt, Sunday, March 27, 1625.

JAMES THE SECOND, the second son of Charles I. and Henrietta Maria, was born at St. James's, Oct. 15, 1633; ascended the English throne on the death of Charles II., Feb. 6, 1685; and was crowned April 23. Whilst duke of York he married, first, Anne Hyde, daughter of Lord Clarendon. She died March 31, 1671; and Sept. 30 (N.S.), 1673, James married Mary d'Este, who outlived him, dying May 7, 1718. His family by his first wife consisted of four sons, who died in infancy, and two daughters, Mary (see WILLIAM III. and MARY) and Anne (q. v.). His second wife bore him five daughters, who died young, and one son, James Francis Edward, or the Chevalier de St. George, known as the Pretender. James II. fled from Whitehall Dec. 11, 1688. The throne was declared vacant Jan. 28, 1689, and William III. and Mary became king and queen Feb. 13. The latest instrument of his reign entered on the patent rolls is dated Dec. 7, 1688. James II. died at St. Germain's, Sept. 6, 1701, and was buried in the Benedictine monastery at Paris.

JANE (Queen of England).—Lady Jane Grey was proclaimed queen against her will, July 10, 1553, Edward VI. having bestowed the crown upon her by letters patent, June 21, 1553. Her reign commenced July 6, the day on which Edward VI. died. She relinquished the title July 19. She was condemned to death Nov. 13, 1553, and beheaded Feb. 12, 1554. The earliest public document of her reign that has been discovered bears date July 9, and the latest July 15.

JANESVILLE (United States), founded a.d. 1836, made the chief town of Rock county in 1839, and was incorporated in 1853.

JANINE, or JOANINA (Albania), supposed to occupy the site of the ancient Dodona (q. v.), was taken by the Normans a.d. 1082. The Turks captured it in 1432. The Albanians made an unsuccessful revolt in 1611. Ali Pasha, the Lion of Janina, made it his capital, and, on being pressed by the Turks, ordered it to be set on fire, when it was almost entirely destroyed. Ali himself, who had retired, to the citadel, surrendered on a promise of pardon, in January, 1822. An intimation having been given to him that the sultan intended to put him to death, a des- perate contest ensued, in which Ali was slain, Feb. 6, 1822.

JANISSARIES, literally 'new troops,'—Turkish infantry was organized by Sultan Orhan, a.d. 1320, remodelled by Amurath I. in 1639, and increased to the number of 100,000 by Amurath II. in 1680. The corps was at first composed of 1,000 Christian children taken from their parents, compelled to embrace the faith of Mohammed, and trained as soldiers. After a time, the Janissaries became masters of the empire; deposed Bajazet II. in 1512; procured the death of Amurath III. in 1596; dethroned and executed Orman II. in 1618; his successor, Mustapha I., in 1622; and strangled Ibrahim in 1649. Mustapha II. was deposed by them in 1683, Ahmed III. in 1705, Selim III. in 1789, and Mustapha IV. in 1807. At last, after long and powerful efforts, Sultan Mahmoud II. succeeded in mastering the Janissaries, June 15, 1826, when 15,000 of them were killed in the streets of Constantinople. By an imperial firman of June 16, 1826, the institution of the Janissaries was abolished.

JAN MAYEN (Arctic Sea).—This island was discovered by the Dutch navigator whose name it bears, a.d. 1611.

JANOWITZ (Battle).—A Swedish army, commanded by Torstenson, defeated the Imperialists at this place, in Bavaria, March 16, 1645. The latter lost 8,000 men.

JANSENISTS, the followers of Cornelius Jansen, or Jansenius, born 1655, at the village of Acquoy, near Leerdam, Holland. He was appointed professor of theology at the university of Louvain in 1690, and made bishop of Ypres in 1636. He had severely finished his famous work "Augustinus," the labour of twenty-two years, when he died, May 6, 1698. The book was published by Libertus Fromont, at Louvain, in 1640, and created an extraordinary sensation. The Jesuits at once attacked the "Augustinus," which defended the doctrine of free grace, and the book was interdicted by the Inquisition in 1641, and by Urban VIII. in 1642. The Jansenist doctrines prevailed in many parts of France and Holland; the inmates of Port Royal (q. v.), a female convent near Paris, became great Jansenists, with ardour with which they took the cause. The Jansenists became very numerous, and Clement IX. was compelled to sign a compromise with the party in 1668, commonly
called the "Peace of Clement IX." Fresh disturbances arose in France after the reversion of the Edict of Nantes, Oct. 22, 1685, and the Jansenists were excommunicated by the bull (termed Unigenitus) of Clement XI., Sept. 1713. The bull met with great opposition in Holland and France; led to an increase of Jansenism, and the establishment, in Holland, of a religious party called the "Pupils of St. Augustine," presided over, since 1723, by the archbishop of Utrecht and the bishops of Haarlem and Utrecht. Leo XII. revived the old dispute by excommuni
cating, in 1835, the newly-elected archbishop of Utrecht and the bishop of Deventer.

JANUARY, the first month of the year, was introduced into the Roman calendar by Numa, about B.C. 700. By 24 Geo. III. c. 23 (1751), the commencement of the legal year in this country was changed from March 25 to Jan. 1. It was called Wolf-month by the Anglo-Saxons.

JANUS.—This temple in ancient Rome, the gates of which were kept open in time of war, and closed in time of peace, is said to have been founded by Romulus. The gates were shut eight times; namely, in the reign of Numa, B.C. 714; at the end of the first Punic war, B.C. 248; after the battle of Actium, B.C. 30; after the Cantabrian war, B.C. 25; at the general peace under Augustus, B.C. 5; under Nero, A.D. 55; under Vespu
cias, A.D. 71; and under Gordian, A.D. 241.

JAPAN (Asia).—According to the native annals, the first emperor of Japan ascended the throne B.C. 660. Gold was discovered in the country A.D. 749; and in 1788 some invaders landed, and maintained themselves in Japan for eighteen years. The Mongol Tartars assailed Japan, and this invasion was first made known in Europe by Marco Polo, whose travels were published in 1298. He speaks of it under the name of Zipangu. It was accidentally discovered by the Portugue
guese in 1542, one of their ships having been driven upon the coast in a storm. They obtained permission to bring an annual cargo of goods to the port of Bungo. The Jesuit Xavier landed in Japan in August, 1549. An embassy of Japanese Christians appeared before the pope at Rome in 1556. The native Christians were persecuted in 1590 and 1597. A Dutch crew, piloted by William Adams, an Englishman, anchored in the harbour of Bungo, April 12, 1600, and soon after their first factory was establishe

attempts to open trade with Japan, and in 1818 a similar attempt by the English failed. On the 8th of March, 1854, the Americans succeeded in negotiating a treaty of com
merce. The treaty of Jeddo (q.v.), signed Aug. 26, 1858, secured important privileges to England.

JAPANNING.—This method of embellishing articles by coating them with a particular kind of varnish, was introduced into Europe from Japan; whence the name.

JARNAC (Battle).—The Huguenots were defeated at this town by the French, by Henry of Anjou, March 13, 1568. The prince of Conde fell in this battle.

JASMINE.—The common jasmine was imported into Great Britain from Circassia, before A.D. 1548. The Catalonian jasmine was introduced into this country from the East Indies in 1629, and the yellow Indian jasmine was brought from Madeira in 1656. The jasmine-flowered chionias was brought from the Cape of Good Hope in 1812.

JASSY, or YASSY (Moldavia), the ancient Jassiorum Municipium, the capital of the province, founded by the emperor Trajan, about A.D. 105, was conquered by the Turks in 1538, stormed by the Tartars in 1659, and delivered by John Sobieski in 1686. The Russians took it in 1730, and in 1790, but on each occasion restored it to its native princes. A great fire destroyed part of the town, as well as the castle built by Trajan, in 1783. The Austrians occupied the place in 1778; and on Jan. 9, 1792, peace was concluded here between Russia and Turkey. The Russians again occupied the town from 1807 to 1812. The city revolted in March, 1821, and was sacked by the Janissaries Aug. 10, 1822. Two extensive conflagrations destroyed portions of the town in July, 1821, and August, 1827. The Russians occupied it in 1828, and quitted it May 11, 1834.

JAUJOUR (Battle).—Louis III. of France defeated the Danes at this place, on the Somme, A.D. 881.

JAVA (Indian Archipelago).—This island is spoken of by Marco Polo, A.D. 1298, although it had not been visited by that adventurous traveller. The Portuguese succeeded in forming several settlements on the island in 1511. The Dutch made their first appearance in 1595, building a fort on the site of the present city of Batavia in 1610. They founded a church in 1621. At Bantam, in 1619, the English erected a factory, which was one of their first possessions in the East Indies. A landing having been effected Aug. 4, 1811, the island was taken from the Dutch, Aug. 26, by an English force, under Sir Samuel Auchmuty and General Wetherell. It was restored Aug. 13, 1814.

JEAN de LUZ (France).—The marriage of Louis XIV. with Maria Theresa, infanta of Spain, was celebrated at this frontier town of the south of France, A.D. 1660. In August, 1813, the French, under Marshal Soult, took up their position in front of this town, and erected strong fortifications. Lord Wellington resolved to attack them,
which he did Nov. 10, and had many hours of hard fighting. Sir Rowland Hill directed the movements of the British right, and Marshal Beresford those of the centre; and the next morning the French were compelled to retire beyond the Nivelle. During the conflict the English made 1,400 prisoners, and took 51 pieces of cannon and six tumbrils of ammunition.

**JENNA (Battle).—**The left of a large Prussian army was defeated at Auerstadt by the French, Oct. 14, 1806, whilst the centre and right on the same day sustained a reverse from another portion of the French army at Jena. This battle sometimes goes by the name of Auerstadt, and sometimes by that of Jena.

**JENNA (Germany).—**This town, in the duchy of Saxe-Weimar, is celebrated for its university, founded in 1547 by the elector John Frederick of Saxony. It was opened Feb. 2, 1558. Jena was the capital of the duchy of Saxe-Jena from 1672 to 1690, and of the duchy of Saxe-Eisenach from 1690 to 1741.

**JENNÉRIAN INSTITUTION (London).** It was founded in 1803. It was absorbed in the National Vaccine Establishment, founded in 1808.

**JERBINS (Battle).—**The French, led by Joan d'Arc, wrested this town from the earl of Suffolk, who was taken prisoner, June 16, 1349.

**JERICO (Palestine),** the first city which fell into the hands of the Israelites on their entrance into the Holy Land, was taken by Joshua (vi. 20) B.C. 1451. About B.C. 918, or 530 years after this event, Jericho was rebuilt by Hiel, the Bethelite (1 Kings xvi. 34). Vespasian reduced the city A.D. 68. Henry VIII. is said to have had a retreat called Jericho, at Blackmore, near Chelmsford. Hence the origin of the term “gone to Jericho.”

**JERSEY (English Channel),** originally called Stugia, was taken by the Normans about A.D. 550, and was united to the crown of England by William I. in 1066. King John visited the island in 1205. Mont Orgueil Castle, seized by the French in 1461, was retaken by the English in 1467. Jersey was taken by the Parliamentarians in December, 1651. A French force seized it Jan. 4, 1751, but were made prisoners of war Jan. 6. Queen Victoria visited Jersey in 1846, and opened the Victoria College Sept. 29, 1852.

**JERUSALEM (Latin kingdom).**—This kingdom was founded by the Crusaders at the close of the first Crusade. Godfrey of Bouillon was elected the first king, July 28, 1099. In 1104 Baldwin I. effected the conquest of Acre. He took Sidon, with the assistance of Sirward, prince of Norway, in 1115; and in July, 1124, Tyre submitted to his arms. Saladin defeated the Latins at the great battle of Tiberias, fought in July, 1187, and recaptured Jerusalem from the Christians the following October. Conrad de Montserrat claimed the kingdom on his marriage with Isabella, daughter of Almeric, in 1190, but he was assassinated in 1192, during the preparations for his coronation, and the succession devolved upon Henry of Champagne. On the death of Almeric of Lusignan, in 1206, Mary, daughter of John of England and Isabella, was the nearest heir, and she was accordingly married to John of Brienne, who assumed the sovereignty in 1206. In 1229 he was compelled to abdicate by Frederick II. of

**JEDDA, JEDDAH, or DJIDDA (Arabia).—**This town, the port of Mecca, visited by Bruce in 1796, was taken from the Wahabees by Mehemet Ali, A.D. 1811. The Mohammedans attacked the Christian residents of this town June 15, 1858, and murdered upwards of twenty, including the English vice-consul and the wife of the French consul. The Cyclops, Captain Pullem, anchored before the town July 23, and thirty-six hours were granted for the execution of justice on the perpetrators of the outrage. No satisfaction having been afforded, Captain Pullem bombarded the town on the 25th and 26th when he acceded to the request of the Turkish governor to withhold further hostilities until instructions were received from the Porte. On the 2nd of August the necessary firman arrived from the sultan, and eleven of the criminals were surrendered and executed. (See DJIDDA.)

**JEDDO (Japan),** also written Jedo and Yedo, the capital of the empire, was visited by a company of Jesuit missionaries from Goa, led by the famous Francis Xavier, A.D. 1549. Captain Saris, of the Clone, bearing a letter and presents from James I., was received at the court of Jeddo in July, 1613. In 1818 the captain of a small English brig entered the bay, but was compelled to leave without receiving a cargo; and an American ship was fired upon from the shore in 1831. On the 8th of March, 1854, the Americans succeeded in effecting a commercial treaty.

**JEDDO, (Treaty),** was negotiated by Lord Elgin, and signed at Jeddo Aug. 26, 1855. By this treaty the ports of Hakodadi, Kanagawa, and Nagasaki were to be opened to British subjects on and from July 1, 1859; Ne-e-gata on and from Jan. 1, 1869; and Hiogo on and from Jan. 1, 1863. For purposes of trade it was also stipulated that British subjects should be allowed to reside at Jeddo after Jan. 1, 1862, and at Osucca after Jan. 1, 1863.

**JELALABAD (Afghanistan),** was taken by the British in 1839. Sir Robert Sale, with a few hundred troops, defended it against a numerous Afghan force from November, 1841, to April, 1842. The fortifications were destroyed, by order of General Pollock, in 1842.

**JEMALABAD (Hindostan), formerly called Narasingha Augady, a town containing a fortress of great natural strength built by Tipoo Saib, was taken by the English in 1797.

**JEMMAPES (Battle).—**Dumouriez, at the head of a French army, defeated the Austrians at this village, in Belgium, Nov. 6, 1792. The battle was warmly contested.

462
LATIN KINGS OF JERUSALEM,

A.D.

1095. Baldwin I.
1118. Baldwin II.
1131. Fulk, count of Anjou.
1144. Baldwin III.
1152. Almeric.
1173. Baldwin IV.
1185. Baldwin V.
1186. Guy of Lusignan.
1197. Hugo count of Champagne.
1197. Almeric of Lusignan.
1206. John of Brienne.
1229. Frederick II, emperor of Germany.

JERUSALEM, or HEROSOLYM (Palestine).

—There is some probability that this is the Salem, a city of Sechem, of which Melchizedek was king and priest (Gen. xiv. 18), B.C. 1913. The name Jerusalem is first mentioned Josh. x. 1. The city was not finally wrested from the Canaanites till B.C. 1049, when David made it the capital of his kingdom, and called it "the City of David."

B.C.

1011. Solomon prepares to build the temple.
1044. Completion and dedication of the temple.
790. Solomon king of Egypt, sacks Jerusalem.
884. Jerusalem is sacked by the Philistines and Arabs in the reign of Jehoram.
898. The inhabitants are put to the sword by the Philistines, after their victory at Beth-shenechon.
710. The city is invested by the army of Sennacherib, king of Assyria, in the reign of Hoshekah, and is miraculously delivered, the angel of the Lord slaying, in the camp of the besiegers, 185,000 men in one night.
610. Taken by Pharaoh Necho, king of Egypt, after the battle of Megido. He held it two years. Pharaoh Necho dethrones King Jehoahaz, and lays Jerusalem under tribute of a large tax of silver and one talent of gold. The dethroned monarch is carried into Egypt, where he dies.
598. Nebuchadnezzar, king of Babylon, takes Jerusalem, and plunders the temple, carrying away the sacred vessels, together with the king and several thousands of his subjects. He raises Zedekiah, Jehoaakim's brother, to the regal dignity.
599. Zedekiah rebels against the king of Babylon, who besieges Jerusalem, but raises the siege on the approach of the army of Pharaoh, king of Egypt.
557. The Chaldean army renewes its attack on the city, and carries it by storm. Zedekiah, who takes to flight, is pursued, and captured; his two sons are slain, and his own eyes put out. The temple, after having been pillaged, is burned to the ground; the whole city is destroyed, and the people carried captive to Babylon.
536. Cyrus issues a proclamation for the return of the captive Jews, who immediately proceed to the rebuilding of the temple.
529. The second temple is finished, and is dedicated.
445. Nehemiah rebuilds the walls of Jerusalem.
332. It is visited by Alexander the Great.
322. Ptolomy Soter captures Jerusalem.
202. Jerusalem is exod, by treaty, to Egypt.
170. The walls of the city are razed by Antiochus Epiphanes, who sets up a statue of Jupiter in the temple. From this period the daily sacrifice is discontinued.

JESTER, or FOOL.—The fool, according to Naes, was the inmate of every opulent house; but the rural jester or clown seems to have been peculiar to the country families. The clown in Shakespeare is generally taken for a licensed jester or domestic fool. The king's jester or fool was a member of the English court at a very early period. On this subject Douce remarks: "With respect to the antiquity of this custom in our own country, there is reason to suppose that it existed even during the period of Saxon history; but we are quite certain of the fact in the reign of William the Conqueror. An almost contemporary historian, Maitre Wace, has left us a curious account of the preservation of William's life, when he was only duke of Normandy, by his fool Boles. Mention is made in Dom. Day, "Book of Beric Jaculator Regis." The allowance of cloth and a list of the articles of clothing allowed to William, Henry the Fifth's fool, is given in Rymer's "Federia." In 1652 the king's fool is described as wearing a long coat and a gold chain. Douce considers it probable that Muckle John, the fool of Charles I. and the successor of Archie Armstrong, was the last regular personage of the kind. The Lord Mayor's state fool was compelled on Lord Mayor's day to leap, clothes and all, into a large bowl of custard. The patent of creation of the Order of Fools, dated at Cleves, Nov. 12, 1381, is still in existence. The last mention of this order occurs in some verses published at Strasburg in 1520. The custom also existed on the other side of the Atlantic,
as the Peruvian and Mexican monarchs had
their jesters. The Spanish conquerors had
this officer in their train. Prescott speaks of
Velasquez's jester as "a mad fellow, his
jesters, one of those crack-brained wits—
half wit, half fool—who formed in those days
a common appendage to every great man's
establishment."

JESUITS.—This society was founded by
Ignatius Loyola, at the chapel of St. Mary,
Montmartre, Paris, Aug. 16, 1534, and was
confirmed by a bull of Paul III., Sept. 27,
1540. The order was made independent of
all civil and ecclesiastical supervision by a
bull dated Oct. 18, 1543. Jesuit colleges
were established at Antwerp and at Louvain in
1552, and Ignatius Loyola died July 31, 1556.
The Jesuits received permission to settle in
France, Sept. 16, 1601; were banished from
France, Jan. 8, 1682; and were allowed to return,
July 2, 1714. A decree banishing the
Jesuits from England was issued Nov. 13,
1602. The university of Tyrnau, Austria,
the first high school of the Jesuits, was
opened Nov. 13, 1655. A French edict was
issued against the Jesuits Sept. 2, 1716, and
they were banished from Portugal Sept. 3,
1759. The Jesuit seminaries at Rome were
dissolved Sept. 17, 1772, and the order was
put down by a bull of Clement XIV., July 21,
1773. They were expelled from Austria,
Oct. 1, 1773. The Jesuits were re-organized
by Pius VII., Aug. 7, 1814, and a decree
for their admission into Spain was issued
May 20, 1815. They were expelled from
Russia, March 23, 1820, and from Switzerland,
Oct. 1, 1847.

JESUITS' BARN. (See BARN.)
JESUS COLLEGE (Cambridge) was founded
A.D. 1496, by John Alcock, bishop of Ely.
The building previous to that time had been
used for the nunnery of St. Radegund,
founded by Malcolm IV. of Scotland.

JESUS COLLEGE (Oxford).—Queen Elizabeth,
the petition of Hugh ap Rice, or
Price, granted a charter of foundation for
this college, June 27, 1571. The inner quad-
rangle was completed in 1676.

JEWELERY, or the setting of precious
stones, is an art of very ancient origin.

JEWISH ERA.—The Jews now date from
the creation of the world, which they con-
sider to have occurred 3760 years and three
months before the commencement of the
Christian era. According to some authorities,
they used the era of the Seleucide
after they became subject to the kings of
Syria, and only abandoned it in the 15th
century.

JEWISH DISABILITIES BILL.—Mr. Robert
Grant's bill for releasing the Jews from their
civil disabilities was rejected by the Lords
Aug. 1, 1833; another, introduced by Lord
John Russell, after passing the Commons
May 4, 1848, met with a similar fate May 25.
A third received the sanction of the lower	house July 3, 1851, but was also thrown out by
the Lords July 17. A similar bill passed the
Commons April 15, 1853, and was again re-
jected April 29; and after having been again
approved by the Commons, was defeated by
the Lords July 10, 1857. By 21 & 22 Vict.
c. 49 (July 22, 1858), the House of Commons
was empowered to modify the oaths in such
a manner that they might be taken by
Jews, and by 23 & 24 Vict. c. 63 (Aug. 6,
1860), the words "upon the faith of a Chris-
tian" were expunged permanently in the
case of Jewish members.

Jews.—Strictly speaking, this term can
only be applied to the subjects of the kings
of Judah after the separation of the ten
tribes; but in its usual acceptance it refers
to the whole race of Abraham.

B.C.
1921. Abraham, by divine command, settles in
Canaan.
1212. God makes a covenant with Abraham.
1497. The covenant is renewed.
1396. Birth of Isaac.
1472. The seed of Isaac is prevented by divine
interposition.
1381. Marriage of Isaac and Rebekah.
1078. Birth of Esau and Jacob.
1392. Death of Abraham.
1700. Jacob is blessed instead of Esau.
1705. Joseph is sold into Egypt.
1710. Joseph interprets the dreams of the butler
and the baker.
1706. Jacob and his family remove to Egypt, and
settle in Goshen.
1571. Birth of Moses.
1490. The exodus of the Jews from Egypt is effected.
1391. The Jews enter Canaan, under the leadership
of Joshua.
1465. They become subject to Mesopotamia.
1343. They are subject to Egypt, king of Moab.
1330. Ehud restores them to freedom.
1285. They are in servitude to Jabin, king of
Canaan.
1255. Deborah and Barak defeat the Canaanites,
under Sisera, and restore the Israelites to
independence.
1232. They are again enslaved by the Midianites,
ten tribes, and other Es-term tribes.
1245. Gideon effect their deliverance.
1157. The Ammonites subdue the Jewish territory.
1169. Jephtha expels them.
1135. The Philistines reduce the Jews to slavery.
1136. Samson releases them.
1143. Samuel is called by the Lord.
1116. The Jews are again subjected by the Philis-
tines.
1005. Saul is elected king.
1033. Saul is victorious over the Philistines.
1065. David prevails over Goliath.
1060. David is compelled, by the jealousy of Saul,
to take refuge in Gath.
1055. Death of Saul, and accession of David as king
of Judah.
1498. David is acknowledged by all Israel.
1440. David wages war against the Philistines, and
recovers the ark, which had been left in
their hands.
1029. Birth of Solomon.
1057. The rebellion of Absalom and Sheba.
1017. David numbers the people.
1015. Adonijah, rebels. Death of David, and acces-
sion of Solomon.
1014. Solomon commences the erection of the
temple.
1004. The temple is completed.
990. Visit of the queen of Sheba to Solomon.
975. Death of Solomon. Revolt of the ten tribes,
and division of the Jewish territory into
the kingdoms of Israel and Judah (2 K.

THE BABYLONISH CAPTIVITY.

B.C.
609. Daniel interprets Nebuchadnezzar's first
dream, and the golden image is set up.
THE JEWS UNDER THE GREEK EMPIRE.

B.C.
332. Alexander the Great, while on his march to attacks Jerusalem, is encountered by a procession led by Judas, the high-priest, and is impressed with so strong a sentiment of respect, that he enters the city, and performs a solemn sacrifice to the God of the Jews.

320. Jerusalem is stormed, and taken by Ptolemy Soter.
319. Antigonus wreathes Judea from the power of Ptolemy.
277. The Septuagint translation of the Scriptures is made by order of Ptolemy Philadelphus.
216. Ptolemy Philopator massacres between 40,000 and 60,000 Jews in Alexandria.
203. Antiochus the Great, of Syria, besieges Phoenicia and Judea.
200. The sect of the Sadducees is formed.
192. Phoenicia and Judea are recovered by the Egyptian general Scopas.
198. Antiquus defeats scops, and takes the whole of Palestine from Egypt.
170. Antiochus Epiphanes, king of Syria, takes Jerusalem by assault, and massacres 40,000 of the inhabitants.
163. Apollos, general of Antiochus, takes Jerusalem, fortifies the city of David, and crowns the temple to be dedicated to Jupiter Olympius.
165. Judas Maccabaeus commences his insurrection against the Syrians.
163. Antiquus Eupator appoints Judas governor.
159. Judas concludes the first treaty between the Jews and the Romans.
156. The Syrians withdraw their claim to the obedience of the Jews, who are left at peace.
144. Jonathan, prince of the Jews and high-priest, is taken prisoner by Tryphon, at Ptolemia, and put to death.
130. John Hyrcanus subdues the Idumeans, and compels them to adopt the Jewish faith.
187. Hyrcanus's son Aristobulus assumes the title of king.
95. The Phœbeus provoke an insurrection against Alexander Jannaeus.
70. Aristobulus II. deposes his brother Hyrcanus.
63. The Romans, under Pompey, take Jerusalem, and restore Hyrcanus to the throne as a tributary prince.

THE JEWS UNDER THE ROMANS.

B.C.
57. Alexander, the eldest son of Aristobulus II., collects an army, and ravages the country.
54. Crassus plunders the temple, to obtain treasure for the Parthian war.
49. The deposed Aristobulus is poisoned by the friends of Pompey.
42. Marriage of Herod and Mariamne, granddaughter of Hyrcanus, the Jewish high-priest.
40. The Parthians, under Pacorus, invade Judea, and restore Antigonus to the kingdom of his father Aristobulus. The Roman senate proclaims Herod king the same year.
37. The Parthians, under Herod and Socius, take Jerusalem, and cruelly massacre numbers of the inhabitants.
31. A dreadful earthquake destroys 30,000 persons in Judea.
29. Herod puts his wife Mariamne to death.
17. Herod commences the re-erection of the temple.
4. Friday, April 5. The Nativity, four years before the incorrect common computation.

A.D.
6. Augustus makes the whole kingdom into the Roman province of Judea.
29. Pontius Pilate is appointed procurator of Judea.
26. John the Baptist preaches to the Jews.
30. The Passion and Ascension of the Saviour.
14. Judas is desolated by famine.
65. The Jews revolt against the Romans.
68. Vespasian invades Judea.
70. Titus takes Jerusalem. 1,100,000 Jews are said to have perished during the siege, and 97,000 to have been carried into captivity.
95. The Jews refuse to pay a tax for the rebuilding of the temple of Jupiter Capitolinus.
115. The Jews of Cyrene, Egypt, and Cyprus, rebel against the Romans.
103. Hadrian rebuilds Jerusalem, which he calls Eccl Capitolins. The Jews rebel in consequence.
136. The war is concluded, and the Jews are banished from Judea, and cease to possess a national existence.

SUBSEQUENT HISTORY OF THE JEWS.

A.D.
202. They are severely persecuted by Septimus Severus.
315. Constantine I. forbids them to persecute Jewish converts to Christianity.
429. Theodosius II. prohibits them from erecting synagogues.
612. The Jews in Spain undergo cruel persecutions.
623. Mohammed expels them from Medina.
712. They assist the Moors in the conquest of Spain.
740. A Jewish kingdom is said to be established on the shores of the Caspian.
750. Some Jews settle in England at this date.
847. The Jews in the East are persecuted by Sultan Motavakel.
1096. The Crusaders, on their march to Palestine, massacre about 17,000 European Jews, at Troyes, Cologne, and other German cities.
1180. Philip Augustus banishes them from France.
1189. Sept. 3. Vast numbers are murdered in England at the coronation of Richard I.
1215. The Council of Lateran orders all Jews throughout Christendom to adopt the costume called the Rouelle.
1229. English Jews are prohibited from possessing freehold property.
1391. The Spanish Jews undergo severe persecution, and about 200,000 submit to baptism.
1394. Charles VI. expels them from France.
1492. The Jews are expelled from Spain.
1505. All Jewish children in Portugal under fourteen years of age are ordered to be given up by their parents, and educated as Christians.
1759. A bill for the naturalization of Jews in England is passed; but it is repealed the following year.
1782. An edict for their limited toleration is issued in Austria.
A.D. 1791. Jews are admitted as citizens of France, with equal rights as Christians.

1796. The Jews are declared free citizens of the Batavian republic.

1806. Napoleon I. assembles a sanhedrim at Paris, and confers certain civil privileges on the Jews.

1809. The Society for Promoting Christianity among the Jews is founded at London.

1812. Jews are admitted to civil rights in Prussia.

1814. Jews are admitted as magistrates in Denmark.

1835. Oct. 1. Mr. Salomons is elected sheriff of London.

1837. Nov. 9. Moses Montefiore receives the honour of knighthood from the Queen, being the first example of a Jewish knight.

1840. Feb. 1. The Jews are persecuted at Damascus.

1846. Aug. 18. Jews are placed upon the same footing as Protestant dissenters, with respect to their places of worship, schools, &c., by 9 & 10 Vict. c. 29, s. 2.

1859. Sept. 3. The Jews are persecuted at Stockholm.

1855. Sept. 29. Alderman Salomons is elected Lord Mayor of London, being the first Jew that has filled the office.

(See Jewish Disabilities Bill.)

KINGS OF THE JEWS.

B.C.

1058. Saul.

1055. David (Judah).

1053. Ditto.

1015. Solomon.

975. The Jewish territory is divided into the two kingdoms of Judah and Israel (q. v.).

Hales gives the following list of kings and rulers:

BABYLONIAN DYNASTY.

B.C.

558 | Belshazzar

553 | Nebuchadnezzar

MEDIAN AND PERSIAN DYNASTY.

B.C.

553 | Cyrus the Mede

485 | Xerxes

451 | Cambyses

421 | Darius Hystaspes

464 | Cyrus the Persian

485 | Artaxerxes Longi.

439 | Cambyses

464 | Darius Hystaspes

421 | Cyrus the Persian

485 | Cambyses

451 | Darius Hystaspes

JEWISH HIGH-PRIESTS.

B.C.

429 | Jonathan, or John.

373 | Joiada, or Judas.

341 | Jonathan, or John.

MACEDO-GEORGIAN DYNASTY.

B.C.

217 | Simon II.

195 | Onias III.

173 | Jesus, or Jason

172 | Onias, or Menelaus

Onias II.

ASAMONIAN PRINCES.

B.C.

159 | Alexander.

105 | Simon.

78 | Simon.

69 | Aristeobulus I.

69 | Antigonus

ROMAN DYNASTY.

B.C.

69 | Hyrcanus II. (again)

40 | Antigonus

IDUMEAN KING.

B.C.

37 | Herod the Great

Jews'-Harp, or Jews'-Trump. — This musical instrument, deriving its name from a corruption of the French *jew trompe*, toy-trumpet, is mentioned in a rare black-letter book, called “Newes from Scotland,” a.d. 1591, where it is related that one Geilles Duncan, a servant-girl celebrated for her performance upon this instrument, played before King James VI. of Scotland. One M. Eulenstein excited considerable interest by performing on sixteen of these instruments at the Royal Institution, and various public concerts. Fools used to play upon the Jews'-harp, to amuse the guests at taverns. It is also called Jews'-harp, which Douce maintains to be its proper name, because played upon between the jaws.

JHANSI (Hindostan). — This province became connected by treaty with the East-India Company a.d. 1804, and was made a tributary province in 1817. It was ceded to the British government in 1854.

JOACHIM OF JONPOOR (Hindostan), the chief town of a district bearing the same name, which came into possession of the British a.d. 1775. The fort is of great strength, and was built in 1370 by the sultan of Delhi. On the sacking of Delhi by the triumphant hordes of Tamerlane in 1398, Jonpoo passed from under the royal sway, but was again annexed to the empire in 1478. In 1570, having become much dilapidated, the fort was put into a state of thorough repair by the governor of Bengal.

JOACHIMITES. — This heretical sect, founded by Joachim, abbot of Flora, in Calabria, was condemned by the Lateran council in 1215, and by the council of Arles in 1260, and 1261. The Joachimites were a branch of the Fraticelli, or Spiritualists.

JOACHIM, ST. (Order of). — This equestrian order of Francoia was founded a.d. 1755, by an association of younger members of the German aristocracy. It was originally named the “Order of Defenders of the Honour of Divine Providence,” and received its present title in 1785. Lord Nelson was admitted into this order April 3, 1802.

JOHN (king of England), the youngest child and the fifth son of Henry II. and Eleanor of Aquitaine, was born at Oxford Dec. 24, 1156, and was crowned at Westminster May 27 (Ascension-day), 1199. He divorced his wife Isabel, the earl of Gloucester’s daughter, in order to marry Isabel of Angoulême, who was crowned at Westminster, Oct. 8, 1200. By his second wife he had two sons and three daughters; namely, Henry, afterwards king, and Richard, duke of Cornwall, who was born in 1209, and died in 1271. His daughters were Joan, married to Alexander II. of Scotland; Eleanor, to the earl of Pembroke, and afterwards to Simon of Montfort; and Isabel, to the emperor Frederick II. John died at Newark Oct. 19, 1216, and was buried at Worcester.

JOAN’S, ST. (Newfoundland), the chief town of the island, was fortified by Queen Elizabeth a.d. 1583, when she formally claimed its sovereignty. The French were repulsed in
attacks upon St. John's in 1705, 1708, and 1762. On the last occasion they obtained possession of St. John's. The garrison cap-
tipated an English force Sept. 18, 1762. The town suffered considerably from fires, in 1815, 1817, 1818, and June 9, 1846. On the last-mentioned occasion the town was almost entirely destroyed.

John's (St.) College (Cambridge) was founded in 1511, in pursuance of the will of Margaret, countess of Richmond, who died in 1509.

John's (St.) College (Oxford).—King Henry VIII. granted St. Bernard's College, an educational establishment of the Cister-
cians, founded in the time of Henry VI., to Christ Church, Oxford; and Sir Thomas White, a Muscovy merchant, twice lord
mayor of London, purchased it in 1555, and founded St. John's College, March 5, 1557. Archbishop Laud added a second quadrangle,
commenced in 1631 and completed in 1635, from a design by Inigo Jones.

Johnston, of St. John's Town (Battle).—Aymer de Valence defeated Bruce, who had incited the Scottish people to rebel against
England, at this place, in Scotland, July 22, 1306.

Johns (Malacca), the capital of an independent state of the same name, was founded by some refugees from the town of Malacca, which was captured by the Portu-
guese A.D. 1511. In 1606 the prin-
cipality was conquered by the Portuguese, and in 1613 it passed into the power of the sultan of Acheen.

Joint-Stock Companies Acts.—The registration, incorporation, and general management of joint-stock companies were regulated by 7 & 8 Vict. c. 110 (Sept. 5, 1844), which was amended by 10 & 11 Vict. c. 78 (July 22, 1847). The Companies
Clauses Consolidation Act, 8 & 9 Vict. c. 16 (May 8, 1843), united into one act certain provisions usually inserted in acts with respect to the constitution of joint-stock companies. The dissolution and winding
up of the affairs of companies were facilitated by 11 & 12 Vict. c. 45 (Aug. 14, 1847), which was amended by 12 & 13 Vict. c. 108 (Aug. 1, 1849). The Limited Liability Act, 18 & 19 Vict. c. 133 (Aug. 14, 1855), enabled all joint-
stock companies with a capital divided into shares of not less than £10 each, to obtain a certificate of complete registration with limited liability upon certain stated con-
ditions. The laws relating to all joint-
stock companies, except those formed for purposes of banking and insurance, were consolidated and amended by the Joint-
Stock Companies Act, 19 & 20 Vict. c. 47 (July 14, 1855), which was again amended by 20 & 21 Vict. c. 1 (July 13, 1857), and by 21 & 22 Vict. c. 60 (July 25, 1858).

Jönköping, (Treaty.)—Was concluded between Sweden and Denmark, at this town, in Sweden, Dec. 10, 1809:

JOURNAL DES SAVANTS.—This celebrated
French review, established by Denis de Sallo, Jan. 5, 1665, was suspended in 1792.

It was re-established in 1797; again sus-
pended in 1802; and resuscitated, with an annual subsidy of 25,000 francs, by Louis XVIII. in 1816.

JOURNALS OF THE HOUSE OF COMMONS.—
The official record of the proceedings of this
department of the legislative body com-
menced Nov. 8, 1547. They were not kept
with any degree of regularity until 1607.

JOURNALS OF THE HOUSE OF LORDS.—
The record of the business in the House of
Lords was commenced A.D. 1509. It was first ordered to be printed in 1702.

Juan Fernandez (Pacific).—This island
was discovered by Juan Fernandez, a Span-
ish navigator, A.D. 1567. Alexander Selkirk having quarrelled with his captain in a bu-
caneering expedition, was set on shore here in September, 1704. He remained in soli-
tude four years and four months, and was rescued by an English vessel in February,
1709. He arrived in England in 1711, and an account of his extraordinary adventures
is said to have given Daniel Defoe the idea of the story of "Robinson Crusoe,"
of which the first edition appeared in two volumes in 1719. In 1750 the Spaniards
formed a colony here, and it was soon after-
wards destroyed by an earthquake.

Jubilee.—The Jews celebrated a jubilee
every fifty years (S. xiv. 8), B.C. 1490.
A jubilee once a century, for granting plenary indulgences, was first established by Boni-
face VIII. A.D. 1300. Clement VI., in 1350,
reduced the period of the jubilee to fifty
years; Urban VI., in 1389, appointed it
to be held every thirty-five years; and
Sixtus IV., in 1475, reduced the term to
twenty-five years. It has been observed
with great regularity by the popes. The
centenary of the Reformation was celebrated
in Germany by a Protestant jubilee in 1617.
The Shakespeare Jubilee was held at Strat-
ford-upon-Avon, Sept. 6, 1769. A jubilee
was celebrated in England at the commence-
ment of the fiftieth year of George the
Third's reign, Oct. 26, 1809. The close of
the revolutionary war was celebrated in
England in the jubilee, Aug. 1, 1814.

Juda.—On the revolt of the ten tribes
(1 Kings xii. 1—19), B.C. 975, the Jewish
territory was divided into the kingdoms of
Israel (q. v.) and Judah. The kingdom of
Judah lasted from B.C. 975 to B.C. 606. (See
Jews.)
Kings of Judah.

JUDENBURG, (Armistice,) for six days, was signed at this place, the ancient Idumon, between the French and the Austrians, April 7, 1797. The preliminaries of peace were signed at Leoben April 17, and this led to the treaty of Campo-Formio, concluded Oct. 17.

JUDGES were appointed by God to rule over the people of Israel (Judges ii. 16) b.c. 1405. Joshua and the elders ruled from b.c. 1451 to b.c. 1005. The government by judges lasted from b.c. 1405 to b.c. 1095; or, according to Hales, from b.c. 1564 to b.c. 1110.

JUDGES OF ASSIZE. (See Assize Courts.)

Judicial Committee of the Privy Council, composed of the lord president, the lord chancellor, and such members of the privy council as from time to time hold certain high judicial offices, was instituted by 3 & 4 Will. IV. c. 41 (Aug. 14, 1833). It is a court of appeal in ecclesiastical and maritime causes.

JUGGERNATH, or the 'Lord of the World,' the name of a celebrated temple at Jugger- nath, in the province of Cuttack, India, completed a.d. 1198. It came into the possession of the British in 1803. A pilgrim-tax, instituted by Sir George Barlow in 1806, was repealed by Lord Auckland in 1839. The allowance made by the East-India Company to the temple was discontinued in June, 1851.

JUGGLERS, adepts in the art of juggling, existed as early as b.c. 1491, when Pharaoh's magicians imitated the miracles performed by Aaron (Exod. vii.). The Chinese and the Aztecs took great delight in witnessing the performances of jugglers. The practice of the art was attended with considerable danger in former times. A horse which had been taught to perform a number of tricks, was condemned to the fly his head actually burst at Lisbon, A.D. 1791. In 1739 a juggler in Poland was tortured until he confessed that he was a sorcerer, and was then hanged.

JUGURTHINE WAR was waged by the Roman republic against Jugurtha, king of Numidia, b.c. 111. The consul Calphurnius, in the first year of the war, concluded a peace with Jugurtha, on condition that he should submit to Rome. It was not observed, and, b.c. 109, Aula having been defeated, entered into a treaty which the Roman government disavowed. The struggle was conducted on the part of the Romans by the famous Calus Marius. Jugurtha was killed, and his dominions made a Roman province, b.c. 106.

JULIAN PERIOD was first properly explained by Joseph Justus Scaliger, in his "De Emendatione Temporum," published at Paris a.d. 1583, and at Geneva in 1629. Scaliger corrected certain inaccuracies in that work in his "Thesaurus Temporum," &c. The period consists of 7890 years. It commenced b.c. 4714, and will close a.d. 3366. Hallam says that Scaliger was very proud of the invention, of which he confesses himself unable to perceive the great advantage.

JULICHS, or JULIERS (Prussia), the ancient Juliusicum, so called from its supposed founder Julius Cesar, was, with the adjoining territory, made a duchy a.d. 1356. On the extinction of the ducal line in 1609, Maurice of Nassau seized the duchy. Several sovereigns laid claim to it, and Juliers was taken by the Spaniards in 1622. It was allotted to the count palatine of Neuburg by the peace of
the Pyrenees, Nov. 7, 1659. The French seized it, and annexed it to France in 1794, and it was ceded to Prussia in 1815.

J U L Y.—This month, which is now the seventh, was with the Romans the fifth month of the year, being called Quintilis. Mark Antony (b.c. 49—A.D. 31) changed its name to Iulius, after Caesar, who was born in this month. The Anglo-Saxons called it Mæd-monath, or "mead-monath," because the meads were then in bloom, by the

JUMPERS.—This sect, akin to the Dancers of the 14th century, arose among the Welsh Calvinistic Methodists, about A.D. 1760. They received their name from their habit of jumping during the celebration of their religious rites.

JUNE was the fourth month in the old Roman calendar. Numa (b.c. 716—672) gave it the sixth place, which it has since retained.

JUNIOR UNIVERSITY CLUB (London) was built A.D. 1837, Sydney Smirke being the architect.

JUNIUS'S LETTERS were published in the Public Advertiser under the signature of "Junius." The first letter appeared Jan. 21, 1769, and the last, making the sixty-ninth, in Jan. 1772. The first authorized edition, printed under the author's inspection, was published in London, March 3, 1772, and was issued with an index and a table of contents in March, 1773. The question of the authorship of these celebrated political letters has excited considerable controversy. They have been attributed to various persons, and the question remains undecided.

JENONIA.—These festivals, in honour of June, were instituted at Rome b.c. 430. The chief, called the Matronalia, was observed on the 1st day of March.

J U R Y.—Trial by twelve compurgators, which was of canonical origin, existed in Anglo-Saxon times, and only resembled what is now known as trial by jury in the number of persons sworn. Under the name of Wager of Law, it continued to be the law of England until abolished by 3 & 4 Will. IV. c. 42 (Aug. 14, 1833). Traces of trial by jury are found in the reigns of William I. and II., Henry I. and Stephen; but it was not fully established until the reign of Henry II. Trial by jury was first adopted in criminal cases in the reign of John (A.D. 1189—1199), and was the established mode of dealing with them at the end of the 13th century. Witnesses were examined, and evidence was first laid before juries, in the reign of Henry VI. (A.D. 1422—1461); but this change was not fully carried out till the time of Edward VI. (A.D. 1547—1553). The laws respecting juries were remodelled by 6 Geo. IV. c. 50 (June 22, 1825).

JURY COURT (Scotland) was established as subsidiary to the Court of Session by 55 Geo. III. c. 42 (1815). Improvements were introduced into these courts, which were made a permanent part of the judicial establishment of Scotland, by 59 Geo. III. c. 35 (1819). This court, as a separate tribunal, was abolished by 1 Will. IV. c. 69 (July 23, 1830).

JUSTICES IN Eyre, or Itinerant Justices, the judicial representatives of the royal authority, were regularly established by the parliament held at Northampton Jan. 28, 1176. They received a delegated power from the curia regia, and made their circuit round the kingdom once in seven years. By the 12th article of Magna Charta, in 1215, they were ordered to be sent into the country once a year. (See Assize.)

JUSTICES OF THE PEACE.—Conservators (g. v.) of the peace received this title when, by 3 Edw. III. c. 1 (1360), the power of trying felonies was intrusted to them. From an entry in the Harleian MSS., it appears that the countess of Richmond, mother of Henry VII., was a justice of the peace. The form of the commission by which justices of the peace are appointed, was settled by the judges in 1590. The jurisdiction of justices at quarter sessions is defined by s & 6 Vict. c. 39 (June 30, 1842). The office is noticed in Scotland in the act of 1537.

JUSTICER OF SCOTLAND.—Geoffrey of Maleville, in the reign of Malcolm IV. (A.D. 1153—1165), is the first person holding this office of whom any record remains.

JUSTICIAR.—These high officers were first appointed in the time of William I., and six, ad audiendum clamores populis in Curia Regis, were appointed at a parliament held by Henry II. at Windsor, in April, 1179.

JUSTICIARY (Chief), or GRAND JUSTICIARY.—An officer who acted as president of the Curia Regis, or King's Court, in the absence of the king, was first appointed by William I. Henry III. made Hubert de Burgh chief justiciary for life about A.D. 1227. The last who held the office was Philip Basset, appointed during the reign of Henry III. (A.D. 1261—1272).

JUSTS.—The compilation of Roman laws, ordered to be made by the emperor Justinian I., was promulgated April 7, 528 A.D. A revised edition was issued Nov. 16, 534.

JUST, or YUST, St. (Spain).—This celebrated monastery of the order of St. Jerome was founded by two hermits from Placentia, A.D. 1404, and confirmed by a papal bull in 1408. It is remarkable as the retreat of the emperor Charles V. after his abdication of the crown. He arrived here Wednesday, Feb. 3, 1557, and died Sept. 21, 1558. The monastery was, in consequence, honoured with the title of royal. Its privileges were confirmed in 1562 by Philip II., who sojourned here for two years in 1570. It was repaired by Philip IV. in 1628, but was pillaged and burned by a party of Soult's foragers, Aug. 9, 1809. The destruction thus commenced was continued by the church reformers of Cuares, who stole what the French had spared, July 4, 1821, and was completed by the monastic sequestrations of 1855.

JÜTERBOCK (Prussia).—At this town
Tetzel commenced the sale of papal indulgences a.d. 1517. A conference was held at Jütterbock in 1523, by the German Lutheran princes, to adopt measures against the effects of the Edict of Worms. This conference resulted in the League of Torgau (1526). The Swedish general Torstenson defeated the Austrians under Gallus at this place in 1644.

Jutland (Denmark).—This peninsula was the cradle of the Danes and Northmen, whose ravages were for so long the terror of Europe. During the 10th and 11th centuries the entire surface was covered with forests. The Jutes, who established themselves in Kent and Hampshire, came from Jutland. It was overrun by Wallenstein a.d. 1627, and restored to Denmark by the treaty of Liibeck in 1630. The allies occupied the south of Jutland in 1813, and an armistice was concluded with Denmark Dec. 15, 1813. This led to a treaty between Denmark and Great Britain and Sweden, concluded at Kiel Jan. 14, 1814.

K.

KABBELJAUWEN and HOEKS, or Hooks, the former signifying the Cod-fish party, and the latter the Fish-hooks, were two factions that arose in the Netherlands about 1347, soon after the death of William IV., "dividing," as the historian remarks, "noble against noble, city against city, father against son, for some hundred and fifty years, without foundation upon any abstract or intelligible principle." In the end, the Kabbeljauwen represented the city, or municipal faction, and the Hoeks the nobles, who were to catch and control them. The Hoeks were defeated in a naval action July 31, 1490, by the fleet of the Kabbeljauwen, commanded by Jan von Egmont.

KAGUL (Battle).—The Russians defeated the Turks in a great battle on the left bank of the river Kagul, or Kahul, Aug. 1, 1770.

KAINLY (Battle).—The Russians, after a severe struggle, defeated the Turks in the plain of Kainly, near Erzeroum, July 1, 1829.

Kaiserstauern (Germany).—The castle of this very ancient town was built by Frederick I. (Barbarossa), who reigned from 1152-1190. The French, under Hoche, failed in an attack upon the allied army near this town, Nov. 29, 1793. A French army was defeated here by Mollendorf, May 24, 1794, with a loss of 3,000 men and several pieces of cannon.

Kalafat (Wallachia).—At the commencement of the Russian war, a Turkish force of 12,000 men took possession of this town, Oct. 28, 1853. An attempt made to dislodge them by a corps of Russians, 20,000 strong, led to the spirited engagement of Citate, in which the Turks were victorious, Jan. 6, 1854. They fortified the town, and maintained their position till Austria entered the Principalities, by virtue of a treaty signed June 14, 1854.

KALEIDOSCOPE.—This optical instrument was invented in 1814 by Sir David Brewster, and patented by him in 1817.

Kalisch (Poland) was founded in the 7th century, and its citadel was built by Casimir III., who reigned a.d. 1335-1370. Here the Russians defeated the Swedes, Nov. 19, 1706; and the Russians defeated the Saxon infantry, commanded by Reynier, Feb. 13, 1813. The latter victory was followed by the "Treaty of Kalisch" between Russia and Prussia, signed Feb. 28, 1813. A secret convention between the Austrian and Saxon commanders, to allow the troops of the latter a passage through the imperial territories, was concluded at this place about the end of March, 1813. A conference was held at Kalisch between the emperor of Russia and the king of Prussia, in October, 1835.

Kalka (Battle).—The Mongols defeated the Russians and the Cumanis on the banks of this river, June 16, 1224.

Kalunga Port (Hindostan) was unsuccessfully attacked by the British under Major-General Gillespie, who fell in the assault, Oct. 31, 1814. A second storming party under Colonel Mawby also failed, Nov. 27, and the fort was evacuated by the Nepaulese garrison on the 30th. These events occurred during what is termed the Ghorkas war.

Kamieniec or Kamienetz (European Russia).—This town was founded by the sons of Olgherd, a.d. 1381, and was erected into a city in 1374. In 1672 it was seized by the Turks, to whom it was ceded in 1676. They surrendered it to the Poles in 1689. The Russians took it in 1793, and demolished the fortifications in 1812; but they have since been rebuilt.

Kamtschatka (Siberia) was discovered by some Russians, who had been wrecked upon the coast, a.d. 1649. The Cossacks penetrated into the country in 1690, and the Russians took possession in 1696, though they did not succeed in subjugating the inhabitants until 1706. Behring ascertained that it was a peninsula in 1728.

Kandahar (Afghanistan), though said by some authorities to have been founded by Lohrasp, a Persian king, who flourished at a very early period, is generally supposed to have been founded by Alexander the Great during his expedition to Asia, B.C. 334—323. In the beginning of the 11th century it was held by the Afghan tribes, from whom it was taken by the Sultan Mahmoud of Ghiznee. Zenghis Khan seized it towards the commencement of the 13th century, and Timour in the 14th. In 1507 the emperor Baber took it; but being unable to retain possession, he again laid siege to it in 1521, and effected its capture after a determined resistance. In 1625 it fell under the power of Shah Abbas the Great, from whom it was recovered in 1649. In 1747 it was taken by Ahmed Shah, who made it the capital of Afghanistan. The seat of government was, however, transferred to Cabul in...
1774. During the Afghan war, a British force occupied the town from 1839 to 1842.

KANDY (Ceylon) was captured by Rajah Singha I., a.d. 1582. In February, 1803, it was seized by the British, who evacuated it June 24, after a most disastrous occupation. Kandy was once more conquered by the English, Feb. 14, 1815, and soon after ceded to Great Britain. (See Ceylon.) Kangaroo Island (Gulf St. Vincent) was discovered by Flinders, a.d. 1802, and thus named by him from the numbers of kangaroos seen sporting about in every open spot.

KANGRAH (Punjab), an important fortress, taken a.d. 1010 by Mahmoud of Ghiznee, and recaptured in 1043 by the rajah of Delhi. It came into the possession of England on the annexation of the Punjab in 1849.

KANOGE (Hindostan).—This town in the province of Agra was anciently a place of great importance, and the capital of a powerful empire. Rajahs of Kanoage are mentioned as early as a.d. 1008. It was conquered by Mahmoud of Ghiznee in 1018, but did not long remain in his possession. It has lost all its ancient renown, and is now notorious for the shelter its ruins afford to robbers and other criminals.

KANSAS (North America) formed part of Louisiana, purchased by the United States government from France, a.d. 1803. Kansas was erected into a territory in 1854, and admitted into the Union as an independent state in 1866. A convention to frame a constitution for the new state met in September, 1857. A resolution to appoint a committee to investigate certain charges against President Buchanan, of having used bribes and other influence in order to insure the success of a bill legalizing slavery in this state, was adopted by the House of Representatives, March 5, 1866.

KAPOLNA (Battle).—The Austrians defeated the Hungarians in a series of encounters near Kapolna, Feb. 26 and 27, 1849.

KAREGITE, or CHAREGITE.—A Moham- medan sect, which repudiated the authority of Ali, a.d. 657. They were reduced to submission in 659. Three of their number entered into another conspiracy against Ali, who was stabbed by one of them in a mosque at Cufa, and died two days afterwards, Jan. 21, 661. The term Karegite, deserter, or rebel, was applied to all who revolted from the lawful Imam.

KARNAK (Egypt).—Nothing certain is known respecting the foundation of this temple, which contains sculptures, with inscriptions, for the most part of the time of Rameses III., b.c. 1200. The great hall, however, is ascertained to have been built by Sethe I., b.c. 1340. Fragments have been found bearing the name of Seto- tasen I., b.c. 2080.

KARS (Asiatic Turkey).—Once the capital of the Chorzone district, in Armenia, the residence of the Bagratid princes, a.d. 928—

KEN

1851. It was exchanged by them in 1064, and has since been known under the name of Kars. It contains a castle, built by Amurath III., a.d. 1586, and besieged in 1735 by Nadir Shah, who, after cutting off a Turkish army of 100,000 men, abandoned the enterprise. The Russians blockaded the town for a few months in 1806. Paskiewitch laid siege to it July 7, 1825, and captured it July 15. The Turkish garrison, commanded by General Williams, held out gallantly against the investing army of Russia from June 16, 1855, till compelled by a famine to capitulate, Nov. 25. The general assault made by the Russians Sept. 29 was repulsed. Kars was restored to the Turks by the third article of the treaty of Paris, March 30, 1856.

KASHGAR, or CASHGAR (China), anciently called Sule, existed before the Christian era, and after exchanging rulers several times, was conquered by the Chinese a.d. 1759. Marco Polo visited it about a.d. 1275.

KATZBACH (Battle).—Blucher defeated the French, commanded by Ney, on the banks of the Katzbach, Aug. 26, 1813.

KEELING, or Cocos ISLANDS (Indian Ocean), were discovered by Keeling in 1609.

KEHL (Germany) was captured by the French, under Marshal Villars, March 9, 1703, and by the Duke de Berwick in December, 1733. Moreau surprised the fort June 23, 1796. The Austrians attempted to recover it by a coup de main, but failed, Sept. 18, 1796. After a siege of fifty days, the French surrendered to the imperial general, Jan. 9, 1797. Kehl was again given up to the French, April 21, 1797, and, by a decree of the senate, was annexed to the French empire, Jan. 21, 1807. It was finally restored to Baden by the treaty of Paris, May 30, 1814.

KEHLAT, or KHELAT (Beloochistan).—This strongly-fortified town was stormed by the English on Nov. 13, 1839. 1000 khan and several of his chiefs fell in the struggle. It was left under the care of a garrison of native troops, who surrendered, after a defence of three days' duration, to Meer tusseer Khan, July 27, 1840. The Beloochees having plundered the town, abandoned it, and the British troops regained possession Nov. 3, 1840.

KEMAOON, KUMAOON (Hindostan).—The whole of this district was ceded to the East-India Company by the convention of Almora, April 27, 1816.

KEMMENDINE (Burmah).—This fortified post was captured by the British troops June 10, 1854, during the Burmese war. The Burmese failed in an attempt to recapture the place, Dec. 1, in the same year.

KENILWORTH CASTLE (Warwickshire).—This celebrated castle was built about 1122 by Geoffrey de Clinton, on land granted for the purpose by Henry I. In 1172 it was garrisoned by Henry II. against his rebellious sons; and in 1253 was bestowed for life upon Simon of Montfort, earl of Leicester. After the battle of Evesham (g.v.),
Kenilworth was held by Montfort's second son, Simon, and was taken by Henry III. after a six months' siege. In 1286 Roger Mortimer held a great chivalric meeting or "round table" in this castle, which was enlarged by John of Gaunt in 1391. In 1414 Henry V. kept his Lent here, and reserved a present of tennis-balls from the French dauphin; and Queen Elizabeth was entertained here with great magnificence by Robert Dudley, earl of Leicester, in 1575. She arrived July 9, and prolonged her visit for seventeen days. The decline of Kenilworth commenced during the civil wars, when it was given by Cromwell to some of his officers, by whom it was dismantled. It is now in ruins.

KENNET (Battle).—The Danes defeated Ethelred II. at Kennet, A.D. 1006. Ethelred retired into Shropshire, and assembled the witan, when it was determined to make a treaty with the invaders to give them food and pay tribute. In the following year 36,000 pounds of gold were paid.

KENNINGTON COMMON (Surrey).—On this common, near London, Jimmy Dawson was hanged, drawn, and quartered, July 30, 1746. The Chartists, headed by Feargus O'Connor, held a memorable meeting here April 10, 1848, which proved a complete failure as far as the objects of its projectors were concerned. Kennington Common was ordered to be inclosed and converted into a public pleasure-ground by 15 & 16 Vict. c. 29 (June 17, 1852).

KENNINGTON CEMETERY (London).—The cemetery at this place, on the Harrow Road, was laid out by a joint-stock company incorporated by act of Parliament in 1831. It was opened Jan 31, 1832, and consecrated Nov. 2.

KENNINGTON PALACE AND GARDENS (London).—From the Close Roll, temp. Edward I., it appears that a council was held Aug. 23, 1302, "in the king's chamber at Kensington." Kensington House was the seat of Heneage Finch, earl of Nottingham, whose son sold it to King William III. soon after his accession, and he converted it into a royal palace. Queen Victoria was born here May 24, 1819, and held her first council here in 1836.—The Serpentine was formed between the years 1730 and 1793, and the bridge over it, which separates the gardens from Hyde Park, was erected from the designs of Rennie in 1826.

KEN (England), on the coast of which Cæsar landed B.c. 55, was erected into a kingdom by Hengist, A.D. 455. Ethelbert, his king, A.D. 568—616, was the first Christian monarch in England. It was united to Wessex in 824. Alfred made it a county in 888.

KEN (Loss of the).—The Kent, East-Indianman, 1,400 tons burden, carrying troops and passengers, amounting with the crew to 637 souls, left the Downs in the middle of February, 1825, and after experiencing much bad weather in the Bay of Biscay, took fire

March 1. The flames spread with frightful rapidity, owing to the violence of the gale, and all on board were in expectation of perishing, when they were rescued by the Cambria, Captain Cook, bound for Mexico. Out of the whole number of people on board, 554 were saved, and the ill-fated vessel blew up at two o'clock on the morning of the 2nd of March.

KENTISH PETITION, drawn up at the assizes at Maidstone, April 29, 1701, and signed by the grand jury, several magistrates, and freeholders, was presented to the House of Commons May 8. The petitioners besought that assembly to "drop their disputes, have regard to the voice of the people, and change their loyal addresses into bills of supply." The House refused to entertain the petition, and imprisoned William Colepepper and four other persons who had presented it. This act provoked a memorable collision between the Commons, under fifteen points, with tyranny and oppression. A new parliament, which met Dec. 30, 1701, again committed Colepepper to prison, and passed resolutions in answer to the Kentish Petition, Feb. 26, 1702.

KENTUCKY (North America) was first visited by Europeans A.D. 1767, and settled in 1775. It originally formed part of Virginia. A division took place in 1790, when its first constitution was framed, and Kentucky was admitted into the Union as an independent state in 1792. A new constitution was drawn up in 1799, and another in 1850.

KERIITES.—Some Tartar tribes who were converted to Christianity in the early part of the 11th century. Their princes were known under the title of Prester John.

KERKSTER. (See CORRISDALE.)

KERESZTES (Battle).—Mohammed III. defeated the Germans in the plain of Keresztes A.D. 1596.

KERTSCH (Crimea).—On the site of the ancient Panticapæum, became a Milesian settlement about B.C. 500. Panticapæum was the capital of the kingdom of Bosporus (q.e.). It was annexed to the Roman empire B.C. 50. The Huns seized it A.D. 375, and the Genoese in 1280. They were compelled to abandon it by the Turks in 1473. These were displaced by the Russians in 1771, to whom the place was formally ceded in 1774. An expedition against the peninsula of Kertsch was despatched from the Crimea by the allied forces of France and England, May 23, 1855. Kertsch surrendered May 25, and was restored to Russia by the 4th article of the treaty of Paris, March 30, 1856. Kertsch is still called Bospor amongst the inhabitants of the Crimea.

KET's INSURRECTION, so called from its leader's manner of speech, broke out at Wymondham, in Norfolk, in July, 1549. The insurgents having defeated a force sent against them, were dispersed by the earl of Warwick, Aug. 27. William Ket, or Knight,
the leader, and his brother Robert, with other ring leaders, were tried at Westminster Nov. 23, and were soon after executed.

Kew House (Surrey) was made a royal residence by Frederick, prince of Wales (son of George II.), who took it upon a lease from the Cappel family, a.d. 1730. He began to form the pleasure-grounds, then containing 270 acres, and dying here March 20, 1751, the work was completed by his widow, Augusta, princess of Wales. George III. purchased Kew House about 1789. It was afterwards pulled down, and the furniture, &c., removed to Kew Palace (q. v.).

Kew Palace and Gardens (Surrey).—This small red brick building is of the date of James I. or Charles I. Queen Charlotte purchased it a.d. 1781. William Aiton was appointed manager of the botanical garden of Kew in 1759, and the pleasure and kitchen gardens were also placed under his care in 1783. He published his “Hortus Kewensis, or a Catalogue of the Plants cultivated in the Royal Botanical Garden of Kew,” in 1789. Dr. Hill had published a catalogue of the plants in the exotic garden of Kew, in 1783. Sir William Chambers erected the old stovc in 1760, and the orangery in 1781. The pagoda, commenced in 1761, was completed in 1762. A greenhouse for Cape plants was built in 1788, and another, for the vegetable productions of New Holland, was added in 1792. The former has been pulled down; but the latter, greatly improved, is known as the Australian House. The conservatory was transferred here from Buckingham House in 1836. A committee was appointed in 1838, to inquire into the management, &c., of the Royal Botanical Gardens, and the report was presented in May, 1840. The gardens, pleasure-grounds, &c., were transferred to the management of the Commissioners of Woods and Forests, and in 1841 were thrown open to the public. The ornamental gate-way was erected in 1845-6. In 1841 the orange-trees were removed to Kensington Palace from the orangery, which was considerably improved in 1842. The palm-house was finished in 1843. A wooden bridge built over the Thames at Kew in 1750, was replaced by the stone bridge in 1783. Sir W. J. Hooker, who effected great improvements in these gardens, published a popular guide in 1847. The small work has gone through several editions, and from it much of the foregoing information is derived.

Keys. (See Loces.)

Khandes, or Candeish (Hindostan), was an independent sovereignty from the early part of the 15th century till it was conquered by Akbar, towards the close of the 16th century. A dynasty which carried off an immense number of the population occurred in 1803. It was annexed by the British government in 1818, although not finally tranquillized till 1825.

Khart (Battles).—The Russians were defeated by the Turks under the walls of this town, in Asia Minor, July 19, 1829. Paskie-witch advanced with another army, and de-

feated the Turks at the same place, Aug. 20, 1829.

Khartoum, or Khartum (Egypt), the capital of Nubia, consisted only of a few huts until 1821. It was made the seat of the government for Beledes-Sudan, when that district became an Egyptian province, a.d. 1822. An inundation occurred here in 1850.

Khiva (Asia) formed part of the ancient Kharazm, or Chorasmia, a country inhabited by the Chorasmii. The Chinese were reduced to subjection in the 2nd century of the Christian era, and the Persians in the 3rd. It was erected into an independent kingdom, called Khazirim, in the 10th century, and was subdued by Zenghis Khan in 1218. Tamerlane conquered it in 1379. The state underwent various changes; was invaded by the Usbeg Tartars, who succeeded in establishing themselves about the beginning of the 16th century. The Russians sent an expedition, 6,000 strong, against Khiva in 1839. They suffered a defeat in October; numbers perished in the snow, and only a few returned to Russia.

Khoi (Battle). The Turks, led by Selim I., were defeated by Shah Ismail in this plain, near a fortified town of the same name, in Persia, a.d. 1514.

Khoreassan (Persia), or Country of the Sun, was invaded by the Saracens, who overthrew the Sassandies dynasty, a.d. 641. Taher revolted, and established his sway in 827; Tamerlane conquered it in 1383; Ismail, defeating Shakibek, took possession of it in 1510; and it became a Persian province in 1768.

Kyber Pass (Afghanistan).—By this route Alexander the Great, Tamerlane, Nadir Shah, and other conquerors, penetrated into India, of which it has been termed the iron gate. The passage was forced by Colonel Wade, July 26, 1839. Keane's army retreated through it in 1840. Brigadier Wild, on his way to the speedy fall of Jelalabad, assailed the key of the pass Jan. 15, 1842; but for want of additional support was obliged to retire on Jan. 23. Major-General Pollock entered the pass April 5, and the rear of the force emerged from it April 14. The British army, after the subjugation of the Afghan chiefs, retired through this pass in October, 1842.

Khyrpoore (Hindostan).—By the treaty of Khyrpoore, between the East-India Company and the ameers of Scinde, signed April 20, 1832, a free passage up the Indus and other rivers was secured to British ships. The ameer of Khyrpoore ceded the place by treaty in 1838, and it was annexed by the British March 24, 1848. A commission was appointed to investigate an alleged forgery of certain documents by the ameer Ali Murad, found him guilty of the act, Jan. 5, 1853.

Kidderminster (Worcestershire) was represented in parliament a.d. 1300. The privilege, subsequently lost, was restored by the Reform Bill, June 7, 1832. It was incorporated by royal charter in 1837.
KIE

Kieff, Kiew, or Kiev (European Russia),
the chief town of a government of the same
name, is of great antiquity, and was a
flourishing place during the 9th and 10th
centuries. It was made a principality in
1157, annexed to Poland in 1566, and ceded
in perpetuity to Russia in 1866. The
cathedral of St. Sophia was founded A.D. 1037,
the Greek Academy, the oldest in Russia, in
1588, and the university in 1834. Kieff
was conquered several times by the Poles and
Tartars, and was finally ceded to Russia in
1866. The celebrated fair is held annually
in January.

Kiel (Denmark), the capital of Holstein,
joined the Hanseatic League A.D. 1300. Its
university was founded in 1665. It was,
with the duchy of Holstein, exchanged for
other places by Russia in 1773. An insurrection
in favour of the independence of Slesvig and
Holstein occurred here, and a provisional
government was formed March 24, 1548.

Kiel (Treaty).—Concluded between Den-
mark, Sweden, and Great Britain, at this
town, Jan. 14, 1814. Denmark ceded Norway
to Sweden, while the latter gave up Pome-
rania and the isle of Rugen. Heligoland
was assigned to England, and the king of
Sweden engaged to use his best efforts to
obtain for Denmark an equivalent for Nor-
way at the general peace. The three con-
tacting powers also entered into engage-
ments for the prosecution of the war against
Napoleon I.

Kiersy, or Quercy-sur-Oise (France).
—Councils were held here in April or May,
849 A.D.; in 853; Feb. 25, 857; and in March,
858. The nobles of France obtained from
Charles the Bald an edict, rendering here-
ditary all fiefs, earldoms, and dukichies, at a
diet held at Kiersy, June 14—16, 877.
Hallam remarks that in this reign the
Church took the ascendant in national
councils.

Kilcullen (Battle).—General Dundas
was defeated in an endeavour to dislodge
the Irish rebels from their position at this
place, in Kildare, on the morning of May 24,
1798. In consequence of their success, the
insurgents immediately took up a position
between Kilcullen and Naas, and attempted
to intercept Dundas in his retreat. The
English army having received reinforce-
ments, the rebels were defeated in this
second engagement, with the loss of about
300 men.

Kildare (Bishopric).—This Irish bishopric
was founded early in the 6th century, and
was originally governed by archbishops. The
first bishop was St. Conlaeth, who died
May 3, 519. By the Church Temporalties Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833),
the see was annexed to Dublin.

Kildare (Ireland).—The abbey of
St. Bridget, one of the oldest in Ireland,
was founded about the 6th century. The
“sacred fire,” extinguished for a short
time in 1220, was kept burning till the
Reformation. The town was taken by the
margins of Ormond in June, 1649; and
the Irish rebels were defeated at Kildare,
May 29, 1798.

Kilfenora (Bishopric).—No trustworthy
account of the foundation of this small dioc-
ese exists. The first bishop of whom any
record has been preserved is Christian, who
died in 1254. From 1606 to 1617 Kilfenora
was held by the bishop of Limerick. In 1661
it was united to the archbishopric of Tuam,
and formed part of that diocese till 1742,
when it was held by the bishop of Clonfert.
In 1752 it was annexed to Killaloe.

Kilimandjaro (Africa).—This,
the highest mountain in Africa, was discovered
by Dr. Krupf, a missionary, in April, 1848.

Kilkenny (Ireland) became the site of
an English settlement shortly after Richard
de Clare landed in Ireland, A.D. 1170. A
cathedral was founded in the 12th century,
and the town grew up around it. A castle in
course of erection was destroyed in 1193,
and the present edifice was founded in 1195.
Parliaments were frequently held here. The
duke of Clarence held one in February, 1366,
when severe enactments were made against
the Anglo-Irish, and the Breton law was
suppressed. Kilkenny was surrounded by
walls in 1400, and was made a city in 1609.
It was taken by Cromwell, March 28, 1650.
William III. entered Kilkenny after the bat-
tle of the Boyne, July 1, 1690. The prece-
tory of St. John was founded in 1211, and
the Dominican or Black Abbey in 1225. The
grammar-school, founded in the 16th century,
was endowed by the duke of Ormond in
1684. The episcopal palace was enlarged in
1735, and the St. James’s Asylum was endowed
in 1803. Disturbances, which broke out in
Kilkenny in April, 1833, were speedily sup-
pressed.

Killass (Bishopric).—This Irish bishopric
was founded by St. Patrick some time be-
tween the years 434 and 441. In 1607 the
see of Achonry was annexed to Killass, and
by the Church Temporalties Act, 3 & 4
Will. IV. c. 37 (Aug. 14, 1833), the united sees
were added to the archbishopric of Tuam.

Killala (Mayo).—A French expedition
arrived in the Bay of Killass Aug. 22, 1798.
They landed 1,150 men, with four field-pieces,
and arms, ammunition, and equipments, for
distribution amongst the dissatisfied. They
reached Ballina on the 24th, and defeated a
force sent against them at Castlebar (q. v.)
on the 27th. They were surrounded at Bal-
linamuck (q. v.) Sept. 8.

Killary (Bishopric).—The cathedral of
this diocese was founded during the 7th cen-
tury, and the first bishop was St. Flannan,
the date of whose consecration is not known.
About the year 1356 the see of Roscrea and
Inis-Cathay were annexed to Killaloe, and in
1772 the bishopric of Kilfenora was also
united. By the Church Temporalties Act,
3 & 4 Will. IV. c. 37 (Aug. 14, 1833), the sees
of Clonfert and Kilmacduagh were united to
those of Killaloe and Kilfenora.

Killaloe (Ireland), an ancient town,
long the capital of the O’Briens of Tho-
Km, but "governed in Ardagh the force stored the nition, the 13th lin, Pasha, Ormond, union were annexed was his his followers dispersed.

KILLIECRANKIE (Battle).—Graham of Claverhouse, Viscount Dundee, having erected the standard of James II. in Scotland, attacked and defeated the forces of William III. in the pass of Killiecrankie, near Blair Athol, July 17, 1689 (O.S.). Dundee, however, received a mortal wound and his death, and his followers dispersed.

KILMACDUAGH (Bishopric).—The see was founded by Colman MacDuagh, about A.D. 620. During the first five or six centuries of its existence, the succession of its bishops is exceedingly indefinite. It was annexed to Clonfert in 1602, and the two sees were added to Killaloe by the Church Temporalties Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833.)

KILMAINHAM HOSPITAL (Dublin).—This institution, for the maintenance of old and disabled soldiers, was founded by charter, A.D. 1690, and completed in three years, at an expense of £23,559. The chapel was consecrated in 1686. The abolition of this institution was proposed in 1833; but objections having been made by the inhabitants of Dublin, the project was abandoned.

KILMALLOCK (Ireland).—St. Malloch is said to have founded an abbey at this place, in Limerick, in the 6th century. During the 13th century a Dominican abbey was erected. In 1598 Kilmallock was besieged by the Irish, and relieved by the earl of Ormond. Several battles were fought in its vicinity in 1641 and 1642.

KILMORE (Bishopric).—This is one of the most modern of the Irish bishoprics. It was originally located at Brefny, and Bishop Hugh O'Flinn, the earliest on record, died in 1136. The see was transferred to Kilmore in 1454, and in 1660 was united with Ardagh. It was again separated in 1742, and remained distinct, until it was permanently united to Ardagh by the Church Temporalties Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833). The union was effected in 1838.

KILRUSH (Bishopric).—The marquis of Ormond, lord-lieutenant of Ireland, defeated the Irish, taking all their baggage and ammunition, at Kilrush, in April, 1682.

KILSYTH (Battle).—Montrose defeated the Covenanters at this place, in Stirling, Aug. 15, 1685.

KINEN (Russia) was attacked by a force of 6,000 Turks, commanded by Kap-Pasha, who were totally defeated by the Russians under Suvarrow, June 28, 1758. The combined French and English fleets bombarded it Oct. 17, 1855, and compelled the garrison to surrender. It was restored to Russia by the fourth article of the treaty of Paris, signed March 30, 1856.

KINDER GARTEN.—This system of education for children was introduced by Frederick Froebel, who was engaged to teach it at Hamburg by Ronge in 1849. In 1851 it was introduced into England by Madame Ronge, who established a Kinder Garten or children's garden, at Hampstead. The "Practical Guide to the English Kinder Garten" was published in 1855. Great prominence is given in this system to the pastimes of the young, in which modelling, drawing, and singing are introduced, and corporal punishment is altogether excluded.

KING.—This title, under different forms of orthography, exists amongst most of the northern nations of Europe. The old Latin title rex, a ruler, is the parent of the Italian re, the Spanish rey, and the French roi. The English word king is derived from the Teutonic. By some writers the origin of the kingly office is derived from Adam, who "governed or commanded all mankind as long as he lived." Nimrod was the founder of the earliest postdiluvian kingdoms, namely those of Babylon and Assyria, about b.c. 2247. Gibbon affirms that from the earliest period of history the sovereigns of Asia were known by the title of Basileus, or king. He also states that of the whole series of Roman princes in any age of the empire, Hannibalus alone was distinguished by the title of king. This nephew of Constantine I., made king of Pontus a.d. 336, was assassinated by his cousins in 337.

KING-AT-ARMS.—England is placed under the heraldic jurisdiction of Clarenceux and Norroy, the two provincial kings-at-arms, and of Garter, who takes precedence of both, a dignity and importance. Clarenceux king-at-arms comprehends in his jurisdiction the whole of England south of the Trent, and Norroy presides over the districts north of that river. Clarenceux received his title from Lionel, son of Edward III., and duke of Clarence, and Norroy from his being the north king. The precise year in which they were instituted is unknown, but they were probably founded by Edward III. The office of Garter king-at-arms was created by Henry V. in 1417.—Ireland is under the heraldic jurisdiction of Ulster king-at-arms, whose dignity was instituted by Edward VI. Feb. 2, 1553.—In Scotland, the Lyon king-at-arms is an officer of great antiquity.

KING GEORGE'S OF NOOTKA SOUND (Australia), discovered by the Spaniards about a.d. 1774, was visited in 1778 by Captain Cook, who changed the name of the coast from Nootka to King George's Sound. The Spaniards in 1791 recognized the right of England to the possession of King George's Sound; and Vancouver arrived here in April, 1792, having been sent by the English government to receive from the Spaniards the restitution of the territory, which he was to explore and survey. A settlement formed upon its shores in 1826 was transferred to Swan River in 1830. Its capacious harbour is much frequented by whalers, and is used as a coaling station for steam-ships.

KING HENRY'S COLLEGE.—(See CHRISTCHURCH.)
King of England.—Egbert is usually believed to have assumed the title of king of England A.D. 827; but Sharon Turner regards Athelstan as the earliest prince who bore that title, which he states was instituted in 934. The plural number, as referring to the king, was first adopted by Richard I. after his coronation, Sept. 3, 1189. John added the title of "Lord of Ireland;" and in 1337 Edward III. assumed that of "King of France." Henry VIII. received the title of "His Most Christian Majesty" from Pope Julius II. in 1513. He changed the title of "Lord of Ireland" into "King of Ireland" in 1542. The kingly office was abolished by the Long Parliament, March 17, 1649; but the regnal years of Charles II. are always computed from the date of his father's death. The title of "King of France" was relinquished Jan. 1, 1801, when the royal style was proclaimed to be "Georgius Tertius, Dei gratiâ Britanniarum Rex, Pidei Defensor," or George the Third, by the grace of God of the United Kingdom of Great Britain and Ireland, King, Defender of the Faith. Queen Victoria was proclaimed throughout British India by the title of "Victoria, by the grace of God, of the United Kingdom of Great Britain and Ireland, and the colonies and dependencies thereof, in Europe, Asia, Africa, America, and Australia, Queen, Defender of the Faith," Nov. 1, 1837.

King of Italy.—After the reign of Charlemagne, the title "King of Italy" was borne by the heirs to the imperial throne of the Western empire. It was conferred upon Victor Emanuel II. of Sardinia, with the style of "Vctor Emanuel II., by the grace of God and by the will of the people, King of Italy, &c.," by the Italian parliament, March 17, 1861.

King of the French.—This, the original title of the French sovereigns, was changed into "Emperor of the French" by Philip Augustus (A.D. 1175-1223). The National Assembly ordered the old style to be resumed, Oct. 16, 1789, and abolished royalty Sept. 20, 1792. Louis XVIII. revived the royal title, as King of France, in 1814; and Louis Philippe accepted the title of "King of the French" Aug. 9, 1830. Royalty was abolished in France Feb. 26, 1848; and Napoleon III. restored the title of emperor, Dec. 2, 1852.

King of the Romans.—The emperor Henry II. assumed this title previous to his coronation, A.D. 1014, and was the first reigning prince of Italy or Germany to bear the title. It was borne for many years by the heirs of the emperors of Germany, and was first conferred upon Henry III.'s eldest son in 1055. Napoleon I. conferred the title of king of Rome upon his son, March 20, 1811.

Kings (Books of).—The two books of Kings, which originally formed only one book in the Hebrew, are supposed to have been written by Ezra before B.C. 444.

King's College. (See Aberdeen.)

King's College (Cambridge) was founded by Henry VI., A.D. 1441. The first stone of the celebrated chapel was laid in September, 1447. Henry VII. gave £5,000 towards the completion of the building in 1508, and his executors, under a power conferred by his will, gave a further sum of £5,000 in 1513. The exterior was completed in July, 1515, and the painted windows were designed in 1526. The screen and stalls were completed in 1534. Gibbs erected the Fellows' building in 1724. The new buildings were commenced in 1824, and finished in 1828.

King's College (London).—The first steps for the foundation of this educational establishment were taken at a meeting over which the duke of Wellington presided, June 21, 1828. The announcement that government had granted the ground originally intended for the east wing of Somerset House for the site of the institution, free of expense for a thousand years, was made May 16, 1829. The charter of incorporation bears date Aug. 14, 1829; and the building, from designs by Smirke, was opened in 1831. Mr. Marsden left the college a library, consisting of about 3,000 volumes, in 1835.

King's College Hospital (London) was founded A.D. 1839.

King's County (Ireland) formed part of a large extent of territory, known, amongst other names, under that of the kingdom of Offaly, or east and west Glamallary, was confiscated to the crown by 3 & 4 Phil. & Mary, c. 2 (1556). One portion was named Queen's County, in honour of Queen Mary, and the other King's County, in honour of her husband Philip. The native chieftains struggled against this settlement, and were subdued in 1600. Many of them took part in the revolt of 1641.

King's Evil.—Touching for this disease is alleged to have been first practised by Edward the Confessor, who reigned from A.D. 1043 to 1066, and Evelyn, in his Diary, July 6, 1693, records that King Charles II. begged to touch for the evil, "according to custom." A notice was issued May 14, 1694, that "his sacred majesty would continue the healing of his people during the month of May, and then give over till Michaelmas." In White's "Coronations of the Kings of France," it is related that Louis XVI., immediately after his coronation at Rheims, in 1775, touched 2,400 individuals, who were suffering from this disease, and healed them. Queen Anne was the last English monarch who touched for the evil, 1702-1714. Charles Edward touched a female child for the king's evil at Holyrood House, in October, 1745. The office for the ceremony appeared in the Litany as late as 1719. The Jacobites contended that the power of cure did not descend to Mary, William, or Anne.

King's (or Queen's) Bench (England), one of the superior courts of common law, received its name from the fact that formerly the sovereign presided in person, though he was never empowered to determine causes except by the mouth of his judges. By
28 Edw. I. c. 5 (1300), it was made a moveable court, attendant on the king’s person, but it has seldom been held anywhere except at Westminster. During the Interregnum it was styled the Upper Bench. The Ball Court was erected as a branch of this court by 11 Geo. IV. & 1 Will. IV. c. 70 (July 23, 1830).

**KING'S (OR QUEEN'S) BENCH PRISON.—This debtor's prison is said to have been the goal to which Judge Gascoigne committed Prince Henry in the reign of Henry IV. The office of marshal of the King's Bench was sold to a company of proprietors by the earl of Radnor, Sept. 20, 1718, for £20,500. The prison was built in 1751, enlarged in 1776, and burnt by the mob during the Gordon riots (q.v.) in 1780. The present building was erected in 1781. A fire broke out in this prison July 13, 1799, and was not extinguished until several apartments had been destroyed. The freedom of prisoners to live anywhere within the rules of this prison was abolished in 1835. By 5 & 6 Vict. c. 22 (May 31, 1842), the Fleet and Marshalsea prisons were consolidated with the King's Bench, and the three received the name of the Queen's Prison.**

**KING’S (OR QUEEN’S) COUNSEL.—The appointment of this officer, beyond the usual law officers of the crown, is believed to have originated during the reign of Queen Elizabeth. A warrant of James I., dated April 21, 1603, speaks of Francis Bacon as “one of the learned counsellor to the late queen, our sister, by special commandment,” and confirms him in the office; and a patent exists of Aug. 25, 1604, by which he was formally appointed.**
KING'S SPEECH.—The first speech from the throne is said to have been delivered by Henry I., A.D. 1107.

KINGSTON (Canada) was settled A.D. 1783 by the Dutch, who gave it the name of Esopas. It was incorporated in 1838. The seat of the government was transferred from Kingston to Toronto in 1844.

KINGSTON (Jamaica) was built A.D. 1693, in consequence of the destruction by an earthquake of Port Royal in 1692. It was nearly destroyed by fire, Feb. 8, 1782; and the cholera carried off about one-eighth of the population in 1850. The railroad from Kingston to Spanish-town was opened in 1845.

KINGSTON-ON-THAMES (Surrey) was the abode of royalty in the Anglo-Saxon period; and between A.D. 902 and 979, seven kings were crowned at this place. The stone on which this ceremony was performed is still preserved. King John granted the town its first charter in 1199. In the reigns of Edward II. and III. (1307—1377) it returned members to parliament, a privilege it has not since enjoyed. Queen Elizabeth's free grammar-school was founded in 1561. The bridge over the Thames was erected in 1257; the town-hall in 1539. Miss Burdett Coutts built a district church here in 1845.

KINGSTOWN (Ireland) was called Dunleary prior to the embarkation of George IV. for England, Sept. 3, 1821, when it received its present name in honour of that event. The construction of the harbour was commenced in 1817, from designs by Rennie, at a cost of nearly £800,000. It was connected with Dublin by railway Dec. 17, 1834, and with Dalkey by atmospheric railway March 29, 1844. Queen Victoria embarked at this port, on her return from Ireland, in August, 1849.

KINSALE (Ireland).—This town, in the county of Cork, is a place of considerable antiquity. Sir John de Courcy erected a castle on the Old Head of Kinsale in the 12th century; and in 1380 the English fleet defeated the combined naval forces of France and Spain in the harbour. A Spanish force landed here Sept. 23, 1601, and seized the town on behalf of the Roman Catholic rebels; but it was besieged by the English and recaptured, Dec. 28. In March, 1689, Kinsale was garrisoned by the French and Irish forces of James II., who held it till the end of 1690, when it surrendered to General Churchill, afterwards duke of Marlborough. The prosperity of Kinsale has been in a declining condition since the peace of 1714.

KINTIRISHI (Battle).—The Russians defeated the Turks near this place, in the province of Erivan, March 15, 1829.

KIÖGE (Sea-fights).—In the bay of Köge, on the coast of the island of Zealand, the Swedish fleet was defeated by a combined Dutch and Danish fleet, A.D. 1676. From the fact that the action took place near Bornholm, it is often called by that name.

A Swedish fleet having assailed a Danish fleet here, Oct. 4, 1710, one Danish ship of ninety guns blew up, and two of the Swedish flag-ships grounded on a sandbank, and were abandoned. The Swedish fleet retired Oct. 7.

KIPZAK, OR KAPZAK (Asia).—This plain, supposed to be the primitive seat of the Cossacks, was conquered by Toushi, son of Zengis Khan, A.D. 1219; and Batou established the Golden Horde in 1234.

KIRCHDENKERN (Battles).—The French were defeated by the allies at this village in Germany, July 15, 1761. The first attack was made upon the English, commanded by the marquis of Granby, and both leaders and men displayed extraordinary gallantry. The combat was renewed on the following day, when the French were again defeated. The French lost 5,000, and the allies only 1,500 men in killed and wounded. These combats are sometimes mentioned under the name of the battle of Villingshausen.

KIRCHHOLM (Battle).—Sigismund, king of Poland, defeated the Swedes at Kirchholm, A.D. 1605.

KIRECALDY (Fife-shire).—This town was the seat of an ancient establishment of the Culdees. It was erected into a royal burgh A.D. 1334, when it was rendered subject to the abbot of Dunfermline and his successors. It became independent in 1450, and received a charter from Charles I. in 1644.

KISSENGEN (Bavaria).—The importance of this fashionable watering-place arose from the patronage of Louis, king of Bavaria (A.D. 1825—1848). The celebrated artesian well, 2,000 feet deep, commenced in 1832, was completed in 1852.

KISSING, as a religious act, was practised in the time of the patriarch Job, b.c. 2130, who protests (Job xxxi. 26) that he had not kissed his hand to the sun or to the moon. This mark of devotion was paid to Baal (1 Kings xix. 18), b.c. 910. It passed to the Greeks, and from them to the Romans. Dr. Winsemius declares that the custom was unknown in England till the Princess Rowena, daughter of Hengist, king of Friesland, pressed her lips to the cup, and saluted Vortigern with a "little kiss," A.D. 449. From a passage in Evelyn's Diary, it appears that men kissed each other in the streets of London towards the end of the 17th century. The Spanish conquerors found the custom prevalent in the New World.

KISS OF PEACE.—The osculum pacis, or the solemn kiss of peace, was anciently given by the faithful one to the other, as a testimony of their cordial love and affection. After the priest had given the salutation of peace, the deacon ordered them to salute one another with a holy kiss. It was also given before the Eucharist, until the 12th or 13th century, when the Pax (q. v.) was introduced. Towards the end of the 3rd century, the kiss of peace was given in baptism. It is said to have been omitted at the coronation of Stephen, A.D. 1135. Henry II. of England refused to give Becket the kiss
of peace, at that time the usual pledge of reconciliation, in 1169.

KING CAT CLUB (London).—This celebrated association was formed about A.D. 1700, and held its first meetings at a small house in Shire Lane. It originally consisted of thirty-nine noblemen and gentlemen distinguished for the warmth of their attachment to the house of Hanover. The duke of Marlborough, Sir Robert Walpole, Addison, Garth, and many famous men of the period, were enrolled on its list of members. The club is said to derive its name from Christopher Katt, a pantrycook, at whose house the members dined.

KITTEN (St. (See Christopher's, St.).

KLAGENFURT (Illyria), the capital of Carinthia, belonged to the crown till A.D. 1618, when Maximilian I. transferred it to the states of Carinthia, for the purpose of erecting a fortress. The House of Assembly was built in 1391. At various times the city has suffered from extensive fires. Those which occurred in 1535, 1723, and 1796, were very destructive. The place was taken by the French, March 20, 1707, and on the 30th Napoleon made it his head-quarters. A skirmish took place here between Chastellart and the Italian general Rusca, in June, 1809.

KLAUSENBURG (Transylvania), the capital, called Colosov or Kolosov by the Hungarians, is believed to have been founded by the Romans, and by them named Claudia, whence its modern Latin appellation of Claudiopoli. A colony of Saxons settled here and enlarged the town A.D. 1178. The cathedral was built in fulfilment of a vow by King Sigismund, 1399. Matthias Corvinus Hunicades, king of Hungary, was born here in 1443. On a lofty eminence stands the citadel, erected in 1721.

KNEE.-A third order of cathedrums was distinguished by this name by the council of Nicaea, A.D. 314 or 315, and other councils. Amongst the penitents was an order of kneelers or prostrators.

KNEELING was practised as the ordinary posture of devotion from the earliest times. Amongst the primitive Christians, on the Lord's day, all prayers were performed standing, but on other days some were said standing, some kneeling.

KNIGHT ERRANTY is described by a writer in the "Encyclopaedia Britannica" (vii. 536) as "a practical caricature of chivalry, which, by bringing it into contempt, exposed it to ridicule, and thus sealed the doom of an institution which, with all its follies, absurdities, and vices, has conferred essential benefits upon mankind." Cervantes wrote "Don Quixote," of which the first part was published in 1605 and the second in 1615, ridiculing knight errantry.

KNIGHTHOOD.—The institution of knighthood originated in the honour anciently bestowed upon such as excelled in horsemanship. Hence the Latin, French, Italian, Spanish, and Dutch words for the English knight are all derived from terms which signify 'horse.' Some zealous antiquarians consider that Pharaoh conferred the honour of knighthood upon Joseph when he put his ring on his finger and invested him in robes of dignity (Gen. xii. 42, b.c. 1715; but there is no evidence of the existence of any such institution until Romulus established the equestrian order at Rome, about a.c. 753. Modern knighthood did not originate in this order, but in the tenure which compelled feudal vassals to hold their lands by furnishing armed men for the service of the sovereign, the obligation to furnish a soldier constituting one knight's fee. The earliest mode of conferring the honour of knighthood in England was the consecration of the novitiate's sword by the priest at the altar. The first knight created by the stroke of a sword was Athelstan, who was dubbed by Alfred the Great, A.D. 900. The chivalric element was not introduced into knighthood until the period of the crusades, when devotion to God and the fair sex became the chief characteristics of all good knights. Ecclesiastics were prohibited from conferring knighthood by a synod held in 1102. In the reigns of Edward VI. and Elizabeth, all persons possessed of lands yielding a yearly income of £40 or more were compelled to receive knighthood or pay a fine, which in 1526 Charles I. recruited his exhausted exchequer by reviving this obsolete custom. The compensation exacted from those knights who declined to perform military service was abolished by 16 Charles I. c. 20 (1640), and the service itself was abolished by 12 Charles II. c. 24 (1660). The following is a list of the various orders of knighthood, the principal of which are noticed under their respective titles:

Knight-Marshal.—The earl-marshall of England (q.v.) had a knight under him called the Knight-Marshall. In ordinances made by Henry VIII. at Eltham, A.D. 1526, directions were laid down for his attendance at court, &c.

Knights (Female).—Besides the orders of knighthood bestowed on men, there are several institutes for the honour of meritorious ladies. The following table exhibits a list of these, the most important of which are noticed under their titles:—

| J.D. | — |
| Amarantha (Sweden) | 1645 |

Knights of the Round Table.—This
order is said to have been founded by King Arthur, a British prince, who was probably killed at the battle of Camelon, A.D. 542. Edward III., anxious to revive it, offered free conduct to persons from various parts of Europe, desirous of attending a solemn festival of the Round Table, to be held at Windsor A.D. 1344. Philip VI., king of France, prohibited his subjects from attending, and announced his intention of holding a Round Table at Paris. From this originated the order of the Garter (q.v.).

NIGHTS OF THE SHIRE.—The representatives in parliament of the English counties were first summoned about A.D. 1254, in the reign of Henry III., and in a more regular form Jan. 20, 1265. By 8 Hen. VI. c. 7 (1429), and 10 Hen. VI. c. 2 (1432), amended by 14 Geo. III. c. 58 (1774), knights of the shire were to be elected by persons possessing a freehold to the value of forty shillings by the year within the county.

KNITTING.—The art of knitting is said to have been invented during the 16th century. The French stocking-knitters were incorporated into a guild Aug. 26, 1527; and Queen Elizabeth received a present of a pair of black silk stockings in 1561, which gave her such satisfaction that she refused to wear any other kind. The first knitted woollen stockings in England were worked by William Rider in 1564; and in 1577 the art of knitting seems to have been common throughout all England.

KNIVES were, according to Anderson, first made in England A.D. 1563. Fosbrooke states that towards the end of the 16th century they formed part of the accoutrements, and were worn by European women at the girdle. The Anglo-Saxons and the Normans carried about with them the metal, or eating-knife. An Egyptian knife, with blade of copper, has been found in the catacombs of Sacrauf.

KNOW-NOTHINGS.—This political party of the United States published its “Platform of Principles” June 15, 1855. Its distinguishing features were the approval of slavery and hostility to the Roman Catholic church.

KOLIN (Battle).—The Prussians under Frederick the Great sustained a signal defeat from the Austrians under Marshal Daun, at this town, in Bohemia, June 18, 1757.

KÖNGSBERG (Norway).—The silver-mines in the neighbourhood, for which this town is celebrated, were discovered A.D. 1623.

KÖNIGSBORG (Prussia).—This city was founded A.D. 1255 by the knights of the Teutonic order, at the suggestion of Premislaus II. of Bohemia. The royal castle was erected in 1257, and the cathedral commenced in 1332. In 1385 it joined the Hanseatic League, and in 1525 became the residence of the Prussian dukes, and the capital of the duchy. The university, founded in 1544, by the margrave Albert, is called the Albertine in consequence. Königsberg was surrounded by walls in 1626, and the citadel of Fredericksburg was built in 1657. The elector Frederick III. was crowned king of Prussia at this place in 1701. The plague raged here with great fury in 1709, and much damage was done by fires in 1764, 1769, 1775, and 1811. The Russians entered Königsberg in triumph, Jan. 10, 1758, and the French seized it in 1807, and it was again fortified in 1845. The coronation of William I. of Prussia was celebrated here with great magnificence, Oct. 15, 1861.

KÖNIGSBERG, (Battle,) was fought at this place, in Germany, June 2, 1255, during the Peasant war, when the peasants were defeated by the imperial troops, and perished in great numbers.

KÖNIGSTEIN (Germany) was surrendered to the Prussians, after a blockade of some months, March 9, 1793. For about three months in 1849, the king of Saxony sought refuge here, on account of the revolutionary tendencies of his subjects. The fortress is considered impregnable, and at its foot stands the camp of Pirna (q.v.).

KOOM (Persia) was built by the Saracens about the beginning of the 9th century. The Afghans destroyed it in 1722. It was at one time celebrated for its manufactures of silk.

KORAN.—This word, signifying in the original Arabic, ‘that which ought to be read,’ is the name given to the bible of the Mohammedans, which was prepared by Mohammed about A.D. 612, and collected and published by his successor Alubeker in 634. The divine authority of the book was denied by Djeab Ibn-Dirhem in 740, and by other heretics in 826; in consequence of which Haroun II. prohibited all discussion on the subject in 842. The first Latin translation of the Koran was made in 1143. Hinckelmann published the Arabic text in 1696. Sale’s English Koran appeared in 1734, and Savary’s French version in 1753. Fliegel’s stereotyped edition was published at Leipzig in 1834.—The work contains 114 chapters and 6,000 verses, and its contents are divided into the three general heads of precepts, histories, and admonitions.

KORDOFAN (Central Africa).—This district of the Nigritia, long tributary to the king of Sennar, was taken in the latter half of the 16th century, by the king of Dar-Fur, from whom it was wrested by Mehemet Ali in 1820. Mehemet Ali was confirmed in the possession of Kordofan by a firman issued by the sultan Feb. 13, 1841.

KOREISH.—This celebrated Arabian tribe was descended from Fihr, born about 200, and was elevated to importance by Kussai, born about 400. The custody of the Caaba, (q.v.) was usurped by the Koreishites in 406, and Mohammed was born a member of the tribe in 569. In 613 he was vigorously opposed in his religious reformation by his fellow Koreishites, and a war resulted, which terminated in the total defeat of his opponents in 630. Milman says the Koreishite
KUS

Kremlin, defeated when covered insubordination. The ancient Cholm, destroyed by fire a.d. 1718, was restored by Frederick William I.

Koslov. (See Eupatoria.)

Kotah (Hindostan).— A treaty was concluded between the state of Kotah and the East-India Company, relative to the succession, a.d. 1817. Kotah was the scene of the murder of Major Burton, of the 40th Bengal infantry, on the 15th of October, 1837, during the mutiny, when his two sons also were put to death, and the Residency was plundered and burned. On the 30th March, 1836, General Roberts assaulted the town of Kotah with complete success, and comparatively trifling loss.

Kotiah (Battle).—Lieutenant Marshall, at the head of 900 sepoys and 60 horse, defeated 4,000 Beloochees, posted among the hills of Kotiah, in Scinde, Dec. 1, 1840.

Koulenfscha (Battle).—The Russians, after a desperate contest, in which victory wavered from one side to the other, defeated the Turks in the valley of Koulefscha, June 11, 1829.

Kousada (Battle).—The Mongols defeated the sultan of Iconium at Kousadas, a.d. 1244.

Koutcho-Vainardji (Bulgaria).—A treaty of peace between Russia and Turkey was concluded at this village, on the Danube, July 10, 1774 (O.S.). It was confirmed by the leaders of the armies, July 15. By an edict of Catherine II., March 19, 1775 (O.S.), fixing a day of thanksgiving for the re-establishment of peace, the ratifications were said to have been exchanged at Constantinople Jan. 13, 1775 (O.S.). The Crimea was declared independent, and the free navigation of the Black Sea guaranteed. It is often called the treaty of Kainardji.

Kowno (Russia) was reached by the invading army of Napoleon I., June 23, 1812, and taken possession of by the advanced guard the following morning. The Russian commander Platoff captured 3,000 French soldiers here Dec. 12, and the miserable remnant of the "Grand Army" commenced their retreat from this point Dec. 13.

Krasova (Wallachia).—The Russians suffered a defeat from the Turks near this town, Sept. 26, 1828. Here their army commenced its retreat from Turkey, April 24, 1854.

Krasnoi (Battle).—The Russians gained an important victory over the French army under Napoleon I., near this town, in Russia, Nov. 17, 1812. Not less than 6,000 prisoners fell into the hands of the conquerors, together with part of the emperor's archives.

Kremlin (Moscow) was erected as a palace by the grand-duke of Russia a.d. 1367, and fortified in 1492. Napoleon I. reached the new palace, built in 1743, Sept. 14, 1812. He remained here till the 16th, when the conflagration reached the Kremlin, and it was soon reduced to ashes. Another palace was built upon its site in 1816.

Kreutzbach (Prussia).—This town was stormed by Gustavus Adolphus a.d. 1632. The French drove the Austrians from this place Nov. 30, 1795.

Kroia, or Kroia (European Turkey).—Amurath II. led two expeditions on a large scale against this town a.d. 1449 and 1450, and they were both unsuccessful. The Turks were repulsed in another attempt in 1477. By a treaty signed Jan. 26, 1797, the Venetians ceded Kroia to the Turks.

Krotzea (Battle).—The Russians were defeated by the Turks at this place July 22, 1739.

Kunobitza (Battle).—John Humiades defeated the Turks at this place, in the Balkan, Dec. 24, 1443.

Kurdistan (Asia).—The ancient Cordyene or Gordyene, a district inhabited by the wandering tribes of the Carduchi. Originally subject to Persia, it was, in the time of Alexander the Great, annexed to Syria. The Parthians conquered it in the 3rd century before Christ. Lucullus passed the winter here b.c. 68, and Pompey annexed it to Rome b.c. 64. It again passed under the dominion of the kings of Persia, from whom it was wrested by Galerius, a.d. 298. It was restored to Chosroes by Jovian, by the treaty of July, 363, and it afterwards fell to the caliphs of Bagdad. In 1233 Kurdistan was conquered by the Mongols, and in 1388 by the Tartars under Tamerlane. The greater portion of the country was conquered by the Turks in 1515, Persia retaining only about a fourth. The Kurds remained in a state of insubordination. They massacred the Nestorian Christians in 1846, destroying sixty-seven towns and villages. The sultan dispatched an army into Kurdistan in 1846, when the murderers of the Christians were punished, and the country was reduced to subjection.

Kurile Isles (Pacific Ocean).—This group of twenty-six islands was first discovered by the Russians, a.d. 1713. Five of the islands were known in 1720, and the discovery of the whole archipelago was completed in 1778. Captain Golovnin, of the Russian navy, was sent to survey them in 1811. The Russians formed a settlement on one of them, called Urup, in 1828, and the three southernmost islands of the group are occupied by the Japanese.

Kurrachee (Hindostan).—This seaport town of Scinde was bombarded and taken by the British, Feb. 3, 1839. It is celebrated for its pearl-fishery.

Kusten (Prussia).—This strongly-fortified town, on the Oder, was besieged Aug. 15, and burnt by the Russians Aug. 22, 1758. The battle of Zorndorf, near Kustrin, was fought between the Prussians and...
and the Russians Aug. 25, 1758. It lasted from nine in the morning until seven at night, and neither side could boast of having obtained a victory. The town was speedily rebuilt by Frederick the Great. It was taken by the French in 1806, and occupied by them till March 30, 1814, when it surrendered to the allies. The fortifications have been considerably strengthened since the peace of 1815.

L.

LA L A N D (or L O L L A N D (Sea-fight).—The combined Dutch and Swedish squadrons defeated the Danes off this island in the Baltic, A.D. 1644.

L A R E N T O (Battle).—The Greeks sustained a defeat from the Normans, near this river, in Italy, A.D. 1041.

L A B O U R (Festival of).—The annual celebration of this festival was fixed in the French Revolutionary calendar of 1793 to take place on the 19th of September.

L A B O U R E R S are defined as servants in agriculture or manufactures, not living within the master's house. The Statute of Labourers, 25 Edw. III. st. 1 (1350), made various regulations respecting wages, and the penalties incurred by refractory servants, and prohibited labourers from moving from one county to another under pain of imprisonment. Hallam (Middle Ages, of ch. 2) remarks on this subject: "The Statute of Labourers in 1350 fixed the wages of reapers during harvest at threepence a day without diet, equal to five shillings at present; that of 23 Hen. VI. c. 12, in 1444, fixed the reapers' wages at fivepence and those of common workmen in building at threepence-halfpenny, equal to 6s. 3d. and 4s. 6d.; that of 11 Hen. VII. c. 22, in 1496, leaves the wages of labourers in harvest as before, but rather increases those of ordinary workmen. The yearly wages of a chief hind or shepherd by the act of 1444 were £1. 4s., equivalent to about £20; those of a common servant in husbandry 15s. 4d., with meat and drink: they were somewhat augmented by the statute of 1496." The same writer comes to the conclusion, that the labouring classes, especially those engaged in agriculture, were better provided with the means of subsistence in the reign of Edward III. or of Henry VI. than they are at present. Conspiracies of workmen to increase their wages or interfere with the prescribed hours of work, were made punishable by fines and the pillory, by 2 & 3 Edw. VI. c. 15 (1548). Statutes relating to hiring, wages, keeping, &c., of labourers, were amended by 5 Eliz. c. 4 (1562), which prohibited masters from discharging their servants, or servants from quitting their employers until the term of service agreed upon had expired. It also placed the regulation of the amount of wages in the hands of the justices, sheriffs, mayors, &c., and compelled employers and employed to abide by the appointed rates under severe penalties. In harvest time artificers were compelled to work, under pain of the stocks, and single women aged between twelve and forty years were at all times liable to be sent to service.—The Labourers' Dwellings Act, 18 & 19 Vict. c. 132 (Aug. 14, 1855), was passed to facilitate the erection of healthy and convenient houses for the working classes by public companies.

L A B R A D O R (North America) was discovered A.D. 1497, by Sebastian Cabot, Cortereal, a Portuguese, who landed here, in 1500. The Moravians formed a settlement in 1771, with a view of Christianizing the natives. Martin Frobisher, in 1576, was the first Englishman who made a voyage to Labrador.

L A B U A N (Indian Archipelago).—This island was ceded to the English government in 1846, and Sir James Brooke took possession Oct. 28, 1848.

L A B U N N U M, or G O L D E N C H A I N T R E E, was brought to this country from the Alps before A.D. 1596.

L A B Y R I N T H of Arsinoë, near Lake Morses, in Egypt, said to have been constructed by the kings of Egypt, consisted of 3,000 chambers. Herodotus states that it was used as a burial-place for the kings of Egypt. Lepsius explored it in June, 1843.—The labyrinth of Crete, near Cnosus, the retreat of the fabled Minotaur, is ascribed to Daedalus.—The labyrinth of Lemnos, described by Pliny, was said to have been supported by 150 columns. Dupuy, in vain endeavoured to find some trace of this labyrinth in 1801.—The labyrinth near Chiarum, in Etruria, now Chiusi, is supposed by some authorities to be the tomb of Porsenna, who lived n.c. 508.—The labyrinth at Hampton was erected in the 17th century.

L A C C A D I V E I S L A N D S (Indian Ocean) were discovered by Vasco de Gama, A.D. 1499.

L A C E.—Beckmann is of opinion that lace worked by the needle is much older than that made by knitting. The art probably originated in Italy. The importation of lace into England was prohibited by a French law in 1483. Beckmann asserts that the knitting of lace is a German invention, due to Barbara Uttnann, of St. Annaberg, and that it was found out before 1561. The oldest pattern-book for making point-lace appeared at Frankfort-on-the-Maine in 1583. It was written by Nicholas Basseus. Some Flemish refugees introduced the manufacture of pillow-lace into Buckinghamshire about 1626. Hammond, a framework knitter of Nottingham, first attempted to apply the stocking-frame to lace-making in 1768, and after undergoing various improvements, the process was brought to perfection by John Heathcoate, who patented his bobbin-net machine in 1809. Jacquard's apparatus was applied to it in 1839. Frost introduced the point machine in 1777. Morley's double locker machine was brought out in 1824.

L A C E D É M O N (Greece).—The ancient name of Laconia, and of its capital city, Sparta (q. e.).
LAON, or LACONICA (Greece).—This country was originally inhabited by the Leleges, whose kingdom was founded about B.C. 1616. According to tradition, Lacedaemon, the king of Laconia, married Sparta, the daughter of his predecessor, B.C. 1400, and founded a city, which he named after his wife, while his kingdom was known by his own name. The Dorians of Sparta had made themselves masters of the whole of Laconia by the middle of the 8th century. They waged war against the Dorians in Messenia from B.C. 743 to 724, and from B.C. 685 to 668, and the country was annexed to Laconia. (See Sparta.)

LACTEAL VESSELS.—Gaspar Asellius, professor of anatomy at Pavia, in dissecting a dog, July 23, 1622, discovered these vessels. He announced the fact in 1627. John Wesley gave the first delineation of the lacteals from the human subject in 1634. Pecquet discovered the common trunk of the lacteals and lymphatics in 1647; and John Laffeldt, anatomist, discovered the distinction between the lacteals and the lymphatics in 1650, and published his discovery in 1652.

LADAK (Asia).—This province of Thibet was seized by Gholab Singh, ruler of Cashmere, A.D. 1835, and still forms part of his dominions.

LADIS (Sea-fight).—The Persians defeated the Ionians off this island, near Miletus, B.C. 494.

LADRON, OF MARianne ISLANDS (Pacific Ocean).—This group was discovered by Magelhaens, A.D. 1520. The Spaniards formed a settlement in the middle of the 17th century. Anson visited them in 1742.

LADY.—The title properly belongs to the wives of knights and of all superior degrees except the wives of bishops. The term is derived from the Saxon hlaef dig, loaf-day, because it was formerly the custom for the mistress of the manor to distribute bread to her poorer neighbours at stated intervals. Fosbroke (Antiq.) remarks: "The ladies of knights and baronets were called Dominae (whence Dame as a title of honour), and also Militesse, Knightesses, being sometimes so created by knights by a blow upon the back with a sword, and the usual ceremonies. (See Women.)"

LADY-DAY, OF THE ANNUNCIATION.—The 25th of March, the day on which the festival of the Annunciation of the Virgin Mary is held by the Church, received the name of Lady-Day in consequence of its being sacred to Our Lady. The feast is of great antiquity, dating, according to some authorities, from A.D. 350, and according to others, from the 7th century. Lady-Day was anciently considered the first day of the year. The 1st of January was adopted as the beginning of the year in France in 1564, in Scotland in 1558, and in England in 1747. The allied army lost 6,000 men and sixteen guns, whilst the loss of the French amounted to 10,000 men. Louis XV., who witnessed the battle, remarked: "The English have not only paid all, but fought all."

LA FRATTA (Battle).—The Pisans were defeated by the Sicilians in this battle, A.D. 1135.

LAGOS (Africa).—This stronghold of the slave-trade was bombarded by a British squadron Dec. 26 and 27, 1851. The forces landed and took possession of the town, which had been deserted by the enemy, Dec. 28, 1851.

LAGOS (Sea-fight).—The English fleet, commanded by Admiral Boscawen, defeated the French fleet, with great loss, in this bay, near the seaport of the same name, in Portugal, Aug. 18, 1759.

LAGOSTA (Adriatic).—An English force of 300 men landed on this small island, then in possession of the Turks, Jan. 21, 1719. They made preparations to besiege the enemy's principal fort, which capitulated Jan. 29, when the whole island was surrendered to the English.

LA HOGUE (France).—Edward III. landed at this place, near Cherbourg, July 10, 1346. A combined Dutch and English fleet engaged the French fleet, commanded by Tourville, off La Hogue, May 19, 1692. The enemy escaped in a fog, but chaise was given, and the conflict was renewed May 21, when nearly the whole of the French squadron was destroyed.

LAHORE (Hindostan), the capital of the Punjab, was taken by Sultan Baber, and became the residence of its Mohammedan conquerors A.D. 1520. It was captured in 1758, by "Jassa the Kalal," as he styled himself on a medal struck in commemoration of the event; and by Shah Zeman, king of Cabul, in 1798, who bestowed it upon his brother Runjeet Singh, in 1799. A present of horses from King William IV. arrived here July 17, 1831. A revolution occurred at Lahore in 1844. A brigade of British troops, under the command of Sir Hugh Gough, occupied the citadel Feb. 22, 1846, and a treaty, placing the Punjab under English protection, was signed March 9, 1846. It was, with the Punjab, annexed to British India, March 9, 1849. During the mutiny, Major Spencer and two native officers were murdered here in July, 1857.

LA JAULNAIS (Treaty).—The republicans and the royalists in La Vendée entered into a treaty at La Jaunais, for the termination of the civil war, and the pacification of the west of France, in 1785.

LAKE REGILLUS (Battle).—Fought between the Latins and the Romans, according to the traditional account, B.C. 499, the former being defeated. The exiled Tarquin was in the Latin army. Castor and Pollux, the twins represented in the popular lays of Rome as appearing fighting in the Roman ranks, under the form of two gigantic youths, mounted on white steeds. This
power to confer the degree of B.D., was obtained in August, 1852.

LAMPS are said to have been invented by the Egyptians; and Herodotus notices a feast of lamps held annually in Egypt. The Jews made use of lamps in public festivals and religious ceremonies. The Greeks and Romans made them of terra-cotta, bronze, and also of gold and silver. They were kept burning in sepulchres, a practice adopted by the Christians, and which gave rise to the fiction respecting perpetual lamps. Numbers of lamps, of rich and elaborate workmanship, have been found in the ruins of Herculaneum, destroyed Aug. 24, A.D. 79. In the 14th century they were made of glass, and were much used in England. They were introduced into Ireland in 1375. The Argand lamp was invented in 1789, and an endless variety has since sprung into existence.

LANARK (Scotland) was the site of a Roman encampment, of which traces are still to be found. Here the states of the realm were convoked by King Kenneth, A.D. 978. It was a royal burgh when Malcolm II. came to the throne, A.D. 1008. The Covenanters published their testimony at Lanark in 1682.

LANCASHIRE (England).—The south of Lancashire is said to have been inhabited by the Segantii, or Setantii, i.e. "dwellers in the country of water." It formed part of the Northumberland from A.D. 547 to 926. It contained several traces of Roman roads and stations. The successors of William, earl of Ferriers, who took the title of earl of Derby, held the office of lords of the county till 1365, when their lands were forfeited and bestowed upon Edmund, son of Henry III., who became first earl of Lancaster. Riots occurred in many parts of Lancashire in the spring of 1826.

LANCASTER (Duchy of).—The dukedom of Lancaster was created by Edward III., in favour of Henry Plantagenet, March 6, 1351, and was bestowed upon his son, John of Gaunt, Nov. 13, 1362. It was made a county palatine. The duke was to have jura regalia, and power to pardon treasons or outlawries, and make justices of the peace and justices of assize within the county. The lordship of Ripon was annexed to it by 37 Hen. VIII. c. 16 (1646); and the revenue having declined, other lands were annexed to it by 2 & 3 Phil. & Mary, c. 20 (1555). The courts of the duchy of Lancaster were instituted by Edward III. in 1376. The management of the revenues was entrusted to them. Henry Bolingbroke was duke of Lancaster on his accession to the crown as Henry IV., Sept. 30, 1399. In the first year of his reign he procured an act of parliament, ordering that the duchy of Lancaster, &c., should remain to him and his heirs for ever. It was declared forfeited to the crown in 1461, and was vested in Edward IV. and his heirs, kings of England, for ever.

Lancaster (England), the Roman Longovicus, according to the "Monumenta
Britannica," received a charter from King John (A.D. 1199—1216), with increased privileges from Edward III. The castle, now a gaol, was originally built in the 11th century. The army of the Pretender occupied it two days, Nov. 6—9, 1715. It was taken by Prince Charles Edward Nov. 24, 1745. The railroad to Preston was opened June 30, 1840, and the railroad to Carlisle Dec. 16, 1846.

LANCASTER (Pennsylvania) was founded A.D. 1730, and incorporated in 1818. The sessions of Congress were removed here on the capture of Philadelphia in 1777. It was the chief town of the state from 1799 to 1812, when that dignity was transferred to Harrisburg. Franklin College was established in 1787.

LANCASTERIAN SCHOOLS.—Joseph Lancaster opened his first school at the age of eighteen, in the Borough Road, London, in 1798. He adopted Dr. Bell's monitorial system, which he brought to such perfection that in 1802 he was able to teach 250 boys, with no other assistance than that afforded by the senior pupils. Lancaster published numerous pamphlets in recommendation of the plan, and obtained influential friends, by whose assistance he founded the British and Foreign School Society in 1805. In 1806 he obtained an interview with George III., who immediately subscribed £100 a year towards the extension of the system; and in 1808 he resigned his school into the hands of the society, in consideration of which he received the importance of a public institution. Owing to imprudence in the conduct of his affairs, Lancaster was compelled to emigrate to America in 1818; and he died at New York, in very reduced circumstances, Oct. 24, 1838.

LANCASTER SOUND (Arctic Sea) was discovered by Bylot and Baffin, July 12, 1816, and named after Sir James Lancaster.

LANCASTRIANS AND YORKISTS.—The supporters of Henry VI., of the house of Lancaster, and of Edward, duke of York, afterwards Edward IV., who contended for the crown of England A.D. 1455—1461, were respectively known by these titles. The struggle is also designated the War of the Roses, the red rose having been the emblem of the Lancasterian, and the white of the Yorkist party.

LAND.—The provisions usually inserted in acts authorizing the taking of lands for public undertakings were consolidated by the Lands Clauses Consolidation Act, 8 Vict. c. 18 (May 8, 1845).

LANDAU (Bavaria).—This town, founded by Rodolph of Habsburg, was made a free city of the empire in the 14th century. The fortifications were commenced by Vauban in 1680, and the town was almost entirely destroyed by fire in 1668. Louis of Baden invested Landau June 16, 1702, the citadel surrendered Sept. 9, and the whole town was captured Sept. 10. Tallard besieged it in 1703, and completed its reduction Nov. 14. Marlborough obtained possession of it Nov. 23, 1704. The Austrians expelled the French in 1743. It was frequently assailed towards the close of the 18th-century, and it was besieged in 1793 by the Austrians and Prussians, who were eventually compelled to abandon the undertaking. It was ceded to France by the treaty of 1814, but was restored to Germany by that of 1815.

LANDED ESTATES COURT.—This court was erected by 21 & 22 Vict. c. 72 (Aug. 2, 1858), to facilitate the sale and transfer of lands in Ireland. The sittings were appointed to be held in Dublin, under the presidency of three judges, who were ineligible as members of parliament. The authority of the court commenced Nov. 1, 1858.

LANDEN (Battle).—At this village, in Belgium, William III. was defeated by Marshal Luxembourg, with a loss of 12,000 men, July 19, 1693 (O.S.). It is sometimes called the battle of Neerwinden.

LANDGRAVE.—This title originated in the 10th century, and was first used in Alsace. Albert III. was the first of the Habsburg family who styled himself Landgrave of Alsace. The margraves of Thuringia assumed the title in the 11th century. The collateral branch of the house of Hesse took it in 1263.

LANDRECY (Flanders).—Francis I. captured this town in 1543, the emperor Charles V. failed in an attempt to recapture it during the same year, and Prince Eugene besieged it but without success in 1712. The prince of Orange invested it April 16, 1794, and it fell to him April 30. The French retook it July 17, 1794.

LANDSHUT (Bavaria).—The Prussians were defeated by the Austrians near this town, June 23, 1760. The attack was made in the dead of night, and the result was a complete victory. The university of Ingolstadt, removed here in 1800, was transferred to Munich in 1826.

LAND-TAX.—The Danegelt (q. v.) was a species of land-tax. The rate now known by the name was first levied by William & Mary, c. 1 (1692), to defray the expenses of the war against France. The original rate was three shillings in the pound on the rentable, and the tax was continued every year, most frequently at four shillings in the pound, until it was made perpetual by 3 Geo. III. c. 60 (June 21, 1798). The sum fixed by this act as the amount of the land-tax was £2,037,627. Is. 0d. The provisions of several acts for the redemption of the land-tax were consolidated by 42 Geo. III. c. 116 (June 26, 1802).

LANFANAN (Battle).—Earl Siward defeated Macbeth, king of Scotland, at this place, in Scotland, July 27, 1054.

LANGE (France), the ancient Andematunnun or Lingonum Civitas, was occupied and made the head-quarters of the Prussian and Russian armies during the campaign in France, A.D. 1814. (See Lingonum Civitas.)

LANGSIDE (Battle).—Mary, queen of Scots, having escaped from Lochleven, May 2, 1567, raised some troops, which were
defeated at Langside, near Glasgow, May 13, 1567.

**Language.**—The origin of language is veiled in obscurity. Some writers contend that it was revealed from heaven; others that it is the fruit of human invention. The latter opinion was prevalent amongst the Greek and Roman philosophers and authors. Hobbes says: "The first author of speech was God himself, that instructed Adam how to name such creatures as he presented to his sight (Gen. ii. 19), for the Scripture goeth no further in this matter. But this was sufficient to induce him to add more names, as the experience and use of the creatures should give him occasion, and to join them in such manner by degrees, as to make himself understood; and so by succession of time so much language might be gotten as he had found use for, though not so copious as an orator or philosopher has need of." The French, Spanish, and Italian languages are derived from the Latin. Francis I. ordered the French language to be used in all public acts, but the change was not fully effected until 1629. Hallam asserts that "the industry has hitherto retrieved so much as a few lines of real Italian, till near the end of the 12th century. The transformation of Anglo-Saxon into modern English was gradual. The Anglo-Saxon Chronicle closes with a notice of the events of A.D. 1155. The French language, which was spoken amongst the higher classes in England from the Conquest, fell into disuse in the reign of Edward III., who banished Norman French from the courts of law in 1362. According to a recent estimate, there are 3,014 languages and general dialects in the world; viz. 567 in Europe, 967 in Asia, 226 in Africa, and 1,264 in America. Amongst the most celebrated linguists may be mentioned Arias Montanus, the Spaniard who completed the Antwerp Polyglot Bible in 1569; and D'Oil, d'Oui, the admirable Crichton, who died in his twenty-third year in 1584; both of whom are said to have known from twelve to fifteen languages. Sir William Jones, born in London, Sept. 28, 1746, is believed to have known twenty-eight languages; Joseph Caspar Mezzofanti, born at Bologna, Sept. 17, 1774, whom Byron termed a "walking polyglot, a monster of languages, and a Briauss of parts of speech," is said to have known a hundred and twenty languages. Though this statement may be exaggerated, he was conversant with above fifty, and was the greatest linguist the world ever knew. Barthold George Niebuhr, born at Copenhagen, Aug. 27, 1776, was in 1807 acquainted with twenty languages, and afterwards increased the number.

**Languedoc (France),** under the Romans, formed a portion of Gallia Narbonensis, and enjoyed the freedom of Italy. In the Middle Ages it was known as Septimania, from its seven cathedral churches. It was ceded by Honorius to the Goths A.D. 409. The Saracens, who had succeeded them, were driven out by Charles Martel in 725. In the 11th and 12th centuries the Albigensian opinions prevailed in Languedoc. Part of Languedoc was ceded to France in 1229, and the remainder was annexed in 1270. Languedoc had its own provincial assembly, and retained the right of regulating its own taxation till 1788. Above 100,000 Huguenots, of whom about 10,000 perished at the stake, were put to death after the revocation of the edict of Nantes. The inhabitants of Languedoc took up arms on the sudden return of Napoleon I. from Elba in 1815.

**Langue d'Oc and Langue d'Oil, or d'Ou.**—In the 11th century two languages were spoken in France, the former the Provençal, or the Romance, in the south, and the latter the Langue d'Oil, or d'Ou, in the north. The use of the Langue d'Oc began to decline towards the end of the 13th century.

**Lansdown (Battle).**—The royalists defeated Sir William Waller at this place, near Bath, July 5, 1643.

**Lansquenets, or lance-men, from Lansquenete, founded by Maximilian I. (1493—1519): they played an important part in the European wars of the sixteenth century.

**Lanterns, or Lanthorns,** were made of horn by the Greeks and Romans; sometimes skin was used, to allow of the transmission of the light. Aldhelm, bishop of Sherborne, mentions a glass lantern, A.D. 703. Asser, in his life of Alfred (A.D. 871—901), relates that this king ordered a lantern to be constructed of wood and white ox-horn, which, when planed thin, is almost as transparent as glass. Lanterns for military purposes are said to have been devised by the emperor Commenus in 1180.

**Lanthanum.**—This metal was discovered by Mosander, who gave it this name because it had been so long concealed, A.D. 1839.

**Laocoon.**—This celebrated Greek statue was the production of the Rhodian sculptors, Agesander, Polydorus, and Athenodorus, who flourished in the reign of Titus, A.D. 79 to 81. It was found among the ruins of the baths of Titus at Rome, A.D. 1506, and is preserved in the Vatican. The subject of the group is the death of the Trojan priest Laocoon and his two sons by serpents, sent against them by Minerva (Aeneid, ii. v. 200).

**Laodicea, or Laodicea (Syria),** formerly called Diospolis and Rhoas, was rebuilt, and named after his wife Laodice, by Antiochus Theos, B.C. 260. To the church of this city one of the seven epistles (Revelations iii.) was addressed, A.D. 96. It suffered frequently from earthquakes, and was nearly destroyed by one in 494. It was captured by the crusaders in 1198, and by the sultan of Egypt in 1287. It was called Laodicea ad Lycum, to distinguish it from Laodicea Combusta, built by Seleucus I., and named after his mother Seleucia.
LAON (Combats).—Napoleon I. sustained a check at this place, in the north of France, from the allies, under Blucher, March 9 and 10, 1814. The French lost 6,000 men and 46 cannon in the conflict, and were compelled to retreat to Soissons. The allies lost about 4,000 men.

LAON (France).—This ancient town of France is believed by some to be identical with the Bibrae spoken of by Cassar. It received Christianity in the 3rd century, and was the scene of an ecclesiastical council in 483. The fine Gothic cathedral was consecrated Sept. 6, 1114. In 1419 Laon was taken by the English, who restored it to the French in 1429. Henry IV. of France took it after several engagements in 1594, and erected a citadel and other fortifications. The celebrated leaning tower, which was displaced by an earthquake in 1696, was removed in 1832.

LAPLAND (Europe).—This, the most northern country of Europe, is first spoken of in the works of Saxo Grammaticus, who flourished in the 12th century, and it was very imperfectly known even in the 16th century. Lapland was originally divided into Russian, Danish, and Swedish Lapland; but the three districts were united in 1814. Admiral Little explored the northern coasts of Lapland in 1822 and 1823.

LARGS (Battle).—At this place, on the Clyde, Alexander III. of Scotland defeated the Norwegians, led by their king Hacon, Oct. 3, 1263.

LARISA (Turkey), the Turkish Yenicther, the capital of Thessaly, is supposed to have been founded by Acrisius, b.c. 1344, and took part with the Athenians in the Peloponnesian war, b.c. 431–404. Antiochus made an unsuccessful attempt to take it b.c. 191, and Boethemund failed in a similar effort A.D. 1093.

LA ROCHE ABEILLE (Battle).—The Roman Catholic forces were defeated at this place, in France, by the Protestants, under Coligny and Henry de Bearn in 1598.

LA ROCHE DARIEN (Battle).—Charles of Blois, duke of Brittany, was defeated and made prisoner at this place, in France, by Jane of Montfort, June 20, 1347.

LA ROTHÈRE (Battle), fought at this place, in France, between the French, commanded by Napoleon I., and the allied Austrian, Prussian, and Russian army under Blucher, Feb. 1, 1814. The contest was waged with great heroism on both sides; but the French were at length compelled to withdraw, leaving the field of battle in the possession of the allies. The French lost 6,000 men, and 73 pieces of cannon.

LASWAERE (Battle).—A desperate encounter between the British, commanded by Lord Lake, and the Mahtratas, occurred at this village, near Delhi, in Hindostan, Nov. 1, 1803. The former were victorious.

LATAKIA, or LADIKIYEH (Syria), the ancient Laodicia ad Mare, was founded by Seleucus Nicator, about b.c. 300, and named after his mother. Dolabella took refuge here from Cassius, and was the cause of much destruction to the city a.d. 43. The remains of an aqueduct, built by Herod the Great about b.c. 10, are still to be seen; and a triumphal arch, believed to have been erected in honour of Septimius Severus, about A.D. 200, is in a state of great perfection. It was nearly destroyed by an earthquake May 16, 1796.

LATERAN (Rome).—This name, derived from the old Roman family of the Laterani, whose chief was executed by Nero (a.d. 54–69), was applied to their palace, presented by Constantine I. to the pope. Gregory XI., on restoring the seat of the papacy from Avignon to Rome, in 1377, took up his abode at the Vatican. The church of St. John of Lateran, built by Constantine I., is celebrated for the councils held in it Oct. 5–31, 649; Nov. 1, 864; in August, 900; Feb. 13, 1111; March 18–23, 1112; March 5, 1116; March 18 to April 5 (ninth general), 1123; April 20 (tenth general), 1139; March 5–19 (eleventh general), 1179; Nov. 11–30, 1215; and May 3, 1512, to March 16, 1517. Every newly elected pope takes possession of this church in great state, and bestows his blessing upon the people from its balcony. The greater part of the palace was destroyed by fire in 1306. A new palace, adjoining the church, was built by Sixtus V. in 1586.

LATHAM HOUSE.—The countess of Derby defended this place against the parliamentary forces from February until May, 1644, when it was relieved by Prince Rupert. The parliamentary forces assailed and captured it Dec. 4, 1645.

LATHE.—Diodorus Siculus attributes the invention of this instrument to a nephew of Dædalus, named Talus, about b.c. 1240; but Pliny states that it was first used by Theodore of Samos, about b.c. 600. The classical authors make frequent mention of the lathe.

LATINS, OR LATINI, signified originally the inhabitants of Latium (g.v.), which, according to the legend, received a band of emigrant Trojans under Æneas, shortly after the Trojan war. The aborigines of Latium were at that time ruled by a king called Latinus, and after his death they formed with the Trojan colony one people, under the name of Latin. For some time the Latins waged war against Rome; but were finally subdued b.c. 338, from which period, as a separate nation, the Latins disappear from history. The Roman franchise was bestowed upon all people of Italy who were allies of Rome, b.c. 91, and thus the last distinction between the Latins and the Romans was obliterated. The term was afterwards adopted by the Romans themselves.

LATITAT.—This writ, formerly employed in personal actions in the King’s (or Queen’s) Bench, was abolished by 2 Will. IV. c. 39 (May 23, 1832). The name was derived from a supposition that the defendant lurked and was hid, and could not be found in the county of Middlesex (in which the court is held), to be taken by bill, but had gone into some other
counties, to the sheriff of which this writ was directed, to apprehend him there.—Wharton.

LATTITUDE AND LONGITUDE.—Eratosthenes, the librarian of Alexandria (b.c. 225—194), made some advance towards an accurate measurement of latitude, and, after him, Hipparchus, b.c. 182, who showed how longitude might be determined by attention to eclipses of the sun and moon. The principles laid down by Hipparchus were successfully applied by Ptolemy, a.d. 140, in his great geographical work. A reward of 1,000 crowns was offered by the king of Spain, a.d. 1598, for the discovery of a method of determining longitude; and about the same time the States-general of Holland offered 10,000 florins for the same object. The British government offered £20,000 for a like purpose in 1714, and £5,000 for a chronometer to keep time within certain limits. Harrison, after much delay and many disputes, gained the prize for his timepiece in 1767. Rewards of various amounts have been granted from time to time by parliament for improved timepieces. The act of 1774 was repealed by 9 Geo. IV. c. 66 (July 15, 1828). A method of finding the longitude by means of the electric telegraph was brought to perfection by Airy in 1847.

LAIIUDINARIANS.—This term was used about the close of the 17th century to designate certain divines who endeavoured to act as mediators between Episcopalianism and Presbyterianism. Hales, Chillingworth, and Tillotson belonged to this party. In the reign of Charles II. (1660—1685) the Latitudinarians attained the highest positions in the Church.

LATIUM (Italy).—This country of central Italy derived its name from the city Latium, which was founded by King Latinus, n.c. 1240. Æneas settled here with a colony of Trojans n.c. 1181, and the new colonists and aboriginal inhabitants, having united into one nation under his government, were known as the Latins. They formed a confederacy of towns, with Alba Longa (q.v.) at their head; and after the destruction of that town by the Romans, n.c. 665, the whole territory was reduced to subjection. The Latins rebelled n.c. 502, and a treaty was concluded between them and the Romans n.c. 483, by which their independence was acknowledged, and an alliance concluded between the two powers. In consequence of the growing power of the Romans, however, the Latins assisted the Campanians in the war of n.c. 340, and shared in the defeat at the foot of Mount Vesuvius. Furius Camillus finally defeated them at the battle of Pedum, n.c. 338, and the confederacy was subsequently broken up.

LAIT-DAY SAINTS, OR MORMONITES.—This sect was founded at Palmyra, in North America, by Joseph Smith, Sept. 22, 1827, the day on which, according to his own statement, he came into possession of the Golden Bible, or the Book of Mormon, published at Palmyra in 1830. The first edition that appeared in Europe was at Liverpool, in 1841. The first conference of the sect was held at Fayette, June 1, 1830. They removed to Kirtland, in Ohio, soon after. In 1831 they founded the city of Zion, in Missouri, but were expelled the state, and took refuge in Illinois in 1833, whereupon they built the "holy city" of Nauvoo. The foundation of the Mormon temple was laid April 6, 1841. Smith was shot by a mob which broke into the prison of Carthage, where he was confined, June 27, 1844. In 1847 the Mormons, expelled from Illinois, undertook a pilgrimage to the Great Salt Lake Valley, which they reached July 24, 1847. The territory of Utah was admitted into the Union Sept. 19, 1850. An expedition was sent against the Mormonites from the United States in 1837, for the purpose of reducing them to subjection. An arrangement was, however, effected without a collision. The first Mormon mission to England was despatched in 1837, and in five years many converts had been made.

LAUDANUM is mentioned in a manuscript diary, October, 1601. (See OPium.)

LAUREL.—The common laurel was brought into this country from the Levant, before a.d. 1629; the Portugal laurel from Portugal before 1648; and the Alexandrian laurel from Portugal before 1718. The royal bay-tree was brought from Madeira in 1665, and the glaucous laurel from China in 1806.

LAURENTIAL.—These festivals were instituted at Rome about B.C. 621. They were held in honour of Acca-Larentia, nurse of Romulus and Remus, or of a courtezan who flourished in the reign of Aeneus Martius. They commenced Dec. 23.

LAURUSINUS.—This shrub was brought to England from the south of Europe before a.d. 1596.

LAUSANNE (Switzerland), the capital of the canton Vaud, was a Roman station. The cathedral, founded in the 10th, was not completed until the 13th century. Rodolph I. had an interview here with Gregory X. Oct. 6, 1275. In the church of St. Francis a council was held, April 16, 1449. The university was founded in 1536. A memorable controversy, which terminated in the adhesion of the north-western portion of Switzerland to the Reformation, took place in the cathedral in 1536. The academy was founded in 1537, and printing is said to have been carried on here in 1556. Gibbon selected it as a residence, a.d. 1783. The French seized Lausanne Jan. 28, 1798.

LAUTULAE (Battle).—The Samnites defeated the Roman army, commanded by Fabius, at this pass, between Tarracina and Fundi, B.C. 315.

LAVAL (France).—This town was gradually formed round an old castle, destroyed by the Northmen in the 9th century. It was rebuilt, and was captured by Lord Talbot A.D. 1466, but the French regained possession in the following year. The Vendéans captured it in 1793, and in October of that...
year, their leader, Larochjaquelein, defeated the republican forces at a short distance from the town. The ancient church was built in 1840.

**La Valetta (Malta).—**This city was commenced by Sir John de Valette, grand master of the Knights of Malta, A.D. 1566, and finished Aug. 18, 1571. It capitulated to the French fleet under Admiral Brueys, June 12, 1798, when Malta and its dependencies were ceded to the republic. In the month of September following, the inhabitants rose in revolt, and the French garrison retired within the walls of the fortress, where they were blockaded by the English, and were compelled by famine to surrender, Sept. 5, 1800.

**Lavair (France), one of the strongholds of the Albigenses, was captured by Simon of Montfort, A.D. 1211, when a wholesale slaughter ensued.**

**La Vendée (France).—**The inhabitants of this portion of France rose against the revolutionary party in 1791, and erected the standard of royalty March 10, 1793. Led by Larochjaquelein, the Vendeans stormed Thouars, taking 6,000 prisoners, May 15, and established the royalist ascendency July 15. So powerful did they become, that they formed three corps of 12,000 men each. The first, under Bouchamps, was called the army of Anjou; the second, under D'Elbee, was called the grand army; and the third, under Charette, was called the army of the marches or fens. Numerous reverses followed, and Marceau, with Tilly and Kleber, annihilated their army at Savenay, Dec. 22. The final pacification of the province was effected by the treaty of Lucon, Jan. 17, 1800, nearly 1,000,000 victims having fallen in the struggle. During the “Hundred Days” the inhabitants of this district again rose in support of the Bourbon cause, but their army was defeated at Croix de Vie in 1815.

**Lavender was introduced into England from the south of Europe before 1568 A.D. To lay in lavender was formerly a cant phrase for hoarding. The plant was considered an emblem of affection.**

**Lavish (Battles).—**The Austrians defeated the French in an attack upon their position near this river, in the Italian Tyrol, Nov. 1, 1796. The French gained a victory over the Austrians on the same river, March 20, 1797. The Tyrolese sustained a defeat here in 1809.

**Law.—**The earliest system of laws was perhaps that which Phoroneus introduced in Argos, B.C. 1807. The Jewish laws were promulgated by Moses, B.C. 1461. Lycurgus legislated for Sparta, B.C. 817; Draco for the Athenians, B.C. 621; and Solon B.C. 594. The civil or Roman law was founded on the Twelve Tables, B.C. 504, and amended by the Twelve Tables, B.C. 450 (see Codes). The ancient Britons were governed by certain fixed laws, which were framed by their chiefs and Druids, and Sir William Dugdale states that Malmutius Dunvallo, who began to reign B.C. 444, was the first British lawgiver. Ethelbert published a system A.D. 600, and Ina one in 692. Alfred arranged the common law (q.v.) in 886. Athelstan promulgated codes in 928, and Edgar in 970; and in 1065 Edward the Confessor consolidated the British, Saxon, and Danish laws into a single system, which was confirmed by William the Conqueror in 1070. Stephen's charter of general liberties was granted in 1136. Canon law (q.v.) was introduced into England in 1140, the Constitutions of Clarendon (q.v.) were established in 1164, and Magna Charta (q.v.) was granted in 1215. The English laws were much improved by Edward III., who has been called the English Justinian. Law pleadings were ordered to be in English in 1802, and in 1879 the civil law was superseded by the common law, except in the ecclesiastical courts.—The Incorporated Law Society was formed in 1523, and the building in Chancery Lane was erected in 1827. A charter of incorporation was granted Dec. 22, 1831, and the institution was formally opened July 4, 1832. A new charter was granted Feb. 26, 1845.

**Law's Bank (Paris) originated in the permission obtained by a daring speculator, named John Law, to establish a bank in Paris, May 20, 1716. It was dissolved by the regent, and merged into the Royal Bank, June 24, 1718. A patent, granting possession of the country of the Mississippi, was secured at the same time. It took the title of the Company of the Indies, and the mint of France was handed over to it July 25, 1719. The right of farming the whole of the public revenue was conceded to this company Aug. 27. In the month of November the shares were sold at sixty times their original price. It was ascertained, May 1, 1720, that the bank had issued notes representing a sum of one hundred and thirty millions of livres, and what was issued, reducing them in value one-half, May 21. Immediate ruin followed, and John Law resigned his office of comptroller-general May 29, 1720. Law died in poverty.

**Lawyers.—**Previous to the Norman conquest few persons were learned in the law, except clergymen, who were permitted to practise it without restraint until 1217, when Richard Poore, bishop of Salisbury, prohibited them from pleading in secular courts. (See Attorney, Barrister, &c.)

**Laybach (Austria), the ancient Rimona, was taken by the French, March 17, 1797, and again June 3, 1809. It was recaptured by the Austrians July 1, 1809. A congress was held here, attended by the emperors of Russia and Austria, and the kings of Prussia and Naples, Jan. 8, 1821. They signed a treaty, in which they engaged to oppose the revolutionary movement in Naples, Feb. 2, 1821. This treaty formed the subject of an animated discussion in both houses of the
LAW

LAW BROTHERS AND SISTERS.—Uneducated persons, admitted into the convents to assist in the harder kind of work. The practice commenced in the 11th century.

LAYER'S CONSPIRACY.—This conspiracy to seize the Tower, the Bank, and the Exchequer, and to proclaim the Pretender, was formed by a young barrister named Layer, Bishop Atterbury. Carte the historian, another non-juring clergyman, named Kelly, Plunkett the Jesuit, and others, in 1722. The papers of the conspirators were intercepted, and Kelly was arrested May 21. Layer and others were taken shortly afterwards. Atterbury was seized Aug. 24. A select committee was appointed to examine into the matter. Layer was found guilty, and executed at Tyburn, May 17, 1773. A bill of pains and penalties was passed against Atterbury, and it received the royal signature May 27.

LAZARETTO.—This name, applied to the buildings where crews and passengers of ships suspected of contagion perform quarantine, is derived from St. Lazarus, the patron saint of lepers. The first was established at Venice during the plague of 1422. By Geo. IV. c. 78, s. 18 (June 27, 1825), persons escaping from a lazaretto are liable to a penalty of £200.

LAZARITES.—This order of priests, founded by Vincent de Paul A.D. 1624, and charged with the care of the sick, was confirmed by Urban VIII. in 1631. They exerted much influence in France during the period immediately preceding the political changes of 1830.

LAZARO, St. (Battle).—The French and Spaniards attacked the Austrian and Piedmontese camp at St. Lazar, about two-and-twenty miles from Piacenza, at eleven o'clock, June 4, 1746. After a well-contested struggle of nine hours' duration, the French and Spaniards were compelled to retire, losing 6,000 killed, and nearly 9,000 wounded on the field of battle.

LAZI.—This Slavonian tribe inhabited Colchis, in Asia Minor, to which they gave the name of Lazica. They first appear in history A.D. 456, when their king, Gobazes, was defeated by the emperor Marcian. They were converted to Christianity in 522, and rebelled against the Romans in 542, but returned to their allegiance in 549. In 550 they were attacked by the Persians, who subdued a great part of the country in 553. The Persians were finally defeated by the combined efforts of the Roman and Lazic troops in 556.

LAZZARONI.—This name is derived from Lazzaro, the sick man mentioned in the Gospels, and is used to designate the lower orders of the people in Naples. The hospital of St. Lazarus is devoted to the service of the poorer classes, or lazzaroni. They aided Masaniello in the revolution of 1647. They elect yearly a head or chief lazzaro, who is formally acknowledged by the govern-
1676. The league, or Holy Union, of the French Roman Catholics against Protestantism. It originated at Peronne, in 1575, and after carrying on long civil wars with Henry IV., of Navarre, was dissolved at Paris, in 1593.

1610. The leagues of Halle and Wurzburg are respectively formed by the Protestants and the Roman Catholics.

1638. The Solemn League and Covenant is formed in Scotland. (See CovENANTERS.)

1696. July 29. The league of Augsburg, between Austria and the majority of the German states, is formed against France.

LEAP YEAR, or BISEXTILE.—The name given to every fourth year in the Julian calendar, B.C. 46. In leap year February is made to consist of twenty-nine, instead of twenty-eight days. Under this arrangement the years were made a little too long, and to rectify this error, three leap years are omitted during the course of four centuries in the Gregorian calendar. Thus 1800 was not a leap year, and 1900 will not be; 2000 will be a leap year, and 2100, 2200, and 2300 will not. The Bissextile, or Bisextus dies, that is, the sixth day before the calends of March, twice over, was placed in the Roman calendar between the 24th and 25th of February. By 21 Hen. III. (1175), the bissextile day, and the day immediately preceding it, were to be considered legally as one day.

LEARNING.—The golden period of Greek learning was the age of Pericles, who died B.C. 429. The reign of the emperor Augustus was so distinguished for learned men and brilliant authors, that it is usual to characterize the era as most remarkable for learning as "Augustan ages." During the 6th century after the destruction of the Western empire, learning declined, and was almost exclusively restricted to ecclesiastics. Classical learning was revived in the Anglo-Saxon church about A.D. 668. The 10th century is usually looked upon as the darkest period of human history. The revival of learning after the period of depression significantly known as the "Dark Ages," took place in the 15th century.

LEASE.—This word is derived from the French laisser, to let or give leave, and signifies a conveyance creating an estate for life, for a stated period, or at will. During the reign of Edward III. leases were sometimes extended to several hundred years. The conveyance by lease and re-lease originated soon after the Statute of Uses, 27 Hen. VIII. c. 10 (1535). Leases required by law to be in writing, were declared void unless made by deed, by 8 & 9 Vict. c. 106 (Aug. 4, 1845). Leases and sales of settled estates were facilitated by 19 & 20 Vict. c. 120 (July 29, 1856), which was amended by 21 & 22 Vict. c. 77 (Aug. 2, 1858).

LEATHER.—It is related, Gen. iii. 21, that our first parents were clothed with skins before they were turned out of the garden of Eden, and this may perhaps be considered as the original suggestion of the manufacture of leather. It was in use among oriental nations for shoes, girdles, &c.; and with the Greeks and Romans for numerous articles of dress, as well as bottles and other vessels for containing liquids. The Romans seem to have obtained the art of tanning from Cordova in Spain, whence the name Cordovan leather. It was used for clothing by the ancient Britons, who also exported it in considerable quantities. A customs duty was imposed upon leather by 27 Hen. VIII. c. 14 (1535). A duty was laid upon it by 8 & 9 Will. III. c. 21 (1697), and an export duty of 12d. per cent, was imposed by 9 Anne, c. 6 (1710). By 11 Geo. IV. c. 16 (May 29, 1830), all duties and drawbacks upon this article were repealed. Leathern money is said to have been used by the Romans, and during the Middle Ages in Italy, and even in England.

LEBANON, MOUNT (Syria), was subject to the kings of Tyre, in the reign of Solomon (B.C. 1015 — 975). It fell under the sway of the Mardaites, who rebelled against the Saracens, A.D. 677, and became a stronghold of the Assassins about 1190.

LECCEUM (Battle).—Agisilaus II. of Sparta defeated the Athenians and their allies at Leceum, in the Isthmus of Corinith, B.C. 393.

LECTISTEIINUM.—This sacrificial ceremony was first observed at Rome, B.C. 400, according to Livy.

LECTURE (France), the ancient Lectors, belonged to the counts of Armagnac, until besieged by Louis XI., who captured it in 1474, when, in spite of a pledge to the contrary, the count and the inhabitants put to the sword.

LECTURES.—The publication of lectures without the consent of the lecturer is prohibited by 5 & 6 Will. IV. c. 65 (Sept. 9, 1835).

LEDOs (Battle).—The Saracens were defeated by the Spaniards at Ledos, A.D. 793.

LEEDS (Battle).—(See WINWIFIELD.)

LEEDS (Yorkshire), SAXON LOIDIS, was a Roman station, and probably fell into the hands of the Danes about A.D. 850. It was first celebrated for its manufactures about the beginning of the 16th century, and received its first charter in 1627, which was renewed, with additional privileges, in 1673. A large portion of the population was cut off by pestilence in 1644-45. Shenfield's Free Grammar-school was established in 1553; St. John's Church was founded in 1634; the Coloured-Cloth Hall was built in 1735, the White-Cloth Hall in 1775; the theatre and the general infirmary were erected in 1717; the Old Library was established in 1785; the Literary and Philosophical Society in 1820; and the Mechanics' Institution in 1825. They were united in 1842. The Townhall, constructed to contain 8,000 persons, for which the town-council voted £25,000 to purchase an organ, and £8,500 to erect a dome, was completed at a cost of £202,000, and opened by Her Majesty Sept. 7, 1888. This borough was enfranchised by the Reform Act of 1832.
LEGACY.—The legacy duty was first imposed by 36 Geo. III. c. 52 (April 26, 1796). All gifts by will were ordered to be deemed legacies by 8 & 9 Vict. c. 76, s. 4 (Aug. 4, 1845). The law of legacies was amended, and the legacy duty was extended to real property, by 16 & 17 Vict. c. 51 (Aug. 4, 1855).

LEGANTINE CONSTITUTIONS, ecclesiastical laws made in national synods, held in England during the reign of Henry III., about the years a.d. 1220 and 1268. The first synod was held under Cardinal Otho, legate of Gregory IX.; and the second under Cardinal Otho, legate from Clement IV.

LEGATES.—The Roman ambassadors were so called, and the term was also applied to officers who accompanied the Roman generals in their expeditions to render advice and assistance. After the division of the provinces of the empire by Augustus, b.c. 27, the imperial provinces were governed by legates. During the Middle Ages the term was applied to ambassadors of the popes being cardinals. Other papal ambassadors of high rank were called nuncios. The first legate that ever appeared in England came at the invitation of William I. Legatine courts were established by Wolsey, under the pope's authority, to relieve him of part of the duties of the lord-chancellorship; and he was himself made papal legate in 1517.

LEGHORN (Tuscany).—This celebrated seaport-town owes all its importance to the patronage of the Medici family, having been at the commencement of the 13th century an insignificant fishing village. In 1421 it was ceded to the Florentines by the Genoese, and in 1551 its population only numbered 749. The first stone of the new walls was laid by Francesco I., March 28, 1577. The castle was founded by Ferdinand I. in 1595, and the Latin School was established in 1603. An earthquake did great injury to the city in 1741. A large public school was established in 1746. Leghorn was seized by the army of the French republic June 28, 1796, and retained till 1798, when the French were compelled to withdraw. It was, however, retaken by General Clement in 1800. The bishopric of Leghorn was erected in 1806. In 1813 the city was finally restored to Tuscany. It was seized and plundered by insurgents, April 22, 1849, but was recovered from them by the Austrians, May 12. An alarm of fire at the theatre occasioned the death of sixty-two persons in June, 1857.

LEGION, a body of men in the Roman army, as formed by Romulus b.c. 720, consisted of 3,000 soldiers. The number was increased by Servius Tullius to 4,000, b.c. 578; and a further augmentation brought it up to 5,000 foot and 300 horse, b.c. 556. Gibbon is of opinion that, after suffering numerous changes, the constitution of the legion was dissolved by Constantine.

LEGION OF HONOUR.—This order of merit, as a recompense for civil and military services, was inaugurated by Napoleon I., July 14, 1802. The subject had been brought before the council of state in May, 1801, when a vote in its favour was carried by a slender majority. The first crosses were distributed at the head-quarters of the grand army at Boulogne, Aug. 16, 1804. It was reconstituted by Louis XVIII. in 1816.

LEGITIMISTS.—This term was given in France to the supporters of the oldest branch of the Bourbon family in 1830.

LEGNANO (Battle).—Frederick I., emperor of Germany, was defeated at this place, near Verona, in the forces of the Lombard League, May 29, 1176. By this victory the Lombard cities secured their independence. Frederick I. concluded a truce of six years with the Lombard League in 1177, and the treaty of Constance terminated the dispute. The French captured Legnano in 1510.

LEICESTER (Leicestershire), believed to be the Roman Ratae, was founded by a British king, according to some authorities Lear, and became one of the Danish burghs about a.d. 785. Since the time of Edward I., 1272—1307, it has returned two members to parliament. Henry V. held a parliament here April 30, 1414. Richard III. was buried in the Grey Friars monastery, Aug. 25, 1485. In the abbey, built 1143, Cardinal Wolsey died, Nov. 29, 1530. During the parliamentary war the town was taken by Charles I., May 31, 1645, and recovered by Fairfax, June 17, 1645. Charles II. ordered the destruction of its walls in 1662. The manufacture of stockings, for which the town is noted, was introduced in 1680. On the inquiry into the state of the municipalities, the corporation refused to deliver up the required documents and to submit to examination, Sept. 24, 1833.

LEIGHLIN (See of).—This Irish bishopric was founded by St. Laercian, a.d. 632. It was united to Ferns in 1600, and in 1835 the two dioceses were united with Ossory.

LEININGEN (Germany), formerly a county, gave the title of prince to the line, a.d. 1779. The principality lost its possessions on the left bank of the Rhine in 1803, and was mediatized in 1806.

LEINSTER (Ireland).—This eastern province of Ireland formed at the time of the English invasion (1170) a distinct kingdom, under Dermot. An order for the settlement of Leinster was made in 1550. In 1691 it was erected into a dukedom in favour of Meinhard, son of the duke of Schomberg, but the title became extinct in 1719. It was revived, and conferred upon James Fitzerald in 1766.

LEIPSIC (Battle).—The French army under Napoleon I., amounting to about 166,800 men, was attacked at this place by 290,450 of the allied forces under Prince Schwarzenberg, Blucher, and other generals, Oct. 16, 1813. The battle was renewed on the 18th and 19th, when the French were compelled to retreat, leaving 25,000 prisoners in the hands of the allies. The total loss of the
French was upwards of 60,000 men, and that of the allii 48,804 men. After the battle, the victors entered Leipsic, and Napoleon I. commenced his retreat towards the Rhine.

Leipsic (Saxony).—This city, which is of Wendish origin, was destroyed by Wratzlaus II., duke of Bohemia, A.D. 1082, and after having been rebuilt, was again razed by Otho IV. in 1212. The celebrated university was founded by German seeders from the university of Prague in 1409. A fire destroyed about 400 houses in 1420. In 1519, Luther, Eck, and Carlstadt held a theological discussion here. The book trade, for which Leipsic is so famous, commenced in 1545. The town-hall was erected in 1556. In 1659 and 1681 the plague carried off 3,900 of the inhabitants. Leipsic was taken by the Prussians in 1745, by Ferdinand of Brunswick in 1756, and by the French in 1806. The booksellers' exchange has been erected since 1834. Political disturbances took place here in 1830, 1831, 1848, and 1849. A union between the German Protestants was signed at Leipsic in February, 1631. The elector of Saxony concluded a treaty with Maria Theresa at this place, May 18, 1745, and a convention between Great Britain, Austria, Prussia, and Russia, was signed here Oct. 21, 1813.

Leipsic, or Breeitenfeld (Battles).—The imperial army, commanded by Tilly, was defeated by the Saxons and Swedes in the plain of Leipsic, Sept. 7, 1631 (N.S.). The Austrians left 7,000 on the field of battle, and 5,000 were taken prisoners. All their baggage and artillery were lost. The Swedish general, Tortensson, defeated the Austrians near the same place in 1642.

Leiria (Portugal).—This ancient town is the seat of a bishop, and the first printing-press in the peninsula was established here A.D. 1466. In July, 1608, the town was taken by the French, who destroyed it in 1611. It was restored in 1613, and was wrested from the Migueltuus, Feb. 15, 1594. Lixwm. (Scotland).—Called Isla, Leith, in the charter granted by David I. for the erection of Holyrood Abbey, A.D. 1128. The earl of Hertford burned the town in May, 1544. In 1660, some French troops, sent to espouse the cause of Mary queen of Scots, fortified Leith. They caputated to the English army, and a treaty was signed at Edinburgh, July 6, which provided that they should all leave Scotland. An extraordinary convention of superintendents and ministers was held here in January, 1572, and they drew up the agreement of Leith. The first newspaper printed in Scotland was the Mercat transcript which appeared at Leith in October, 1658. A dock was commenced in 1720, a small quay in 1777, and the wet docks in 1800. The Trinity-house was erected in 1817, the town-hall in 1828, and the new pier in 1852.

Lemberg (Galicia).—This once strongly-fortified city resisted a Roman force A.D. 1666, and a Turkish army in 1672. Charles XII. of Sweden stormed it A.D. 1704. Poniatowski captured it in 1809. The town-hall was built in 1835.

Lemm (The Aegean Sea) is said to have been peopled by a Thracian tribe, whose descendants were expelled by the Tyrrenian Pelasgians. It fell under the Persian yoke B.C. 505, and was subjected to Athens by Miltiades, B.C. 499. The Macedonians obtained possession for a short time, and it again passed under the Athenian yoke. It was celebrated for its labyrinths. (See Statine.)

Lemuria.—This festival for the souls of the departed was instituted B.C. 722, by Romulus, to appease the manes of Remus.

Leens (Battle).—The Austrians and Spaniards were defeated by a French army under Condé, in this battle, fought Aug. 9, 1645. The French captured one hundred colours and thirty-eight pieces of cannon.

Len is derived from an Anglo-Saxon word, signifying Spring. Much controversy has been excited amongst learned men respecting the original duration of this fast, some contending that it lasted forty days, and others only forty hours. Bingham believes it probable that it was at first a fast of forty hours, or the time our Saviour lay in the grave; that is, the Friday and Saturday before Easter. It is said to have been instituted in the time of the Apostles, though it is not mentioned in the New Testament, and appears to have been first enjoined A.D. 136. Consisting at first of only a few hours, it lasted a whole week, and was extended to three weeks, and by the fifth canon of the council of Nicea, June 10—Aug. 25, 325, was increased to six. Then it received the name of Quadregesima, or the Forty Days Fast, because it commenced forty days before Easter. In reality its duration was only thirty-six days, all the Sundays being omitted. The duration of Lent differed very much in the early churches. Lent is said to have been first observed in England in 540. By 2 & 3 Edw. VI. c. 19 (1548), all former laws relating to fasts were repealed, and a penalty of ten shillings, or ten days' imprisonment, was ordered to be inflicted on those that ate meat at Lent and on other fasts. The penalty was doubled for a second offence. By 5 Eliz. c. 5 (1563), it was enacted that whosoever should notify that eating of fish, or forbearing of flesh, was of any necessity for the saving of the soul of man, or that it was the service of God, otherwise than as other politic laws are and be, should be punished as spreaders of false news. The same statute laid down regulations for the observance of fasts. Victuallers were not allowed to sell flesh in Lent by 27 Eliz. c. 11 (1586). The last statute on the subject was 35 Eliz. c. 7 (1593). Several proclamations having reference to this subject were issued, and the encouragement of the navy and fishery was generally set forth as the ground of these regulations.
LEOBEN (Styria). — The preliminaries of a treaty of peace between Austria and France were signed at the castle of Eckenwald, near this town, April 18, 1797. (See Campo-Formio, Treaty.)

LEON (Spain). — The city of Leon is said to have been founded by the Romans in the 1st century of the Christian era. It was anciently called Legio, and received its present name on its capture by the Goths a.d. 586. It was afterwards seized by the Moors from whom it was taken in 722, and became the capital of the Christian kingdom of Leon, which was founded in 913 by Ordoño II. The city was taken by the Moor Al Mansur in 986, and remained in his power until his defeat at Calatanazor in 998. In 1038 the kingdom of Leon was annexed to Castile; and with the exception of the intervals from 1065 to 1072, and from 1157 to 1230, never recovered its independence. — Leon was erected into a bishopric in the 3rd century. Its first bishop died in 312, and the see was re-founded in 910. The cathedral was commenced about 1190. The French under Souti entered Leon Dec. 21, 1808, and destroyed many of the old buildings. — Councils were held here in 1020, 1091, and 1114.

LEONINE VERSES. — This peculiar species of Latin versification has been traced to the 3rd century.

LEONTIUM (Sicily), founded by colonists from Naxos, b.c. 733, fell under the yoke of Hipponocrates, b.c. 498, and of Hieron, b.c. 476. It solicited the aid of the Athenians against the Syracusans in 427, when Gorgias, the eminent sophist, acted as ambassador for his native city. In one of its streets Hieronymus was assassinated by Dinomenes, b.c. 263. It passed under the Roman sway, with the whole island, a.d. 201.

LEPANTO (Greece). — The ancient Naupactos (q. v.), called by the Greek peasants Epaktos, was destroyed by an earthquake in the reign of Justinian I., about 550 a.d. Another town, built upon its site, was besieged a.d. 1475 by the Turks, who withdrew after having lost 30,000 men, in a siege of about four months' duration. The Turks seized Lepanto in August, 1499. The town sustained several sieges, and was restored to Venice by the treaty of Carlowitz in 1699. The Greeks captured the town and citadel of Lepanto, May 9, 1829.

LEPANTO (Sea-fight). — The combined Spanish and Italian fleets, under the command of Don John of Austria, defeated the Turks in a great naval battle in the Gulf of Lepanto, Oct. 7, 1571. Cervantes, the author of Don Quixote, received a wound in this action, by which he was deprived of the use of his right hand during the remainder of his life. By some Italian authors this is called the battle of Curzolari, from a group of islets of this name at the mouth of the Achelous.

LEPROSY. — This contagious disease originated in Egypt and Arabia at a very early period. It is frequently alluded to in the Scriptures; and special regulations were prescribed concerning those afflicted with it by the Mosaic law, b.c. 1491 (Lev. xix.). Christ healed a leper in Galilee a.d. 25. It was known to the Greeks and Romans, and is described by Hippocrates (b.c. 460—357) and Galen (a.d. 130—200). The Crusaders introduced many lepers into Europe, where the disease raged with such virulence during the Middle Ages, that almost every town had its lazare-house for the reception of lepers. In 1225, during the reign of Louis VIII., there were in France no fewer than 2,000 of these institutions. Since the commencement of the 17th century the disease has almost entirely disappeared from Europe, where it is now limited to the most northern and southern countries. It was very prevalent in the Faroe Isles in 1676, and five persons were found to be affected with it in Great Britain in 1736. The last case mentioned in this island was described by Dr. Edmonston in 1809.

LERIDA (Spain). — The ancient Lerida was taken during the civil war by Julius Cesar, b.c. 48, and destroyed by the Franks a.d. 256. The town was restored, and became the scene of frequent struggles between the Moors and the Spaniards. It was besieged Oct. 2, 1707, and taken by assault Oct. 12. Suchet took it by storm May 13, 1810. The Spaniards regained possession in 1814.

LETTERS OF MARQUE. — These commissions, authorizing private persons to equip vessels of war, or privateers, on their own account, against an enemy, in time of war, were first issued in Genoa a.d. 1295. The cases in which they might be granted were specified by 4 Hen. V. c. 7 (1416). By 33 Geo. III. c. 66, s. 9 (June 17, 1798), they may only be issued to ships belonging to British subjects; or by 41 Geo. III. c. 76 (June 27, 1801), to royal vessels in the Customs service. The abolition of privateering was resolved upon by Great Britain, Austria, France, Prussia, Russia, Sardinia, and Turkey, at the congress at Paris, April 16, 1856.

LETTER-WRITING. — It is exceedingly doubtful whether epistolary communication was known in the Homeric age, which is assigned by various chronicologists to different periods between 30 b.c. 1194 to 684. David wrote a letter to Job, and despatched it by Uriah, b.c. 1035 (2 Sam. xi. 14, 15), and Jezebel wrote letters in Ahab's name, and sealed them with his seal, b.c. 899 (1 Kings xxi. 8). The classical authors regard Atossa, queen of Darius Hystaspes, who flourished in the 6th century b.c., as the inventor of letter-writing.
LETUCC was introduced into England about A.D. 1540.

LEUCADIA (Ionian Islands) came into possession of the Corinthians, who called it Leucas, from its white cliffs, B.C. 700. They cut through an isthmus, and converted Leucadia into an island. The canal was, however, quite choked up, according to Polibius, B.C. 218. Subsequently it was cleared out, and a bridge thrown across, it is believed by Augustus, about B.C. 17. Leucadia was taken by the Turks A.D. 1467, and it surrendered to the Venetians Aug. 21, 1717. An English force under General Oswald displaced the French, March 22, 1810. The fort of Santa Maura, erected near the town in the Middle Ages, was destroyed by an earthquake in 1825. Sappho’s Rock, where the poetess is said to have made her desperate leap, B.C. 590, and the tomb of Artemisia, B.C. 352, are in this town. The town is sometimes called Santa Maura, from the fort.

LEUCTRA (Battle).—The Thebans defeated the Spartans in a great battle at this village of Boeotia, B.C. 371. By this victory the supremacy of Sparta was destroyed.

LEUTHEN, or Lissa (Battle).—The Prussians, after an obstinate contest, defeated the Austrians at the village of Leuthen, in Silesia, Dec. 5, 1757. The Austrians withdrew through Lissa.

LEVANT.—The countries situated on the eastern shores of the Mediterranean have received this name, from the French lever, to rise, because the sun rises in that direction. A Levant company of merchants was chartered in 1581, and a second in 1593. The great Levant Company was established in 1605.

LEVELLERS, a party who desired that “all degrees of men should be levelled, and an equality should be established, both in titles and estates, throughout the kingdom,” obtained the supremacy in the army of the Long Parliament in 1647. They denounced all existing forms of government, and clamoured for the blood of Charles I. They raised an insurrection in 1649, and Cromwell took measures to suppress them. (See ACHSEPHALY.)

LEVERIAN MUSEUM.—This fine collection of objects of natural history was formed by Sir Ashton Lever, who established it at Leicester House, Leicester Square, in 1775. Not being efficiently supported, Sir Ashton was compelled to dispose of it by lottery in 1783. It was won by Mr. Parkinson, who sold it by auction, in 7,579 lots. The sale lasted from May 5 to July 18, 1806.

Lewes (Sussex), one of the most ancient towns in England, was fortified by the Saxons, and the Normans built its castle soon after the Conquest. The royal army was defeated by the barons at this place, May 13, 1264, Henry III. having been made prisoner. Soon after the battle, Prince Edward entered into a treaty, called the Mise of Lewes.

LEXINGTON (Battle).—During the night of April 18, 1775, General Gage sent a small force from Boston to destroy some military stores collected at Lexington (Massachusetts) by the rebels. This service was performed on the morning of April 19, and led to other collisions in the neighbourhood.

LEXINGTON (Kentucky), founded A.D. 1776, was the chief town of Kentucky until 1792, when Frankfort was made the capital of the state. Lexington was incorporated in 1782.

LEYDEN (Holland), the ancient Lugdunum Batavorum, withstood two celebrated sieges by the Spaniards in 1573 and 1574. The first commenced Oct. 31, 1573, and was raised March 21, 1574, by Louis of Nassau. Valdez returned with 8,000 Walloons and Genoese on May 26, 1574. Valdez offered pardon to the citizens, on condition of an immediate surrender, July 30; but they still held out, although reduced to extremities by want of provisions. A flotilla of vessels, fitted out at Zeeland for the relief of the city, broke through the dykes, and, assisted by an inundation, caused by a violent equinoctial gale, Oct. 1 and 2, entered the city Oct. 3, and Leyden was saved. The inhabitants had suffered severely from famine and pestilence, and, in acknowledgment of their heroism, the prince of Orange founded the university in 1575. The round tower called the Burg, in the centre of the town, is supposed to have been built about A.D. 450. St. Pancras Church was erected in 1280, and St. Peter’s in 1315. The town-hall was founded in 1574. Here Arminius published his views, which led to the controversy bearing his name, Feb. 7, 1604. In Jan., 1795, Leyden was taken possession of by the French, who held it till 1813.

LIBEL.—The Roman laws treated libel as a capital offence, and during the latter period of the empire similar severity was extended to the possessors of libellous documents. Hallam (England, ch. xv.) remarks,—“The law of libel has always been indefinite—an evil probably beyond any complete remedy, but which evidently renders the liberty of free speech safer than the previous was in its exercise than might be wished. It appears to have been the received doctrine in Westminster Hall, before the Revolution, that no man might publish a writing reflecting on the government, nor upon the character, or even capacity and fitness, of any one employed in it.” Fox’s Libel Bill of 1792 effected a salutary change. William Prynne was fined £3,000 for having written the “Histrio-Mastrix,” expelled from the university of Oxford and the bar, was exposed in the pillory, and committed to the Tower in August, 1633. He was, with Henry Burton and Robert Eastwick, condemned in the Star Chamber for libels, June 14, 1637, and they were set in the pillory and mutilated, June 30. A resolution adopted in the House of Commons, that privilege of parliament should not extend to cases of libel, was agreed to by the Lords Nov. 29, 1763. Major John Scott, a member of the House of Commons, was reprimanded by the House for a libellous publication in one of the morning papers, May 18, 1790. By 60 Geo. III. c. 8 (Dec. 30, 1819),

LIB

A.D. 1824. A library for the city of London is founded at Gutchall.
1830. The library of the Taylor Institution at Oxford is founded.
1831. The Arundel Library is added to the British Museum.
1836. The Royal Library of Brussels is founded.
1845. Oct. 28. The Grenville Library is bequeathed to the British Museum.
1852. The burgesses of Manchester establish a free public library, under the act of 1850.
1855. July 30. The Public Libraries and Museums Act is passed (18 & 19 Vict. c. 70).
1856. A public library is founded in Melbourne, Australia.
1861. July 11. The citizens of London reject, by a large majority, a proposition to establish a free public library in the city.

LIEBHURNIA (Illyria) received Vatinus as its processual b.c. 47. A revolt against the Roman rule was suppressed by Octavius b.c. 35. The light galleys of the Liburni rendered important assistance to Augustus at Actium, Sept. 21, 31 B.C. Charlemagne absorbed the Liburnia into his empire A.D. 788.

LIBYA (Africa) is mentioned by Homer b.c. 926, and described by Herodotus b.c. 484. The Phoenicians are said to have colonized it B.C. 2050, and endeavoured to monopolize its commerce B.C. 600. Cambyses, king of Persia, led an expedition into Libya B.C. 526, and Ptolemy Philadelphus and Euergetes caused it to be explored for purposes of trade. The Romans assigned this country to Ptolemy Physcon, B.C. 164. (See AFRICA.)

LICENSES.—Gaming-houses were first ordered to be licensed by 33 Hen. VIII. c. 9 (1541), which was repealed by 2 & 3 Phil. & Mary, c. 15 (1555). Alehouses were licensed by 5 & 6 Edw. VI. c. 25 (1552); wine-retailers by 12 Charles II. c. 25 (1660); tea and coffee dealers by 15 Charles II. c. 11, s. 15 (1663); spirit-merchants by 2 Geo. II. c. 28 (1729); auctioneers by 17 Geo. III. c. 50 (1777); post-horse masters by 19 Geo. III. c. 51 (1779); maltsters by 2 Geo. III. sess. 2, c. 41 (1784); and tobacco dealers by 29 Geo. III. c. 68, s. 70 (1789). The General License Act is 9 Geo. IV. c. 61 (July 15, 1828). Licences for refreshment-houses are regulated by 23 Vict. c. 27 (June 14, 1850), which came into operation July 1.

LICENSOR OF PLEAS was first appointed by 10 Geo. II. c. 28 (1736). Brooke's "Gustavus Vasa" was the first play of the performance of which was prohibited by this officer.

LICHFIELD (Bishopric).—A bishop's see, established at this town A.D. 669, was raised to the dignity of an archbishopric by a synod held at Calcultense, or Celchyth, in Northumberland, in 787. The dignity was suppressed by the synod of Gloleshovencnna, or Cliff, Oct. 12, 803. The see removed to Chester in 1075, and to Coventry in 1102; was restored to Lichfield in 1188, when it was called the bishopric of Lichfield and Coventry. The latter name was discontinued in 1387.

LICHFIELD (Staffordshire).—This ancient city, to which Edward II. granted a charter of incorporation, was, with the suburbs, constituted a distinct county by Queen Mary, A.D. 1558. The cathedral, founded in 1148, suffered greatly during the civil wars, the parliamentary army having captured the town March 2, 1643, and was restored in 1661.

LICHENBERG (Germany).—In 1816 this territory was ceded by Prussia to the duke of Saxe-Coburg, who made it a principality, naming it Lichtenberg, after an ancient castle. In 1834 it was restored to Prussia for an annual rent of 80,000 dollars.

LICINIAN LAW, restricting the quantity of land which any citizen of Rome might possess to 500 jugera, or about 330 acres, was proposed by the Roman tribune C. Licinius Stolo, B.C. 376, and was carried B.C. 367.

LIEB, (Treaty,) annulling the federal subjection of the duchy of Prussia to Sweden, was concluded Nov. 10, 1636.

LIECHTENBERG (Germany).—This principality, smallest of the states forming the Germanic confederation, belongs to one of the most ancient houses in Europe.

LIEGE (Belgium).—A bishop's see, established at Tongres A.D. 97, was transferred to Maestricht in 383, and to Liege in 713. Its bishop became a prince of the empire in the 10th century. One of its bishops, expelled in 1406, recovered possession of the town in 1408. It was stormed by the duke of Burgundy, and burned Oct. 30, 1463. Louis XIV. took Liege in 1688. Marlborough obtained possession of the city Oct. 13, 1702; the citadel surrendered Oct. 23; and a detached work, called the Chartreuse, Oct. 29. The French, who assailed it without success in the summer of 1705, obtained possession Oct. 10, 1746. The French, under General Dumoures, took possession of Liege, after defeating the Austrians in the vicinity, Nov. 28, 1792; but they were in turn beaten with great loss, March 4, 1793. It was annexed to France in 1795. The Cossacks captured it January, 1814. Liege formed part of the Netherlands in 1814, and was added to Belgium in 1830. The cathedral was built in the 8th century, and the university was founded by the king of Holland in 1617.

LIEGENS (Silesia), the capital of a government of the same name, was the scene of the Mongol victory over the Poles and the Teutonic Knights, A.D. 1241. It was taken in 1577 by the Austrians, who were defeated here by Frederick II. of Prussia, Aug. 15, 1760. An allied Prussian and Russian army defeated the French at Wahlstatt, near this town, Aug. 17, 1813. The old castle was nearly destroyed by fire in 1834.

LIESNA, or LIEISON (Battle).—The Russians defeated the Swedes near this town, at the junction of the Punca and the Sossa, Oct. 8, 1708. The Swedish general Löwenhaupt with inferior numbers repulsed the Russians
at the first charge, Oct. 7. The battle was continued on the next day; the Russians advanced no less than five times; numbers at last prevailed, and Lowenhaus passed the Sossa during the night of Oct. 8, having with 10,000 men maintained an arduous conflict with 40,000 Russians during two days.

**LIFEBOAT.**—A patent for a lifeboat was granted to Lukin a.d. 1785. It was improved by Greathead, who launched his first lifeboat Jan. 30, 1790; and for his services in this matter he received a grant of £1,200, June 31, 1802. The Society of Arts voted him their gold medal and 50 guineas in 1804. A prize of a hundred guineas, offered by the duke of Northumberland for the best model, was awarded to Beeching of Yarmouth in 1830.

**LIFE-BUOY.**—In 1818, Lieut. Cook received a gold medal from the Society of Arts, for the invention of a life-buoy.

**LIFE-PRESERVER.**—Various apparatus for the preservation of life from shipwreck have from time to time been invented. A paper kite was employed to effect communication with the shore in 1740, and in 1791 the Society of Arts published an account of Lieutenant Bell's system. Captain Manby's attention was directed to the subject by witnessing the death of sixty-seven persons within fifty yards from the shore, when the gun-brig _Snipe_ was wrecked at Yarmouth, Feb. 18, 1807. He vowed to devote his life to the prevention of similar catastrophes in future, and invented the method of communication from the shore by means of a mortar and rope, which now bears his name. The apparatus was first employed Feb. 12, 1808, when it saved the crew of a brig. Captain Manby died Nov. 18, 1854, with the knowledge that he had been the means of saving more than 1,000 lives. R. W. Laurie, of Glasgow, patented several improvements in apparatus to be employed for the preservation of human life, July 9, 1849.

**LIGHT.**—Pythagoras, and the Platonists were the first whose speculations on this subject are recorded. Little definite knowledge on the subject was obtained until the law of the refraction of light was discovered by Willebrand Snell, or Snellius, a mathematician of Leyden, a.d. 1621, and was made public by Descartes in 1637. Its compound nature was discovered by Newton while experimenting on the prismatic spectrum, about 1666. Bradley, astronomer royal, detected its aberration Dec. 21, 1725, and discovered the cause in Sept. 1728. (See Optics.)

**Lighthouse, of Pharos.**—The Colossus of Rhodes, built by Chares about B.C. 290, is supposed by some writers to have answered the purpose of a lighthouse. These edifices received the name of Pharos from the light-house erected on the island of Pharos, for the purpose of lighting the harbour of Alexandria, B.C. 283. It was constructed by order of Ptolemy Philadelphia. The Tour de Corduan, the first modern lighthouse, was founded at the mouth of the Garonne in 1584, and completed in 1610.

**Lighting of Streets.**—It is doubted whether any system of lighting the thoroughfares existed among the Greeks and Romans, though they illuminated their cities on public festivals. Antioch was probably lighted by artificial means in the 3rd century. The governor of Edessa ordered lamps to be kept burning during the night, about a.d. 505. Paris is said to have been the first modern city in which the streets were lighted. An order to the inhabitants to keep lights burning after nine in the evening was issued in 1824, in 1526, and in 1533. Maitland contends that a similar order was issued in London in 1144. Vases containing pitch and resin were used for this purpose in October, 1558. The Abbé Laundat secured a twenty years' privilege of letting out torches and lanterns for hire, in Paris in March, 1682. Householders in London were required to hang out a light when it was dark in 1668. Parliamentary authority was granted for lighting the streets by contract in 1736. By another act of parliament, passed in 1744, great improvements were made in the system of lighting the streets of the city of London. Lighting the streets was introduced at the Hague in 1553, at Amsterdam in 1669, at Hamburg in 1672, at Berlin in 1679, at Copenhagen in 1681, at Vienna in 1687, at Hanover in 1696, at Leipsic in 1702, at Dresden in 1708, at Cassel in 1721, at Brunswick in 1766, and at Zurich in 1775. (See Gas.)

**Lightening Conductors.**—The ancient Romans regarded persons or places struck by lightning with horror, believing them to be devoted to the wrath of Heaven. They surrounded places struck in this manner by a wall, and buried things with mysterious ceremonies. Some authors believe that they possessed the knowledge of conducting lightning. Modern lightning conductors, for the protection of buildings, were suggested by Franklin immediately after his famous electric experiment in 1752. Dr. Watson erected the first in England, at Payneshill, in 1762. A plan was submitted to the Admiralty by W. Snow Harris, for protecting ships from the effect of lightning, in 1821. It was adopted, and its inventor was rewarded with a pension, a grant of £4,000, and knighthood. The plans for the protection of the Houses of Parliament were furnished by him. Professor Richmann, of St. Petersburg, was killed in his room by a shock from a conductor in 1753.

**Ligéry (France)** was captured by the Spaniards June 5, 1544. Here Napoleon I. defeated the Prussian army under the command of Blucher, June 16, 1815, and compelled them to retreat to Wavre. The Prussians lost 20,000, and the French 10,000 men in this battle.

**Liguria (Italy)** was inhabited by an ancient people called the Ligures, of whose origin nothing authentic has been recorded. They first came into collision with the Ro-
mans b.c. 237, and P. Lentulus Claudinus celebrated a triumph over them b.c. 236. The Ligurians allied themselves with the Carthaginians, and commenced open hostilities by attacking Placentia and Cremona, Roman colonies, b.c. 200. A long series of wars, extending over a period of eighty years, ensued between the Romans and the Ligurians. Several tribes were reduced to subjection before b.c. 173; others held out, and one tribe in the Maritime Alps was not reduced to obedience until b.c. 14. The Lombards overran the country a.d. 569.

Ligurian Republic.—The French created a revolution in Genoa early in 1797, and by a convention stipulated at Monte Bruto, June 5 and 6, this republic placed itself under the protection of France. Napoleon Bonaparte gave it the name of the Ligurian republic. The formal surrender of its liberties, and its annexation to France, was made at Milan, June 4, 1805. The inhabitants revolted, and proclaimed the restoration of the Ligurian republic, April 3, 1849. The revolt was suppressed April 11.

Lilac, a favourite flowering shrub, was introduced into this country before or during the reign of Henry VIII. (a.d. 1509—1547); as "six lilac-trees, which bear no fruit, but only a pleasant smell," are enumerated in the list of trees in the palace gardens at Norwich, taken by order of Cromwell.

Lille, or Lisle (Conference).—Lord Malmesbury was despatched here early in July, 1797, to resume the negotiations for peace with the French government, which had been suddenly broken off in December, 1796. The demands of England were moderate. The French plenipotentiaries required the recognition of the French republic, and the renunciation by George III. of the title, king of France. After the revolution at Paris of the 4th September, the former plenipotentiaries were recalled, and two republicans sent, who required Lord Malmesbury to produce authority from the English government to attest the continuance of the conference during the war, or to quit Lille within twenty-four hours. Lord Malmesbury broke up the conference and withdrew.

Lille, or Lisle (France), was founded and walled in by the count of Flanders, a.d. 1030. Philip II. of France burned it in 1213, and it was besieged and taken by Philip the Fair in 1297. Lille was united to the crown of Spain in 1496, and was taken by Louis XIV. The Huguenots failed in an attempt to capture it in 1581, and the French besieged it in 1645. Louis XIV. took it from the Spaniards in 1667, and it was ceded to France by the treaty of Aix-la-Chapelle, May 9 (O.S.), 1668. The allies having driven it out Aug. 13, 1708, the town capitulated Oct. 24, and the citadel Dec. 10. The allies are said to have had 17,000 killed and wounded during the siege. It was restored to France by the treaty of Utrecht, 1713. The allied army threatened it in 1744. The Austrian army besieged Lille Sept. 24, 1792, but were compelled to retire Oct. 8. Louis XVIII. found refuge here for a few days, on the escape of Napoleon I. from Elba in 1815. The collegiate church of St. Peter was built in 1068, and the town-hall in 1430.

Lilibeum (Sicily), the modern Marsala, was built by the Carthaginians b.c. 397. Pyrrhus besieged it for two months unsuccessfully, b.c. 276. The Romans laid siege to it during the first Punic war, b.c. 250, and it capitulated b.c. 241. The port was blocked up with stones by Charles V., to protect it from the Barbary pirates, in the 16th century. (See Marsala.)

Lima (Peru) was founded by Pizarro as his capital, under the name of Ciudad de los Reyes, or the City of the Kings, Jan. 6, 1535. Here he was assassinated, Sunday, June 26, 1541. The inhabitants revolted against General Santa Cruz, July 29, 1838. It has suffered severely from earthquakes, more particularly in 1746 and 1759, and was devastated by yellow fever in 1854. The archbishopric was founded in the 16th century.

Limburg (Belgium).—The French demolished the outworks of this town, in the province of Liege, a.d. 1675. Marlborough invested Limburg Sept. 10, 1703, and the garrison surrendered Sept. 27. It was the capital of the old duchy of Limburg.

Limburg (Belgium and Holland).—This province is supposed to have been occupied by the Eburones, in whose territories Julius Caesar quartered a legion b.c. 54. The Eburones attacked the Roman camp, and massacred nearly all the troops. Caesar returned b.c. 53, and exterminated the Eburones. The country was formed into a duchy, which was annexed to Burgundy a.d. 1472, and formed one of the United Provinces. It was ceded to France in 1795, and was soon after restored to the Netherlands. After the revolution of 1830, the province of Limburg was divided between Belgium and Holland.

Limburg (Germany).—The Prussians were driven from this town, on the river Lahn, in the duchy of Nassau, by the French, Nov. 9, 1792. The Prussians surrendered possession of Limburg in a few days. The French drove the Austrians from Limburg in June, 1796, and the Austrians recovered the town Sept. 16 in the same year.

Lime or Drummond Light, invented by Captain Thomas Drummond, was first practically applied in the survey of Ireland, commenced a.d. 1824, and is described by the inventor in the Philosophical Transactions for 1828. He recommended its application to lighthouses in 1830.

Lime of Linden-tree.—This handsome tree is not indigenous to this country, but it existed here as early as the middle of the 16th century.

Limerick (Bishoprie).—The reputed founder of this Irish diocese is St. Munchin, of whom little more is known than his name. Sir James Ware, however, contends that it was erected by Donald O'Brien about the time of the English invasion. Gille, or Gillebert, a.d. 1106, is the first bishop of whom anything is known.
LIMERICK (Ireland).—This city, the capital of the county of the same name, is said to have been a place of some repute in the 5th century. It was first attacked by the Danes A.D. 812, and was captured by them about the middle of the 9th century. Don El O’Brian founded the cathedral about the period of the English invasion, and built a convent for Black nuns about 1174. King John visited Limerick in 1210, and erected Thomond Bridge over the Shannon, and in 1314 the suburbs were burnt by the Scotch, under Edward Bruce. The fortifications were completed in 1495. The bull against Elizabeth was placed on the gates in 1570. In 1641 Limerick was seized by the confederate Roman Catholics, under Lords Muskerry and Skerrin, and in 1643 it became the head-quarters of the Irish papists. Ireton took it after a six months’ siege, Oct. 27, 1651, and died there the following Nov. 26. William III. commenced the siege of Limerick Aug. 9, 1690, and after a great expenditure of life, was compelled to raise it Aug. 30. It was, however, renewed the following year by General Ginkel, who finally succeeded in taking the city. A truce was agreed upon Sept. 23, 1691, and the celebrated treaty of Limerick (q.v.) was signed Oct. 3. The Custom-house was erected in 1769, the Exchange in 1778, the gaol and lunatic asylum in 1821, and the City Infirmary in 1829. The lace manufacture, for which Limerick is celebrated, was introduced in 1829. The finest building is the bank, erected in 1840. The workhouse was built in 1841. Serious riots occurred here June 15, 1830. The mob attacked the provision warehouses, flour-mills, &c., doing damage to the extent of £10,000.

LIMERICK, (Treaty,) called the Pacification of Limerick, was signed at Limerick Oct. 3, 1691. It put an end to the authority of James II. in Ireland. By the first article the Roman Catholics were to enjoy such privileges in the exercise of their religion as were consistent with the laws of Ireland, or such as they did enjoy in the reign of Charles II. A general amnesty was granted to all persons willing to remain in Ireland. They were to have all their estates, and all the rights, privileges, and immunities, which they enjoyed in the reign of Charles II., free from forfeitures, or outlawries incurred by them. The garrison were permitted to march out with the honours of war, and to take service in the French army. About 12,000 men were conveyed to France, and enlisted under the banner of Louis XIV. They formed the Irish Brigade, so celebrated in the continental wars of the 18th century. William III., ratified the treaty in February, 1692. The English parliament accepted the treaty, but the Irish parliament declared that General Ginkel and the lords justices had exceeded their powers, and, in 1695, passed an act putting their own construction upon the terms of the convention. Sir Henry Parnell brought forward a motion in the House of Commons, March 6, 1628, for an address to the king, praying that this treaty might be laid before the house. This led to an animated discussion respecting the obligations it imposed upon England to remove the disabilities of the Roman Catholics.

LIMITED LIABILITY.—The liabilities of members of joint-stock companies, with a capital divided into shares of not less than £10 each, for the debts of their companies, were limited upon certain conditions by 18 & 19 Vict. c. 133 (Aug. 14, 1855). The act did not apply to Scotland. It was amended by 19 & 20 Vict. c. 47 (July 14, 1856); 20 & 21 Vict. c. 14 (July 13, 1857); and by 21 & 22 Vict. c. 60 (July 23, 1858).

LIMOGES (France), the Augustoritum of the Romans, was, in their time, the chief town of the Lemovices, who joined Vercingetorix against Julius Caesar, B.C. 52. It was the capital of the province of Limousin, and was taken by Edward the Black Prince A.D. 1370. The Black Prince was shortly after compelled to retire to England, on account of ill-health; and the capture of this town, in which he is said to have displayed great courage, was his last military exploit. Its cathedral was commenced in the 13th, and the church of St. Michel-aux-Lions was built in the 15th century. Councils were held here in 948, 1029, Nov. 18, 1031, and in 1132.

LIMOUSIN (France).—This province, inhabited by the Lemovices, was wrested from the Visigoths by Clovis I., king of the Franks, A.D. 507. It was included in Guienne, and afterwards made a separate province, for the possession of which the kings of France and England waged frequent war. Richard I. lost his life from a wound received whilst besieging the castle of Chalus-Chabrol, in Limousin, March 26, 1199. It was united to the French crown by Henry of Navarre in 1599. Toussaint was intendant of the Limousin from 1761 to 1773.

LINCHELLES (Battle).—General Lake defeated the French at this village, in the Netherlands, Aug. 18, 1793.

LINCOLN (Battles).—Ralph, earl of Chester, and Robert, earl of Gloucester, attacked and defeated Stephen at Lincoln, Sunday, Feb. 2, 1141. Stephen was captured and imprisoned in Bristol Castle. Matilda was acknowledged as "Lady of England" at Winchester, April 7.—A French army that had been sent over to assist the rebellious barons against Henry III., was attacked and totally defeated by the earl of Pembroke and Peter, bishop of Winchester, at Lincoln, Saturday, May 20, 1217. Roger of Wendover states that in derision of Louis, son of Philip Augustus of France, and the barons, this was called the battle of the Fair.

LINCOLN (Bishopric).—The two sees of Leicester and Lindisfarne were erected in 650, and were united in 873. In 886 the seat of the diocese was fixed at Dorchester, and about the year 1078 it was transferred to Lincoln. The see of Ely was created out of Lincoln in 1108, that of Oxford in 1541, and that of Peterborough in 1541; and in 1537 it was further reduced by the annexation of
several districts previously under its jurisdiction to other sees.

Lincoln (Lincolndom), the Roman Lindum, was a station of the Romans. "Newport Gate" is a ruin of a Roman archway erected A.D. 418. The castle was founded by William I. in 1086. A charter of incorporation was granted to Lincoln by Henry II. (1154—1189). Stephen was captured here by the earl of Chester, and many of the citizens were slaughtered Feb. 2, 1141. Lincoln was taken by the Parliamentarians under the earl of Manchester, May 5, 1644. The city was represented in parliament in the reign of Henry III. (1216—1272). The cathedral, founded by William I. in 1086, was burnt down in 1126, and was afterwards rebuilt. St. Peter's Church was built in 1723. The famous bell, Great Tom, cast in 1610, cracked in 1827, was broken up in 1834.

Lincoln College (Oxford), founded by Richard Flammyng, bishop of Lincoln, Oct. 13, 1425 A.D., was extended by Rotheram, also bishop of Lincoln, in 1479. Other emoluments were added by Crewe, bishop of Durham, in 1718, and Dr. Hutchins in 1751. The largest quadrangle was erected in the 15th century, the small court was built by Sir Thomas Rotherham in 1612, and the chapel was built in 1631 by Archbishop Williams, who had the illuminated windows brought from Italy in 1629. The college was repaired in 1818.

Lincolnshire (England).—A Saxon kingdom, called Lindsey, subordinate to Mercia, occupied the same extent of country as Lincolnshire. The Danes obtained permanent possession of Lindsey A.D. 877, and it was soon after merged in the Anglo-Saxon kingdom of England.

Lincoln's Inn (London).—The earl of Lincoln erected a palace here A.D. 1228, whence the name. It was used by the bishops of Chichester as a palace until 1310, when a law school was established. Queen Elizabeth made a grant of the fee simple of Lincoln's Inn to the benchers. The library of Lincoln's Inn was commenced in 1522, and the chapel was erected from the designs of Inigo Jones in 1626. The hall and the new buildings were opened by Queen Victoria, Oct. 30, 1845.

Lincoln's-Inn Fields (London).—Lord William Russell was beheaded in Lincoln's-Inn Fields, July 21, 1633. The square was enclosed in 1737.

Lincoln's-Inn Fields Theatre (London).—This theatre was situated on the south side of Lincoln's Inn, at the back of the present Royal College of Surgeons. The first was originally a tennis-court, which was converted into "the Duke's Theatre" by Sir William Davenport, and opened in 1662. The second theatre was built by Congreve and others, and opened with the first performance of "Love for Love," April 30, 1695. It was pulled down by Christopher Rich in 1714, and the new theatre was opened after his decease by his son John, Dec. 18, 1714. The "Beggar's Opera" was first played in this house Jan. 29, 1728. Lincoln's-Inn Theatre was converted into a barric in 1756, and was finally taken down Aug. 28, 1848.

Lindisfarne.—(See Holy Island.)

Linsey, or Lindum Island (Lincolndom).—This province was, according to Bede, converted to Christianity by Paulinus, A.D. 628. The Danes seized Lindsey A.D. 838, and again in 993. A bishop's see was established at Lindisse, supposed to be Stow, in Lincolnshire, in 680. It was removed to Lincoln in 1078.

Linen was woven at a very early period. Pharaoh arrayed Joseph in vestures of fine linen (Gen. xlii. 42), B.C. 1715. The Egyptians had attained high perfection in the art of manufacturing linen B.C. 700, and exported it, according to Herodotus, B.C. 478. It was used in Britain prior to the Roman invasion, B.C. 55. In Ireland it was woven in the 11th century. The trade was much improved by French refugees in 1685, and encouraged by the establishment of a "Linen Board," which was abolished in 1828. Fors broke (Antiq. 472) remarks: "Strutt observes, that the manufacture of linen in this country was not carried to any extent before the middle of the 17th century; was in its infancy even in the time of Charles II. (1661—1685); was imported from Flanders, and was very dear. . . . D'Arany says, that it was not common in the west in the 8th century: that table linen was very rare in England in the 13th and 14th centuries. . . . Anderson traces some fine linen made in England in 1253; a company at London in 1386; a manufacture in Normandy in 1422; and in Ireland in 1490, which was advanced by the French Protestant refugees about 1596. In 1445 we find fine linen for surplices and the altar, at 96 the ell. Rheims supplied us with most of our finest linens in the 14th century." Machinery was first used in this manufacture in 1725. Linen was manufactured in Scotland early in the 18th century, and a board of trustees for its encouragement was formed in 1727. The duty on linen was abolished by the commercial treaty signed with France, Jan. 23, 1860.

Linghiera.—(Sea-fight.)—The Venetians, assisted by the Spaniards, defeated the Genoese off this place, in Italy, Aug. 29, 1533.

Lingonum Civilis, or Andermatumnium (Gaul).—Constantius Chlorus defeated the Alemani at this town, A.D. 298. Attila destroyed the town in 407. It was rebuilt by the Burgundians, and became the capital of a country called, in old French, Langone. Louis VII. made it a duchy. The cathedral was founded in 380.

Linlithgow (Battle).—During the minority of James V. of Scotland, the charge of his person was intrusted to certain peers in rotation. He came of age (fourteen years old) in April, 1525; but the earl of Angus still continued to control his actions, until his
tyranny became so excessive that a party was formed against him by the earl of Lenox and others in 1526. The two armies encountered each other at the bridge of Linlithgow, about midsummer, when Lenox was killed and his forces were defeated.

**Linnean Society (London)** was founded A.D. 1788, and incorporated March 26, 1802. The library and herbarium of Linnaeus, now in possession of the society, were purchased for £1,000 by Dr. Smith. The transactions of the society were first published in 1791.

**Linnaean System.** —The classification of plants according to their stamens and pistils was accomplished by the great Swedish naturalist, Charles Linné or Linnaeus, who was born at Râshult, May 13, 1707 (O. S.), and died at Upsal, Jan. 10, 1778. It was originally published in the *Hortus Uplandicus* in 1731, and at once established the reputation of its author. The *Species Plantarum* was published in 1753.

**Lintz** (or *Linz*) (Austria), the ancient Lentia, at one time a Roman station, was purchased by the margrave of Austria, A.D. 1036. Fardinger, the peasant leader, made an unsuccessful attack upon it in 1526; and it was entered by the army of the elector of Bavaria, where he was declared duke of Austria, in 1741. The town-hall was built in 1414, and Trinity column was erected by Charles VI. in 1723. The fortifications were improved after a plan by Prince Maximilian d’Este in 1850.

**Lion and Unicorn** (Heraldry) were first adopted as supporters of the royal arms of England on the accession of James I., A.D. 1603. The former was previously the supporter of the English, and the latter of the Scottish shield.

**Lillo** (Battle).—Garibaldi defeated the Neapolitans at this place, in Italy, May 16, 1860.

**Lipari** (modern Lipari), was founded on one of the Lipari islands by the Rhodians and Cnidians, B.C. 580. Agathocles ravaged it B.C. 304. The Carthaginians captured it B.C. 264, and made it a naval station. C. Aurelius captured it B.C. 251, and it was annexed to the Roman empire. Attalus, who attempted to make himself emperor, was banished here A.D. 416. Robert, king of Naples, captured it in 1339. Khair Eddin Barbarossa seized the town and carried the inhabitants into slavery in 1544.

**Lipari Islands** (Mediterranean Sea).—This volcanic group, consisting of seven principal islands, was known to the ancients under the names of the Eolie, Hephæstiae, or Vulcane Insulae, and of the Liparanes; from Lipara, the largest of the group, said to have been so called from Liparus, one of its early kings. The group was colonized by the Dorians, about B.C. 580.

**Lippe** (Battle).—Fought during the Hussite war, at this place, near Prague, May 28, 1434. The two Procos fell in the encounter, in which the Taborites were defeated.

**Lippe** (Germany).—This town was built in the 12th century, and took its name from the river Lippe, near which Varus, and his three legions, were slaughtered by the Saxons, under Arminius, A.D. 9. It was made a principality, Bernard VIII., who died in 1563, was the first to assume the title of count, and he divided his possessions amongst his three sons, who founded the lines of Lippe-Detmold, Lippe-Brake, and Lippe-Büchberg, or Schaumburg. The line of Lippe-Brake became extinct in 1709. The Aulic ruler of Lippe-Detmold took possession of the whole of Lippe-Brake; but the council, in 1734 and 1737, divided it between Lippe-Büchberg, or Schaumburg, and Lippe-Detmold, and the houses entered into a convention on the subject in 1748.

**Lisbon** (Portugal) received from Julius Caesar the rights of a municipality, with the title of Felicissima Julia, and was also called Oli-sipo. It was taken from the Romans by the barbarian hordes, A.D. 409. The Moors took it in 711, and it was wrested from them by Alfonso, king of Portugal, in 1147. It was made the seat of the government in place of Coimbra in 1533, and was taken by the duke of Bragança in 1640. The city was nearly destroyed by an earthquake, when 30,000 or 40,000 persons lost their lives, Nov. 1, 1755. Lisbon was in possession of the French from Nov. 30, 1807, till Sept. 15, 1808, when they retired in accordance with the terms of the convention of Cintra (q.v.). The duke of Wellington landed here April 22, 1809, upon taking command of the army for the liberation of the peninsula. A mausoleum in the English cemetery is erected over the grave of Fielding the novelist, who died here in 1754. The Bank of Lisbon suspended payment Dec. 7, 1827. Insurrectionary movements occurred here March 1, and lasted to March 5 and April 25, 1828. The troops revolted against Don Miguel, Aug. 21, 1831, on which occasion 300 lives were lost. A mutiny amongst a portion of the garrison occurred Feb. 13, 1838.

**Lisburn** (Ireland).—Sir Fulk Conway erected a castle at Lisburn, A.D. 1610, and the town was built by one of his descendants in 1627. It was destroyed by the Irish rebels in 1641, and was burned in 1707.

**Lisieux** (France).—The inhabitants of this town, the ancient Noviomagus, afterwards called Lexovii, joined in the Gallic struggle against Cæsar B.C. 52. The Saxons pillaged it in the 4th, and the Normans in the 8th century. It has been frequently besieged. Councils were held here in 1055, and in October, 1106.

**Lismore** (Bishopric).—This Irish bishopric was founded by St. Carthagh about A.D. 631. Attempts were made to unite it with Waterford in 1225 and 1326; and the union was finally effected by Edward III. Oct. 2, 1363.
LISMORE (Ireland).—This city, in the county of Waterford, is celebrated for its castle, which was founded by King John when earl of Moreton, A.D. 1185. In 1189 it was seized by the natives, and in 1589 was granted to Sir Walter Raleigh, by whom it was sold to Sir Richard Boyle, first earl of Cork. Lismore was unsuccessfully besieged by the Irish rebels in 1641 and in 1643, but it was taken by Lord Castlehaven in 1645.

Lissa (Adriatic Sea).—This island, the ancient Issa, was colonized by Dionysius the Elder, B.C. 335. It was besieged by Agron, king of Illyria, B.C. 232, but was liberated B.C. 229. The Venetians wrested it from the Normans A.D. 1073. In more modern times Lissa is famous as the scene of a victory over the French fleet, gained by Sir W. Hoste in 1811.

Lissa (Battle). (See Leuthen.)

Lissus (Illyria), now called Alessio or Losch, was founded by Dionysius the Elder, circ. B.C. 385. Scanderbeg, after his victorious campaign in Albania, died at this town, Jan. 17, 1467, A.D., and it was taken by the Turks in 1476.

Listowel (Ireland) was captured by Sir Charles Wilmot A.D. 1600.

Litanies, or Rogations, formerly a general name for prayers, were instituted by Mamercus, bishop of Vienne, in France, about A.D. 450, and established by a decree of the council of Orleans, July 10, 511. Gregory I. instituted such forms at Rome, one in particular under the name of Litania septiformis, in 598. Henry VIII. ordered a litany or procession to be set forth in English, "because the prayers being in an unknown tongue, made the people negligent in coming to church," June 8, 1544. Hallam says it had been translated into English in 1542. In the Common Prayer Book of 1549, the Litany was placed between the Communion office and the office for baptism. In 1552 it was placed in its present position; and it was made a distinct service till 1661.

LITERARY CLUB. (See Cluny.)

LITERARY FUND (London).—The Royal Literary Fund was founded by David Williams, A.D. 1790, and incorporated in 1818. Its object is to relieve authors who have been reduced to want through age or misfortune. At the anniversary meeting, April 12, 1804, the prince of Wales, afterwards George IV., was proposed as a patron.

LITHIUM.—This metal was discovered by Arfwedson, A.D. 1817.

LITOGRAPHY.—This art was invented by Alois Senefelder, a native of Prague, who produced a piece of music, his first impression from stone, A.D. 1796. He secured a patent for his invention in several German states, extending over fifteen years, in 1800, and published a work on the subject in 1817. A partnership was entered into, and establishments were formed in London and Paris, in 1799, but they did not succeed. Another at Munich in 1806 was more prosperous; and the inventor was ultimately appointed to the inspectorship of the Royal Lithographic Establishment, in October, 1809. The Society for the Encouragement of Arts in London voted Senefelder their gold medal in 1819.

LITHOTOMY.—The operation of cutting for the stone was practised by Ammonius of Alexandria about B.C. 250, and by Celsus about A.D. 17. They employed the method known as the less apparatus. The high operation was first practised at Paris by Colot in 1475; the greater apparatus, so called from the numerous instruments employed, was invented by Johannes de Romanis in 1500, and published by Maranus Sanctus in 1524. The lateral operation was invented by Franco before 1561, and was taught at Paris by Frere Jacques in 1697. (See Lithotritv.)

LITHOTRITV.—This operation is believed to have been practised by the surgeons of Alexandria before the Christian æra, though it was first suggested in modern times by Grutthuizen, a Bavarian surgeon, who constructed an apparatus for the purpose, A.D. 1812. Great improvements have been since effected in the apparatus.

LITHUANIA (Russia) occupied by a savage people, whose origin is unknown, A.D. 1069, was conquered by the Knights Sword-bearers, and the Knights of Jerusalem in the 13th century. Having united the independent tribes, and concentrated his power, Ringold assumed the title of grand-duke in 1230, and was succeeded by his son Mendog, who embraced Christianity in 1252, though he abjured it in 1255. Witenes acquired the supreme power in 1282, which he transmitted to his son Ghedemin in 1315. Jaghellen came to the throne in 1381; and on condition of receiving in marriage Hedwige, daughter of the king of Poland, together with the crown of that country, he consented to become a Christian, and was baptized with his nobles and many of his subjects, Feb. 14, 1386. At the diet of Lublin, in 1569, the two countries were converted into a united. Part of it passed with Poland under the sway of Russia, Feb. 17, 1772, and the remainder in March, 1794. The ancient serpent-worship is said to have prevailed in Lithuania till late in the 15th century. An insurrection, which was soon suppressed, occurred in Lithuania in 1831. The peasants took part with Russia, during the Polish revolt of 1848.

LITTLE ROCK (United States).—This town in Arkansas was founded A.D. 1829.

LITURGIES were used in the Temple service of the Jews in the time of the Apostles, and according to Mosheim, among the early Christians, "each individual bishop pre­scribed to his own flock such a form of public worship as he thought best." Uniformity in the churches of a province was agreed to at various councils, and amongst others at those of Agda, Sept. 11, 506, and of Gironne, June 8, 517. The Breviary of the Romish church was in use about the middle of the 5th century. Henry VIII.'s "Primer" was published in 1535. The Liturgy, compiled under the superintendence of Cranmer, by
order of Edward VI., was issued in 1549, and revised by a resolution of parliament, April 29, 1569. The English Liturgy in its present form was established by an act of parliament, which received the royal assent May 19, 1662.

LIVATOR, (Treaty,) was concluded between Austria and the Ottoman empire, A.D. 1606. The Turks relinquished their claim to tribute from Hungary, and, for the first time in the history of their diplomacy, conceded to conclude peace with the formalities used by the other nations of Europe.

LIVERIES were not assumed by the trade companies of London before the reign of Edward I.; but they afterwards became so dangerous as party badges, that they were regulated by 16 Rich. II. c. 4 (1392), and by 20 Rich. II. c. 2 (1396). The practice was abandoned in the first and seventh years of Henry IV.'s reign; again, by 13 Hen. IV. c. 3 (1411), and by Edw. IV. c. 2 (1469) by other statutes. They were, however, allowed at coronations, and in great public ceremonies. In consequence of these restrictions, the companies were compelled to obtain the king's licence before adopting liveries.

LIVERPOOL (Lancashire).—The origin of this important town, and even the etymology of its name, are involved in great obscurity. Baines (Hist. of Liverpool, p. 55) considers the first portion of the name to be derived from the Gothic word "lade" or "lithie," the sea; but other authorities regard it as the waterfowl called the "liver," which they state to have abounded on the shores of the Mersey at an early date. The site of Liverpool was granted by William I. to Roger of Ponton. It was afterwards purchased by King John, and passed through the hands of the earls of Derby and Chester, until it was granted to the house of Lancaster by Henry III. On the accession of Henry IV. it became the property of the crown, and it continued to be so until it was sold by Charles I. in 1628.

A.D. 1171. Henry II. embarks from Liverpool on his expedition to Ireland.
1190. Liverpool is first mentioned in a deed of this year.
1202. Liverpool castle is founded by King John, most probably about this year. John, and passed through the hands of the earls of Derby and Chester, until it was granted to the house of Lancaster by Henry III. On the accession of Henry IV. it became the property of the crown, and it continued to be so until it was sold by Charles I. in 1628.
1190. Liverpool is first mentioned in a deed of this year.
1202. Liverpool castle is founded by King John, most probably about this year. John, and passed through the hands of the earls of Derby and Chester, until it was granted to the house of Lancaster by Henry III. On the accession of Henry IV. it became the property of the crown, and it continued to be so until it was sold by Charles I. in 1628.

1217. The first mention of a mayor of Liverpool is made under this date.
1621. The plague rages fearfully.
1624. A quarrel takes place in Liverpool between the masters of Thomas Stanley and Sir Richard Molyneux.
1648. The plague carries off many of the inhabitants.
1651. The old haven, which was founded in the reign of Edward III., is totally destroyed by a tempest.
1657. The inhbitant petition Queen Elizabeth in behalf of her "poor decayed town of Liverpool."
the exchequer Jan. 31, 1823, in place of Mr. N. Vansittart, who had resigned, and
was created to the chancellorship of the archbishopric of York, and the
created chancellor of the university of Oxford. The archbishopric of York
was vacant at the time of his creation and he was made a member of the
board of trade, in place of Mr. C. Bathurst. Mr. Huskisson as treasurer of the
navy, and president of the board of trade, obtained a seat in the cabinet in 1825.
The earl of Liverpool was attacked by apoplexy, Saturday, Feb. 17, 1827, and a
new ministry was formed in April. The earl of Liverpool died Dec. 4, 1828. (See Canning Admi-
istration.)

Livonia (Russia) was visited by some Baltic traders from Bremen, A.D. 1155. A
mission of German monks converted the natives to Christianity in 1186. The
"Brothers of the Sword" subdued the country in 1237. Kettler, the last grand master of the
order, abdicated his power in favour of Poland in 1561. It was transferred to Sweden
by the treaty of Oliva, May 3, 1660. Peter the Great of Russia made himself master of the
country in 1710, and it was finally annexed to Russia by the treaty of Nyystadt,
Aug. 30, 1721. Alexander II. liberated the serfs of Livonia Sept. 24, 1813.

Llandaff (Bishopric).—According to
tradition, this bishopric was created by King
Lucius about A.D. 580, and Elvanus was the
first bishop. Dubrithus, who is said to have
died in 612, is the first bishop respecting whom
anything is certainly known. The
creation of Llandaff was founded and en-
dowed in Nov. 1423.

Llandwey (Battle).—Llewelyn,
who had made a descent into the marches,
was defeated and slain near the town of
Llandewy, or Llandeilo-Fawr, Caermarthen-
shire, Dec. 11, 1282.

Llerenga (Battle).—Lord Combermere
defeated a French army commanded by
Drouet, near this town, in Spain, April 11, 1812.

Lloyd's (London).—A number of mer-
chants who were in the habit of congregat-
ing at a coffee-house kept by a person
named Lloyd in Aucheurch Street, Lombard
Street, to transact business, early in the
18th century, afterwards removed to Pope's
Head Alley, and thence to the Royal
Exchange in 1774. On the destruction of the
Royal Exchange by fire, the business was
transferred to the South-Sea House, Old
Broad Street, Jan. 10, 1838, and thence
to the Royal Exchange, Oct. 28, 1844.

Loadstone.—The attractive power of
the natural magnet was known to the ancient
Greeks in Homer's time, B.C. 962, and it is
alleged to have been known by the Chinese
B.C. 1000. The directive power of this sub-
stance was probably discovered in Europe
about A.D. 1150, although a Chinese writer
describes it A.D. 1111. The Neapolitans
maintain that it was adapted to the compass
for maritime purposes by a citizen of Amal-
phi in 1302.

Loano (Battle).—The French defeated
an Austrian and Sardinian army in the valley
of Loano, Nov. 23, 1795.
LOANS.—Loans to the public on parliamentary security, resorted to in place of aids or benevolences (q.v.), originated in 1382, when Richard II. demanded the loan of £40,000 for the defence of the kingdom, and the merchants refused to lend because they had formerly been subjected to prosecutions under pretence of having defrauded the sovereign. Cardinal Wolsey resorted to forced loans as a means of recruiting his exchequer in 1522 and 1525, and parliament afterwards released the king from all obligation to pay the debts so contracted, by 35 Hen. VIII. c. 12 (1543). Charles I. demanded loans from his subjects in 1626, and an act of council was passed, requiring a general loan from the subject. Necker (1776-1790) introduced loans into the French financial system.

LOBAU (Germany).—This island in the Danube was captured by Napoleon I. May 19, 1813, and the French army retired here after the battle of Aspern, May 22. A council of war was held by Napoleon at ten at night. Extensive works were erected by the French, who crossed to the opposite bank of the river, July 2-4.

LOBOS, or SEAL ISLANDS (Pacific Ocean), were discovered by the Spaniards, towards the end of the 16th century, though the Americans pretend to have discovered them in 1823. Lord Anson visited the islands, Nov. 10, 1741. The guano for which they are celebrated, was noticed in Aco'st'a's work on the Indies, published at Seville in 1590.

LOCHEVEN CASTLE (Kinross-shire), said to have been founded by Congal, son of Dorgart, king of the Picts, in the 5th century, was the prison to which Mary, queen of Scots, was conveyed after the battle of Carberry-hill, June 16, 1567. She made her escape by the aid of George Douglas, May 2, 1568.

LOCKS AND KEYS.—The most ancient lock and key known is one discovered by Bonomi at Khorsabad, which is believed to be upwards of 4,000 years old. It is of wood, and exceedingly clumsy. Locks and keys were used by the Israelites at a very early period, as appears from Judges iii. 23-25 (b.c. 1434). The classical authors attributed the invention to the Lacedaemonians, whose celebrated lock was a padlock in principle. Numerous bronze and iron keys, differing little from the more common kinds in use at the present day, were found at Pompeii and Herculanum. The most beautiful and ingenious medieval locks and keys are those of the 16th century. The first patent for their improvement was granted to George Black, May 27, 1774, but no great advance was made until Barron patented his ‘double-acting tumbler lock,’ Oct. 31, 1778. Bramah’s lock was patented April 23, 1784; Chubb’s original lock, Feb. 3, 1818; Newell’s American Parapontic lock was invented in 1841, and patented in England April 15, 1851, and Hobbs’s protector lock was patented Feb. 23, 1852.

LOCOMOTIVE.—The idea of the construction of a locomotive was thrown out by Watt A.D. 1759, and he patented one in 1764. Richard Trevithick made one for the Merthyr Tydfil Railway in 1804, and Brunton another of a different description in 1813. George Stephenson's locomotive with toothed wheels, was tried at West Moor, Killingworth, July 25, 1814. The utility of locomotives may be considered to have been fully established when the 'Rocket,' the joint production of the two Stephensons, performed its experimental trip on the Liverpool and Manchester Railway Oct. 6, 1829.

LOCRI, or LOCRI EPIZEPHYRI (Italy).—This celebrated city, the modern Gerace, was founded by a colony of Locrians from Greece, b.c. 710, 683, or 673, according to different authorities, and received a written code of laws from Zaleucus, b.c. 600. Tradition states that 10,000 of its inhabitants were totally defeated 150,000 Carthaginians at the battle of the Sages, b.c. 510. Much uncertainty prevails respecting the alleged victory. Locri was enriched by the territory of Caulonia, b.c. 359, and by that of Hipponium in b.c. 388; but the latter city was taken by the Carthaginians b.c. 379. Dionysius the tyrant retired to Locri on his expulsion from Syracuse, b.c. 356, and established an arbitrary and oppressive government. The inhabitants assisted the Carthaginians against the Romans in the second Punic war, b.c. 216, and their city was invested by the consul Crispinus, who was compelled to raise the siege by Hannibal b.c. 209. It was, however, taken by Scipio b.c. 205, and never regained its former importance. It existed in the 6th century of the Christian era, and was probably finally destroyed by the Saracens.

LOCRI, or LOCRIANS.—The Locrians, according to Clinton, were a tribe of Leleges who existed before the time of Amphictyon (b.c. 1521), but derived their name from his grandson Locrus. They soon became intermingled with the Hellenes, and in historical times are distinguished into eastern and western Locrians. The eastern Locrians are mentioned by Homer as accompanying Ajax to the Trojan war, but the western Locrians do not appear till the Peloponnesian war, when they were in a semi-barbarous condition. They promised to assist the Athenians against the Ætolians, b.c. 426, but afterwards submitted to Sparta, and joined the Ætolian League. The second sacred war was undertaken against them b.c. 339, and they, with their allies the Thébans and Athenians, were defeated by Philip of Macedon, at Chaeroneis, Aug. 7, b.c. 338.

Locusts formed one of the ten plagues of Egypt, b.c. 1491. A swarm of these insects invaded Italy, and being drowned in the sea, produced a pestilence, which carried off nearly a million men and beasts, a.d. 591. In Venice 30,000 persons perished on account of a famine caused by their depredations in 1478. A cloud of locusts entered Russia, and
were found lying dead in heaps to a depth of four feet in 1650. This island was visited by a large number in 1748. Barbary in 1724, and South Africa in 1797, suffered to an alarming degree from their ravages.

**Lodi (Battle).—**Napoleon Bonaparte defeated the Austrians in a hotly-contested battle at the bridge over the Adda, at Lodi, May 10, 1796. For his bravery in this action Napoleon Bonaparte received the name of “Le Petit Caporal,” by which he was afterwards known in the French army.

**Lodi (Italy).—**The ancient Lodi Pompeia stood near this town. It became a republic, and was destroyed by the Milanese A.D. 1112. The emperor Frederick I. built Lodi about five miles from the site of Laus Pompeia, in 1158. The duke of Urbino took Lodi in June, 1526. The French occupied Lodi in 1800. Napoleon I. made Melzi duke of Lodi in 1807. The church of the Incoronata was founded in 1476.

**Lodi (Treaty).—**A treaty of peace was signed at this place, between Sforza, duke of Milan, and the Venetians, April 5, 1434.

**Logarithms.** The invention of Baron Napier of Merchiston, were first made known to the learned world by his Latin work, “Mirifici Logarithmorum Canonis Descriptio, seu Arithmeticae Unum Supputationum Mirabilis Abbreviatio,” published A.D. 1614. Henry Briggs, of Gresham College, London, made some improvements upon them, and printed a set of tables in 1618. Gunter applied them to navigation in 1620.

**Logic.**—Aristotle (B.C. 384—322) was for many years almost the only authority in matters of abstract reasoning; the first who ventured to originate a new system of the subject was Marius Nizolius, who published his work “De Veris Principiis, &c.” in 1553. Aconcio’s treatise, “De Methodo,” appeared in 1558, and Lord Bacon’s “Novum Organum” in 1620. Hobbes’ system was published in 1655, in his “Elementa Philosophiae,” and Gassendi’s “Syntagma Philosophicum” appeared in 1658, two years after the death of the author. Locke’s views on logic were announced in the “Essay on the Human Understanding,” which was published in 1690, and the Cartesian system was published in the posthumous works of Descartes in 1701. Amongst modern writers on logic, we may mention Archbishop Whately, whose “Elements of Logic” appeared in 1826; John Stuart Mill, whose “System of Logic” appeared in 1843; Sir William Hamilton, and Dr. Latham.

**Logierian System.**—This system of musical instruments was invented by John Bernard Logier, born at Hesse-Cassel in 1780. In 1797 he first turned his attention to the formation of a system for facilitating the acquirement of music. He obtained a patent for the chiropast in 1814, and his system was soon after adopted in Dublin. Academies on this plan were established in England and Scotland, and one was opened in London in 1816. The system flourished from 1817 to 1827. Logier died in 1846.

**Log-line is known to have been used in navigation as early as A.D. 1570. Bourne mentions it in 1577.**

**Logographic Printing.**—A mode of printing with types expressing entire words or common radices and terminations, instead of single letters, was invented by Mr. Walter, of the Times, and Mr. Henry Johnson, about the year 1778, and was described in a work published by Mr. Johnson in 1783. The Daily Universal Register, a four-page paper, designed to introduce this new system of printing to the public, appeared Jan. 13, 1785. The price was 2½d., and its name was changed to that of the Times, Jan. 1, 1788.

**Logwood.**—This dye was introduced into England soon after the accession of Queen Elizabeth; but owing to the fugitive character of the tints it produced, was prohibited and ordered to be forfeited and burnt by 23 Eliz. c. 9 (1681). This act was repealed by 13 & 14 Charles II. c. 11, s. 26 (1692). The English logwood-cutters formed their settlement on the Bay of Campeachy about 1669.

**Loi§ (France).—**On the banks of this river, the ancient Liger or Ligerius, Julius Caesar defeated the Turunes B.c. 57. The Danes ascended the river as far as Tours A.D. 833 and in 882. The embarkments of the Loire gave way, causing a great loss of life and destruction of property in 1846, and in June, 1856.

**Loja, or Loyca (Spain).—**Ferdinand besieged this town July 1, 1482, raised the siege in 1483, and returned and captured it in 1486.

**Lojera (Sea-fight).—**A Genoese fleet of fifty-nine galleys, commanded by Antonio Grimaldi, attacked an Aragonese squadron of twenty ships, under the command of Juan Trujillo, on the northern coast of Sardinia, Aug. 29, 1353. The Spaniards were on the point of surrendering, when the Venetian fleet under Pisani came to their assistance, and completely changed the fortune of the day. Only eighteen of the Genoese galleys were saved from destruction or capture, and the total loss of the vanquished in killed, wounded, and prisoners, amounted to nearly 5,000 men. This defeat struck a deathblow at the power and renown of Genoa.

**Lollards.**—The origin of this term, applied to a religious sect of the 14th century, is by some authorities derived from the German lallen, lollen, or lullen, “to sing in a low voice;” and by others is referred to Walter Lollard, who was burnt alive at Cologne A.D. 1322. The early Lollards tended the sick and followed the dead to the grave, chanting in mournful tones. They were constituted a religious order through the influence of Charles, duke of Burgundy, in 1472. Julius conferred further privileges upon them in 1506. The name was also applied to the society of itinerant preachers established by Wycliffe in England in 1379, and his followers. Unlicensed preachers, or Lollards,
were ordered to be imprisoned until they justified themselves according to the law and reason of the Holy Ghost, by 5 Rich. II. st. 2, c. 5 (1381). Henry IV., under pretence that they conspired against him, punished them with great severity. By 2 Hen. IV. c. 15 (1401), no person was allowed to preach without the bishop's licence, and heretics who refused to recant were to die at the stake. A similar act was passed in Scotland in 1425. William Sautre was burnt at London, under the English statute, Feb. 12, 1401. Thomas Badby, a Lollard, was executed in April, 1410. Sir John Oldcastle, commonly called Lord Cobham, was condemned as a heretic Sept. 25, 1413. He escaped from the Tower, was captured in Wales in 1418, and executed in London in the month of December in the same year.

Lombard Merchants arrived in London from Italy for the purpose of prosecuting their trade of usury, A.D. 1229. Edward III., then about to enter upon a war with France, issued a commission for seizing all their estates in 1337. The company of Lombard Merchants was made answerable for the debts of their fellows by 25 Edw. III. st. 5, c. 23 (1352). The street in which they took up their residence in London is named Lombard Street after them.

Lombardy (Italy).—The fertile plains of Lombardy were originally inhabited by the Sibylline Etruscans, expelled by a tribe of Celts about B.C. 1400. The Etruscans established their authority over the country about B.C. 1000, and retained it until expelled by the Gauls B.C. 506, when it received the name of Gallia Cisalpina. (See Gaul.) It was ravaged by Attila A.D. 452, became subject to the Heruli in 476, was conquered by the Ostrogoths in 489, by the troops of the Eastern empire under Narses in 554, and by the Longobardi (q.v.), from whom it received its name, in 568. The empire of the Longobardi was terminated by Charlemagne in 774, when Lombardy, with the rest of the peninsula, formed the Frankish kingdom of Italy. Lombardy submitted to Otho the Great in 961, and during his reign, and that of his successors, the cities gradually adopted independent forms of government, each possessing separate laws and customs. In 1002 they elected Ardouin, marquis of Ivrea, as king, in opposition to the Germans, who nominated Henry II., and the country was in consequence involved in war till the death of Ardouin in 1015. On the death of Henry II. in 1024, the Lombards again made futile efforts to obtain an independent sovereign. A civil war between the "gentlemen" of Lombardy and Eribert, archbishop of Milan, commenced 1033, and lasted till Conrad II. promulgated his feudal edict in 1037. In 1107 Milan became a republic, and Lodii, Cremona, Verona, Genoa, Pavia, and other cities, soon followed her example, and asserted their new-born independence by rushing into civil war. During the 11th and 12th centuries they united to form the Lombard leagues against the German emperors. (See Leagues.) They were afterwards desolated by the contentions of the Guelphs and Ghibelines, which they sought to escape by purchasing protection from Charles of Anjou, king of Sicily (1265—1285). The history of Lombardy is, after this period, the history of the several republics of which it was composed, until the peace of Aix-la-Chapelle, Oct. 13, 1748, by which the greatest part of the country was attached to the house of Austria. In Oct. 1796, Bonaparte erected Lombardy into the Transpadane republic, which was incorporated with the Cisalpine republic in June, 1797, and formed part of the Italian republic in 1802, and of the kingdom of Italy in 1806. The Lombardo-Venetian kingdom was created by the allies, and given to Austria, in lieu of her Flemish territories, by the treaty of Paris, Nov. 9, 1815. In March, 1848, Lombardy revolted from Austria, and joined the king of Sardinia, but it was reduced to subjection by the battles of Custozza, July 23, 1848, and of Novara, March 24, 1849. By the peace of Villafranca, July 11, 1859, the emperor of Austria ceded nearly all Lombardy to the emperor of the French, who transferred it to Victor Emanuel, king of Sardinia. (See Italy.)

Lonato (Battle).—Napoleon Bonaparte defeated the Austrians at this town, in Lombardy, Aug. 3, 1796.

London (Bishop).—Tradition asserts that an archepiscopal see was established at London by Theamus, during the reign of King Lucius, A.D. 180, and that sixteen prelates completed the number of archbishops. When Pope Gregory dispatched Augustine to England in 596, it was his intention that London and York should form the metropolitan sees of the country; but Augustine established his seat at Canterbury. Mellitus became the first bishop of London in 604. He was expelled in 616, and had no successor till 656, when Cedd was consecrated by Finan, bishop of Northumbria. By an order in council dated Aug. 8, 1845, the county of Hertford and part of Essex were separated from the diocese of London and annexed to Rochester.

London (Canada) was founded A.D. 1826. It was the scene of extensive conflagrations in 1844 and 1845.

London (England) is first mentioned under the name of Londinium, by Tacitus, in his description of the revolt of the Britons in the reign of Nero, A.D. 61. Tacitus speaks of it as having been at that time famed as the resort of traders, and for its affluence and commerce. In the time of Ammianus Marcellinus, A.D. 362, it was called Augusta, an appellation frequently bestowed upon great cities, and in the Chronography of Ravenna it is styled Londinium Augusta. Pennant derives the name from Llyn din,—llyn being, in Celtic, a lake, and din a town. Julius Cesar does not mention London by name, though it probably existed when he invaded England, B.c. 54.
1222. A.D.

1101. Another council is held at London by Augustine.

1108. Egelbert, king of Kent, founds St. Paul's church.

1151. The borough of Wilmot commences.

1166. Henry I, grants the city a charter.

1189. A council is held at London.

1200. A charter is held at London.

1238. Another council is held at London.

1259. A.D.

A.D.

1342. 605. A.D.

1343. Another council is held at London.

1347. The corporation grants more than 50,000 persons.

1394. July 23. A council is held at London.

1413. A council against Sir John Oldcastle and the Lollards breaks up June 25.

1450. May 32. A council is held at London.

1451. Another council is held at London.

1460. The Guildhall is built.

1463. A council against Sir John Oldcastle and the Lollards is held.

1471. Falconbridge threatens London, and burns half the houses on the bridge.

1502. First ditch is made navigable. The first lord mayor's dinner is held at Guildhall this year.

1503. St. Paul's church is founded.

1512. The corporation grants more than 50,000 persons.

1538. July 27. A royal proclamation prohibits the erection of any new house or tenements, "where no former house hath been known to have been," within three miles of the city gates.

1539. The corporation grants more than 50,000 persons.

1550. The city's surveyor for conveying Thames water is made at Dowgate.

1577. Aug. 24. William Lambe completes a conduit at Holborn Cross, which receives in consequence the name of Lamb's Conduit-fields.

1598. July 27. A royal proclamation prohibits the erection of any new house or tenements, "where no former house hath been known to have been," within three miles of the city gates.

1625. The city's surveyor for conveying Thames water is made at Dowgate.

1652. The first Bill of Mortality is published.

1663. June 7. The first stone of the Royal Exchange is laid.

1677. The city's surveyor for conveying Thames water is made at Dowgate.

1727. Aug. 24. William Lambe completes a conduit at Holborn Cross, which receives in consequence the name of Lamb's Conduit-fields.

1739. July 27. A royal proclamation prohibits the erection of any new house or tenements, "where no former house hath been known to have been," within three miles of the city gates.

1756. The city's surveyor for conveying Thames water is made at Dowgate.

1795. St. Paul's church is founded.

1804. The plague rages violently.

1805. The gopower engine is published.

1807. June 10. The new Exchange in the Strand is completed. Sept. 24. Whitefriars and Blackfriars are made sanctuaries, by a warrant under the privy seal.

1813. Sept. 25. Completion of the New River (q.v.).

1823. The plague again rages London.

1830. July 24. The erection of new buildings within a mile from the city gates, on ground previously occupied, is again prohibited.

1833. Nov. 15. The Green-cost School in Tothill Fields is erected by letters patent.

1845. Into Jones superintends the laying out of Lincoln's Inn Fields.

1850. Whitefriars are made sanctuaries, by a warrant under the privy seal.

1863. London is fortified.

1875. Sept. 25. The lord mayor and aldermen are elected to the Tower.

1879. March 3. The Puritan soldier pulls down Salisbury court theatre, the Fortune theatre, and the Cockpit in Drury Lane.

1880. Cromwell allows the Jews to settle in London.

1882. The first coffee-house is opened in London.
A.D.
1661. April 14. The Maypole in the Strand is

1663. April 8. Opening of Drury-lane theatre (q. v.). April 22. The Royal Society (q. v.) is incor-

1665. The year of the great plague. The mortality is estimated at 100,000 persons. Nov. 7. The London Gazette is commenced, being called at first the Oxford Gazette.

1666. Sept. 5. The great fire commences. It rages for several days, destroys 13,000 houses and 89 churches. Sept. 13. A proclamation is issued for rebuilding the city.

1667. The Rebuilding Act is passed (19 Charles II. c. 15). The Common Council pass an act for the prevention of fires in time to come.

1670. Temple Bar is rebuilt.

1671. The Monument is commenced.

1679. Jan. 11. The first stone of new St. Paul's is laid.

1679. Feb. 10. The Bagnio, in Newgate Street, is built and opened.

1683. Aug. 23. The penny post is introduced.

1684. Feb. 11. Blackfriars Bridge, is destroyed by fire.

1687. The privilege of sanctuary claimed by fraudulent debtors in Whitefriars, the Savoy, the Mortimer &c., is abolished by S. & W. Ill. c. 27.

1688. The first workhouse in London is erected in Bishopsgate Street.

1702. May. The first storm of this year does considerable injury in London.

1704. April 9. The Haymarket theatre is opened.

1705. May fair is abolished, and Bartholomew fair is restricted to three days.

1709. Nov. 5. Sacheverell's celebrated sermon is preached in St. Paul's.

1711. Fifty new churches are ordered to be erected by 10 Anne, c. 11.

1715. The South Sea Company is formed. (See SOUTH-SEA BUBBLE.)

1719. The Maypole in the Strand is taken down.

1721. The Chelsea water-works are formed.

1727. April 7. The Serpentine is formed by Queen Catherine.

1731. The New Exchange in the Strand is taken down. Sept. 30. Stock's-market is removed to Farringdon Street, and called Fleet-market (q. v.), and Fleet ditch is covered in.

1739. Oct. 17. The charter of the Foundling Hospital is obtained. Oct. 23. The first stone of the Mason House is laid.

1740. The first circulating library is established in London by Mr. Bathe.

1744. April 7. Banqueting Gardens are opened.

1751. Feb. 20. The first statue erected of the British Museum (q. v.);

1754. March 22. The Society of Arts is formed.

1756. May 10. Whitfield's chapel, Tottenham Court Road, is founded.

A.D.
1757. King's (or Queen's) Bench prison is built.

1758. The houses are removed from London bridge.

1760. Oct. 14. Blackfriars bridge is foun-

1761-2. The Cock-Lane ghost (q. v.). June 29. The City Road is opened.

1764. June. The houses of London are first numbered.

1766. Sir George Blundell is removed.

1768. Dec. 10. The Royal Academy (q. v.) is established.

1770. May 31. Alderman Beckford lays the founda-

1771. March 27. The lord mayor, Brackenbury, Esq., is committed to the Tower by a warrant of the Speaker of the House of Commons.

1772. April 28. The Pantheon is opened.

1777. Portland Place is built.

1780. The Gordon riots (q. v.).

1789. Southwark town is commenced.

1791. Camden-town is commenced.

1794. Goldsmith Fields prison is opened.

1795. The stock of the South Sea Company is removed.

1797. Jan. 29. Gas is first employed in the streets of London in Pall Mall.

1811. The Mint is completed. Oct. 11. The first stone of Waterloo bridge is laid. The Egyptian Hall is built.

1812. Regent Street is commenced.

1814. Sept. Southwark bridge is commenced.

1815. May 4. The first stone of the London Institution, Finsbury Circus, is laid.

1816. June 24. Vauxhall bridge is opened.

1819. The Burlington Arcade is built.

1821. The Bank of England is completed by Sir John Soane.

1824. May 2. The first pile of New London bridge is driven. May 10. The National Gallery (q. v.) is opened. Dec. 2. The first stone of the London Mechanics' Institute, Southwark, is laid.

1825. March 2. The Thames Tunnel is commenced. Buckingham Palace is begun this year.

1826. April 30. London University is founded. The Turnpike Act (7 & 8 Geo. IV. c. 24) is passed, which removes twenty-seven turnpikes in one day, June 14.

1830. Sept. 10. King's College, Strand, is comm-

1832. July 2. Hungerford Market is opened.

1833. July 13. Buckingham Palace is first inhabited. Nov. 3. The Queen dines at Guild-

1838. Jan. 10. The Royal Exchange is destroyed by fire. April 9. The National Gallery is opened. Sept. 17. The London and Bir-

1839. July 1. The Great Western railway is opened as far as Paddington Station.

1840. Jan. 10. The penny postage comes into opera-

501
1842. May 11. The London and Southampton Railway is opened.

1844. Feb. 7. The railway to Dover is opened. April. Florence Nightingale is taken down. May 1. Trafalgar Square is opened. Oct. 28. The Royal Exchange is opened by the Queen.

1847. April 19. The new portico of the British Museum is opened.

1848. April 10. The great Charter meeting is held on Lincoln's Inn Field. May. Street orders are introduced.

1853. July 27. The London cabmen "strike" for two or three days. Oct. 5. Special religious services are held for averting the cholera.

LONDON (Gates).—The Old Roman gates of
London were four in number, viz., Ludgat,
said to have been built by King Lud in A.D. 66;
Aldgate, named on account of its antiquity;
Cripplegate; and Dowgate. Besides these,
were Bishopsgate, which was built before
A.D. 685; Aldersgate; Newgate, which was
erected by Henry I., or Stephen; Moorgate,
built in 1415; and Temple Bar, which was
rebuilt by Sir Christopher Wren in 1670.

London (Treaties).—Three treaties were
concluded at London between Louis XII
of France, and Henry VIII., Aug. 7, 1514.
The first provided for an alliance, offensive
and defensive, between France and England;
the second for a marriage between Louis XII.
and Mary, the youngest sister of Henry VIII.;
and the third secured to Henry VIII. the
payment annually, for ten years, of 100,000
gold crowns, in satisfaction of arrears.—
A treaty between Russia, France, and Eng-
land, for the settlement of the affairs of
Greece, was concluded at London July 6,
1827.

London Bridge.—The first bridge over
the Thames at London was built of wood,
about A.D. 994, and stood lower down the
river, near Botolph's wharf. It was nearly
demolished by Olaf, king of Denmark, in
1008, and the ruins were carried away by a
flood in 1091. In 1097 Will. II. imposed a
heavy tax for its reconstruction. The new
bridge, destroyed by fire in 1136, was
restored in 1185. The old stone bridge was
commenced by Peter of Colechurch in 1176,
and was completed in 1209. It was 326 feet
long, 40 feet wide, and about 60 feet above
the water, and stood upon nineteen pointed
arches, between which were massive piers.
A handsome stone chapel, dedicated to St.
Thomas Becket, stood upon the centre pier,
and appears to have been the only building
erected upon the bridge at its foundation,
though in course of time a row of houses on
each side of the road was added. The entire
construction was defended by a drawbridge.
A fire, which occurred here July 10, 1312,
occaisioned the death of more than 3,000 per-
sions, and did considerable damage to the
bridge itself; and in 1252 the frost destroyed
five of the arches. The custom of placing
the heads of traitors over London Bridge
was commenced by Edward I. in August,
1305. A celebrated passage of arms between
an English and a Scotch knight took place on
the bridge April 23, 1390; and on the oc-
casion of the entry of Richard II. and his
consort into London, Nov. 13, 1395, nine persons
were killed here, owing to the excessive crow-
ding. The drawbridge tower was erected in
1226, and the great gate and tower on the
Southwark side of the river, together with
two arches of the bridge, fell in Jan. 14, 1407,
but without causing any loss of life. The
houses on the bridge were burnt by Falcon-
bridge during his attempt on London, May 14,
1417, and six houses were also destroyed by
fire Nov. 21, 1594. In 1577 the drawbridge
tower was rebuilt, the heads were removed
to Traitors' gate, the famous Nonsuch House
was erected about 1579, and in 1582 the water-
works were established. A fire which broke
out Feb. 13, 1635, destroyed more than a
third of the houses on the bridge; but the
Great Fire of 1666 did comparatively little
damage. The bridge gate, and several other
buildings, were also burnt down, Sept. 8, 1725.
Owing to the insecure state of the bridge, the
houses were removed in 1757, and a tempo-
rary wooden bridge was erected, and opened
in October. This temporary bridge was de-
stroyed by fire April 11, 1758. The drawbridge
was removed in 1760, and in 1800 active exer-
tions were made for the erection of an en-
tirely new bridge. Nothing was done, how-
ever, till June 15, 1822, when the corporation
offered three premiums for the best designs,
and in December, Messrs. Fowler, Borer,
and Busby were declared the successful com-
petitors. The design ultimately adopted,
however, was that of Mr. John Rennie. The
rebuiding of the bridge was officially referred
to parliament Feb. 19, 1823, and was ordered
to be carried into effect by 4 Geo. IV. c. 50
(July 4, 1823). The first pile was driven
March 15, 1824; the foundation-stone was
laid by Lord Mayor Garratt, June 15, 1825,
and the bridge was opened by William and
Queen Adelaide, Aug. 1, 1831. The con-
tract for building the bridge was £506,000.
The dimensions are as follows:—

| Span of centre arch | 150 | 6 |
| Height of dike from high water | 34 | 0 |
| Piers | 24 | 0 |
| Span of second and fourth arches | 148 | 0 |
| Height of dike from high water | 27 | 0 |
| Piers | 22 | 0 |
| Span of the abutment arches | 133 | 0 |
| Height of dike from high water | 25 | 0 |
| Abutments | 73 | 0 |
| Clear water-way | 120 | 0 |
| Length of bridge, including abutments | 928 | 0 |
| Ditto, without abutments | 782 | 0 |
| Width of bridge from parapet to parapet | 56 | 0 |
| Width of water-way | 49 | 0 |
| Width of each foot-way | 9 | 0 |
| Total height of bridge on east side from low water | 60 | 0 |

Londonderry, or Derry (Ireland).—This
city, situated in the county of the same name,
originated in a monastery founded about
A.D. 546. Its early history is little but a
record of repeated assaults and confirma-
trations by the Irish and Danes. The great
church was built in 1163; and in 1198 the
town was taken by John de Courcy. In 1311
it was granted by Edward II. to Richard de
Burgh. The first English garrison was sta-
tioned in Londonderry in 1566. In 1568 the
town and fort were much injured by an ex-
pllosion in the powder magazine, which caused
the English to leave the place; but it was re-
occupied in 1600. In 1608 the town was burnt
by Sir Cahir O'Doherty, and in 1613 it received
a charter. The town-hall was erected in 1622,
and the cathedral was completed in 1633. On
the breaking out of the rebellion of 1641, Lon-
donderry became the asylum of the Irish Pro-
testants, who successfully defended the place
against the royalists in 1649. The memor-
able siege by James II., commenced April 20, 1689, and terminated in the retreat of the besiegers, July 30. During the interval, 3,200 of the defenders died from wounds or starvation, and the assailants lost about 8,000 men. The town-hall having been burnt during the siege, was rebuilt in 1692. The court-house was commenced in 1813, and the county gaol was completed in 1824. The colossal statue of the Rev. George Walker, who had conducted the defence in 1689, was inaugurated Aug. 12, 1828. The London Literary Society was established in 1834.

**LONDON INSTITUTION.**—This institution for educational purposes was established A.D. 1806 in the Old Jewry, where Professor Porson, who was the first librarian, died in 1808. It was incorporated April 30, 1815. The first stone of the present building in Finsbury Circus was laid May 4, 1815, and it was opened April 21, 1819.

**LONDON STONE.**—Camden considers this stone to be the central milestone from which the British highways radiated; but Stow states that "the cause why this stone was set there (in Cannon Street), the time when, or other memory hereof, is none." The stone was removed from the south to the north side of Cannon Street, Dec. 13, 1742; and in 1798 it was again removed, and built into the outer wall of St. Swithin's Church, Cannon Street.

**LONDON UNIVERSITY.**—Thomas Campbell, the poet, suggested the foundation of a college on the principle of free admission to all sects and denominations, in a letter to Lord Brougham, written in the year 1825, and ground for the establishment of an institution of this kind was obtained by a deed of settlement dated Feb. 11, 1826. The first stone of the London University, in Gower Street, was laid April 30, 1827, and the institution was opened Oct. 1, 1828. An application having been made for a charter April 25 and 26, 1834, a special meeting of the proprietors, to consider the proposals of the government, was held Dec. 2, 1835, and the University of London was incorporated in 1836. This charter was renewed and extended in 1887, 1849, and 1856.

**LONE STAR SOCIETY.**—The English newspapers of Aug. 21, 1852, announced the formation, in Alabama and other Southern American States, of a society called the order of the Lone Star, of which the object was "the extension of the institutions, the power, the influence, and the commerce of the United States over the whole of the Western hemisphere, and the islands of the Atlantic and Pacific oceans."

**LONGARA (Italy).**—On the approach of an allied French and German army, a portion of the citizens of Vicenza took refuge in a large cavern called the grotto of Masano, or Longara, in the mountains near their city, in 1510. L'Hérisson, a French captain, finding it impossible to force a passage into the cavern, lighted faggots at the entrance, when all the inmates, amounting to 6,000, with the exception of one young man, were smothered. In more modern times 700 Arabs were destroyed in a similar manner by the French generals in Algeria (q.v.).

**LONGEVITY.**—The Antediluvians attained an extraordinary age, many of them numbering nearly a thousand years. Methuselah, who lived the longest, was 969 years old when he died. Noah was 500 years old when Shem, Ham, and Japheth were born (Gen. v. 32), and some of his descendants exceeded what are now considered the ordinary limits of human existence, though no one born after the Deluge passed the age of 164 years, or one half of that attained by some of the antediluvians. Terah, the last who exceeded 200, died b.c. 1921, and since his time but few instances are recorded of persons living beyond the term fixed upon in Scripture as the ordinary limit of human existence; "the days of our years are three-score years and ten, and if by reason of strength they be fourscore years, yet is their strength labour and sorrow." Alison, referring to modern times (Hist. of Europe, 1815–52, vol. v. p. 408), states that the oldest inhabitants of the globe known to authentic history have been found amongst the slaves of the West Indies, and speaks of one in Jamaica who attained the age of 180 years. The following list contains a selection of the best-authenticated cases of longevity, though the evidence on which some of these rests is far from being satisfactory.

**LONG ISLAND (Bahamas was discovered by Christopher Columbus A.D. 1492. With the group to which it belongs it was seized by the Spaniards A.D. 1781, and was restored to the British by the treaty of Versailles, 1783.**

**LONG ISLAND (Battle).**—The English, under General Home, routed the American revolutionary forces, commanded by General Putnam, at the village of Flat Bush, in Long Island, Aug. 27, 1776. The English lost 61 killed and 227 wounded, and the rebel army 2,000 men.

**LONG ISLAND (New York).—Captain Weymouth discovered Long Island, A.D. 1605.**

**LONGITUDE. (See Latitude.)**

**LONJMEAL, (Treaty,)** was concluded between the Huguenots and the Roman Catholics, March 23, 1688. It was a mere stratagem on the part of the Roman Catholics to weaken their opponents, and was speedily broken. It was called the Ill-grounded Peace.

**LONG-LIVED ADMINISTRATION, also called the Short-lived Administration, held office Feb. 11 and 12, 1746. The Pelham, or Broad-Bottom Administration, having resigned office Feb. 10, 1746, the earl of Bath accepted the Treasury, with Lord Carlisle as privy seal, Lord Granville as one of the secretaries of state, and Lord Windemere at the Admiralty. George III. was not, however, satisfied with the ministerial arrangements, and the Broad-Bottom Administration (q.v.) was restored to office Feb. 12.**
LONGOBARD.—The name of this German tribe of barbarians is derived either from the length of their beards or from the circumstance of their inhabiting the plains beside the Elbe,—börde or bord signifying a "fertile plain by the side of a river." They are stated by the ancient authors to have been a branch of the Suevi; but Paul Warnefrid, who wrote in the time of Charlemagne, and was himself a Longobard, asserts that they originally migrated from Scandinavia. They first appeared in history during the reign of Augustus, when they were settled between the Elbe and Oder, and but little more was heard of them till the reign of Justinian (A.D. 527—565), by whom they were invited into Noricum and Pannonia. Under their chief Alboin, they invaded Italy in 568, and speedily reduced the greater portion of the country to subjection, establishing their kingdom of Lombardy, which was composed of the modern states of Venice, the Tyrol, the Milanese, Piedmont, Genoa, Mantua, Parma, Modena, Tuscany, a large portion of the papal states, and the greatest part of the kingdom of Naples. (See Lombardy.)

LONG PARLIAMENT, summoned by Charles I., met at Westminster, Tuesday, Nov. 3, 1640, and continued its sittings until it was dissolved by Cromwell, April 20, 1653. The journal of this parliament terminates Tuesday, April 19. It was said of this parliament, that "many thought it never would have a beginning, and afterwards that it never would have an end." Longwy (France), fortified by Vauban, has sustained several sieges. The Prussian army invested it Aug. 20, 1792, and it surrendered Aug. 24.

LOO (Holland).—William III. ratified the peace of Ryswick at his hunting seat of Loo, Sept. 20, 1697. A treaty between Great Britain, Prussia, and Holland, was concluded here under the auspices of William Pitt in 1790.

LOO-CHOO, LEEKEY, or LIEU-KIEU ISLANDS (Pacific Ocean).—Captain Broughton visited these islands, then little known to Europeans, A.D. 1797.

LOODIANA (Hindostan).—This town and the district came into possession of the British A.D. 1836, through the failure of the line of succession.

LOOKING-Glasses are mentioned Job xxxvii. 18, b.c. 2337, and Exodus xxxviii. 8, b.c. 1490, and were probably made of polished metal. Praxiteles, who flourished about B.C. 320, is said to have made a mirror of silver, and the American Indians were found to possess such articles, made from a kind of vitrified lava, plane, concave, and convex, A.D. 1492. Beckmann gathers from Pliny that they were manufactured of glass by the Sidonians, A.D. 77. He quotes a treatise of 1279, by John Peckham, a Franciscan monk of Oxford, in which mirrors are particularly described, and as having the back covered with lead. The Anglo-Saxon women wore them at their girdles. A process for silvering was patented by Drayton, November, 1848.

LOOM is found depicted on the tombs at Thebes, about a. c. 2000, the invention having been ascribed to the goddess Isis. It was in use in ancient Greece and Rome, especially amongst the females of a family. In India and China it has been in use, in a rude form, from the earliest period. Among the Anglo-Saxons, too, its structure was exceedingly simple. Improved apparatus was introduced into England by the Flemings, of whom Gervaise says that weaving is their "natural" business. A number of these people established themselves at Norwich A.D. 1132, and John Kemp, with a body of workmen from Flanders, came over at the invitation of Edward III., A.D. 1381. A method for the application of mechanical power to the hand-loom was submitted to the French Academy of Sciences by M. de Gennes, A.D. 1678, although it does not appear to have been carried into effect. A machine was patented by the Rev. Dr. Cartwright, which imitated the three movements in weaving, A.D. 1755, and another in 1787; but all these failed, and after an expenditure of £40,000, that gentleman received a grant of £20,000 from parliament as compensation in 1809. The first power-loom for cotton-weaving was erected near Glasgow in 1798. Jacquard exhibited his machine at Paris in September, 1801, and an electric loom was constructed in 1854 by M. Bonelli, director-general of the Sardinian telegraphs, which he brought to England in 1859.

LOSCA (Spain), the ancient Eliocrea, was besieged several times during the Moorish occupation of a part of Spain. The bridge was built in 1847.

LORD CHAMBERLAIN, and LORD GREAT CHAMBERLAIN. (See Chamberlain.)

LORD CHANCELLOR (Scotland) was originally the king's conscience-keeper, issuing his writs for the remedy of injustice, and became the chief judge of the Court of Session at its establishment, A.D. 1533. The office was abolished at the Union, March 6, 1707.

LORD HIGH ADMIRAL. (See Admiral, Lord High.)

LORD HIGH CHANCELLOR OF ENGLAND.—The office of king's chancellor has been traced back as far as the reign of Ethelbert, king of Kent (A.D. 568—615). It was usually held by an ecclesiastic, and frequently by the king's chaplain. The first chancellor after the Conquest was Aelfastus, bishop of Helmham, whose name occurs in a charter dated 1068. The office assumed a judicial character in the reign of Henry I., and sustained a change in its constitution under Henry III., who appointed an officer empowered to act as a chancellor, but without possessing that title, his special province being the custody of the seals. The first charter making this distinction is dated June 14, 1232. The chancellor assumed the title of chancellor of England in 1266, and of lord chancellor in the reign of Edward II. By 5 Eliz. c. 18 (1562), the offices of lord chancellor and lord keeper were declared identical. The vice-
chancellor (q. v.) was appointed by 53 Geo. III. c. 24 (March 23, 1813). The salaries of the chief officers of the lord chancellor are regulated by 15 & 16 Vict. c. 87 (July 1, 1862). The lord chancellor takes precedence of all the other law officers of the realm, ranking next to the archbishop of Canterbury.

LORD HIGH CHANCELLORS AND LORD KEEPERS OF ENGLAND.

William I

* During the Interregnum the holders of the Great Seal were styled Lords Commissioners.
LORD HIGH CHANCELLOR OF IRELAND.—

The appointment of this officer is coeval with the English government in Ireland; but the earliest lord chancellor whose name has been preserved is Stephen Rider, noticed in 1196. Deputies, or vice-chancellors, also formed part of the ancient establishment of Ireland.

LORD HIGH CHANCELLORS OF IRELAND.

A.D.

1186. Stephen Rider.

Henry III.

1210. John de Worchley.
1230. Fromond le Brun.
1292. Ralph Nevill.
1295. Alan de Sancta Fide.
1302. Robert Entrell.
1307. Ralph, bishop of Norwich.
1321. William Wolward.
1328. Ralph (again).
1329. Fromond le Brun.

Edward I.

1272. Fromond le Brun (continued).

1844. Mazzare Brady.
1852. Francis Blackburne.
1853. Mazzare Brady (again).
1858. Joseph Napier.
1859. Mazzare Brady (again).

Lord High Constable (England).—This officer existed in the Anglo-Saxon period of our history. His jurisdiction was defined by 8 Rich. II. c. 5 (1385). The duke of Buckingham, tried and executed for high treason, May 21, 1321, forfeited the office, and it has never been revived. The lord high constable and the earl marshal were judges of the court of chivalry, called in the reign of Henry IV. Curia Militaris. This office ranked as the first in France. Napoleon I. created his brother Louis constable of the empire.

Lord High Constable of Scotland.—This office is of great antiquity, and in 1162 was held by Richard de Moreville. Robert Bruce conferred the dignity of constable on Gilbert de Hay, earl of Errol, and his heirs for ever, Nov. 12, 1315.

Lord High Steward of England.—The office of Lord High Steward is of great antiquity, having existed before the time of Edward the Confessor, and the holder thereof was at that period the first great officer of the crown. It was for many years hereditary in the family of the earls of Leicester, but on the attainder of Simon of Montfort in 1265, it was abolished, and is now only revived for the special occasions of a coronation or the trial of a peer. On the 12th of January, 1559, Henry, earl of Arundel, was created high steward for the coronation of Queen Elizabeth, Jan. 15, to hold that office from "the rising of the sun on the same day to the setting thereof." Whenever a grand jury finds a true bill against a peer on a charge of treason or felony, a commission is issued constituting a lord high steward, with authority to try the accused. Edward, earl of Devon, appointed lord high steward.
in 1400 for the trial of the earl of Huntingdon, in the reign of Henry IV., is the first lord high steward created for this purpose. The trial over, the lord high steward breaks his rod, in order to show that his commission has ended.

**LORD HIGH TREASURER OF ENGLAND.**—This, the third great officer of the crown, had the custody of the royal treasury, and of the foreign and domestic documents kept there. The office is held during pleasure. The first lord high treasurer was Odo, earl of Kent and bishop of Bayeux, in the reign of William the Conqueror. For many years the office was held by ecclesiastics, the first lay treasurer being Richard, Lord Scroop, in 1371. The duke of Shrewsbury, appointed by Queen Anne, July 29, 1714, and who resigned office a few days afterwards, was the last high treasurer of England. Since that time the office has always been vested in commissioners, the chief of whom is the first lord of the treasury, and head of the government.

**LORD HIGH TREASURERS OF ENGLAND.**

**William I.**

A.D.

Odo, earl of Kent.

Charles I.
1625. Sir James Ley (continued).
1638. William Juxon.
1643. Lord Cottington.
Charles II.
1650. Sir Edward Hyde.
1677. Lord Clifford.
1678. Sir Thomas Osborne.
1679. Earl of Essex.
1679. Hon. Laurence, afterwards Lord Hyde of Chatham, and Earl of Rochester.
1684. Lord Godolphin.
James II.
1685. Earl of Rochester (again).
1687. Lord Belasyse.
William III. and Mary.
1689. Viscount Mordaunt.
1700. Sir John Lawther, Bart.
1700. Lord Godolphin (again).
William III.
1694. Lord Godolphin (continued).
1686. Right Hon. Charles Montagu.
1809. Earl of Godolphin.
1700. Lord Godolphin (again).
1701. Earl of Carlisle.
Anne.
1702. Lord Godolphin (again).
1710. Earl Poulett.
1714. Duke of Shrewsbury.

Lord High Treasurer of Ireland.—The dignity of this officer, who ranks third of the crown officers in Ireland, is as ancient as the English government of that country. Originally he was styled the treasurer of the exchequer. John de St. John was the first holder of the office, in 1217.

Lord Keeper.—The office of lord keeper of the great seal of England is stated on doubtful authority to have been held during the chancellorship of Ranulph, in the reign of Henry I., by Richard, a chaplain. It was not officially established till the reign of Richard I. The offices of lord chancellor and lord keeper were declared identical, as far as England is concerned, by 5 Eliz. c. 15 (1562). (For a list of lord keepers see the list of lord high chancellors.)

Lord Lieutenant.—Hamil (Hist. of 512

Eng. v. 11, c. 9) states that the military jurisdiction in counties was transferred from the sheriffs, or justices of the peace, to a new officer called the lord lieutenant, during the reign of Mary. “The office gave him the command of the militia, and rendered him the chief vicegerent of his sovereign, responsible for the maintenance of public order. This institution may be considered as a revival of the ancient local earldom.” Lord lieutenants of counties were appointed in Ireland by 1 & 2 Will. 4, c. 17 (Aug. 23, 1831).

Lord Mayor.—The title of Lord was granted to the mayor of London, A.D. 1354. Charles I. conferred this distinction on the chief magistrate of Dublin in 1641, but it was not borne by him until 1665. The chief magistrate of York and of Edinburgh is also styled Lord Mayor.

Lord Mayor (London).—According to the Liber Albus, the principal representatives of the sovereign power in the city of London have since the Norman conquest acted at various times under different names. William I. styled this officer his Portgrave, or Portgreve, afterwards corrupted into Portre. In a charter of Henry I. he is called a Justiciar, and in a charter of Henry II., in which the right of the aldermen to elect one every year is confirmed, he is styled Mayor. In olden times the mayor was elected on the feast of the apostles Simon and Jude (Oct. 28), and it was customary for him on the day of his election to go on foot by land, or by boat on the river Thames, to Westminster, or the Tower, to be sworn into office. At first the Lord Mayor frequently held the office for several consecutive years; but Edward I., in 1255, limited it to one year, and this rule, except in very particular cases, has since been observed. Henry Fitz-E Wyn, the first who held the office, was appointed by the crown in 1188. The title Lord was added to mayor in 1354. The procession, at a first of simple character, was converted into a pageant in 1454 by Sir John Norman, who proceeded to Westminster in a stately barge.

### LORDS

**Lords. (See House of Lords, and Peers.)** Lords Justices.—Persons under different titles have been appointed by various English kings since the Norman Conquest, to act as their substitutes in the government of part or the whole of their kingdom when absent, or under other exceptional circumstances. William I. appointed Odo, of Bayeux, and William Fitz-Osbern, earl of Hereford, custodes regni, or guardians of the realm, on his departure for Normandy, in Lent, 1067. Seven persons were appointed as Lords Justices by 4 & 5 Anne, 20 July 1707, and by 8 Anne, c. 41 (1707), and, on the death of Queen Anne, Aug. 1, 1714, eighteen persons acted with the lords justices until the arrival of George I.
from Hanover. George I. intrusted the government to thirteen lords justices, on quitting the kingdom in May, 1719; the same course was pursued during his visits to the continent, in 1720, 1723, 1725, and 1727. George II., during the lifetime of Queen Caroline, left her as regent when he went abroad, and after her death, appointed lords justices during such absence. George III. never quitted the kingdom; but George IV., on setting out for Hanover, in September, 1821, instructed the administration of affairs to nineteen lords justices. No such appointment has been made during the temporary absence of Queen Victoria from her kingdom; and in reply to questions asked in parliament in 1845, ministers declared that it was not deemed necessary to nominate either a regent, or lords justices.

**Lords Justices of Appeal (Court of Chancery).** By 14 & 15 Vict. c. 83, passed Aug. 7, 1551, power was given to the queen to appoint two barristers, of not less than fifteen years' standing, to be judges of the Court of Appeal in Chancery, and, with the lord chancellor, to form such Court of Appeal. They were to be styled lords justices, and the power exercised by the lord chancellor in the Court of Chancery was, from Oct. 1, 1851, transferred to this new court.

**Lords of Articles (Scotland), a committee of the Scottish parliament,** abolished in 1690.

**Lord Steward of the Household.—**This office has the supreme control of the royal household. The post is one of great dignity, and was instituted at a very early date. By 3 Hen. VII. c. 14 (1486), the lord steward was empowered to hold a court for the trial of treasons committed by members of the royal household, and by 33 Hen. VIII. c. 12 (1541), this jurisdiction was extended to all cases of quarrelling and striking within the palace. This authority was abolished by 12 & 13 Vict. c. 15 (Aug. 1, 1849). By 32 Hen. VIII. c. 39 (1544) the office of steward was changed to that of great master of the king's house. It was restored by 1 Mary, session 3, c. 4 (1553).

**Loreto (Italy).—**This town, near Ancona, is celebrated for the Santa-Casa, or Holy House, which is said to be that in which the Virgin Mary was born, the scene of the Annunciation and of the Incarnation, and the retreat of the Holy Family, on their return from Egypt, April, b.c. 3. According to the legend, the Santa-Casa was conveyed by angels from Nazareth to a hill near Fiume, in Dalmatia, a.d. 1291, and thence to a laurel grove called Lauretta, from its owner, in 1294. Such is the origin of the name of the town that has grown up around the sanctuary. The wealth of the place proved a temptation to the Turkish corsairs, and Sixtus V. fortified it in 1586. The French, under Marmont, took possession of Loreto Feb. 12, 1797, and carried the lady of Loreto to Paris. The image was, however, restored April 9, 1802.

**L'orient (France).—**Louis XIV. granted the French East-India Company permission to establish magazines and docks in the Bay of St. Louis, a.d. 1666. The building of the town commenced in 1720; it was incorporated in 1738, and fortified in 1744. An English force, under General Sinclair, landed here Sept. 20, 1746, but was obliged to re-embark on the 25th. On the dissolution of the French East-India Company, in 1770, the French government made L'Orient one of the stations of their navy.

**Lorraine (France) was conquered by Clovis a.d. 491, and appointed to Lothaire II., receiving from him the name of Lotharingia, or Lothaire-regne, the kingdom of Lothaire, a.d. 855. It was erected into a dukedom in 916.** France and Germany contended for its possession, and agreed to divide it between them in 960. The Alsatian line of dukes, founded by Albert of Alsace 1044, continued in power till the duchy was annexed to the French crown. By the treaty of Vienna, concluded Nov. 18, 1738, the duchy of Tuscany was exchanged for the duchies of Lorraine and Bar, which were ceded to Stanislaus Leczinski during his life. He died Feb. 3, 1766, and Lorraine was reunited to France.

**Lottery.—**The Conquaria of the ancient Romans bore some resemblance to the modern lottery, and formed a feature in the amusements of the Saturnalia, the emperors also employing them to secure the favour of the people. In this manner Augustus distributed gifts, b.c. 80; Nero, a.d. 54—68; and Elagabulus, 218—222. Florence appears to have been the first country in Europe in which a lottery was established, the emergencies of the state having been met by such a device a.d. 1530. Lotteries passed from Italy into France, under the name of blanes, and were legalized by Francis I. in 1539. In the years 1572 and 1558 the duke de Nivernos instituted a lottery at Paris for providing marriage portions to young women belonging to his estates. The lottery received such high approval from the pope, that he granted to its supporters the right of re-embarking in it. The disposal of merchandise by this means, which had become common, was prohibited in January, 1558; and all private lotteries were forbidden, under severe penalties, in 1661, 1670, 1681, 1657, and 1700. The name lottery, common in Italy, was first used in France about 1658. The first lottery in England was proposed in 1667 and 1668, and was drawn at the west door of St. Paul's Cathedral, day and night, from Jan. 11 to May 6, 1669. The profit was devoted to the repair of harbours. Another was drawn for the benefit of the Virginian Company in 1612. Lotteries were proposed in 1616, on the ground of their immoral tendency. A lottery was, however, permitted in 1660, to aid a project for supplying the metropolis with water. Charles II. used them after the restoration in 1660, to reward his adherents. A loan of £1,000,000 was raised by government on the sale of tickets in 1694; another of £3,000,000 in 1746; and another of £1,000,000 in 1747. For a short period in
the reign of Queen Anne they were prohibited. In 1773 an act requiring an annual licence, at a cost of £50, to be taken out, reduced the number of offices from 400 to 51, and they were altogether abolished by 6 Geo. IV. c. 60 (1826); the last public lottery having been drawn Oct. 18, 1826. An act imposing a penalty of £50 for advertising them (6 & 7 Will. IV. c. 66), was passed Aug. 13, 1836. A lottery was drawn at Osnaburg in 1521; one at Amsterdam, for building a church-steeple, in 1549; one at Delft in 1595; and one at Hamburg, to erect a house of correction, in 1615. The first at Nuremberg was drawn in 1715; and at Berlin in July, 1740. The famous Italian or Genoese lottery was introduced by a member of the senate of Genoa, named Benedetto Gentile, in 1620. It was forbidden by Benedict XIII. (1724—1730); but Clement XII. (1730—1740) established it at Rome, and it was thence introduced into Germany, the first having been drawn at Berlin, Oct. 31, 1763. A lottery existed in the principality of Anspach and Bayreuth, from 1769 to 1788; and one at Neufchatel in 1774 became bankrupt. Lotteries were legalized in the United States by act of congress in 1776, but are said to be now suppressed in the north. The art unions in England, involving the same principle as the lottery, originated at Edinburgh in 1836.

Loudon Hill, (Battle,) was fought near Drumclog (q.v.), June 1, 1679.

Louis (Order of).—This Prussian order was created Aug. 3, 1814, for the reward of women who had rendered services in hospitals to the sufferers in the war of 1813 and 1814.

Louisburg (Cape Breton).—The English established themselves here April 30, 1745, wresting the town from the French July 17, 1745. It was restored by the treaty of Aix-la-Chapelle, Oct. 7 (O.S.), 1748, retaken by the English July 26, 1758, and was finally ceded to Great Britain by the 4th article of the treaty of Paris, Feb. 10, 1763.

Louis D'or.—This piece of money was first coined in the reign of Louis XIII., a.d. 1641, and ceased to be a legal coin in France in 1726. Louis XVIII. re-established this gold coin on his return to Paris in 1814. It has been replaced by the Napoleon. Those coined previous to 1726 are also called Louis-blances and Louis d'argent.

Louis, Fore (Africa), on the banks of the river Senegal, was captured by an English force April 22, 1758. Fort Louis, in Guadaloupe, was taken Feb. 13, 1759.

Louisiana Islands (Pacific).—This group was discovered by Bourgainville, a.d. 1768.

Louisiana (North America).—This country, said to have been discovered by the French in 1673, was named after Louis XIV. by D'Iberville, a Frenchman, who formed the first settlement a.d. 1689. A charter was granted to the colony in 1712. The company formed by Law's Mississippi scheme received the territory in 1717, and in 1762 it was ceded to Spain. Transferred to the French in 1800, it was sold to the United States government for 15,000,000 dollars in 1803. Louisiana was admitted into the Union in 1812, and it seceded from the union in 1861.

Louis, St. (Missouri), was founded a.d. 1794. The university was founded by the Roman Catholics in 1832.

Louisville (Kentucky) was founded a.d. 1773, and was erected into a town in 1780.

Lovet (Ireland).—This county, conquered by De Courcy a.d. 1179—1180, was made a county by King John in 1210, and included in the province of Leinster some time in the reign of Elizabeth.

Louvain (Belgium), said to have been founded by Julius Caesar, was walled a.d. 1156. It gave employment to 150,000 weavers in the 14th century, large numbers of whom having been banished, emigrated to England in 1582. The Austrian governor, Don John, received the submission of the inhabitants in 1577; and a French revolutionary force mastered the place in 1792. The castle was built about 900, and the cathedral of St. Pierre, founded in 1040, was completed in 1385. The guildhall was built in 1317; the university, established in 1423, was attended by 6,000 students in the 16th century; and the town-hall was built in 1448.

Louis (France).—Here Richard I. concluded a treaty, which was soon broken, with Philip Augustus of France, a.d. 1196. Henry V. captured this town in 1418, and the French recovered it in 1429. The duke of Bedford having taken it after a long siege in 1461, razed it to the ground. The town was rebuilt, and the manufacture of cloth, for which it is celebrated, commenced in 1580.

Louvres (Paris).—The early history of the Louvre is lost in obscurity. St. Foix says King Dagobert kept his horses and hounds in a building on its site about a.d. 637. Philip Augustus repaired the edifice in 1204, converted it into a state prison, and built a large tower, which is now one of the oldest parts of the edifice. About the middle of the 14th century it was used as a residence for foreign princes visiting the king. Charles VI. lived there about 1380, but afterwards quitted it for the Tuileries. Francis I. commenced the present edifice in 1528. Charles IX., during the massacre of St. Bartholomew, Aug. 24, 1572, is said to have fired on the retreating Huguenots from one of the windows. Charles IX. and other kings made great additions, particularly Louis XIV., who laid the first stone of the façade from designs by Bernini, on the 17th October, 1665. Louis XV. in 1719 lived here. Napoleon I. made it a museum; in his reign the magnificent buildings of the new Louvre were begun, and were finished, and inaugurated by Napoleon III. Aug. 14, 1857. The Louvre was assailed during the revolution of July, 1830. The museum of sculptures, commenced in 1797, was opened under the name of the Musée Napoleon in 1803.

Lovat's Rebellion.—Simon Fraser,
afterwards Lord Lovat, was despatched from St. Germans by the son of James II., for the purpose of attempting a rising in Scotland, where he landed towards the end of 1702. Having betrayed his trust, he returned to France in 1708, was thrown into the Bastille, and remained a prisoner there till 1706. He returned to Scotland, drove the Pretender's forces out of Inverness, Nov. 15, 1715, and held it for the government. For aiding the cause of Prince Charles Edward, he was sent to the Tower June 17, 1746; brought to trial March 9, 1747; and beheaded on Tower-hill April 9, 1747.

**Love-Feasts.** (See Agape.)

Lowositz, or Lobositz, (Battle), was fought between the Austrians and Prussians at this place in Bohemia, Oct. 1, 1756. Each of the combatants claimed the victory, but the Austrians were compelled to retire.

**Low Sunday.**—The first Sunday after Easter. This name was given to Low, because the church service was lowered from the pomp of the festival of the preceding Sunday. It was also called *Quasi Modo,* from the first words of the hymn, or mass on that day. *Dominica in Albis* is also another title for this day.

**Loyalty Loan**—This term is applied to a loan raised by the patriotic feeling of the country between Dec. 1—5, 1706, when £13,000,000 were subscribed in a few hours, and hundreds went away disappointed at being too late to contribute their share.

**Lübeck (Germany)** was founded a.d. 1140, ceded to the dukes of Saxony in 1155, and made a free imperial city in 1226, when the Danish garrison was expelled. It became the head of the Hanseatic League in 1241. Blucher threw himself into the town to avoid the French army, when it was carried by assault, and suffered a three days' pillage, November, 1806. It was annexed to the empire Nov. 12, 1810, and regained its freedom after the battle of Leipzig, Oct. 19, 1813. Its cathedral was founded in 1170, and finished in 1341; the Marien-Kirche was built in 1304, and the Raath-haus in 1442.

**Lübeck, (Treaty),** was concluded at this town, between the emperor and the king of Denmark, May 22, 1629.

**Lublin (Poland).**—This town was ravaged by the Mongols a.d. 1241. A treaty was signed here in 1569, for the incorporation of Lithuania with Poland.

**Lucania (Italy),** settled by the Samnites about B.C. 420, and rose into such importance that a league was formed against it by the cities of Magna Graecia B.C. 393. A great battle resulted in the triumph of the Lucanians, B.C. 390, and the younger Dionysius concluded a treaty with them B.C. 355. The Lucanians were reduced to subjection by the Romans, B.C. 272, and in the civil war between Marius and Sylla, B.C. 88, their name and state were extinguished.

**Lucar, St. (Spain).**—Christopher Columbus landed here from his fourth voyage, in December, 1504. Magelhaens sailed from this port on the first voyage round the world, Sept. 20 or 21, 1519, and one of the ships of the expedition returned Sept. 6, 1522.

**Lucayos Islands.** (See Bahamas.)

**Lucca (Italy),** the chief town of the duchy of that name, is mentioned by Livy as having given shelter to the consul Sempronius, when he retired before Hannibal, B.C. 218. Subsequently it fell into the hands of the Ligurians, and became a Roman colony B.C. 177. A meeting of two hundred senators, including Caesar, Pompey, and Crassus, was held here B.C. 56; and by virtue of the *Lex Julia* it was made a municipal town B.C. 49. Narses the eunuch took it after a long siege, A.D. 553. It became a Lombard duchy in 572; was conquered by Arnulf in 895; and, having acquired its independence, joined the league of the Ghibellines in 1232. Fisa commenced hostilities against it in 1303; and subsequently, the Florentine and the Venetians, and it submitted to that town in 1342. The inhabitants paid 300,000 florins to Charles IV. for their freedom in 1370. Pope Urban VI., offended at the Genoese, honoured Lucca with his presence in 1386; and Gregory XII. made it his residence in 1408, previous to taking refuge in Venice. It was besieged by the Florentines in 1430, and was the place selected for a conference between the emperor Charles V. and Paul III., Sept. 10, 1541. The French took it in March, 1799; it was bestowed by Bonaparte on his sister Elise, June 23, 1806, and annexed to Tuscany Oct. 11, 1847. The market-place is formed from an ancient amphitheatre. The church of St. Fredianus was founded in the 7th century; St. Michael's was built of white marble in 764. The church of St. Romanus was founded in the 8th century; the cathedral by Pope Alexander in 1060; and the old town-hall, now a poor-house, in 1413. The Academy of Letters and Sciences was instituted in 1817; the fine aqueduct by Nottolini was commenced in 1815, and finished in 1832. Lucca formed part of the kingdom of Italy in 1860.

**Lucena (Spain).**—The Moors besieged this city April 21, 1493, and, having been driven by the Spaniards in a great battle under its walls, retired.

**Lucera (Italy),** the ancient Luceria, was, according to tradition, founded by Diomedes about B.C. 1184. It allied itself with the Romans B.C. 326, who delivered it from the power of the Samnites B.C. 320. Constans II. took the city from the Lombards, and destroyed it, A.D. 663; and in 1227 it was restored by the emperor Frederick II. A mosque, built by the Saracens, was converted into the present cathedral A.D. 1269.

**Lucerne (Switzerland).**—This canton joined the Swiss confederation A.D. 1332. The town of the same name was surrounded by towers in 1335. A treaty between the French and the Swiss was concluded here May 5, 1521. Incited by the French, the inhabitants rose in revolt in 1798. The
town was retaken by the Federal forces Dec. 16, 1813. The government having determined to intrust the Jesuits with the education of the young, an attack was made on the place by a large body of Protestants, Dec. 8, 1844. The monument to the Swiss Guards who defended the Tuileries against the Parisian mob, Aug. 10, 1792, was erected in 1821.

Lucia, St. (West Indies).—This island was first colonized by the British A.D. 1639. The settlers were expelled by the Caribs, and the French planted a colony in 1650. It was the cause of many contests between the French and English. The latter took it in February, 1762; again Dec. 14, 1775; again May 25, 1786, and finally June 22, 1803. The capitulation was signed June 30.

Luciferians, the followers of Lucifer, bishop of Cagliari, a zealous opponent of the Arians. Having been sent to espouse the cause of Athanasius at the council of Milan, A.D. 355, he was so violent in his conduct that Constantine banished him. After going from place to place, he at length retired to Sardinia in 363, and founded the sect that bears his name. He died in 370, and the sect disappeared soon afterwards.

Lucifer Matches superseded the more costly and less convenient Eupryons and Prometheusians A.D. 1832. The splint-cutting machine employed in their manufacture was patented by Partridge in 1842.

Lucnsoy (Hindostan), with Oude, the province of which it is capital, was conquered by the Mohammedans about A.D. 1300. The nabob was defeated in an engagement with the English, Oct. 22, 1764. The city was made the residence of the court in 1775, and was, with the territory, annexed to the British possessions in India, March 16, 1856. Symptoms of disaffection amongst the native soldiers manifested themselves May 1, 1857, and the place was invested by the rebels July 1, 1857. It was relieved by General Havelock and Sir James Outram, Sept. 23, 1857, and by Sir Colin Campbell on Nov. 17, 1857. The English retired Nov. 22, 1857, and Sir Colin Campbell recaptured it March 21, 1858.

Lucnson, (Treaty,) for the pacification of Lucnson, was concluded at this town Jan. 17, 1800.

Luddites, so called from a mythical Captain Ludd, under whose authority they professed to act, commenced their riots at Nottingham in opposition to the application of improved machinery to stockicking-weaving, Nov. 10, 1811. On the 11th they attacked the house of a manufacturer at Bullwell, and destroyed its contents. They extended their operations into Derby and Leicester, where many frames were destroyed in the month of December. In consequence of the serious aspect matters had assumed, a bill was introduced into parliament Feb. 14, 1812, for the purpose of adding new legal powers to those already existing for their suppression. It was during the debate on this bill that Lord Byron delivered his maiden speech in the House of Lords, opposing it with great vehemence. The prince-regent sent a message to both houses of parliament June 27, 1812, calling upon them to take proper measures for the restoration of order, as the combinations had become more powerful, subjected themselves to military training, and were bound by an oath of secrecy and confe-

Ludgnum (Battle).—Albinus, at the head of a British army, was defeated and slain by Severus near Ludgnum, now Lyons, A.D. 197.

Lugo (Italy).—This town was taken and pillaged by the French in 1796. The unfortunate inhabitants were put to the sword.

Luna (Etruria).—The Romans established a colony at this place, the modern Luni, B.C. 177. The Normans plundered it A.D. 857, and it afterwards fell into decay. Benedict VIII. repulsed the Saracens here in 1016.

Lunatic Asylums. — The public exhibition of patients at Old Bethlem Asylum, Moorfields, London, was prohibited in 1771. In 1792 Bullwell introduced the non-restraint system into the Bicêtre, at Paris; but it was not until after the revelation of the enormities practised at the York Asylum, made by Mr. Higgins in 1813, that it was adopted in England. It was tried at Lincoln in 1837, and proved so successful in its operation that it was introduced at Hanwell in 1839, and shortly afterwards in other important establishments. Provisions for the erection of county asylums were made by 48 Geo. III. c. 96 (June 23, 1808), which was amended by 9 Geo. IV. c. 41 (July 15, 1828). This act was repealed by 8 & 9 Vict. c. 126 (Aug. 8, 1845), which was explained and amended by 9 & 10 Vict. c. 84 (Aug. 26, 1846), and by 10 & 11 Vict. c. 43 (June 25, 1847). The laws respecting lunatic asylums in England were finally consolidated and amended by 16 & 17 Vict. c. 97 (Aug. 20, 1853). County asylums were ordered to be erected in Ireland by 1 & 2 Geo. IV. c. 33 (May 28, 1821), and in Scotland they are regulated by 21 & 22 Vict. c. 89 (Aug. 2, 1858).

Lunatics.—Formerly a legal distinction existed between a lunatic and an idiot, the former being a person who had lost the use of reason, which he once possessed; the latter, one who had no understanding from the day of his birth. By the Roman law, persons of unsound mind might be deprived of the management of their property on application to the praetor by the next of kin. The custody of idiots and of their lands, formerly vested in the lord of the fee, was, by...
17 Edw. II. c. 19 (1323), made a prerogative of the crown. By 17 Edw. II. c. 10 (1324), the king was to provide for the custody and sustentation of lunatics, and to preserve their lands and the profits of them for their use, when they came to their right mind. Various laws on the subject are found in the statute-book. By 15 Geo. II. c. 30 (1742), the marriage of lunatics was declared illegal. All existing laws on lunacy were consolidated and amended by 16 & 17 Vict. c. 70 (Aug. 15, 1853). The law of lunacy in Scotland has been amended, and is regulated by 20 & 21 Vict. c. 71 (Aug. 25, 1857), which came into operation Jan. 1, 1858. This act was amended by 21 & 22 Vict. c. 89 (Aug. 2, 1858).

Lunawara (Hidostan), the chief town of the principality of the same name, was freed from the tribute paid by its rajah to Scindia, by a treaty concluded with the British government Dec. 30, 1803. It was, however, reimposed in 1806, and Scindia ceded his right to supremacy over the rajah in 1819. Lunawara (Sweden) was a considerable city before the introduction of Christianity, A.D. 830. The Scandinavian pirate kings were elected here. Its cathedral was founded in the 12th century; the university by Christian I. in 1479, the present structure having been erected in 1668. Puffendorf filled a professorial chair in this university in 1670; and Linnaeus matriculated here in 1727.

Lund Hill (Yorkshire).—An explosion of gas took place at a colliery here Feb. 19, 1857. No less than 189 persons lost their lives on this occasion, and the first body was not recovered until April 10.

Lundy Island (Bristol Channel).—This island, off the coast of Devonshire, was fortified by Morisco, a pirate, in the beginning of the 13th century. It was held for Charles I. during the parliamentary wars A.D. 1643. It was sold for about £9,400 in 1840.

Lunville (France), only a village previous to the 11th century, was afterwards fortified, and during the wars between the dukes of Burgundy and Lorraine sustained several sieges. The French captured it in 1638, and destroyed the fortifications. Leopold, duke of Lorraine, built a palace at Lunville in the 15th century.

Lunville, (Treaty), was concluded at Lunville, in France, between the two countries of France and the emperor of Germany, February 9, 1801, and consisted of nineteen articles. Many of these explained, and others confirmed, the provisions of the treaty of Campo-Formio, Oct. 17, 1797. The Rhine, as far as Holland, was made the boundary of France, and the independence of the Batavian, Cisalpine, Helvetic, and Ligurian republics was recognized.

Lupercalia.—This annual festival, established at Rome at an early period, in honour of Romulus and Remus, and so called from lupes, a wolf, the animal recorded to have suckled them, was observed on the 15th of February. Augustus endeavoured to restrain the licence of this festival, which was altogether abolished A.D. 409. The place where the priests of Pan assembled was called Luperca.

Lusatia (Germany).—This ancient maritain, made a marquisate by Henry I., A.D. 931, was converted to Christianity by Otho I., A.D. 905. It was annexed to Bohemia in 1885, and ceded to Saxony by the treaty of Prague in 1635. The greater portion of Lusatia was assigned to Prussia by the treaty of Vienna, June 9, 1815.

Lusitania.—This epic poem, commenced by Camoëns at Santarem about A.D. 1547, and continued at intervals in Africa and India, was published at Lisbon in 1572. An edition translated into English by Richard Fanshawe, was published at London in 1655; and another by Nickle in 1776.

Lustreux.—This expiatory sacrifice, performed by one of the Roman censors at the end of every five years, was instituted by Servius Tullius B.C. 566.

Luteran.—The term applied to the followers of Martin Luther, born at Eisleben, in Thuringia, Nov. 10, 1483. The majority of the German Protestants are Lutherans. At an early age Luther became acquainted with the views disseminated by Wydde and John Hess, and is said to have received those impressions which ultimately induced him to separate from the Church of Rome, whilst on a visit to the Eternal City, whither he had been sent on business A.D. 1510. At Wittenberg, where he filled the theological chair, Tetzel, the legate of Pope Leo, arrived to raise money by the sale of indulgences; whereupon Luther drew up his famous ninety-five theses, condemning the abuse of indulgences, and he transmitted a copy of them to the archbishop of Magdeburg, Oct. 31, 1517. Summoned to appear before Cardinal Cajetan at Augsburg, after several conferences Luther appealed "from the pope ill informed to the pope better informed," November 28, 1518. After a conference with Müllitz, in January, 1519, he wrote an explanatory and submissive letter to the pope, March 3, 1519. In a disputation at Leipsic he denied the pope's supremacy, June 27, 1519. He published an address to the emperor for the Christian nobility of Germany in June, 1520. A bull against himself and his writings was issued by Eck in August; and in the same month Luther's treatise on the Babylonian captivity of the Church appeared, denouncing the papacy as the kingdom of Babylon and antichrist. In October he had a conference with Müllitz, and having been excommunicated, he destroyed the bull before an immense multitude, Dec. 10, 1520. At the diet of Worms he maintained his opinions, April 16, 1521, and an edict was consequently issued commanding his apprehension and the destruction of his writings, May 3, 1521. He was conveyed to Wartburg, under the protection of Frederick, elector of Saxony, where he began his translation of the Bible into German, completing the New Testament in 1521. Luther came to Wittenberg.
LUT

where religious disturbances had arisen, and restored order in 1522. Luther abandoned the monastic life, and his monastery being deserted, was given into the hands of the elector, a.d. 1524. In the same year a league of German princes was formed to check the progress of his opinions, which had spread over Switzerland, found entrance into Scotland, and were adopted as the national faith in Sweden and Denmark, 1524. Luther married Catherine de Bora, a nun who had left her convent, a.d. 1525, in which year many of his followers were burned as heretics. His Liturgy and Order of Divine Worship was published in 1526; in 1530 he presented the Articles of Orléans to the elector of Saxony. At the diet of Augsburg the Protestants read their celebrated "Confession," June 25, 1530. A complete edition of Luther's translation of the Bible, in three folio volumes, was published in 1534. A league called the Holy Alliance was formed at Nuremberg, between the emperor and the Roman Catholic princes, for eleven years, against the Protestants, June 10, 1538. Luther died at Eisleben, Feb. 17, 1546.

Lützen (Battles).—The Swedes, commanded by Gustavus Adolphus, who lost his life in the battle, gained an important victory over the Austrians, under Wallenstein, at this place, Nov. 6, 1632 a.d. Napoleon I. defeated the Prussians and Russians in an engagement fought here May 2, 1813.

Luxemburg (Belgium and Holland) was ceded to Siegfried by the monastery of Trèves, and created a county a.d. 965. The emperor Charles IV. erected it into a duchy in 1354. It came to Philip of Burgundy by his marriage with Isabella, daughter of the king of Portugal, in 1443, and through him passed to the house of Spain, with whom it remained till the peace of Pyrenees, when part of it was ceded to France, Nov. 7, 1659. France took entire possession in 1795, and it passed to Holland in exchange for certain German principalities in 1814. In consequence of the Belgian revolution, Luxemburg was dismembered, and a portion was assigned to Belgium by the conference of London, October, 1831.

Luxemburg (Holland).—This town, formerly the capital of the old duchy, and now of Dutch Luxemburg, was taken by the Spaniards from the duke of Orleans, a.d. 1542; by Francis I. in 1543; and was captured by Charles V. May, 1544. Louis XIV. blockaded it in 1681, but withdrew, on the protest of the European powers, in 1682. It was ceded to him by the treaty of Ratisbon in 1684, and restored at the peace of Ryswick, Sept. 4, 1697. Having been besieged by the French, under General Hotry, it capitulated, after its supplies were nearly exhausted, June 7, 1795. It was taken by the allies in 1813, and was surrendered by the terms of the treaty of Paris, May 30, 1814. As a fortress it was stipulated, in the treaty of Vienna, that it should be held by the German confederation, Feb. 8, 1815. The fortifications have been greatly strengthened since 1830. A projecting rock called Le Boue has been hollowed out, and contains casemates for 4,000 men.

Luxor, or El-Uksur (Egypt), was built by Amenophis Memnon, one of the Pharaohs who reigned during the sojourn of the Israelites in Egypt, about b.c. 1518. Several chambers and columns were added to the temple by Amenoph III., b.c. 1327. The sculptures on the wings of the portals represent occurrences in the reign of Rameses Miamum, b.c. 1556. The temple was plundered by the Persians b.c. 520; and one of the massive obelisks of red granite was removed by the French a.d. 1831, and set up in the Place de la Concorde, Paris, in 1836.

Luxury was carried to excess amongst the Romans during the latter period of the Republic and under the Empire. Gibbon declares that the most remote countries of the ancient world were ransacked to supply the pomp and delicacy of Rome, and, in commenting upon a passage in Tacitus, remarks: "It was a complaint worthy of the gravity of the senate, that, in the purchase of female ornaments, the wealth of the state was irrevocably given away to foreign and hostile nations. The annual loss is computed, by a writer of an inquisitive but censorious temper, at upwards of £500,000 sterling. Caius Gaius said to have served up pearls of great value, dissolved in vinegar, about a.d. 31. In 1340 Charles VI. of France issued an edict to restrain men from partaking of more than soup and two dishes. Various measures for the restraint of luxury are found in our statute-book. By 10 Edw. III. st. 3 (1336), all classes were prohibited from having more than two courses at any meal, excepting at certain stated festivals. This statute was repealed by 19 & 20 Vict. c. 64 (July 21, 1856). The diet and apparel of each class of the community were regulated by 37 Edw. III. c. 8—14 (1363), and many subsequent acts, all of which were repealed by 1 James I. c. 25 (1604)."

Lyceum.—In this celebrated school at Athens, dedicated to Apollo Lyceus, Aristotle and his disciples taught while walking about, and their philosophy from that circumstance is called the peripatetic. Philip, son of Demetrius, during his invasion of Attica, destroyed the trees of the Lyceum, b.c. 200.

Lyceum Theatre (London), called also the English Opera-house, derives its name from an academy built a.d. 1765. It was converted into a theatre in 1790, and into an English opera-house in 1809. The theatre was destroyed by fire Feb. 16, 1830, and was rebuilt in 1834.

Lydia (Asia Minor), originally Milyas, was known to Homer, who makes frequent allusions to it in the Iliad, b.c. 982, and enumerates its people among the allies of Troy, b.c. 1192. This country was subdued by Har-
pagus, the general of Cyrus, and made a Persian province B.C. 546. It was conquered by Alexander the Great B.C. 333; by the Romans, who eeded it to the Rhodians, B.C. 188; became a Roman province about A.D. 48; and was constituted a separate province by Theodosius II. (A.D. 408—450). In 1838 and 1849 it was visited by Sir Charles Fellows, who discovered the remains of eleven cities.

Lydia (Asia Minor).—Its history dates as far back as B.C. 1200; but the real Lydian era commenced about B.C. 713, with Gyges, who reigned till B.C. 676, the dynasty closing with Croesus, B.C. 560, who was conquered by Cyrus, the Persian, who reduced the country to the condition of a Persian province. The Romans bestowed it upon the king of Pergamus B.C. 189, and it reverted to them again B.C. 133.

Lying-in Hospitals.—The first institution of this kind was opened in a private house at Dublin by Dr. Bartholomew Mosse, March 25, 1745, and proved so advantageous that in 1747 several influential men in London obtained from him information as to his regulations, with a view to the establishment of similar hospitals at London. The result was the institution of the British Lying-in Hospital, Endell Street, in 1749; the City of London Lying-in Hospital, Old Street, City Road, in 1750; Queen Charlotte's Lying-in Hospital, Lisson Grove, in 1752; the General Lying-in Hospital, Lambeth, in 1765; the Charlotte Street General Lying-in Dispensary in 1778; and the Newmarket General Lying-in Institution in 1787.

Lyne Regis (Dorsetshire) received a royal charter A.D. 1284, and was represented by two members in parliament. It was plundered by the French in 1404, and again in 1416, and it resisted a two months' siege by Prince Maurice in 1644.

Lymphatic Vessels. (See Lacteal Vessels.)

Lynchburg (Virginia) was founded A.D. 1756, and incorporated in 1816.

Lynch Law is described in Webster's American Dictionary as "the practice of punishing men for crimes and offences by unauthorized persons, without a legal trial." The same authority adds: "The term is said to be derived from a Virginia farmer, named Lynch, who thus took the law into his own hands." The accuracy of this definition is questioned. Some writers believe Judge Lynch to be a mythical personage, and others trace the origin of the phrase to one Lynch, sent to America in 1687-8, to suppress piracy. He had authority to dispense with the usual forms of law in the punishment of the pirates, and from this circumstance the term arose. Sir Harris Nicolas mentions the case of a widow who had committed murder, put to death in this manner by some of her own sex, in 1429.

Lynn Regis, or King's Lynn (Norfolk), received its charter from King John, who remained three days in the town, when evading the forces of the barons, Oct. 9, 1216. It returned two members to parlia-

ment in 1295, and was detached from the see of Norfolk, of which it formed a fief, under the name of Lynn Episcopi, by Henry VIII. (1509—1547). After a three weeks' siege it capitulated to the parliamentary forces in 1643. St. Margaret's Church was founded in 1100, St. Nicholas' by Edward III., and the grammar-school in 1510.

Lyons (Scotland).—This office existed in Scotland at a remote period,—according to some authorities as early as the 12th century. The first recorded appearance of Lyon king-at-arms is at the coronation of Robert II., in March, 1371.

Lyons (France), the ancient Lugdunum, was settled by the people of Vienna, when driven from their homes by the Allobroges, B.C. 43. A Roman municipium was established about B.C. 12, Augustus residing here for some time, and raised it to the degree of importance that it possessed a mint for coining gold and silver, and gave its name to one of the four divisions of Gaul. An altar was erected to Augustus by sixty of the nations of Gaul, and dedicated Aug. 1, B.C. 10; and Caligula visiting the town, instituted games in his honour, A.D. 40. Claudius, who was a native of the town, raised it to the rank of a colony, A.D. 41—54. A fire reduced it to ashes in one night, A.D. 59, and the emperor Nero made a liberal grant to aid in rebuilding it. In the reign of Marcus Aurelius the Christians suffered severe persecution, the bishop Pothinus, who was beheaded by Irenus, being among the victims (169—180). After the defeat of Clodius Albinus by Septimius Severus, it was pillaged and burned Feb. 19, 197. The emperor Gratian, seeking refuge from a rebellion, was murdered here Aug. 25, 383. A conference of bishops was held by the Burgundian king Gundibald in 501. When the Frankish kingdom was divided, Lyons became a portion of the new kingdom of Burgundy, A.D. 561—613; fell to the lot of the emperor Lothaire, A.D. 843; to Charles, king of Provence, in 855; was seized by Charles the Bald in 869; and was included in the dominions of Boson A.D. 879. The archbishops received the title of exarch, and had their temporal power confirmed by the emperor, A.D. 1157. Archbishop John forbade the preaching of the followers of Waldo in 1178. Pope Innocent IV. fled here, having refused absolution to the emperor Frederick II., and pronounced a fresh sentence of excommunication against him in 1244; and on his refusal to appear before the general council, passed sentence of deposition upon him, A.D. 1245. Dissatisfied with their ecclesiastical rulers, the inhabitants elected a municipal body, but such dissen-
sions arose between the two authorities, that the city was annexed to the French crown about the middle of the 13th century. The thirteenth general council was held here from June 28 to July 17, 1245; and the fourteenth general council, at which the conclave of cardinals was established, was held here from May 7 to July 17, 1274. Councils were held at Lyons in 197; 475; Sept. 2, 500; in 517; 566; in May, 583; in 829; 848; 1065; 1079 or 1080; and March 21, 1528. An order was issued by Clement V. for a meeting of cardinals here in 1305. The council which had been transferred from Pisa to Milan, and then to Asti, was closed in 1514. Henry IV. of France and Emanuel I., duke of Savoy, met and concluded a peace at Lyons in 1601. Repudiating the authority of the Jacobins, it was besieged by the army of the French Convention for sixty-six days, when it was taken, and barbarities inflicted on the inhabitants, Oct. 10, 1793. Napoleon I., on his escape from Elba, visited the town, and persuaded the people to espouse his cause, March 8, 1815. A conspiracy, which proved abortive, was discovered June 8, 1816, and serious bread riots took place in 1817. In October, 1831, the manufacturing interests were so depressed that the artisans could earn but eightpence by working eighteen hours—a state of things which led to an insurrection on the 22nd November, when after a hard day's fighting, the troops were driven from the town. Marshal Soult, with an army of 40,000 men, and 120 pieces of cannon, enforced the surrender, Dec. 3, 1831. Another insurrection took place April 16, 1894. It cost the troops six days' hard fighting, and much loss of life, before it was quelled. A great reform banquet, which led to important results, was held in the plain of Chatillon Aug. 31, 1840. The town suffered severely from an inundation Nov. 4, 1841, which swept away 100 villages. An insurrection occurred, and a provisional government was formed, May 18, 1848; and a revolt broke out, leading to great loss of life, June 15, 1849. Louis Napoleon, president of the republic, was entertained at a civic banquet Aug. 15, 1850. The Romans constructed three aqueducts of great length for supplying the city with water, one of them having fourteen bridges. Nine arches of one of these bridges are still in a good state of preservation. The Hôtel Dieu was founded by Childert and his queen (A.D. 511-558), the present structure, capable of receiving 12,000 patients annually, having been built by Soufflot about 1743. The church of Notre Dame occupies the site of the Forum Vetus of Trajan; and the cathedral of St. Jean, begun in the 7th century, was finished in the reign of Louis XI. (1226-1270). The Hospital de l'Antiquaille stands on the site of the palace in which Claudius, Caligula, and Germanicus were born. The town-hall was erected 1640-1655. The Place Bellecour, planted with lime-trees, is one of the largest squares in Europe. Two bronze tablets, containing the oration of Claudius on giving the Civitas to the nations of Gaul, were dug up in 1529.

LYONS (Treaties).—The archduke Philip, on the part of Spain, negotiated a treaty with Louis XII. of France at Lyons, where it was signed April 5, 1503. It provided that Philip's infant son Charles should marry Claude, a princess of France; and the youthful couple were thenceforth to assume the titles of king and queen of Naples, and duke and duchess of Calabria. The French division of the kingdom was to be ruled by some person named by Louis XII., and the Spanish division by the archduke Philip, or some person appointed by Ferdinand in the interval before the marriage took place. All places unlawfully seized by either party were to be given up. War broke out soon after the treaty was signed, and much controversy has been excited amongst French and Spanish writers respecting this transaction. Another treaty between France and Spain was concluded at Lyons Feb. 11, 1504, and was ratified by Ferdinand and Isabella at the convent of St. Maria de la Mejorada, March 31. It guaranteed to Aragon the undisturbed possession of her Italian conquests for three years, from Feb. 25, 1504, and provided for a general cessation of hostilities.

LYON'S INN (London).—This inn of chancery, originally an hostelry with the sign of the Lion, was purchased by law students, and converted to its present purpose during the reign of Henry III.

LYRA.—The invention of this musical instrument was ascribed by the Greeks to Apollo, or to Mercury; but this, or a similar instrument, was known to the ancient Egyptians, and was also in use amongst the Hebrew nation.

LYSIMACHIA (Thracian Chersonesus) was founded by Lysimachus, whence its name, B.C. 309. The Romans captured it B.C. 191.

M.

MAASTRICHT, OF MAASTRICHT (Holland), the capital of the province of Limburg, has sustained several memorable sieges, and has been called the German Gate of the Netherlands. In 1676 the inhabitants expelled the Spaniards, who regained possession, and committed great atrocities, Oct. 20 in the same year. The patriotic party having once more driven out the Spaniards, the duke of Parma invested it March 12, 1679. A general assault, April 8, was repulsed, but it was carried by storm June 29. The city was delivered up to the infuriated soldiers for three days, when men, women, and children were treated with great barbarity. One historian relates that not more than 400 citizens remained alive, and Strada says that 8,000 of the inhabitants were slain during the siege, and of these 1,700 were females. It regained its independence in 1622, and was taken by Louis XIV. in 1673. William, prince of Orange, failed in an attempt to

523
to capture it in 1675. The duke of Marlborough occupied Maestricht in 1703. It was invested by the French April 3, 1748, and though they did not succeed in capturing it, yet the preliminaries of peace, signed a short time after, provided that it should be delivered to them, and the garrison marched out with the customary honours of war May 3. The French again besieged it Feb. 11, 1750, and retired in March, without having effected their object. They returned in 1754, and the city capitulated to them Nov. 4. Holland ceded Maestricht to Belgium by a treaty with France in 1795, and having long remained under French influence, it was restored to Holland by the treaty of Paris, May 30, 1814. This city remained faithful to Holland during the revolution of 1830.

Macadamizing.—John Loudon Macadam, who invented the mode of road-making that takes its name from him, first put it into practice on the Bristol roads, a.d. 1815. He was appointed general surveyor of roads in 1827, and received two grants, amounting to £10,000, from parliament.

Macarens.—The Milanese forces, under Carlo Malatesta, were defeated at this place, near Cremona, by the Venetians, under Carmagnola, Oct. 11, 1427.

Macao (China) was granted to the Portuguese for purposes of trade, a.d. 1557. They kept it a close port till 1849, when it was declared free.

Macaroni.—This preparation of wheat flour is an invention of the Italians, and has for many years formed an important branch of manufacture in Genoa and Naples. An establishment for its manufacture was opened in Spitalfields in 1790.

Macaroni Club.—This club of dandies was formed in London a.d. 1722, by a number of young men of fashion, who had travelled in Italy, and adopted the title in contradistinction to the London Beefsteak Club (q.v.). Hence, ladies and gentlemen of extravagant dress were known as macaronies.

Macaronic Verse, or Macaronic, invented by Theophilus Folengo, or, as he called himself, Merlinus Coccaus, an Italian monk, born at Casino a.d. 1512. Hallam says that Folengo, having written an epic poem which he thought worthy of the Eneid, and being told by a friend that he had equalled Virgil, threw it into the fire in a rage. He afterwards recanted, and in the last years of his life, Antonius de Arena, of Avignon, is said to have written macaronic verse in 1519. It became very fashionable, and was introduced into English literature by John Skeffington, about 1458. He died in 1529, and has been called a rhyming Rabelais.

Macarthy Island (Africa), comprised in the British colony on the Gambia, was guaranteed to England by the treaty of Versailles, Sept. 3, 1783.

Macassar (Eastern Seas).—This station, on the island of Celebes, was obtained as a settlement by the Portuguese a.d. 1512. In 1808 the rajah, with all his subjects, embraced Mohammedanism. The harbour was made a free port from Jan. 1, 1847. The Dutch call it Vlaardingen.

Maccabees.—A name considered to be cabalistically derived from the motto "Who among the gods is like Jehovah?" inscribed on the Jewish banner used during their war with Syria, b.c. 168. The first of these apocryphal books, giving a history of the struggles of the Jews with their enemies in the period b.c. 175—135, was written soon after the events narrated, by an unknown author. The second, an abridgement of the larger work of Jason of Cyrene, now lost, and embracing the time from about b.c. 185—170, was written about b.c. 150. The third is considered by Dr. Allix to have been written b.c. 200; and the fourth, attributed to Josephus, may date at about a.d. 70. Of the authorship of a fifth book, a relation of Jewish affairs from some time previous to the birth of Christ to that event, nothing whatever is known. The four books were as canonical by the Council of Trent, Dec. 13, a.d. 1545—Dec. 3, 1563.

Mackenzie, (Era of the,) commenced Nov. 24, 166.

Maccabees, (Festival of the,) instituted in honour of the seven Maccabees, who opposed the tyrant Antiochus Epiphanes, and died in defence of the Jewish law, was celebrated generally in the Christian church in the 4th century. In the Roman martyrology it is fixed Aug. 1.

Macclesfield (Cheshire) was incorporated by charter a.d. 1260. The church of St. Michael was founded by Eleanor, queen of Edward I., in 1278. The grammar-school was founded in 1502. A subscription library was established here in 1770, and a school of design in 1851. A free school was founded in 1838. The manufacture of silk, for which this town is celebrated, made great advances between the years 1808 and 1825.

Mace, an improvement on the club as a weapon of war in barbarous times, is mentioned in Homer, b.c. 962, and was probably introduced into Europe about the middle of the 13th century. The heavy cavalry were supplied with the mace in the 16th and 16th centuries; but it went out of use in England in the reign of Elizabeth (1559—1603). Dr. Clarke considers its use in corporations to be derived from the ceremonies attendant on the preservation of an ancient privilege by the Choronzons, b.c. 1201. Charles II. presented one to the Royal Society, to be placed before the president. Cromwell, when forcibly dissolving the Long Parliament, April 20, 1653, said, pointing to this symbol of the speaker's authority, "Remove that fool's bauble!" This mace was melted down and sold by order of the House of Commons, Aug. 9, 1649. Lord Chancellor Finch had his house in Queen Street broken into and the mace stolen Nov. 7, 1677.

Macedonia, (or Macedon (Greece).) The name is derived by some writers from Macedo, a descendant of Dencallion, and other authorities believe it to be a corruption
**MAC**

of Mygdonia, a district of the country. The early inhabitants of Macedonia are believed to have been an Illyrian race.

**B.C.**

371. Carausus settles in Macedon, with a Greek colony.

353. Macedonia is invaded by Daris, king of Persia, and compelled to conclude an alliance with him.

349. Macedon is delivered from the Persian yoke by the battle of Plataea (q.v.).

348. Philip IV, in Macedon, revolts from the Athenian confederacy.

347. Potidaea is taken by the Athenians.

346. On the death of Perdiccas II., his legitimate son is murdered by his natural son Archelaus, who usurps the throne.

389. Archelaus is assassinated.

388. Thrace and Macedon are at war with each other.

357. Alexander II. is assassinated.

356. Philip II. wages war against the Athenians and the Illyrians.

356. Philip II. takes Pydna and Amphipolis.

352. Philip II. takes Methone, but loses an eye by an arrow during the siege. He expels the tyrants from Thessaly.

348. Peace is concluded with Athens. Philip II. obtains the mastery of the Phocæans.

347. He invades Illyria, and subdues Sparta.

347. He sends an expedition into Acarnania, where he is opposed by the Athenians.

346. Thrace is invaded by Philip II. Aristotle resides at the Macedonian court as tutor to the young prince Alexander.

384. Byzantium is besieged by Philip II.

338. Philip II., by means of the Macedonian phalanx, gains the battles of Elatea and Charonea (q.v.), and thus renders himself master of Greece.

338. Philip II. is assassinated by the youth Pausanias, at Æge, during the marriage games of his daughter. He is succeeded by Alexander III., or the Great, aged twenty years, who is elected generalissimo of the Greek allies against Persia.

335. Alexander III. conquers the Thracians, the Illyrians and the Tralliab, and takes and destroys Thebes.

334. He crosses the Hellespont, gains the battle of Granicus (q.v.), and takes Sardis, Miletus, and Halicarnassus.

333. The Lacedæmonians unite with Memnon the Rhodian against Alexander III. He cuts the Gordian knot (q.v.), and gains the battle of Issus (q.v.). Parmenio saves Damascus.

332. Alexander III. takes Tyre and Gaza, subdues Egypt and Palestine, and founds Alexandria.

320. The seat of government is transferred from Macedonia to Susa, in Babylon. Alexander III. subdues Hyrcania, Aria, and Aornos, and puts Parmenio to death on a charge of treason.

329. Alexander III. enters Bactria, marries the native princess Roxana, and claims divine honours.

328. He kills Clitus, and causes the philosopher Callisthenes to be put to death.

326. Alexander III. crosses the Indus, defeats Porus, and takes and destroys the city of Saggala.

325. Alexander III. is compelled by the mutinous disposition of his troops to return to Babylon, where he dies in May or June. Macedon engages against Greeks in the Lamian war.

322. The Macedonians defeat the Greeks at the battle of Crenon, which puts an end to the Lamian war.

**MACEDONIANS.—** This name, given to the Semi-Arians, is derived from Macedonius, a deacon who was made bishop of Constantinople by the Arians, A.D. 341, and was acknowledged as patriarch in 342. When the Arians separated into the Arians and the Semi-Arians, in 359, Macedonius took part with the latter, and he was expelled from the see in 360, after which time the Semi-Arians
were called Macedonians. They were con-
demned by the second general council, held at
Constantinople from May 30 to July, 381.

Macellum.—In this castle near Cesarea,
Constantius II. confined Julian and Gallius,
nephews of Constantine I., for six years,
A.D. 343 to March 5, 351.

Macroalla (Italy), the capital of a
province of the same name annexed to the
ecclesiastical estates by Charlemagne, was
made a bishop's see a.d. 1322. Napoleon I.,
by a decree dated March, 1807, annexed
this province to the kingdom of Italy. It
was restored to the Papal States in 1814-15,
and formed part of the new kingdom of
Italy in 1860.

Machiavellian Principles.—This term
is applied to the principles advocated in the
celebrated work "Il Principe," by
Niccolo Machiavelli, the Florentine states-
man. It was first published at Rome, Jan. 4,
1513.

Machine-Breaking.—By the fourth
clause of 7 & 8 Geo. IV. c. 30 (June 21,
1827), a person breaking or destroying any
machine employed in any manufacture in
England, was liable to transportation for
seven years, or imprisonment for any term
not exceeding two years. If the offender
was a male, whipping, either publicly or pri-
vatly, might be added to the imprisonment.
A special commission for the trial of machine-
breakers was held in Hampshire in 1830.

Machynlleth (Wales).—The Romans
had a station at this town. Here the par-
liament of Wales met and acknowledged
Owen Glendower, as prince of Wales, a.d.
1402; and Owen Glendower entered into a
treaty in 1403 with the Percies and the
Mortimers to restore Richard II., if he
could be found alive, to the English throne;
or, in case of his decease, to make the earl
of March king. This alliance was dissolved
by the battle of Hateley Field (q. v.).

Machynlleth (Battle).—A Russian army
of 12,000 men, commanded by Fersen,
defeated 10,000 Poles led by Rosciusko at
this place, in Poland, Oct. 4, 1794. Roesi-
usko was taken prisoner. He was liberated
after two years' imprisonment, and died at
Soleure, in France, in 1817.

Mackenzie River (North America) is
named after Sir Alexander Mackenzie, who
discovered it A.D. 1783, and explored the
stream until it discharged itself in the Frozen
Ocean, which he reached July 15.

Macon (France), the ancient Matisco,
was occupied by one of the legions of Julius
Caesar B.C. 52. During the Middle Ages,
Macon was governed by its own counts.
Louis IX. annexed it to France in the
13th century. Macon was made a bishop's
see in the 5th, and the town suffered
severely in the religious wars during the
16th century. Fearful atrocities were per-
petrated in the Maconnais in 1789. The
seats of the nobility and several churches
were completely destroyed. The French
were repulsed in an attack upon an Austrian
detachment at this town, March 11, 1814.
An inundation committed great destruction
at Macon, and in the neighbourhood, in
November, 1841. A reform banquet was
held at Macon on Sept. 20, 1847.

Macon (North America).—This town in
Georgia was little more than a village about
1822. The Wesleyan female college was
founded in 1839.

Madagascar (Indian Ocean).—The exist-
ence of this island off the coast of Africa,
then called Magaster, was first made known
in Europe by the Venetian traveller Marco
Polo, A.D. 1298. Tristan de Cunha visited it
in 1606, and it was named by the Portu-
guese St. Lawrence, because rediscovered
on that saint's day. The Portuguese
founded a colony here in 1508. It was
destroyed by the French, who planted a
settlement in the island, which they called
Isle Dauphine, in 1642. The French and
English after this time formed several settle-
ments, which were all abandoned by the French,
who in 1794 declared their hold the latest, retiring
about 1740. The French returned early in the
19th century, and the settlement surrendered to
an English force Feb. 17, 1811. The
English garrison was captured May 19, but
the French again succumbed, and by a treaty
with England in 1818, the slave trade was
abolished, and Madagascar declared
independent. Radama, the most celebrated
of the native rulers of Madagascar, began
to reign in 1810. He united the two-and-
twenty states into which Madagascar is
said to be divided, under one central author-
ity. He died in 1828.

Christianity, which had been favoured by Radama, was forbidden
by a royal edict in 1835. The French sent
an expedition against Madagascar in 1829.

Madeira (North Atlantic Ocean).—This,
the largest of a group of islands, called the
Madeiras, is said to have afforded a refuge
to an Englishman named Robert Macham,
or Machin, who, fleeing from France with
Anna d'Ariéet in 1346, was cast by a storm
upon its coast. From this circumstance
the island is said to have been called Machico.
This story is, however, generally regarded
as an invention, and the real discoverer
of Madeira is believed to be Gonaves
Zarco, the Portuguese, who visited it in
1419. The Portuguese soon after formed
a settlement, and erected Funchal into a
city in 1508. Madeira, with Portugal, passed
under Spanish rule in 1580, and again became
a Portuguese colony in 1640. A garrison
of British troops, under Colonel Clinton,
was landed on the island July 24, 1801, in
anticipation of an attack from the French;
and these having been withdrawn, a second
force, commanded by Commodore Hood and
Major Beresford, took possession Dec. 24,
1807, and remained till the peace of June 20,
1814. The partisans of Don Miguel seized it
Aug. 23, 1829, and it declared for Donna
Maria in June 1834.
another town of the same name, in Wisconsin, in 1851.

**Mad Parliament** assembled at Oxford on Barnabas-day, June 11, 1258, and was attended by all the nobility, archbishops, &c., and nearly one hundred barons. It was summoned to effect an accommodation between Henry III. and the barons. The king and the barons respectively elected twelve persons to form a committee of twenty-four, to amend all matters appertaining to the king and the kingdom. The committee required, amongst other things, that the king should observe faithfully Magna Charta, provided that the chief justice, chancellor, and other high officers, should be chosen from year to year, and ordered that three parliaments should be held every year; namely, the first Oct. 6, the second Feb. 3, and the third June 1. These, called the Provisions of Oxford, were received publicly by the citizens of London July 22. Henry III., who refused to abide by them in February, 1261, accepted them in 1262 and again in 1263. They were publicly promulgated at a council held at London, Sept. 8, 1263. The king of France having been appealed to by both Henry III. and the barons, annulled them at a council held at Amiens, Jan. 23, 1264.

**Madras** (Hindostan).—The original designation of this town was Chinha-Puttin, Madras being the name of a village which existed before the present town was founded.

A.D.

1639. March 1. The East-India Company receive permission from the native princes to establish factories.

1641. Fort St. George is built at Madras.

1652. Fort St. George, Madras, is erected into a presidency.

1657. It is made a corporation.

1762. David Khan, general of Aurungzebe, lays siege to Madras, but without success.

1746. Sept. 14 to 19. It is bombarded and taken by the French, under Capt. Bourdonnais.

1748. Oct. 18. It is restored to England by the treaty of Aix-la-Chapelle.

1749. Aug. It is evacuated by the French.

1750. The Company obtain large grants of land near the town.

1756. The fortifications are strengthened.

1759. Feb. 17. The garrison is relieved by Admiral Pocock, and Lally is compelled to raise the siege.

1769. April 4. Hydro Ali, having surprised the town, and obtained possession of nearly the whole of it, compels the governor to sign a treaty of peace.

1770. July 22. Sir John Lindsey, the king's commissionaire, arrives at Madras, where disputes commence between himself and the president.

1776. Aug. 10. Madras is thrown into alarm by the approach of Hydro Ali. Aug. 24. Lord Pigot, the governor, is imprisoned by the council.

1780. July. The province is thrown into consternation by the flight of Hydro Ali and 100,000 men. Nov. 5. Sir Eyre Coote takes the command of the Madras army.

1781. Jan. 10. Sir Thomas Pitt, governor, and several members of the council, are dismissed by the Company. July 1. Sir Eyre Coote defeats Hydro.

1783. General Stuart is arrested by the governor, and sent to England.

---

**Governors of Madras.**

A governor and council were appointed for Madras by 24 Geo. III. c. 25 (Aug. 13, 1764); and Lord Macartney, nominated as the first governor under this act in 1784, arrived at Madras early in 1785.

A.D.

1783. Lord Macartney.

1788. Sir A. Campbell.

1799. Sir Charles Oakley, bart.

1800. Lord Hobart.

1806. Major-General, afterwards Lord Harris.

1805. Lord William Bentinck.

1812. Lieutenant-General John Abercromby.

1814. Hugh Elliot.

1816. Sir Thomas Munro, bart.

1832. Lieutenant-General Sir Frederick Adam.

1832. Lord Elphinstone.

1834. Marquis of Tweeddale.

1835. Sir Henry Pakington, bart.

1836. James Thomason.

1836. Lord Harris.

1836. Sir Charles F. Trevelyan.

1836. Sir W. T. Denison.

---

**Madrid** (Spain).—Some Spanish authorities claim greater antiquity for their metropolitain city than is possessed by Rome, but no mention of it occurs in history until the reign of Ramiro II., about A.D. 931.

A.D.

1083. The Moorish fort of Majerut, or Madrid, is taken by Alfonso VI.

1197. It is taken by the Moors.

1212. Alfonso IX. reteakes it.

1461. It is enlarged by Enriques IV.

1473. A council is held at Madrid.

1516. Charles V. makes it a royal residence.

1556. Philip II. declares Madrid the only seat of the Spanish court.

1563. Philip II. founds the Escorial (q.v.).

1629. Philip IV. founds the college of San Isidoro.

1635. The hospital of San Fernando is founded.

**MAD**

A.D.

1709. June 24. Madrid is taken by the earl of Galway for Charles III.

1721. The old palace is destroyed by fire.

1737. The theatre de la Cruz is built.

1749. The Plaza de Toros is built, and the Academy of Arts is founded.

1755. Ferdinand VI. founds the Botanical Gardens.

1766. The theatre del Principe is established.

1812. Aug. 12. Madrid is entered by the English, under the duke of Wellington.

1842. Oct. 7. Funeral services are performed in honour of the duke of Wellington.

1854. July 17. A general insurrection of the inhabitants breaks out, in consequence of the unpopular queen mother.

**MADRID, (Treaty,)** was concluded between Francis I. of France, and the emperor Charles V., Jan. 14, 1526. Francis I., at that time a prisoner, restored Burgundy and Charolais to the emperor, renounced all claim to the kingdom of Naples, the duchy of Milan, to Asti, and Genoa. Other humiliating conditions were extorted, and Francis summoned a secret meeting in his chamber, at which he declared that he did not intend to abide by the conditions of the treaty.

**MADRIGAL.**—This kind of poem, invented by the Flemings about the middle of the 16th century, was imitated by the Italians. In England, Morley's first book of madrigals was published A.D. 1594. The Madrigal Society, a club of amateurs, was founded in London A.D. 1741. Rimbaud's Bibliotheque Madrigalium was published in 1847. Hallam remarks that "some of our old madrigals are as beautiful in language as they are in melody."

**MADURA** (Hindostan), the capital of a district of the same name, which came into the possession of the East India Company with the Carnatic, A.D. 1801; sustained several sieges during the 18th century. Captain Calliaud failed in an attempt to capture the town of Madura in May, 1757. A second attack in July of the same year was not more successful.

**MAGDALEN (Battles).**—This river, in Asia Minor, celebrated for its numerous windings, which have rendered its name proverbial, was the scene of a defeat of the Turks by John II., A.D. 1119; and of another by the army of Manuel I. in 1177.

**MAGDALEN'S, OF MAGELLAN STRAIT** (South America), the most extensive strait in the world, connecting the Atlantic and Pacific oceans, was discovered by Ferdinand Magalhaens, incorrectly called Magellan, a Portuguese, who sailed in the Spanish service. He reached the strait in October, 1520, and named it Novia España.

**MAGAZINE.**—The following is a list of the principal literary magazines of the United Kingdom, with the dates at which they were first published.

528
MAGDALEN HOSPITAL (London) was established Aug. 8, A.D. 1758, for the relief and reformation of penitent women.

MAGDALENS.—The first religious association formed for the reformation of fallen women was established in Germany before A.D. 1215. A similar order of nuns was established in France by Bertrand, a citizen of Marseilles, about 1272. The convent of the Magdalene at Naples was founded by Queen Sancho, of Aragon, in 1324, and that at Metz was established or refounded in 1452. The Paris convent dates from 1492, when Louis, duke of Orleans, gave his hotel for the purpose of providing a nunnery for penitents. The Magdalene at Rome was established by Pope Leo X. in 1515. The Magdalen Hospital at London was opened Aug. 8, 1758.

MADEBURG (Prussia), the capital of the province of Saxony; and now one of the strongest fortresses in Europe, was in existence in 968, by which year it was annexed by the Austrian general Tilly, the inhabitants mercilessly slaughtered, and the town, with the exception of about 139 houses, burnt to the ground, May 10, 1631. A formidable conspiracy was concocted by the famous Baron Trenck, while a prisoner in the fortress, to release 16,000 captive Austrians, and master the garrison, A.D. 1761. The plot was, however, frustrated. After having been invested fifteen days by the French, under Marshal Ney, Magdeburg capitulated Nov. 8, 1806, and was annexed to the new kingdom of Westphalia by the treaty of Tilsit, July 9, 1807. It was restored by the treaty of Paris, May 30, 1814. The archbishopric was founded in 963 by the emperor Otho, whose statue, raised in 973, stands in the market-place. The cathedral, a fine Gothic edifice, which contains the tombs of Otho and the empress, was erected A.D. 1211-1303, and restored 1825-1834. The church of the Virgin was built in the 11th century, and the French Reformed church in the 17th century.

MAGENTA.—This shade of crimson dye, named after the battle of Magenta (q.v.), and prepared from gas tar, was brought out in France in 1860, and thence quickly introduced into England.

MAGENTA (Battle).—The French and the Sardinians, after a desperate struggle, defeated the Austrians near this place, in Lombardy, June 4, 1859.

MAGHAAZUL (Battle) was fought in a field near Toldo, between y. It was won by the Saracen monarch Abd erahman, grandson of King Abdallah, and the rebel Caleb Aben Hafsun, A.D. 912. The royal troops gained the victory, losing 3,000, whilst the rebels lost 7,000 men.

MAGI were intrusted with the care of religion by Deioces, and formed one of the six tribes into which he divided the Medes, B.C. 700. They were constituted into a sacred caste or college when the Medes and Persians became united under Cyrus, B.C. 559. Two brothers of the magi revolted against Cambyses, and usurped the supreme authority during his absence in Egypt, B.C. 523; but were put to death with such a large number of their sect that the day was afterwards observed by the Persians as the “Masacre of the Magi,” B.C. 522. The primitive religion, which consisted in the worship of Ormuzd, the symbol of light and goodness, having become corrupted, was greatly reformed by Zoroaster, about B.C. 555.

MAGIC was originally taught by the magi, who diffused a knowledge of their mysteries through Greece and Arabia, on their expulsion from Persia, about B.C. 500. Smedley (Occult Sciences, p. 190) states that “according to the Talmud and the Cabbala, which profess to agree with the Bible, magic is divided into three classes,—the first, including all evil enchantments and magical cures, the citation of evil spirits, and the calling forth the dead through the aid of demons,—to be punished, like idolatry, with death; the second, including those magical practices which are carried on by the aid of evil spirits, by which magic is often led astray and sunk into eternal darkness; and the third, which is scourging; and the third, including astrology and all intercourse with the lower spirits, excepted from punishment, but pronounced wrong, as leading from reliance upon God.” The council of Laodicea, in 366, condemned all magicians and enchanters, and the ancient laws dealt with them very severely. Trials on charges of having employed magical arts were common in the Middle Ages.

MAGIC LANTERN.—Roger Bacon is said to have invented this instrument about A.D. 1260; but it was not generally known till a much later date. Cellini, who died in 1570, describes optical experiments which apparently depended for their effects on an apparatus of this kind. Kircher, who was born in 1601 and died in 1680, is frequently styled the inventor of the magic lantern. The invention of the Argand lamp in 1789, and of the phantasmagoria in 1802, produced considerable improvements in the construction and operation of the instrument.

MAGIC SQUARE.—This mathematical arrangement of a set of numbers was known at an early period to the Hindoos, Egyptians, and Chinese. Emanuel Moschopulus, who wrote upon them in Greek in the middle of the 16th century, was the first author who refers to the magic square.

MAGNA CARTA, embodying some of the “good old laws of Edward the Confessor,” with numerous provisions, intended to secure the liberty of the subject, was extorted by the barons from King John, and sealed in a field at Runnymede, between Windsor and Staines, June 15, A.D. 1215. John violated its stipulations in August, 1215, appealed to the pope Sept. 13, 1215, who annulled the agreement, excommunicated the barons, and suspended Stephen Langton, archbishop of Canterbury, in December, 1215. It was confirmed by the guardians of the youthful king Henry III. at Bristol, Nov. 12, 1216, and subsequently by other kings so frequently, that Sir Edward Coke counted thirty-two confirmations, additions, or re-

529
newals about A.D. 1600. From a copy preserved in Lincoln Cathedral, the Board of Commissioners on the Public Records caused a fac-simile to be engraved and published, which is to be found, with a translation, in the first volume of "Statutes of the Realm."

**Magna Graecia, or Major Graecia (Italy).**—This name was applied by Greek writers to their colonies formed on the southern shores of Italy, Cumæ having, by general consent, the precedence in point of antiquity; although the date of its foundation, B.C. 1050, is not to be relied upon. There is much uncertainty as to the precise dates of the various settlements; but the greater number of them were certainly made between B.C. 735 and B.C. 685. Sybaris, B.C. 720, and Crotone, B.C. 710, the two most powerful cities, were founded by the Achæans. Tarentum, a Spartan colony, was established about B.C. 708; Metapontum by the Achæans, B.C. 700—680; and Locri by the Locrians, about B.C. 700. The date of the league between Crotone, Sybaris, and Metapontum, to expel the Ionians from Siris, cannot be fixed with any degree of accuracy. A great change in the political condition of these cities was brought about by the teaching of Pythagoras, who arrived at Crotone about B.C. 530. An army of 100,000 Crotonians took the field against 300,000 Sybarites, and after defeating them on the banks of the Traes, utterly destroyed the city of Sybaris, B.C. 510. Thurii, founded B.C. 443, and Heraclea, B.C. 432, were the latest of these settlements. The Italian Greeks having allied themselves against Dionysius of Syracuse, were defeated by him in an important engagement near Caulonia, B.C. 399, and at the same time they were attacked in the north by the Lucanians, with whom they carried on a severe and protracted contest till B.C. 292, when they applied to the Romans for aid. The celebrated expedition of Pyrrhus, king of Epirus, whose assistance had been invoked by the Greeks, began B.C. 281. He left them entirely at the mercy of the Romans on his departure, B.C. 274. Nearly all these cities declared for Hannibal after the victory of that general over the Romans at Cannæ, Aug. 2, B.C. 216; but they suffered the penalty of this partisanship when fortune turned in favour of the Romans; the towns were pillaged and the people put to the sword or sold into slavery,—a subjugation from which they never recovered. Cicero describes them in his time, B.C. 106—43, as sunk into utter ruin.

**Magna (Battle).**—The two Scipios gained a complete victory over Antiochus the Great, near Magnesia, usually called Magnesia ad Sipyllum, in Lydia, and drove him out of Western Asia, B.C. 190. (See MANISSA.)

**Magnesia ad Meandrum (Greece).**—This Eolian city, said to have been founded by Magnesians from Thessaly, was destroyed by the Cimmerians B.C. 726, and rebuilt by the Milesians B.C. 725. It was assigned to Themistocles by Artaxerxes, to supply him with food, when he was besieged from Athens, B.C. 471; and the inhabitants raised a statue to his honour in the Agora. The Romans incorporated it with the kingdom of Pergamus B.C. 188. A town of Lydia, of the same name, called Magnesia ad Sipyllum to distinguish it from the above, is known under the modern name of Manissa (q.v.).

**Magnetism.**—This word is supposed to be derived from Magnes, the name of a Phrygian shepherd, who was detained on Mount Ida by the nais in his boots, or by his metal crook. Other authorities state that it is derived from the Lydian province of Magnesia, whence the Greeks obtained the lodestone about B.C. 1000.

A.D.
1576. Robert Norman discovers the dip of the magnetic needle.
1590. Julius Caesar, a surgeon of Rimini, observes the conversion of iron into a magnet by position.
1600. Gilbert publishes his treatise "De Magnete."
1630. Bond discovers the true progress of the deviation of the compass about this year.
1668. Halley publishes his theory of terrestrial magnetism.
1690. Halley constructs the first magnetic chart.
1722. Graham discovers the diurnal variation.
1745. Dr. Gowan Knight constructs artificial magnets.
1750. Michell publishes his treatise on artificial magnets
1765. Canton makes 4,000 observations on the variation of the needle, and ascertains that it is greater in summer than in winter.
1780. Coulomb propounds the double-fluid theory of magnetism.
1786. Cessini discovers the annual periodical variation of the magnetic needle. Coulomb constructs his balance of torsion.
1813. Morichini magnetizes a needle by exposing it to the violet rays of the spectrum.
1817. Professor H. Hansteen, of Christians, publishes his work on the Magnetism of the Earth.
1818. Mr. J. H. Abraham, of Sheffield, receives the large gold medal of the Society of Arts for his magnetic guard, to protect persons engaged in needle-pointing, &c.
1825. Christie proves that heat diminishes magnetic force.
1830. H. J. Dr. G. de Cuvier's produces magnetism by friction.
1831. Sir W. Snow Harris improves the mariner's compass, and invents the hydrostatic magnetometer. Faraday produces electricity from means of a magnet.
1846. Professor Faraday propounds the laws of diamagnetism.
1846. Faraday discovers magneto-electricity.
1851. General Sabine demonstrates that the terrestrial magnetic force has periods.
1856. Professor Tyndall proves the existence of diamagnetic polarity. (See Compass.)

**Magnolia, of several varieties, has been introduced into England at different periods. The Magnolia glauca, or the deciduous swamp magnolia, was brought from North America A.D. 1683; the Magnolia grandiflora, great flowered magnolia, or laurel bay, was introduced from the same country in 1734; and the Magnolia Yulan, or conspicua, from
China in 1789. The Yulan magnolia has been cultivated in China since A.D. 627.

Magyar, called Ugri by the Russians, as being members of the Ugrian race, whence, by corruption, the name Hungary, migrated from the south of the Urshan mountains, and settled on the plains of the lower Danube, under Arpad, their leader, A.D. 889. They invaded Bavaria in 900, inspiring such terror by the prowess of their arms and the rapidity of their movements, that walled towns in Europe are said to have had their origin at that period. Defeated in battle by the Saxon prince Henry the Fowler, in 934, and again by Otho the Great in 955, their power was completely broken. Andrew III., who came to the throne in 1290, was the last king of the Arpad family, which became extinct in the male line in 1301.

Mahabaleshwa (Hindostan).—Sir John Malcolm established this station, where a sanatorium has since been erected, A.D. 1828.

Mahadia (Africa), the capital of the Zeirides, was captured by the Sicilians A.D. 1146.

Maharajpore (Battle).—Sir Hugh ( Afterwards Lord) Gough defeated a Mahratta army of 18,000 men, supported by 100 guns, at this town, in Gualior, Dec. 29, 1843. Sir Hugh had about 14,000 troops and 40 guns. The Mahrattas lost 3,400 men.

Maha (Hindostan).—This place, on the Malabar coast, was taken by Munro, Feb. 10, 1711, and fell into the hands of the French in 1722. It was captured by the English in 1760; restored by the treaty of Paris, Feb. 10, 1763; again captured in 1793; and restored to France in 1815.

Mahogany, so called from Mahogani, the American name of the tree, was introduced into England A.D. 1595. Sir Walter Raleigh's carpenter is said to have discovered its value in making articles of furniture; but it was brought into notice by Woolaston, a cabinet-maker of Long Acre, who, in 1720, was employed by Dr. Gibbons to make first a candle-box, and afterwards a bureau, with some planks which he had received from the West Indies. The duchess of Buckingham having seen the latter article, begged some of the wood from the doctor, and had one made, which soon brought it into general use.

Mahattas, of Mahrattas.—The origin of this people of Hindostan is unknown, but the empire bearing their name was founded in the latter half of the 17th century, by Sivajee, who received from the king of Bijapoor a jaghir in the Carnatic. He supplanted his father in the jaghir of Poona A.D. 1647, and was succeeded by his son Sambajee in 1680. From 1689 till 1818 the nominal sovereign of the period was kept a close prisoner, the Peishwa wielding the supreme authority. When the success of Ragoba was disputed in 1773, he formed a treaty with the English government, by which he was to give them possession of Salsette and Bassein, and they in return were to replace him in office; but as the English obtained the coveted towns by other means, the treaty was not carried out. Bajeron, the Peishwa, having tried to draw together a confederacy against the English, was compelled to cede a territory worth £30,000 a year in 1815. Having attacked the houses of the British residency, November, 1817, he was defeated in an engagement, and fled. He wandered as a fugitive till he surrendered to Sir John Malcolm in June, 1818. At this time 50,000 square miles of Poonaah territory came into British possession, a small principality being assigned to the rajah of Sattara, representative of the founder of the rule. Failing of legitimate heirs, this principality fell to the English in 1848. A battle between the Mahrattas and the British, under Sir Hugh Gough, was fought at Maharajpore, in which the former were defeated, with the loss of fifty-six pieces of artillery, Dec. 29, 1843.

Maidau, (Battle,) fought between the French, 7,000 strong, commanded by General Regnier, and the English numbers 4,800, under Sir John Stuart, at Maidau, in Calabria, July 4, 1806. The French were defeated with great loss.

Maiden, of Halifax Gibbet, an instrument for putting criminals to death, somewhat similar to the modern guillotine, was in use in England in the 16th century, and was brought into Scotland during the same century; the commonly-received account, that it was introduced into that kingdom by the regent James, earl of Morton, being incorrect. The earl of Argyll, the last who suffered by it, June 30, 1655, declared that it was "the sweetest maiden he had ever kissed." An instrument of this kind is said to have been in use in various Italian towns about the same period.

Maids of Honour.—Four ladies bearing this title are mentioned as having formed part of the queen's establishment in the wardrobe account of Edward I. The number is now limited to eight, each of whom enjoys a salary of £400 per annum. Maids of honour were suppressed in France by Madame Montespan in 1673.

Maidstone (Kent), anciently called Caer Meguaid, or Medwig, the city of the Medway, and by the Saxons Medwegestan and Medestane, was a possession of the archbishops of Canterbury, and is so described in Domesday Book, A.D. 1086. It received charters from Edward VI., Elizabeth, James I., Charles II., and George II., and has returned two members to parliament since the time of its first charter. During the Great Rebellion the Kentish men, who had risen for the king, were attacked and defeated at Maidstone by Fairfax, June 1, 1648. The Gothic palace of the archbishops of Canterbury was built in 1348; its parish church, one of the largest in England, was erected in the 14th century, and has been recently restored. A college, founded by Archbishop Courtenay in the reign of Richard II. (1377-1399), was suppressed by Edward VI., the building now
accommodating All Saints' College, founded in 1846. The county gaol was erected at a cost of £200,000 in 1818.

MAIL COACHES.—Mr. Palmer, manager of the Bath and Bristol theatres, submitted to Mr. Pitt, then prime-minister, the first sketch of his plan for the conveyance of letters a.d. 1782, and a second, further developed, in 1783. In July of the same year the post-office authorities furnished government with three volumes of objections to the proposed innovation. In spite, however, of this opposition, the first mail coach was started from London for Bristol on Aug. 20, 1784. In 1736 the post-office declared its opinion that the plan was prejudicial to revenue and commerce. Mr. Palmer’s original agreement was for 2½ per cent. on the surplus of the net revenue over £240,000, and a salary of £1,500 a year, as comptroller-general of the post-office. An annuity of £3,000 was settled upon him in 1792.

MAILLOTSINS.—The name given to the citizens of Paris who revolted on account of the tax of the twelfth denier upon provisions, a.d. 1352. They rushed to the Hotel de Ville, and finding no weapons but leaden mallets,—hence their name, fell upon the collectors of the tax with these, and killed several. The example set by Paris was imitated by many provincial towns. The dukes of Anjou, Berri, and Burgundy, who acted as guardians for their nephew Charles VI., entered into a treaty with the revolted Parisians. The French army, after the battle of Rosebec, or Rosbach, Nov. 17, 1852, marched upon Paris, and the citizens were punished with fines and confiscation in 1383.

MAILS.—An act for the conveyance of mails by railway (2 Vict. c. 85) was passed Aug. 14, 1838.

MAILING, formerly punished by indicting a mail coach unless it was in the interest of the offender, as in the Mosaic economy, “an eye for an eye, a tooth for a tooth,” was afterwards met by fine and imprisonment. By 22 & 23 Charles II. c. 1 (March 6, 1671), malicious wounding and mailing was made a capital offence. This was called the Coventry Act (q. v.), and has since been repealed. It was made a capital felony, if the intention to commit murder is proved, or otherwise, punishable with transportation for life, by 1 Vict. c. 85 (July 17, 1837). By 9 & 10 Vict. c. 25 (1846), mailing by fire, gunpowder, or explosive and destructive substances was declared to be felony.

MAINE (North America) was discovered by one of the Cabots, a.d. 1497. The French visited it soon after, and called the northern part of the country Maine, and the eastern portion Acadie or Acadia. The first settlement was made at Phippsburg in 1607, and several others were formed by the English about 1635. Sir Ferdinand Gorges received a proprietary charter in 1639. Maine united to Massachusetts as the county of Yorkshire in 1652; was purchased from the Gorges family by Massachusetts in 1676. It was the theatre of the war between France and England from 1702 to 1713, at the close of which Acadia was ceded to England by the treaty of Utrecht, March 30, 1713. In 1820 Maine became an independent state. At the close of the war, in 1814, the settlement of the boundary between Maine and the British province of New Brunswick was, by the fourth article of the treaty of Ghent, Dec. 24, 1814, referred to two commissioners, one to be appointed by the king of England, and the other by the president of the United States. In the event of a disagreement between the commissioners, the matter was to be referred to some friendly sovereign or state, whose decision was to be final and conclusive. Disputes arose, and by mutual consent the king of Holland was named arbitrator. He decided in favour of Great Britain, but the United States government refused to be bound by the award. Commissioners were sent out in 1839, to examine the boundary-line claimed by England. In 1841 another commission went to examine the line advocated by America, and they both reported in favour of the English claim. The controversy was at last settled by the Ashburton treaty (q. v.), concluded at Washington Aug. 9, 1842, by which the Americans obtained seven-twelfths of the disputed territory.

MAINE LIQUOR LAW.—This law, prohibiting the manufacture and sale of intoxicating liquors, except for certain stated purposes, and ordering the arrest and imprisonment of drunkards, was established in Maine, June 2, 1851.

MAIN PLOT, a conspiracy formed a.d. 1603, to place Arabelia Stuart on the throne, was called the Main to distinguish it from the Bye, the Surprise, or the Surprising treason (q. v.). Isabella Stuart was a cousin of James I., being the daughter of the duke of Lennox, brother to Lord Darnley, the king’s father. Sir Walter Raleigh and Lord Cobham are said to have been the prime movers in this plot. They were seized in July. Sir Walter Raleigh was indicted on a charge of high treason, Aug. 21, and was tried and condemned at Winchester, Nov. 17, and Lord Cobham Nov. 25. They were both reprieved, the latter on the scaffold, Dec. 9; but Raleigh was kept in the Tower until 1616.

MAIPU, or MAYPU (Battle).—The republican army, led by San Martin, defeated the royalists in a plain bordering on the river Maipu, in Chili; a.d. 1818.

MAITLAND CLUB (Glasgow), named after Sir Richard Maitland, who died March 20, 1866, was instituted March 31, 1828. The object of the association is the publication of works illustrative of the history, antiquities, and literature of Scotland.

MAJesty.—The title of majesty, at first applied amongst the Romans to the dictators, the consuls, and the senate, as the representatives of the power of the people, was appropriated by the emperor Tiberius (a.d. 14-37). It was also adopted by the German emperors, and was introduced into France by Henry II.
about A.D. 1547, though Louis XI. was the first to assume it permanently and officially. Francis I. saluted Henry VIII. with this title at their interview in 1520, and it was the first English monarch to whom it was applied. The French Assembly, in 1791, abolished the title.

**MAJORCA** (Mediterranean Sea).—This island is the largest of the Balearic group (g. e.), and but little is known of its early history. After the final expulsion of the Moors, A.D. 1288, Jayme I., king of Aragon, conferred the islands upon his third son, and they formed a separate kingdom up to 1349. In 1521 the peasants of Majorca revolted against the nobility, and committed great excesses. Majorca declared for Charles in the war of the Spanish succession. The island was captured in June, 1715, and it remained faithful to Spain during the occupation of the Peninsula by the French. In 1761 Hyder Ali subdued the country, and in 1782 he appointed a deputy. A serious rebellion was provoked by an attempt made by Tipppo Salib to introduce religious changes in 1788. Christianity was introduced at Malabar at a very early period.

**MALACCA** (Malay Peninsula).—The capital of a district of the same name, was founded by a Malay king, A.D. 1250. The Portuguese visited the town in 1507, Albuquerque captured it in 1511, and it was made a Portuguese settlement. The Dutch, who failed in an attack in 1605, reduced the place in 1640, and held it till Aug. 17, 1795, when it was taken by the British. It was restored at the peace of Amiens, March 25, 1807, was soon recaptured, and again restored to the Dutch in 1814. The town and a district of 1,000 square miles were exchanged by the king of the Netherlands for the British possession of Bencoolen, in the island of Sumatra, by a treaty concluded March 17, 1824. The exchange was fixed to take place March 1, 1825.

**Mala*ga** (Sea-Fight).—An allied English and Dutch fleet, consisting of forty-one English and twelve Dutch ships of the line and six frigates, engaged the French fleet, off Malaga, Sunday, Aug. 10, 1704. The battle lasted till night. It was not renewed on the 14th, and on the 15th the French fleet sailed away. No ships were captured; but the English and Dutch lost nearly 3,000, and the French 4,000 in killed and wounded. Sir George Rooke commanded the allied fleets.

**Malaysia** (Spain), the ancient Malaca, is supposed to have been founded by the Phoenicians, and passed under the sway of the Carthaginians, the Romans, the Goths, and the Moors, in rapid succession. Ferdinand and Isabella wrested it from the Moors, after a siege of three months' duration, Aug. 18, 1487. Sebastian, at the head of a French army, captured Malaga, with 130 pieces of cannon and a quantity of stores, Feb. 14, 1510. The national guard revolted, and proclaimed the Spanish constitution of 1812 in this town, July 25, 1836. The castle, built by the Moors in 1279, shows traces of the effects produced by the Spanish artillery in the siege of 1487. The cathedral, commenced in 1526, was not completed until 1782; and the custom-house, begun in 1791, was finished in 1829. The breakwater was commenced in 1888.

**Malakhoff** (Crimea).—On the invasion of the Crimea by the allied English, French, and Turkish forces, in the autumn of 1854, this small white stone tower, forming one of the defences of Sebastopol, was much strengthened by the Russians, who constructed an immense semicircular mound, mounting thirteen guns. As the siege progressed, the defences of the Malakhoff were still further extended, and it became in fact the key of the whole position. It was assaulted June 18, 1855, by the French, who, after a gallant struggle, were compelled to retire. The Russians did everything in their power to render the Malakhoff impregnable, and the result of their labours has been described as "a formidable palisade or abattis of sharpened stakes in front; then an earthen parapet of enormous height and thickness; then a deep and wide ditch; then three tiers of batteries rising one above another, armed with more than sixty guns of large calibre; then sheltered spots at which riflemen might be posted; and, lastly, a place d'armes large enough to contain a powerful defensive or offensive body of infantry." The French collected 25,000 men, exclusive of 5,000 Sardinians and the reserves, for the second assault on the Malakhoff, and it was delivered Sept. 8, 1855, with entire success. For six hours the Russians made various unsuccessful attempts to expel the French.

**MALDIVES, or MALEDIVA ISLANDS** (Indian Ocean).—This group, according to some authorities, 40,000 or 50,000, and, according to others, 1,900 or 2,000 in number, are described by two Mohammedan travellers of the 9th century. A Portuguese mariner, wrecked upon them in 1512, found them occupied by Mohammedans.

**MALDON** (Essex), supposed to be the ancient Camulodunum, is first mentioned in the reign of Edward the Elder, who, A.D. 920, built and fortified the town. The Danes, who attacked it in 921, were repulsed, but they returned and captured it in 923. Queen Mary granted it a charter June 18, 1553. It has sent members to parliament since 1329. The free grammar-school was founded in 1608.

**MALIGNANO, or MARIGNANO** (Battles).—Francis I. defeated an allied German, Italian, and Swiss army, under the command of Maximilian I., at this village, near Milan, Sept. 13 and 14, 1515. After this victory, Bayard was knighted by the French King.
It is sometimes called the battle of St. Donato. In a second battle at the same place, Francis I. was defeated and taken prisoner by the Imperialists, Feb. 23, 1525. The French, who lost 8,000 men, were compelled to retreat from Italy. This is sometimes called the battle of Pavia. It was after this battle that Francis I. is said to have declared, "All is lost but honour." In a third battle fought here, the French and Sardinians defeated the Austrians, June 8, 1859.

MALINES, or Mechlin (Belgium).—This town dates from the 5th century of the Christian era. It was destroyed by the Northmen in 894, was rebuilt in 897, and fortified in 930. The fine Gothic church of St. Rombaud was commenced in 1220. In 1333 Adolphus de la Marsc sold Malines to the counts of Flanders, and it subsequently passed into the power of the dukes of Burgundy. A league against France was signed here by the pope, the emperor Maximilian, Henry VIII. of England, and Ferdinand of Spain, April 5, 1513. The explosion of a powder magazine occasioned great loss of life and property in 1546. Malines has been several times sacked, by the Spaniards in 1572, the prince of Orange in 1578, and the English in 1583. Marlborough took it in 1706, and it was taken by the French in 1716, 1719, and 1794, and in 1804 they destroyed the fortifications. The Academy of Painting was founded in 1771. Malines was erected into an archbishopric in 1561. Synods were held here in 1570 and 1607.

MALLIQUO, or MANICOLA (New Hebrides).—This island, one of the largest in the group, was discovered by Quiros, a.d. 1606. Captain Cook landed upon it in July, 1774.

MALMAISON (France).—A castle, near Versailles, the retreat of the empress Josephine after her divorce from Napoleon I., and the scene of her death, May 30, 1814. A decree was passed in 1853, for the erection of a monument to her memory.

MALMESBURY (Wiltshire).—A monastery founded here in the 8th century, was destroyed by the Danes in the 9th. It was restored, destroyed, again restored, and was made a mitred abbey by Edward III. The town was taken by the parliamentary army in 1643.

MALMÖ (Sweden).—A treaty was concluded between Sweden and Denmark at this strongly-fortified seaport town, a.d. 1524. On the death of Frederick I. in 1334, Malmö declared in favour of Christian II., who had then been kept in captivity since 1293. An armistice between the Danes and the army of Slesvig-Holstein was signed at Malmö, Aug. 26, 1348.

MALO-JAKOSLAWITZ (Battle).—Napoleon I. with a portion of the French army, having reached this town, Oct. 23, 1812, on the retreat from Moscow, was assailed by the Russians under Doctoroff, Oct. 24, when a series of furious encounters followed. The town, fired in several places, was taken and retaken seven different times, and was almost entirely destroyed. Though the French finally succeeded in expelling the Russians, their losses were very severe, and at a council of war held the night of the battle, Napoleon I. determined to fall back on the Smolensko road.

MALO, St. (France).—This seaport town, supposed to have been founded about the 10th century, was attacked by John of Gaunt a.d. 1378. The privateers of St. Malo did so much mischief to English commerce, that in 1693, and again in 1695, the English bombarded the town, but without success. They destroyed a number of privateers and other ships in the harbour of St. Malo, June 8, 1753. Another descent made upon the coast of France at St. Malo, Sept. 16, 1758, terminated in a severe loss, 600 having been killed and wounded and 400 taken prisoners.

MALPLAQUET (Battle).—The duke of Marlborough and Prince Eugene, with an allied English and German army, defeated the French in this plain, near the river Sart, Sept. 11, 1709. The allies lost 18,000, and the French 15,000 in killed and wounded.

MALTA (Knights).—This island was conferred by the emperor Charles V. upon the Hospitallers (q. v.), for the heroism which they displayed against the Saracens during the siege of Rhodes. They took possession Oct. 26, 1530, and from this time the Hospitallers are frequently called the Knights of Malta.

MALTA (Mediterranean Sea).—This island, the ancient Melita, was first colonized by the Phoenicians, and afterwards by the Carthaginians. The Romans laid it waste B.C. 257. The apostle Paul was wrecked here on his voyage from Palestine to Rome, A.D. 59 (Acts xxviii. 1). It fell under the power of the Vandals, and was wrested from them by Belisarius in 533. They retained possession till it was conquered by the Arabs in 870. They were expelled by the Normans, under Count Roger, in 1090, and these new occupants held the island till 1189, when it passed under the sway of the German emperors. It was in the possession of France 1278 till 1285, when it passed to the house of Aragon. The emperor Charles V., who inherited it as king of Aragon, made a grant of it to the Hospitallers, or Knights of St. John of Jerusalem, in 1530. Soliman assailed Malta with a fleet of 150 vessels, carrying 30,000 troops, in 1565. The attack on the castle of

534
MAMERS (France), once a fortified town, was taken by the Normans in the 11th century. The English seized it, and destroyed the fortifications, about a.d. 1429.

MAMERTINES.—Some mercenary bands, who took possession of Messina about b.c. 282, assumed the name of Mamertini, or "children of Mars," from Mamers, an Ocean name of that deity. Hence Messina (q. v.) was sometimes called Mamertina.

MANAA (Manaar Passage).—This island, on the coast of Ceylon, was occupied by the Portuguese a.d. 1560. They were expelled by the Dutch in 1658, and it passed under the rule of the English in 1796.

MANASSAS, OR BULL'S RUN (Battle).—The Confederates gained a victory over the Federalists, or the Union party, after nine hours' severe fighting, at Bull's Run, near Manassas Junction, in Tennessee, North America, June 21, 1861. The Federalists, who were in much greater strength than their opponents, were seized with a sudden panic, and, abandoning arms, &c., fled in wild confusion from the field of battle.

MANCHESTER (Bishopric).—An order in council, dated Dec. 12, 1838, passed for the erection of this dioceze, did not take effect, and was subsequently repealed by 10 & 11 Vict. c. 108 (July 23, 1847), which established the bishopric upon another footing. Another order in council was issued Aug. 10, 1847, for carrying this act into effect, and the new see was subjected to the metropolitan jurisdiction of the archbishop of York. James Prince Lee was nominated the first bishop, Oct. 23, 1847, and was consecrated Jan. 23, 1848.

MANCHESTER (Lancashire).—The Celts, who migrated from Gaul, established a fort here, called Mancenion, or, 'the place of tents,' about b.c. 38; and it fell into the hands of the Romans a.d. 78, who gave the name of Mancinium to this station. The town was afterwards called Maniccestrae, or Mancestre.

MALVERN (Worcestershire).—Edward the Confessor established a hermitage at this place, which was subsequently erected into a priory, and on the destruction of the monasteries, Latimer earnestly prayed that it might be spared for the maintenance of preaching and hospitality. Henry VII. frequently resided at Malvern; but it owes its modern celebrity to the mineral waters which abound in its vicinity. Dr. Wall wrote a treatise on their efficacy in 1756.

MALWAH (Hindooestan).—This extensive province was invaded by the Mahrattas in 1707, and was wrested by them from the Mongol empire about 1732.

MAMELON (Crimea).—This hill, about one third of a mile in advance of the Malakhoff, and about a quarter of a mile from the allied French and English batteries, formed one of the chief defences of Sebastopol during the siege. It was about a mile in circumference at the base, and the sides, consisting of quarries, were steep and rugged. This was fortified by the Russians in February, 1865. The French captured the Mamelon June 9, 1855. MAMELUKS, or Mamelous. Malek Salch, the Ayyoubite sultan of Egypt, formed some Turkish and Circassian slaves into a body-guard, under this name, the word mameluke signifying, in Arabic, slave. a.d. 1330. They revolted, and placed one of their own body on the throne, in 1250. There were two dynasties of the Mameluke sovereigns; namely, the Bahairis, founded by Bayers in 1244, and the Borgistes, who superseded the Bahairis in 1381. Tumanbeg, the last sultan of the Mamelukes, was put to death at Cairo, by order of Selim, April 23, 1517. The Mamelukes continued to exist until the remnant of them were massacred at Cairo by Mehemet Ali, March 1, 1811.

MAL

St. Elmo commenced May 24, and the besieged were reduced to the last extremity when relieved by a Sicilian fleet. A new city, called La Valette, after the grand master, who had defended the place heroically against the Turks, was commenced in 1566, and completed in 1571. The Turks failed in another attack upon the island in 1601. The French expedition to Egypt arrived off the island June 9, 1798, when the grand master, Ferdinand Hospetsch, surrendered without striking a blow. The inhabitants revolted in 1798, and waged war against the French, in which they were assisted by an English squadron, until Sept. 5, 1800, when the French commander surrendered the whole island to the English. By the 10th article of the treaty of Amiens (March 25, 1802), England engaged to restore Malta to the Hospitals, and its independence was to be placed under the guarantee and protection of Great Britain, France, Spain, Prussia, and Russia. In consequence of the aggressions of Napoleon I. in Italy, Germany, and Holland, and his preparations to carry on war, the English government refused to evacuate the island, and hostilities were renewed. Malta was formally ceded to England by the treaty of Paris, May 30, 1814.

MAN
1654. July 19. Manchester sends its first representative to parliament, by order of Cromwell. The town lost the franchise at the Restoration.
1720. Manchester is described as the largest, richest, most populous, and busy village in England.
1745. Nov. 6. Prince Charles Edward and his army enter Manchester.
1752. The Mercury, the first Manchester paper of any importance, is established. The Infirmary is founded.
1753. June 22. Slight shocks of an earthquake are felt.
1755. The infirmary building is opened.
1756. Cotton goods are first exported.
1761. June 17. The Manchester and Worsley canal is opened.
1779. Oct. 9. Riots against the introduction of machinery take place.
1780. The muslin manufacture is introduced.
1781. The Philosophical Society is founded.
1783. A night-watch is first appointed.
1783. A great fire does some damage.
1788. June 19. The Queen's Theatre is destroyed by fire.
1799. The workhouse is erected.
1803. The Philosophical Society is founded.
1806. Broughton bridge is erected. The Portico is built.
1808. May 24 and June 25. A dispute between the masters and apprentices respecting wages leads to a riot, which is quelled by the military.
1809. The Exchange is opened, and the Manchester and Salford Water Company established.
1811. Hackney coaches are introduced.
1812. April 10. A riotous meeting of the populace is held in the Exchange.
1816. Nov. 4. The first reform meeting is held at Peter's Fields.
1817. Sneyd's bridge is opened. March 10. The "Blanketeers"’ meeting is held.
1818. Gas illumination is introduced.
1819. Aug. 15. Contest at Peterloo (q. v.).
1820. Aug. 1. Blackfriars bridge is opened. The Chamber of Commerce is established.
1821. Rochholme Road cemetery is formed. The Natural History Society is instituted.
1823. The Royal Institution is founded.
1824. The Mechanics Institute is founded.
1825. Jan. 1. Omnibuses are introduced in Manchester.
1826. Owing to commercial distress, numerous riots take place this year. Broughton suspension bridge and Hunt's Bank bridge are opened this year.
1827. The Botanical and Horticultural Society is founded.
1828. Oct. 7. The first musical festival is held.
1829. May 2. Serious riots take place; a factory is burnt, and numerous provision-shops are robbed. The Manchester Improvement Committee is formed this year. The Phrenological Society is founded.
1830. Sept. 15. The Manchester and Liverpool railway is opened. The building of the Old Palace is inaugurated. The Concert-hall is opened.
1831. The Botanical Gardens at Old Trafford are opened.
1833. The Choral Society is founded.
1834. The Statistical Society is founded.
1835. Manchester is incorporated by the Municipal Reform Act.
1836. March 20. The Blind Asylum is founded.

Manchester Art Treasures Exhibition. — The idea of holding an art-treasures exhibition at Manchester was suggested by Mr. Deane, the general commissioner of the exhibition, to a meeting held at Manchester March 26, 1856. A guarantee fund of £7,400,000 having been raised in three weeks, a site was selected at Old Trafford, adjoining the Botanical Gardens, for the erection of the building, which was a parallelogram, of 660 feet by 290 feet, covering an area of 130,000 square feet, at a cost of about £30,000. The arrangement of the art-treasures was placed under the direction of George Scharf, F.R.S. The number of paintings of all kinds, collected in this building, by old masters, was 1,115, and by modern masters, 689. There were, in addition, 969 water-colour drawings; 383 British portraits, 59 cases of engravings, 290 original sketches and drawings by the old masters, 937 engravings in line, 161 in mezzotint, 246 etchings, and 560 photographs. The museum of ornamental art comprised 17,000 articles. It was opened by Prince Albert May 5, 1857, and closed on the 17th of October. During the time it remained open it was visited by 1,335,915 persons; and it was, in all respects, a great success.

Manchester (North America), merely a village in 1840, received a charter in 1846.

Mandates, or Letters from the Pope, requesting a bishop to confer the next vacant benefice upon some person named therein, were first issued by Adrian IV. (A.D. 1154—1159). The practice was continued by Alexander III. (1159—1181), until Clement IV., in 1206, issued a bull claiming the right of nomination in certain cases. The right of issuing royal mandates to judges, for inter-
fearing in private causes, was relinquished as a prerogative of the English crown by Edward I.

Manfredonia (Italy), named after King Manfred, who founded it A.D. 1250, was at first named Novum Sipontum, because it stood near the site of that ancient town. A bay in the vicinity is called the Gulf of Manfredonia. The town was taken by the Turks in 1620.

Mangalore (Hindostan).—This town, supposed to have been colonized by Arabs at a very early period, was taken by Hyder Ali in 1767. The English, who took it Feb. 25, 1768, were compelled to retire early in May of the same year. They recovered it in 1783, the fortress surrendering March 9. Tippoo Saib besieged it May 23, and, having converted the siege into a blockade, the garrison capitulated Jan. 26, 1784. The English restored it at the conclusion of peace in that year; but it came into their possession, with the whole of the Carnatic, after the final overthrow of Tippoo in 1799.

Mangalore, (Treaty), was concluded between the British and Tippoo Saib at this town, in Hindostan, March 11, 1794. A restitution of conquests was agreed to on both sides.

Mangasee was included among iron ores until A.D. 1774, when Scheele, and afterwards Gahn, proved that the metal in this mineral was distinct from iron.

Mangareva Group. (See Gambier Islands.)

Manicheans.—This heretical sect was founded in Persia by Mani, Manes, or Manichæus, about A.D. 261. He endeavored to engraft Christianity upon the doctrines of the Magi, who believed in the two principles. The heresy spread rapidly through Persia, Egypt, and Palestine, ultimately affecting the whole Roman empire. Man was burnt alive by Varanes I. in 274. Milman (Lat. Christianity, b. ii. c. 4) remarks, "That sect, in vain proscribed, persecuted, deprived of the privilege of citizens, placed out of the pale of the law by successive imperial edicts; under the abhorrence not merely of the orthodox, but of almost all other Christians, were constantly springing up in all quarters of Christendom with a singularly obstinate vitality." It appeared under various disguises, and many of its main features were adopted by the Paulicians (q. v.), who sprung up at Samosata. The Manicheans were condemned by several councils, and Pope Leo I. ordered their books to be burned in 443.

Manilian Law.—In the year B.C. 66, Caius Manlius, one of the tribunes, proposed the revival of a law relating to the enrolment of freedmen, which had been carried by the popular party under Carbo, and was afterwards repealed by Sylla. By proposing it suddenly, at a late hour of the day, when the majority of the citizens were absent from the forum, he succeeded in his object; but it was instantly annulled by the senate, because it had been illegally passed. This is said to have been the origin of the celebrated Manilian law, vesting the sole management of the war against Tigranes and Mithridates in Pompey. It was supported by Caesar and Cicero, and passed B.C. 65.

Manilla (Indian Archipelago).—This city, on the island of Luzon, and capital of the Philippines, was founded by the Spaniards A.D. 1571. An expedition, fitted out at Madras, under Admiral Cornish and Colonel William Draper, took the place Oct. 6, 1762; when, to save the rich cargoes that lay in the port, a ransom of £1,000,000 was promised; an arrangement which the king of Spain afterwards refused to ratify. It was restored to Spain by the peace of Paris, Feb. 10, 1763. The royal college for the instruction of youths was founded by Philip IV, in 1645; the bronze statue of Charles IV., standing in the public square, was presented to the town by Ferdinand VII. in 1824. England was allowed to trade here in 1809, a privilege previously withheld from foreigners, and extended to all nations in 1814. An earthquake in 1845 destroyed 5,000 lives; and others in 1762 and 1824 did much damage. A fire, by which 10,000 huts were destroyed, 30,000 persons rendered homeless, and fifty lives lost, occurred March 26, 1833.

Manilla Islands. (See Philippines.)

Mantissa (Greece), the ancient Magnesia ad Sipyrum, surrendered to the Romans under Scipio, B.C. 190, and was nearly destroyed by an earthquake, when Tiberius granted funds from the treasury to aid in its restoration, A.D. 17. The emperor of Nicæa, Theodore II., died here A.D. 1258, and it fell into the hands of the Turks A.D. 1312.

Mannheim (Baden).—Frederick IV., the elector palatine, enlarged and fortified this place, then merely a village, A.D. 1666. It suffered greatly during the "Thirty Years' War. The French captured it in 1688, and the fortifications were improved in 1689. The French besieged Mannheim in 1733; but, having retired, returned and captured it Sept. 20, 1795. The French garrison capitulated to the Austrians, Nov. 22 in the same year. Mannheim was again taken by the French, March 2, 1799; and they were expelled by the Austrians, Sept. 15, 1799. One portion of the allied army passed the Rhine at this place in the night of Dec. 31, 1813. Mannheim was made the seat of the electoral court in 1720; and it was removed to Munich in 1773, and the town was assigned to Baden-Baden by the treaty of Luneville, Feb. 9, 1801. The palace, founded in 1720, was completed in 1731.

Manor.—In the feudal times, a manor was a territorial district, with jurisdiction, rights, and perquisites thereto belonging. In England manors were afterwards called baronies, and ultimately lordships. Each lord held a
court, called Court Baron (q.v.), for redressing wrongs and settling disputes among the tenants. A writer in the National Cyclopaedia remarks: “The modern English manor derives its origin from subinfeudation, as it existed before the modifications of the system of tenures introduced in 1215 by Magna Carta, and the still more important alterations made in 1290, by the statute ‘Quia Emptores,’ and in 1324 by the statute ‘de Prerogativa Regis,’ by which statutes the granting land in fee simple, to be held by the grantee as a tenant or vassal to the grantor, was stopped.”

MANRESA (Spain).—A French brigade was cut off near this town by the Spaniards, A.D. 1810. The French captured and destroyed it in May, 1811. The modern bridge over the Carbonero was built in 1804.

MANSION HOUSE (London) was founded A.D. 1739, from the designs of George Dance, city surveyor. The use of the Mansion House, furniture, carriages, &c., and an allowance of £8,000, is granted to the Lord Mayor during the year that he holds the office. It was first occupied in 1753, by Thomas Winterbottom, who died during his mayoralty.

MAES, LE (France), formerly the chief town of Maine, is built upon the site of the Roman Subodium, which in the 4th century was called Cenomania, from which the present name is derived. Its earlier inhabitants, the Cenomani, joined Verongetorix against Caesar, B.C. 52. The church of Notre Dame du Pré dates from the 11th, the church de la Couture from the 12th, and the cathedral of St. Julien from the 13th century. Henry II. of England was born at Le Mans in March, 1133. The church de l’Ancienne Visitation was opened in 1737. Le Mans has sustained several sieges. Most of its defences were destroyed during the Vendean war, Dec. 13–16, 1793. The Chouans took Le Mans in March, 1799.

MANSURAH, or EL MANSOORAH (Battle).—The Saracens defeated the Crusaders at a great battle near this town, in Lower Egypt, April 5, 1250 A.D. Louis IX. was compelled to purchase peace on very humiliating terms.

MANTES (France).—William L., having marched with an army from Normandy into France, burned this town to the ground in August, 1087. It is in this conflict his horse is said to have set its foot on some hot ashes, and, by plunging violently, bruised its rider on the point of his saddle. The injuries William L. received brought on an illness, of which he died at the monastery of St. Gervas, Sept. 9.

MANTINEA, or MANTINEIA (Greece).—This city of Arcadia, said to have been named after Mantineus, son of Lycaon, was founded by the inhabitants of four or five villages at an early period. Mention is made of the city about B.C. 540; and an indecisive battle was fought between Mantinea and Tegea, B.C. 423. The Spartans, under Agis, defeated the combined army of Argives, Mantineians, and Athenians, near this city, in June, 418 B.C. They were defeated by the Spartans B.C. 385, and compelled to retire from their city, the walls of which were destroyed. They returned after the battle of Leuctra, July, 371 B.C., and began to rebuild their city. Epaminondas, the Theban general, defeated them at the second battle of Mantinea, B.C. 362. The city was taken and pillaged, and the inhabitants were sold as slaves, by Antigonus Doson, king of Macedonia, B.C. 222. It was rebuilt, and called Antigonea, after Antigonus Doson, and did not resume its former name until the time of Hadrian. In addition to the aforementioned battles, the defeat of Archidamus and the Spartans by Demetrius Poliorectes, B.C. 295; the defeat of the Spartans under Agis, by Aratus and the Achaean, B.C. 424; and the defeat of the Spartans by the Achaean forces under Philopomen, B.C. 207, are all known as battles of Mantinea, because they were fought in a plain near that city.

MAN-TRAPS and SPRING-GUNS.—By 7 & 8 Geo. IV. c. 18 (May 28, 1827), any person setting any spring-gun, man-trap, or other engine calculated to destroy, injure, or inflict grievous bodily harm, was to be guilty of a misdemeanor. The act did not extend to Scotland. By the fourth clause, spring-guns, &c., might be set inside a dwelling-house for the protection thereof, from sunset to sunrise.

MANTUA (Italy).—This city of Northern Italy was founded by the Etruscans at a very early date, but little is known with certainty respecting its ancient history. It passed under the Roman power B.C. 197, and is memorable as having been the birthplace of Virgil, B.C. 70. Its territories were distributed among the veterans of Augustus, B.C. 42; and it was sacked by Aurelian in A.D. 270. It was pillaged by the Marcomani, in 403 and 408, and was taken by Alaric. After numerous reverses of fortune, Mantua passed into the hands of Louis I. of Gonzaga in 1323; and, under his rule, speedily attained great importance. In 1392 a confederation was signed here with other Italian cities, for the maintenance of the equilibrium of Italy. The town was erected into a marquisate in 1433, and into a duchy in 1530. Mantua was besieged and taken by the Imperialists, after an arduous siege, which lasted from April 8 to July 18, 1630. In 1701 it was occupied by the French, and in 1707 was taken by the Imperialists. On the extinction of the house of Gonzaga in 1705, it passed into the power of Joseph I. of Austria; and in 1791 Leopold II. and the Bourbon emigrants organized a coalition here against the French republic. It was taken by Bonaparte, after a siege which lasted from June 14, 1796, till Feb. 2, 1797, and erected into the chief town of the department of the Mincio. The Austrians regained possession July 30, 1799, but it was restored to France in 1800, after the battle of Marengo. It was restored to Austria in 1814. By the treaty of Zurich, Nov. 10, 1859,
MANTUS and Peschiera were the only towns of Lombardy left to the house of Austria. Mantua was erected into a bishopric in 908. Councils were held here in 827, 1053, and 1067.

MAPL.—The scarlet maple was introduced into England from North America, before A.D. 1656, and the ash-leaved maple from the same part of the world before 1688.

MAPS.—Anatolander of Miletus is the reputed inventor of geographical maps, about B.C. 568. The first maps engraved from metal plates were used to illustrate an edition of Ptolemy's Geography, published in A.D. 1462; and the first marine charts seen in England were brought by Bartholomew Columbus in 1488. Mercator's projection was invented in 1569, by Gerard Mercator, and improved in 1599 by Wright.

MARATHON (Battles).—A great battle, in which the Greeks, under Miltiades, defeated the Persians and vindicated the independence of Greece, was fought in the plain of Marathon, in Arcadia, B.C. 490. Marathon is mentioned as a place of importance in the Homeric poems.—The Greeks, during the war of independence, defeated 2,000 Turks at Marathon, July 18, 1824 A.D.

MARBACH LEAGUE.—The elector of Mayence, the margrave of Baden, several powerful princes, and many of the free towns, formed a league at Marbach, A.D. 1406, under pretence of redressing various wrongs and abuses, for the destruction of the emperor Rupert. He made some concessions, and the league was dissolved.

MARBLE.—Pliny states that marble was first employed as a material for sculpture by Dippacus and Scyllis, who were born in Cretae about B.C. 569. They used the white marble of Pharos in their works. The practice of staining marble commenced during the reign of Claudius.

MARBLE ARCH (London) was erected by George IV. as a gateway to Buckingham Palace, A.D. 1830, and was removed to its present site, at the north-east entrance of Hyde Park, in 1851. The original cost was £50,000, and the expense incurred by the removal amounted to £11,000.

MARBURG (Hesse-Cassel).—The landgrave Philip founded the first Lutheran university at this town A.D. 1527. A conference was held in its castle between Luther, Melancthon, and other German reformers, Oct. 1, 1529. The French captured Marburg June 3, 1759, but were expelled by the Austrians Sept. 11. The French took it again in 1760; and the garrison, assailed by the Austrians without success in 1761, was compelled to surrender in 1762. The church of St. Elizabeth, commenced in 1236, was not completed until 1293.

MARCH.—The third month in the year was named Martius by the Romans, after the god Mars. The Anglo-Saxons called it Hlyd Monath, i.e. stormy month. The old proverb, "A bushel of March dust is worth a monarch's ransom," expresses the value formerly attached to a dry March.

MACHES, or country lying near the marks or boundaries of two kingdoms, often had peculiar rights and customs. The authority of the lords of the marches, called lords marchers,—whence the title marquis, between England and Wales, was abolished by 27 Hen. VIII. c. 26 (1536). The Court of the Marches of Wales was abolished by 1 Will. & Mary, c. 27 (1689).

MARCHFIELD (Battle).—Rodolph of Habsburg defeated the Bohemian monarch Ottocar II. at Marchfield, near Vienna, Aug. 26, 1278. Ottocar II. fell in the encounter, which took place between Weidenfels and Jenedsberg.

MARCHIONESS.—The title of marchioness was bestowed upon Lady Anne Rochfort in 1532, and she was invested at Windsor, Sunday, Sept. 1, in the same year.

MARCIONISTS, a distinct sect from the Marcionites, were thus named from Marcianus Trapezita, who, in the time of Justinian I. (A.D. 527—565), observed the Sabbath as a fast.

MARCIONOPOLIS (Messia), named after Marciana, the sister of Trajan, who built it in her honour, was the capital of the second Messia. The Goths assailed it in the 3rd century, but, on the payment of tribute, retired. It was made the capital of Bulgaria, and was frequently besieged.

MARCIONITES.—A sect of heretics founded by Marcion, son of the bishop of Sinope, and a sailor, about A.D. 150. He held that there were three original principles. His followers were the forerunners of the Manicheans. They admitted no married persons to their baptism, requiring all candidates to be either virgins, widows, bachelors, or divorced persons. Marcion held it lawful to repeat baptism three times for the remission of sins. Tertullian wrote against this heresy in 207.

MARCOMANNI.—The name Maro-o-manni, i.e. March-men, or borderers, was given by the Romans to various tribes on the confines of Germany. Some hordes under this name were driven out of Gaul by Julius Cesar, B.C. 55. Marobodinus formed a league amongst these tribes, and concluded a treaty with the emperor Tiberius, A.D. 6. The Cheruci defeated the Marcomanni A.D. 17, and a peace was mediated between them by Drusus. Domitian made war upon them, and was defeated A.D. 90. In alliance with other tribes they invaded the Roman empire in 166, when a war commenced, which was not brought to a close until 150. They ravaged Italy in 270. The last notice of the Marcomanni is in 451, when they formed a contingent of the army with which Attila invaded Gaul and Italy.

MARCUS, St. (English Channel).—These islands, off the coast of France, were taken by the English A.D. 1795. The small garrison repulsed an attack made by a flotilla of French gunboats, May 7, 1796. The English lost one man killed and four wounded.
whilst the French admitted a loss of several hundred in killed and wounded. These islands were restored to France by the treaty of Amiens, March 25, 1802.

MAEDIA (Battle).—Constantine I. defeated his rival Licinius, in this plain, in Thrace, A.D. 315. In consequence of this defeat, Licinius entered into a treaty with Constantine in December, 315. Thrace. Asia Minor, Syria, and Egypt were assigned to Licinius.

MARENGO (Battle).—The Austrian army under Mosca was totally defeated by the French at this village, near Alessandria, in Italy, June 14, 1800. The Austrians had defeated their antagonists at all points, and Napoleon was about to order a retreat, when Desaix, who was killed in the moment of victory, counselled further resistance, and Kellermann by a brilliant charge changed the fortunes of the day. A pageant, representing the battle, was held on this plain, in presence of Napoleon I., the empress, and a large assemblage of spectators, in 1805.

MARGARITA (Caribbean Sea).—This island was discovered by Columbus A.D. 1498.

MARGATE (Kent).—The name is said to be derived from Meregate, on account of the hollow between two hills in which the town is situated. Bathing-machines were introduced here about A.D. 1790. The first stone of the General Sea-Bathing Infirmary was laid June 21, 1792, and Trinity church was erected in 1825.

MARGUS, MORGM, or MEGUM (Battles).—Carinus, who disputed the empire with Diocletian, was defeated and slain near this city of Mosia, at the confluence of the Margus and the Danube, in May, 285 A.D.

—The Goths defeated a Roman army under Salianus on Margus in 505.

MARIA ISLAND (Pacific) was discovered by Tasman A.D. 1642.

MARIA LOUISA, (Order,) was founded A.D. 1792 for ladies only.

MARIAN PERSECUTION commenced in January, 1555, when thirty persons, found using the service-book of Edward VI., were seized and imprisoned. Rogers was burned at the stake in Smithfield, Feb. 4, and Hooper, bishop of Gloucester, at Gloucester, Feb. 9. Justices of the peace were ordered to search for heretics, and many persons were apprehended and executed, thirteen having been put to death at Smithfield, June 27, 1553. Ridley and Latimer, condemned as obstinate heretics, were burned at Oxford Oct. 16. Cranmer suffered in the same manner at Oxford, March 21, 1556. According to the lowest estimate, nearly 500 persons, belonging to the clergy and the laity, suffered during this persecution, which terminated at the death of Mary, Nov. 17, 1558. Above 1,000 persons sought refuge in Germany and Switzerland whilst the persecution lasted.

MARIETHA (Order,) was founded A.D. 1775 in Austria.

MARIE-GALANTE (Caribbean Sea).—This island, discovered by Christopher Columbus A.D. 1493, was settled by the French in 1647.

MARIENBERG (Saxony).—This town, celebrated for its iron and silver mines, was founded by Henry, duke of Saxony, A.D. 1519.

MARIENBERG (Prussia).—The grand master and the knights of the Teutonic order removed their seat from Venice to this town A.D. 1309. A league of Prussian cities, called the Convention of Marienburg, was formed in 1436. The Teutonic knights compelled the Prussians to dissolve this league. The Poles having assailed the castle unsuccessfully in 1410 and in 1420, captured it in 1457. The castle, which had fallen into decay, was restored by the king of Prussia, in 1815.

MARIENTHAL (Prussia).—The Prussian cities of the province having formed a league against the Teutonic knights, A.D. 1440, transferred their allegiance to the king of Poland in 1454. Near the capital, of the same name, Prince Eugene was surprised by the forces of Wittgenstein, and suffered a severe defeat, Jan. 12, 1813.

MARIETTA (North America) was founded by colonists from New England, A.D. 1788, and was named after Marie Antoinette. The college was founded in 1832.

MARINER'S COMPASS. (See AMALTHEI and COMPASS.)

MARINES are first mentioned, according to Grose, A.D. 1684. In the reign of William III. the soldiers on the navy establishment seem to have been put in training as seamen. Six regiments of maritime soldiers were raised in 1702. On the recommendation of Lord Anson, 200 companies were raised and placed under the control of the Admiralty in 1755. The title "Royal" was bestowed upon the corps by George III., May 1, 1802, as a mark of approbation for their services during the war.

MARINO, SAN (Italy).—A hermit named Marinus, who had been a monk, came from Dalmatia, and settled in this locality A.D. 469, and at his death a church was built, and a village gradually formed. It had become a walled town, and was called Plebs Santi Marini cum Castello, in the 10th century; and in the 12th century the commune of San Marino purchased some neighbouring lands from the lords of Urbino. In the civil wars between the Guelphs and Ghibellines, the people sided with the latter, for which they were excommunicated by Innocent IV. (1243—1254). Called upon to pay taxes to the papal government about the end of the 14th century, they refused, and on reference of the dispute to a judge of Rimini, decision was given in their favour; from which period San Marino has been acknowledged as an independent state. This independence was respected by Napoleon I., and confirmed by the pope on his restoration in 1814.

MARISHAL COLLEGE. (See ABERDEEN.)

MARK.—An old gold coin in England, value 1s. 4d., bore this name. The silver
mark seems to have originated in Denmark, and was long current on the continent, especially amongst the northern nations. James VI. of Scotland coined a two-mark piece, a balance-mark, and a half-mark, in silver. Previous to his accession to the British throne, he had two sets of thistle-marks, so named from the thistle on the reverse, and half-marks struck. These seem to have been the last coins of this name struck in Great Britain.

Markets, held in former times chiefly on Sundays and holidays, as the people then assembled for divine service, were forbidden to be held in churchyards by 13 Edw. I. c. 5 (1285). By 27 Hen. VI. c. 5 (1458), Sunday markets, except on the four Sundays in harvest, were prohibited; and by 29 Charles II. c. 7 (1667), markets were declared illegal on any Sunday.

Marke’s, St. (Venice), considered to be the finest Byzantine church in Western Europe, was built A.D. 977—1043, the original church having been destroyed in 976. The foundation-stone came into possession of Mr. Douce in 1834, and is now preserved in the Doucean Museum, Goodrich Court, Herefordshire. Howell, in his letters, mentions a huge iron chest as tall as himself, which he saw in the treasury, with a crevise for receiving the gold, bequeathed to the saint, A.D. 1619. The emperor Frederick I. and Pope Alexander III. met here, when a proclamation of peace was made with much ceremony, July 24, 1177.

Marlborough House (London).—This house was built by Sir Christopher Wren for the great duke of Marlborough, in 1709 and 1710, and was bought by the Crown as a residence for the Princess Charlotte and Prince Leopold in 1817. The queen dowager Adelaide was the last resident of Marlborough House, and after her death, in 1848, the queen allowed it to be used for the Vernon gallery of paintings. The prince of Wales will reside here on attaining his majority.

Marlborough (Wiltshire) received its first charter A.D. 1205. A parliament met here Nov. 18, 1267, in the reign of Henry III., when the statutes of “Marleberg” were made, which have since been constantly received as the law of the land. The college, for the education of 500 pupils, sons of clergymen and others, was incorporated in 1543.

Marmande (France).—This ancient town is said to have been occupied by the Goths, and was destroyed by the Saracens in the 8th century. It was rebuilt and captured by Simon of Montfort in 1212, and by Amasyr of Montfort in 1219. The English took it in 1247, and Henry IV. of France besieged it in 1577.

Maronites.—Gibbon (ch. xlvi.) asserts: “In the style of the Oriental Christians, the Monothelites of every age are described under the appellation of Maronites, a name which has been insensibly transferred from an hermit to a monastery, from a monastery to a nation. Maron, a saint or savage of the 5th century, displayed his religious madness in Syria; the rival cities of Apamea and Emesa disputed his relics, a stately church was erected on his tomb, and 600 of his disciples united their solitary cells on the banks of the Orontes.” The subject is involved in obscurity; but the truth appears to be, that John Maro, or Maron, a monk, founded several convents on Mount Lebanon during the 5th century. He maintained the independence of his followers, and assumed the title, “Patriarch of Antioch.” His followers became infected with the Monothelite doctrine in the 7th century, and were from that time called Maronites, and regarded as a distinct sect. They renounced the Monothelite doctrine in 1182, and were readmitted into the Roman Catholic church. They yielded, however, only a modified obedience to Rome, and have frequently been subjected to severe persecutions. A large number of the Maronite Christians were massacred by the Druses (q. v.) in the neighbourhood of Beyrout and Lebanon, in May and June, 1860, and from 1,000 to 2,000 were killed in the streets of Damascus July 9. The remarks of Gibbon hold good, that “the humble nation of the Maronites has survived the empire of Constantinople, and they still enjoy, under their Turkish masters, a free religion and a mitigated servitude.”

Maroons.—When Spain was dispossessed of Jamaica by the English, May 3, 1655, the slaves belonging to the Spaniards took themselves to the mountains, and, recruited by runaways, soon became formidable under the name of Maroons. General Trelawney succeeded in making an arrangement by which they were confined to certain localities, in 1738. A rebellion broke out amongst them in 1795, which was put down. In 1796, 400 of the insurgents were transported to Nova Scotia in 1796, 350 of whom were removed to Sierra Leone in October, 1800, at a cost to the government of £5,903. 19s. 8d.

Marouga (Battle).—The Roman army, led by Julian, on their retreat from Assyria, defeated the Persians at Marouga A.D. 363.

Mar-prelate Tracts.—The first of these tracts, under the name of Martin Mar-Prelate, was printed at a movable press, and appeared A.D. 1588. A letter, instructing the archbishop to find out and commit to prison the authors and printers, was issued by the council November, 1588. Henry Peny, a Welshman, executed in 1663 for writing a pamphlet, was suspected of having assisted in the preparation of these libels against the pravity. They have also been attributed to Throgmorton, Shorland, Udall, and Fenner.

Marquesas, or Mendana Islands (South Pacific Ocean), were discovered by Mendaña de Neyra, A.D. 1568, who named them in honour of the marquis of Mendoza, viceroy of Peru. Hood's Island, one of the group, was discovered by Captain Cook,
April 6, 1776, and several others by the Americans in 1797. With the exception of three—Huahine, Raiatea, and Borabora—they were placed under the protectorate of France, June 19, 1857.

MARRIAGE. — The title of marquis is derived from the lords marchers, appointed to guard the marches, or boundary-lands, who were suppressed by 7 Hen. VIII. c. 26 (1536). In the time of Edward III. a foreign nobleman, the marquis of Juliers, was made an English peer, with the title of earl of Cambridge; and Richard II. created Robert de Vere marquis of Dublin, A.D. 1385, he being the first English peer who bore the title. The marquis of Huntly and the marquis of Hamilton, created A.D. 1509, were the first who bore the title in Scotland. The practice of granting it as a second title to a dukedom was adopted after 1639.

MARRIAGE. — The institution of marriage is usually referred to Gen. ii. 21—25, which relates that God, in the garden of Eden, gave Eve to Adam as his wife. This view of the subject is confirmed by the answer given by Christ to the Pharisees, A.D. 29 (Mark x, 6—10). Among the ancient Greeks the nuptials were celebrated with various ceremonies; but no record was kept of their solemnization, and the only proof of their having taken place was afforded by the guests who were present at the wedding feast. The social position of wives among the Greeks was extremely low, sterility being esteemed in some states a sufficient cause for separation. Among the Romans no forms were requisite, though certain ceremonies were usually observed. The Lex Julia et Papia Poppæa, passed B.C. 15 and A.D. 9, placed certain restrictions respecting the parties between whom marriages might be contracted. Roman wives were treated with great consideration. They presided over the education of the children, conducted the household, and shared in the honour and respect shown to their husbands.

A.D. 325. The council of Nice prohibits ecclesiastics from marrying after their ordination.

366. Marriage during Lent is prohibited by the council of London.

450. Numerous synods disown the marriage of the clergy about this time.

592. Bishops are prohibited from marrying.

721. The council of Rome defines the degree of consanguinity within which marriage is unlawful.

968. May 16. The Canons of Worms totally prohibit the clergy from marrying.

1073. Priests are compelled to take the vow of celibacy.

1100—1290. Matrimony first mentioned as a sacrament.

1198. Innocent III. orders the marriage ceremony to take place in church.

1533. Bishops are empowered to grant licences for marrying without banns.

1538. A proclamation is issued in England enforcing the observance of celibacy.

1545—1563. The council of Trent includes marriage amongst the seven sacraments.

1549. The marriage of the clergy is permitted by 2 & 3 Edw. I. c. 21.

1554. The married clergy who do not separate from their wives are expelled.
MARSEILLES (France), the ancient Massalia, called by the Romans Massilia, was founded by a colony of Greeks from Phoecea, in Ionia, B.C. 600.

B.C.
542. A second colony settles at Massalia.
218. Massalia assists the Romans in the second Punyan war.
154. The people call in the aid of the Romans against the Decectes and Oxylby.
49. Massalia refuses to admit Julius Cesar within her gates, and is in consequence besieged and taken.

A.D.
470. Euric, king of the Visigoths, takes Massales.
583. It is plundered by the Saracens.
1214. Marseilles is erected into an independent republic.
1291. It passes under the dominion of the counts of Provence.
1423. It is sacked by Alfonso of Aragon.
1451. It is reunited to the French crown.
1654. The inhabitants repel an attack by the corsairs.
1793. Marseilles submits to Henry IV.
1800. Louis XIV. takes away its franchises.
1793. The plague carries off about 40,000 persons.
1798. April 30. The inhabitants of Marseilles join in the revolution.
1799. Aug. 25. Marseilles is taken by the republicans but is assisted by the Genoese.
1805. The new harbour of Le Joliette is completed.
1838 to 1860. The Exchange is erected.

MARSAILLÉS COURT. (See BOARD OF GREEN CLOTH, AND PALACE COURT.)

MARS, or MARSILAND, a nation of central Italy, first mentioned in Roman history B.C. 340, at which time they were on friendly terms with the Romans, against whom they leagued with the Samnites, b.c. 308. They concluded a treaty with the Romans 304 B.C., but again took up arms B.C. 301, when they were defeated, and were compelled to purchase peace by the cession of part of their territory. They became faithful allies of Rome, and were among the first to offer volunteers to the fleet and army of Scipio, B.C. 205. In the Social, sometimes called the Marsic war, B.C. 91, they took a prominent part in several victories over the Romans; but in the next campaign, B.C. 89, after repeated defeats, they were compelled to sue for peace. The Marsi received the full rights of Roman citizens, and from that time disappeared from history as a separate nation.

MAR’s INSURRECTION.—The earl of Mar invited the gentry to meet at a hunt, Aug. 27, 1715, and raised the Pretender’s standard at Brae-mar, in Aberdeenshire, Sept. 6. His force had gradually increased from about 50 to 5,000 men, when he entered Perth, Sept. 28. Mar remained some time inactive, and was defeated at Sheriff-muir, near Stirling, Nov. 13. Mar escaped with the Pretender from Montrose, Feb. 4, 1716, whence they proceeded to France; but some of the chiefs of the insurrection were captured and executed.

MARSTON MOOR, (Battle,) was fought between the royalists under Prince Rupert, and the parliamentary army under Lord Fairfax and Oliver Cromwell, at Marston Moor, in Yorkshire, July 2, 1644. It commenced about 7 o’clock in the evening, and the left wing of the king’s army totally routed the right wing of the parliamentarians; but Cromwell with his “Ironsides” managed to gain a victory over the king’s right wing. After a severe struggle, victory declared in favour of the parliamentarians, the royalists losing all their artillery, ammunition, and baggage.

MAṬĀBAṆ (Pegu).—This fortress was captured by the English during the Burmese war, Aug. 5, 1552.

MAṬIṆÊST (Battle).—An allied Austrian and Russian army, commanded by Prince Coburg and Suwarow, defeated the Turks at this place, in Wallachia, Sept. 22, 1759. No less than 5,000 Turks fell in the battle, and 2,000 in the pursuit. It is also called the battle of Rimnik, from the name of the village near Martinesti, where it was fought.

MAṬINICO, or MAṬINIQUE (Atlantic Ocean), called by the natives Madiana, erroneously supposed by some writers to have been discovered by the Spaniards A.D. 1493, was in reality discovered by Christopher Columbus, June 15, 1502, during his fourth voyage. It was settled by some French colonists from St. Christopher’s in 1635. The Dutch assailed it in 1674, and were repulsed with great loss. Admiral Penn failed in an attempt to capture it in 1685. The principal fortifications were assailed by an English armada from Jan. 24, 1759, and after doing considerable damage, the expedition withdrew. The island surrendered, Feb. 16, 1762, to an English force, which had landed Jan. 16; and it was restored to the French by the treaty of Paris, Feb. 10, 1763. It was retaken Feb. 5, 1781, and restored at the peace of Versailles, Sept. 3, 1783. The English again effected a landing Feb. 5, 1794, and after gaining several battles, the whole island capitulated March 23, 1794. The French failed in an attempt to recover it Dec. 7, 1795, and it was restored at the peace of Amiens, March 25, 1802. An English fleet landed 10,000 troops on the
island, Feb. 3, 1809. It surrendered Feb. 24, and was restored to France at the general peace in 1814. The slaves rebelled in 1833, and a number of them were killed, and several taken prisoners, in a battle fought Dec. 24. An earthquake did serious damage to Fort Royal, and caused the death of about 700 persons, Jan. 11, 1839. The cultivation of the coffee-plant was introduced in 1727.

Martinsmas, Martlemass, Martlemass, or St. Martin's Day, Nov. 11, was formerly observed as a day of feasting and jollity. It was instituted in honour of St. Martin, the son of a Roman military tribune. He was born in Hungary, A.D. 316, settled in the neighbourhood of Poitiers, and was bishop of Tours in 374. He died in 400. His festival was instituted in 650. Moresin refers the festivities practised on this day to an ancient Athenian festival in honour of Bacchus.

Martin's (St.) Hall (London).—The first stone of this edifice, built from designs by R. Westmacott, was laid June 21, 1847; and it was opened Feb. 11, 1850. It was seriously damaged by fire Aug. 26, 1860, and has since been restored.

Martys. — Since the martyrdom of Stephen, a man full of faith and of the Holy Ghost (Acts vi. 5), chosen A.D. 37 to be one of the seven deacons first appointed, the Christian church has furnished a long succession of martyrs, who have freely given up their lives in the defence of the truth. Stephen the protomartyr was stoned at Jerusalem (Acts vii. 55—60) in May, 37 A.D. Polycarp, the last of the Apostolic Fathers, suffered death in 167. Eusebius, who wrote in the beginning of the 4th century, is the first writer who gives an account of the early martyrs.

Mary, Queen of England, the only child of Henry VIII. and Queen Catherine that arrived at maturity, was born at Greenwich, Feb. 18, 1516, was proclaimed queen in London, July 19, and entered the city Aug. 3, 1553. Although Jane (q. v.) was acknowledged queen for a few days, the accession of Mary is reckoned from the day on which Edward VI. died, July 6, 1553. Mary was crowned Oct. 1, 1553, and was married at Winchester to Philip of Spain, July 25, 1554.

They had no children, and Philip became king of Spain on the abdication of his father, the Emperor Charles V. In January, 1556, Mary died at St. James's, broken-hearted from grief, caused by the negligence of her husband and the loss of Calais, Nov. 17, 1558, and was buried in Henry VII.'s chapel at Westminster, Dec. 13. She was called Bloody Queen Mary from the severity with which she persecuted the Reformers. According to the lowest estimate, one archbishop, three bishops, several clergymen, and about three hundred of the laity, perished at the stake, whilst numbers died in prison during her reign.

Maryland (North America).—The first English province created in America was named Maryland, after Henrietta Maria, queen of Charles I., who granted the absolute proprietary of Maryland to Lord Baltimore, A.D. 1632. The first colonists were chiefly Roman Catholic gentlemen and their families, sent out from England under the charge of Lord Baltimore's brother, in 1634. A house of assembly was established in 1639; it was divided into two houses in 1650,—the one consisting of members chosen by the proprietary, and the other chosen by the freemen. In 1645 Cleburne succeeded in stirring up an insurrection, the governor was obliged to flee to Virginia, and peace was not restored till 1646. Parliamentary commissioners took possession of the government in 1652, but restored it to the governor in 1658. In 1689 an association, formed for the defence of the Protestant religion, overthrew the proprietary government. A governor was sent out in 1692, and the province remained in the hands of the Crown till 1715, when it was restored to the heir of the proprietary. In 1762, on the passing of the Stamp Act, riots occurred, and the house of the stamp-master was destroyed. A provincial congress assembled in 1774, and took the government into its own hands, and a constitution was adopted in 1776, declaring it a free state. In 1814 a British fleet landed troops under General Ross, who routed the Americans at Bladensburg (q. v.), Aug. 24.

Maryland Colony (Liberia), near Cape Palmas, was founded A.D. 1834 by free coloured emigrants sent from the state of Maryland, in America,—hence the name.

Marylebone (London).—The manor of Marylebone was obtained by Henry VIII. in exchange for certain crown lands, A.D. 1544. In 1846 the park was assigned by Charles I. as security for debts contracted by him during the civil war. Marylebone Street was built about 1679, and received this name because it led from Hinde Lane to Marylebone. The gardens, which were a favourite resort of Sheffield, duke of Buckingham, were situated at the back of the old manor-house. Admission to this fashionable place of amusement was free until 1737, when a shilling was charged. They were finally closed in 1778. The manor-house was pulled down in 1791.

Mary Magdalen (St.) College (Cambridge).—Henry, duke of Buckingham, who was executed for high treason, May 17, 1628, founded this institution, and named it Bucking-ham College, in 1519. Baron Audley, of Waiden, endowed it, and changed its name to St. Mary Magdalen College soon after. It is generally known as Magdalen College (q. v.).

Mary of Merton, St. (Canons of).—Regular canons of the order of St. Austin settled at Merton, in Surrey, A.D. 1117. In 1121 Henry I. made a grant to them of the whole town, and they erected a church and priory in honour of the Virgin.

Mary (St.) Hall (Oxford).—This hall was consecrated by Edward II. on Oriel College, A.D. 1325. In 1333 it was made a separate place of education, and it subsequently
became an independent academical hall. Thomas Dyke bequeathed funds towards the support of four scholars at this hall in 1687.

**MASCARA** (Algeria), the ancient Victoria, was at one time the residence of Abd-el-Kader. The French seized it in December, 1835, and again in 1841; and on the last occasion annexed it to their colony in Algeria.

**MASKS.**—The kings and priests of Egypt wore, upon certain occasions, masks of papyrus, representing the heads of hawks, lions, and other birds and animals, and from them the knowledge of masks passed to the Greeks and Romans, by whom they were employed in dramatic exhibitions. The tragic masks of the Greek stage were frequently very beautiful; but in comedy a grotesque effect was produced by representations of the mouth opened and the features distorted. The custom of the use of masks by public executions is mentioned A.D. 1295. They were first worn by English ladies during the reign of Elizabeth. In the time of Charles II. they were always worn by ladies in the theatre, and in the time of Anne they were used on horseback, being suspended to the side by a string.

**MASOURAH (Battle).** (See MANSURAH.)

**MASQUERADERS.**—Dramatic masques were introduced into this country about A.D. 1340. The masked ball, or masquerade, originated in Italy towards the commencement of the 16th century, and was introduced into England by Henry VIII. in 1513. The bishop of London preached a sermon against them, Jan. 6, 1724; in consequence of which, orders were issued that no more should take place than the six subscribed for at the beginning of the month.

**MASS.**—The word *missa,* or mass, was first employed in religious ordinances A.D. 394, when it signified the particular services specially appropriated to different persons, who left the church when the portion of the service which concerned them was concluded. It was, indeed, the general name for every part of divine service. It sometimes signified the lessons, sometimes the collect or prayers, and sometimes the dismissal of the people. The Roman Catholic mass was introduced into England in 680. The term was afterwards applied to the services of the Eucharist, and the decree, ordering all to bow down at the elevation of the host, or mass, was published in 1201.

**Massachusetts (North America).**—This state was first settled by the Puritans, at Plymouth, U.S., in 1620. Salem and Charlestown were founded in 1628, and Boston in 1630; and in 1692 the colonies were united under the Indian name of Massachusetts. A charter for Massachusetts Bay was obtained from the crown in 1629. Its first constitution was formed in 1730, and was amended in 1820. Slavery was abolished by law in 1783, and the constitution of the United States was adopted in 1788.

**Massa di Carrara (Italy), the chief town of a duchy of the same name, which was, A.D. 1829, united to Modena, and was, with it, incorporated in the new kingdom of Italy in 1860. It is also called Massa Ducale.**

**Massagetae.**—An invasion of Persia by a tribe of Scythian barbarians compelled Sapor to relinquish the third siege of Nisibis (q.v.), A.D. 350. They drove the Cimmerians from the Araxes b.c. 635, and penetrated into Media b.c. 632, whence they were expelled by Cyaxares, b.c. 609. Cyrus was killed in battle against them, b.c. 529. Alexander the Great defeated them b.c. 323. Ammianus Marcellinus calls the Alans "the ancient Massagetae." Niebuhr considers them Mongols, and Humboldt signs them to the Indo-European family.

**Mass-book,** "Missale," or *Missal,* the ritual used by the Roman Catholic church, was compiled by Gelasius, and improved by Gregory the Great. The services were translated into English for the Church of England in 1549, and by 3 & 4 Edw. VI. c. 10 (1549), the use of missals was abolished.

**Master and Servant.**—Various statutes are in existence for the regulation of the law between master and servant. By 32 Geo. III. c. 56 (1792), a master knowingly giving a good character to a bad servant is liable to a fine of £20, or three months' imprisonment with hard labour. The payment of certain classes of servants is required to be made in money by 1 & 2 Will. IV. c. 37 (Oct. 15, 1831).

**Master-General of the Military.**—Constantine I. (A.D. 306—337) instituted two masters-general, one for the cavalry and one for the infantry. Before the end of the reign of Constantius, their number had increased to four. A master of the military was elected annually at Venice, A.D. 737—742, instead of a doge.

**Master of the Ceremonies.**—The official master of the ceremonies at the English court was instituted by James I., A.D. 1603, for the purpose of introducing foreign ambassadors, &c., to the sovereign. Sir Lewis Lewkenor was appointed to the office, with a salary of £200 per annum. The first person who assumed the title to signify his supremacy in the ball-room was Captain Webster, who preceded Beau Nash in the office at Bath. He became master of the ceremonies on the occasion of the visit of Queen Anne, in 1703.

**Master of the Revels.**—The following list of persons who held this appointment was communicated to Notes and Queries by Mr. E. F. Rimbaud. It was copied from the handwriting of Sir Henry Herbert, one of the last to hold the office:—

Sir Richard Guilford .... Not on record
Sir Thomas Cawarden .... [1544] 36 Henry VIII.
Sir Thomas Beninger .... [1547] 25 Henry VIII.
Sir John Fortescue .... Not on record.
Edmund Tilney, Esq. .... July 31 [1578], 21 Eliz.
Sir George Buck ......... June 23 [1603], 1 Jac.
Sir John Astley ......... [1601] 10 Jac. I.
Benjamin Johnson ....... [1617] 15 Jac. I.
To these may be added the following:—

Thomas Killigrew 1673 | Charles Henry Lee.... 1725
Charles Killigrew 1683 | Solomon Dayrolle.... 1744

The ancient jurisdiction of the master of the revels was transferred in 1737 to the “licenser of the stage,” who, with the deputy licensor, performed all the duties of the office; and on the death of Solomon Dayrolle, no successor was appointed.

MASTER OF THE ROLLS.—The rolls of the exchequer commence in the reign of Henry I., the earliest extant being that of his thirty-first year (1131). The title of master or keeper of the rolls of chancery does not occur till the year 1286, when it was conferred upon John de Langton, although the office no doubt existed before that date. The duties of this officer are defined by 3 & 4 Will. IV. c. 94 (Aug. 25, 1833). His salary is regulated by 1 Vict. c. 46 (July 12, 1837). The master of the rolls is a patente officer and a privy councilor. He may sit in parliament, and administer justice in the Rolls Court; but his decrees are not valid until signed by the chancellor.

Masters in Chancery.—Foss considers that masters or clerks in chancery existed as early as the reign of Richard I., and that they were employed to attend the king in his progresses, when they assumed the title of vice-chancellor. Sir Christopher Hatton, who was made chancellor April 29, 1557, always had masters in chancery present when he sat in court, to assist him in his decisions. The office was abolished by 15 & 16 Vict. c. 80 (June 30, 1852).

MASULIPATAM (Hindostan).—This city was mentioned by Marco Polo, A.D. 1298, and was conquered by the Bhamenee sovereigns of the Deccan in 1480. In 1751 it was taken and fortified by the French, who were expelled by the British, under Colonel Fobbo April 6, 1759; and Masulipatam was ceded to the East-India Company in 1765.

MATAMORAS (Battle).—The Americans, under the command of General Taylor, defeated the Mexican army at this place, in Mexico, May 8, 1846.

MATARO (Spain).—This place was elevated to the rank of a ciudad A.D. 1701. It was sacked by Duhesme, under circumstances of great cruelty, June 17, 1808. The church of St. Maria was founded in 1675, the college in 1737, and it was incorporated with the university of Cervera in 1529. The railroad to Barcelona, the first constructed in Spain, was opened in October, 1845.
MAU

who was slain by Caligula A.D. 41. In 42, Claudius divided the kingdom into the two provinces of Mauretania Tingitana, and Mauretania Caesariensis. In 256 the country was invaded by a horde of Frankish invader from Spain, and in 429 it was conquered by Genseric the Vandal. The Arabs first appeared in the country in 667, and completed its conquest in 709. (See Morocco.)

MAURITIUS, or ISLE OF FRANCE (Indian Ocean).—This island was discovered by the Portuguese A.D. 1505. In 1598 it was seized by the Dutch, who called it Mauritius in honour of their statholder, Maurice; but they formed no settlement till 1644. They abandoned the colony in the 18th century, and it was neglected until the French formed a settlement in 1715, and took possession of the island in 1721. It was captured by the British Dec. 2, 1810, and has remained in their possession ever since the peace of 1814.

MAUR, St.—This celebrated congregation of the Benedictines was first established at this town, in France, A.D. 1618.

MAUSELEUM.—On the death of Mausolus, king of Caria, B.C. 353, his wife Artemisia testified her affection by erecting at Halicarnassus a magnificent building to his memory, which received the title of the Mausoleum, and ranked as one of the seven wonders of the world. Hence all sepulchral edifices of more than usual magnificence are styled mausolea. The ruins of this edifice were used by the Knights of Rhodes in the erection of their castle of St. Peter 1515-1522.

In 1846 the British government arranged with the Porte for the purchase of the remaining ruins; and in 1856 Mr. Charles Newton was appointed vice-consul at Mitylene, with full powers to transmit the acquisitions to England. He formed a valuable collection, including the colossal statue of Mausolus; and the whole arrived in this country in July, 1857, and was deposited in the British Museum.

MAY—In 1848 Dr. Stenhouse announced the possibility of extracting purple dyes from lichens by macerating them in lime-water. This discovery was applied and extended by M. Marnus, of Lyons, who produced in 1857 the fashionable dye known as mauve.

MAXIMINANS, a branch of the Donatists, so named from Maximinus, their leader. They arose in the Donatist community in Africa towards the close of the 4th century.

MAY.—This month derives its name either from Maia, the mother of Mercury, or from its having been dedicated by Romulus to the Roman majores, or senators. It was the second month in the old Alban calendar, the third in that of Romulus, and the fifth in that of Numa Pompilius. The Saxons termed it Tri-Milichi, because during this month pasture was so plentiful that they were able to milk their cows thrice during the day.

MAY-DAY.—From the earliest periods it has been customary to hail the return of spring with peculiar sports. The Romans had their Floralia, held on the 4th of the calends of May. The earliest circumstance known respecting the celebration of May-day in England is, that the Druids were accustomed to assemble on the night of the last day in April and light large bonfires to hail the return of spring. Chaucer alludes to the universality of its observance in his time, and as late as the reign of Elizabeth, the queen and court joined in the sports. May Fair was abolished in London in 1708.

MAYENCE, or MENTZ (Hesse-Darmstadt), originated in the Roman fort of Moguntiacum, which Drusus erected on the site of the present city B.C. 13. It was destroyed by the Vandals A.D. 406, and was rebuilt by Dagobert II. Printing is said to have been invented in this city by John Guttenberg in 1440. In 1831 Mentz was taken by the Swedes, and in 1844 and 1855 by the French, who lost it in 1866. It was again seized by the forces of the republic in 1792, but was taken by the Prussians in 1793. In 1797 it was ceded to France by the treaty of Campo Formio, and erected into the chief town of the department of Mont Tonnerre, and in 1814 it was ceded to the grand-duke of Hesse-Darmstadt. The university, founded in the 15th century, was suppressed in 1802. The bronze statue of Guttenberg was erected in 1837.—The archbishopric of Mayence was founded by Boniface A.D. 747. Councils were held here in 735 or 755, 829, 847, 852, 857, 900, 1025, 1049, 1068, 1051, 1055, 1071, 1089, 1055, 1054, 1151, 1158, 1125, 1225, 1239, 1293, 1261, 1310, 1307, 1383.

MAYENNE (France).—The earl of Salisbury captured this ancient town A.D. 1424. Charles IX. made it a duchy in 1544. The Vendéens took it in 1789.

MAYNOOTH COLLEGE (Ireland).—The Roman Catholic college of St. Patrick at Maynooth, in the county of Kildare, was founded A.D. 1795, according to the provisions of an act of the Irish parliament, for the education of persons destined for the Roman Catholic priesthood. It was built at a cost of £32,000, and is supported by an annual parliamentary grant. A lay college was opened in 1802, dependent on voluntary subscriptions. By 8 & 9 Vict. c. 25 (June 30, 1845), the college was placed on a new footing, and permanently endowed for the maintenance and education of 500 students and twenty senior scholars. A commission was appointed to inquire into the operation of the institution, Sept. 19, 1853.

MAYO (Ireland), forming part of Connacht, was granted by Henry II. to William Fitz-Adelm de Burgo, A.D. 1180. William de Burgo, earl of Ulster, was assassinated in 1333, and about this time Mayo was made a county. For two centuries it remained in a very unsettled state. The native chiefs submitted to Elizabeth in 1575, but the supremacy of the English was not acknowledged until 1586. The old families took part in the rebellion of 1641, and the French attempted an invasion in 1798.

MAYOR.—This office dates from the reign of Richard I., who appointed a mayor as
MAY

chief officer of the city, in place of the bailiffs of London, a.d. 1189, and the precedent was copied by King John, in respect to the bailiff of King's Lynn in 1204.

MAYOR OF THE PALACE.—An important officer of the French court during the Merovingian reigns. His duty was originally to supervise the royal funds, and to regulate the government of the household. Afterwards the mayors acquired political influence, and acted as regents during the minority of the sovereign, until ultimately the whole power of the kingdom devolved upon them. In 614 the mayor of Burgundy induced Cotaire II. to grant that in future the office should be conferred by the great proprietors, not by the king, and held during life. The office became hereditary in 687.

MAIOTTA ISLAND (Indian Ocean).—This volcanic island, which forms one of the Comoro group, was avoided by Europeans until 1840. In 1841 it was ceded to the French, who commenced their occupation June 13, 1843.

MAY-POLE.—The custom of rearing the May-pole is traced to the Roman Floraalia, but nothing is known respecting the period at which it was introduced into this country. Dr. Cange speaks of a charter of the year 1207, which states that May-poles were taken by grant, and erected in the streets and at the houses of great men. The old May-pole in the Strand, London, was taken down in April, 1718.

MAZARINS. (See Frondeurs.)

MEAL-TUB PLOT.—This was a fictitious plot fabricated by a known criminal named Dangerfield, and ascribed by him to the Presbyterians. He directed the revenue officers to search the lodgings of Colonel Mansel, where they found a number of seditious documents, which were afterwards proved to be forgeries. He was accordingly committed to Newgate, where he acknowledged that he had been bribed by the Papists to forge these papers, and that proofs of the truth of his confession were deposited in a meal-tub in the house of a Mrs. Cellier, a Roman Catholic and his mistress, where they were in fact found. This took place in 1679. Dangerfield was put in the pillory, and also whipped, and was again convicted of libel, May 30, 1685.

MEASURES.—The English measure of Winchester was made the general standard by a law of King Edgar, a.d. 974. The first standard ell was established from the length of Henry I.'s arm in 1101, and the measure for cloth was made uniform throughout the kingdom by 18 Hen. VI. c. 16 (1459), which established the yard and the inch as the standards. Public standards of measures were ordered to be deposited in all the principal towns by 11 Hen. VII. c. 4 (1494); and the capacity of the bushel was regulated by 12 Hen. VII. c. 5 (1496). The length of the statute mile was regulated by 35 Eliz. c. 6 (1583). Charles I. issued a proclamation ordering a uniform measure for every com-

MAY

modation throughout the kingdom in 1636. Parliament attempted to introduce uniformity of measure in 1759, but without success. By 10 Geo. III. c. 39 (1770), a standard Winchester bushel of eight gallons was ordered to be kept in every market-town. The various laws on the subject were amended by 5 & 6 Will. IV. c. 63 (Sept. 9, 1835), which abolished heaped measure, and ordered inspectors of measures to be appointed.

MEATH (Bishopric).—This Irish bishopric is composed of several minor sees which were ancietly distinct. The most important appears to have been Clonard, which was founded by St. Finnian a.d. 520. Eugene was the first prelate who assumed the title of bishop of Meath in 1174.

MEATH (Ireland) formed one of the kingdoms into which Ireland was divided in early times. Richard Strongbow subjected Meath to the English a.d. 1171, and Henry II. conferred it as a county palatine on Hugh de Lacy. For nearly a century and a half it was the theatre of continual warfare; and in the reign of Henry VIII. the ancient county was divided into East Meath and West Meath.

MEAUX (France).—This town is supposed to be identical with the Roman Latinum. The cathedral was commenced in the 12th century. It obtained a charter in 1179, and was taken by the English in 1419. The French recovered it in 1459; in 1587 it joined the League; and in 1594 submitted to Henry IV. The bishopric of Meaux was founded in 375, and a council was held here June 17, 845. The prisoners were massacred here by the republicans Sept. 5, 1792. The Russians attacked Meaux Feb. 26, 1814, and the allies passed the Marne, at Meaux, March 28, 1814.

MECCA (Arabia).—This town is celebrated as having been the birthplace of Mohammed in April, 270 A.D., by whom it was taken Jan. 11, 630. In 692 it was captured by Abdelmelik, and in 929 it was plundered by the Carmathians. Renaud de Châtillon failed in an attempt upon Mecca in 1184. In 1803 it was seized by the Moslem sect of the Wahbees, from whom it was taken in 1818 by Ibrahim Pasha.

MECHANICS.—The ancients were no doubt acquainted with the application of the mechanical powers from time immemorial, but the principles on which their action depends were not known till a comparatively late period. Aristotle (B.C. 384 to 322) is the first author who wrote on mechanics, and Archimedes (B.C. 257 to 212) is the most eminent of ancient mechanicians.

MEC

A.D. 1677. Stevinus, of Flanders, discovers the true theory of the inclined plane.

1692. Galileo is said to have written his treatise "Della Scienza Mecanica" this year.

1634. Galileo publishes the work "Della Scienza Mecanica."

1633. Galileo publishes his dialogues on motion, and Castelli writes on the motions of fluids.
MEDIA (Asia).—This province revolted from Assyria and became an independent kingdom B.C. 711. Authorities differ respecting the actual time at which many of the following events occurred.

B.C.
711. The Medes obtain their independence, and establish a republican form of government.
709. Darius becomes the first independent king of Media.
658. Invasion of Media, and defeat and death of King Darius.
634. Phraortes, king of Media, with his entire army, perishes before the walls of Nineveh.
632. Media is invaded by the Scythians.
629. The Scythians are expelled from Media.
628. The Lydian war is commenced.
592. Birth of Cyrus.
584. May 29. The Lydian war is concluded by the battle of Halys (q. v.).
569. Cyrus deposes Astyages, and raises Cyaxares II., or Darius the Mede, to the throne in his stead.
551. Cyrus, king of Persia, becomes king of Media.
547. Lamanian and Mespila, cities of Media, revolt against Cyrus, but are reduced to submission.
539. Cyrus takes Babylon, and marries the daughter of his uncle Cyaxares, thereby uniting the royal families of Media and Persia. (See Persia.)

KINGS OF MEDIA.

B.C.
709 Darius
634 Cyaxares
684 Phraortes, or Ar.phaxad.

MEDIEVAL OF MIDDLE AGES, according to Hallam, comprised about one thousand years, from the invasion of France by Clovis, A.D. 496, to that of Naples by Charles VIII., 1492. Dowling, in his "Introduction to the Critical Study of Ecclesiastical History," fixes the council of Chalcedon, A.D. 451, as the commencement, and the revival of classical literature in the 16th century as the end, of the period. G. T. Manning, in "Outlines of the History of the Middle Ages," makes them extend from A.D. 400 to 1500, divided into the following periods:

A.D.
400 to 800
800 to 964
964 to 1066
1066 to 1300
1300 to 1500

Fleury makes them commence with the fall of the Western empire, in 476, and terminate with the capture of Constantinople by the Turks, May 29, 1453.

MEDICAL COUNCIL.—This council was established by the act to regulate the qualifications of practitioners in medicine and surgery, 21 & 22 Vict. c. 90 (Aug. 2, 1858). Sir Benjamin Brodie was elected the first president of the council, in November, 1858.

MEDICINE.—A writer in the last edition of the "Encyclopaedia Britannica" (xiv. p. 450) remarks that "the earliest historical development of scientific medicine is everywhere traced from a priesthood." The Egyptians were the earliest medical practi-
tioners. With them medicine was under the control of the state, and doctors who departed from the prescribed methods of treatment were guilty of a capital offense, in the event of the patient's death. The earliest work on medicine is the Hindoo Ayur Veda, which is supposed to have been written about B.C. 1400. The worship of Aesculapius, the god of medicine, was introduced into Greece about B.C. 1200; but the profession of physic was restricted to the priesthood until about B.C. 500. Hippocrates, born about B.C. 460, is the father of the Greek system of medicine, which declined about B.C. 336, and was succeeded by the Alexandrian school about B.C. 332. The epistle of Diocles on the Preservation of Health was written about B.C. 312, and continued in high repute for about 400 years. Herophilus, who flourished B.C. 255; Erasistratus, B.C. 260; and Serspin, B.C. 235, were the most eminent practitioners of the Alexandrian school. The medical became a distinct profession at Rome about B.C. 290. It was at first practised exclusively by slaves or freedmen, and was not regarded with much interest until after the great pestilence which depopulated the city B.C. 157. Aesclepiades, B.C. 90;Themision, B.C. 60; Theassalus, A.D. 55; and Galen, A.D. 165, are the most eminent of Roman physicians; and after the death of the last-named, medical science suffered a serious decline. The Greek system was revived at Constantinople in 323, and flourished under Oribasius in 360; Aetius in 525; and Paul of Aegina in 640. The Arabian physicians attained celebrity in the 7th century, the most important being Ebu Sina, or Avicenna, whose great work, the "Almacesus," was written about 950. Mondini, who became professor of medicine at Bologna in 1316; Guy de Chauliac, who flourished in 1530; and the celebrated painter Leonardo da Vinci, who was an eminent medical practitioner, and contributed greatly to the advance of the science. The medical profession in Britain owes its rise to Thomas Linacre, who founded the College of Physicians at London in 1518. Harvey published his work on the circulation of the blood in 1628; Pecquet discovered the anatomy of the lacteal vessels in 1647; Malpighi demonstrated the relation of the pulmonary tissue to the circulation in 1661; and Mayow obtained advanced views on the subject of respiration in 1668.

MEDINA DEL CAMPO (Spain).—During a revolt in Spain, A.D. 1520, this town was taken by the royal troops, under Antonio de Fonseca, who treated the inhabitants with great cruelty.

MEDINA DE RIO Seco (Spain), supposed by some authorities to be the ancient Tela, was the scene of a victory gained by the French army, under Bessieres, over the Spaniards, July 13, 1808, when the town of Rio Seco was taken and pillaged. The Spaniards defeated the French here Nov. 23, 1809; but were, in their turn, defeated and dispersed Nov. 26, and the French entered the town Nov. 27.

MEDINA SIDONIA (Spain) was taken by Abderahman I. A.D. 764, and surrendered to Alfonso X. in 1254.

MEDIOLANUM (Italy), the capital of Cisalpine Gaul, was taken by the Romans from the Insubres, whose chief town it was, B.C. 222. A battle between the Romans and the allied Insubrians and Boians, in which the Gauls lost several thousand men, took place here B.C. 194. It probably submitted to the Romans with the other towns of the Insubres about B.C. 190. Under the Romans it became a municipium, and rapidly grew in importance. The usurper Aurelius was besieged here A.D. 268 by the emperor Gallienus, who was killed by the hands of his own soldiers in the course of the siege (March 20). The place subsequently surrendered to Claudius. About A.D. 303 its importance was enhanced by the residence here of the emperor Maximian, who thus made it the capital of Northern Italy. For a century it was the residence of successive emperors. Attilia ravaged it in 452, and it was selected as a residence by the Gothic king Odoacer in 476. Belisarius, having taken the place, it was recovered by the Goths in 539, after a protracted siege, which was characterized by great barbarity on the part of the besiegers. They put the male inhabitants, 300,000 in number, to the sword, and reduced the women to slavery. (See MILAN.)

MEENAKSHI (Battle).—Fought during the campaign in Scinde, when Sir Charles Napier, with a force amounting only to 2,600 men, assailed the Belooches, who mustered 30,000 infantry and 5,000 cavalry, with fifteen guns. They were strongly posted, their wings resting on large woods extending on each side the plain, with a natural ravine in front of their position. After a fierce contest of three hours' duration, the Belooches gave way, leaving their artillery, stores, &c., in the hands of the victors. This battle was fought Feb. 17, 1843.

MEERUT (Hindostan), an ancient city of Delhi, is mentioned as one of the first conquests of Mahmood of Ghizni, A.D. 1018. In 1240 it resisted the forces of Tirmarchin Khan; but in 1399 it surrendered to Timour. Together with the rest of the district in which it is situated, Meerut passed into the possession of the British in 1803, and it was selected as the seat of a judicial and revenue establishment in 1809.

MEGALOPOLIS (Greece), or the "Great City," once the capital of Arcadia, was
Lord Melbourne, at that time prime minister of England, is the capital of Victoria, and is seated on the river Yarra. It was colonised from van Diemen’s Land, A.D. 1835, and was officially recognised and designated in 1837. Melbourne was made a municipality in 1843, and the seat of a bishop in 1847. It has increased rapidly since the discovery of gold in its vicinity in 1851. It became the seat of the legislative assembly in 1852. The hospital was founded in 1846.

**Melbourne Administrations.**—Owing to some disagreement respecting the Irish Coercion Bill, then under the consideration of Parliament, Viscount Althorp resigned the office of chancellor of the exchequer, July 7, 1834, and Lord Grey, the prime minister, following his example, resigned July 9. After certain negotiations, Viscount Melbourne kissed hands as prime minister, July 16. Several members of the Grey administration remained in the cabinet, which was thus constituted:

The death of Lord Spencer, Nov. 10, rendered new arrangements respecting the chancellorship of the exchequer necessary, as Viscount Althorp succeeded to his father’s title. Viscount Melbourne went to Brighton Nov. 14, 1834, to make certain propositions to the king, who informed him that he should not require him to complete the arrangements, and the first Melbourne administration was dissolved. (See Peel (first) Administration.)—The second Melbourne administration was formed on the resignation of the first Peel administration, April 8, 1835, and was announced in both houses of Parliament, April 18. The cabinet consisted of

The great seal was placed in commission.
The earl of Minto succeeded Lord Auckland at the Admiralty Sept. 19, 1835. Sir C. C. Pepys, with the title of Baron Cottenham, was made lord-chancellor Jan. 19, 1836. Mr. Francis Thornhill Baring became chancellor of the exchequer Aug. 26, 1836. Sir Charles Argyll of Cumnorbury became colonial minister Feb. 20, 1839, and Lord John Russell succeeded him Aug. 30, 1839. The earl of Clarendon became privy seal Jan. 15, 1840. Mr. T. B. (afterwards Lord) Macaulay became secretary at war Sept. 27, 1839; Mr. Henry Labouchere was made president of the board of trade, in place of Mr. Poulett Thomson, Aug. 29, 1839; and the earl of Clarendon took the chancellorship of the duchy of Lancaster Oct. 20, 1840. Ministers only obtained a majority of five in committee on the Jamaica Suspension bill, May 6, 1839, whereupon they immediately resigned, and Sir Robert Peel, aided by the duke of Wellington, undertook the task of forming an administration. He obtained the co-operation of Lord Lyndhurst, the earl of Aberdeen, Lord Ellenborough, Lord Stanley, Sir James Graham, Sir Henry Hardinge, and Mr. Goulburn; but the Queen refused to dismiss the ladies of the bedchamber, May 10, and Sir Robert Peel resigned the task, the Melbourne administration being reinstated in office. A vote of want of confidence in ministers, introduced into the House of Commons by Sir Robert Peel, was carried June 4, by 312 to 311, whereupon ministers dissolved parliament. After the recess, a vote of want of confidence, introduced in both branches of the legislature, was carried against ministers in the House of Lords by 168 to 72, and in the House of Commons by 360 to 263; and on the 30th of August the resignation of the ministry was announced in both houses. (See Peel’s Second Administration.)

MELFI, or MELFI (Italy).—This ancient town, made the capital of the Norman states of Apulia A.D. 1042, was nearly destroyed by an earthquake Aug. 14, 1851. The cathedral and all the principal buildings were overwhelmed, and about 600 persons were killed.

MELETINE (Battle).—The Persian monarch, Chosroes I. (Nushirvan), fought a great battle at this place, the modern Malaythiah, in Lesser Armenia, A.D. 577. Chosroes I. retreated the day after the battle, burning the town of Meliteine as he retired.

MELINGEN (Battle).—The French defeated the Swiss at the passage of the Reuss, at Meilingen, A.D. 1793.

MELIODICA.—This keyed instrument was invented by Stein, at Augsburg, A.D. 1770.

MELIODICON.—This keyed instrument was invented by Peter Riiffelsen, of Copenhagen, A.D. 1803.

MELIDRAMA.—A dramatic entertainment, first introduced into this country by Thomas Holcroft, who was born in London Dec. 10, 1745 (O.S.), and died March 23, 1809. His first comedy appeared in 1781.

MELORA, or MELORIA (Sea-fight).—The Genoese defeated the Pisans in this naval battle, fought Aug. 6, 1284.

MELOS (Ægean Sea), one of the Cyclades, is said to have been colonized by the Phoenicians, and at a later period to have received a colony of Lacedaemonians. It was invaded by the Athenians, under Nicias, B.C. 426, and was again invaded by a large force B.C. 416. The city was besieged by sea and land, but held out for several months. Two successful sallies were made by the Melians, but at length their provisions became exhausted, and they surrendered at discretion. The victors put all the men capable of bearing arms to death, and sold the women and children for slaves, 500 Athenian settlers being sent to form a new colony. A Peloponnesian squadron, under Antisthenes, defeated the Athenian navy here B.C. 412. The Lacedaemonians, under Lysander, having defeated the Athenians, their colony was recalled, and the captive Melians restored to their country, B.C. 404. It subsequently became part of the Roman empire, and was finally conquered by the Turks, under Soliman II. (1520—1565). It is now called Milo, and is included in the modern kingdom of Greece.

MELICHSTADT (Battle).—An undecided battle between Rodolph of Swabia and the emperor Henry IV. was fought at this place, in Francia, A.D. 1073.

MELROSE (Scotland).—This site was occupied by a Culdee house, founded A.D. 635. It was superseded by an abbey for Cistercian monks, founded in 1136 by David I., and completed in 1146. In 1222 it was destroyed by Edward II. In 1326 it was rebuilt by Robert Bruce, and completed in the reign of James IV. It was again destroyed by the English in 1545.

MELTON MOWBRAY (Leicestershire), called Medeltune and Melton Mowbray, received the name of Mowbray from its ancient lords, by command of Henry I. (1154). In 1613 the town was considerably damaged by fire, and in 1637 the plague raged with great violence. A battle was fought here between the royalists and the parliamentary troops, the latter, 2,000 strong, were defeated with great slaughter, in 1645. In 1736 the church, a handsome and spacious structure with lofty towers, was struck by lightning, and fragments of the south and north-east pinnacles, weighing from 5 cwt. to 6 cwt., were precipitated through the north transept.

MELUN (France), the ancient Melodunum, was captured by Henry V. of England A.D. 1420. Henry had several conferences with
the queen of France at this town in July, 1419. It was recovered by the French in 1435. Councils were held here in 1216; Nov. 8, 1225; and Jan. 21, 1301.

MEMEL (Prussia).—This town was built A.D. 1279, and fortified in 1312. It was greatly damaged by fire in 1523, and came into the possession of the Teutonic knights, who settled in Prussia, in 1328. Large portions of the town were destroyed by fires in 1379, 1457, 1540, 1678, and again Oct. 4, 1854. It was taken by the Russians in 1757, and again occupied by them in December, 1813. The king and queen of Prussia concluded a convention with Napoleon I. at this town in 1807.

MEMMINGEN (Germany) was ceded to Bavaria by arrangements definitely concluded Feb. 25, 1803. It was fortified by Mack in 1806, was taken by the French Oct. 9, and the Tyrolese occupied it in 1809.

MEMPHIS (Egypt).—Herodotus ascribes the foundation of this place to Menes, first king of Egypt, B.C. 3895, according to Lepsius; b.c. 3843, according to Bunsen; b.c. 2412, according to Hales; and b.c. 2320, according to Wilkinson. Some fix the date of its foundation B.C. 2188; and Diodorus Siculus ascribes it to Uchoraes, one of the successors of Osymandias, king of Thebes, B.C. 2100. In order to reconcile the discrepancy in these statements, some historians ascribe its foundation to Menes, and its completion and extension to Uchoraes, who first made it a royal city. Memphis was taken by the Persians under Cambyses, B.C. 525, when many of its temples and palaces were destroyed. Alexander the Great, who wintered here B.C. 332, quite destroyed the ancient importance of the place by founding Alexandria in the same year. Memphis was taken, by Antochus, B.C. 171. It was visited and restored by Septimius Severus, A.D. 202. In the 7th century it passed under the dominion of the Arabs, and gradually fell into decay. The Arabian traveller Ab-dallatif visited it in the 12th century. The ruins were discovered and excavated by M. Mariette, between 1850 and 1854. It is the Noth of the Old Testament. The most celebrated of its sacred buildings were, the temple of Ptah, or Hephastos,—the elemental principle of fire,—said to have been coeval with the foundation of the city, and improved and beautified by several monarchs; the temple of Proetus, said to have been founded by the Phoenicians about the era of the Trojan war; the temple of Isis, founded at an early period, and completed by Amasis B.C. 504; and the temple of Apis, called the cathedral of Egypt, founded by Psammetichus. Memphis ceased to be the metropolis of Egypt on the foundation of Alexandria. It soon after fell into obscurity, and of this celebrated city, which, according to Diodorus, was seven leagues in circumference, and contained a multitude of beautiful temples, not one stone remains,—even the site on which it stood being disputed.

MENAI STRAIT (Wales).—The Romans crossed this strait, separating Caernarvonshire from the island of Anglesey, to attack the Druids in their last stronghold, A.D. 59. A ferry-boat was lost, containing fifty persons, Dec. 4, 1795. A suspension-bridge over the strait, 100 feet above the level of high water, was commenced by Mr. Telford in 1815, and completed in 1825, at a cost of £120,000. The bridge was opened Jan. 30, 1826. The Britannia tubular bridge, 101 feet above the level of high water, was completed by Stephenson March 5, 1850, at a cost of £621,585.

MENDE (France).—This town, fortified by Bishop Adalbert, A.D. 1151, was frequently besieged during the religious wars of the 16th century; and Henry IV. of France destroyed its citadel in 1697.

MENDICANTS, OF BEGGING FRIARS, religious orders in the Romish church, supported by charitable contributions, were established A.D. 1215, by Pope Innocent III. They increased rapidly in numbers, and became a great burthen not only to the people but to the church. In 1372 Gregory X. reduced the mendicant orders to four: viz., Dominicans, Franciscans, Carmelites, and Augustines. The Dominicans and Franciscans obtained great power both in church and state. Their influence began to decline sensibly at the commencement of the Reformation in the 16th century.

MENDICITY SOCIETY (London).—This society for the suppression of mendicency was founded in 1818. It was established for the purpose of checking the practice of public begging, by putting the laws in force against impostors who adopt it as a trade, and by affording prompt and effectual assistance to those whom sudden calamity and unaffected distress may render worthy of the attention of the society.

MENDOZA (South America), the capital of a province of the same name, was almost entirely destroyed by an earthquake, March 20, 1861. The city, situated on the eastern slope of the Cordilleras, was in one month reduced to a mass of ruins. The calamity occurred at about a quarter to nine p.m. Out of a population of 12,000 souls, 10,000 were buried, and of these 2,000 were rescued, many of them having sustained severe injuries. The same night a fire broke out among the ruins of one of the largest buildings in the city, and about 600 persons were actually burned alive. An eye-witness remarks, This earthquake is probably the worst on record; never was destruction so complete."

MENEHOUND ST. (France).—This ancient town was captured by the English A.D. 1436, and afterwards sustained several sieges. The Spaniards, who took it in 1652, were expelled in the following year.

MENES (Egypt).—The era of Menes, the first king of Egypt, is placed by Lepsius B.C. 3893; by Bunsen, B.C. 3643; by Hales, B.C. 2412; by Wilkinson, B.C. 2320; and by Prichard, B.C. 2214.

MENIN (Belgium).—The allied army took 553
and

MENNONITES.—A sect of Anabaptists founded by Menno, surnamed Simons, A.D. 1536. He was born at Witmarsum, in Friesland, in 1505, and commenced life as a Roman Catholic, became a convert to the Anabaptists. He was allowed to settle in the United Provinces by William I., prince of Orange, towards the close of the 16th century. Menno died at Wasserstein in 1561. In 1530 and 1564, conferences of the Anabaptists of Germany, Flanders, and Friesland were held at Amsterdam, when the rigorous laws of their founder were mitigated. During the 17th century they obtained toleration in England, Holland, and Germany.

MENSA ET THORO.—This partial kind of divorce à mensé et thoré (from table and bed), effected by a sentence of the ecclesiastical courts, but not annulling the marriage, was superseded by a decree for a judicial separation, under the 7th clause of 20 & 21 Vict. c. 85 (Aug. 28, 1857).

MERCANTILISM.—The origin of this science is uncertain, though it is generally ascribed to the ancient Egyptians. Euclid, b.c. 1280, a mathematician of Alexandria, was the first who embodied the leading principles into a regular system. Archimedes, b.c. 250, a famous geometrician of Syracuse, made great discoveries in this science. Cavalierius, an Italian mathematician, who died at Bologna A.D. 1647, invented, and applied to this science, the celebrated doctrine of indivisibles. This, however, was superseded by Newton’s (born 1642, died March 20, 1727) still more celebrated method of fluxions.

MENT. (See MAIENCE.)

MENUT (Institutes of).—A code of Indian civil and religious law, named after Menu, son of Bramah, by whom it is supposed to have been revealed. Its origin is ascribed to the period between Homer, b.c. 962, and the Twelve Tables of the Romans, b.c. 448. According to Schlegel, it was seen by Alexander the Great b.c. 356—323. In 1794 it was translated into English by Sir William Jones, and in 1850 into French by Des Longchamps.

MERCANTILE MARINE ACT.—This name is given to the act 13 & 14 Vict. c. 93 (Aug. 14, 1850), which provides for the engagement of merchant seamen, for sanitary measures during voyages, for naval courts, log-books, deserts, wages, and other matters connected with the merchant service. It was amended by 14 & 15 Vict. c. 96 (Aug. 7, 1851).

MERCARA (Hindostan).—This fortress, built by Hyder Ali a.d. 1773, was taken possession of by the East-India Company’s forces in 1834, and annexed to their dominions.

MERCATOR’S PROJECTION.—This method of geographical projection, employed in the construction of nautical maps, is said to have been invented by Gerard Mercator, whose real name was Rauffman, born at Ruppelwonde, in East Friesland, March 5, 1512 A.D. He died at Dossburg, Dec. 2, 1594. Edward Wright first investigated the principles, and applied them to purposes of navigation.

MERCERS’ COMPANY can be traced back as a metropolitan guild to A.D. 1172. It was incorporated by letters patent (17 Rich. II.) in 1394. Richard II. was a free brother, and Queen Elizabeth a free sister, of the Mercers’ Company. It ranks first amongst the twelve great livery companies of London, and is governed by a prime and three other wardens, with forty assistants, with 232 livermen. There is scarcely a single merchant in the company.

MERCHANTS.—By Magna Charta (1215) foreign merchants were allowed to come, go, and stay in England for the exercise of their calling without being subject to unreasonable imposts. By 27 Edw. III. (1353) it was enacted that if any difference should arise between the king and a foreign state, the alien merchant was to have forty days, or longer, notice to leave the country. By 5 Rich. II. (1355) English merchants were exempted from this statute, which restrains English subjects from leaving the kingdom without a licence. By 8 Hen. VI. (1429) none were allowed to sell to merchant strangers but for ready money. In 1561 the number of merchants in London was 327. During the threatened Spanish invasion, 300 met weekly to practise the art of war. In 1558 some of these held commands at Tilbury. From time to time companies of merchants were established in London for foreign trade. The Barbary merchants were incorporated in the reign of Henry VII., and the Levant or Turkey Company was established in 1581. Their success originated the old East-India Company, which had a monopoly of the traffic until a new company was incorporated, 9 Will. III. (1698), on condition of their lending the government £2,000,000. Both companies were subsequently united. In France, Louis XIV. passed two decrees, in 1669 and 1701, allowing the nobles to trade by land and sea without derogating from their nobility. An attempt made in 1711 to exclude merchants from the House of Commons failed.

MERCHANT ADVENTURERS.—This celebrated commercial company, said to have originated in the London Mercers’ Company, obtained privileges from John of Brabant A.D. 1296, and established themselves at Antwerp under the title of the Brotherhood of St. Thomas Becket. In 1358 they were encouraged by Louis, count of Flanders, who permitted them to form an establishment at Bruges; and in 1406 they received their first charter from Henry IV. of England. Edward IV. granted a new charter in 1466. Their importance was much increased by the celebrated treaty known as the Intercessus magnus, which was concluded, between Henry VII. and Philip, archduke of the Netherlands, Feb. 24, 1496; and in 1497 the company began to assume the title of the Merchant Adventurers. Henry VIII. granted
them a charter in 1513; * Queen Elizabeth granted them a charter in 1560, and a second, dated July 8, 1564, confirming all former charters and privileges. Owing to the opposition of the Hanse towns, they were temporarily expelled from Germany in 1557, but they were soon invited to return. James I. granted them a charter in 1617, and their privileges were confirmed by Charles I. in 1634. They settled at Dort in 1647, and made Hamburg their principal staple about 1651. After 1661 Hamburg became their only foreign station. In 1765 the company published a report, wherein they stated that their trade had been long declining.

MERCHANT TAILORS.—This company, anciently called Tailors and Linen Armourers, was incorporated by Edward IV. A.D. 1466. As many of the members were great merchants, Henry VII. re-incorporated them in 1503, and gave the title of Merchant Tailors. In 1607, June 7, a special charter was given to James I., which cost above £1,000. This company ranks more royal and noble personages among its members than any of the city companies. The Merchant Tailors' School was founded Sept. 24, 1561.

MERCIA (England).—This ancient kingdom is supposed to have been founded by the Angles, under Crida, A.D. 556. It was conquered by the Northumbrians in 655, and soon after regained its independence.

MERCURY.—The transit of this planet over the sun was first observed by Gassendi, A.D. 1631.

MERCY (Orders).—The order of Mercy was established A.D. 1218 by James I. of Aragon, in the city of Barcelona, for the purpose of redeeming Christian captives in the power of the Moors. It is sometimes called St. Eulalia, from the name of the patron saint of the principal church in that city. A dispute between the knights and priests of the order about the election of a master, decided in favour of the priests by Pope John XXII. (1316—1334), led to the withdrawal of the knights, and the society from that time has been composed entirely of priests. In 1688 the duchess of Dudley bequeathed £100 per annum for the liberation of English captives.

MÉGUI (Hindostan).—This town, in Tenasserim, was taken by the English A.D. 1824, and was ceded to England by the treaty of Yandaboo, Feb. 24, 1826.

MÉRIDA (Mexico) was founded by the Spaniards on the site of a Mexican city, A.D. 1542. The "Cozumel Cross," supposed to have been originally worshipped by the natives of Cozumel, is preserved at Merida.

MERIDA, OR EMERTA AUGUSTA (Spain), the ancient metropolis of Lusitania, a town of great antiquity, was built by the legate Publius Carinus, B.C. 24. The Moors, under Musa, took it A.D. 712; but they allowed the inhabitants to retain their temples, creed, and bishops. It was taken from the Moors by Alonso, Nov. 19, 1229, from which time it began to decline. Philip II. in 1590 ordered drawings to be made of the ruins, which in 1734 were burned in the palace at Madrid. The French took Merida June 8, 1811. At Aroyo des Molinos, near this town, the English, under General Hill, defeated the French, under Girard, Oct. 28, 1811. Merida was wrested from the French by the British in April, 1812.

MERKINS, OR MERKIDIES.—This Moorish tribe appeared in the north-west parts of Africa A.D. 1213. They made themselves masters of Fez, and before 1268 had established their supremacy throughout Morocco. Under their king, Abu Juzef, they entered Spain in 1274, and withdrew in 1294.

MERMAID SHEEP were first brought into England from Spain, A.D. 1785, and a second flock was imported in 1791. Some authorities believe that the merinos are descended from English sheep imported into Spain. Edward IV., in 1464, sent a score of Costal ewes and four rams to John, king of Aragon. When Catherine, daughter of John of Gaunt, was espoused to Henry III., in 1399, she took a flock of sheep with her as her dowry. Merino sheep were introduced into the German states in 1765, into Hungary in 1775, and into France in 1786.

MERMOX (Africa).—This ancient kingdom of Central Africa is considered to have been formed by the military caste which removed from Egypt during the reign of Psammetichus (B.C. 658—614). The ruins of the ancient capital of this kingdom were discovered by Caillaud between A.D. 1819 and 1822.

MEROVINGIANS, the first race of the kings of France, who reigned from A.D. 418 to 752. The name Merovingian is derived from Meroveus, the third king, who began to reign in 451. The French monarchy was founded in 487 by Clovis, the fifth of the Merovingian race. (See FRANCE.)

MERRY ANDREW.—Hearne is of opinion that this term originated from Andrew Böde, a physician, who lived in the time of Henry VIII. He says, "Twas from the doctor's method of using such speeches at markets and fairs, that in after-times those that imitated the like humorous, jocose language, were styled Merry Andrews, a term much in vogue on our stages."

MERSEBURG ( Battles).—Henry the Fowler, emperor of Germany, defeated the 555
Hungarians at this town, in Saxony, A.D. 934. The Hungarians are said to have lost 40,000 men. This extended plain, between Merseburg and Leipsic, became the scene of numerous battles in later times. During the contention between the emperor Henry IV. and Gregory VII., a great battle was fought here between the papal and the imperial forces. Henry IV., having invaded Saxony, was defeated here in 1098. Rudolph of Swabia died in the encounter, and Henry IV. took the city of Merseburg soon after.

Merton (Surrey) was anciently called Meretun. Cynwulf, king of Wessex, was murdered here A.D. 784. Ethelred and his brother Alfred, afterwards king, fought a great battle with the Danes at this place, in the spring of 871. The English, at first victorious, were eventually compelled to withdraw. The priory, built of wood in 1115, was rebuilt in stone in 1130.

The College (Oxford) was founded at Malden in Surrey, by Walter de Merton, bishop of Rochester, Jan. 7, 1264, and was removed to Oxford in 1274. The library was built in 1376 by William Rede. The outer court was rebuilt in 1589.

Merton Statutes. — A council assembled at the abbey of Merton, Jan. 23, 1236, when various enactments were made that have since formed part of the statute law of England, and are known as the Statutes of Merton.

Mery, or Merv (Asia), is said to have been founded by Alexander the Great, and having been destroyed, was rebuilt by Antiochus I., who gave it the name of Antiochia Margiana. Here Orodès I., or Arsaces XIV., of Parthia, settled the soldiers of Crassus, whom he had made prisoners, B.C. 53. It was a favourite residence of many of the Persian monarchs, and was destroyed by the Uzbeg Tartars A.D. 1756.

Mesmerism.—The foundation of this theory was laid by Friedrich Anton Mesmer, A.D. 1799, when he published a new explanation of his theory. He returned to Germany, and, sinking into poverty, died at Marsburg in 1815. In 1817 the Prussian law prohibited the practice of mesmerism to any except members of the medical profession; and the council of University College, London, passed a resolution to prevent its introduction into their hospitals, Dec. 27, 1838. An ingenious correspondent in Notes and Queries, July 3, 1852, quotes from Apuleius an early allusion to mesmerism; and Glanvill, in his “Seccups Scientifica,” published in 1665, refers to some doctrine analogous to modern mesmerism.

Mesne Process is defined by Wharton as “all those writs which intervene in the progress of a suit or action between its beginning and end, as contradistinguished from primary and final process.” Arrest on mesne process, where the debt or cause of action was under £20, was abolished by 7 & 8 Geo. IV. c. 70 (July 2, 1827). The change, which did not extend to Scotland and Ireland, was applied to the last-mentioned country by 10 Geo. IV. c. 35 (June 4, 1829); and arrest on mesne process in civil actions was abolished, except in certain specified cases, by 1 & 2 Vict. c. 110 (Aug. 16, 1838).

Mesolonghi, or Messolonghi. (See Missolonghi.)

Mesopotamia (Asia).—This country was called, in the Old Testament, Aram Naharin (Syria between the two waters i.e. the Tigris and the Euphrates), and Padan Aram, i.e. Syria of the Plain. It passed successively under the sway of the Babylonians, the Medians, and the Persians. After the battle of Issus, in October, 333 B.C., it fell into the power of the Macedonians. The Romans obtained possession of Mesopotamia A.D. 165. Jovian surrendered it to the Persians in 363. The Carmathians overran it in 902, and the Turks conquered it between 1514 and 1516.

Messalians. (See Eucrites.)

Messene (Greece), the capital of Messenia (q. v.) in the Peloponnese, was founded by Epaminondas B.C. 369, and maintained its independence until it was conquered by the Romans, B.C. 146.

Messenia (Greece).—The earliest inhabitants of this country are said to have been the Leleges. Polycaon named the country Messene, in honour of his wife, B.C. 1499. At the Dorian conquest of the Peloponnese, Crespheontes obtained Messenian. Numbers of the inhabitants left their country and settled in various parts of Greece, Italy, &c., at the close of the second Messenian war (q. v.), B.C. 688. Those that remained were reduced to the condition of helots, and the whole of Messenia was incorporated with Sparta. For nearly 300 years, Messenia ceased to exist as an independent country. After the battle of Leuctra, B.C. 371, in which the Spartans were totally defeated, Epaminondas determined to restore Messenia, and he built the town of Messene

556
Messenian Wars.—The first of these wars, between Messenia and Sparta, lasted twenty years, from B.C. 743 to B.C. 723. The former were obliged to submit. The second began B.C. 685, and lasted to B.C. 668, terminating in the conquest of the Messenians. Taking advantage of the devastation caused by the great earthquake at Sparta, the Messenians revolted; and the third Messenian war commenced B.C. 464, and ended in their entire overthrow B.C. 455.

Messina (Sicily), the ancient Messana, was originally called Zancle, said to be derived from a Sicilian word, signifying a sickle. It was thus named on account of the peculiar formation of the port. The date of its foundation cannot be ascertained with accuracy, though it is generally believed to have derived its origin from a colony of Naxos, which city was not founded until B.C. 735. The Samians obtained possession of Zancle B.C. 463, and were expelled about B.C. 479 by Anaxilas of Rhegium, who called it Messana, from the Grecian city of that name, from which his ancestors came. From that time it was generally known as Messene or Messana. The inhabitants regained their independence B.C. 461, but were compelled to surrender their town to the Athenians, B.C. 426. They joined the Syracusans B.C. 425, again became independent, and enjoyed great prosperity until their city was taken and completely destroyed by the Carthaginians under Himilcon, B.C. 396. Messana, gradually restored, again became an important city, and was captured by Agathocles B.C. 312. Some time after his death, probably about B.C. 290, the city fell a prey to the Mamertines (q. v.), who endeavoured to change its name to Mamertina. Having been assaulted by Hieron of Syracuse, one portion of the citizens desired to seek the assistance of the Carthaginians, and another that of the Romans. The latter prevailed, and this appeal to Rome (B.C. 264) led to the first Punic war. Messina flourished under Roman protection, and became a station for their fleets. Cassius, in command of Pompey's fleet, destroyed Caesar's squadron here, B.C. 48. The Saracens captured Messina A.D. 829, and they were expelled by the Normans under Count Roger in 1072. Richard I., during the third crusade, landed here with his army, Sept. 14, 1190, and embarked for the Holy Land April 10, 1191. In 1672 the inhabitants revolted against the Spaniards, and made an alliance with the French; but their city was taken by the Spaniards, Sept. 17, 1675, and was ceded to Austria, Feb. 17, 1720. The plague carried off nearly 50,000 persons in 1743. Messina has suffered severely from earthquakes. It was almost entirely destroyed by one in 1693. Others occurred in 1759 and 1783, and on the last occasion the magnificent quay and many beautiful edifices were destroyed. A revolution broke out Jan. 12, 1848, but it was soon suppressed. A general rising took place in Sicily, March 15, 1860, and several persons were arrested in Messina, May 2. The revolution was, however, successful; the connection with Naples was severed, and Messina now forms part of the kingdom of Italy.

Metallurgy.—Tubal Cain was "an instructor of every artificer in brass and iron" (Gen. iv. 22). According to Hallam, Agricola, a native of Saxony, acquired a perfect knowledge of the processes of metallurgy from the miners of Chemnitz, and perceived the immense resources that might be drawn from the abysses of the earth. "He is the first mineralogist," says Cuvier, "who appeared after the revival of science in Europe." The names of the principal metals, with the date of their discovery, are as follows:—

METAMORPHISTS.—Certain sacramentarians, who affirmed that Christ's body was wholly defined, arose about A.D. 1450. Metaphysics, or the science of the principles and causes of all things existing, was first treated of by Aristotle (B.C. 384 to 322). The title was applied to the series of works which followed his "Physics" and were in consequence styled "μετὰ τὰ φυσικά," or "after the physics."

Metapontum, or Metapontum (Magna Graecia).—The foundation of this city, assigned to various persons and periods, was doubtless the work of an Achaean colony. The Metapontines joined Athens against Sicily B.C. 414. Hannibal occupied Metapontum from B.C. 212 to B.C. 207, and on retiring took with him all the inhabitants who had fled lest the Romans should punish them for their alliance with the Carthaginians.

Metaurus, (Battle,) was fought upon the banks of this river, in Italy, B.C. 207, between Hasdrubal, the brother of Hannibal, and the Roman consuls C. Claudius Nero and M. Livius. Hasdrubal was slain in this contest, and the Carthaginians were totally defeated.

Metempsychosis, or the doctrine of the transmigration of souls, was long supposed to have been derived from the Egyptians. It appears, however, to have existed in Greece, in some form or other, before any intercourse existed between Egypt and Greece. Pythagoras, who died B.C. 507, first gave the doctrine that settled form it long assumed in ancient Greece. Empedocles, who flourished B.C. 455, held that plants had souls, and that into plants, as well as into animals, the vital principle passed after death. It was a favourite doctrine of the Hindoos.

Meteorolite.—The theories respecting the nature of these phenomena are four in number; viz., that they are stones projected by lunar volcanoes; stones from terrestrial volcanoes; that they are the result of gaseous combinations in the air; and that they are asteroids which are drawn by the earth as they come within the force of its attraction. The last theory receives support from the fact, that since 1833 showers of meteorolites have fallen in various parts of Europe and America annually on the 12th, 13th, or 14th of November.

B.C. 654. Livy mentions a shower of stones which fell on the Alban mount.

467. A large stone fell near Egosopotami, in Thrace.

469. A large stone fell at Aegospotami, in Thrace.

558

Pliny mentions the fall of an aërolite in Lucania.

46. Caesar states that a stone fell at Acilia this year.
of peace were massacred by the army of Vitellius, A.D. 70, and Metz was destroyed by the Huns in 452. In the Middle Ages it became the capital of the kingdom of Austria, sometimes called the kingdom of Metz, and was used by the German emperors as a barrier against France. Charles VII. besieged it in 1444, and it only preserved its freedom by the payment of 100,000 crowns.

Henry II. obtained possession of Metz in 1552; and, although the emperor Charles V. besieged it with 100,000 men, after ten months he was obliged to raise the siege, Jan. 1, 1553. The town continued in the possession of the French, and was formally secured to France by the peace of Westphalia in 1648. The cathedral, one of the most beautiful Gothic buildings in Europe, founded in 1014, was not finished till 1546. Its fortifications were planned by Vauban and continued by Marshal Belleisle. The fort Belle-Croix, commenced in 1731, is a master-piece of military construction. Metz was made a bishop's see at an early period, and councils were held here in October, 590; in 753; May 28, 859; in June, 863; Sept. 9, 869; and in 898.

Mexico (North America).—The earliest inhabitants of Mexico of whom we possess any information, are the Tolteca, who, having been expelled from their own country, A.D. 472, travelled southward and settled in Mexico, where they established a kingdom in 667. In consequence of a terrible famine and pestilence, this people migrated from the country about 1051, and were succeeded, after a lapse of about a century, by the Chichimecs. The Aztecs settled in the country about 1216, founded the city of Mexico in 1325, and established their monarchy in 1532. Mexico was made known to Europeans by Hernandez de Cordova in 1517.

A.D.
1519. April 31. Hernando Cortes lands in Mexico.
1521. Aug. 13. He takes the city of Mexico.
1522. Oct. 15. Charles V. constitutes Cortes governor of the conquered territory, which is called New Spain.
1533. Mendez erects the first Mexican mint.
1547. Dec. 2. Death of Cortes at Castillo de la Cuesta, near Seville.
1553. The university of Mexico is founded.
1609. An insurrection of negro slaves is suppressed by the vicerey.
1624. The province is involved in civil strife, owing to the attempt of the vicerey to obtain a monopoly for the sale of corn.
1639. June 20. The city of Mexico is overwhelmed by an inundation, which continues for five years.
1653. A formidable insurrection of the Indians is suppressed.
1659. The first auto-da-fé at Mexico is celebrated by the Inquisition. Fifty victims suffer.
1692. June 28. An insurrection breaks out in the city of Mexico, and the palace of the vicerey is burnt by the mob.
1767. June 23. The Jesuits are expelled from Mexico.
1808. Sept. 15. The Mexicans arrest the vicerey Duran, and send him prisoner to Spain.

1845. Dec. 29. The soldier-priest Morelos is shot for raising an insurrection.  

MIC

A.D.

Mezières (France), the chief town of the department of the Ardennes, was besieged by an Austrian and Spanish army A.D. 1521. The Chevalier Bayard took the command of the garrison, and compelled the Imperialists to retire in confusion.

Mezières-en-Brenne (France). — This town, in the department of Indre, is celebrated for its church, dedicated to St. Marie-Madeleine A.D. 1339.

Mezzotinto, or Middle-Tint. — A style of engraving, the invention of which is ascribed to Prince Rupert by Evelyn in his "Sculptura," published A.D. 1662. The discovery, however, is really due to Louis von Siegen, a lieutenant-colonel in the service of the landgrave of Hesse-Cassel, who engraved a portrait of the queen of Bohemia in this style about 1645. Theodore de Furstenberg practised the art in 1656, and he and Rupert are believed to have been pupils of Siegen. The earliest work by Prince Rupert is the "Executioner of St. John," completed in 1658.

Michaelmas.—The feast of St. Michael, celebrated on the 29th of September, was instituted A.D. 487. Michaelmas-day was formerly marked by the display of great hospitality, and many curious customs were connected with it. Michaelmas term was altered by 16 Charles I. c. 6 (November, 1649), and by 24 Geo. II. c. 48 (1751). The common tradition attributing the origin of the Michaelmas goose to the fact that Queen Elizabeth was eating a goose on that day when she received the news of the defeat of the Spanish armada, is incorrect: public thanksgiving for the victory had been offered in London Aug. 20, 1588. The practice, moreover, existed in England in the reign of...
Edward IV., and appears to have been an imitation of a custom observed on the continent of eating a goose on St. Martin's day, or Martinmass, Nov. 11. The goose is called amongst several continental nations St. Martin's bird.

Michaelis (St.), Mount (Cornwall).—This island, lying off the coast, is supposed by some writers to be the litoris mentioned by Diodorus Siculus. This, however, is a disputed point. It received the name from a supposed appearance of the archangel St. Michael about A.D. 495. It was annexed by Robert, earl of Morton, and made subject, in religious matters, to the abbey of Mount St. Michael, in Normandy, and remained in this condition till the French wars in 1414, when the statute passed in 1380 for suppressing alien priories was put in force. Henry V. or VI. gave this alien priory to Syon Abbey, Middlesex, under which rule it continued until 1533, when it was dissolved. In 1542 the abbey was given to Henry VIII., who granted the revenues to Humphrey Arundell. After his death, in 1550, it was sold to Job Milton. The mount was fortified in the Middle Ages, and the earl of Oxford (John de Vere), a Lancastrian, surprised it in September, 1473, and it was wrested from him by the Yorkists in February, 1474. The Cornish rebels seized it in 1549, and the parliamentarians in 1646. The pier was rebuilt in 1726, and Queen Victoria visited the mount Sept. 6, 1846.

Michael, St.—Louis XI. of France instituted the order of St. Michael A.D. 1409, and a similar order was introduced into Germany in 1618.

Michigan (North America).—The French penetrated into this country early in the 17th century, and formed a settlement at Detroit A.D. 1647; Michigan passed into the hands of the English in 1763, and was not entirely relinquished by them to the United States until 1796. Michigan was erected into a territory in 1805, and was admitted into the Union as a distinct state in 1836.

Microscope.—Single microscopes, in the form of glass globes containing water, were in use amongst the ancients. Layard found a magnifying lens of rock crystal in the ruins of Nineveh. The invention of the compound microscope has been attributed to Jansen and Galileo, A.D. 1069, and to Cornelius Drebbe in 1620. It is now generally believed to have been invented by Zacharias Jansen, assisted by his father, Hans Jansen, spectacle-makers at Middleburg, about 1590. They presented one to Prince Maurice in 1617. Richard perfected the diamond microscope Dec. 1, 1824. It was the first in which this precious stone had been used, and it was found greatly superior to glass in power. Professor Riddell, of the university of New Orleans, in 1851 constructed a binocular microscope, for rendering both eyes serviceable in microscopical observations.

Microscopical Societies.—The Microscopical Society was instituted at London Sept. 3, 1639, for the promotion and diffusion of improvements in the optical and mechanical construction; for the communication and discussion of observations and discoveries; for the exhibition of new or interesting microscopical objects, and preparation by for submitting difficult and obscure microscopical phenomena to the test of various instruments; and for the establishment of a library of standard microscopical works. —The Dublin Microscopical Society, for promoting a knowledge of the minute structure of organic beings, was founded in that city in October, 1840.

Middle Ages. (See Mediæval Ages.)

Middleburg (Holland).—The prince of Orange wrested this strongly-fortified town, in the province of Zealand, from the Spaniards, after a two years' siege, Feb. 19, 1574. In 1561 a religious sect, called the Brownists (g.v.), from their founder Robert Brown, settled at Middleburg. Disunion soon appeared in their ranks, and they left them and returned to England in 1569.

Middle-Class Examinations.—The Convocation of Oxford university passed a statute authorizing middle-class examinations, June 18, 1857, and the first commenced at Oxford June 21, 1858.

Middlesex (England), before the Roman invasion, B.C. 55, formed part of the territories of the Trinobantes, the first British tribe who submitted to the Romans. Julius Caesar invaded it B.C. 54, and it passed under the dominion of Rome in the time of Claudius, A.D. 43. It formed part of the kingdom of Essex, established in 527.

Middle-Temple Hall (London) was built A.D. 1570. It contains an equestrian picture of Charles I., supposed to be a genuine Van Dyck, and portraits of Charles II., Queen Anne, George I., and George II. New buildings were erected in 1831, and the new library, completed in 1861, was opened by the prince of Wales Oct. 31 in that year.

Middleton (Lancashire).—The parish was granted, A.D. 1513, to Sir Richard Asheton for his bravery at Flodden Field,
and was only a small village in 1775. In 1812 it was the scene of rioting by discontented workmen. The church was built by Sir R. Asheton in 1524; the grammar-school was founded by royal charter, Aug. 11, 1572; and Samuel Radcliffe founded two scholarships at Brasenose College, Oxford, in 1648.

MIDDLETOWN (North America).—This city of Connecticut, called Mattabesick by the Indians, was settled a.d. 1650. The Wesleyan university was founded in 1831.

MIDHURST (Sussex) is supposed to have been the Roman Miba, or Mida, described in the Chorography of Ravenna, as existing in the south of Britain. Its free grammar-school was founded a.d. 1872. Cowdray House, the seat of the Montagues, near this town, built in the reign of Henry VIII., was destroyed by fire in 1793.

MIDIANITES, deriving their name from Midian, the son of Abraham by Keturah, were early engaged in trade between the East and the West. Joseph was sold by his brethren, b.c. 1728, to a party of Midianites carrying spices, the produce of the East, into Egypt (Gen. xxxv. 28). They were utterly destroyed by the Israelites b.c. 1451 (Num. xxxvi.).

MIDNAPORE (Hindostan).—This district and town of Orissa were ceded to the British by Cossim Ahmed Khan, a.d. 1761. In 1770 it was devastated by a terrible famine, which carried away nearly half of the population. A similar disaster, but of less severity, occurred in 1790.

MIDWIFERY.—In ancient Egypt, Greece, and Rome, the obstetric art was exclusively professed by females, male physicians only being considered in when the life of the mother was considered in great danger. The first printed book on the subject was published by Eucharius Roesslin, a.d. 1513. The practicability of the Caesarean operation on the living mother was proved by Francis Rousset in 1651; and the science was progressively advanced on a firm foundation by the treatise of Francis Maurica, in 1663. The invention of the forceps was made by Dr. Chamberlen in 1672. Male accoucheurs were first employed by ladies of the highest rank in France. A school for midwives was established in the Hôtel Dieu at Paris in 1745.

MIES (Battle).—The Hussites defeated a Saxon army, near Mies, July 21, 1426.

MILAN (Duchy).—The struggle maintained for several years by various Lombard cities to secure their independence was brought to a successful close by the treaty of Constance (q.v.), a.d. 1158. Quarrels between the different cities, and internal feuds amongst the civil and ecclesiastical authorities, kept Italy for many years in constant ferment. Visconte took Milan from Napoleon della Torre in January, 1277, and the citizens saluted him "Perpetual Lord of Milan." Gian Galeazzo Visconte obtained the title of duke of Milan by purchase in 1395. His descendants ruled as dukes until 1447, when Francesco Sforza, son-in-law of Philip Visconti, the last of the line, obtained the duchy. He was acknowledged duke in 1450, and on the extinction of the Sforza line, in 1535, the duchy was annexed to the Spanish crown.

MILAN (Italy).—This city, the ancient Mediolanum (q.v.), once more rose from its ruins, and regained some of its former importance in the 9th century. Many of the inhabitants of Pavia, after its capture in 924, settled in Milan, and Otho I. was crowned king of Italy at Milan in 961. Conrad II. laid siege to it in 1037, and retired in 1038 without achieving his object. Councils were held at Milan in 346, 347, 355, 390, 396, 451, 671, 1006, 1103, in February 1117, and Sept. 12, 1297.

A.D. 1041. The people expelled the nobles.
1042. The city is blockaded by the expelled nobles.
1044. Peace is restored between the nobles and the people.
1107. Milan becomes a republic.
1127. The cities of Milan make war upon other Italian cities, and destroy Lodi and Como.
1154. The Milanese are defeated in a sanguinary battle by the people of Pavia, and they submit but with reluctance, to the emperor Frederick I.
1158. Frederick I. with an army of 100,000 men, besieges Milan, which is reduced by famine and pestilence.
1161. The Milanese having rebelled, Frederick I. again lays siege to their city.
1162. March 1. The consuls and chief citizens solicit the clemency of the emperor at Lodi. March 4. They deliver up the keys to Frederick I., who entrusts the city March 26, and destroys the fortifications.
1169. The Lombard cities form a league for their defence, and Milan is restored.
1187. The citizens choose Uberto de' Visconte, of Plessartia, their Podesta.
1259. Struggles between the nobles and the people recommence.
1327. The government of Milan is remodelled, and twenty-four nobles, subject to an imperial mandate, are made rulers.
1395. Milan is erected into a duchy. Gian Galeazzo Visconte having purchased the title of duke of Milan from Wenceslaus, king of the Romans, erects the title of duchy of Milan.
1499. Milan is occupied by the French.
1513. It is again occupied by the French.
1535. Charles V. seizes Milan.
1540. It is given to Philip of Spain, by his father Charles V.
1639. Philip IV. signs the treaty known as the Capitulation of Milan.
1770. Milan is seized by the Austrians.
1797. March 13. The French sign a treaty at Milan, resigning all their conquests in Lombardy.
1798. March 29. The citadel surrenders to the French.
1798. June 23. The convention of Milan is signed between France and Sardinia.
1799. May 24. It is taken by the Austrians, under General Hohenlohe.
1800. The French again take Milan.
1803. May 15. Napoleon I. is crowned king of Italy, with the iron crown of Lombard, at Milan.
1807. Nov. 23. Napoleon I. publishes the Milan decree proscribing the name of Austria from holding intercourse with the English.
1815. April 20. Insurrections break out at Milan.
1814. March 18. The Milanese revolt against the Austrians, and expel them from the city. Aug. 5. The Austrian forces re-enter the city.
MILESIAN WAR, waged by the inhabitants of Miletus (q.v.) in defence of their liberties against the Lydians, lasted from B.C. 623 to B.C. 612. The Miletians were defeated in two engagements by Sadyattes, king of Lydia. The war was continued by his successor Alyattes, who was taken ill, in consequence, it was believed, of his troops having burnt a temple in the territory of Miletus, and he at once made peace with the Milesians.

MILETUS (Asia Minor).—This city, supposed to have been peopled by Carians at an early period, passed through the hands of several tribes, and was seized by the Ionians, who massacred all the women. The inhabitants carried on war against the Lydians B.C. 623—612. They rose against the Persians B.C. 500, and, after sustaining several defeats, their city was taken B.C. 494, and the inhabitants were carried to Ampe, on the banks of the Tigris. Miletus regained its independence after the battle of Mycale (q.v.), B.C. 479, and soon after joined the Athenians. Alexander the Great took the city by assault B.C. 334. It was visited by the apostle Paul (Acts xx. 17), who summoned the elders of the church of Ephesus to meet him here in April, 56 A.D., and it was an early see of the Christian church.

MILFORD (Wales).—This town, founded A.D. 1790, is connected with London by the South Wales Railway. The church was erected in 1805. The naval establishments were removed to Pembroke in 1814.

MILFORD HAVEN (Wales) is an arm of the sea, with deep water and excellent anchorage, capable of sheltering the whole of the British navy. Here Richard II. embarked on his expedition to Ireland in May, 1399. A French fleet, carrying troops intended to assist Owen Glendower in his opposition to Henry IV., arrived here in 1407. The earl of Richmond, afterwards Henry VII., who sailed from Harleuf Aug. 1, 1485, landed at Milford Haven Aug. 7. Two lighthouses were erected on St. Ann's Head in 1800. The Great Eastern wintered in Milford Haven in 1860, and returned for repairs, after having been disabled in a hurricane, Sept. 12, 1861.

MILITARY ASYLUM (London) was founded at Chelsea, June 19, 1801, by the duke of York.

MILITARY FRONTIER (Austria).—This tract of country, so named because it is placed under a purely military government, extends from the Adriatic Sea to Transylvania, and was originally intended to form a barrier against the Turks. The system was introduced by Ferdinand I., who reigned from 1558 to 1563. He planted military colonists in Croatia. It was further extended in the 17th and 18th centuries, the system in existence at present having been established in 1807.

MILITARY KNIGHTS OF WINDSOR. (See CHAPEL, Knights of the.)

MILITIA.—The national force, denominated the fyrd, which existed in this country in the Anglo-Saxon period, was improved and extended by Alfred. Henry II. issued an ordinance commanding all persons to provide themselves with arms in 1181. By 13 Edw. I. c. 5 (1285), the scale of arms for different ranks was revised. Hallam, with reference to the changes that occurred in the system of national defence, remarks (Middle Ages, chap. ii. pt. 2), "The feudal military tenures had superseded that earlier system of public defence which called upon every man, and especially every landholder, to protect his country. The relations of a vassal came in place of those of a subject and a citizen. This was the revolution of the 9th century. In the 12th and 13th another innovation rather more gradually prevailed, and marks the third period in the military history of Europe. Mercenary troops were substituted for the feudal militia." The first commission of array (q.v.) for the defence of the kingdom, of which any record remains, was issued in 1232, and the last in 1557. The modern system was introduced by 13 Charles II. c. 6 (1661), by which the sole right of commanding the militia by sea or land was vested in the crown. Further provisions were made by 13 & 14 Charles II. c. 3 (1662), and by 15 Charles II. c. 4 (1668); and the various regulations already in force were amended by 1 Geo. I. c. 14 (1714). Measures were taken for the better ordering of the militia by 30 Geo. II. c. 25 (1757), which was explained and amended by 31 Geo. II. c. 26 (1758). All the laws in force were consolidated by 2 Geo. III. c. 20 (1762). Protestant dissenting ministers and schoolmasters were exempted from service in the militia by 19 Geo. III. c. 44 (1778). The militia laws were amended and consolidated by 26 Geo. III. c. 107 (1786). The supplementary militia act, 37 Geo. III. c. 3 (Nov. 11, 1798), provided for an augmentation of the militia, and the laws relating to the subject were again amended by 42 Geo. III. c. 90 (June 26, 1802). The acts of the Irish parliament respecting the militia in Ireland were amended and consolidated by 49 Geo. III. c. 120 (June 19, 1809). Police constables are exempted from serving in the militia by 2 & 3 Vict. c. 93 (Aug. 27, 1839). The militia laws were again amended by 15 & 16 Vict. c. 50 (June 30, 1852), by 16 & 17 Vict. c. 133 (Aug. 20, 1853), and by 17 & 18 Vict. c. 13 (May 12, 1854).

MILKY WAY.—Democritus, a celebrated philosopher of Athens, was the first who taught that this luminous trail in the heavens, called the milky way, consisted of a confused multitude of stars, about 428 B.C. Soon
after the discovery of the telescope, Galileo announced that he had resolved the whole of the milky way into stars.

**MILL**—A machine of some kind or other for grinding corn is mentioned in Scripture, and was in use amongst the ancient nations. The time when the mortar, probably the earliest instrument used for the purpose, was superseded by the hand-mill, cannot be ascertained. Moses threatened Pharaoh with the destruction of all the first-born of Egypt, “even unto the first-born of the maidservant that is behind the mill” (Exod. xi. 5), B.C. 1491, and he commanded the Israelites not to pledge a mill of this kind (Deut. xxiv. 6), B.C. 1451. Cattle-mills were introduced at an early period. Water-mills were invented in Asia Minor, and appear to have been introduced in the time of Julius Caesar. Floating mills were invented in 536. Windmills were used in Hungary before 718, and were introduced into England about 1040. Mills for draining water off land first occur in Holland 1408.

**Millennialists, or Chilists,** a name given to those who believe that the saints will reign on earth with Christ a thousand years. These opinions, grounded on the 20th chapter of the Revelation of St. John the Divine, arose in the 2nd century, and have existed, with various changes and modifications, since that period. Papias, bishop of Hierapolis and a disciple of St. John the Evangelist, was the first who held these views, and they were warmly supported by Justin Martyr. In the 4th century the millenarians held the following tenets:—that the city of Jerusalem would be rebuilt; that Christ would come down from heaven and reign upon earth with his servants; and that the saints during this period would enjoy all the delights of a terrestrial paradise. According to Mosheim, Cerinthus, in the 1st century, held opinions of a similar character. (See Fifth-Monarchy Men.)

**Millenary Petition.**—This address to James I., drawn up by the Puritans A.D. 1608, was called the millenary petition because they pretended that it bore the signatures of a thousand ministers, though some hundreds were wanted to complete that number. Hallam says it was signed by 825 ministers from 25 counties. The Puritans met the king on his journey from Scotland to take possession of the English throne, and presented this address. The universities declared against it June 9, 1603; but it was discussed at the Hampton Court conference, Jan. 14, 1604.

**Millennium.**—The ancient tradition, that Christ and his saints should reign upon earth for 1,000 years, was revived in the 10th century, when the people were taught that the millennium was at hand, that Satan would be set free, that the reign of Antichrist would commence, and that after a short season of triumph the last judgment would take place. Multitudes, as the eventful year approached (about 950), forsook their homes, making over their property to the Church. (See Millennium.)

**MILLENIUS (Battle).**—General Paskie-witch, at the head of a Russian army, stormed the Turkish camp at this place, near Erzeroum, July 2, 1829. The victors captured 30 pieces of cannon, 19 standards, and 1,500 prisoners.

**Milton (Kent).**—This town, anciently called Middletown and Middleton, formed part of the demesne of the Saxon kings. Hosting, the Dane, built a fort here A.D. 893, and it was burnt by Earl Godwin about A.D. 1052. The fee of the manor remained vested in the crown till the reign of Charles I.

**Milwaukee (North America) was founded A.D. 1835.**

**Mincio (Battles).**—The French, under Napoleon Bonaparte, defeated the Austrians on the banks of this river, in Lombardy, May 29, 1796. The French were defeated here by the Austrians, Dec. 26, 1800. Eugene Beauharnais gained a victory over them Feb. 8, 1814. In 1848, on the outbreak of the revolution in Italy, the Austrian general Radetsky retreated to the Mincio, April 2. He was followed by Charles Albert, who forced the passage of the river April 8. Charles Albert, after losing the battle of Vareggio, was compelled, July 26, to retrace his steps and abandon the line of the Mincio. The Austrians retreated to the left bank after the battle of Magenta, in June 1859, and recrossed it July 23, to fight the battle of Solferino (q.v.). The allied French and Sardinians followed them across the river Aug. 1, and found the Austrians had taken shelter in the lines of the Quadrilateral.

**Mindanao, or Magindanao (Philippine Islands).**—The Arabsians at an early period visited this island, the largest of the group, and Magelhaens took possession of it A.D. 1521. The Mohammedan population are governed by a native ruler, and the Spaniards possess only a small portion of the island.

**Minden (Battle).** was fought Aug. 1, 1759, between the allied army, composed of English, Hessian, and Hanoverians, commanded by Prince Ferdinand of Brunswick, and the French, under Marshal De Contades. The allies, who gained a complete victory, lost 2,000 men, whilst the French lost 7,000 in killed, wounded, and prisoners.

**Mineral Waters.**—Boyle, in 1663, and again in 1678, seems to have been the first who used tests to detect the ingredients in mineral waters. Gregory, in 1707, procured the solid ingredients by evaporation; and Bouldec, in 1726, employed alcohol to separate the saline substances. After the discovery of carbonic acid by Dr. Black, in 1778, more attention was paid to the analysis of mineral waters.

**Mineralogy.**—Agaricola of Saxony is stated by Cuvier to have been the first mineralogist after the revival of science in Europe. He flourished from A.D. 1494 to 1555. Becker’s “Physica Subterranea” was published in 1669, and Kircher’s “Mundus Subterra-
neus" in 1682. Woodward is the founder of scientific mineralogy in this country. His "Natural History of the Earth" was published in 1695. Wallerius published his celebrated system in 1747. Cronstedt's great work, "Porsög til Mineralogie," appeared in 1788, and commenced a new era in the history of the science. Werner's system was founded in 1774, and Häüy's "Tracté de Minéralogie" was published in 1801. The Mineralogical Society was established in 1801.

MINERVE.—This stronghold of the Cevennes was captured during the crusade against the Albigenes, A.D. 1210. A hundred and forty of the inhabitants cast themselves headlong into the flames July 23, to escape the fury of their persecutors.

MINES.—The Phoenicians and Egyptians were acquainted with the art of forming subterranean shafts and galleries in their pursuit of metallic ores, although they chiefly depended on what are called stream works. The Athenians worked silver-mines at Laurium in Attica in the 4th century B.C., and the Romans obtained quicksilver from Almaden in Spain at an early period. The art of mining was known in Britain prior to the arrival of the Romans, but was much neglected after their departure. It was for a long time chiefly practised by Jews. The king, by his royal prerogative, had a right to all mines containing gold and silver. By 1 Will. Ill. & Mary, c. 30 (1688), copper or tin mines in which gold is found are not to be deemed royal mines. Gunpowder was first employed in mines in 1620. The company of Mine Adventurers was formed in 1690 for the purpose of working the lead and copper mines of South Wales. A mania for mining speculations raged in England in 1824 and 1825, in consequence of the opening of Mexico to British intercourse. Numerous statutes have been passed for the management of mines. By 10 Geo. II. c. 32 (1737), it was declared a capital offence to set fire to any mine, and by 9 Geo. III. c. 29 (1769), the destruction of any apparatus connected with mines rendered the offender liable to seven years' transportation. To damage the roads leading to mines was made a misdemeanour by 39 & 40 Geo. III. c. 77 (July 9, 1800), and to steal from mines was made larceny by 7 & 8 Geo. IV. c. 29, s. 37 (June 21, 1827). The employment of women in mines was prohibited by 5 & 6 Vict. c. 99 (Aug. 10, 1842). New rules for the government and inspection of mines were imposed by 23 & 24 Vict. c. 151 (Aug. 28, 1860). The French École des Mines was founded in 1783. The London School of Mines was opened with an inaugural address by Sir Henry T. de la Beche, Nov. 6, 1851.

MINGRELLA (Asia).—This principality in the Caucasus was well known in ancient times under the name of Colchis (g.v.). The government was formerly a princely one, leaving the government in the hands of native princes, during the 15th century; and it remained in their power until, by the treaty of Koutchouk-Kainardji, July 10, 1774, between Russia and Turkey, Mingrelia was declared independent. The Russians obtained an ascendency over the princes of Mingrelia in 1812; and by the treaty of Gulistan (g.v.), Oct. 12, 1813, the Turkish government renounced all claim to this province.

MINIÉ RIFLE was invented at Vincennes by M. Minié in 1833. The Minié principle, with certain modifications, was adopted in the English service in 1851. The Minié rifle has been superseded by the Enfield and Whitworth rifles.

MINING.—Long before the invention of gunpowder it was customary to undermine besieged places, and support the roofs of the excavations by wooden props, which being consumed by slow fire, the roof fell in, and a breach was effected. The first theory of mines since the invention of gunpowder appears in a MS. of George of Sienna, A.D. 1480, and it was first put into practice by the Genoese at the siege of Sazzanella A.D. 1487. The plan failed, and was not resumed till 1503, when mines were successfully employed by the Neapolitans against the French. Candia was defended against the Turks by 1,173 mines during the siege that terminated in 1669.

MINISTER OF WAR.—The direction of colonial affairs and of war was vested in one person until 1854, when a separation was made, the duke of Newcastle retaining the war department, and Sir G. Grey being appointed to preside over the colonial office.

MINNESINGERS, or Love-singers, flourished in Germany during the 12th and 13th centuries. Henry VI., emperor of Germany A.D. 1190, was a minnesinger, as was also the emperor Conrad in 1264. When Rodolph of Habsburg ascended the throne in 1273, the minnesingers began to decline. One of the most celebrated minnesingers was Walther von der Vogelweide, who lived 1180—1240. He went to the crusades in 1197. Whilst a child he wrote many "lays," one a song of triumph on the coronation of Philip at Mentz in 1198. He assisted as a principal at the famous contention of minnesingers, or poetic battle of Wartburg, in 1297.

MINNESOTA (North America) was erected into a territory March 3, 1849, the portion west of the Mississippi having previously formed a part of the territory of Iowa, and that east of the Mississippi a part of Wisconsin. In 1850 it was divided into nine counties.

MINORCA, or MENORCA (Mediterranean), the second in size of the Balearic Isles (g.v.), colonized by the Phoenicians at an early period, passed successively under the sway of the Carthaginians, the Romans, the Vandals, and the Arabs. In 1229 it was conquered by Don James of Aragon; and in 1287 by Alfonso, his grandson, who reduced the Moors to slavery. The British under the earl of Stanhope captured it Sept. 30,
1708, and held possession, in which they were confirmed by the treaty of Utrecht, April, 11, 1713, till June 29, 1756, when it capitulated to the French. It was restored to the English at the peace of Paris, Feb. 10, 1763. The French and Spaniards took it in 1782, and the English recaptured it Nov. 15, 1798. It was finally ceded to Spain at the peace of Amiens, March 25, 1802.

MINSTRELS, described by Percy as "an order of men in the Middle Ages who subsisted by the arts of poetry and music, and sang to the harp, verses composed by themselves or others," were the real successors of the ancient bards, and were called by the monkish historians, joculatores, mimi, and jestours. Richard I. was a great patron of the minstrels, and his exploits furnished themes for their lays. It is recorded that in 1374, six minstrels performed at Winchester on the anniversary of Abwyne the bishop. John of Gaunt, in 1380, had a court of minstrels at Tutbury, and Henry V. was accompanied on his voyage to France in 1415 by eighteen minstrels. An ordinance was passed in 1456 for the impressment of youths to supply vacancies by death amongst the king's minstrels. They found free access amongst all classes as late as the reign of Henry VIII. A Welsh minstrel was executed for singing a prophecy against the king, July 1, 1541. They afterwards became neglected, and when Henry VIII., was, in 1575,arrisoned at Kenilworth Castle, in 1575, the appearance of a minstrel excited much wonder. By some authorities the decline of the minstrel's art is attributed to the statute 39 Eliz. c. 4 (1597), which included minstrels amongst rogues, vagabonds, and sturdy beggars, and adjudged them to be punished accordingly.

MINT.—The honour of first establishing a system of metallic currency is ascribed to the Greeks, about the 8th or 9th century before Christ. At Rome, the mint operations were carried on in the temple of Juno Moneta, or the Adviser. The mint officers formed a corporation. It was worked, in the time of the republic by public slaves; but freedmen were employed by Caesar. The Gothic kings of Rome improved the status of the superior officers. In 274 A.D. the workmen rose in rebellion because Aurelian introduced some reforms in the management, and the lives of 7,000 of the Roman soldiery were sacrificed in putting down the disturbance. The mints of the Anglo-Saxons were superintended by "moneyers." Barons and bishops were permitted the privilege of issuing coins, and provincial towns of importance were likewise allowed to establish mints. In 1379 the mints in England were placed under one master. Many privileges, granted by Edward I. and his successors to the officers of the mint, have been gradually withdrawn, and are now abolished. In 1643 a mint was established at New-Inn Hall, Oxford, where the plate of the colleges was coined to enable Charles I. to provide the means of carrying on hostile opera-

tions against the parliament. In 1695 there were mints at York, Bristol, Chester, Exeter, and Norwich. The management of the mint was entirely remodelled by 7 Will. IV. & 1 Vict. c. 9 (April 21, 1837). The new building was completed in 1811.

MINUET.—This dance, said to have been invented in the province of Poitou, in France, was introduced from that country into England in the 18th century.

MIRANDOLA (Italy).—This small town, in Modena, was captured by the papal forces, after a short siege, Jan. 20, 1611.

MIRRORS. (See Looking-Glasses.)

MIRZAFORO (Hindostan).—Part of this district, belonging to Oude, was ceded to the East-India Company by a treaty signed May 21, 1775 A.D., and the remainder by another treaty of Nov. 15, 1801.

MISENUM (Bay of Naples).—This promontory, said to have derived its name from Missenus, the trumpeter of Aeneas, became a favourite site for the villas of the wealthy Romans towards the close of the republic. It was made a station for the Roman fleet b.c. 27. Pliny the Elder was stationed here A.D. 79, when he was induced to visit the eruption of Mount Vesuvius, in which he perished. Romulus Augustus, the last emperor of the West, was confined here, in the villa of Lucullus, A.D. 476. It was taken by the Saracens in 946, and destroyed by the volcanic eruption in 1538.

MISSILE (Lord of).—This officer was, in former times, appointed with great ceremony to preside over the Christmas festivities. Stow says:—"There was in the king's house, wheresoever he was lodged, a lord of misrule, or master of merry disports, and the like had ye in the house of every nobleman of honour or good worship, were he spiritual or temporal; amongst the which the mayor of London, and either of the sheriff, had their several lords of misrule, ever contending, without quarrel or offence, who should make the rarest pastimes to delight the beholders. These lords, beginning their rule on All-hallow-eve, continued the same till the morrow after the feast of Purification, commonly called Candlemas Day." The lord of misrule went under different titles in other countries (see ABBOT of FOOLS, &c.), and is not heard of in England after 1640.

MISSALS. (See MASS-BOOK.)

MISSIONARY AND MISSION.—In accordance with the command given by our Saviour to his disciples when he appeared to them after the resurrection (Mark xvi. 15), "Go ye into all the world, and preach the Gospel to every creature," Christian missionaries were sent forth during the 1st century. St. Paul, and John the beloved disciple, who flourished about A.D. 52, were amongst the first Christian missionaries. In the 2nd century Eusebius declares that the followers of the apostles went forth into distant lands to preach the Gospel; and in the 3rd and 4th centuries missions spread rapidly. St. Patrick visited Ireland in the
5th century; and Gregory the Great sent a number of Benedictine monks as missionaries to Britain in the 6th century. Marco Polo introduced Christian missionaries into China in 1275. The Portuguese in 1490 and subsequent years sent missionaries to Abyssinia; and on the discovery of America, missions were sent to all the different European settlements. During the 16th century the Roman church made great exertions for the propagation of the Roman Catholic religion; and in 1549 Xavier sailed to Japan, and founded a mission there. Other Roman Catholic missionaries penetrated into Chili and Peru about 1580. The Dutch, in 1621, sent missions to Amboyna. In 1622 Gregory XV. established a congregation of cardinals, for the purpose of forwarding the missionary work; and in 1627, Urban VIII. added a college in which missionaries were taught the languages of the countries to which they were to be sent.

**MISSIONARY SOCIETIES.**—The first missionary society established in London was made a corporation, under the name of "The President and Society for the Propagation of the Gospel in New England, and the parts adjacent in North America," by an ordinance of parliament, passed July 27, 1649. The following lists contain the date of the establishment of the principal missionary societies in England and on the continent.

### ENGLISH MISSIONARY SOCIETIES.

### MIS.

**Swedish Missionary Society (Stockholm)** | 1835 |
| **Swedish Missionary Society (Lund)** | 1846 |
| **United Brethren** | 1732 |

**MISSISSIPPI (North America).**—De Soto was the first who traversed this region, A.D. 1542; and La Salle visited it in 1681. The French made the first settlement in 1698, under Iberville, on Ship Island; and in 1700 some Jesuit missionaries were found here. The northern portion of Mississippi was ceded to England by France in 1763. With Alabama it was formed into a territory in 1800. A separation ensued in 1817, when Mississippi was admitted to the Union as an independent state.

**MISSOLONGHI, or MESOLONGHI (Greece).**—This small town became celebrated for the siege it sustained against the Turks during the war of Greek independence. The Greeks having carried it by storm Nov. 1, 1821, the Turks laid siege to it in Oct. 1822. Their assault, six times renewed, was repulsed, Jan. 5, 1823, and they were compelled to retreat Jan. 27. The Turkish army returned April 17, 1825, and commenced the bombardment May 7. They received a considerable reinforcement July 10; but after making the most extraordinary efforts, were compelled to suspend operations in October. The blockade was renewed in November, and another bombardment commenced Jan. 25, 1826. The garrison, driven to extremities, boldly cut their way through the besieging forces, and the town was captured April 22. Lord Byron died here April 19, 1824. The Greeks wrested it from the Turks in 1829, and it was included in the new kingdom of Greece.

**MISSOURI (North America).**—The French worked the Missouri lead-mines A.D. 1720; but no permanent settlement was made before 1755, when St. Genevieve was founded. The region now called Missouri was formerly known as Upper Louisiana, and its cession to the United States in 1803, was divided into two governments, i.e., Louisiana and Louisiana territory. In 1812 the latter name was changed into Missouri. Application was made in 1817 for its admission as a state into the Federal union. This met with serious opposition on account of its slaves, and it was not admitted until 1821, and then only on the condition that slavery should be recognized in Missouri, but in no other state north of latitude 31° 30'.

**MISSOURI COMPROMISE, drawn up by Mr. Clay, enacted that slavery should not exist, except in Missouri, north of latitude 36° 30', and passed the United States congress in February, 1820. This compromise, after having existed above thirty years, was repealed in 1854, when the inhabitants of every state were left free to regulate their own domestic institutions, subject only to the constitution of the United States.**

**MISSOURI RIVER (North America)** was explored to its sources by Lewis and Clarke in 1804–6.
MISTLETOE, or MISLETOE.—This parasitical plant, which grows upon the oak and other trees, was regarded with peculiar veneration by the Druids (q.v.). Mistletoe was found growing upon an oak at Ledbury, in Herefordshire, A.D. 1829; and a specimen on an oak at Ledbury was exhibited at the Horticultural Society in London April 4, 1837. This established the fact, long doubted, that the mistletoe grows upon the oak as well as upon other trees.

Mithridate, a preparation in the form of an electuary, supposed to be the oldest compound known, is said to have been invented by Democrates, physician to Mithridates VI., king of Pontus, B.C. 70; whence its name.

Mithridatic War.—Mithridates VI., king of Pontus, having defeated the Roman armies in Asia, commanded all the Romans to leave the country; but before they could do so 80,000 of them were massacred by the inhabitants, B.C. 88. This led to the struggle known in history as the first Mithridatic war, which lasted four years. After many battles, Mithridates VI. was obliged to sue for peace, B.C. 84. The second Mithridatic war broke out B.C. 75. The Romans, under Lucullus, defeated Mithridates VI. at Cabira, B.C. 71, and again in B.C. 69; but in consequence of a mutiny among his troops, Lucullus was deprived of the fruits of his victories. Mithridates VI. collected another army, but the war was soon brought to a close. Mithridates VI. was finally defeated by the Romans, under Pompey, on the banks of the Euphrates, B.C. 66, and, unwilling to fall into the hands of the enemy, he put an end to his life, B.C. 63.

Mitre, the episcopal crown, or head-dress, is supposed to have been first worn by bishops about the 7th century. Cardinals wore mitres until 1245, at the council of Lyons, where they were exchanged for hats. The English bishops wore mitres from the time of the Saxons till the Reformation.

Mittau (Russia), the capital of the province of Courland, an ancient town, was captured by Charles XII. of Sweden, A.D. 1701. Peter the Great seized the town Sept. 14, 1705, and the citadel surrendered on the same day. The castle was erected in 1739. The town was nearly destroyed by fire in 1788.

Mitylene (Sea-fight).—During the war of independence, the Turkish and Greek squadrons fought a battle off Mitylene, Oct. 7, 1824, on which occasion the Turks were defeated and their fleet was destroyed.

Mitylene, or Lesbos (Egean Sea).—Lesbos is said to have been peopled by the Pelasgians, who are identified by the Ionians and the Æolians. Lesbos was made a Roman province about B.C. 48; and during the Middle Ages received the name of Mitylene, from its chief city (q.v.). Mohammed II. conquered it and annexed it to the Turkish empire, A.D. 1462.

Mitylene, or Mitylene, the chief town of the island of Mitylene, or Lesbos, is first mentioned in history during the struggle between the Æolians and the Athenians, for the possession of Sigeum, B.C. 606. It afterwards played an important part. The Venetians captured it A.D. 1185, and the Turks in 1236.

Mnemonic, or Mnemotechny, (the science of artificial memory, was introduced by Simonides the younger, B.C. 477. Richard Grey, rector of Hinton in Northamptonshire, wrote a celebrated work on the subject, entitled "Memoria Technica, or a New Mode of Artificial Memory." It was published in 1730.

Moabites.—The descendants of Moab, the offspring of Lot's incestuous connexion with his eldest daughter (Gen. xix. 37), B.C. 1887, dwelt in the land of Ar, from which they expelled the Emims, a race of giants (Deut. ii. 9—11). The Israelites occupied part of the country, and Edgon, king of the country, oppressed them for the space of eighteen years (Judges iii. 12, &c.) B.C. 1343. David subdued the Moabites (2 Sam. viii. 1) B.C. 1040.

Mobile (North America).—A town with this name was founded at the mouth of Dog river, by Bienville, A.D. 1702. It was almost destroyed by inundations, and the present town, at the mouth of Mobile river, was founded in 1711. Mobile was ceded to England by the French at the peace of Paris, Feb. 10, 1763. The Spaniards captured it in 1780, and it was ceded by them to the United States in 1813.

Mockern (Battle).—Blucher, at the head of the Prussians, with some Russian and German allies, defeated the French commanded by Ney at this place, near Leipsic, Oct. 16, 1813. This was one of the combats in the great battle of Leipsic.

Models.—The Greeks attributed the invention of the art of modelling to a potter of Sicyon, named Dibutades. They relate that his daughter, on the eve of parting from her lover at Corinth, remarked the shadow of his profile projected on a wall, and traced its outline, thereby producing the first attempt at portrait-painting. Her father conceived the idea of filling in the design with clay, and submitting the result to the action of his furnace, and thus the first model in relief was obtained. This production is said to have been destroyed at Corinth when the city was sacked by Mummius, B.C. 146. The Roman sculptor Arcesilaus, who flourished B.C. 65, was celebrated for the excellence of his models from the human figure.

Modena (Duchy).—The territory constituting the duchy of Modena was, about the end of the 9th century, in the possession of the House of Este; Count Henry having made himself master of it in 1115. Modena acquired a certain independence in 1125, and after many years of internal struggles, Obizzo II. of Este became lord of Modena in 1289. After undergoing various revolutions, it fell under the rule of Obizzo III. in 1336. Borso received the title of duke of Modena and Reggio in 1452. Leo X.
purchased the duchy from the emperor Maximilian I., into whose hands it had fallen by the time previous, for 40,000 ducats, in 1514, and Alfonso I. delivered it from the papal yoke in 1527. The French annexed Modena to the Cisalpine republic in 1796, and in 1805 it formed part of the kingdom of Italy. The duchy was given to Francis II. of Austria in 1815. On the breaking out of the war between France and Sardinia against Austria, Francis V., who had succeeded to the duchy on the death of his father, Jan 21, 1849, took refuge at Mantua, June 14, 1859. The treaty of Villa-Franca, July 11, 1859, provided for the return of the duke; but this provision was never fulfilled, and the duchy of Modena was annexed to the new kingdom of Italy.

**MODENA (Italy)**, anciently called Mutina, or Mutinium, a city of Etruscan origin, was in the possession of Rome b.c. 218. The Romans established a colony here b.c. 183. The Ligurians seized the town b.c. 177, but were soon expelled. During the civil war it sustained a siege of four months against the troops of Marc Antony, b.c. 43. Modena was besieged and taken by Constantine I. a.d. 312, and was laid waste by Attila in 452. It fell into a state of total decay after the conquest of the Longobards, but recovered much of its former importance under the Countess Matilda, a.d. 1076—1115. The Hungarian partisans of Pope Innocent VI. plundered the town in 1369; and it was seized by Pope Julius II. in 1510. Alfonso I. made himself master of it a.d. 1527. An engagement between the French and Austrians, in which the forces of the latter were put to rout, took place under its walls, June 12, 1799. The cathedral, with a marble tower, was commenced in 1099. The palace, commenced in the 17th century, contains a fine library of 90,000 volumes and 3,000 manuscripts, founded by Francis II. about the end of the 17th century.

**MODON (Greece)**, the ancient Methone (q.v.), was captured by the Venetians a.d. 1124, and was annexed by them in 1204. The Turks took Modon in August, 1500; the Venetians recovered possession in 1668; and it again fell into the hands of the Turks in 1715. Ibrahim Pasha landed here Feb. 24, 1825, and defeated the Greek army in the neighbourhood April 19. The Greeks, however, avenged themselves by destroying, by means of fire-ships, a large portion of the Egyptian fleet anchored under the walls of Modon, May 13. The Turks surrendered to a combined English and French force in September, 1828. The French garrison re-embarked in July, 1833, and Modon forms part of the modern kingdom of Greece.

**MOESIA (Europe)**, corresponding to the modern Bulgaria and Servia, became the seat of a Gallic tribe r.c. 277. The Romans penetrated into Moesia r.c. 75, and it was subjugated by them about r.c. 29. The Goths invaded the country a.d. 250, and defeated the Romans at an obscure town, Forum Trebonii, in 251, on which occasion the emperor Valentinian and a large portion of his army perished in a morass. "The Visigoths overran Moesia in the 4th century. The people, who received the name of Bulgarians, were, according to the best authorities, of Turkish origin, being in fact the remnant of the Huns, who, after the death of Attila (453), retired beyond the Euxine. They invaded the Eastern empire in 559, and were repulsed by Belisarius. In the 7th century they advanced into Moesia, and founded the first Bulgarian kingdom, which lasted from 640 to 1019, when it was subjected to the Greek empire.

**MOGADOR (Morocco)** was founded a.d. 1706. It was bombarded by the French in 1844.

**MOHACZ (Battles).—Soliman II., at the head of a Turkish army, defeated the Hungarians near the town of Mohacz, in Hungary, Aug. 29, 1526. Louis II. was killed, and 30,000 Christians fell in the battle. The duke of Lorraine and the Imperialists gained a victory over the Turks at the same place in 1687.

**MOHAMMEDANISM.**—Mohammed was born at Mecca, a.d. 569, and began to preach there in 609. In 613 his views were opposed by the Koreishites, who, in 622, compelled him to quit Mecca and seek an asylum at Medina. This flight to Medina fixes the Moslem era of the Hegira (q.v.). Being made the prince of Medina, he was enabled to declare war against such as refused to credit his statements, and in the battles of Beder and Ohud in 623, and of the Nations or the Ditch in 625, he defeated his Koreishite opponents. In 629 he recaptured Mecca, where he was installed as prince and prophet, and in 630 he completed the conquest of Arabia. He died at Medina, June 7, 632. The doctrines of Mohammed include a belief in one God and a future state, and permit the practice of polygamy. The sacred book is the Koran (q.v.). Comrooder Tyabjee, a Hindoo Mohammedan, was admitted in London as an attorney, Nov. 25, 1838.

**MOHILEF, or MOHLOW (Russia).—This ancient town, taken by Charles XII. of Sweden in July, 1709 a.d., was recovered by Peter the Great in 1709. The French defeated the Russians at this town, July 23, 1812.

**MOHOCKS.**—Under the name of Mohocks, Mohawks, or Hawkabites, some villains went about London, at night, in 1712, assaulting persons whom they met. They frequently cut off the ears of their victims, slit their noses, and committed other cruelties. A proclamation offering a reward of £100 for any person who should discover one of these offenders was published March 17, 1712.

**MOLD (Wales).—A castle erected on Bailey Hill, near this town, was during the 12th and 13th centuries frequently besieged by the contending English and Welsh armies. Owen Gwynneth took it a.d. 1145. The
English captured it soon after, and it was retaken by the Welsh in 1201.

Moldavia (Europe), one of the Danubian principalities, was subjected to great devastations by the various hordes who invaded the Byzantine empire. About the middle of the 13th century it was re-colonized by descendants of Roman settlers, under a chief called Bogdan. Hence the country was called by the Turks Bogdania. In 1536 the country submitted to the protection of the Turks. The voyvode was to be elected by the principal clergy and nobles, whose choice was to be confirmed by the sultan. He was not, however, to interfere in their local affairs, nor were the Turks to settle in Moldavia. In 1711 the Turks abolished the privilege enjoyed by the people of electing the voyvodes. Peter the Great made an unsuccessful attempt, in 1710, to obtain possession of Moldavia. In 1739 the Russians occupied Moldavia, but evacuated it at the peace of Belgrade. By the 10th article of the treaty of Koutchouk-Kainardji, July 10, 1774, Russia obtained the right of interceding with the Porte in favour of the principalities. By the treaty of Bucharest, May 28, 1812, the eastern portion of Moldavia was ceded to Russia. An inscription broke out in Moldavia, March 6, 1821; and the Turks withdrew Nov. 23, 1824. A Russian general administered the provinces from 1832 to 1834, when Michel Sturdza was elected hospodar of Moldavia, and governed till April, 1848. Upon his resignation in June, 1849, Gregory Ghika, a native Boyard, was elected hospodar. The Russians occupied Moldavia in 1853; but, on the approach of the allied forces, retired in 1854. The Austrians held the country from that year until 1856. By the 22nd article of the treaty of Paris, March 30, 1856, the principalities of Wallachia (q. v.) and Moldavia, under the suzerainty of the Porte, were guaranteed in all their ancient immunities by the great powers of Europe.

Molinists.—This sect was founded by Louis Molina, born at Cuenca, in New Castle, A.D. 1535. He joined the society of Jesus, and published his "De Concordia Gratiae et Liberi Arbitrii," at Lisbon, in 1588, in which he endeavoured to show that the doctrines of predestination and grace are consistent with free will. The Dominicans assailed him, and Clement VIII., who attempted in vain to put a stop to the controversy in 1584, referred it to a council in 1585. It met in 1582 against the Molinists. The dispute was still raging at the death of Molina, which took place in 1600. His antagonists were called Thomists, because they upheld the opinions of Thomas Aquinas. Paul V. in 1609 forbade both the Jesuits and the Dominicans from reviving the controversy.

Moluccas, or Spice Islands (Asiatic Archipelago).—This group was discovered by the Portuguese A.D. 1511. The Spaniards, under Magelhaens, seized them in 1519, and the Portuguese returned in 1521.

Sir Francis Drake landed in the Moluccas in 1579, and the Dutch made a permanent settlement in 1596. These islands, taken by the British in 1796, were restored to the Dutch, by the treaty of Amiens, March 25, 1802. They were again occupied by the British in 1810, but were finally restored to the Dutch by the treaty of Paris, May 14, 1814.

Molwitz (Battle).—The Prussians defeated the Austrian army in the plain of Molwitz, in Silesia, April 10, 1741. At the commencement of the battle the Austrians were victorious, and Frederick II. was carried along by his retreating cavalry to Oppeln, where he took refuge in a windmill. This circumstance gave rise to the remark that in this battle Frederick had covered himself with glory and with flour. A writer says: "On this occasion he rode a horse called 'Tail Grey,' which carried him sixty-five English miles without food or resting. Ever after the battle he was called "Molwitz Grey," and survived to the year 1760."

Molybedenum.—This metal was discovered about A.D. 1782, by Hiehm.

Monbs, or Monmatica (Africa).—Vasco de Gama visited this port A.D. 1498. It was captured and burned by Almeida in 1505, and having been rebuilt, was again destroyed by the Portuguese in 1558. The Portuguese held it until 1720, when it fell under the sway of the Imam of Muscat. The inhabitants obtained their independence in 1824. The castle was built by the Portuguese in 1635.

Monaco. (See Anglesey.)

Monaco (Italy).—This small principality, the ancient Portus Herculis Moenaci, or Monaci Portus, founded by Greeks of Massilia, passed into the hands of the Genoese house of Grimaldi, about A.D. 968, and was placed under the protection of France in 1814. The original Grimaldi having become extinct in 1731, the state passed, by marriage, to the house of Matignon, which assumed the name of the original family. In 1815 Monaco passed under the protection of the king of Sardinia, who seized the communes of Mentone and Rochebrune, and incorporated them with his own territories in 1849. They were ceded to France by a treaty concluded Feb. 2, 1861.

Monaghan (Ireland).—Henry II. bestowed this part of Ireland upon De Courcy A.D. 1177. The native chieftains carried on a struggle against the English with little occasion until the reign of Elizabeth. Monaghan was made a shire in 1568. Its chief town, of the same name, was called in ancient times Muinechan, i.e., the town of monks.

Monastery. (See Abbey.)

Moncon (Treaty).—The Valételine was secured to the Grisons by a treaty concluded between France and Spain, at Moncon, A.D. 1626.

Moncontour (Battle).—The Huguenots were defeated by the Roman Catholic army near this place, in Poitou, A.D. 1600. Coligny,
MONDOVI (Italy).—Here Napoleon Bonaparte defeated the Sardinian army, commanded by Colli, April 22, 1796. The Piedmontese took Mondovi in May, 1799; but it was recaptured by the French Nov. 2 in the same year.

MOONEY.—The earliest mention of money as a medium of exchange, is the purchase of the cave of Machpelah from the sons of Ephron the Hittite, by Abraham, for 40 shekels of silver (Gen. xxiii. 19), b.c. 1556, when the money was not doubt uncoined, and regulated by weight. The invention of coined money is attributed to the Lydians. (See Coin.) The name is derived from the temple of Juno Moneta, that served the Romans as the mint for their silver coinage, which commenced b.c. 269. The term sterling was first applied to money about A.D. 1216. The importation of base foreign money into this kingdom was prohibited by the statute De falsa moneta, 27 Edw. I. (1299). Various materials have been used for money. (See Copper Money, Gold Coinage, &c.) In 1360 leather was used in France. Tin was coined in England in 1634.

MONGOLS, or MOGHULS.—It is said that nearly all the wandering tribes of Asiatic barbarians that desolated Europe from the 4th to the 12th century, were of Mongolian origin. Under their leader Zenghis Khan (A.D. 1206-1227) they ravaged Asia, invading China in 1210, and Persia in 1218. They invaded Russia in 1235, reached Siberia in 1242, and completed the conquest of the empire of the caliphs in 1258. The death of Cazan, May 31, 1304, put an end to the Mongol supremacy in Persia; but under the great Tamerlane (1370-1400) they reconquered that country, and subdued Hindostan and other parts of Asia. His successors in India took the name of the Great Mogul, which was first assumed by Baber in 1525.

MONMOUTH (Monmouthshire), the ancient Monwy, so named from its situation on the rivers Mon and Wye, was a Roman station. The Saxons erected a fortress, which, after the Conquest, was bestowed upon William Fitz-Baderon, whose sons assumed the surname of Monmouth. In 1240 two hospitals were founded by John de Monmouth, and in 1257 John, lord of Monmouth, rebuilt the castle on a larger scale. It suffered so severely from siege by the earl of Leicester in 1265, that it had to be rebuilt. It then passed into the hands of John of Gaunt. Henry V. was born here Aug. 9, 1385. The present parish church occupies the site of an alien priory for black monks of the Benedictine order, founded in the reign of Henry I. Monmouth was incorporated in 1590, and had its charter renewed in 1557 by Queen Mary; in 1606 by James I.; and in 1660 by Charles II.

MONMOUTHSHIRE (England) was occupied by the Sinures, who were expelled by the Romans, A.D. 78. They held the county until 408. It was annexed to the Oxford circuit in the reign of Charles II. and remained partly under the jurisdiction of the Lords Marchers' court, until its abolition in 1859.

MONMOUTH'S REBELLION.—The duke of Monmouth, a natural son of Charles II., was born at Rotterdam in 1649, and educated in France. In 1683 he was banished from England for his share in the Rye-House Plot. He landed at Lyme, in Dorsetshire, June 11, 1685, was proclaimed king at Taunton, June 20, and attacked the king's army at Sedgemoor (q.v.), near Bridgewater, July 6. After fighting three hours, the rebels gave way, having sustained a loss of 1,500 men. Monmouth, who was discovered in a ditch covered with fern, July 8, was tried and beheaded on Tower Hill, July 15, 1685.

MONOPHYSITES.—This sect of heretics originated in the 5th century, and maintained that the divine and human natures of Christ were so united as to constitute but one nature. They were the followers of Eutyches, and branched into several sects. In Egypt and the East they are called Jacobites (q.v.).

MONOPOLY.—Justianian I. made the sale of silk a monopoly, A.D. 532, and the privilege, which, as Gibbon remarks, checked the fair competition of industry, prevailed extensively in the Roman empire. In 1597 and 1601, the Commons complained of the monopoly, and in the last-mentioned year Elizabeth returned a message, promising to abolish them. Sir Giles Mompesson and Sir Francis Mitchell were degraded from knighthood, fined, imprisoned, and eventually banished, for abusing the power granted to them of a monopoly for licensing alehouses and inspecting inns, and manufacturing gold and silver thread, in 1621. Monopolies were declared contrary to law, and all such grants void, by 21 James I. c. 3 (1624).

MONOTHELiTES.—This heretical sect was founded by the emperor Heraclius, who endeavoured to reconcile the Monophysics to the Catholic church, A.D. 630, by publishing an edict asserting the existence of a human and divine nature, but only of one will, in Christ. The heresy was condemned by several councils.

MONROE DOCTRINE.—James Monroe, president of the United States from 1817 to 1824, announced the determination of his government to resist any European interference in the affairs of the independent governments of South America. This resolution has in consequence been termed the Monroe Doctrine.

MONROVIA (Africa), the capital of the Liberian republic, was founded A.D. 1821.

MONS (Belgium).—About A.D. 653 a hermitage, and the church, dedicated to St. Peter, was built on the site now occupied by this town. Alberic, count of Hainault, made it a place of residence, and in 804 Charlemagne made it the capital of Hainault.

571
About the end of the 10th century it sustained a siege against Hugh Capet. In 1290 the city was enlarged; but in 1496 it fell into the hands of the duke of Burgundy. Under Charles V. Mont was, of course, the highest degree of prosperity, which was cut short by the exactions of the duke of Alva in 1569. Mons was invested by the French, under Marshal Luxembourg, in 1678, and again in 1691, under Louis XIV., when the walls were destroyed. It remained in their hands till the peace of Ryswick, Oct. 30, 1697. The French took it again in 1701, but were driven out by Prince Eugene and the Duke of Marlborough, Oct. 20, 1709. By the treaty of Utrecht, April 11, 1713, Mons was restored to Austria. The French captured it, after a siege of sixteen days, June 27, 1746, and again Nov. 7, 1792. It was annexed to France in 1794, and was restored to the Netherlands in 1814.

Monselice (Italy).—This town was captured by an allied French and imperial army a.d. 1510, after an obstinate resistance. Montenegrin, or Cataphrygians, the followers of Montanus, a Phrygian, who lived about a.d. 171. He declared himself to be a prophet of God, sent to complete the Christian scheme. Terultuian joined the sect a.d. 204. They were distinguished for their austerity, and existed in the time of Augustine and Jerome. The latter wrote again against their doctrines.

Montauban (France).—Count Alfonso of Toulouse founded this town a.d. 1144. The Huguenots fortified it, and the Roman Catholic forces, led by Morice, failed in an attempt to capture it in 1586. It resisted another siege in 1621, but was taken in 1628, and its fortifications were soon after destroyed. An insurrection occurred here in 1790.

Montbéliard (France).—This town, which at one time formed part of the kingdom of Burgundy, passed to the Württemberg family a.d. 1385. The French, under Marshal Luxembourg, took it in 1647, and Louis XIV. having captured it in 1674, destroyed the fortifications. The French took it in 1723, and with the kingdom of Württemberg it was annexed to France in 1796.

Mont Blanc, the highest mountain in Europe, was first ascended by Horace de Saussure, a Genevese, Aug. 3, 1787. The second ascent was not made until Aug. 18, 1822, by Mr. F. Clissold. Since that time various ascents have been made.

Mont de Piété was established as a charitable institution in Italy in the 16th century. Paul III. (a.d. 1534-1549) sanctioned one at Rome, and these establishments were afterwards introduced into other countries of Europe. The Mont de Piété at Padua, founded in 1491, is the oldest on record. The French plundered these establishments during their occupation of Italy, in 1796 and 1797.

Montebello (Battles).—The Austrians were defeated at this village, in Piedmont, by the French under Lannes, June 9, 1800. The French general took the title of duke of MontebeUo from this victory. The French and Sardinians defeated the Austrians here, after a struggle which lasted five hours, May 20, 1839.

Monte Cassino (Italy).—Benedict founded his celebrated monastery on the site of a temple to Apollo, a.d. 529. The Saracens destroyed it in 883, but it was restored, and greatly extended in 1065. Markwald besieged it for eight days in 1198, when it was delivered, according to monkish legends, by a miracle. Milman terms it "that great model republie, which gave its laws to almost the whole of Western Monasticism."

Monte Leone (Italy).—A colony from Locri Epizephyrii, established a town here, which was taken by Dionysius of Syracuse, B.C. 389. The Carthaginians restored the inhabitants B.C. 379, but the town was taken by the Brutians, and afterwards by the Romans, who planted a colony B.C. 192.

Montelupo (Battle).—Francis Sforza defeated the forces of his rival, Nicholas Piccinino, in this engagement, Nov. 8, 1443.

Montem. (See Eton Montem.)

Montenegro, or Zernagora (Turkey), formed part of the ancient Illyricum, and was conquered by the Turks a.d. 1526. The Montenegrins rebelled in 1700, massacred all the Turks, and declared themselves independent. Some Montenegrin tribes joined Russia against Turkey in 1712. The temporal and spiritual authority previously vested in the Vladika was separated by Prince Daniel in 1851. The Turks invaded Montenegro in 1853, and, after gaining a few barren victories, retired (Montemont).—Napoleon Bonaparte defeated the Austrians at this place, April 12, 1796. Soult was driven from his position at Montenotte by the Imperialists in March, 1800. Montenotte, with the surrounding district, was made one of the three departments into which the Ligurian republic was divided on its annexation to France in June, 1805.

Monteleone (Battle).—Francis and James Piccinino were defeated at this place, in Italy, by Sforza, Aug. 19, 1444, when Francis, the elder brother, was made prisoner.

Montevarchi (Battle).—Napoleon I. defeated the allied Russian and German army at this town, seated at the confines of the Yonne and the Seine, Feb. 18, 1814. The French took possession of the town, which had been occupied by their opponents, Feb. 6.

Monterrey (Battle).—This town, the capital of New Leon, in Mexico, was taken by the American army, after an assault that lasted three days, Sept. 22, 1846.
Monte Video (South America), called also San Felipe de Monte Video, the capital of Uruguay, was built by a colony from Buenos Ayres in 1723. It was taken Feb. 3, 1807, by the English, who withdrew July 7. When Monte Video took off the Spanish yoke, the Brazilians took possession of the town; but it was retaken, after a long siege, in 1814. The Brazilians recaptured it in 1821. By the treaty of 1828 it was made the capital of a republic of the same name.

Monteferrat (North Italy).—The ancient marquisate of Monteferrat was created by Otho the Great A.D. 967, in favour of Alderan. In 1187 the titles of marquis of Monteferrat and of Tyre were united in the person of Conrad, who was assassinated April 29, 1192; and by the marriage of Yolande, daughter of William V., with the Greek emperor Andronicus Palaeologus in 1264, the succession to the marquisate became hereditary in their line. In 1414 the emperor Sigismund, when he ascended the throne of Bohemia, assumed the title of "Imperial Vicar in Italy." On the extinction of the male line in 1533, the succession was contested by Frederick II., Gonzaga, marquis of Mantua, Louis II., marquis of Saluces, and Charles III., duke of Savoy. Charles V. decided the case in favour of the marquis of Mantua, Jan. 5, 1536. In 1574 it was erected into a duchy; and in 1613 it was taken by Charles Emmanuel, duke of Savoy, who was soon compelled to relinquish his conquest. His son, Victor Amadeus, obtained the cession of part of the country in 1631; and in 1708 the whole of Monteferrat was annexed to his dominions. In 1797 it was incorporated with the Cisalpine republic; in 1805 it formed part of the kingdom of Italy; and in 1815 it was given to the king of Sardinia.

Montgomery (Alabama) was founded A.D. 1817.

Montgomery (Wales).—One Baldwin built a castle here A.D. 1067. It was taken by Roger Montgomery, earl of Shrewsbury, in 1090, and from him received the name it now bears. The Welsh took the castle and put all the garrison to the sword in 1095.

Montiel (Battle), was fought March 23, 1369, at Montiel, in Spain, between Peter the Cruel, king of Castile, and his brother, Henry of Trastamare, aided by French knights. Peter was killed, and his army totally defeated in this battle.

Montiglio (Battle).—Boniface II. of Monteferrat defeated the people of Asti at this place, in Piedmont, June 19, 1191.

Montlhery (Battle).—Louis XI., during the civil war excited by the League for the Public Good, encountered the rebellious nobles at this place, July 16, 1465. Victory was claimed for both armies. This is the last occasion in which the oriflamme was displayed in the French army.

Montmell (France).—The kings of France and England, Louis VII. and Henry II., with a large assembly of retainers, met at this town, Jan. 6, 1169, where Becket was to throw himself on the mercy of Henry II. This, however, he refused to do, and the meeting broke up in confession. The French, under Napoleon I., defeated the allied Prussians and Russians here, Feb. 11, 1814.

Montpellier (France).—This town was built in the 8th century, to replace the episcopal town of Mauguio, destroyed by Charles Martel. It passed to the house of Aragon in 1202, and afterwards to the kings of Majorca, from whom it was purchased by Philip VI. of France, in 1350. In 1371 it was conferred on Charles le Mauvais, king of Navarre, in exchange for certain lordships in France, but in 1375 it was re-united to France. The bishopric of Mauguio was transferred here in 1353. Montpellier came into the hands of the Huguenots in the reign of Henry III., and after enduring a long siege, it surrendered in 1622 to Louis XIII., who issued an edict for the restoration of peace between the Roman Catholics and the Huguenots. The Foundling Hospital was built in 1180, and the Jardin des Plantes, the first botanical garden established in France, in 1558. — Councils were held at Montpellier, May 17, 1162; in Dec. 1195; Jan. 8, 1215; Aug. 21, 1224; and Sept. 6, 1258.

Montreal (Canada), founded by French settlers A.D. 1642, and called Ville Marie, was taken by the English Sept. 8, 1760. It was seized by the Americans Nov. 12, 1775, but the English regained possession, June 15, 1778. It suffered severely from cholera in July, 1832. A serious collision between the civilians and the military in garrison took place Sept. 29, 1833. Alarming riots broke out, in which the partisans of Papineau ranged themselves against the supporters of the government, Nov. 6, 1837; and a recurrence of the tumults was experienced when the royal assent was given to the Rebellion Losses Indemnity Bill. The houses of parliament on this occasion were burnt to the ground, and the library with the archives of Canada was destroyed April 25, 1849. The Hôtel Dieu was founded about the time when the colony was settled, the patients being tended by the nuns of St. Joseph de la Plèche; the general hospital, attended by the Grey nuns, was established by Madame D'Youville in 1747. Montreal College was founded by the priests of St. Sulpice about A.D. 1760. McGill College was founded by a merchant of that name, who died in 1813. The Roman Catholic parish church, erected at a cost of £60,000, with a fine chime of bells, one of which weighs 25,000 lb., was opened in 1829.

Montreuil-sur-Mer (France).—This town received a charter A.D. 1189. It was ceded to England by the treaty of Bretigny, May 8, 1360, but was soon after restored to France. Charles V. took it in 1537, and it again surrendered to the Spaniards in 1544. Napoleon I. formed a camp here for the contemplated invasion of England in 1804 and 1805.

Montrose (Scotland) received its first
charter from David I., early in the 12th century. Here John Balliol resigned the crown and sceptre of Scotland into the hands of Edward I., July 10, 1296; from this port Sir James Douglas, bearing the heart of King Robert Bruce, embarked for the Holy Land a.D. 1380; and the Pretender, with a few of his followers, sailed hence on their return to France, Feb. 4, 1716.

**Monsieur Club.—** Established during the French revolution, a.D. 1789, and so called from a place near Paris, where its meetings were held. Mirabeau, Sieyes, Latouche, and the Chevalier Lacos were members of this association. They conspired against the throne, and at one time favoured a project of supplanting the elder Bourbons by the Orleans branch of the family.

**Montserrat (Spain), a fortress in Catalonia, composed of the ancient convent of our Lady of Montserrat, was stormed by Suchet a.D. 1811. The French were speedily compelled to retire, and the fortress, having been taken and retaken, was destroyed in July, 1812.

**Montserrat (West Indies).—** This island was discovered by Christopher Columbus, a.D. 1493. A settlement was formed by some Irish Catholics in 1633. The French captured it in 1664, and it was restored to England by the treaty of Breda, July 10, 1667. The colony obtained a constitution in 1689. It again fell a prey to the French in 1782, but was restored to England by the treaty of Versailles, Sept. 3, 1783.

**Monument (London) was erected on Fish-Street Hill to commemorate the great fire of 1666. Sir Christopher Wren was the architect, and the column, commenced in 1671, was completed in 1677. In consequence of numerous persons committing suicide, by precipitating themselves from the top, an iron fence was placed round the gallery in 1839.

**Moodkee (Battle).—** The Anglo-Indian army, under the command of Sir Hugh (afterwards Lord) Gough and Sir John Litlter, defeated the Sikhs at this small town, on the Sutlej, in Hindostan, Dec. 18, 1845. Seventeen guns were captured.

**Mooltan, or Mooltan (Hindostan), the capital of a province of the same name, in the Punjab, is supposed to be identical with Muzz, described a.D. 1582 as one of the most ancient cities of Hindostan. Runjeet Singh captured it in 1806, and again in 1818. He appointed Nawab Mull governor in 1821, and by him Mooltan was fortified and made the strongest city in that part of India. Moolraj, his eldest son, having succeeded, expressed a wish to resign the government of Mooltan, which had come under the sway of the British after the death of Runjeet Sing; whereupon Mr. Vans Agnew, a Bengal civilian, and Lieutenant Anderson, were sent with an escort of 1,400 Sikhs, to receive the fortress. These gentlemen were murdered by his orders April 19, 1845. This barbarous act roused the indignation of the British authorities, and after the battles of Kentyree, June 18, and Suddooam, July 1, in both of which Moolraj was defeated, Mooltan was invested by General Whish, Aug. 18, and was upon the point of falling into his hands, when the whole of the Sikh troops deserted and joined Moolraj, and Whish was compelled to raise the siege. It was resumed Dec. 27, under the command of Lord Gough, and Mooltan was carried by storm Jan. 2. 1849. Moolraj shut himself up in the citadel; but was obliged to surrender unconditionally Jan. 22.

**Moors (Treaty.)—** was concluded between France and England, Aug. 30, 1535. The integrity of the French kingdom was guaranteed against the emperor Charles V.

Moors.—The origin of the inhabitants of ancient Mauretania is unknown. They assisted the Vandals in their invasion of Africa, under Genseric, a.D. 429, and were defeated by the Roman forces of the eunuch Solomon in 535. In 543 they revolted against the Romans, and slew Solomon at the battle of Tibeste. For some years they opposed the domination of the Arabian Moslems, by whom they were finally subdued in 709. Yalley Ben Al introduced them into Spain, to assist him against his brother Alcaesin Ben Hamud, in 1019, and after a series of conquests they established their supremacy in the country in 1081. In 1063 Roger Guiscard defeated them in Sicily, and in 1070 they founded the city of Morocco (q.v.). The Moors in Spain revolted against their rulers in 1143, and were opposed by the united forces of all the Christian princes of the peninsula in 1193. In 1298 they established their kingdom of Granada (q.v.), which continued to flourish till 1492. The severity of Cardinal Ximenes de Cisneros in employing the Inquisition against them, produced an insurrection of the Moors of the Alpujarras, which lasted from 1500 to 1502, when they were compelled to become Christians, and from that time obtained the name of Moriscoes. In 1516 they founded the pirsatical states of Algiers and Tunis, in Africa. The emperor Charles V., at the instigation of Clement VII., ordered that all the Moors in Spain should be baptized before Dec. 8, 1525, or leave the country by Jan. 1, 1526. They offered 50,000 crowns for a respite of five years; but Charles ordered that those who were not baptized by Jan. 15, should forfeit their goods, and be sold as slaves. Many took refuge in the mountains of Valencia, but eventually submitted, and even purchased the privilege of retaining some of their customs for 80,000 ducats. In 1568 they rebelled against the government of Philip II. in Spain. Large numbers of them left that country in 1571, and in 1609 they were expelled by order of Philip III.

Moorsheadabad (Hindostan), also called Mukooosabad, the chief town of a district of the same name, which, at the commencement of the 13th century, was invaded by the Patan Musulmans, and finally subjugated by Akbar in 1584. In 1742 the Maharat-tas plundered the city of Moorsheadabad,
which was the capital of Bengal until 1757. Its ruler, Surajah Dowlah, was defeated in 1757 by Clive at Plassey, and Jaffier Khan declared naboob. The English deposed him in 1760, and raised Cosim Ali Khan in his stead; but he engaged in war against them, and was in turn deposed and Jaffier Khan reinstated. Moorshead was ceded to the East-India Company in 1765.

MOPESTIA (Cilicia).—The origin of this town is traced to the soothsayer Mopsus by some writers. The emperor Constantius built a bridge here across the river Pyramus. In the Middle Ages it was called Mamista, and is now known under the name of Messis or Mensis. A council was held here A.D. 550.

MORADABAD (Hindostan).—The province, with chief town of the same name, was ceded to the East-India Company by the sovereign of Oude, A.D. 1801.

MORAT, or MURTEM (Battle).—Charles the Bold of Burgundy was defeated by the Swiss at Morat or Murtem, in the canton of Freiburg, in Switzerland, June 22, 1476.

MORAVIA (Austria).—This province was inhabited by the Quadi until A.D. 407, when it was seized by the Huns, who retained it till its conquest by the Longobardi in 548. A kingdom of Great Moravia was subsequently formed, which received Christianity in 855. In 908 the kingdom was dissolved and divided between Germany, Hungary, and Bohemia; and in 1056 the whole was incorporated with Bohemia. It became a margraviate in 1086, and was annexed to the Austrian dominions in 1526. Moravia was the chief theatre of the war between the French and allied Austrian and Russian armies in 1805.

MORAVIANS, or UNITED BRETHREN.—The Bohemian Brethren dissented from the Calvinists (q. v.), a branch of the Hussites, A.D. 1433. They sent envoys to Luther in 1522, and, having been expelled from Bohemia in 1527, took refuge in Poland and at Armenwarden. Emperor Maximilian II. granted them toleration in 1564, and many of them congregated at Fulnek, in Moravia, from which they received the name of Moravians. Their settlements in Bohemia and Moravia were destroyed during the Thirty Years' War. Count Zinzendorf permitted them to settle at Herrnhut, on his estate of Bethelsdorf, in 1722. Several changes were at this time made in the constitution of the sect, and its followers received the name of the United Brethren. One of their principal objects is to send out missions to the heathen. They were first established in England about 1738.

MOREA (Greece).—Finlay (Greece and Trebizond, p. 29) states that "the Morea must have come into general use, as the name of the peninsula (the Peloponnesus), among the Greeks after the Latin conquest." This took place in 1205, when the country was formed into the principality of Achaia (q. v.). In 1262, Misithra and other fortresses were ceded to the Byzantines, who established a despotism in 1349. The following are the Byzantine despos of the Morea:—

A.D.
1349. Manuel Cantacuzenos.
1388. Theodore Paleologus I.
1497. Theodore Paleologus II.
1423. Constantine XI., emperor of Constantinople.
1439. Thomas.
1450. Demetrius.

MORELIA (Spain).—The French captured this ancient town Dec. 17, 1797. Cabrera having surprised it in 1833, it was twice assailed without success, and the siege was raised Aug. 18.

MORETON BAY. (See QUEENSLAND.)

MORGARTEN (Battle).—The Swiss defeated an Austrian army at this place, on the borders of Zug and Schwyts, Nov. 16, 1815.

MORICE, or MORRIS DANCE. —This dance is said to have been introduced by the Moors into Spain, whence it was brought into England by John of Gaunt, A.D. 1322. It was but little practised, however, until the reign of Henry VII., when it became a frequent entertainment at the May-games and weddings. The characteristic peculiarity of the morris was that bells were attached to the legs of the performers. Petrarch exhibited his skill as a morris dancer on the occasion of his coronation at Rome in 1341.

MORLAIAX (France).—This ancient town, at one period strongly fortified, was taken by the earl of Surrey A.D. 1322, and the fortifications were destroyed towards the end of the 16th century.

MORMONITES. (See LATTER-DAY SAINTS.)

MOROCCO (Africa).—This empire, the ancient Mauretania (q. v.), was formed by the union of several small kingdoms under the Arabs.

A.D.
829. The city of Fez is founded by Edris.
1030. The Almoravides invade Morocco.
1055. Abu Bekr assumes the title of sovereign of Morocco.
1097. The emperor of Morocco invades Spain, at the invasion of the Spanish Moors.
1121. Morocco is invaded by the Almohades.
1270. The province of Fez asserts its independence.
1278. The Merinides invade Morocco.
1413. English ships first trade to Morocco.
1415. The Portuguese invade Morocco, and take Ceuta.
1506. The Portuguese authority extends over a considerable portion of Morocco.
1516. The Sheriffs establish their supremacy, and establish the dynasty which still reigns in Morocco.
1578. Abu Sa'di, a Sasbanian, king of Portugal, perishes, with his whole army, in battle against the Moors, at Alcazar.
1635. An English company is formed for trading to Morocco.
1692. Tangiers is ceded to the British.
1774. The emperor of Morocco fails in an attempt to expel the Spaniards from his territories.
1815. The inhabitants rise in insurrection.

Morocco (Morocco).—This city, the chief town of the empire of the same name, was founded A.D. 1070, by Moorish adventurers from Spain. In 1121 it was besieged by the Almohades, who were compelled to retire; but in 1148 they again attacked the city, which surrendered to their leader Abdelmumin. In 1673 it was taken from Muley Achem by Muley Ismael. The plague carried off many of the inhabitants in 1678.

Morphine, or Morphia.—This alkaloid of opium, named after Morphus, on account of its effect as a narcotic, is mentioned by Ludwig, A.D. 1688. It was obtained from opium by Sertuenner, a German chemist, in 1803.

Montara (Italy).—Charlemagne defeated the Lombards near this town A.D. 774. Edgar Mortar, aged seven years, the son of Jewish parents residing at Bologna, was forcibly removed from his home by order of the Inquisition, June 23, 1588. The alleged reason for the abduction was that the boy had been secretly baptized by a maid-servant during a serious illness which he had suffered two years before.

Mortars.—The Chinese are said to have constructed guns to throw stones of twelve pounds 300 paces, as early as A.D. 757. When Algesiras was besieged by Alfonso XI., king of Castile, in 1343, the Moorish garrison threw against him "certain thunders" through long mortars. A mortar is still shown at Venice with its marble shot used at the siege of Chioggia in 1355. The Arabian authors say that gunpowder was first used in mortars, wh ch were at that time cylinders excavated in a rock, during one of the early sieges of Alexandria. In 1771 an experiment was tried at Gibraltar, for discharging stones from a mortar of this kind, called a rock mortar. The excavation, four feet long, was carefully polished, and fifteen hundredweight of stones were put in, some of which were thrown a distance of 300 yards. Mortars were first made in England in 1543, and they were in general use in 1585.

Mortella Towers, sometimes misspelt Martello Towers, are said to have received this name from the Mortella tower in Mortella Bay, commanding the entrance to St. Fiorenzo, in the island of Corsica, which was assailed by a furious cannonade, that lasted three hours, from two British men-of-war, the Fortitude, 74, and the Juno, 32-gun frigate, February 7th, 1794. The tower only mounted two 18-pounders and one 6-pounder, and the garrison consisted of thirty-three men, yet it sustained no damage, while the Fortitude caught fire, and was saved with difficulty. A height in the neighborhood had been occupied by 1,400 men, and the garrison was compelled to surrender to this force on the same day. The duke of Richmond gave the plan for the first erected in England about 1805. They extended during the French war from Hythe in Kent to Seaford in Sussex, altogether about seventy-four in number. Though these circular buildings may have derived the name by which they are known in England from the Corsican fortress, yet some such mode of defence was adopted at a much earlier date. Robertson, in his Life of Charles V., relates that the Spaniards in the 16th century were compelled to erect watch-towers at regular distances along the coasts, and to keep guards constantly on the alert, to protect the population on the sea-coast from the descents of the pirates of Algiers.

Mortimer's Cross, (Battle), was fought near Wigmore, in Herefordshire, between the rival factions of York and Lancaster, Feb. 2, 1461. The earl of Pembroke commanded the Lancastrian forces, which were defeated with great slaughter.

Mortmain.—Purchases made by corporate bodies are said to be purchased in mortmain, or dead hand; the reason for the title, according to Blackstone (book i. c. 18), being that such purchases were "usually made by ecclesiastical bodies, the members of which (being professed) were reckoned dead persons in law; land, therefore, holden by them might, with great propriety, be said to be held in mortua manu." In order to check the increasing importance of the Church, the giving of land in mortmain was prohibited by 9 Hen. III. c. 36 (1225), which was enforced by 7 Edw. I. st. 2 (1279), and extended to all guilds and corporations, lay or ecclesiastical, by 15 Rich. II. c. 5 (1391). These prohibitions were repealed by 1 & 2 Philip & Mary, c. 5, s. 51 (1554), which was repealed by 1 Eliz. c. 1, a. 2 (1555). The king was empowered to grant licences to purchase in mortmain by 7 & 8 Will. III. c. 37 (1696). Gifts in mortmain by will were restrained by 9 Geo. II. c. 36 (1736), which took effect June 24, 1736. It was repealed, as far as it related to the universities of Oxford and Cambridge, by 45 Geo. III. c. 101 (July 10, 1805).

Mosaic.—The invention of mosaic painting is ascribed to the Persians, by whom it was practiced at a very early date. The Greeks excelled in it, and transmitted it to the Romans about the reign of Augustus; and during the reign of Constantine it became the principal means of decorating the Christian temples. Venice was the principal seat of the mosaic art from the
11th to the 16th century. Mosaic-work was much improved in the 17th century by the application of enamel, to express the finer gradations of colour.

Moscow (Russia).—This ancient capital, founded a.d. 1147, continued to flourish until 1583, when it was taken by the Tartars, and nearly destroyed. The city was, however, rebuilt, and had attained some degree of prosperity, when it once more fell a prey to the Tartars in 1571. The Poles captured it in 1608, and it was wrested from their grasp in 1610. The French, under Napoleon I., entered Moscow September 14, 1812. The great conflagration commenced Sept. 15, and raged with fury till Sept. 20. The Kremlin (q. v.) was rebuilt in 1816, and has since been greatly enlarged. The church of the Assumption of the Virgin was founded in 1326; the one of St. Michael and of the Transfiguration were founded in 1328, and rebuilt in 1527; and the Pokrovskoi Cathedral was built in 1554. It was originally constructed of nine separate churches; eleven have since been added; making twenty places of worship joined together. The Beloi Gorod, or White Town, contains the university, which was almost totally destroyed in the French invasion; the foundling hospital, erected in 1763; the excise office, built in 1817; and the great military hospital, founded by Peter the Great. The great bell was cast in 1736, but fell, in consequence of a fire, in 1737. The railroad to St. Peters burg was opened in 1851.

Moskow (Battle).—Moreau, at the head of a French army, defeated the Austrians at this village, at a sanguinary contest, May 5, 1800.

MOSQUITO COAST, or MOSQUITIA (Central America), was discovered by Christopher Columbus a.d. 1502, and called by him Caray. The Spaniards formed several settlements, and it became one of the favourite haunts of the buccaneers. The first English settlement was formed in 1730. A commission, despatched by Trelawney, governor of Jamaica, took formal possession of the country, in the name of the king of Great Britain, April 16, 1740; and an order in council was issued, sending a number of troops in 1744, and another in 1748. Spain took umbrage at these movements, and England agreed to demolish her fortifications here by the treaty of Paris, Feb. 10, 1763. A convention, by which the English consented to evacuate the territory, signed July, 1786, was confirmed by the treaty of Madrid, Aug. 28, 1814. A British protectorate was established, and two vessels of war occupied the harbour of San Juan in January, 1848. This led to negotiations with the United States, and the Bulwer-Clayton treaty (q. v.) was concluded April 19, 1850.

Moss Troopers.—Freebooters dwelling on the borders of England and Scotland, whose ravages are mentioned as early as the reign of Edward I., when they carried off a wealthy citizen of Newcastle, and demanded a heavy ransom as the price of his liberty. In 1529 James V. of Scotland marched against them with 8,000 men, and put large numbers to death, the celebrated Johnie Armstrong being one of his victims. Measures were taken for their suppression by 13 & 14 Charles II. c. 22 (1662), which compelled the inhabitants of the Border to apprehend them wherever they were known to exist. They were deprived of benefit of clergy by 18 Charles II. c. 3 (1666). These acts were renewed by 6 Geo. II. c. 37 (1733).

Mosul, or Mosul (Asiatic Turkey), the ancient Mesepila, was the seat of the Hamadanis of Mesopotamia a.d. 892. Zenghi, the atabek or ruler of Mosul, asserted his independence in 1121. The town was taken by Saladin in 1183, and fell into the hands of the Persians in 1295. Amurath IV. recovered Mosul in 1639. Botta, the French consul at Mosul, commenced his explorations at Nineveh in 1843, and Layard arrived here in 1845, in order to pursue his excavations on the site of Nineveh, which is on the opposite side of the Tigris.

Motta (Battle).—The Hungarians were defeated at this place by the Venetians, under Malatesta, Aug. 24, 1412.

Mottai (Sicily).—This Phoenician colony passed under the rule of the Carthaginians, and was made a naval station by them, b.c. 407. Dionysius of Syracuse captured it, and put all the inhabitants to the sword, b.c. 397. The Carthaginians regained possession b.c. 306; but it never recovered its former importance.

Mount Athos (Greece), called by the Franks Monte Santo, and by the Greeks Agion-oros, both terms implying “Holy Mountain.” It has received this appellation from its numerous monastic establishments. According to the monkish tradition, no female has set foot upon the Holy Mountain. Xerxes cut a passage for his fleet through the isthmus that connects the peninsula to the mainland, on his invasion of Greece, b.c. 480. From documents still extant, it appears that convents existed on this mountain as early as a.d. 961.

Mount Hymus.—The ancient name of the range of mountains extending from the Adriatic Sea to the Euxine, and now known as the Balkan.

Mourning.—Pulleyn (Etymological Compendium, p. 215) states that “the colours of the dress, or habit, worn to signify grief, are different in different countries. In Europe, the ordinary colour for mourning is black; in China, it is white, a colour that was the mourning of the ancient Spartan and Roman ladies; in Turkey, it is blue, or violet; in Egypt, yellow; in Ethiopia, brown; and kings and cardinals mourn in purple. Every nation gave a reason for their wearing the particular colour of their mourning; black, which is the priva.
MUN

ition of light, is supposed to denote the privation of life; white is an emblem of purity; yellow is to represent that death is the end of all human hopes; because this is the colour of leaves when they fall, and flowers when they fade; brown denotes the earth, to which the dead return; blue is an emblem of the happiness which it is hoped the deceased enjoys; and purple, or violet, is supposed to express a mixture of sorrow and hope." White was the original colour of mourning in Spain, the last occasion on which it was used being on the death of Don Juan, heir of Castile, in 1495. In consequence of the serious injury done to trade by protracted public mournings, George III. reduced their duration to half their previous length, by an order issued from the chamberlain's office, Jan. 12, 1768.

Mousquetaires, or Musqueters, a body of cavalry, attached to the persons of the French monarchs, and having some resemblance to our household troops, was abolished a.d. 1775 by Count Germain, war minister to Louis XVI.

Mozambique (Africa).—This part of the eastern coast was discovered by Vasco de Gama, a.d. 1493, and the chief town was taken by Albuquerque in 1506. The city of Mozambique, on an island of the same name, was founded in 1580, and incorporated in 1813. By decrees of the Portuguese government, issued in June, 1854, custom-houses were ordered to be established on the Mozambique coast.

Muff.—This protection for the hands was invented in France during the reign of Louis XIV., and was introduced thence into England during the reign of Charles II. They are mentioned as being worn by gentlemen in 1683. Muffs made of feathers were fashionable during the reign of George III.

Muggletonians.—An English sect, following John Muggleton, a journeyman tailor, who in 1651 set up as a religious teacher, declaring that he and his companion John Reeve were the "two witnesses," mentioned in Revelations xi. 3—7. In 1656 a book was published, entitled "The Divine Looking-Glass," containing a statement and defence of their principles. William Penn replied in "The New Witnesses proved Old Heretics," published in 1672. Muggleton was tried at the Old Bailey for blasphemy, and convicted. Jan. 17, 1676. He died March 14, 1677. An edition of the works of Reeve and Muggleton was published in 3 vols. 4to, in 1832.

Mülberg (Battle).—The emperor Charles V. defeated the Saxons and their Protestant allies at Mühlberg, or Mulhausen, on the Elbe, April 23, 1547.

Mühlhof (Battle).—Louis of Bavaria took Frederick of Austria prisoner, and defeated his army at this battle, fought Sept. 28, 1522.

Mühlhausen (Prussia).—Monzer the Anabaptist made his head-quarters at Mühlhausen a.d. 1524. It was a free and imperial city until 1802, when it was annexed to Prussia.

Mulberry Tree, a native of Persia, was brought to England before a.d. 1568. Its introduction to this country is ascribed to the knights of St. John of Jerusalem, who planted mulberry-trees in Kent. Its longevity is remarkable, extending in some known cases to three centuries. The white mulberry was introduced from China before 1596, the red mulberry from North America before 1629, and the paper mulberry from Japan before 1761.

Mule, or Mule Jenny, a machine employed in spinning cotton, invented about 1777, by Samuel Crompton, was in general use about 1786. In 1812 Crompton found on investigation that there were between five and five million spindles at work on the principle of his invention, although, from his not having taken out a patent, he received no pecuniary benefit therefrom. Parliament voted him £5,000 as an acknowledgment of his merit in promoting the manufactures of the country.

Mulhouse, or Mühlhausen (France), is the chief town of a small republic, which entered into an alliance with the Swiss cantons, a.d. 1514. It declared in favour of annexation to France in 1793, and this was accomplished by treaty in 1798.

Multiplying.—The craft of multiplying gold and silver, or alchemy, was declared felony by 5 Hen. IV. c. 4 (1404). This statute was repealed by 1 Will. & Mary, c. 30 (1690).

Mummy.—The use of mummy as a drug commenced either in 1100 or in 1300, and was very common during the 16th and the early part of the 17th century. For details respecting mummies, see EMBALMING.

Munda (Spain).—On Scipio defeated the Carthaginians near this town, B.C. 216. Julius Caesar defeated the sons of Pompey at the same place on March 7, 45 B.C., when Munda was captured and destroyed. Cn. Pompey was wounded in the battle, and having been pursued, was killed.

Mundane ΑΕρα of Alexandria.—The creation of the world was fixed by this era B.C. 5502. This computation was continued until a.d. 284, and ten years were deducted from it in 285, making what was the year 5777 by the previous mode of computation, 5777.

Munich (Germany) was a walled town in the 13th century, and was made the imperial residence by Louis I., who restored and extended it in 1227. It was made the capital of Bavaria in the 15th century, and was taken by Gustavus Adolphus of Sweden in 1637, and by the French general Moresu July 2, 1800. Napoleon I. visited Munich Oct. 12, 1805, and again Jan. 14, 1806, on the marriage of Eugene Beauharnais. The Royal Academy of Sciences, founded in 1759, was re-organized in 1827. The public library contains 400,000 volumes, 22,000 MSS., and extensive natural history and scientific collections. The university, origin-
ally established at Ingolstadt in 1472, was removed to Munich in 1826. The paper manufacture was established in 1547. The old palace is said to have been built from Vasari's designs, at the close of the 16th century. The cathedral was commenced in 1368, and St. Michael's Church in 1563. St. Peter's was built in 1370, and restored in 1607.

**Municipal Corporations.**—The Romans, at the conclusion of the Social War, B.C. 90, brought the towns of Italy under their government, but permitted them to retain their local administration, which was carried on by a municipal corporation. Charters of incorporation existed in France as early as A.D. 974. Our municipal corporations, most probably of Saxon origin, are believed to have existed before the Norman Conquest. Charters of incorporation were frequently given to towns by the Norman sovereigns, one of the earliest being that of London, which was granted by Henry I. in 1101. The manner of statutes by which the corporation was regulated by 19 Hen. VII. c. 7 (1503). By the Corporation and Test Act, 13 Charles II. st. 2, c. 1 (1661), no one was permitted to hold any office in a corporation unless he had previously received the sacrament according to the rites of the Established Church. This act was repealed by 9 Geo. IV. c. 17 (May 9, 1828). Roman Catholics are permitted to hold lay offices by 10 Geo. IV. c. 7 (April 13, 1829). Corporations in Ireland are regulated by 3 & 4 Vict. c. 108 (Aug. 10, 1840). (See Municipal Reform Act.)

**Municipal Reform Act.**—By 5 & 6 Will. IV. c. 76 (Sept. 9, 1835), certain corporate towns and boroughs therein specified were placed under a new constitution.

**Munster (Ireland)** existed as a kingdom at an early period. Brian, surnamed Boru, usurped the sovereignty of Ireland in the 11th century, and was killed by the Danes at Clontarf (q. v.), April 23, 1014. Henry II. subdued Munster A.D. 1172. The whole of Munster, with the exception of Clare, was divided into counties during the reign of Henry VIII. Clare formed part of Connaught until 1601, when it was added to Munster.

**Munster (Prussia)** was founded about A.D. 700, under the name of Meiland, which was afterwards changed to Miningerode. Charlemagne, after taking the town, created it a bishopric in 750, which continued to be its form of government till 1006. John of Leyden, leader of the Anabaptists, with a number of his followers, held the town from 1534 till June 25, 1535, when it was taken by storm. The treaty of peace closing the Thirty Years' War was signed here Oct. 24, 1648. It was evacuated by the French, and taken possession of by the duke of Brunswick, in 1758. The French general d'Armenieres captured it after a short siege, July 25, 1759, and it was retaken by General Imhoff Oct. 20 following. By a treaty concluded at Paris, it was ceded to Prussia May 23, 1802; but was again given up July 9, 1807, and released from the French yoke by the allies in 1813. Its fortifications were destroyed in 1765. The church of St. Leger was built in the 12th, and the cathedral in the 13th century.

**Mural Circle.**—This instrument, which superseded mural arcs and quadrants, was invented by Edward Troughton, A.D. 1812.

**Murcia (Spain).**—This province was colonized by the Carthaginians, about B.C. 200, and passing successively under the sway of the Romans and the Goths, came by conquest into possession of the emperor Justinian, A.D. 552. It was recovered by Suintilla, the Gothic king, in 624, and was subjugated by the Moorish invaders in 712. The calif of Cordova held it till 1144, when the kings of Granada seized upon the province, which was, however, restored to its former owners A.D. 1221. In 1299 it was erected into a kingdom tributary to Castle, and the Moors were finally dispossessed in 1296.

**Murcia (Spain), capital of the province of that name, and supposed to be the Vergilia of the Romans, was made one of their seven chief cities by the Moors, A.D. 787. On the approach of Prince Alfonso with a powerful army, the inhabitants offered unconditional submission, A.D. 1239. On two occasions during the Peninsular war, in 1810 and 1812, it suffered from the depredations of the French army. An earthquake caused much damage to the city March 21, 1829. The cathedral, commenced A.D. 1353, has since received additions and renovations at various times, the belfry tower having been built between A.D. 1522–1766, and the façade of Corinthian columns in 1737. The episcopal palace, commenced in 1748, was finished in 1752. The seminary of San Fulgenio, now in decay, was founded in 1592; the institute of secondary instruction in 1837, and a normal school in 1844.

**Murder.**—The first murderer was especially preserved from death in consequence of his crime, by the divine protection, Gen. iv. 15. After the Deluge the law of blood for blood was established, Gen. ix. 6 (B.C. 2347), and was confirmed by the Levitical law. Murder was a capital crime among the Egyptians, and also among the Greeks, who established the court of Ephesos for its suppression, B.C. 1179. It was also made capital by the Roman laws, by the code of Justinian, by the laws of the Visigoths in Spain, and by those of the ancient Germans. The Anglo-Saxons compounded for it with a fine, and the same principle was continued by the Normans. The murder of a master by a servant, a husband by his wife, or a priest by his subordinate, was judged petit treason by 25 Edw. III. stat. 5, c. 2 (1350). Benefit of clergy was taken away from murderers by 4 Hen. VIII. c. 2 (1512). The various statutes relating to murder were amended by 9 Geo. IV. c. 31 (June 27, 1829), which ordered the execution of murderers to take place the day next but one after the sentence, and the
bodies of convicts to be dissected or hung in chains. The dissection clause was repealed by 2 & 3 Will. IV. c. 75 (Aug. 1, 1832), the hanging in chains by 4 & 5 Will. IV. c. 26 (July 25, 1834), and the limitation of intervals between sentence and execution by 6 & 7 Will. IV. c. 30 (July 14, 1836).

MURET (Battle).—Simon of Montfort defeated Peter II. of Aragon, and the Albigenenses, near this town, in France, Sept. 12, 1213. Peter II. fell in the action. Pope Innocent III. in a letter dated Jan. 17, 1214, celebrates this as a great triumph over the heretics.

MURSA, or MURSIA (Pannonia).—Hadrian founded a colony at this place, called Mursa Major, to distinguish it from another town of the same name, about twelve miles distant. Constantius II. obtained a signal victory over Magnentius, near this town, Sept. 28, 351 A.D. Constantine I. made it the seat of a bishopric, A.D. 338. Esseck (q.v.), the capital of Slavonia, is built upon its site.

MUSEUM.—The first institution with this name was founded at Alexandria, about B.C. 280, by Ptolemy Philadelphus, and was enlarged by the emperor Claudius. It was set apart for the worship of the Muses and the cultivation of science. (See British Museum.)

Music.—In Scripture we learn that Juba 1, the son of Lamech, was "the father of all such as handle the harp and the organ," Gen. iv. 21 (b.c. 3874). The mythical Orpheus is said to have flourished B.C. 1200. The Greeks and Romans were the only ancient people who possessed a knowledge of musical characters. Lasus of Hermione, in Argos, who flourished b.c. 548, was the first who wrote on the theory of music, and Aristoxenus (b.c. 335) is the most ancient author on the subject whose works are extant.

A.D.
374. St. Ambrose introduces the Ambrosian chant.
600. Gregory the Great introduces the Gregorian chant about this year.
886. Alfred the Great is said to have appointed a musical professorship at Oxford.
1024. Guido Arletinus invents a scale of six notes, and introduces the use of clefs.
1063. Franco, of Liége, invents metrical music.
1453. Doctors and bachelors of music are first mentioned at Cambridge university.
1495. The art of printing music is introduced into England.
1515. Music-printing from metal types is invented by Ottavio de' Petrucci.
1550. The Common Prayers of the Church of England is first set to music by John Marbeck.
1565. The Accademia degli Filarmonici is established before this year, at Vicenza.
1600. Jacopo Peri invents recitative about this time.
1650. Ludovico Vincenzo Ingraves invents the bass.
1750. The use of bars in music becomes general, and sonatas are introduced.
1653. A Venetian lady named Barbara Strozzi invents the Cantata.
fleet and camp, retired with their booty to Samos. The battles of Mycale and Platea were both gained by the Greeks on the same day.

**MYCENE, or MYCENAE (Greece).—**This town, the name of which was derived by the ancients from Mycene, daughter of Inachus, is said to have been built by Perseus. The Argives, anxious to bring the whole district under their sway, laid siege to Mycene, b.c. 648. They turned the siege into a blockade, and the inhabitants were compelled by famine to capitulate.

**MYCOLE (Sea-fight).—**The corsairs of Narenta defeated the Venetian fleet off this bay, near Zara, and slew the dogs, Pietro Sanudo, a.d. 887.

**MYLÉ (Sea-fights).—**The Roman fleet, commanded by C. Duillius, defeated the Carthaginians near this promontory, in Sicily, b.c. 260. Near the same place, Agrrippa, with the fleet of Octavian, defeated Sextus Pompey's squadron, b.c. 36.

**MYLÉ (Sicily).—**The date of the foundation of this city, the modern Melazzo (q. v.), is uncertain. Siefert fixes it as early as b.c. 716. It was most decidedly in existence before Himera, founded b.c. 648. The Athenian fleet, under Laches, captured Mylas b.c. 427. This city is again noticed during the war of Timoleon in Sicily, b.c. 315. In its neighbourhood the Mamertines were defeated by Hieron of Syracuse, b.c. 270.

**MYRIOKERPHALON (Battle).—**The Greek emperor Manuel II. was defeated in a narrow defile near this castle, by Kildisach Arslan II., sultan of Iconium, in September, 1176.

**MYRRH is first mentioned (Gen. xxxvii. 25) among the wares the Ishmaelites, to whom Joseph was sold by the Midianite merchants, were carrying into Egypt, b.c. 1728. It was used by the Egyptians for embalming their dead. The Greeks, Romans, and other ancient people, employed it as a medicine.

**MYRIA (Asia Minor) was inhabited by various tribes of Phrygians, Trojans, Æolians, and Mysians; but little is known of the people or their institutions. They are mentioned by Homer as allies of Priam. Myria was successively subject to Lydia, Persia, Syria, and Rome; and, under the last-mentioned, formed part of the province of Asia.

**MYSENE (Hindostan).—**This province, also called Mahesura and Maisoor, was invaded by the Mohammedans a.d. 1310, and was for many years governed by rajahs, who traced their descent from the same tribe of which the god Krishna was a reputed member; but the earliest sovereign on record is Cham Raj, whose reign commenced a.d. 1507. The public career of Hyder Ali commenced at Mysoor in 1749, and he assumed the sovereignty of the province in 1760. Seringapatam, the capital, was stormed and taken by the English May 4, 1799, when the whole district passed under the control of the British. In 1818 military means were successfully employed to rid Mysore of the banditti tribes by which it had previously been infested.

**MYSTERIES.**—The pagan mysteries originated in Egypt, where Isis and Osiris were worshipped with secret rites at a very early period. The earliest mysteries practised by the Greeks were those of the Cabiri, which were celebrated at Samothrace. The mysteries of the Curetes, who existed as early as b.c. 1534, and of the Carybantes, rank next in point of antiquity; but the most celebrated were the Eleusinian mysteries, which were introduced at Eleusis, in Attica, by Bumolpus the Hierophant, b.c. 1356. This festival was sacred to Ceres, and was observed with such strict secrecy that death was the penalty for intruding during the ceremonies without initiation. It was introduced at Rome in the reign of Hadrian (a.d. 117—139), and ceased in 396.

**MYSTERY PLAYS.**—The origin of these mediæval dramatic entertainments has been referred to the pilgrims who journeyed to the East in the 11th century. They are first mentioned in England, the earliest performance on record being one noticed by Matthew Paris, as having taken place at Dunstable in the early part of the 12th century. The oldest extant is the “Harrowing of Hell,” which is ascribed to the reign of Edward III. Hallam, from internal evidence, believes it not later than 1350. Warton refers the Chester mysteries to 1327, but Hallam considers this at least a century too early. The French mysteries commenced in the 14th century, and exceeded the English in the magnificence of their appointments. (See Drama.)

**MYSTICS.**—This sect of Christians originated towards the end of the 3rd century, and maintained that primary reason is an emanation from the Godhead, and that solitude and mortification of the natural man are the most effectual means of promoting its reception and development. During the 4th and 5th centuries they greatly increased in number, and in the severity of the self-imposed austerities they practised. Mystic theology was introduced into the Western empire, where it made many converts, in 524. The mystics vigorously opposed the schoolmen in the 13th century, and were very numerous in Europe in the 14th, when John Tauler of Strasburg, who died in 1361, Henry Suso of Ulm, who died in 1365, and John Ringsbroech, prior of Grosenthal, in Brabant, who died 1381, flourished.

**MYTHOLOGY, or the "science which treats of the myths, or various popular traditions and legendary tales current among a people, and objects of general belief," has been ascribed to three origins. The first is that which asserts the real existence of all mythic persons at some remote period; the second, known as the philosophic theory, regards mythology as the poetical guise of human science; and the third, or theologick theory, considers it as the theology of polytheism. The origin of mythology is of course un-
known, but there is no doubt that the system in vogue in Greece and at Rome was derived from the Egyptians.

NAARDEEN (Holland).—Don Frederick of Toledo summoned this small town, on the coast of the Zuyder Zee, to surrender, Nov. 22, 1572. The inhabitants refused to abandon the cause of the prince of Orange, and Don Frederick invested the place Dec. 2, when it was taken, and an inhuman massacre perpetrated. The Spanish soldiers committed fearful atrocities. Louis XIV. took Naarden in 1672, and the stadtholder, William III., regained possession the following year.

NAAS (Ireland), in early times was the residence of the kings of Leinster, and some remains of their ancient palace are still to be seen. A priory was founded here in the 12th century, for canons regular of the order of St. Augustine. It was destroyed in 1316, when the town was sacked by the Scots, but was soon afterwards restored.

A convent for Dominican Friars was founded in 1355; a parliament was held here in 1419; and a convent for Friars Eremites of the order of St. Augustine was founded in 1454. Queen Elizabeth granted Naas a charter in 1589. A party of insurgents in 1577 burnt between 700 and 800 houses on the night of a festival. James I. confirmed and extended the charter of Elizabeth in 1609, and Charles I. granted a new charter in 1629; but the town has always been governed by the charters of Elizabeth and James. It was garrisoned by the earl of Ormonde in 1648, and after many vicissitudes, was taken by the parliamentarians in 1650. It was attacked by the insurgent Irish, who were repulsed with a loss of 150 men, May 24, 1798.

NABONASSAR (Era).—Nabonassar, the founder of the kingdom of Babylon, was the author of this era, which commenced Wednesday, Feb. 26, B.C. 747. It included a period of 424 Egyptian years, from the commencement of Nabonassar’s reign to the death of Alexander the Great, B.C. 323; and was brought down to the reign of Antoninus Pius, A.D. 139—161.

NACHITSEHAN (Asia).—This province of Persia was ceded to Russia by the peace of Turkmanchi, Feb. 22, 1828, and soon afterwards was, with the province of Erivan, formally annexed to the Russian empire, under the title of the province of Armenia. The town of Nachitsehan was captured by the Russians in 1827.

NACHITSEHAN (Russia).—Catherine II. founded this town on the Don, A.D. 1780. The majority of the inhabitants are Armenians.

NACOOLIA (Phrygia).—The emperor Valens defeated the usurper Procopius near this town in May, 366 A.D. Procopius, deserted by his troops, wandered amongst the woods and mountains of Phrygia, until he was length betrayed and put to death, May 28. The Gothic garrison at Naass revolted against the emperor Areadus.

NAFELS (Battle).—The Swiss defeated the Austrians at this place, in Switzerland, A.D. 1388. Occupying the heights, the Swiss hurled large stones and masses of rock upon the antagonists, and threw them into confusion. The small town of Nafels was burned by the invaders the night before the battle.

NAGASAKI, or NANGSAK (Japan), one of the five imperial cities of the empire, was made the site of a settlement, through Portuguese influence, A.D. 1568. It became the scene of frightful massacres during the persecution of native Christians in 1622. The port was visited by the British frigate Phaeton, under the command of Captain Pellew, who detained as prisoners some Dutchmen coming on board, an act which led to the suicide of the Japanese governor, A.D. 1808. Two English merchantmen, the Charlotte and Mary, succeeded, by a ruse, in getting cargoes of copper in 1813; but a similar attempt failed in 1814. A British squadron, under Admiral Stirling, by the aid of threats, obtained supplies of such provisions as they required, Sept. 7, 1854. Another squadron, with the steam-yacht Emperor as a present from Queen Victoria, to the tween of Japan, entered this port Aug. 3, 1858; and it was opened to British subjects by the treaty of Jeddo, July 1, 1859.

NAGPORE (Hindostan).—Near this town, then capital of a province of the same name, an English army was, in time of peace, attacked by the rajah of Nagpore’s troops, Nov. 26, 1817. After a conflict of eighteen hours’ duration, the English obtained a victory and captured the town, which, with the province, was incorporated with the English empire in the East Indies on the death, without issue, of the last descendant of Rejooge, Dec. 11, 1833.

NAG’S-HEAD CONSECRATION.—The Roman Catholic writers promulgated a story that Matthew Parker, archbishop of Canterbury from A.D. 1559 to 1576, had been consecrated at the Nag’s Head tavern, in Cheapside. The official register shows that he was consecrated at Lambeth, Dec. 17, 1559, by Bishops Barlow, Coverdale, Scoy, and Hodgkins, suffragan of Bedford; and the malignant invention scarcely deserved the deliberate refutation which it received.

NAHUM.—The festival of Nahum, one of the minor prophets, who, B.C. 720, foretold the destruction of Nineveh and the overthrow of the Assyrian empire, which events occurred B.C. 625, according to some authorities, and B.C. 606, according to others, is held on the 24th of December.

NAI.—The earliest nails known were made of copper; and flat-headed nails of iron have been found in British barrows. The first machine for making nails was invented by French, of Wimborne, in Staffordshire, A.D. 1790. In 1810 a machine was
invented in America by which the manu-
ufacture was greatly facilitated. Since that
year, numerous improvements have been
effected. Much controversy has been ex-
icted respecting the number of nails used in
the crucifixion. Nonnus and Gregory
Nazianzen (A.D. 326—390) affirm that only
three were used; and Curtius, who wrote a
treatise "De Clavis Domincis," at the
commencement of the 17th century, con-
tends for four. Other writers have argued
in support of different numbers, some being
in favour of as many as fourteen.

NAISSUS (Moesia).—Claudius II. defeated
the Goths in a great battle near this town
A.D. 299. Constantine the Great was born
here in 274. Having been destroyed by
Attila and the Huns in 411, it was restored
by Justinian I. The modern Nissa occupies
its site.

NAJARA (Battle).—The Black Prince, hav-
ing espoused the cause of Pedro the Cruel
of Castile, defeated his opponents at Najara,
April 3, 1367, and re-established him upon
the throne.

NAMES.—Among the Hebrews names pos-
essed a specific meaning, and were not
inherited from parents to children. The
Greeks had only one name, which frequently
received a patronymic for distinction, as
Achilles, son of Peleus; but the Romans
usually had three names,—the praenomen,
denoting the individual; the nomen, indi-
cating the gens or clan of which he was a
member; and the cognomen, specifying the
particular branch of the clan. A fourth
name,—the agnamen, was sometimes added as
an honour; and it was usually derived
from the incidents for which it was con-
ferred. Africanus, Coriolanus, &c., were
names of this class. The practice of bearing
hereditary names commenced about the 13th
century A.D. The first pope who changed
his name on his elevation to the chair of
St. Peter was Peter di Bocca Porca, who
assumed the title of Sergius II., in 844,
because he deemed himself unworthy to bear
the same name as his apostolic pre-
decessor. Some authorities state that the
custom was introduced by Octavian, who
became a John XII. in 96. Many and non
frequently adopted new names on taking
their vows, in token that they renounced
everything connected with their former
mode of life.

NAMPTWICH, or NANTWICH (Cheshire).—
This town is mentioned in Domesday-book
under the name of Wick. Here Fairfax
defeated the royalist army brought from
Ireland to support the cause of Charles I.,
Jan. 25, 1644 (N.S.). George Monk, after-
wards duke of Albemarle, was captured in this
battle. Lambert defeated the royalists, who
formed a league to overthrow the authority
of Cromwell, at Nantwich, Aug. 19, 1659.
A mob endeavoured to rescue some poachers
who had been imprisoned, and caused a riot,
which was quelled by the military, Feb. 8,
1629. The free grammar-school was founded
in 1561.

NAMUR (Belgium).—This town was founded
in the 7th century. Don John seized the
citadel in 1577, and it was taken by the
French, under Louis XIV., July 1, 1692.
It was besieged by the English, under
William III., July 3, 1695, and attacked
with such fury that the French garrison
of 14,000 men, under Marshal de Boufflers,
capitulated Aug. 4. The citadel held out,
and was besieged Aug. 12. An attempt to
carry it by storm was repulsed with great
slaughter, Aug. 30; but the garrison sur-
rendered Sept. 1. The count of Nassau as-
sailed it without success in 1794. Namur was
ceded to Austria in 1713; garrisoned by the
Dutch in 1715; and taken in 1746 by the
French, who restored it to Austria by the
treaty of Aix-la-Chapelle, Oct. 7, 1748.
The fortifications, demolished by Joseph II. of
Austria in 1784, were afterwards restored;
Namur was taken by the French, under
Dumourence, Dec. 7, 1792, and having been
evacuated by them in March, 1793, was re-
taken in 1794. The allies captured it in
Jan., 1814, and it was the scene of an
obstinate battle between the Prussians and
the French in 1815.

NANCY (France).—No record of the old
town exists previous to the 11th century, and
the new town dates from A.D. 1603. The
church of the Cordeliers, built in 1434, con-
tains the tombs of several dukes of Lorraine.
Charles the Bold of Burgundy, who took
Nancy in 1438; René II., duke of Lorraine, Jan. 4, 1477.
Nancy was wrested by the French from the
duke of Lorraine in 1633. The fortifications
were demolished by Louis XIV. on the re-
stitution of the town to the dukes of Lor-
raine. In 1790, the French army stationed
here revolted against the National Assembly.
Bouillé marched on the town with 3,000
infantry and 1,400 horse, and took it after a
short resistance. It was captured by Blucher
in January, 1814.

NANKIN (China) was made the capital of the
empire A.D. 420, and continued to
occupy this position till the end of the 13th
century. The removal of the imperial resi-
dence and the subsequent transfer of the six
great tribunals to Pekin, caused it to decline.
In 1842 the British army forced a passage up
the river, and the troops landed Aug. 9,
with the intention of storming the city.
The Chinese submitted, and the treaty of Nankin
was concluded by Sir Henry Pottinger,
Aug. 29. The Taeping rebels took Nankin,
March 19, 1853. They committed fearful
ravages and destroyed the celebrated Porce-
lain Tower, one of the principal objects of
interest in Nankin, in 1856.

NANTES (France), the ancient Condicio-
um, or Condiveineum, mentioned by Ptolemy
as the capital of the Nannetes, or Namnetes,
from which is derived the modern name
Nantes. In 445 it withstood a siege of sixty
days from the Huns; in the 9th century it
was almost entirely destroyed by the Nor-
manians, and in 992 it was taken by the duke of
Britanny. The greater part of the town

583
was reduced to ashes by an accidental fire in 1119. If passed into the hands of Louis XII. on his marriage with Mary of Brittany in 1498. The celebrated edict of Nantes, issued here by Henry IV. April 13, 1598, was revoked by Louis XIV. Oct. 22, 1685. The royalists made an unsuccessful attack on the town in June, 1793, when it became the scene of the atrocious cruelties of Carrier; no less than 18,000 persons having perished by the guillotine or drowning during his administration. In 1790 the Vendeanse defeated the republican army here. An outbreak of the working classes, arising from distress and the spread of socialist doctrines, took place in 1848, and was suppressed by the military, but not without serious loss of life. Nantes was made a bishopric at an early period, and councils were held here in 660, 1127, July 1, 1264, and April 23, 1431.

**NANTUCKET (Massachusetts).—** This town, on a small island of the same name off the coast, was the first place in America which engaged in the whale fishery. It was almost totally destroyed by fire July 13, 1846.

**NAPHTHA.**—This highly-inflammable fluid, which oozes out of the ground in Persia, Italy, and other countries, is supposed by Gibbon to have formed part of the Greek fire, used with such effect in sieges during the Middle Ages. Gibbon calls it "liquid bitumen, a light, tenacious, and inflammable oil." It is supposed to have secured the deliverance of Constantinople when besieged by the Arabs, A.D. 668-675 and A.D. 716-718.

**NAPIER'S RULES, OR BONES.**—This contrivance to facilitate the multiplication and division of large numbers was invented by John Napier, Baron of Merchiston. The invention was first explained in his "Rabdo-Logia, sive Numeralia per Virgulas," published at Edinburgh in 1617, and would perhaps have been more used but for his discovery of logarithms. Napier was born at Merchiston Castle in 1550, and died there April 3, 1617.

**NAPLES (Italy) was made a duchy, subject to the Byzantine empire, in the 6th century.**

**A.D.**

1084. The Norman conquest of Naples is completed by Robert Guiscard.

1129. Pope Innocent IV. pronounces Naples part of the Holy See.

1209. Roger II. rules both Naples and Sicily.

1329. Naples and Sicily are united into the kingdom of the Two Sicilies by papal investiture.

1394. Henry VI. of Germany succeeds to the throne of Naples and Sicily.

1283. Sicily is separated from the kingdom of Naples at the revolution known as the Sicilian Vespers (p. v.).

1309. The Neapolitan crown is disputed by Robert the Good and Carlbert, king of Hungary, and is allotted by the pope to the former.

1345. Sept. 10. Andrew of Hungary, king consort of Joanna I., is murdered.

1347. Louis of Hungary invades Naples, and expels the queen.

1349. Joanna I. is restored.

1352. Joanna I. is strangled by order of Charles Durazzo.

1363. Ladislaus resists the encroachments of the duke of Anjou.

1404. He invades Rome.

1408. Ladislaus again invades Rome.

1413. He attacks Rome a third time.

1420. Joanna II. adopts Alfonso of Aragon as her successor.

1423. She revokes the adoption, and nominates Louis III., duke of Anjou, as her heir.

1434. Death of Louis of Anjou.

1435. Death of Joanna II., who bequeaths the crown to René of Anjou. His claim is contested by Alfonso V. of Aragon.

1442. Alfonso secures the crown.

1452. Edict of Anjou invades the kingdom.

1459. John, duke of Calabria, son of René, invades Naples.

1462. He is defeated by Ferdinand, at Troia.

1456. Neapolitan fleet is destroyed and conquered by Charles VIII. of France.

1501. Naples is conquered by the French and Spaniards, who expel king Frederick II.

1506. The Neapolitans are expelled, and the kingdom is again annexed to the crown of Aragon.

1510. The Jews are expelled from the Neapolitan provinces.

1524. The French, under Stuart, duke of Albany, unsuccessfully invade Naples.

1538. The pope invades Naples in vain.

1537. The Neapolitans, under Lafontain, ravage Naples.

1535. The Inquisition is prohibited in Naples.

1615. Osuna is viceroys in Naples.

1629. Osuna fails in an attempt to become sole ruler of Naples.

1647. June 6. Masaniello, a fisherman of Amalphi, rouses the Neapolitans to insurrection. July 16. He is assassinated by his colleagues, and a revolt is quelled. Aug. 24. The Neapolitans again revolt, and are assisted by the duke of Guise.

1648. April 4. Spanish supremacy is restored.

1702. A conspiracy to establish an Austrian government fails.

1706. Prince Eugene expels the French from Naples.

1713. April 6. Naples is ceded by Spain to Austria by the treaty of Utrecht.

1720. Victor Amadeus cedes Sicily to Austria in exchange for Sardinia.

1734. May 10. The infant Don Carlos enters the Neapolitan kingdom, with a force of 30,000 men. May 27. His generals defeat the Austrian imperialist forces at the battle of Bitonto, which puts an end to the Austrian domination in Naples.

1735. July 3. Don Carlos is crowned king of the Two Sicilies at Palermo, with the understanding that the crown of Spain and the Two Sicilies are never to be united.

1738. Institution of the order of St. Januarius.

1745. Naples is constrained by England to preserve neutrality in the war of the Austrian success.

1759. The king of Naples succeeding to the throne of Spain, reigns the crown of the Two Sicilies to his son Ferdinand.

1788. The Jesuits are expelled.

1789. The Inquisition is abolished in Naples.

1794. Many monasteries are suppressed.

1795. Barional service is abolished.

1788. Naples ceases to be in feudal subjection to Naples.

1793. Sept. 3. War is declared against the French republic.

1798. Nov. 29. Ferdinand, having published a manifesto against the French, marches against them in Italy, and enters Rome.

1825. Sept. 17. General Pepe heads an insurrection of the Carbonari, and compels the king to accept a new constitution.

1827. June. Destructive inundations take place.

1828. Jan. 13. The king proclaims an amnesty, and orders the restoration of the two Sicilies.

1829. Sept. 13. Pope Pius VII. dies, and is succeeded by Pius VIII.

1830. March. 25. Peace is concluded with France at Fontainebleau.

1837. Jan. 29. The crew, with two English engineers, Watt and Park, are imprisoned. They were subsequently released. Dec. 15. A disastrous earthquake destroys about 10,000 lives.

1838. Dec. 27. A political amnesty is granted.

1839. March 15. Baron Piojorfo, with sixty-eight Neapolitan exiles, arrives at Roscommon, Ireland. May 22. Death of Ferdinand II.

1842. March 26. The foreign ambassadors at the Neapolitan court present an address to the king, stating the necessity of consulting with the political parties. May 14. Garibaldi assumes the title of Count of Sicily (q.v.). June 7. The Emperor Napoleon III. refuses to mediate between the king and the Sicilian revolutionists, and a vice-regal and liberal government for Sicily is established.

1849. A general amnesty, promises a liberal ministry, agreement with Sardinia, the adoption of the national flag, and a vice-regal and liberal government for Sicily.

a colony of Cumrians, by whom it was termed Parthenopes, about b.c. 1030. About b.c. 416, its inhabitants separated into two communities, who occupied different quarters of the city, distinguished as Paleopolis, or the old town, and Neapolis, or the new town. From the latter designation is derived the modern title of the city. In consequence of the piracies of the Palaeopolitans, the Romans besieged and took the city b.c. 326, and from that period the name Paleopolis disappears from history. Neapolis, on the contrary, was admitted to Roman protection, and became a dependency of the republic. Pyrrhus threatened the city b.c. 280, and it was sacked by the partisans of Sylla b.c. 82. The poet Virgil was buried here b.c. 19, and the city became a favourite summer watering-place of the wealthy Romans. The emperor Nero made his first appearance as an actor at Naples, a.d. 64. Theodoric the Goth took the city in 493, and it was captured by Belisarius, after a long siege, in 536. Totila retook it in 543, but it surrendered to Narses in 553, and was definitely united to the Eastern empire. In 672 the city was sacked by the Saracens, and in 1224 was made the capital of the kingdom of Naples. Naples was taken by Manfred in 1250, and by Louis of Hungary in 1347; it was retaken by John I. in 1348. Louis I. of Anjou seized it in 1383; René of Anjou in 1438; Alfonso of Aragon in 1442; and Charles VIII. of France in 1495. It was also taken by the French in 1561, and by the Spaniards in 1563. The French general Lautrec was compelled to raise the siege of Naples in 1528. In 1647 the city was the scene of Masaniello’s insurrection, and it was much injured by an earthquake Sept. 8, 1694. It was taken by the Austrian general Daun in 1707, submitted to Don Carlos in 1724, and was declared the capital of the new Partenopean republic in 1799. Joseph Bonaparte, brother of the emperor, made his entry into Naples in 1806, and resided here till he went to ascend the Spanish throne in 1808. Ferdinand IV. re-entered the city as king in 1815. Naples was again the scene of insurrections in 1848. It was declared in a state of siege June 28, 1860. The king quitted Naples Sept. 6, and it was entered by Garibaldi the following day. Victor Emmanuel made his official entry Nov. 7, but on the 14th popular demonstrations were made in favour of the deposed king. Victor Emmanuel returned to Turin Dec. 27. Among the most important public buildings at Naples are, the university, founded by the emperor Frederick II. in 1224; the cathedral, commenced in 1272, and completed in 1316; the Castel Nuovo, built by Charles I. in 1283; the Museo Borbonico, founded as cavalry barracks in 1866, and converted to its present purpose in 1790; the royal palace, begun in 1600, burnt down in 1837, and since rebuilt and greatly enlarged; the Teatro Reale di San Carlo, which was opened in 1737, and burnt and rebuilt in 1816. The railway to Nocera was opened in 1809. The bishopric of Naples is said to have been founded by Saint Asper-
NAP

NAP, who was consecrated by Saint Peter, A.D. 44. It became metropolitan in 966. Councils were held at Naples in 1565, 1568, and 1576. A treaty between Austria and the king of Naples was signed here Oct. 3, 1759; and an alliance between Great Britain and Naples, July 12, 1793; another alliance between the same powers, Dec. 1, 1798; a convention between the French republic and the king of Naples, June 25, 1803; and an alliance between Austria and Murat, Jan. 11, 1814.

NAPOLI-DI-ROMANIA (Greece), the ancient Nauplia, founded by an Egyptian colony, was taken by the Franks in the 14th century and restored to its ancient state. It grew into a powerful republic during the crusades, and was taken by the Franks A.D. 1205, and made the capital of a duchy. The Venetians took it in the 14th century, and ceded it to the Turks in 1540. The Venetians regained possession in 1686, and it was stormed by the Turks July 4, 1715. The Greeks, who failed in an attempt to take it by escalade, Dec. 15, 1821, having been compelled to withdraw, returned and captured it, Dec. 12, 1823. The seat of government, transferred to Napoli-di-Romania June 24, 1824, was removed to Argos in 1829. Capo d'Istria was assassinated here Oct. 8, 1831.

NARBONNE (France), the ancient Narbon Martius, was the second colony founded by the Romans beyond the Alps, B.C. 118. Some of Caesar's tenth legion settled here, and it was then called Decumanorum Colonia. It fell into the hands of the Visigoths A.D. 462, who made it the capital of their kingdom; and it was captured by the Saracens in 720, from whom it was taken by Pepin le Bref in 759 and annexed to the Frankish monarchy. In 1272 the cathedral, one of the finest specimens of Gothic architecture in Europe, was founded. In 1310, 30,000 of its inhabitants perished by the plague. It was successfully defended by Aymery III., viscount of Narbonne, against the attacks of the Black Prince in 1355, and it was annexed to the crown of France in the beginning of the 16th century. In the religious wars of this century, Narbonne sided with the League, but in 1596 submitted to Henry IV. Councils were held here Nov. 1, 589; June 27, 791; March 27, 947; in 990; March 17 and Aug. 8, 1043; in 1054; Oct. 1, 1055; March 19, 1091; in January, 1211; in 1227; in 1235; and in April, 1374.

NASCIA.-Pellietier produced this alkali from opium, A.D. 1832.

NARVA (Russia).—This town, founded A.D. 1213, and sold to the Teutonic knights in 1346, was taken by the grand-duke Ivan Wassiliwitsch in 1553. The Swedes recaptured it in 1581. Charles XII. of Sweden, with 6,000 men, attacked the intrenched camp of the Russian army (which had been besieging Narva), and gained a complete victory, Nov. 30, 1700. No less than 18,000 Russians fell in the battle, and 30,000 surrendered themselves prisoners on the following day. The Swedes lost only 600 men. The town was taken by storm by Peter the Great, Aug. 20, 1704, and it has since remained in the hands of the Russians.

NAHEBY, (Battle,) was fought at this village, near Market-Harborough, in Northamptonshire, June 14, 1446, between the royalists and the parliamentary army. The latter gained a complete victory, taking 500 officers and 4,000 meu prisoners, with all the king's artillery and ammunition.

NASHVILLE (North America), the capital of the state of Tennessee, contains a university, founded in 1806. Nashville, occupied by the Confederates in 1861, was captured by the Federalists in March, 1862.

NASSAU (Germany) derives its name from the castle of Nassau, built in the beginning of the 12th century. In 1255 Walam I. and Otho, the sons of Henry the Rich, shared the territory between them. The former became the founder of the present family of Nassau, and the descendants of Otho were the founders of the house of Orange-Nassau, of which William III. of England was a member. In 1605 Lewis II. became possessed of all the lands belonging to the elder branch of the family. On his death in 1625, the family was divided into three branches, which, however, had been reunited into one when Napoleon I. founded the confederation of the Rhine in 1806, and bestowed the title of duke upon Frederick William.

NATAL (Africa).—The Portuguese discovered this country A.D. 1498, and gave it the name of Natal, because they landed on Christmas-day. The native races were swept away by the Zulu Caffres in 1810, and the English formed a settlement in 1824. They were joined by some Dutch boers, who left Cape Colony in 1836, and obtained by treaty some land from Dingaan, chief of the Zulu tribes. Several of the boers were massacred by Dingaan in 1838. They removed to Port Natal, and renounced their allegiance to Great Britain in 1833. A small British force was sent in 1842 from the Cape, which the boers permitted to land, but afterwards commenced hostilities. The British maintained their position until the arrival of reinforcements, when the boers were defeated and driven out of the territory. It was recognized as a British colony in 1845, and was made a bishopric in 1853.

NATIONAL ANTHEM.—Much controversy has been excited respecting the authorship of "God save the King." For many years it was attributed to several persons, the general opinion being in favour of Dr. Bull. A writer in Notes and Queries (2nd series, vii. 64), who favours the claim of Anthony Young, organist of All-Hallows, Barking, in the reign of James II., draws the following conclusions:—1. The tune, being in Bull's MSS., is of the time of James I. 2. That A. Young united it to a "God save the King" in the time of James II. 3. That it slept until George II. 1745. 4. That Young's grand-daughter received a pension for its composition; and 5. That her grand-daughter, in 1789, received £100, the proceeds thereof." Another view is, that both the

587
words and the music were composed by Dr. Henry Carey, in honour of a birthday of George II., and were performed on such an occasion dinner given by the Mercers' Company in London. Henry Carey was a natural son of the marquis of Halifax, and was born in 1696. He died Oct. 4, 1743.

National Assembly.—A national assembly which commenced its sittings at Berlin, May 22, 1848, after coming in collision with the crown, was dissolved by force, Nov. 13. The deputies continued to meet, and the assembly was finally dissolved by royal proclamation, Dec. 5. The old German Diet at Frankfort passed a resolution, March 30, 1848, summoning a German national assembly which met at Frankfort in April, 1848. Its sittings were removed to Stuttgart, in Württemberg, May 30, 1849, and the assembly was dissolved by the police June 16.

National Assembly (France).—This title was assumed June 17, 1789, by the States-general of France, which had assembled at Versailles May 5. The hall of the Assembly was closed by order of the king June 20, upon which the members adjourned to the Tennis-court Hall, and took an oath not to dissolve until they had prepared and voted a constitution. Admission to the Tennis-court having been afterwards refused to them, the members met at the church of St. Louis, June 22. Louis XVI. reopened the Assembly June 23. The mob broke in Oct. 5, and both the king and the Assembly removed to Paris Oct. 6. The Assembly held its first meeting after the removal to Paris in the hall of the archbishop's palace, Oct. 19, 1789, from which place it was transferred to the Riding-school Hall in 1790. Mirabeau, one of the most celebrated leaders of the Assembly, was made president Feb. 1, 1791. It declared its sittings permanent July 17, 1791; but having entered into an agreement with the king, was dissolved Sept. 29, 1791. A new chamber, under the name of the National Legislative Assembly, met Oct. 1, 1791, and was dissolved in August, 1792. (See National Convention.) After the expulsion of Louis Philippe, the provisional government issued a decree summoning a national assembly for April 20, 1848. By a subsequent decree the elections were fixed for April 23, and the meeting was postponed till May 4. The Government decided in favour of a presidency, and a single chamber consisting of 750 members, both to be elected by universal suffrage. A motion for its dissolution, May 19, 1849, was carried Feb. 14, 1850, and the new elections were fixed for May 4. The new assembly met May 28, and was dissolved Dec. 2, 1851, by Louis Napoleon, who introduced a new constitution.

National Association (France) was formed at Paris, by the extreme democratic party, in 1831. The members bound themselves, on their life and honour, to combat the stranger and the Bourbons by all pecuniary and personal sacrifices, and to come to no accommodation with them, to whatever extremities the country might be reduced.

National Association for the Promotion of Social Science, formed under the auspices of Lord Brougham, first met at Birmingham Oct. 12—16, 1857. Its objects are, "To aid the development of the social sciences, and to guide the public mind to the best practical means of promoting the amendment of the law, the advancement of education, the prevention and the repression of crime, the reformation of criminals, the establishment of due sanitary regulations, and the recognition of sound principles in all questions of social economy." The annual meetings have been held at

National Associations.—In consequence of the bull of Pius V. against Queen Elizabeth, April 25, 1570, absolving all her subjects from allegiance, several Roman Catholics believed that in taking her life they would perform a meritorious act. Her life was in constant danger, and a national association, formed in London about A.D. 1582, to protect Queen Elizabeth from assassination, or to revenge her death, was legalized by 27 Eliz. c. 1 (1584), entitled "An Act for provision to be made for the surety of the queen's most royal person, and the continuance of the realm in peace." After the discovery of the Assassination Plot (q.v.), a similar association was formed in London, Feb. 27, 1866. The subscribers bound themselves to do their utmost to preserve the life of William III., or to avenge his death. Lord Keeper Somers removed from the commission of the peace all magistrates who refused to sign it. The association was embodied by 7 & 8 Will. III. c. 27 (1696), by which the signature of all persons holding civil or military appointments was rendered imperative. A similar document was signed by the Irish parliament Dec. 2, 1867.

National Convention (France), substituted for the National Legislative Assembly, met in one of the halls of the Tuileries, Sept. 21, 1792. Its sittings were afterwards transferred to the Riding School. Its first act was to declare royalty abolished, and to proclaim a republic. By another decree it was ordered that the old calendar should be abandoned, and that all public acts should be dated from the first year of the French republic. This era began Sept. 22, 1792. The convention sent Louis XVI. and his queen to the block, and having involved Europe in war, was dissolved Oct. 26, 1795. "The destruction of human life," says Alison, "which took place during its government, in civil dissension, was unparalleled; it amounted to above a million of human beings.

National Debt.—A few insignificant
long annuities created by Charles II. are too unimportant to be regarded as forming part of the English national debt, which was commenced by William III. in 1692. The following table exhibits its most important fluctuations:

(See Aids, Benevolences, and Funds.)

**NATIONAL GALLERY (London).—** In the year 1823 Sir George Beaumont expressed his willingness to present his collection of paintings to the nation, so soon as the formation of a national gallery should be decided upon. This led to the purchase of the Angerstein collection in April, 1824, by the government for £57,000. It was opened in Pall Mall, May 10, 1824, and the Beaumont pictures were added in 1825. The Rev. W. Howell Carr bequeathed his collection of pictures to the National Gallery in 1831; Mr. Robert Vernon presented his in 1847; Turner bequeathed some pictures in 1851, and Mr. Sheepshanks presented his valuable collection in 1857. A select committee of the House of Commons was appointed to inquire into the National Gallery in 1854, and the institution was reconstituted by a Treasury minute dated March 27, 1855. The building in Trafalgar Square, commenced in 1833, was completed and opened to the public in 1838.

**NATIONAL GUARD (France), a kind of citizen militia,** was first formed in Paris by the Committee of Public Safety in July, 1798. This force became so popular that in 1790 it was generally established throughout the kingdom, and was reorganized in 1795. The command was offered, in 1796, to Napoleon Bonaparte and refused by him. It was reorganized in 1805, 1813, and 1814; was disbanded by Charles X. April 13, 1827, and was re-established by the decree of March 25, 1830. The defection of the National Guard from Louis Philippe in 1848 was one of the principal causes of his overthrow. The National Guard throughout France was re-constructed by a decree dated Jan. 11, 1851.

**NATIONAL LIFE-BOAT ASSOCIATION was founded A.D. 1824,** for the establishment of life-boats and rocket-mortars at all the dangerous parts of the coast.

**NATIONAL POLITICAL UNION (London).—** This political association, formed for the purpose of giving unity to the proceedings of the various political unions throughout the country, held its first meeting in Lincoln's-Inn Fields, under the presidency of Sir Francis Burdett, Oct. 31, 1831. A resolution to resist the payment of taxes until the reform bill was made the law of the land was passed May 9, 1832.

**NATIONAL PORTRAIT GALLERY (London)** was established by a warrant of the Treasury Dec. 2, 1856, when a board consisting of thirteen trustees was appointed. The first meeting was held Feb. 9, 1857, and by a Treasury warrant dated Feb. 23 in that year, George Scharf, F.S.A., was appointed secretary and keeper. Temporary apartments were taken at 29, Great George Street, Westminster, and the collection was opened to the public, by tickets only, Jan. 15, 1859. The use of tickets was dispensed with Feb. 25, 1860. The number of visitors were

**NATIVITY.**—There are three ecclesiastical festivals so called. The first is to commemorate the birth of the Saviour (see Christmas); the second in order of appointment is the nativity of St. John the Baptist, which was instituted A.D. 488, and is celebrated June 24; and the third is the nativity of the Virgin Mary, which is observed by the Roman Catholic church Sept. 8, and was appointed by Pope Sergius I. (687—701).

**NATURAL HISTORY.**—“Solomon,” says the sacred narrative, “spake of trees, from the cedar that is in Lebanon even unto the hyssop that springeth out of the wall: he spake also of beasts, and of fowl, and of creeping things, and of fishes” (1 Kings iv. 33). B.C. 1000. The subject was treated of by Aristotle (c. 384—322), Theophrastus (b. 394—287), Dioscorides (A.D. 40—70), and by Pliny (A.D. 24—79). Otto Brunfels of Strasbourg published a work on botany a.d. 1530; and a professorship thereof was founded at Padua in 1533. Turner, an Englishman, who became dean of Wells, published at Cologne a work on birds a.d. 1548. The first part of Gesner’s important work, “The History of Animals,” appeared in 1561; a history of fishes was published by Salviani in 1558; Ray’s work on ornithology came out in 1688; Robert Mornon of Aberdeen, who is styled by Hallam “the founder of classification,” published his “Historia Plantarum Universalis” in 1672; and Tournefort his “Elémens de la Botanique” in 1694. Grew, who discovered the sexual system in plants, published his physiological theory in 1682.

**NATURALIZATION.**—Children born abroad were, under certain restrictions, entitled to inherit as if born in England, by 25 Edw. III. st. 1 (1391). This statute was renewed by 33 Hen. VIII. c. 25 (1541). The laws relating to aliens were amended by 7 & 8 Vict. c. 66.
The law for naturalization in a British colony is regulated by 10 & 11 Vict. c. 83 (July 22, 1847).

Nature—Printing, an invention for obtaining an exact reproduction of natural objects, so that numerous impressions may be taken, was perfected in the imperial printing-office in Vienna, by Andrew Worsing, about 1832. Kniphoft, of Erfurt, produced something of the kind in a crude form in 1761, and Kyhl, of Copenhagen, in 1833. The process was introduced into England by Hainry Bradbury in 1856.

Navarino (Prussia).—The Hunsites besieged this old town A.D. 1482, but retired without securing its capture. A treaty was concluded here in 1554, between Augustus, elector of Saxony, and John Frederick, the deposed elector. It played an important part during the Thirty Years' War, and was taken by the French in 1806. Napoleon I. advanced to this town April 29, 1813. The cathedral was completed in 1249.

Navarca (Greece).—The Athenians settled the Messenians at this town B.C. 455, but they were expelled B.C. 405 by the Locrics, who retained possession. It frequently changed owners, and having been given by Philip to the Aetolians, was by them defended against the Romans for two months. B.C. 191. The modern Lepanto (q. v.) occupies its site.

Navoo (North America).—This town, in Illinois, was founded by the Mormons A.D. 1840. Their temple was destroyed in 1848, when the Mormons were expelled, and sought refuge in Utah.

Naval Asylum (London).—The Royal Naval Asylum, instituted in 1801, was removed to Greenwich, and incorporated with the hospital in 1821.

Naval Battles. (See Sea-Fights in Index.)

Navarino (Greece) takes its name from a fortress built in the Middle Ages, and called Paleó-Avarino, which stood on the ruins of a fort built by the Athenians on the site of the ancient Pylus, B.C. 424. The name Avarino is derived from the Avars, who settled here in the 6th century of the Christian era. The modern town, Navarino, called by the Greeks Neokastoro, or Neocastro, is built at a short distance from the ruins of the old fort, now called Old Navarino. The Turks took Navarino A.D. 1500; it was wrested from them by the Venetians in 1686, and it was re-taken by the Turks in 1718. The Turkish garrison capitulated to the Greeks Aug. 9, 1821. The Turks recaptured the place after a short siege, May 18, 1825, and evacuated it after the battle of Navarino (q. v.), by a convention signed Sept. 7, 1825. The French troops, which were sent to the assistance of the Greeks, and entered Navarino Oct. 6, 1829, withdrew from the fortresses of Navarino, Modon, and Cronion, in July, 1833.

Navarino, (Sea-fight,) a combined British, French, and Russian fleet, engaged and completely defeated the Turkish and Egyptian squadrons, under Ibrahim Pasha, in the Bay of Navarino, Oct. 20, 1827. The forts on the coast took part in the engagement, and inflicted much damage on several vessels belonging to the allied fleet. The action, fought to secure the independence of Greece, resulted in the annihilation of the naval power of Turkey. It lasted four hours, and the scene of wreck and devastation which presented itself at its termination was such as has rarely been witnessed. Of the Turkish ships that took part in the commencement of the action consisted of seventy sail, no less than sixty-two were burnt, sunk, or driven on shore complete wrecks; and from a statement of the Turkish admiral, it appears that on board of two line-of-battle ships, each having a crew of 850 men, 650 were killed in one ship, and 400 in the other.

Navarre (France), called Lower or French Navarre, was a portion of the Spanish kingdom of Navarre assigned to John d'Albret A.D. 1515, on the extinction of the old kingdom of Navarre. Henry (afterwards Henry IV. of France) became prince of Navarre June 20, 1572, and on his accession to the French throne, July 31, 1589, Navarre was annexed to France. The formal incorporation took place in 1620.

Navarre (Spain).—This part of Spain, called by Prescott "the little kingdom of Navarre, embosomed within the Pyrenees," was inhabited at an early period by the Vascons, who were expelled by the Romans. It was seized by the Visigoths A.D. 470, invaded by the Saracens early in the 8th century, and fell under the sway of Charlemagne in 778. It became an independent state in 855. Ferdinand conquered it in 1512. The estates of Navarre took the solemn oath of allegiance to him March 23, 1513, and it was incorporated with Castile by a solemn act in the cortes of Burgos, June 15, 1515. The French, who invaded it in 1516, were defeated March 25, and Cardinal Ximenes ordered the principal fortresses to be destroyed. Francis I., of France, invaded Navarre in 1521. His army having sustained a severe defeat at Esquirois, June 30, 1521, was compelled to retire.

Navigation.—The earliest intimation of this art is in connection with the Deluge,
when God commanded Noah to build the ark (Gen. vi. 14), A.D. 2468; which was completed, and religiously blessed, by Noah and his family, with all other inmates, B.C. 2348. In the early period of their history the Egyptians carried on maritime traffic with India, Sesostris being represented as the first who sailed in “long ships,” B.C. 1416–1533; although the ships of the Phcenicians had visited the principal parts of the known world B.C. 1800. The famous expedition of the Argonauts indicates the state of this art among the Greeks at that time, B.C. 1263. In their wars with the Carthaginians, the Romans found it necessary to supply themselves with a navy, B.C. 260. Venice began to assume importance on the seas about A.D. 600; and the Genoese about A.D. 1000. In modern times the art has attained a high degree of perfection by the aid of logarithms, invented A.D. 1614, and the quadrant, in 1731.

Navigation Laws.—Foreign ships were prohibited from fishing and trading on the British coasts by 5 Eliz. c. 5 (1562). The Act of Navigation of the republican parliament, passed Oct. 9, 1651, prohibited all importation into the British territories, except in ships owned and manned by English subjects, and these restrictions were confirmed by 12 Charles II. c. 18 (1669), which is sometimes styled the Charta Maritima. Several acts of similar import were afterwards passed, which were consolidated and amended by 3 & 4 Will. IV. c. 54 (Aug. 28, 1833). Most of these restrictions were repealed by the act to amend the laws in force for the encouragement of British shipping and navigation, 12 & 13 Vict. c. 29 (June 26, 1849), which came into operation Jan. 1, 1850. Steam navigation is regulated by 14 & 15 Vict. c. 79 (Aug. 7, 1851), which took effect Jan. 1, 1852. Further provisions were made by the Merchant Shipping Law Amendment Act, 16 & 17 Vict. c. 131 (Aug. 20, 1853). Foreign ships were admitted to the coasting trade by 17 & 18 Vict. c. 5 (March 23, 1854).

Navigator’s Islands (Pacific), also called the Samoan Islands, a group consisting of three larger and five smaller islands, were visited by missionaries from Otahiete in 1839.

Navy.—A writer in Notes and Queries (xi. p. 424) asserts that this term, as applied to a railway labourer, is a corruption of the word navigator, the name by which men employed in constructing navigable canals were designated. Navy took the place of the more appropriate term, excavator. Towards the end of 1854, a number of navvies were sent to the Crimea to construct a line of railway between Sebastopol and Baladlaya, which place they reached in February, 1855.

Navy (English).—The ancient Britons made use of boats rudely formed of wickerwork, and covered with skins. It was not, however, until the reign of Alfred that a fleet was constructed,

B.C.
53. The use of boats of various sizes, for warlike as well as for commercial purposes, is common amongst the early Britons at this time.

A.D.
897. Alfred the Great causes a fleet of “long ships” to be built to resist the Danes.
864. Edgar, in a charter of doubtful authenticity, asserts his authority over the ocean lying round Britain.
973. Edgar, with all his marine forces, makes a triumphal procession on the river Dee, his own barge being rowed by eight tributary kings.
976 to 1016. The laws of Ethelred order ships of war to be prepared annually after Easter.
1008. Ethelred orders ships to be built throughout the kingdom, and prepares a large fleet.
1012. Ethelred hires forty-five ships from the Danes, and levies the “hereguard” to defray the expense of his navy.
1063. Edward the Confessor abolishes the hereguard, “wherein the people were manifoldly distressed.”
1069. Harold II. assembles a large fleet at Sandwich. Sept. 8. He is compelled to dismiss it for want of provisions. Sept. 27. The fleet, with which Edward the Confessor embarked for England is variously estimated. Thirerry states that it numbered 400 ships and more than 1,000 transport boats. Other writers mention different numbers, ranging from 693 to 3,000 vessels.
1171. Henry assembles a large fleet to convey his army to Ireland, and lands at Waterford Oct. 13.
1181. Henry II. prohibits the sale of British ships to foreigners.
1189. Richard I.’s fleet for the invasion of Palestine numbered 100 ships and 14 busses; viz., “vessels of great capacity, very strongly and compactly built.” Sir Harris Nicolas states that the reign of Richard I. forms the great epoch in the naval history of England.
1191. Richard I.’s fleet is scattered by storms in the Mediterranean.
1200. King John is stated, on doubtful authority, to demand that all ships whatever should lower their sails, as a token of respect, when they met his fleet at sea.
1294. Edward I. divides the navy into three squadrons—Yarmouth, Portsmouth, and in Ireland and the West.
1303 to 1307. A document which asserts the right of England to the sovereignty of the narrow seas was signed some time between these years.
1320. Oct. A treaty is concluded with the Flemings, in which they admit the English sovereignty of the narrow seas.
1346. July 11. The fleet in which Edward III. invaded France is estimated at 1,600 to 1,690 vessels; but this is regarded as an exaggeration.
1431. Henry V. causes larger ships to be built than were before known, and throughout his reign evinces a great desire for the improvement of the navy.
1415. Aug. 10. Henry embarks for France with a fleet of 1,500 ships.
1488. Henry VII. builds the Great Harry, the first ship of the royal navy.
1500. The king’s ships form a distinct class, exclusively devoted to warlike purposes, about this year.
1512. Henry VIII. establishes the Trinity House for the encouragement of navigation.
1515. Henry VIII. builds the Henry-Graece-à-Dieu.
1546. The royal navy consists of 98 ships, amounting to 12,485 tons, with 8,540 sailors.
NAXOS, or NAXIA (Archipelago), one of the largest of the Cyclades, is said to have received its name from Naxos, who planted a colony of Carians in the island. The Persians having assailed it without success B.C. 501, conquered it B.C. 490. The Athenians reduced the inhabitants to subjection B.C. 471. Marco Sanudo, a Venetian, took possession of Naxos, and founded a state called the duchy of the Ægean Sea, A.D. 1207. It lasted 360 years, and was overthrown by the Turks in 1566. Naxos now forms part of the modern kingdom of Greece. It was made the seat of a bishop in the 5th century, and its first bishop, Barachus, was present at the council of Chalcedon in 451.

NAXOS, or NAXES (Sicily).—This, the most ancient of the Greek colonies in Sicily, was founded B.C. 735, and is said to have been thus named because among its first settlers were some people from the island of Naxos. Hippocrates of Gela conquered it about B.C. 485, and it was subject to Hicron of Syracuse B.C. 476. Dionysius of Syracuse seized it B.C. 403, sold the inhabitants to slavery, and destroyed the city. (See TARANTO, SICILY.)

NAZARENES.—This term was applied to the Jewish Christians as a term of reproach (Acts xxiv. 5), A.D. 56, and also to the early Jewish Christians, who maintained that they were bound to observe the Mosaic law. The Nazarenes afterwards held peculiar notions on the divinity of Christ, and are mentioned as heretics by Epiphanius in the 4th century.

These heretics are said to have sprung up in the 2nd century. Some authorities contend that the Christians recognized this name till the heresy of the Nazarenes broke out, and that in consequence they adopted the appellation of Christians (Acts xi. 26), A.D. 41. Of course these writers affix a much earlier date than that usually accepted for the origin of the heresy.
naval action between De Sufren with a French, and Sir Edward Hughes with an English, fleet, took place off this port, July 6, 1752. The former lost 168 killed and 601 wounded, and the latter 77 killed and 233 wounded, and the French fleet escaped.

Negrais (Bay of Bengal).—The English formed a settlement on this island a.d. 1687, but it was soon after abandoned. It was occupied by an English force in 1761, and was ceded in 1757 to the Burmese, who attacked it and slaughtered all the inhabitants in 1759. The English captured it during the Burmese war in 1824, and it was ceded to the East-India Company by the fourth article of the treaty of Yandaboo, Feb. 24, 1826.

Negropont (Aegean Sea), the ancient Chalcis (q.e.), in the island of Euboea, also called Negropont, fell under the rule of the Venetians a.d. 1204, and was wrested from them by the Turks a.d. 1470. The Venetians failed in an attempt to regain possession in 1688. During the insurrectionary war, the pasha was besieged in the fortress, which was relieved by the Turkish fleet March 17, 1833. A reinforcement of 5,000 men enabled the Turks to resume the offensive in June, 1824.

Negus.—This beverage, consisting of wine mixed with water, was named after Colonel Francis Negus, commissioner for executing the office of master of the horse during the reign of George I. During a quarrel, in which high words were used between some Whigs and Tories, he recommended them to dilute their wine as he did, and from this circumstance wine and water was nicknamed negus.

Nellgerries (Hindostan).—This range of mountain territory, in the presidency of Madras, remarkable for its salubrity, came into the possession of the English a.d. 1799. Ootakamund, the first sanitary station on the northern mountains, was founded in 1822.

Neisse (Prussia) is said to have been built a.d. 965, but was inhabited before 1548. Frederick II. took it in December, 1741, and he laid the first stone of Fort Preussen in 1743. The Austrians besieged it without success in 1758. The episcopal palace is an ancient building, and here in 1769 a celebrated meeting took place between Frederick II. and the emperor Joseph II. The French under Vandamme laid siege to Neisse Jan. 17, 1806. General Kleist, with 4,000 men, attempted to relieve it during the night, April 20, 1807, but was defeated by the arrival of Jerome Bonaparte with a powerful reinforcement. It capitulated June 6, 1807, when this large fortress, with 320 pieces of cannon and 6,000 men, fell into the hands of the French. The huge conflagration of 10,000 volumes, was burnt in the siege of 1807.

Nelson (New Zealand) was settled a.d. 1843. Extensive coal-fields were discovered in 1852, and gold was found in the vicinity in 1856.

Nemean Games were celebrated at Nemea (whence their name), a village in Argolis. According to the legend, they were instituted in memory of Ophelles, or Acharnæus, who was killed by a dragon while Hypsipyle, his nurse, was gone to show the seven champions, on their way to attack Thebes, the nearest well. They were first celebrated b.c. 1230, and are said to have been revived by Hercules b.c. 1226. Philip of Macedonia was made president of the Nemean games by the Argives b.c. 208. Having fallen into neglect, they were restored by the emperor Julian a.d. 362, and were solemnized for the last time in the reign of Hadrian, about 396.

Nemours (France).—The old castle, formerly the seat of the dukes of Nemours, contains a library of 10,000 volumes. An edict issued here by Henry III. of France, in 1585, revoked all concessions made to the Huguenots. The title of duke was first borne by the Armagnac family, descended from Caribert, son of Clotaire II., who died a.d. 630. Louis, the last duke of that family, was killed at the battle of Cerignola, in Apulia, April 28, 1503. Gaston de Foix was made the next duke by Louis XII., and he was killed at the battle of Ravenna, in 1512. The title was given to Philip of Savoy by Francis I. in 1523, and continued in his line until 1639. It is borne by the second son of the late Louis Philippe.

Neoplatonists.—This name is given to the philosophers of the school of Alexandria who endeavoured to combine the doctrines of Plato and Christianity into one system. The sect was founded by Ammonius Saccas, who died a.d. 243, and numbered Plotinus, who flourished in 254, and Porphyry, who died about 305, among its most distinguished members.

Nepaul (Hindostan) is said to have been conquered a.d. 1323 by Hurr Singh, prince of Oude. The Ghoorkhas completed the conquest of Nepaul in 1765. A treaty of commerce was concluded between the British government and Nepaul, March 1, 1792, and by the treaty of Dinapore, concluded Oct. 1801, political relations were established between the two governments. This alliance was dissolved in 1804, and, until 1812, little intercourse took place. The repeated remonstrances of the British against border invasions were neglected, and, Nov. 1, 1814, war was declared. It was carried on with great vigour, and the Nepalese, after numerous defeats, were obliged to sue for peace. The treaty of Segoulee was signed Dec. 2, 1815. The signature of the rajah having been withheld, the British again took the field, and the Nepalese, after having sustained several severe defeats, sued for peace, and the signed treaty of 1815 was duly ratified Mar. 4, 1816. Jung Bahadur sent a contingent of Ghoorka troops to the aid of the British during the mutiny of 1857.

Nephalia.—Festivals celebrated in Greece in honour of various deities were so called because no wine was used during the festivities. They were instituted at Athens b.c. 613.

Neptulites, Epithallites, or White 2 Q
HUNS, a branch of the nation of the Huns, from whom the present Turomans are probably descended, emigrated to the eastern shores of the Caspian Sea, after their conquest by the Sienpi Tartars, A.D. 100. Having extended their conquests from that point to the centre of India, an expedition was undertaken against them by Firouz, king of Persia, who encountered the cavalry of the Huns supported by a line of 2,000 elephants, and lost both his army and his life, A.D. 488. They were subdued by the Turks about A.D. 545.

NEPHEM.—The planet Uranus, discovered by the elder Herschel A.D. 1781, had deviated so much from its primary position, that in 1830 the longitudinal error amounted to half a minute of space. This deviation could only be accounted for by the disturbing action of an undiscovered planet, which was discovered and called Neptune by Mr. Adams, of St. John's College, Cambridge, Oct. 1, 1843. About the same time M. Le Verrier, the famous French astronomer, made a similar discovery.

NERCHINS, of NIPCHOO, (Treaty,) was concluded between Russia and China, setting the boundaries of these respective empires, Oct. 21, 1721. It provided for a Russian resident at Pekin, and permitted 200 merchants to trade in China once in three years. In consequence of Catherine's death, it was not ratified until June 14, 1728.

NERSHEIM (Battle).—An indecisive action was fought at this place, in Germany, between the French, commanded by Moreau, and the Austrians, led by the archduke Charles, Aug. 10, 1796.

NERI. (See BIANCHI.)

NERVI.—This people of Belgica are first mentioned by Cæsar B.C. 57, when he defeated them in a great battle on the banks of the river Sambre. They rose again in arms B.C. 54, when they joined the Eburones in an unsuccessful attack upon the camp of Quintus Cicerio. They were finally subdued by the Romans B.C. 53. At a meeting of the Gallic states, B.C. 52, the Nervi sent 5,000 men as their contingent to the relief of Alesia.

NISBIT MOORE, (Battle,) was fought May 7, 1402, between the Scotch, under Sir P. Hepburn, of Hailes, and the English, under the earls of Percy and March. The Scotch were defeated, their leader and most of his knights were slain, and the rest taken prisoners.

NESTORIANS.—This heretical sect at first consisted of the followers of Nestorius, bishop of Constantinople (A.D. 428-431), who taught that the Virgin should not be worshipped as the mother of God, and that the divine and human natures were not so united in Christ as to form but one person. His views were condemned, and he himself deposed, by the council of Ephesus (the third general council) in 431; and after leading the life of an exile in Arabia, he died in Egypt about 439. Barsumas, bishop of Nisibis, established the doctrines in Persia in 440, and founded the school of Nisibis, which subsequently carried Nestorianism into Egypt, Syria, Arabia, India, Tartary, and China. Babacbus, archbishop of Seleucia, held a council in 499, at which the whole Persian church professed Nestorian views, and made regulations prohibiting celibacy in the priesthood. A separate patriarchate, which was established about the same time at Seleucia, was transferred to Bagdad in 552, and afterwards to Mosul. When the Portuguese, under Vasco de Gama, arrived on the Malabar coast in 1498, they found upwards of 100 churches belonging to the Nestorian Christians. The inquisition was established at Goa to repress the heresy, and in 1807 the churches had dwindled to fifty-five. The Nestorians reject image-worship, and regard the Scriptures as the only source whereas true doctrine is to be derived.

NETHERLANDS, or LOW COUNTRIES.—Names often applied to the territories of which Holland (q. v.) and the modern kingdom of Belgium (q. v.) are composed.

NEUBURG (Bavaria).—The French seized this town, in the circle of Swabia, A.D. 1702. They abandoned it on the approach of Marlborough, July 7, 1704.

NEUCHÂTEL, or NEUCHÂTEL (Switzerland), was a fief of the old kingdom of Burgundy, and had its line of counts till A.D. 1288. It was admitted into the Swiss confederation in 1398, and the county of Valendis having been joined to it in 1579, the counts changed their title to that of Prince of Neuchâtel. On the death of William III. of England, on whom the title had devolved, it passed to his nephew, Frederick I. of Prussia, in 1702. Napoleon I. compelled the king of Prussia to surrender it in 1806, and gave it to General Berthier; but it was restored to Prussia in 1814. A republican government was established in 1848, since which time the king of Prussia's authority has been but nominal. An attempt was made, Sept. 2, 1856, to re-establish the authority of the king of Prussia. It proved unsuccessful, and complications having arisen, the great powers at last mediated between the contending parties in a conference assembled at Paris March 25, 1857, and a treaty was signed at Paris May 28, by which the king of Prussia resigned his sovereignty, retaining only the title of Prince of Neuchâtel.

NEUFUSSAI (Hungary).—This fortress, taken by the Turks A.D. 1663, was wrested from them by the duke of Lorraine in 1685.

NEUSTRIA (France).—On the death of Clovis at Paris, Nov. 27, 511, his kingdom was divided, when Soissons and its territory, afterwards called Neustria, or West France, was allotted to his son Clotaire I., who reigned from 511 to 561.

SOVEREIGNS OF NEUSTRIA.

Carlowingian dynasty. The castle of Newmarket was built A.D. 1125 by Alexander, bishop of Lincoln, who, having rebelled against King Stephen in 1139, was taken and sent prisoner to his own castle. Here King John died, Oct. 19, 1216, and Cardinal Wolsey was a guest after his fall in 1530.

Edward VI. granted its first charter of incorporation, which was extended by Charles II. Newmarket was given up to the Scotch army May 8, 1646. In 1775 the wooden bridge over the Trent was replaced by one of brick.

**New Britain (Pacific Ocean).**—William Dampier discovered this island, separated from New Guinea by a narrow strait, Feb. 27, 1700.

**New Brunswick (North America),** originally formed a part of Nova Scotia, at that time called Acadia, or New France. The first attempt to colonize it was made A.D. 1639, and a number of French emigrants settled in the country in 1672. It was ceded to England by the treaty of Utrecht, April 11, 1713. In 1764 the first British colonists landed, and in 1785 the country was separated from Nova Scotia and named New Brunswick. A great conflagration occurred in this colony in 1825, when a district of more than 100 miles in length, including many towns, was destroyed.

**Newburn (Battle).**—The Scotch defeated some of the adherents of Charles I. at this place, upon the Tyne, near Newcastle, Aug. 27, 1640.

**Newbury (Battles).**—The royalist army, commanded by Charles I., attacked the parliamentarians at this village in Berkshire, Sept. 20, 1643. The cavalry were completely defeated by the royalists, but the infantry stood firm, and Essex was enabled to retire in good order. Lord Falkland fell in this encounter. A second battle was fought at Newbury, Oct. 27, 1644, when the parliamentarians, commanded by Waller and the earl of Manchester, failed in their attack upon the king's forces, and afterwards withdrew into winter quarters.

**New Caledonia (Pacific Ocean).**—Captain Cook discovered this island Sept. 4, 1774, and landed upon it and named it the following day.

**Newcastle Administration.**—The death of Mr. Pelham, at that time prime minister, occurred March 6, 1754, and his brother, the duke of Newcastle, a few days afterwards, was appointed the head of the government. The cabinet consisted of—

**New Albany (North America).**—This city, on the Ohio, in Indiana, was founded A.D. 1813.

**New Amsterdam (Berbice).**—This town was commenced by the Dutch A.D. 1796.

**Newark (Nottinghamshire).**—The castle of Newark was built A.D. 1125 by Alexander, bishop of Lincoln, who, having rebelled against King Stephen in 1139, was taken and sent prisoner to his own castle. Here King John died, Oct. 19, 1216, and Cardinal Wolsey was a guest after his fall in 1530.

Edward VI. granted its first charter of incorporation, which was extended by Charles II. Newark was given up to the Scotch army May 8, 1646. In 1775 the wooden bridge over the Trent was replaced by one of brick.
The duke of Marlborough superseded Lord Gower as privy seal, Jan. 8, 1755; and Sir George Lyttleton, bart., afterwards Lord Lyttleton, became chancellor of the exchequer, Nov. 22, 1755. Mr. Henry Fox, afterwards Lord Holland, succeeded Sir Thomas Robinson as one of the principal secretaries of state, Nov. 25, 1755. The duke of Newcastle resigned office Nov. 11, 1756. (See Devonshire Administration.)

**Newcastle and Pitt Administration**, also called Chatham (First) Administration. The Devonshire Administration was dissolved April 5, 1757, and after negotiations that extended over nearly three months, the earl of Newcastle returned to the Treasury, June 29, while William Pitt, afterwards Lord Chatham, was the actual head of the government. The cabinet was thus constituted:

| Treasury | Duke of Newcastle. |
| Lord Keeper | Sir Robert Henley. |
| President of the Council | Earl Granville. |
| Privy Seal | Earl Temple. |
| Chancellor of the Exchequer | Mr. H. Elibon Legge. |
| Principal Secretaries of State | Earl of Gower. |
| Admiralty | Earl of Holderness. |
| Ordinance | Duke of Marlborough. |
| Board of Trade | Earl of Halifax. |

George II. died suddenly Oct. 25, 1760, but the Newcastle and Pitt Administration retained office, though certain changes followed in a short time. Lord Keeper Henley was made lord chancellor Jan. 16, 1761. Viscount Barrington became chancellor of the exchequer March 12, 1761. Mr. Charles Townshend took the Ordnance March 18, 1761. Lord Sandys succeeded the earl of Halifax as president of the Board of Trade, March 21, 1761. The earl of Bute succeeded the earl of Holderness as one of the principal secretaries of state, March 25, 1761. Pitt having obtained information of a secret treaty between France and Spain, urged upon his colleagues to declare war against Spain. This they refused to do, whereupon he resigned, and the earl of Egremont was appointed in his place, Oct. 9, 1761. His relative, Earl Temple, followed his example, and the privy seal was intrusted to the duke of Bedford, Nov. 27, 1761. The ministry struggled on without its real head until May 1762, when the earl of Newcastle resigned. (See Butts Administration.)

**Newcastle-upon-Tyne** occupies the site of the Pons Aeli, a fortress of the Romans built about A.D. 120. The Saxon kings had a residence here called Ad Murum, and in the year 653 it was the scene of the battle of two royal converts—Penda, king of the Mercians, and Sigibert, king of the East Angles. The Danes destroyed all the monasteries and churches of Newcastle, and murdered their inmates, in 876. At the time of the Conquest it was called Monkchester, from the number of monks. The castle which gives its name to the town was built in 1080 by Robert Curthose, the eldest son of William I. It was seized in 1135 by David I., king of Scotland. The Scoticheld it till 1157, when it was restored to Henry II. Balliol, king of Scotland, did homage for that crown to Edward I. in the hall of the castle, in 1292. In the war between Charles I. and his parliament, Newcastle embraced the king's cause, but was besieged by the earl of Leven, and, after a gallant resistance, was taken, Oct. 29, 1644. Newcastle was the head-quarters of the king's army in the rebellion of 1715. St. Nicholas' Church, built in 1091, and destroyed by fire in 1210, was rebuilt in 1350. St. Andrew's Church was built in the 12th century. All Saints' Church, commenced in 1786, and completed in 1796, stands on the site of an old edifice that existed in 1284. The Literary and Philosophical Society was founded in 1793, and the new lecture-room in 1802. The assembly-room was founded in 1766, and the dispensary in 1777. St. Thomas's Church, commenced in 1728, was opened in 1730. The town gaol was built in 1827; and the theatre, built in 1788, was pulled down in 1835, and was re-opened in 1837. The Newcastle and Darlington Railway was opened April 15, 1825. A fire broke out about 12 a.m. Oct. 6, 1854, in Gateshead, and, having spread to Newcastle, many lives were lost, and property estimated at more than a million sterling was destroyed.

**New College** (London) was founded at St. John's Wood, A.D. 1850, for the education of dissenting ministers.

**New College** (Oxford), at first called St. Mary of Winchester, was founded by William of Wykeham, who was born at Wykeham, in Hampshire, A.D. 1324. The foundation-stone was laid March 5, 1380, and the building was completed in six years, the society taking possession April 14, 1386. William of Wykeham died Sept. 27, 1403, and was buried in the chantry of Winchester Cathedral. James I., his queen, and the prince of Wales, were entertained in the hall of New College, Aug. 29, 1605. The garden-court was built in 1634, and the chapel was restored by Wyatt in 1759.

**New England** (North America).—The Puritans gave this name, A.D. 1620, to their settlements in Massachusetts Bay and the surrounding districts of North America.

**New Exchange** (London), founded in the Strand June 10, A.D. 1609, was removed in 1737.

**New Forest** (Hampshire) was formed by order of William I., A.D. 1079. William of Malmesbury says that William I. destroyed the towns and churches for more than thirty miles, for the purpose of forming this forest; and others affirm that he levelled fifty-two churches to the ground. William Rufus, while hunting in this forest, was killed by an arrow shot by Walter Tyrrell, Aug. 2, 1100. In 1758 a survey was taken of the New Forest, when the amount of land was estimated at 92,362 acres. The timber was found to be rapidly decaying in the reign of Charles II.; and John
Norton, woodward of the New Forest, was ordered to inclose 300 acres as a nursery for young oaks, Dec. 13, 1669. A hurricane swept over the New Forest in November, 1703, when no less than 4,000 of the best oaks were destroyed.

Newfoundland (Atlantic Ocean) was visited by Norwegians about A.D. 1000, and re-discovered by John Cabot June 24, 1497. A settlement was attempted in 1536 without success; and a charter for the colonization of Newfoundland was granted May 2, 1610. Three settlements were afterwards made, viz., by Lord Baltimore, in 1623; by Lord Falkland, in 1633; and by Sir David Kirk, in 1654. Squabbles between the French and English settlers led to hostilities in 1696, and again in 1702; but by the peace of Utrecht it was declared to belong to England, April 11, 1713. An act was passed prohibiting the Americans from fishing, March 30, 1775; but by the treaty of Versailles this was withdrawn, Sept. 3, 1783. The representative assembly was established in 1832, and Newfoundland was made a separate province in 1833.

New France (North America).—A French expedition, under Verazzano, sent out by Francis I., took possession of a large extent of territory on the north-east coast of America, and gave it the name of New France, A.D. 1624. It is called Canada (q.v.).

Newgate (London), mentioned as a prison as early as A.D. 1207, was burnt in the great fire of 1666, and was afterwards rebuilt. It was pulled down in 1778, and the new edifice was nearly completed when the Gordon rioters attacked it, June 6, 1790, liberated the prisoners, and set it on fire. It was rebuilt, and ceased to be a debtors' prison in 1815. Mrs. Fry commenced her labours for improving the condition of the female prisoners in Newgate in 1808. She states that the usual amusements were swearing, gaming, and fighting; and that some were destitute even of clothing, while others enjoyed delicacies sent in by their friends. An attempt was made to classify prisoners in 1811; and the inspectors of prisons, in their annual reports of 1836, 1838, and 1843, called attention to the serious evils arising from gaol association. The interior of the prison was repaired in 1851.

New Georgia (Pacific Ocean).—Vancouver bestowed this name upon the various groups of islands in Nootka Sound, A.D. 1792. The term is sometimes restricted to Solomon's Islands, discovered by the Spaniard Mendana in 1567.

New Granada (South America) was discovered by Ojeda, A.D. 1499. The first settlement in the country was made by the Spaniards A.D. 1510. The people discovered their independence in 1811, united with Venezuela in 1819, and with other South American states in 1823. The union was dissolved in 1831; New Granada became an independent republic, and General Santander was installed president, April 1, 1833. It has been the scene of numerous revolutions.

New Guinea (Pacific Ocean). (See Papua.)

New Hampshire (North America) was first settled A.D. 1623, and placed itself under the jurisdiction of Massachusetts in 1641. It was made a separate province by act of parliament in 1679, and the first congress assembled in 1776. A constitution was drawn up in 1784, and amended in 1792.

New Harmony (North America).—The German Socialists removed to this town, in Connecticut, A.D. 1814. They sold the place to Robert Owen in 1824, but his attempt to establish a communist town resulted in a failure.

New Haven (Connecticut), was first settled A.D. 1633, by a colony of English under Theophilus Eaton, the first governor, and C. Mather, the first minister, called the Moses and Aaron of the settlement. It was united by royal charter to Connecticut in 1663, and in 1784 New Haven was constituted a city. The most important institution in this city, and the oldest and most extensive in the United States, is Yale College, founded in 1701 at Killingworth, and removed to New Haven in 1717. New Haven was taken by the British in July, 1779. The constitution of the United States was adopted by New Haven, Jan. 9, 1783.

New Hebrides (Pacific Ocean).—One portion of this extensive group was discovered by Quiros, A.D. 1605, and was proved to be islands by Bougainville in 1768. Captain Cook explored the group, giving it the name of the New Hebrides, in July, 1774. Captain Bligh discovered the most northern portion of the group in 1789.

New Holland.—The name given by the Dutch to Australia (q.v.).

New Independents.—This sect was founded by John Robinson, a Norfolk divine, in 1616. They maintain that every congregation of Christians has, according to the New Testament, full ecclesiastical power over its members, and hence they are called New Independents. The Scottish Independents, also called New Independents, and Haldamites, or Haldanite Independents, from their founder, Robert Haldane, arose in 1797.

New Inn (London) was founded A.D. 1485, and is attached to the Middle Temple.

New Inn Hall (Oxford).—A collection of houses called Trileck's Inns A.D. 1349, from John Trileck, bishop of Hereford, were inherited in 1381 by William of Wykeham, who granted them to New College, and they received the name of New Inn Hall. An additional range of building was added in 1836.

New Ireland (Pacific Ocean) was discovered and named by Carteret, A.D. 1767.

New Jersey (North America) was first colonized by the Dutch from New York, between A.D. 1614 and 1620. A colony of Swedes and Finns settled here in 1627. Charles II. in 1664 granted this territory to

597
his brother the duke of York, who sold the patent to Lord Berkeley and Sir G. Carteret. The Dutch in 1673 regained possession, but resigned it in 1674. Great confusion having arisen in regard to the appointment of governors, the proprietors, Lord Berkeley, &c., in 1702 surrendered the government to the crown. New Jersey formed part of the state of New York until 1766, when a separation ensued. It published its constitution July 2, 1776, and was one of the original states of the Union.

NEW LARK (Monmouthshire) was founded by Robert Dale, a.d. 1753. Robert Owen endeavoured to establish communism here in 1801.

NEW LONDON (North America).—This town, in Connecticut, founded a.d. 1644, was taken and burned by Arnold, Sept. 8, 1781.

NEW MARKET (Cambridgeshire).—The earliest mention of this town is in a.d. 1227, when it is supposed to have derived its name from a market removed hither from Exning on account of the plague. James I. erected a hunting-seat, afterwards called the King's House. Having fallen into decay, it was restored by Charles II., who was a great patron of horse-racing. It was almost entirely destroyed by fire March 22, 1683, during the races, and a large portion of the town fell a sacrifice to the devouring element on the same occasion.

NEW MEXICO (America).—This territory of the United States was formed Sept. 9, 1850, out of the country ceded by Mexico after the war with the Americans.

NEW ORLEANS (Louisiana) was founded by Bienville, the French governor of Louisiana, a.d. 1717. The colony was conveyed to Spain in 1762, and restored to France in 1801. Napoleon founded the United States in 1803. The battle of New Orleans took place Jan. 8, 1815, between the Americans, under General Jackson, and the English, under General Pakenham, in which the latter were defeated with the loss of 3,000 in killed and wounded. The university of New Orleans was founded in 1849.

NEW PHILIPPINES (Pacific Ocean), more properly called the Carolines, were named from La Carolina, a term applied to one of those islands visited by the Spaniard Lazeano a.d. 1686. An attempt was made by the Jesuits of Manila to establish missions here about 1600. There was a small pox committed terrible ravages among the natives in 1654.

NEWPORT (Isle of Wight).—The parish church was built a.d. 1172; and the grammar-school was founded in 1619. In the school-room of the town negotiations were opened between Charles I. and the parliament, Sept. 18, 1648, and closed, the king having agreed to some of the demands, Nov. 27, 1648. The coffin of the Princess Elizabeth, daughter of Charles I., was discovered in the church in 1793.

NEWPORT (Monmouthshire).—Edward III. granted this town its first charter, which was confirmed by James I. Of the old castle, supposed to have been founded by Robert Fitzroy, earl of Gloucester, only a square tower and a part of the great hall now remain. A handsome stone bridge was built over the river Usk in 1800. This town was the scene of serious Chartist riots, Monday, Nov. 4, 1839. The rioters, led by one John Frost, a retired draper of Newport, amounting to 10,000 in number, armed with guns, &c., met in front of the Westgate Hotel, where the magistrates were assembled, with about 30 soldiers and several special constables. The rioters commenced breaking the windows of the hotel, and fired upon the inmates. The soldiers succeeded in dispersing the mob, which, with its leaders, fled from the city, leaving about 20 dead, and many dangerously wounded. Frost and several of his associates were apprehended on the following day, tried at Monmouth Dec. 31, and found guilty of high treason, Jan. 5, 1840. Their sentence was subsequently commuted into transportation for life.

NEW RIVER (London).—In 1605 the lord mayor and citizens of London were empowered to bring a stream of fresh water to the south parts of the city of London, from Chadwell and Amwell, in the county of Hertford, but nothing was done till Hugh Middleton, offered, March 28, 1609, to begin the work within two months, and to make and finish the river, provided the common council would transfer to him the powers vested in them by two acts of parliament. This was agreed to, and the New River was completed as far as the basin at Islington, Sept. 29, 1613.

NEWRY (Ireland).—A Cistercian abbey was founded here a.d. 1157, by Maurice Mac Loughlin, king of Ireland, and a castle was built by John De Courcy. It was destroyed in 1315, and rebuilt in 1480. Marshal Bagnal restored the castle, rebuilt the town, for which James I., in 1613, granted him the entire lordship in fee to him and his heirs for ever, and peopled it with Protestant settlers. After the Restoration, the town continued to flourish till 1659, when it was burned by the duke of Berwick in his retreat from Duke Schomberg. The custom-house was built in 1726. A very considerable trade was carried on with the West Indies in 1758.

NEWS-BOOKS, or pamphlets of news, the forerunners of the modern newspaper, was first issued from the English press in the 17th century. They were treated of some political event, either foreign or domestic, and did not appear at stated periods, or even under the same title. A proclamation against certain "books printed of news, of the prosperous successes of the king's majesty's arms in Scotland," was issued in 1644. A collection, commencing in 1679, is preserved in the British Museum. The news-books continued to appear until the close of the 17th century, Burton remarks, in the "Anatomy of Melancholy," of which the first edition was published in 1644, "If any read now-a-days, it is a play-book, or pamphlet of news." (See News-Papers.)

NEWS-LETTERS were used in this country
as a medium for the circulating of intelligence before the printed news-book (q. v.), the forerunner of the modern newspaper, made its appearance. A writein the new edition of the "Encyclopædia Britannica" remarks (xvi. 180), "Their first journalists were the writers of 'news-letters.' Originally the dependents of great men, each employed in keeping his own master or patron well informed, during his absence from court, of all that transpired, the duty grew at length into a calling. The writer had his periodical subscription list, and, instead of writing a single letter, wrote as many letters as he had customers. Then one, more enterprising than the rest, established an 'intelligence-office, with a staff of clerks.' News-letters, giving an account of events that happened during the Wars of the Roses, are given in Sir John Fenn's collection of the "Paston Letters."

NEW SOUTH SHETLAND ISLES (Pacific Ocean).—The group, consisting of twelve islands, was discovered by Captain Smith A.D. 1819.

NEW SOUTH WALES (Australia).—The eastern coast of Australia, from Cape Howe to Cape York, was discovered by Captain Cook, A.D. 1770. He took possession of it in the name of the king, calling it New South Wales, and he named the island in which he performed the ceremony, Possession Island. The first convicts arrived Jan. 29, 1788, and the settlement formed at Botany Bay was transferred to Sydney (q. v.) in 1789. The colony received a new constitution in 1855.

NEWSPAPERS.—The Romans possessed publications agreeing in some respects with the modern newspaper. These manuscript journals, called Acta Diurna, were, as the title denotes, simply records of daily occurrences. They were issued by government authority as early as B.C. 691. The privilege was withdrawn about B.C. 40. During the wars carried on between the state of Venice and the Turks, the Gazzetta, in manuscript, was published at Venice, of which the first number appeared, it is believed, A.D. 1536, and was continued monthly. Stations were appointed where the people might come to hear them read, and thirty volumes are preserved in one of the libraries of Florence. The earliest in the British Museum library is a printed copy, dated 1570. Gazzetta, the name of the coin paid by the auditors for hearing the news read, was transferred to the newspaper. Offices were established about this time in France, on the suggestion of the father of Montaigne, the essayist, for receiving intimations that any person wished to make public. These were copied out and posted on the walls, and eventually gave rise to regularly published advertising sheets. The "news-letters" (q. v.) were introduced during the reign of Henry VI. In these the reports of the events collected by the correspondents, and posted to their employers in the country, at a salary of a few pounds a year. The collection of newspapers in the British Museum contains seven numbers—four in manuscript and three in Roman type—of the "English Mercurius," the first dated July 23, 1558. For many years this was considered to be the earliest printed English newspaper; but, in 1839, Mr. Watts showed that it was a forgery. The same collection contains what must be considered as the first regularly published newspaper in England, bearing the title of "Weekly News," the first number being dated May 23, 1622. The "Daily Proceedings of both Houses of Parliament," from Nov. 3, 1640, to Nov. 3, 1641, in two volumes, was the first systematic account of the kind laid before the public. It was followed by "Diurnal Occurrences," brought out weekly; and this was succeeded by the host of "Mercuries," including the famous "Mercurius Britannicus," from 1642 to 1654. During the residence of the court of Charles II. at Oxford, on account of the plague that devastated the metropolis, the first number of the "Oxford Gazette" appeared, Nov. 13, 1665. It was transferred to London with the court, and took the title of "London Gazette," Feb. 5, 1666. Amongst the earliest commercial papers was the "City Mercury," with which L'Estrange was connected, commenced Nov. 4, 1675. The first gratuitously circulated paper was "Domestic Intelligence," in 1679. The forerunner of literary journals is the "Mercurius Librarius," first published April 9, 1680. The "Daily Courant," the first morning paper, appeared March 11, 1702. Archbishop Laud's licensing decree, aimed at the newspaper press, came into operation July 11, 1637; the restriction being renewed at intervals by act of parliament, till it expired in 1693. A stamp duty of one penny was proposed in the House of Commons in 1701, but abandoned. An act (10 Ame, c. 19) was, however, carried imposing the stamp for a period of thirty-two years, Aug. 1, 1712. The bill for the abolition of the stamp duty (18 & 19 Vict. c. 27) received the royal assent June 15, 1855. A duty of one shilling on advertisements had been originally charged, which was raised in time to three shillings; and on the 31st of May, 1815, the chancellor of the exchequer imposed an additional sixpence. This tax was abolished by 16 & 17 Vict. c. 63 (Aug. 4, 1853). The first newspaper published in Scotland, printed by order of the Protector, was called "Mercurius Politicus," and it appeared Oct. 26, 1653. It was for the use of his troops in garrison at Leith, and the publication was transferred to Edinburgh in November, 1654. The first number of the "Mercurius Caledonius" appeared Dec. 31, 1660. The "Caledonian Mercury" was first issued April 28, 1720. "Pue's Occurrences," a daily paper, made its appearance in Ireland in 1700, and was probably the first in that country. The second also, called the "Falkener's Journal" in 1728. The press in India originated with "Hicking's Gazette," published at Calcutta Jan. 29, 1781.
The "Calcutta Gazette" was brought out by the Bengal government March 4, 1784. The "Gazette hackar" started in January, 1795, appeared as a daily paper April 29, 1819. A censorship was established by Lord Wellesley, April, 1799. George Howe, a native of St. Kitts, established the "Sydney Gazette," the first Australian newspaper, March 5, 1803. The "Boston News Letter," the first newspaper being dated April 21, 1704, was the first newspaper published in America. The "Daily Sun," of New York, which first appeared Sept. 23, 1833, was the first of the penny papers of that country. French journalism took its rise from Théophraeste Renanct, who brought out the "Gazette" in May, 1631, and obtained a monopoly of the business of supplying the Parisians with news by letters patent granted in October of the same year. A Frankfort bookseller brought out the first German newspaper in 1615. In 1605 Abraham Verhoeven received from the archduke the exclusive privilege of publishing news, and commenced the "Nieuwe Tydinghen of Antwerp." The "Gazette van 's-Hertogen-Bosch," appeared at Ghent in 1615. According to the "Newspaper Press Directory for 1862," there are now published in the United Kingdom 1,615 newspapers, distributed as follows:—England, 845; Wales, 33; Scotland, 139; Ireland, 134; Channel Islands, 14. Of these there are 43 daily papers published in England, 1 in Wales, 16 in Ireland, 9 in Scotland, 2 in the Channel Islands. On reference to preceding editions of the "Directory," we find that, in 1821, there were published in the United Kingdom 267 journals; in 1831, 238; in 1841, 472; and in 1851, 563. The following is a list of the newspapers that have appeared in the metropolis, with the date of their establishment. Many of them, however, enjoyed but a short existence:

NEW STYLE.—Sir Harris Nicolas states, with reference to this change, “The errors in the Julian method of computing the year having long attracted the attention of astronomers, Pope Gregory XIII. undertook to reform the Roman calendar; and the alteration made by him in October, 1582, created what is commonly called the New Style, but which was sometimes called the Roman Style; while the calendar obtained the name, from its creator, of Gregorian. After great consideration, that pontiff published his new calendar, in which ten days were deducted from the year 1582, by calling what, according to the old calendar, would have been the 5th October, the 15th of October, 1582.”

The difference between the old style and the new style from 1582 to 2100 is as follows:

From Oct. 5, 1582, to Feb. 29, 1700. . .10 days.
From March 1, 1700, to Feb. 29, 1800 . .11 days.
From March 1, 1800, to Feb. 29, 1900 . .12 days.
From March 1, 1900, to Feb. 29, 2100 . .13 days.

The change made by Gregory XIII. was gradually introduced into other countries, England (see Old Style) being amongst the last to make the alteration, whilst Russia and Greece still adhere to the old mode of computation. From the following table the reader will perceive at what time the new style was adopted in various parts of Europe:

NEWTONIAN PHILOSOPHY.—Sir Isaac Newton was born at Woolsthorpe, Lincolnshire, Dec. 25, 1642. His attention was directed to the subject of gravitation in 1666, by seeing an apple fall from a tree, and the train of thought suggested by this trivial...
incident led to the philosophical demonstration of this great principle. His views on the subject were made known in the "Principia," which was first published in 1687. Newton was made master of the mint in 1696; he became president of the Royal Society in 1703, was knighted by Queen Anne, April 16, 1705, and died Monday, March 20, 1727.

**Newtown Bury (Ireland).**—Some cattle, seized for tithes by the Rev. Alex. McClinton, were put up to auction in this village, in the county of Wexford, Saturday, June 18, 1831, when a riot ensued, in which twelve or thirteen persons were killed and several severely wounded. The coroner's jury on the bodies of those that were killed, after sitting several days, being unable to agree, was discharged without giving a verdict.

**New Town Butler (Ireland).**—The Protestants of Enniskillen defeated the Irish at this town, in Fermanagh, July 30, 1859. In their retreat they set fire to the church, and many of the inhabitants who had sought refuge there, perished.

**New Year's Day.**—The first day of January was observed as a day of rejoicing, and a feast was instituted by Numa, dedicated to Janus, the god of the new year, B.C. 713. During the pontificate of Felix III., A.D. 497, a Christian festival, called the Octave of Christmas, was instituted.

**New York (United States).**—This city is built on Manhattan Island, which was discovered by Henry Hudson in 1609.

**A.D.**

1614. New York, or Manhattan Island, is settled by the Dutch.

1623. The Dutch erect a fort on the south of Manhattan Island, which forms the nucleus of New Amsterdam.

1612. They build a church in the fort.

1656. New Amsterdam is laid out in streets.

1664. Aug. 27. New Amsterdam surrenders to the British, who change its name to New York.

1665. June 12. New York is incorporated, and placed under the government of a mayor, five aldermen, and a sheriff.

1667. July 10. New York is formally ceded to Great Britain by the treaty of Breda.

1674. Feb. 19. It is restored to Great Britain by the treaty of Westminster.

1678. The city is said to contain 343 houses.

1683. New York receives a legislative assembly.

1684. Dec. 15, New York City grants the town its first charter.

1688. New York is added to the jurisdiction of New England.

1693. The episcopal church is established in New York, and William Bradford sets up the first printing press.

1700. The Legislative Assembly passes an act for the expulsion of the Jesuits.

1712. The Indians are frustrated in an attempt to burn the city.

1734. The city is fortified against the Indians.

1741. Another incendiary plot of the negroes is suppressed.

1750. Columbia College is founded.

1765. Nov. 5. Governor Colden is burnt in effigy for supporting the Stamp Act.

1775. The Indians present a petition to the British parliament for a redress of grievances. The petition was presented by Edmund Burke, but was not brought up.

**New Zealand (South Pacific).**—Discovered by Tasman in December, 1642; and Cook sailed round the islands in 1769 and 1770. The Church Missionary Society sent several missionaries out in 1814. The New Zealand Company formed a settlement in 1839; and the British government established the colony, making Auckland the capital, May 21, 1840. An attempt to execute a warrant produced a disastrous war with the natives, June 17, 1843, which continued with interruptions until 1847. Another dispute respecting land led to a renewal of hostilities May 3, 1860. The Canterbury settlement was formed by an association of gentlemen connected with the Church of England, in 1843; and the Otago settlement by gentlemen connected with the Free Church of Scotland in the same year. The New Zealand Company was dissolved in 1851. New Zealand was made the seat of a bishopric in 1841, and it received a new constitution by 15 & 16 Vict. c. 72 (Jan. 30, 1852).

**Ngami (Africa).**—This lake, that appears upon some Portuguese charts of A.D. 1588, was visited by Livingston, Murray, and Cole, July 28, 1849. Livingston visited this lake for the second time in 1850.

**Niagara (North America).**—The celebrated falls of this river were first visited by Father Hennepin, a French missionary, A.D. 1678. The fort of Niagara, afterwards called Fort Erie (q. v.), was taken by the English, July 24, 1759. Blondin first crossed the falls on a tight rope, Aug. 17, 1859.
NICEA (Battle).—Septimius Severus defeated Pescennius Niger near this city, in Bithynia, A.D. 194.

NICEA (Bithynia).—This town, called Ancore, or Helicore, is said to have been colonized by Bottiscans, and destroyed by the Myssians. Antigonus rebuilt the town B.C. 316, and named it Antigoneia; but Lysimachus, having conquered this part of Asia, changed its name to Nicea, in honour of his wife Nicea, daughter of Antipater. It became a city of great importance, and the kings of Bithynia, whose era began in 288 B.C., often resided here. The celebrated Council of Nicea, the first general council, was held from June 19 to Aug. 25, 325. It was greatly injured by an earthquake Oct. 11, 368, and was restored by the emperor Valens. The Greeks held it as a strong bulwark against the Turks, who captured it in 1078. The Crusaders wrested it from them June 29, 1097. Nicea was made the capital of Western Asia by Theodore Lascaris in 1204.

NICARAGUA (Central America) formed part of the Spanish kingdom of Guatemala (q.v.) until Sept. 21, 1521, when the people threw off the yoke of Spain and declared their independence. It subsequently became a member of a confederacy called the Republic of Central America, which was dissolved in 1839. The American filibuster Walker having landed here, was totally routed by the Nicaragua troops near San Juan del Sur, June 28, 1855; but he afterwards made himself dictator of the state. The filibusters were expelled in 1857 by the combined action of the several states. As early as 1527 it was proposed to construct a ship canal through Nicaragua, for the purpose of connecting the Atlantic and Pacific oceans. Surveys with this view were made in 1781, 1838, and 1851, and various schemes have been at different times projected for the accomplishment of this object. The province of the same name, is supposed to have been colonized by Phocceans from Marseilles in the 5th century. One part of Nice, the Quartier de la Croix de Marbre, is thus named from a marble cross erected to commemorate the reconciliation of Charles V. and Francis I., June 15, 1538, when the treaty of Nice was concluded through the intervention of Pope Paul III. Near this cross stands an obelisk, put up in 1823, in memory of the two visits made by Pius VII. in 1809 and 1814. The duke de Feschlave invested Nice in 1705, and it surrendered Dec. 9. The Austrians took Nice March 3, 1744, and the French, under Belleisle, obtained possession in June, 1747. The French overran Nice in 1792. It was inhabited by the Turks, who held it in November of the same year, and formally ceded by the king of Sardinia, May 15, 1796. The Austrians, under Melas, entered Nice May 11, 1800, and it was finally restored to Sardinia in 1814. The emperor Napoleon III. having demanded the cession of Nice as a return for services rendered to Sardinia in the war against Austria, Nice was annexed to France by treaty signed in Paris March 29, 1860, and the transfer was made June 14.

NICEENE CREED.—A confession of faith in which the consubstantiality of the Father and the Son is asserted, was drawn up by the first general council, assembled at Nicaea, June 19—Aug. 25, 325 A.D. The words "and the Son," after "who proceedeth from the Father," asserting the divinity of the Holy Ghost, were added at the second general council, held at Constantinople from May to July 30. This clause, called the "filioque," has given rise to much controversy, and it is rejected by the Greek church. It was accepted by the Spanish bishops in 447, and by those of Rome in 883.

NICKEL, a white metal that enters largely into the composition of German silver, and is found in most parts of Europe and South America, was first described by Cronstedt A.D. 1751.

NICOBAR ISLANDS (Indian Ocean), consisting of nine larger and several smaller islands, were settled A.D. 1756 and 1768 by the Danes, who on both occasions were compelled to withdraw on account of the unhealthiness of the climate. Some missionaries remained until 1792.

NICOLAIEFF, or NIKOLAI (Russia), the principal station of the Black Sea fleet, was founded A.D. 1701. The dockyards are very extensive, and numerous schools for naval cadets, shipbuilders, and pilots, exist in the town.

NICOLAITANES.—These heretics of the 1st century, mentioned in the Revelation of St. John, ch. i. 6 and 15, are said to have taken the name from Nicolas, a proselyte of Antioch, one of the seven deacons (Acts vi. 5), allowed a community of wives, and held that the passions ought to be allowed to exhaust themselves by indulgence. Allusion is made to them Rev. i. 14, where the doctrine of Balaam is said to be to eat things sacrificed to idols, and to commit fornication. A Christian sect of the 2nd century revived this heresy.

NICOMEDIA (Bithynia), now called Izmê, was built upon the ruins of Astacus, by Nicomedes I., B.C. 264, and made the metropolis of Bithynia. It prospered greatly for more than six centuries, and came into the hands of the Romans B.C. 74. It was a favourite residence of several emperors, among them Diocletian and Constantine the Great. It is memorable as the place where Hannibal, the Carthaginian general, died, B.C. 183.

NICOPOLIS (Egypt) was founded by Augustus B.C. 24, in commemoration of the surrender of Alexandria; and in less than a century its name disappeared from history.

NICOPOLIS (Greece) was founded in honour of the victory of Actium, B.C. 31, by Augustus, who instituted a quinquennial festival, called Actia, sacred to Apollo, in commemoration of that victory. Christianity was introduced here by the apostle Paul, who dates his epistle to Titus from this city about August, A.D. 64. Nicopolis continued the
chief city of Western Greece for a long time, but gradually fell into decay. At the beginning of the 5th century it was plundered by the Goths.

NIEMEN (Russian Poland).—After the battle of Friedland the Russians retreated and crossed the Niemen, at Tilsit, June 18, 1807. The French army, under Napoleon I., crossed the Niemen for the invasion of Russia, June 24, 1812. The wretched remnant of this imposing army recrossed the Niemen Dec. 12, 1812, when 3,000 were taken prisoners by Platoff. In the Polish insurrection of 1831 a battle was fought near this river, May 27, in which the Russian general Saxen was defeated by the Poles, with the loss of 2,000 men.

NIENTSCCHANTZ (Russia).—Peter the Great wrested this fortress, near the river Neva, from the Swedes, May 12, 1703, and with some of the materials he laid the foundation of St. Petersburg.

NIGER (Africa).—Various attempts have been made to discover the source of the river Niger. The first made in 1758, under the auspices of the African Association, was under the charge of John Ledyard, who died at Cairo. Mungo Park was sent out in 1795, and again in 1805. Though he did not succeed in discovering the source of the Niger, he obtained much valuable information respecting the river. He was killed by the natives on his second journey. Captain Clapperton went out in 1824, and the brothers Richard and John Lander in 1829. (See NIGER EXPEDITION.)

NIGER EXPEDITION was undertaken for the purpose of planting an English colony in the centre of Africa, the government granting £60,000 for that purpose. The expedition, consisting of three ships, the Albert, the Wilberforce, and the Soudan, sailed May 12, 1841. They began to ascend the Niger Aug. 21, and Fever broke out in September. The expedition arrived at Ada Kudder Sept. 11, when the Soudan was sent back with the sick. The Wilberforce followed directly after, and the Albert, the last vessel, gained the island of Fernando Po Oct. 17, 1841, and thus the Niger expedition, from the unhealthy effects of the climate, became a total failure. It was stated in the House of Commons that the object of the expedition was to secure the effectual abolition of the slave trade.

NIGHTINGALE FUND.—A meeting was held at Willy's Rooms Nov. 29, 1855, for the purpose of raising funds to establish an institution for the training of nurses, as an acknowledgment of the services of Miss Florence Nightingale in the Russian war.

NIKE SEDITION. (See Circus factions.)

NILE (Egypt).—This celebrated river is formed of two streams called the Blue River and the White River, which flow together at Khartoum, and each of which has been regarded as the main stream of the river. Cosmas Indicopleustes heard of the sources of the Blue Nile in the territory of the Agowa in the 6th century A.D., and Fra Mauro represented them with some degree of accuracy in the 15th century. Paez discovered and described its source in 1618, and it was also reached by the English traveller Bruce, Nov. 4, 1770. M. Linart ascended the White River as far as El Asin in 1827, and it was explored as far as Chanker by a Turko-Egyptian expedition in 1840. M. Brun-Rollet ascended still higher in 1854.

NILE (Sea-fight).—In the roadstead of Bequiers, between Aboukir and Rosseta, the French fleet, consisting of the flag-ship (121-guns), three 80-gun ships, nine 74-gun ships, two 40-gun frigates, and two 18-gun frigates, commanded by Admiral Brunelles, was discovered by Nelson, Aug. 1, 1798. His fleet consisted of thirteen 74-gun ships, one 50-gun ship, and the brig Mutine. The French vessels were anchored close into the shore, and were protected by gunboats and a battery erected on Aboukir Island. Lord Nelson, in spite of the superior force and the advantageous position of the enemy, determined upon an attack, which commenced at sunset. Several French ships had been taken when a fire broke out on board L'Orient, and she blew up at ten o'clock. Firing ceased simultaneously for ten minutes, and was resumed by the Franklin. Another suspension took place, and the contest was again renewed at five o'clock on the morning of the 2nd. Only two ships of the line and two frigates of the French fleet escaped. The British loss amounted to 218 killed and 671 wounded. Nelson signalled to the fleet his intention to return public thanks to the Almighty for this glorious victory at 2 p.m. Aug. 2, 1798.

NILOMETER (Africa).—A graduated pillar placed in a square well in the island of Roda, opposite Old Cairo, to mark the daily rise of the Nile, was first constructed by Soliman, seventh caliph of the Ommiades, A.D. 715. Al Motawakkel, tenth caliph of the Abbasides, built a new Nilometer in 890; and Mustunser Billah, fifth of the Fatimite princes of Egypt, repaired it in 1092.

NIMBUS.—This halo round the head or body of divine persons is called a nimbus when it surrounds the head, and an aureola when it envelops the body—the union of the two being called a glory. It is of pagan origin. Images of the gods were decorated with a crown of rays; and when the Roman emperors assumed divine honours, they appeared decorated in the same manner. It afterwards became so common, that it appears on coins, round the heads of the consuls of the late empire. It was for a long time avoided in the Christian representations, and the first example is a gem of St. Martin in the early part of the 6th century. After the 11th century it was employed to distinguish the Saviour, the Virgin Mary, the apostles, saints, &c. From the 6th to the 12th century the nimbus had the form of a disc or plate over the head; from the 12th to the 15th century it was a broad golden band round or behind the head; from the 15th century it was a bright fillet over
the head, and in the 17th it disappeared altogether.

Nimmen, or Nimegen (Holland), the ancient Noviomagus of the Batavi, is a strongly fortified town. The castle, said to have been built by Julius Caesar, was repaired by Charlemagne about A.D. 780. William of Holland mortgaged the town to the duke of Guelderland in 1247. Maurice captured it in 1591. The duke of Marlborough arrived at Nimmenen July 2, 1702, to assume the command of the allied armies. The stadtholder William V. removed the court here in 1736. The duke of York, who formed an intrenched camp before Nimmenen in 1794, had an indecisive engagement with the French Oct. 29. The French besieged the town Nov. 1, and the English made a successful sortie Nov. 3. The French batteries were, however, re-established Nov. 6, and the English garrison was withdrawn Nov. 8, the fortress falling into the hands of the French. The townhall was built in 1553.

Nimmenen (Treaty).—Conferences for peace were opened at Nimmenen in July, 1675, and Charles II. of England, having signed a convention with Holland, Jan. 26, 1678, for the withdrawal of the English contingent from the French army, a treaty of peace was concluded at Nimmenen between France and Holland Aug. 10. Spain acceded to the treaty Sept. 17, the emperor of Germany Feb. 5, 1679, and Sweden March 29.

Nineveh (Assyria).—Nimrod, or Asshur, is said to have founded this city about B.C. 2250, but some authorities believe that it had no existence till the reign of Ninus, B.C. 2182. It is mentioned on the tablet of Karkam, which was engraved about B.C. 1400. Diodorus assures that Nineveh was destroyed by Arbaces the Mede, B.C. 878; but Layard considers this destruction to have been most probably a mere depopulation. Jonah's prophecy to the inhabitants of Nineveh was pronounced B.C. 862, and the city was conquered and destroyed by Cyaxares and Nebuchadnezzar B.C. 606. The extent of the ancient city was sixty, or, according to some authorities, seventy-four square miles. Heraclius and Zbisates fought a great battle on its site A.D. 627. Mr. Layard's discoveries of antiquities at Nineveh commenced April, 1845, but no excavations of importance were made till the autumn of 1845. In 1845 he published "Nineveh and its Remains," and in 1853 his "Discoveries in the Ruins of Nineveh and Babylon." The antiquities discovered by him have been deposited in the British Museum.

Ningpo (China) was taken possession of by Sir Henry Pottinger Oct. 13, 1841. The Chinese failed in an attempt to recover it March 10, 1842. A British consul and British subjects were allowed to reside at the port by the terms of the treaty of Nankin, signed Aug. 29, 1842.

Nishapure (Persia) was destroyed by Alexander the Great during his eastern expedition about B.C. 331. Having been restored and raised to a royal city by the Seljuks, it was sacked by the Tartars A.D. 1239, and taken in 1739 by Nadir Shah, who reduced it to ruins.

Nisibis (Mesopotamia), the modern Nisibin, is supposed to be the Zobah of scripture, whose kings are mentioned as having been defeated by the Israelites, 1 Sam. xiv. 47, and 2 Sam. viii. 3, about B.C. 1063 and B.C. 1040. It is said to have been rebuilt by the Macedonians, and called Antiocheia Mygdonie. It was taken from the Parthians by the Romans under Lucullus, after a long siege, B.C. 65. They did not retain possession, and it was recaptured by the emperor Trajan A.D. 116. Supor I., king of Persia, took it A.D. 256; but it was recovered by Odenathus in 264. Diocletian and Galerius met here and received the Persian ambassador, and a peace was concluded with the Persians A.D. 283. Supor II. besieged Nisibis three times without success, viz., in the years 338, 346, and 350. The city was, however, surrendered by the emperor Lo- stian to Supor II. by treaty in 363, and the inhabitants retired to Amida. That rising city, with this reinforcement of inhabitants, recovered its former splendour, and became the capital of Mesopotamia. The Romans, under Ardburius, attempted, but without success, to regain Nisibis in 420, and the Saracens, having taken it in 640, levelled its walls with the ground.

Nisir Prius.—The clause in the writ summoning a jury, from which this legal phrase is derived, was introduced by 13 Edw. I. c. 30, passed A.D. 1285, and enforced by 1 Edw. III. c. 16 (1340). The judges sit in Middlesex at Nisir Prius by virtue of 13 Eliz. c. 13 (1575).

Nismes, or Nimvs (France).—The ancient Nemausus noticed by Strabo as the capital of the Volcae Arecomici, came under the sway of Rome B.C. 119, and was fortified by Augustus about 14 years before the Christian æra. It fell under the power of the Visigoths, from whom it was wrested by the Moors in the 8th century. Charles Martel took the town in 737, when it suffered much. In the 16th century it became a stronghold of the Calvinists. By the pacification of Nismes, agreed to in 1629, the Huguenots were secured in the possession of their estates, and the free exercise of their religion, and of all the privileges accorded by the edict of Nantes. They were, however, deprived of their fortified cautionary towns. The fortifications were destroyed by Louis XIII. The amphitheatres, erected by the Roman emperor Antoninus Pius, is still in a state of fair preservation, though it suffered much in the time of Charles Martel. Nismes still retains two of its Roman gates—the Porte d'Auguste, founded B.C. 16, and the Porte de France. The cathedral was almost destroyed during the wars of the 16th and 17th centuries, and the town suffered much in the French revolution of 1789.

Nissa, or Nisch (Servia).—The ancient
Naissus (q. v.), the birthplace of Constantine, was captured by the Turks a.d. 1376, and again in 1389. John Huniades wrested it from the Turks in 1443. It again fell into their possession, and was recovered by Louis of Baden, Sept. 24, 1689. The Turks regained possession in 1690. The Austrians took it July 28, 1737, and it was taken by the Turks the same year.

Nitric Acid.—Liquid nitric acid was obtained as early as the 7th century. The nature of this acid was demonstrated in 1785 by Cavendish.

Nitrogen, or Azote, was discovered by Dr. Rutherford, of Edinburgh, and described in his "De Aere Mephitico," published a.d. 1772. Dr. Priestley, who termed it "phlogisticated air," also described it in the Philosophical Transactions for the same year. Lavoisier showed it to be a component of atmospheric air in 1774.

Nive (Battles).—Soulil's position on this river was menaced by Hill, Nov. 16, 1813; and it was attacked and forced by the English army Dec. 8. Soult, anxious to regain the position, assailed the English army, only 30,000 strong, with 60,000 troops, Dec. 10, and, after making a most desperate attack, was compelled to retire. Further struggles occurred Dec. 11 and 13, but the English maintained their ground, and the passage of the Nive was effected. In these actions the French lost 6,000 in killed and wounded, and 2,500 prisoners, whilst the English lost in killed, wounded, and prisoners, 5,019 men.

Nivelle (Battle).—The French position on this river was carried by the English army, commanded by the duke of Wellington, after an arduous struggle, Nov. 10, 1813. The English army advanced in order of battle Nov. 11, and forced the Nivelle Nov. 12. Marshal Soult lost 4,263 men, including 1,200 prisoners, and the English 2,294 men.

Nivelles (Belgium).—This town originated in an abbey founded by St. Gertrude, about a.d. 645. The church dedicated to this saint was built in 1048.

Nobility.—The rank of nobles, or known men, among the Romans was restricted to the patricians till B.C. 336, when the plebeians were permitted to attain the dignity. Hotman, in his "Francia Gallia," ascribes to Hugh Capet, king of France, the invention of the hereditary nobility. The first recorded summons for the creation of an English peer was issued by Henry III. a.d. 1265. Titles were abolished in France, June 18, 1790; but Napoleon I. revived them in March, 1808. The hereditary peerage of that country was extinguished in 1831.

Noble.—This gold coin, of the value of 6s. 8d., was struck in the reign of Edward III., a.d. 1344.

Nocera (Italy), the ancient Nuceria, inhabited by people of the Oscan race, took part with the Samnites against the Romans B.C. 315, for which the consul Fabius besieged and captured the city, B.C. 308.

Haunibal reduced it by famine B.C. 216, and in the civil war it was taken by C. Papius B.C. 90. The battle between Narses and Teias, which terminated the Gothic monarchy in Italy, was fought near this city, a.d. 533. A colony of 20,000 Saracens was established here by Frederick II. a.d. 1215—1250, whence its name Nocera dei Pagani. Charles of Anjou assailed it and destroyed its fortifications in 1269.

Nola (Italy) was founded by the Etruscans as early as B.C. 800, according to some authorities; but there is some doubt on the subject. It was conquered by the Samnites about B.C. 440, and by the Romans B.C. 313. Hannibal assailed it in three successive years, B.C. 216—214. The inhabitants took part with Marius in the civil war, and were put to the sword by Sulla, who divided the country amongst his victorious followers, B.C. 82. Alaric I. laid it waste A.D. 410; and Genseric, king of the Vandals, destroyed it, selling the inhabitants into slavery, a.d. 455. Augustus died here A.D. 14. It was made the seat of a bishop in 254, and St. Paulinus, its bishop, is said to have invented church bells, whence they are called "nola" and "campana."

Nominalists and Realists.—These celebrated ecclesiastical parties originated in the discussion between Anselm, abbot of Bec, and Roscellinus, a canon of Compiègne, a.d. 1092, the doctrines of Anselm giving rise to Realism, and those of Roscellinus to Nominalism. The controversy was revived after some years of quiet by the Franciscan Nominalist, William Occam, who died in 1347, and founded the sect of the Occamists. His followers were expelled from Prague in 1408, and their books were prohibited in France by Louis XI. in 1473. The Realists maintained that general ideas (universalia) are real things with positive existence; the Nominalists, on the other hand, merely regarded them as words or names. The Nominalists were in later times called Conceptualists.

Non, or NUN (Africa).—This cape long formed the boundary of ocean navigation, but was at last doubled, A.D. 1412, by an expedition fitted out by John I. of Portugal. Some writers contend that a Catalan doubled it as early as 1346, and that some Dieppe mariners penetrated as far as Sierra Leone in 1364. The story is not supported by satisfactory evidence.

Nonconformists.—The name of Nonconformist, now used generally to describe a dissenter from the Church of England, was first applied to those who refused to comply with the Act of Uniformity (2 & 3 Edw. VI. c. 1) passed in 1549. A proclamation against unlicensed preaching was issued by Elizabeth, Dec. 27, 1558; and the Nonconformists, under the name of Puritans, formed their first presbytery at Wandsworth A.D. 1572. On the passing of the Uniformity Act of Charles II., 2,000 clergymen voluntarily resigned their livings, Aug. 24, 1662. James the Second's Declaration of Indul-
gence was promulgated April 4, 1687, and the Toleration Act (1 Will. III. c. 18) was passed May 24, 1689.

Notes.—This term was applied by the Romans to the fifth day of each month, excepting in March, May, July, and October, when it was applied to the seventh. The nones formed part of the system of computing time ascribed to Romulus, b.c. 753.

Nonjurons, headed by Sancroft, archbishop of Canterbury, and the bishops of Bath and Wells, Ely, Gloucester, Norwich, and Peterborough, refused to take the oath of allegiance to William III. They were deprived Feb. 1, 1691. The bishops of Chichester and Worcestor, who had also declined to take the oaths, died in the interval. To these men and their followers the term Nonjurons was applied. They divided into two sections in 1720, in consequence of a dispute respecting the administration of the communion. By 5 Geo. I. c. 18 (1729), they were subjected to similar taxes as papists. Their worship was conducted in hired rooms or private houses; and they became extinct in 1780.

Non-resistance oath, inserted in the Corporation Act (13 Charles II. st. 2, c. 1) of 1661, and required to be taken by all corporation officers, was as follows:—"I do declare and believe that it is not lawful, upon any pretence whatsoever, to take arms against the king, and that I do abhor that traitorous position of taking arms by his authority against his person, or against those that are commissioned by him." It was repealed by 5 Geo. I. c. 6, s. 2 (1719), an act for quieting and establishing corporations. A homily on the subject was written in 1659, and the doctrine was laid down in the canons of convocation of 1606.

Nonsuch Palace (Surrey).—Henry VIII. having purchased the manor of Jewel cum Cuddington, ordered two parks, called the Great and the Little, to be laid out. In the latter he began to build the palace of Nonsuch, A.D. 1543. Queen Mary, Nov. 23, 1557, granted Nonsuch to the earl of Arundel, by whom it was completed. Camden says it is built with so much splendour and elegance that it stands a monument of art, and you would think the whole science of architecture had been exhausted on the building. Queen Elizabeth visited Nonsuch in 1559, 1567, 1579, and 1580. She purchased it, and it became her favourite residence. Here the earl of Essex first experienced her displeasure on his sudden return from Ireland, Sept. 28, 1559. James I. settled Nonsuch upon his queen Anne; and in 1650 a survey was taken of it by the Commonwealth commissioners, and it was sold. At the Restoration, Nonsuch and all the lands were restored to the queen-mother, and George Lord Buckley was appointed keeper Sept. 5, 1660. A proclamation was issued July 26, 1665, for removing the receipt of the exchequer from Westminster to his Majesty's honour of Nonsuch, in the county of Surrey. In 1760 it came into the possession of Barbara, who had been created duchess of Cleveland, and baroness of Nonsuch, and by her Nonsuch was pulled down, and the parks turned into farms.

Nootea Sound. (See King George's Sound.)

No pert.—This cry was raised by the ringleaders in the Gordon riots (q. v.) A.D. 1780. A similar cry was raised during some disturbances in Edinburgh and Glasgow in February, 1779.

Norden (Battle).—The Danes, under Hasting, defeated the army of Charles the Fat at this town, in East Friesland, A.D. 892.

Nordkoping, or Noreköping (Sweden).—At a diet held at this town A.D. 1769, the French, or the Chat party, who had long opposed the Russian and English, called the Cap party, obtained the ascendency.

Nordlingen (Battles).—Two battles were fought at this walled town, in Bavaria, the first between the Austrians and Bavarians, under the archduke Ferdinand, and the Swedes, commanded by the duke of Saxe-Weimar and Count Horn, was fought Aug. 27, 1634. The latter were defeated. In the second, the Spaniards and Austrians were defeated by the French, under Turenne and the duke d'Enghien, in 1645.

Nore (Mutiny).—Great discontent prevailed amongst the sailors in the British navy early in 1797. They complained that, although the price of the necessaries of life had increased, they received the same amount of wages as that paid during the reign of Charles II. In April the men broke into open mutiny at Spithead. They refused to obey the commands of their officers, appointed delegates, and drew up petitions to Parliament for redress of grievances. Lord Howe succeeded in repressing this mutiny, but another broke out May 27, 1797, in the fleet lying at Sheerness. The ringleader was one Richard Parker, who was nicknamed Rear-Admiral Parker. The mutineers removed the ships to the Nore, hoisted the red flag, sent their officers on shore, and made the most extravagant demands. They seized some store-ships, and blocked the mouth of the Thames. Owing to the energetic measures of the authorities the mutineers began to waver, and fired a royal salute on the king's birthday, June 4. One by one the ships returned to their stations, the last red flag having been hauled down on the 13th. Richard Parker, president of the delegates, arrested with others on the 14th, was executed on board the Sandwich at Sheerness on the 30th.

Noreia, or Noreja (Styria), the capital of Noricum, celebrated for the great defeat inflicted upon the Romans by the Cimbri and Teutones, B.C. 113. The Boii besieged it B.C. 59. The modern town of Neumark occupies its site.

Norfolk Island (Pacific Ocean) was discovered A.D. 1774 by Captain Cook, when it was uninhabited. A settlement of freemen and convicts made in 1787, was abandoned.
in 1810. It was made a penal settlement in 1825, and on the withdrawal of the convict establishment in 1856, the inhabitants of Pictairn’s Island took possession.

Noricum (Europe), the country now forming a large portion of the Austrian empire, is supposed to have received this name from Noriae, its capital, and was inhabited by a Celtic race, anciently called Taurisci. The Boii settled in the northern part of Noricum b.c. 58. The country was made a Roman province a.d. 13. (See AUSTRIA.)

Norkitten (The Gross-Jägerndorff Battle).—The Prussians attacked the Russians, 30,000 strong, in an intrenched camp near the forest of Norkitten, in Prussia, Aug. 30, 1757, and after gaining some advantages, were compelled to retire in confusion. At the commencement of the battle they captured eighty pieces of cannon, which they were obliged to relinquish, with thirteen pieces of their own artillery.

Normal Schools for the training of teachers were instituted in France in 1795. The Normal school at Paris, suppressed in 1821, was revived June 28, 1833. Normal schools were introduced into England in 1805, and into Tuscany by a decree issued Dec. 3, 1846.

Normandy (France).—This duchy, which comprises part of the ancient kingdom of Neustria, was ceded to Rollo, Rolf, or Raoul, the Norseman or Norman, by Charles the Simple, according to the treaty or conference of St. Clair-sur-Epte, which was concluded between them A.D. 911. Rollo is believed to have held it as a fief of the French crown, but the subject is involved in considerable obscurity.

A.D.
912. Rollo is baptized at Rouen by the name of Robert.
923. The Franks invade Normandy under Raoul of Burgundy, who is compelled to retire and pay a heavy Danegeld as the price of peace.
927. Rollo abdicates in favour of his son, William Long-Epée, who performs homage to King Charles.
931. William invades Brittany, and annexes part of that country, with the Channel islands, to his own states.
932. He suppresses an insurrection under Count Rinux, whom he puts to death.
937. Cornoiloule is permanently annexed to Normandy. William revolts against Louis IV of France.
938. He ravages Flanders.
940. He swears fealty to Otho I. of Germany, but after many vacillations returns to his allegiance to Louis IV.
942. Dec. 17. He is murdered by Balzo, the nephew of Count Rinux.
944. Normandy is invaded by the French and Flemings, who defeat the Normans at the battle of Argin-s.
945. Richard the Fearless is restored by the aid of Harold Bluetooth, king of Denmark.
950. A powerful confederacy is formed against Richard, headed by Lethaire, king of France.
951. Richard defeats Lethaire at the battle of the Fonds.
952. Thibaut, count of Chartres, invades Normandy, and is defeated at the battle of Hernouville.

Nothing more is heard of his reign, and the sovereignty of Normandy falls again virtually under the dominion of his brother Henry II., who is crowned at Rheims in 1194, and consecrated at Sens on the 10th of March of the same year. This event should be dated 1194, as not 1193, as stated in the date of the coronation of Otho II. (q.v.).

A.D. 1194.
998. Richard II. suppresses an insurrection occasioned by the tyranny of the nobles.
1003. Ethelred of England makes a unsuccessful descent upon the Norman coasts.
1023. The Normans form settlements in the south of France.
1034. William the Bastard annexes Maine to Normandy.
1150. Henry Plantagenet receives the investiture of Normandy.
1294. Philip Augustus annexes Normandy to France.
1329. Philip VI. re-establishes the duchy of Normandy in favour of his son John.
1347. The English seize Normandy.
1350. It is restored to France.
1348. The states-general declare that Normandy shall never be detached from the French crown.
1349. Louis XII. establishes the parliament of Rouen.
1363. The salteits of the Nu-pieds or Barefooted suppressed.
1354. Louis XIV. suppresses the Norman states.
1771. The parliament of Rouen is suppressed.
1777. Louis XVI. restores the parliament of Rouen.

Dukes of Normandy.

A.D.
921. Rollo.
927. William I., Longue Épée or Long-sword.
943. Richard I., the Fearless.
960. Richard II., the Good.
1085. Richard III.
1088. Robert I., le Diable.
1303. William II., the Bastard (I. of England).
1387. Robert II., surmonte Courtesse.
1389. Henry I.
1392. Stephen.
1144. Geoffrey Plantagenet.
1151. Henry II.
1189. John I.
1214. John.
1294. Normandy is reunited to France.

North Administration. — Frederick, Lord North, created earl of Guildford in 1790, who filled the office of Chancellor of the Exchequer in the Grafton administration (q.v.), became first lord of the treasury Jan. 28, 1770, on the resignation of the duke of Grafton. The cabinet was thus constituted:—

Treasury and Chancellor of the Exchequer Lord North. President of the Council Earl Gower. Privy Seal Earl of Hillsborough. Earl of Apsley, afterwards Earl Bathurst, was made Lord Chancellor Jan. 23, 1771. He resigned in 1778, and Lord Thurlow was appointed June 3. Lord Weymouth resigned, and the earl of Sandwich became one of the principal secretaries of state in
his place Dec. 19, 1770. Sir E. Hawke resigned the Admiralty, and was succeeded, Jan. 12, 1771, by the earl of Sandwich, whose place as secretary of state was supplied by the earl of Halifax Jan. 22, the earl of Suffolk and Berkshire taking the privy seal. The earl of Halifax died June 8, 1771, and was succeeded, June 12, by the earl of Suffolk and Berkshire, the privy seal being filled by the duke of Grafton. The earl of Dartmouth succeeded the earl of Hillsborough as secretary of state, Aug. 14, 1772. The earl of Dartmouth replaced the duke of Grafton as privy seal, Nov. 4, 1775. Viscount Weymouth and Lord George Sackville Germaine, afterwards Viscount Sackville, became secretaries of state in place of the earls of Rochford and Dartmouth, Nov. 10, 1775. Earl Bathurst became president of the council as successor of Earl Howe, Dec. 21, 1779. Lord Weymouth resigned his secretaryship of state, and was succeeded by the earl of Hillsborough, Nov. 24, 1779. Mr. Welbye Ellis, afterwards Lord Mendip, succeeded Viscount Sackville as secretary of state, Feb. 22, 1782. The ministry grew extremely unpopular on account of the American war, and Lord North announced his resignation in the House of Commons, March 20, 1782. (See Rockingham (Second) Administration.)

Northallerton (Yorkshire).—This town is supposed to have been originally a Roman station, and subsequently a Saxon borough, but the date of its foundation is unknown. In Doomsday Book the place is called Alverine and Alreton. The church is said to be built by the Northumbrian apostle Paulinus, about A.D. 630. In the reign of Henry I. (1100 to 1135) a castle was built on the west side of the town by the bishop of Durham. This is supposed to be the one destroyed by order of Henry II. about 1174. Near the town, on the 22nd Aug. 1138, the famous battle of the Standard was fought between the English and the Scots, the latter being defeated with a loss of 10,000 men. About 1345 a monastery of Carmelites was founded, and in 1476 an hospital, which has since been rebuilt. During the rebellion of 1745, the English, under the command of the duke of Cumberland, encamped here.

North-American Indians, numbering about 150 tribes, or nations, each speaking a different language, were estimated, in 1853, by the United States commissioner of Indian affairs, to amount to 400,764. The state of Georgia expelled the Cherokees from their territory in 1834, which led to the Federal government taking measures to fix a boundary for their residence; and all the tribes living east of the Mississippi have been removed to the west of that river since 1836.

Northampton (Battle).—Margaret, queen of Henry VI., raised an army to maintain the cause of the house of Lancaster, early in 1460. The duke of Buckingham, who took the command, engaged with the Yorkist forces near Northampton, July 10, 1460, when he was totally defeated. It is recorded that Henry VI. was taken prisoner, and Queen Margaret was compelled to flee into Scotland.

Northampton (Northamptonshire), the Autuna of Tacitus, was anciently known as North Aufonton, according to some antiquaries, and, according to others, as Hampshire, to which the word North was afterwards prefixed. In the year 921 it was in the possession of the Danes, who made it their principal station when their forces were preparing to besiege Winchester. In 1010 it was again attacked and burnt by the Danes. At the Conquest the town was bestowed upon Earl Walthel. Having conspired against the king, he was executed, and his possessions were given to the earl of Huntingdon and Northampton, who erected a strong castle for the defence of the town. The priory of St. Andrew was founded in 1076, and the abbey of Black Canons about 1112. Henry I. assembled a great council here, Sept. 8, 1131. A convention of barons and prelates assembled here in 1180 to consider the laws of the realm. King John, in the 10th year of his reign, being displeased with the city of London, removed his court of Exchequer here. On the signing of Magna Charta, Northampton was one of the strongholds placed in the hands of the barons as security for the fulfilment of its conditions. The last parliament held here was summoned Nov. 5, 1390, when a poll-tax was ordered, which led to the rebellion of Wat Tyler. The town was nearly destroyed by fire in 1675. It received a charter of incorporation from Henry II. The church is said to have been built by the Knights Templars, after a model of the Holy Sepulchre at Jerusalem. Of the castle, only a few remains are to be traced, the embattled walls and gates having been demolished in 1662. A flood did great damage in 1720, and shocks of an earthquake were felt in 1750 and 1776. St. Thomas’s Hospital was founded in 1460, the free grammar-school in 1556, the infirmary in 1747, and the present building in 1793. The blue-coast-school was founded in 1700; the barracks were opened in 1796, and the gaol in 1846.

North British Newspaper was brought out in June, 1762, in opposition to Lord Bute’s administration, by John Wilkes, M.P. for Elysbury. In the 45th number, Saturday, April 23, 1763, George III. was accused of falsehood, and a general warrant was issued, April 26, against the authors, printers, and publishers, who were taken into custody April 30, and released May 6. They brought an action against the king’s messengers for false imprisonment. It was tried at Guildhall July 6, and resulted in a verdict in their favour, with £230 damages. Parliament met Nov. 15, 1763, and the house resolved, by a majority of 237 against 111, that the paper entitled the North British, No. 45, was a false and scandalous libel, and that it should be burnt by the common
hangman. This sentence was carried out in Cheapside Dec. 3, under the direction of Alderman Harley, sheriff of London. A riot ensued. The hangman only succeeded in burning part of the paper, and the remainder was carried away in triumph by the mob.

NORTH, or Icy Cape (Arctic Sea).—An Englishman, named Richard Chancelor, was the first to pass this, the most northerly point in Europe, and anchor in the White Sea, which he accomplished A.D. 1553. In his own account of the expedition he relates that "he came at last to the place where he found no night at all, but a continual light and brightness of the sun shining clearly upon the huge and mighty sea."

NORTHERN CIRCARS (Hindostan).—The Mohammedans first appeared in this extensive province about A.D. 1471; and in 1541 and 1550 added considerably to their conquests. It formed part of the empire of Aurungzebe in 1687. In return for military services, the district was granted by the Nizam to the French East-India Company; but on the capture of Masulipatam by the British, the maritime ports fell under their dominion in 1759. A free gift was made of four of the Circars by the Mogul to Lord Clive in August, 1675; and Guntur devoled to the Company in 1798. The tribute of £70,000 annually paid by the Company was redeemed by a payment of £1,200,000 in 1823.

NORTH FORELAND (Sea-fights).—Monk, afterwards earl of Albemarle, and Penn, defeated the Dutch fleets off the North Foreland, June 2 and 3, 1653. The second, and most memorable engagement, which extended over four days, commenced June 1, 1666. The duke of Albemarle, with an English fleet of fifty-four ships, attacked a Dutch fleet of eighty ships, under De Ruyter and Tromp, off the North Foreland. Darkness separated the combatants, and the contest was renewed June 2, when a squadron of sixteen ships joined the Dutch, and the English, having only twenty-eight ships with which to contend against this superior force, were compelled to withdraw, in order to repair damages. Rupert, with twenty ships, joined Albemarle's fleet June 3, and the battle was renewed that afternoon, and again on the morning of June 4, on which day the combatants separately, each side claiming a victory. The third sea-fight off the North Foreland was fought July 25, 1666. The fleets were about equal in point of numbers, each commander having about eighty sail. The Dutch were generally defeated with great loss, and Prince Rupert and the duke of Albemarle chased De Ruyter and his retreating squadron to their own shores and insulted the Dutch in their own harbours. The English fleet captured Schelling soon after, and destroyed 200 of the Dutch ships.

NORTHMEN, or NORSE.-The Scandinavian pirates of the 9th and 10th centuries were so called by the inhabitants of the main-
northern Europe, the traditions of Norway point to Odin as the founder of the nation. He is said to have arrived in the north about B.C. 70.

A.D.
630. Olaf Trestelia founds the province of Vertendal.
865. Harold Harfager vows neither to cut nor comb his hair until he has completed the conquest of Norway.
885. He defeats the provincial ruliers at the sea-fight of Hafrsfjord, which establishes his authority over the whole of Norway, and releases him from his vow.
937. Eric I., deposed for his tyranny by his brother Hako, embraces Christianity, and is invested by Athelstan with the sovereignty of Northumbria.
941. Hako proposes to establish Christianity, but is opposed by his subjects.
963. He is slain, the Irish, at Isterking, establishes Harold II., Graafeld, son of Eric I., on the Norwegian throne.
983. Olaf I. overthrows the idols in the temple at Drammen.
1000. Olaf I. is defeated and slain by the Danes and Swedes, who divide Norway between them, under the leutenancy of Eric and Sveyn, sons of Hako.
1015. Olaf I. defeats the fleet of Sveyn off the coast of Vikia, and thereby secures the Norwegian throne.
1028. Canute the Great invades Norway, and compels Olaf II. to flee into Sweden.
1030. July 29. Olaf I. is slain in an endeavour to recover his kingdom, by the forces of Canute, at the battle of Saddlestead.
1066. Sept. 14th. Harold Hardrada falls in battle against the English at Stamford, in Lincolnshire. After his death Norway is divided between Olaf III. and Magnus II.
1069. Olaf III. reigns alone.
1096. Magnus III. invades Britain.
1098. He conquers the Isle of Man, the Hebrides, and the Orkney and Shetland islands.
1103. He is killed by the Irish; his kingdom is divided between his sons Sigurd, Eystein, and Olaf.
1158. Magnus V. is defeated and slain by Sworro, natural son of Olaf II.
1240. The jarl Skule, half-brother of Inge II., asserts his claim to the Norwegian throne.
1242. Skule is defeated and slain by Hako IV.
1299. The Norwegian law obtains exclusive privileges in Norway.
1301. Iceland is added to the Norwegian territories.
1325. Hako IV. invades Scotland.
1526. Magnus VI. Farsiu. The daughter of Eric II., is heiress to the throne of Scotland.
1319. Death of Hako V., with whom the greatness of Norway becomes extinct. The sceptre devolves on Magnus VII., king of Sweden.
1343. Magnus VII. signs the treaty of Norway in favour of his son Hako VI.
1349. Norway is ravaged by the plague.
1357. Norway is annexed to Denmark and Sweden, under the government of Margaret.
1397. June. Denmark, Norway, and Sweden are formally united into one kingdom by the union of Calmar.
1448. Norway and Sweden are separate from Denmark.
1450. Aug. 29. Norway and Denmark are reunited.
1538. The Reformation is introduced into Norway.
1537. The Swedes invade Norway. They are defeated by the Danes.
1812. Aug. 27. Norway is guaranteed to Sweden by the emperor of Russia in exchange for Finland.

A.D.
1814. Aug. 14. An armistice is concluded with the Swedes, who compel Christian to abdicate the throne. Nov. 4. Charles XIII. of Sweden accepts the constitution of Eidsvold, which declares Norway a free, independent, indivisible, and inalienable state, united to Sweden under the same king.
1831. The law for abolishing hereditary nobility is passed.
1844. King Oscar grants the Norwegians a national flag.
1847. Aug. The order of St. Olaf is instituted for Norwegians.
1869. Aug. 5. Charles XV. of Sweden and his queen are solemnly crowned at Drammen, king and queen of Norway.

SOVEREIGNS OF NORWAY.

For the subsequent sovereigns, see those countries.

NORWICH (Bishopric).—The see of East Anglia was founded about a.d. 630, by a Burgundian named Felix, who fixed his seat at Silvester, or Dunwich, in Suffolk. Bishop Bius, or Bosa, divided the diocese into two sees, fixing the new one at North Elmham, in Norfolk, in 673. Wyred, or Wildred, reunited them in 870, making Elmham the episcopal town; and, after his death, the country was in such a disturbed state, owing to the ravages of the Danes, that the see remained vacant till about the year 965. The see was transferred to Thetford by Herfast about 1078, and to Norwich by Herbert de Loeinga in 1082.

NORWICH (Norfolk) is supposed to occupy the site of the Venta Iceniorm of the Romans. Uffa, king of the East Angles, is said to have built a castle here a.d. 575, and under the Anglo-Saxon princes the town became a place of some importance. Alfred the Great fortified it against the Danes, who plundered and burnt it in 1004. It was rebuilt, and the castle restored, in 1018.
From this time it rapidly increased in size and importance. Henry I. held his Christmas here in 1122, and raised the town to an equality of franchise and privilege with London. In 1189 the Jews were exterminated, on the ground of having permitted the crucifixion of a Christian boy. The town was plundered and in nastly burned by the dauphin of France in 1210. A great number of worsted and woollen manufacturers from the Low Countries settled here about the year 1337. Nearly one-third of the inhabitants fell victims to the plague in 1349. The city was separated from the county of Norfolk, under the name of the city and county of Norwich, in 1403. A fire destroyed 718 houses in 1507, and a rebellion broke out in 1549. The rebels, 20,000 strong, under the brothers Ket (q.v.), were defeated here with great slaughter, Aug. 27, by the earl of Warwick. Upwards of 500 Flemings settled here after the capture of bombazine, in 1565. During the civil war the city was held by the parliamentary army. The cotton manufacture was introduced in 1784, and a new fabric called “Norwich crapes” was produced in 1819. The cathedral, commenced in 1094, was completed in 1280, and the spire was erected in 1361. A Benedictine monastery, founded in 1094, was completed in 1101. St. Andrew’s Hall was built in 1415. The free grammar school was founded in 1547, and the Norfolk and Norwich Hospital in 1771. The first general hospital was held in 1824. The railroad to Yarmouth was opened May 1, 1844, the line to London through Cambridge in 1845, and the line to London through Colchester in 1850. Its first public library was established in 1784, and a new free library was opened in 1857.

**Norwood (Surrey).—** A school of industry for girls was founded here, a.d. 1812. Norwood has long been celebrated as the haunt of gypsies, many of whom were apprehended and sent to prison as vagrants in 1815. St. Luke’s church was completed and consecrated July 13, 1825; Beulah Spa was opened in August, 1831; and the South Metropolitan, commonly called Norwood cemetery, covering forty acres of land, was consecrated Dec. 6, 1837.

**Notables.**—One of the stipulations obtained by the nobles from Louis XI. of France, by the treaty of St. Maur, was, that the king should call an assembly of notables, to consist of twelve prelates, twelve knights and squires, and twelve lawyers, Oct. 29, 1465. An assembly of Notables was summoned by the advice of Calonne, to consider how the financial difficulties of the country were to be met, Feb. 22, 1787, and was dismissed May 25. They were again convoked by the king, with the concurrence of Necker, Nov. 3, 1788. Napoleon I. summoned an assembly of Spanish notables, which met at Bayonne, June 15, 1808.

**Notaries Public.**—Short-hand writers among the Romans received the name of *Exceparum,* when employed to draw up public documents in the 4th century. Persons who performed duties corresponding to those of the modern notary were styled *tabelliones* at the same period. In England they executed royal charters, a.d. 1043—1066; and power of admitting to practice was vested in the archbishop of Canterbury by James I. 1597, and the county from *of* their apprenticeship and admission to practice were regulated by 41 Geo. III. c. 79 (June 27, 1801), and by 6 & 7 Vict. c. 90 (Aug. 24, 1843). By a decree of the council of Cologne in 1310, notaries were ordered to make use of seals.

**Nottingh (Eng.)** resisted an incursion of the Danes, who were defeated near the town by Alfred, a.d. 866. Its castle was fortified and bestowed on his natural son Beverel, by William the Conqueror, a.d. 1088. Richard I., having captured the castle, held a council here March 30, 1194; and it was again held by his brother Henry VI. (a.d. 1222—1471). Charles I. erected his royal standard at this town in the beginning of the civil war, Aug. 22, 1642; and the castle was taken by the parliamentary forces, after a brave defence, in September. The Luddite riots (q.v.) of 1811 and 1814 originated here; and, during the reform excitement, much property was destroyed, and the castle of the duke of Newcastle burned, Oct. 10, 1831. St. Mary’s Church, supposed to have been erected in the 15th century, was repaired at a cost of £9,000, and reopened in 1845; and St. Barnabas, a Roman Catholic cathedral, built at a cost of £20,000, was consecrated in August, 1844. The general hospital was founded in 1781; the general lunatic asylum in 1810; the dispensary in 1831; and the foundation-stone of the new lunatic asylum was laid Oct. 30, 1857. The baracks, built in 1792, were ordered to be renewed by a resolution of government in 1857; and the People’s College was founded by Mr. George Gill in 1847. An act for the inclosure of 1,500 acres of pasture-land was passed June 30, 1845.

**Novara (Italy).—** The duke of Orleans surprised this town June 11, 1495, and the French and Milanese fought a battle in the neighbourhood, April 5, 1500, which did not lead to any important results. Pope Leo X. having engaged a large body of Swiss to defend his newly-acquired territory, they obtained a victory over the French here, June 6, 1513. The French, under Lartec, captured it in 1527; and the Sardinian army was totally defeated by the Austrians under Radetzky, followed by the resignation of the crown by Albert, and the abandonment of all claim on Lombardy by Sardina, March 23, 1849.

**Nova Scotia (North America).—** This British possession, settled by the French a.d. 1604, and called by them Acadia, was granted by charter to Sir W. Alexander in 1621, when its name was changed to Nova Scotia. The French, however, were not expelled until 1654; and the colony was restored to them by the treaty of Breda, July.
25, 1667. War having again broken out, Port Royal, in Acadia, was captured in 1710, and named Annapolis, in honour of Queen Anne, and the whole colony was secured to England by the treaty of Utrecht, April 11, 1713. The French and Indians frequently attacked the new colony, until finally conquered in 1758. The bishopric of Nova Scotia was founded Aug. 11, 1757. Gold was discovered on the Tangier river in March, 1861. Mr. Joseph Howe, provincial secretary, presented an official report on the subject, Sept. 4, 1861.

Novatians, the followers of Novatian, a presbyter at Rome, who denied the right of the Church to restore the sacerdotal or clerical order. Their rise A.D. 250. Novatian, consecrated bishop of Rome in opposition to Cornelius, was condemned by a council A.D. 251; Marcius, bishop of Arles, was deposed for holding these tenets in 254. The sect declined in the 5th century.

Nova Zembla (Arctic Ocean), known at an early period to the Russians, was discovered by an English seaman named Wilmington A.D. 1553. Stephen Burrough made a voyage to Nova Zembla in 1556; and the Dutch navigator Barents in 1596.

Novels.—The Novella, forming part of the emperor Justinian’s code, were prepared and published A.D. 536.

November, called blot-month, blood-month, or month of sacrifice, by the Saxons, had thirty days in the time of Romulus (B.C. 753—716); increased to thirty-one by Julius Caesar (B.C. 46—44); and was again reduced to thirty by Augustus (B.C. 31—A.D. 14). An annual thanksgiving on the 5th of November, in commemoration of the deliverance of the nation from the perils of the Gunpowder Plot (q.v.), was appointed by James I. c. 1 (1606).

Novgorod (Russia).—The Russian monarchy was founded here under Ruric, A.D. 862; and it was made an independent republic in 1150. It joined the Hanseatic league in 1276; and one of its factories was established, which led to such a degree of prosperity in the 13th century that the citizens could “walk the city in a dress of gold.” The city was independent from 1140 to 1472; and Ivan Vasilievich destroyed its independence in 1472; and Ivan IV. massacred 25,000 of the inhabitants in 1570.

Novi (Italy).—The king of Sardinia drove Marshal Mallebois from his position here A.D. 1746. It capitulated to Marshal Loundon Oct. 3, 1788. The French, commanded by Jombert, were signally defeated by Suvvarow, when 15,000 men were put hors de combat, Aug. 15, 1799.

Novum Organum.—This work of Lord Bacon was first made known by his treatise on the Advancement of Learning, A.D. 1605, and was published with a dedication to James I. in 1623. It was entitled “Instauratio Magna (i.e., Novum Organum, sine Indicia vera de Interpretatione Naturae).”

Noyades.—Jean Baptiste Carrier was sent by the Montagnards to Nantes, with proconsular powers for the suppression of all opposition to their party. He arrived in the city Oct. 8, 1788, and immediately set in operation the existing means of destruction against the royalists. The guillotine and discharges of musketry proving too slow in their effects, he placed ninety-four priests in the hold of a ship stationed on the Loire, and having secured the hatchways, scuttled the vessel, which of course sank with all on board, Nov. 15, 1788. This mode of execution was repeated till the Loire had received between 4,000 and 5,000 victims, whose bodies so infected its water that it was rendered illegal to drink of them, or to use fish caught in its streams. The 14th century; and they were termed the noyades nantaises, from noyer, to drown. Carrier himself termed them revolutionary baths. He was recalled to Paris soon afterwards, and after a lengthy trial was condemned to death, Dec. 16, 1794.

Noyon (France), the ancient Noviomagus, a town of the Veromandui, was made a bishopric A.D. 531. It was the residence of Charlemagne, who was crowned here Oct. 9, 768; and Hugh Capet was crowned king of France here, June 1, 987. A treaty was concluded at Noyon between Francis I. and the emperor Charles V., Aug. 13, 1516. Charles engaged to marry Louise, the French king’s infant daughter, on her attaining her twelfth year, and was to receive as her dowry the claims of France on Naples. Charles was to pay 100,000 gold crowns every year until the marriage took place. The cathedral was founded by Pepin-le-Bref, and the town-hall was built in 1489. (See Brenneville.)

Nubia (Egypt) formed a treaty with the emperor Diocletian A.D. 284—286, and was converted to Christianity at an early period, continuing in that faith till the 13th century. The caliph Omar exacted from it an annual tribute of 360 slaves, about A.D. 657, which was maintained till about 1150. Contests were carried on almost uninterruptedly between the people of Nubia and the sultans of Egypt during the 14th century, when they ended in the extinction of Christianity and the breaking up of the kingdom into a number of petty Mohammedan states. An expedition by Mehemet Ali brought it into nominal suzerainty to the pashas of Egypt A.D. 1820. The architectural ruins at Saboaa are ascribed to the age of Rameses, B.C. 1355—B.C. 1259.

Nuisances.—The mayors and bailiffs of towns were ordered to compel the inhabitants of the districts under their jurisdiction to remove all filth and other nuisances, by 12 Rich. II. c. 13 (1358). Numerous sanitary regulations were made by the Nuisances’ Removal and Diseases’ Prevention Act, 11 & 12 Vict. c. 123 (Sept. 4, 1848), which was amended by 12 & 13 Vict. c. 111 (Aug. 1, 1849).

Numantia (Spain), the site of which is marked by the ruins at Puente de don Guarray, offered a brave resistance to the Roman arms for twenty years. It was at
length reduced by Scipio Africanus, who brought against it an army of 60,000 men, B.C. 134. The conqueror received the surname of Numanticus.

**NUMIDIA (Africa).**—The Romans became acquainted with this country B.C. 264, during the first Punic war when its people formed the cavalry of the Carthaginians. They transferred their services to the Romans B.C. 256, and aided them throughout the second Punic war B.C. 218—201. M asi nissa, the king, who was rewarded with a large accession of territory, died B.C. 149; his son Micippas at his death left the kingdom to Acherbal and Hiempsal, his sons, and his nephew Jugurtha, B.C. 118. Jugurtha having murdered his cousins, the Romans declared war against him B.C. 111; and he was captured and put to death B.C. 106. The country was made a Roman province by Julius Cesar for having taken part in the civil war against him, and Sallust the historian was appointed governor B.C. 46. Caligula changed the government of the province A.D. 33. The province was wrested from the Romans by the Vandals, under Genereric, in 427. They were subdued by Belisarius, general of the emperor Justinian I., in 533. The Mohammedans, commanded by Akbah, seized Numidia in 667.

**Numismatics.**—The Greeks and Romans formed collections of coins as objects of beauty, but not for purposes of historical inquiry. The earliest known collection is that of the poet Petrarch, who died A.D. 1374, and the first writer on numismatics is Eneas Vico, whose discourse on medals appeared at Venice in 1555. The science was first applied to the ground and systems introduced into antiquity by Spanheim, about 1671, and in 1692 the labours of previous authors were consolidated by Jobert in his "Science de Médailles." Addison's dialogues on the Usefulness of Ancient Medals were first published in a separate form in 1724.

**Nuncio.** is the name given to an ambassador from the papal court, when he is not a cardinal. (See Legates.) James II. received in public Francisco d'Adda, the last papal nuncio sent to the court of England, July 3, 1657, whereupon several noblemen and gentlemen resigned their own.
custom the lord of the manor was entitled to demand from every peer passing through his domains a shoe from one of his horses, or the equivalent in money, and the ruins of the old castle of Oakham, supposed to have been built in the reign of Henry II., are covered with horse-shoes obtained in this manner by its former possessors. The grammar-school was founded in 1581, and the Agricultural Hall in 1837.

OAK SYNOD was held in June, A.D. 403, in a suburb of Chalcedon called the Oak, where a church and a monastery had been founded by Rufinus. Theophilus, archbishop of Alexandria, had brought accusations against Chrysostom, archbishop of Constantinople, and charges embodied in forty-seven articles were launched against him at this synod. It lasted fourteen days, and forty-five bishops subscribed the sentence of deposition against Chrysostom, who refused to appear. The synod appealed to the emperor; Chrysostom was arrested, but was speedily reinstated, and a council held at Constantinople pronounced in his favour.

OASIS, OR AUASIS (Africa).—Three of these solitary places in the deserts of Libya, were celebrated in ancient history under this name,—the Greater Oasis, according to Herodotus seven days' journey west of Thebes; the Ammonium, the site of the famed temple of Jupiter Ammon, visited by Alexander the Great B.C. 333, with its celebrated oracle; and the Lesser Oasis. Juvenal is supposed to have been the first person banished to one of these solitary places, in the sandy deserts of Libya, A.D. 94. Timasius, the master-general of Theodore, was banished by Eutropius to the Oasis in 396. Nestorius was also transferred from Petra to the Oasis in 435.

Oaths' Plot. (See Popish Plots.)

Oaths.—Abraham sealed his covenant with Abimelech by an oath, B.C. 1891 (Gen. xxi. 23); and they were sanctioned by the Mosaic law B.C. 1496 (Lev. v. 4). Oaths were common amongst the Greeks and Romans. They were introduced into judicial proceedings in England by the Saxons A.D. 600; and 150 monks were sworn at a synod held at Cliff, in Aug. 824. With reference to the claim set up by Innocent III. A.D. 1200, and maintained by his successors, to grant dispensations on oath, Hal- lam ("Middle Ages," c. vii. p. 2) remarks: "Two principles are laid down in the Decretals—that an oath disadvantageous to the Church is not binding; and that one extorted by force was of slight obligation, and might be annulled by ecclesiastical authority. As the first of these maxims gave the most unlimited privilege to the popes of breaking all faith of treaties which thwarted their interest or passion, a privilege which they continually exercised, so the second was equally convenient to princes weary of observing engagements towards their subjects or their neighbours. They protested with a bad grace against the absolution of their people from allegiance by an authority to which they did not scruple to repair in order to bolster up their own perjuries." (See AbsUATION, ALLEGIANCE, ACT OF SUPREMACY, JEWISH DISABILITIES BILL, &c.)

Obelisks.—Pliny mentions two that stood before the temple in Alexandria; one, Cleopatra's Needle, is still in existence, and bears the name of Rameses II., who flourished B.C. 1360. The emperor Augustus (B.C. 31—A.D. 14) removed several from Egypt to Rome, and succeeding emperors following his example, forty-eight in all were transported. Four of these were restored and set up by Pope Sixtus V. Another was set up by Innocent X. in 1651; another by Alexander VII. in 1667; and one for Pius VIII. in 1822. An obelisk, removed by the French from Luxor, was erected in the Place de la Concorde, Paris, Oct. 25, 1836.

OBDOS (Battle).—The duke of Wellington defeated the French in an encounter near this fortified town in Portugal, Aug. 15, 1808. It is memorable as the scene where English blood was first spilt in the Peninsular war.

Oblivion.—The title Act of Oblivion was given to 13 Charles II. c. 3 (1660), which granted a general pardon and indemnity to all state offences committed between Jan. 1, 1637, and June 24, 1660, excepting to the persons mentioned by name in 13 Charles II. st. 1, c. 15 (1660); to those who had embezzled the king's goods; to Romish priests or persons engaged in the Irish rebellion of 1641. Fifty-six of these regicides were attainted, of whom twenty-nine were brought to trial, and eleven executed. Disqualification from office was the punishment imposed upon twenty others.

Observants.—When St. Bernard of Sienna reformed the Franciscans, about A.D. 1400, those that remained under the relaxed rule were termed Observants, and those that accepted the Reformation, Observants or Recollects. The reformation was confirmed by the council of Constance, the fourteenth general council, held from Nov. 16, 1414, to April 22, 1418, and afterwards by Pope Eugenius IV., who ascended the papal chair in 1431.

Observatory.—The tower of Babel, erected about B.C. 2247 (Gen. xi. 1—9), is supposed by some writers to have been an observatory. The tomb of Osmandis in Egypt was an edifice of this kind. Observatories existed amongst the Chinese and the Hindoos at a remote period. The observatory at Alexandria, built B.C. 300, was the most celebrated of ancient times. The first modern observatory was erected at Cassel A.D. 1561.

O C A

O C A N A (Battle).—The French, under Mortier and Soult, defeated the Spaniards in a plain near this town in Spain, Nov. 19, 1809. The French made 20,000 prisoners, took 45 pieces of cannon, and all the ammunition of the Spanish army.

O C A H E R .—This American emigrant ship, on the same day that she sailed from Liverpool with 399 persons on board, took fire off Orme’s Head, Aug. 24, 1848, and was burned to the water’s edge in a few hours, 178 lives being lost.

O C K E L Y (Battle).—Ethelwulf, king of Wessex, and his son Ethelbald, defeated the Danes in a great battle near this town, in Surrey, A.D. 851.

O C T A R C H Y. (See H E X T A R C H Y.)

O C T O B E R, the eighth month of the Roman year, as its name implies, was introduced into the calendar of Romulus B.C. 753. O C T O B E R C L U B was first formed in London during the reign of William III. and Mary, about A.D. 1690. It consisted of a large number of members, many of them being Jacobites. In 1703 the club consisted of about 150 county members of parliament, who were of opinion that their party was too backward in punishing and turning out the Whigs. Their meetings, first held at the Bell, were afterwards transferred to the Crown, in King Street, Westminster.

O C T O R .—This excise duty, levied by the government on all articles entering Paris and other large towns of France, was first imposed in the middle of the 14th century. It was abolished by the National Assembly in 1790, and it was restored Oct. 18, 1798. This tax was abolished in Belgium in 1848.

O C Z A K O W, O C Z A K O F, or O T C A K O F (Russia), possessed a citadel at a very early period. The Russian army, under Münich, amounting to 70,000 men, with a powerful artillery train, besieged it July 10, and a powder-magazine having blown up and buried 6,000 men in the ruins, the Turkish garrison surrendered July 13, 1737. The Turks laid siege to it Oct. 28, but were compelled to withdraw, on account of sickness in their ranks, Nov. 10, 1737. The Turks regained possession in 1738. It was assailed, though without success, by the Russians in 1769; was invested by Prince Potemkin July 12, 1788; and taken Dec. 17. It was finally ceded to Russia Jan. 9, 1792. The fortifications were blown up on the approach of the French and English, Oct. 18, 1855.

O D D F E L L O W S.—Nothing positive seems to be known respecting their origin. In the Odd Fellows’ Magazine for March, 1837, an Odd Fellow is said to have liked a fox for cunning; a dove for tameness; a lamb for innocence; a lion for boldness; a bee for industry; and a sheep for usefulness.” The first number of an Odd Fellows’ Magazine appeared at Manchester in March, 1828. It was continued till Jan., 1843. An Odd Fellows’ newspaper, of which 52 numbers were issued, was published in London in 1839.

O D E N S E R, or O D E N S E R (Denmark).—One of the most ancient towns in the kingdom, the foundation of which is referred by tradition to Odin. The cathedral, commenced A.D. 1080, was completed in 1301. A diet assembled here A.D. 1527 secured the religious liberty of Denmark.

O D E S S A (Russia) was founded by the empress Catherine A.D. 1794, and received as its governor the duke of Richelieu, a French emigrant, in 1803. In 1817 it was declared a free port for thirty years, a privilege afterwards extended by imperial ukase till Aug. 27, 1854. The batteries having fired upon the Furious steam frigate, under a flag of truce, in April, 1854, it was bombarded by the French and English fleets, April 22. The steam frigate Tiger, having stranded here, was fired upon in a cowardly manner by the garrison of Odessa, May 12, 1854. The English and French expedition to the Bug and the Dnieper lay at anchor off Odessa from Oct. 8 to 14, 1855.

O D E S S I S.—This town, near the site of which the modern Varna stands, is said to have been founded by the Milesians about B.C. 592. The Bulgarians seized it A.D. 679.

O D O N T O L O G Y, the science of the teeth, was first accurately treated of by Purkinje, A.D. 1819, and by Retzius in 1837. The relations between the teeth and the rest of the body were explained by Professor Richard Owen to the French Academy of Sciences in Dec., 1839. The same gentleman published his Odontology in 1840—1845.

O D L E S S E are mentioned in connection with the Scythian expedition of Darius, B.C. 507; and they raised an army of 150,000 men against Macedonia B.C. 429. Xenophon and the Ten Thousand, in their “retreat,” assisted to restore Seuthes, one of their kings, to the throne, B.C. 400. They were engaged in dissensions with the Athenians respecting the possession of the Thracian Chersonese, B.C. 352—357, and ceded the disputed territory in the latter year. Philip II. of Macedonia, after a ten years’ contest, brought them under tribute, and founded Philippiopolis in the heart of their country, B.C. 348. Socrates bequeathed his kingdom to the Romans B.C. 42. A formidable rebellion against their Roman masters was with difficulty put down by Poppeus Sabinus A.D. 26. Vespassian incorporated the country with the empire about the year 72.

O D E N B U R G, or O D E N B U R G (Hungary), the ancient Scarabantia, called by the Hungarians, Sopron, or Soprony, is celebrated in modern times as the scene of a diet held by Leopold I. A.D. 1681, with a view of conciliating the Hungarians. The Hungarians defeated the Austrians here, May 7, 1849.

O D S T A N D O R, or O D L A N D (Baltic Sea). This island, belonging to Sweden, seized by the Danes A.D. 1360, was soon after restored.

O E N I A D E (Greece) is first noticed B.C. 455, and was unsuccessfully besieged by Pericles B.C. 464. The inhabitants, who sided with the Lacedaemonians in the Peloponnesian war, were compelled, chiefly through the instrumentality of Demosthenes, to de-
clare for Athens, B.C. 424. The Aetolians made themselves masters of Óênais about B.C. 350, and retained possession till B.C. 219, when it was taken by Philip V. of Macedon. It was captured by the Romans, and made over to their allies, the Aetolians, B.C. 211, but restored to the Acanthians B.C. 189. Colonel Leake described its ruins A.D. 1855.

ÓENOPHYTA (Battle) was fought B.C. 456, between the Athenians, commanded by Myronides, and the Boeotians. The latter were signally defeated.

Össel (Baltic Sea).—This island was taken from the Teutonic knights by the Danes, who ceded it to Sweden A.D. 1645. It was captured by Peter the Great A.D. 1710, and was, with the government of Livonia, ceded to Russia by the treaty of Nystadt, Aug. 30, 1721.

Öffn. (See Buda.)

Offa's Dyke, extending from Bristol to the north of Flint, was constructed by Offa, king of Mercia, A.D. 779, in order to protect his territories from the attacks of the Welsh.

Officers.—The purchase and sale of offices was abolished by 5 & 6 Edw. VI. c. 16 (1552). An order in council, enforcing the prohibition, appeared July 19, 1702. By 31 Geo. II. c. 22 (1753), a duty was imposed upon all salaries, fees, and perquisites of offices and pensions payable by the crown, exceeding the value of £200 per annum, and it was made perpetual by 6 & 7 Will. IV. c. 97 (Aug. 19, 1838).

Oglio (Battle).—The brothers Visconti, of Milan, were defeated on the Oglio with great loss by Count Lando, chief of an irregular band, A.D. 1357.

Ogulnian Law.—So called from tribunes of the name of Ogulnus, by whom it was proposed, B.C. 300. Its object was to remove the last exclusive privilege retained by the patricians; namely, that of being alone eligible for the sacred offices of Pontificate and Augurage. By this law all orders of priests were increased, and the priesthood opened to the plebeians.

Ohio (North America) was explored A.D. 1673, by the French from Canada, who destroyed an English settlement on the Great Miami in 1753, bringing on the war between France and England, of 1755. At the peace, it was, with Canada, ceded to the English, Feb. 10, 1763, and passed into the power of the United States government after the War of Independence, Sept. 15, 1783. The first territorial legislature met in September, 1799, and Ohio was admitted into the Union as a separate state in 1802.

Ohud, Mount (Battle).—Mohammed was defeated by the Korish on Mount Ohud, near Medina, A.D. 623 or 624. Mohammed himself was wounded in the face with a javelin, and two of his teeth were broken.

Oil.—Jacob poured oil on the stone which formed his pillow at Bethel, B.C. 1740 (Gen. xxviii. 18). It was extensively used in the sacrificial worship of the Jews, and in the anointing of their high priests and kings. The ancient Egyptians extracted oils from the olive, castor-berry tree, lettuce, flax, and other sources, and used them in the toilet, as well as for lamps and in cookery. Athens exported large quantities of olive oil, and at Rome, bathers and the athletes habitually used it for purposes of anointment. Jan Van Eyck is regarded as the inventor of oil colours A.D. 1410, but there is little doubt that they were known at least two centuries before his time.—All vessels containing oil were ordered to be gauged by 4 Rich. II. c. 1 (1390), which was repeated and enforced by subsequent acts. Imported oils were taxed by 12 Charles II. c. 4 (1690), and the duty on olive oil was increased by 2 Will. & Mary, s. 2, c. 4 (1690). The duty on chemical or essential oils was fixed at one shilling per lb, by 18 & 19 Vict. c. 97 (Aug. 14, 1855), which repealed the duties on vegetable and fish oils.—Taylor's apparatus for the manufacture of oil-gas was invented in 1815.

Old Bailey (London).—The Sessions or court house, commenced A.D. 1770, was not completed until 1783. Improvements were made in 1808. The pillory in the Old Bailey was used for the last time June 22, 1830.

Oldenburg (Germany).—The title of count was assumed by Christian I. A.D. 1155, and the duchy was formed of the two counties, Oldenburg and Delmenhorst, by Joseph II. in 1773. It joined the confederation of the Rhine in 1803, was incorporated with the French empire by Napoleon I. in 1810, and was restored to the ducal house in 1814. Augustus I. assumed the title of grand-duke in 1829. Kniphausen was added to the grand duchy in 1854.

Old Fort (Crimes).—The allied English, French, and Turkish army, reached Old Fort, near Eupatoria, Sept. 12, 1854. In the course of a few days the forces disembarked with their material. The English mustered 28,000 men and 54 guns; the French 24,500 men and 70 guns, and the Turks about 7,000 men.

Old Man of the Mountain.—The name given in Europe to the leader of the Assassins (q.v.).

Old Style.—An attempt was made in England to reform the calendar (q.v.) March 16, 1585, when a bill, entitled "An act giving her Majesty authority to alter and new-make a calendar, according to the calendar used in other countries," was read a first time. It was read a second time March 18, 1585, and then the subject dropped. The alteration was effected by 24 Geo. II. c. 23 (1751), entitled "An act for regulating the commencement of the year, and for correcting the calendar now in use." This measure effected two great reforms, first in substituting the Gregorian for the Julian calendar, and, secondly, in abolishing the practice of commencing the legal year on the 25th of March. (See Year.) The act provided: "That throughout all his Majesty's dominions in Europe, Asia, Africa and America, the suppuration according to which the year of our Lord began on the 25th of
March shall not be used after the last day of December, 1751; and that the first day of January next following shall be reckoned as the first day of the year 1752, and so in all future years. That from and after the 1st day of January, 1752, the number of each month shall go on and be reckoned and numbered in the same order, and the feast of Easter and other movable feasts thereon depending shall be ascertained according to the same method as they now are, until the 2nd of September, 1752; that the natural day next immediately following the 2nd of September, 1752, shall be called and reckoned as the 14th day of September, omitting the eleven intermediate nominal days of the common calendar; that the day which followed next after the said 14th of September shall be reckoned in numerical order from that day; and all public and private proceedings whatsoever after the 1st of January, 1752, were ordered to be dated accordingly. That the several years of our Lord 1800, 1900, 2100, 2200, 2300, or any other hundredth years of our Lord which shall happen in time to come (except only every fourth hundredth year of our Lord), whereof the year 2000 shall be the first, shall not be deemed bissextile or leap-years, but shall be considered as common years, consisting of 365 days only; and that the years of our Lord 2000, 2100, 2200, and every other fourth hundredth year of our Lord, from the year 2000 inclusive, and also all other years of our Lord, which by the present supputation are considered bissextile or leap-years, shall for the future be esteemed bissextile or leap-years, consisting of 366 days. That whereas, according to the rule then in use for calculating Easter-day, that feast was fixed to the first Sunday after the first full moon next after the 21st of March; and if the full moon happens on a Sunday, then Easter-day is the Sunday after, which rule had been adopted by the general council of Nice, A.D. 325; but as the method of computing full moons then used in the Church of England, and according to which the table to find Easter prefixed to the Book of Common Prayer was formed, had become considerably erroneous, it was enacted that the said method should be discontinued, and that from and after the 2nd of September, 1752, Easter-day, and the other movable and other feasts were henceforward to be reckoned according to the calendar, tables, and rules annexed to the act, and attached to the Books of Common Prayer.” (See New Style.)

OLEKON (British Channel).—This island, the ancient Uliarius Insula, was ceded to England by the treaty of Brestgny, May 8, 1360.

OLEKON (France).—Under the mediation of Edward I. of England, a treaty of peace was signed at this town of Bearn, A.D. 1258, between Philip IV. of France and Alfonso III. of Aragon.

OLEKON LAWS.—Hallam (Middle Ages, ch. ix. pt. 2) remarks, with reference to this celebrated code of maritime law.—“A set of regulations, chiefly borrowed from the Consolato, was compiled in France under the reign of Louis IX., and prevailed in their own country. These have been denounced in the laws of Oleron, from an idle story that they were enacted by Richard I., while his expedition to the Holy Land lay at anchor in that island.” At the time this code was formed the English navy consisted of thirty-three ships.

OLIVA.—A treaty of peace was ratified at Oliva, May 3, 1690, between Poland, Denmark, Sweden, and the emperor. The Polish king renounced all claim to the crown of Sweden. Drontheim and Bornholm were ceded to Denmark, and Esthonia and Livonia to Sweden.

OLIVE, “in the western world,” says Gibbon, “followed the progress of peace, of which it was considered as the symbol. Two centuries after the foundation of Rome, both Italy and Africa were strangers to that useful plant; it was naturalized in these countries, and at length carried into the heart of Spain and Gaul.” A law of the Roman republic prohibited the culture of the vine and the olive beyond the Alps, that the value of those in Italy might be kept up. It was so highly valued by the Israelites that it was planted in the outer court of the second temple (Ps. xcii. 13, &c.). Olive-trees were cultivated in the botanic garden at Oxford in 1642, and some trees planted at the open ground at Camden House, Kensington, in 1719, produced fruit. The Cape olive, and the weather-leaved olive, were introduced from the Cape in 1730, the sweet-scented olive from China in 1771, and the laureled olive from Madeira in 1784.

OLIVENZA (Spain).—This town, belonging to Portugal, was taken by the Spaniards May 20, 1801, and a treaty was concluded by which Olivenza was confirmed to Spain, Sept. 29, 1801. The French, under Soult, captured it Jan. 22, 1811, and it was retaken by the English, under Beresford, after a few days’ siege, April 17, 1811. It was again occupied, June 24, 1811, by the French, who blew up the fortifications. Olivenza was restored to Portugal by the congress of Vienna in 1814, but Ferdinand VII. refused to give it up, and the town is still held by Spain in spite of the treaty.

OLMUTZ (Austria).—This town, at a later period the capital of Moravia, resisted an attack by the Mongols A.D. 1242. Here Matthias concluded what was termed the perpetual peace, with the kings of Bohemia and Poland, in July, 1479. Sigismund, king of Poland, held a congress here in April, 1527. It was taken by the Swedes under Torstenson, during the Thirty Years’ War, A.D. 1642, and was besieged unsuccessfully by Frederick the Great for seven weeks, A.D. 1758. Here Lafayette was imprisoned in 1794, and Ferdinand II. resigned the crown to his nephew, Dec. 2, 1848. The cathedral was founded about A.D. 1300; and the university was transferred to Kremsir in con-
sequence of the outbreak in 1848. A conference, under the auspices of the emperor of Russia, at which the plenipotentiaries of Austria and Prussia came to terms on the Hesse-Cassel dispute, was held here Nov. 29, 1850.

OLOT (Spain).—This ancient town, of which some Roman remains still exist, was almost entirely destroyed by an earthquake A.D. 1427. It was rebuilt, and suffered severely during the war of independence. The Spaniards were defeated by the French at Olot, Dec. 18, 1809.

OLZENTZIA (Battle).—About 12,000 Turks who crossed the Danube from Turtukai, Nov. 2 and 3, 1853, established themselves at Olzentzia, where they were assailed by the Russians, Nov. 4. The engagement terminated in favour of the Turks, who only lost 106 men. The Russian loss amounted to 1,000 in killed and wounded.

OLYMPIA (Battle).—The Eleians were defeated by the Arcadians, in the neighbourhood of Olympia, B.C. 364, and at the time of the celebration of the 104th Olympiad, the Arcadians were in possession of Olympia. Assisted by the Achaians, the Eleians surprised the Arcadians in the celebration of the games, and obtained a complete victory.

OLYMPIA (Greece).—The temple and sacred grove of Zeus Olympius were planned after the destruction of Pisa by the Eleians, B.C. 572, when the spoils of the conquered cities were devoted to the erection of a temple, which was completed about B.C. 472. Phidias executed the colossal statue of Zeno in ivory and gold, and the figures in the pediments, B.C. 437—433. The site, plan, and dimensions of the temple have been shown by the excavations of the French commission.

OLYMPIAD, a term of four years, deriving its name from the Olympic games, commenced with the new moon of the summer solstice, July 1, 776 B.C. This system of computing time was employed by the ancient Greeks, and it ceased after the 305th Olympiad, A.D. 440.

OLYMPIC GAMES.—The chief of the four great national festivals of the ancient Greeks, celebrated every fifth year at Olympia (q.v.)—whence the name. The exact interval at which they occurred was one of forty-nine and fifty lunar months alternately. The origin of the games, which lasted five days, is unknown. Some authors assert that they were founded by the Idae Dactyli B.C. 1453. There was a tradition that Iphitus, king of the Eleians, had revived the festival, B.C. 584 according to Eratothenes, and B.C. 528 according to Callimachus. Herodotus recited parts of his history at the Olympic games, B.C. 456. They were celebrated at Antioch A.D. 44, and were discontinued at Ellis in 394, and at Antioch by a decree of Justin I. in 520.

OLYMPUS Theatre (London) was built in 1805, by Philip Astley, of Astley’s Amphitheatre, and opened Sept. 18, 1806. It was burnt to the ground March 20, 1849, and having been rebuilt, was opened Dec. 26, 1849.

OLYTHIAN WAR.—The Olythians had become so powerful that Acanthus and Appollonia, jealous of their supremacy, applied to Sparta for aid, B.C. 385. The Spartans sent an army, under Eudamidas, B.C. 382, and Teleutias joined him soon after with 10,000 men. Both generals were utterly defeated, and Teleutias lost his life, B.C. 381. In the next campaign the Olythians submitted to Polybiadas, the Spartan general, B.C. 379. War broke out between the Olythians and Philip II., king of Macedon, B.C. 350, which ended in the entire destruction of the city of Olythus, B.C. 347.

OLYTHUS (Greece).—Artabanus, the Persian general, having captured the town and put all the inhabitants to death, gave it to the Chaldeic Greeks. From its situation it became of great importance, B.C. 392. (See OLYTHIAN WAR.)

OMAGH (Ireland), anciently called Oigh- Magh, signifying “the seat of the chiefs,” is supposed to have been founded A.D. 792. The soldiers of James II. set fire to the town, and destroyed it with its church and castle in 1698. The town having been rebuilt, was again destroyed by fire. The county infirmary was established in 1796.

OMERCOE (Scinde).—This fortified town was taken by the Ameers of Scinde from the rajah of Joudapore in 1813. The north-west tower of the fort was swept away in 1824 by the overflowing of a branch of the Indus.

OMER, ST. (France).—The cathedral, a fine building in the Gothic style, was completed in the middle of the 16th century. Within the walls of the abbey of St. Bertin, the only remaining fragment of which is a tower built in the 15th century, Childeric III., the last of the Merovingian kings of France, was confined by Pepin in 752. The French captured St. Omer in 1847. William III., prince of Orange, was defeated in battle here by Marshal Luxemburg in 1677, and the town was ceded to France by the treaty of Nim- gen, Aug. 10, 1678.

OMMIAD.—This dynasty was founded in Arabia by Moawiyah, A.D. 655 or 661. Merwan II., the fourteen and last caliph of this race, was slain in a mosque on the banks of the Nile, Feb. 10, 750, when the Abbassides (q.v.) assumed the reins of power. Abd- haman, the only member of the Ommiades who escaped the massacre at Damascus, founded a caliphate in Spain in 755. Eighteen caliphs reigned; Hixem III., who resigned in 1031, being the last.

OMNIBUS.—Charles Knight says "the omnibus was tried about 1800, with four horses and six wheels; but we refused to accept it in any shape till we imported the fashion from Paris in 1830." The omnibus was introduced there in 1827, and Mr. Shillibeer started the first pair in the metropolis, from the Bank to the Yorkshire Stingo, New Road, July 4, 1829. Omnibuses began to run in Amsterdam in September, 1839.

ONE-POUND NOTES were first issued by the Bank of England March 4, 1797. They were withdrawn in 1823. They were again issued Dec. 16, 1852, for a short time, to relieve commercial distress.

OSORE (Hindostan).—This place, near Bombay, was captured by the Portuguese a.d. 1569. General Mathews took it by storm Jan. 5, 1737, when the inhabitants said to have been cruelly treated.

OODEYPOR, or Mewar (Hindostan).—Its former capital, Chittor, was sacked a.d. 1303 by the Mohammedans, and again March 16, 1527. Chittor was taken in 1568 by the emperor Akbar, and most of its inhabitants perished. On the loss of his capital, the nana, Oody Singh, founded the city of Oodeypore, since that time the capital of Mewar. The nana of Oodeypore entered into a treaty with the East-India Company in 1816, by which he became a tributary of the British government.

Ootakamund (Hindostan).—A sanitary station at this place, on the Neigherry Hills, was founded a.d. 1822.

OPERA.—This term, at first applied to the earliest Italian plays of a mixed character, and then to lyrical dramas, was afterwards restricted to musical compositions. Ménestrier, the Jesuit, considers the Song of Solomon to be the earliest opera on record. The more probable account is that the opera proceeds from the sacred musical plays of the 15th century. "The Conversion of St. Paul" was performed at Rome a.d. 1440, and "Orfeo," or the descent of Orpheus into hell, was produced in that city in 1490. Sutherland Edwards, in his "History of the Opera," from which much of the information in this article is derived, states that Clement IX. was the author of seven librettis.

A.D. 1574. Claudio Merulo composes the music of a drama, which is played before Henry Ill. of France at Venice. 1681. Baltasarini, alias Beauloyeux, produced the Ballet Comique de la Regne, which is said to have cost 3,600,000 francs. 1597. The opera of Daphne is performed for the first time in the Corso palace at Florence. 1600. Euridice is represented publicly at Florence, on the occasion of the marriage of Henry IV. of France with Marie de Medicis. 1608. Gallavox composes new music to the libretto of Daphne, and Monteverde's Orfeo is produced in Italy. 1645. Cardinal Mazarin introduces the Italian opera into Paris. 1646. The first French opera, entitled Akbar, Roi de Moghul, is produced in the episcopal palace of Carpentras. 1651. The first English opera is produced at Sir W. Davenant's theatre. 1671. The second French opera, La Pastorale en Musique, is privately performed at Issy. The third, Pomone, being the first French opera heard by the Parisian public, is produced this year. 1672. Lully's first opera, with Quinault, calls Cadmus and Hermione, which is produced upon the French stage. 1677. Purcell (born 1659) produces his first opera, The Indian. 1678. Thiele's Adam and Eve, the first opera produced in public in Germany in the German language, is played at Hamburg. 1685. Dryden's celebrated operas, the music by Gruben, Abilon and Albanius, is produced at the Duke's Theatre. 1690. Purcell composes music for the Tempest. 1691. Purcell introduces his King Akbar in England. 1710. The Italian opera is introduced into England about this time. Buononcini's Almahide is produced in England, being the first work composed entirely in the English language. 1711. Handel's first opera, Rinaldo, is produced at the Queen's Theatre, in the Haymarket. 1712. Handel's Il Pastor Fido is produced at the King's Theatre. 1713. Handel's Teese is produced. 1715. Handel's Amadigi is brought out. 1723. Buononcini's Oroidea is produced. 1729. Handel's Alcina and Flora are brought out. 1729. Handel's Giulio Cesare and Tamerlano are produced. 1727. Buononcini's last opera, Sigyana, was produced. 1729. Handel's Hippolyte et Aricie is produced at Paris. 1737. Rameau produces his Castor and Pollux. 1732. Pergoleso's Serva Padrona is produced in Paris. This opera causes the celebrated dispute between the French and Italian stage.

1829. Aug. 3. Guillaume Tell, the last opera written by Rossini, is represented for the first time at the Académie Royale, Paris.

1831. Meyerbeer's Robert du Diable is produced at the Académie Royale.

1832. Giulia, or Giulietta, Grisi first distinguishes herself as Adalgisa, in Norma, at Milan.

1835. I Puritani is played for the first time in London, for Grib's benefit.

1840. Donizetti's Lucrezia Borgia is produced at Paris.

1841. Donizetti's last opera, entitled Catarino Comaro, is performed at Naples.

1847. Madame Weber, called Grisi, appears at the Royal Italian Opera, Covent Garden.

1849. Meyerbeer's third opera, Le Prophète, is produced at the Académie Royale.

1851. Giulia Grisi retires from the stage.

OPERA-HOUSE (London).—The Italian Opera-house, or Her Majesty's Theatre, built by Sir John Vanbrugh A.D. 1705, was burnt down June 18, 1789. The present edifice was built in 1790, by an architect named Nomotti. When the colonnade and arcade were added in 1818.

Ophir, the name of an ancient country celebrated for gold. Its position has not been ascertained; and Arabia, India, and Africa, are contended for by different authorities. The ships of Solomon and of Hiram, king of Tyre, brought 450 talents of gold to Jerusalem, b.c. 1000 (1 Kings ix. 26–28, x. 11, and 2 Chron. vii. 17 and 18, and ix. 10).

Jehoshaphat built ships at Tharthash, to go to Ophir for gold, about b.c. 913 (1 Kings xxii. 48, and 2 Chron. xx. 36 and 37).

Gold from Ophir is also mentioned in Job xxxii. 24, and xxviii. 16; Psalms xiv. 9; and Isaiah xxx. 12.

OPHTHALMIC HOSPITAL.—The first institution of this description in England was founded in Moorfields A.D. 1804, and was called the Royal London Ophthalmic Hospital. The Westminster Ophthalmic Hospital was founded in 1816, the North London in 1841, and the Central London in 1843. The Ophthalmic Infirmary was founded in Burlington Gardens in 1804.

Opium, chiefly obtained from Persia, Arabia, and India, was anciently prepared at Thebes. The opium trade to China became a monopoly in the hands of the East-India Company A.D. 1773, and was transferred to the Board of Trade in 1793. The Chinese prohibited the importation in 1796. The cultivation of opium in India was restricted to the districts of Bahar and Benares in 1797. Turkey opium was introduced into the Indian Archipelago in 1715. On the cessation of the East-India Company's trading powers in 1834, a superintendent of trade was sent out to China by the British government. Disputes arose with the Chinese, who, in 1839, destroyed 20,000 chests of opium. Sertturner proved opium to be a compound substance in 1812.

Oporto (Portugal) stands near the site of the ancient Cale, or Calem, also called Portus Cale, whence the name Portugal is by some writers derived. The Alani afterwards founded Castrum Novum, of which the present city of Oporto, i.e., the Port, is supposed to occupy the site. It was taken by the Arian Goths, under Leovigildo, A.D. 530. The Goths gave way to the Moors in 716, and the town was utterly destroyed by Almanzor of Cordova in 520. It was rebuilt and re-peopled by Gasccons and French in 999, and it again fell into the hands of the Moors, who retained possession till 1092, when it was finally taken by the Christians. A tax having been laid upon linen manufactures, the women rose and routed the soldiers in 1623. Another riot ensued in 1661, on account of a tax imposed upon paper. An insurrection occurred in 1756, when the wine monopoly was created by Pombal, and for this insurrection twenty-six persons were put to death. The French, under Soult, took Oporto by storm March 29, 1809. The duke of Wellington passed the Douro May 11, 1809, and surprised Soult, who was obliged to retreat. The Miguelites seized Oporto July 3, 1828. Don Pedro landed near Oporto, of which he took possession, July 9, 1832. The Miguelites attacked the place Sept. 19, and were repulsed with great slaughter. They continued the siege, and failed in another assault, March 4, 1833.

OSSO (Italy), supposed to occupy the site of the ancient Mamertium, was made a bishop's see about A.D. 1301. The town was almost entirely destroyed by an earthquake in 1783.

O. P. RIOTS (Covent-Garden Theatre).—The new theatre was opened Monday, Sept. 18, 1809, and the prices of admission having been raised, the public assembled in large numbers, and by uttering loud cries of O.P., meaning old prices, prevented the actors from being heard. This was repeated night after night. The managers having tried in vain to overcome the opposition by the aid of a pugilist corps, with Dutch Sam at their head, submitted Dec. 16, 1809, by returning to the old prices.

OSRO (Battle).—Christian of Denmark suppressed a revolt of the Norwegian nobles at this town, the ancient capital of Norway, A.D. 1508. Opslo was almost completely destroyed by fire, May 24, 1624, and Christiana was soon after founded upon its site and made the capital.

OPTICS, the science which treats of the nature of light and vision, was very imperfectly known until the 16th and 17th centuries.

R.C.

494. Burying glasses are mentioned by Aristophanes, in the comedy of the "Clouds."

300. Euclid writes the first treatise on Optics.

A.D.

65. Seneca observes the magnifying power of convex lenses and the refraction of light by prisms.

621
The ancient oracle was that of Jupiter at Dodona, a city of Epirus. It was destroyed by the Aitolians B.C. 216, when the temple of the god was razed to the ground. The celebrated oracle of Apollo, at Delphi, was founded B.C. 1236. The temple was destroyed by fire B.C. 548. The Amphiictyons rebuilt it at a cost of 300 talents, or about £115,000. The temple was plundered by Sylia and Nero, and having fallen into neglect, was restored by Hadrian. The oracle was finally silenced by Theodosius.

Orange (Algeria) was in the possession of the Turks, and it contained extensive bazaars and flourishing manufactures in the 12th century. The Pisans formed establishments at Oran and on the surrounding coasts, A.D. 1373, and the Spaniards, under Cardinal Ximenes, invaded and captured Oran in 1509. It was retaken by the Algerines in 1708, and in 1732 was again captured by the Spaniards, who finally left it 1791, after an earthquake had destroyed everything except the fort. The French took Oran Dec. 10, 1830. They constructed docks, which were opened in 1850, and added many public buildings and streets to the old town. In 1833 a military colony of spahis (native cavalry) was established, and the colony has, since its acquisition by France, been under the control of a military governor.

Orange (France).—This town is remarkable for its Roman remains, consisting of a triumphal arch, supposed to commemorate the triumph of Marius over the Teutones at Aix, B.C. 102, a theatre, and a circus or hippodrome. The town was called by the Romans Arausio. In the Middle Ages it was the capital of a small principality of the same name. On the death of the prince of Orange in 1591, without children, it was inherited by his sister, who married the prince of Nassau, and the Nassau family were confirmed in possession by the treaty of Ryswick, Sept. 11, 1697. The king of Prussia claimed it on the death of William III. of England in 1702, and by the treaty of Utrecht, April 11, 1713, he was allowed to exchange it for other possessions with the king of France.

Orange Lodges.—The first was formed by the Orangemen (q. v.) at Armagh, Sept. 21, 1738; and the duke of York became a patron in 1797. They fell into comparative neglect at the close of the war in 1815. It was decided to revive them in Ireland, Aug. 28, 1828, and at a great Orange meeting held in Dublin Sept. 15, 1828, the acceptance, by the duke of Cumberland, of the office of grand master of the Orangemen of the United Kingdom, was announced. Debates respecting the legality of the Orange lodges occurred in the House of Commons March 4 and 6, and Aug. 4, 11, 15, 19, and 20, 1835; and a series of resolutions against them was agreed to in the House of Commons Feb. 23, 1836. Many magistrates were dismissed in 1845 because they were members of Orange lodges.

Orangemen.—This name was given by the Roman Catholics of Ireland to the Protestants of that country, on account of their support of the cause of William III., prince of Orange. It was first assumed in 1795 as the designation of a political party by the Protestants, who formed loyal associations in opposition to the society of United Irishmen, organized in 1791 for the purpose of

Optimists.—This sect of philosophers maintain, not merely that "whatever is, is right," but that whatever is, is absolutely best, and hence that even crimes form part of the divine plan in the government of the universe. Malebranche, who was born A.D. 1637, and died in 1715, and Leibnitz (1646 to 1716) are regarded as the founders of optimist philosophy.

Argonauts.
creating an insurrection, and establishing a republic in connection with France.

**Orange River (Africa).** — A district watered by a river of this name, was made British territory after the suppression of the Caffre rebellion, A.D. 1848. It was erected into a free state in 1854.

**Orange Tree.** — This tree, introduced into Europe by the Moors, was cultivated at Seville towards the end of the 12th, and at Palermo and Rome in the 13th century. Orange-trees are also said to have been brought from China to Portugal in 1547. Oranges are supposed to have been introduced into England by Sir Walter Raleigh. In the early part of the 16th century orange-trees were planted at Beddington, in Surrey, and in the beginning of the 16th century they had attained the height of 18 feet. They were all destroyed by frost in 1730. The Syringa, or mock orange, was brought from the south of Europe before 1596. The duty on oranges was repealed in 1860.

**Oratians, or Fathers of the Oratory,** were founded in Italy by Philip Neri, and received the public approval of Gregory XIII. A.D. 1577. The name is derived from the chapel or oratory, built by Neri at Florence. The French society of Fathers of the Oratory of the Holy Jesus was instituted by John Berulle in 1613.

**Oratorio.** — Some composition of this kind was known in the Church in the Middle Ages, though the modern oratorio is generally believed to have originated in Italy about A.D. 1540. Oratorios were introduced into England by Handel in 1720, but were not performed in public till 1732. They were so successful that in 1737 they were performed twice a week during the season of Lent. Handel's "Messiah" appeared in 1741; Haydn's "Creation" in 1798; Mendelssohn's "St. Paul" Sept. 20, 1837, and his "Elijah" Aug. 26, 1846.

**Orbazzano, or Marsaglia (Battle).** — The French, under Catinat, defeated the troops of Victor Amadeus, duke of Savoy, at this town, in Piedmont, Oct. 4, 1693.

**Orcades (North Sea).** — Ancient writers represent this group, at the extreme north of Britannia, to consist of between thirty and forty small islands, supposed to be the modern Orkney and Shetland Islands (q.v.).

**Orchards, from the Anglo-Saxon ortgeard, or wyrt-yard, existed in this country in ancient times as appendages to monastic establishments, yet do not seem to have become numerous before the beginning of the 17th century.

**Orchestra.** — A musical instrument, invented in France by the Abbé Vogler A.D. 1793. Kunz, a Bohemian, gave the same name to an instrument invented by him in 1796.

**Orchian Law.** — A sumptuary law, proposed B.C. 181, by Orchius (whence its name), one of the tribunes, on the recommendation of the senate. It limited the number of guests at any entertainment, ordering the doors of the house to be left open during the meal, to guard against any infringement of the law.

**Orchomenus (Arcadia).** — This city was built, according to Pausanias, by a son of Lycaon; and the kings of Orchomenus are said to have ruled over the greater part of Arcadia. During the Peloponnesian war, the Lacedemonians left the hostages they had taken from the Arcadians in Orchomenus. The people were, however, compelled to surrender them to the Athenians, B.C. 415. It fell into the hands of Cassander B.C. 313, in the war waged by him against Polyperchon.

**Orchomenus (Boeotia), capital of the powerful tribe of the Minyæ, became a member of the Boeotian confederacy sixty years after the Trojan war. It continued on friendly terms with the Thebans until war broke out between Sparta and Thebes, B.C. 395, when Orchomenus assisted the Spartans. At the peace of Antalcidas (q.v.), B.C. 387, Thebes acknowledged the independence of Orchomenus. After the battle of Leuctra (q.v.), B.C. 371, the Thebans became undisputed masters of Boeotia, and burnt Orchomenus to the ground, killed all the male inhabitants, and sold the women and children into slavery, B.C. 368. It was rebuilt during the Phocian war; and at the conclusion of the Sacred war, B.C. 346, Philip II. gave Orchomenus to its old enemy Thebes, and the people destroyed the city a second time, and sold all its inhabitants as slaves. After the battle of Charoneia (q.v.), in which the Thebans and the Athenians were defeated, B.C. 338, it was rebuilt by order of Philip II., but it never regained its former importance.

**Ordeals, or God's judgments, are of great antiquity, some writers being of opinion that the jealousy-offering mentioned in the 5th chapter of Numbers, B.C. 1496, is a test of this kind. Ordeal of fire was known to the Greeks, and was practised by the Brahmins. Blackstone says: "The most ancient species of trial was that by ordeal; which was peculiarly distinguished by the appellation of Judicium Dei, and sometimes Vulgaris Purgatio, to distinguish it from the canonical purgation, which was by the oath of the party." The trial by ordeal in England was of two sorts, either fire ordeal or water ordeal. Fire ordeal was performed, either by taking up in the hand a piece of red-hot iron, of one, two, or three pounds weight; or else by walking barefoot and blindfold, over nine red-hot ploughshares, laid lengthwise at unequal distances; and, if the party escaped being hurt, he was adjudged innocent; but if it happened otherwise, as without collusion it usually did, he was then condemned as guilty. Water ordeal was performed, either by plunging the bare arm up to the elbow in boiling water, and escaping unhurt thereby; or by casting the person suspected into a river or pond of cold water, and if he floated without any action of swimming, it...
was deemed an evidence of his guilt, but if he sank he was acquitted. There were several other species of ordeal in use in different countries. Notice of ordeals in England first occurs in the laws of Ina, who reigned in Wessex from a.d. 628 to 727. This mode of punishment was formally abolished by Henry III. in 1218, when assize of battel, or trial by combat (q.v.), for some time took its place.

ORDERS IN COUNCIL, provoked by Napoleon I.'s Berlin decree (q.v.), were issued by the English government Jan. 7 and Nov. 11, 1807. They prohibited trading to any ports under the influence of France. These orders, which led to several discussions in the houses of parliament, were revoked, as far as the United States were concerned, June 23, 1812, and were altogether repealed in 1814.

ORDINANCES.—French laws were, after the reign of Philip IV., or the Fair, of France (a.d. 1285—1314), usually styled ordinances. Louis XIV. ordered a collection of these ordinances to be published, and the first volume appeared in 1723. The ordinances of Charles X., which led to the expulsion from France of the elder Bourbons, appeared in the Moniteur July 25, 1830. During the great rebellion, the more important affairs of the kingdom were settled by ordinances. (See SELF-DENING ORDINANCE.)

ORDINANCE.—As early as the reign of Henry III. the military stores of the country were under the charge of an officer called the “Balistarius,” or “keeper of the cross-bows.” The functions of this officer became extinct in the reign of Henry VI. The master of the king's ordinance was first appointed about a.d. 1461. The office was formerly conferred for life, and was so bestowed by Queen Elizabeth on the earl of Essex, March 29, 1596. The last master-general of ordnance was Sir William Compton, who assumed the office Jan. 22, 1670. The letters patent of the master-general of the ordnance were revoked May 25, 1855, when the civil administration of the army was vested in the hands of the secretary of war.

ORDNANCE OFFICE (London) was built a.d. 1767.

ORDNANCE SURVEY.—The trigonometrical survey of England was commenced a.d. 1783, for the purpose of connecting the observatory at Greenwich with the French arc at Paris. This led to the great undertaking of a general survey of the British isles, begun in 1791. The ordnance survey of Ireland commenced in 1824, and the great survey of India in 1804.

OREBRO (Sweden).—Here, in 1540, the act of succession in favour of Gustavus Vasa originated. It was confirmed at Westeraa in 1542. Bernadotte was elected crown prince of Sweden at Orebro in 1810, and a treaty of peace was signed here between Great Britain and Sweden, July 18, 1812. It consisted of four articles, and was ratified by the prince regent of England Aug. 4, and by the king of Sweden Aug. 17.

OREGON (North America) is said to have been visited by the Spaniard Bartolome Ferrelo, a.d. 1543. Sir Francis Drake touched here in 1579; Captain Gray, an American trader, sailed along part of the coast in 1789; Captain Baker, an Englishman, entered the mouth of the Columbia in 1792; and Lieutenant Broughton, R.N., sailed a hundred miles up the river, taking formal possession in the name of George III. in 1792. A dispute having arisen between Spain and England as to the sovereignty, both countries relinquished exclusive possession by the convention of Madrid, when Nootka Sound was ceded to England (1790). An American company, formed by Mr. Astor, of New York, made a settlement at a point in the mouth of the Columbia which was named Astoria, March 24, 1810. It fell into the hands of the English in 1814. The United States government laid claim to the territory, and after much negotiation, it was agreed by treaty, June 12, 1846, that the United States should possess up to 49° N. latitude, leaving free to England the navigation of the Columbia. Oregon was constituted a territory by act of congress, Aug. 14, 1849.

OSWALD (Russia), the chief town of a government of the same name, first rose into importance during the 17th century. A great part of this city was destroyed by fire June 7, 1848.

ORGAN.—An instrument of an inferior kind was in use at a very early period. Athenaeus says the organ was invented by Ctesibius, a native of Alexandria, b.c. 150—120. Other authorities assert that it was used in Spain as early as a.d. 450; that Pope Vitalian invented it in 660, and that the first organ erected in France was in the church of St. Corneille, at Compiègne, in 757. According to the best authorities, the organ did not assume its present form until the 15th century. Bingham contends that the use of organs was introduced into the church after the time of Thomas Aquinas, a.d. 1250. According to his view, Martin Sanutus, who flourished about 1290, first introduced wind organs into churches, whence he was sur- named Torcellus, the Italian term for an organ. Bingham shows that the story of the invention by Pope Vitalian is altogether unworthy of credit.

OREFEL COLLEGE (Oxford) was founded by Edward II. Dec. 6, 1324, at the instigation of his almoner, Adam de Brom, who became its first provost in 1326. Edward III. granted the college, in 1327, a large messuage, called La Oriole, to which the college was removed, and from which it takes its name. The south and west sides were rebuilt in 1620, and the north and east between 1637 and 1642. The first library was built in 1444, and lasted till the rebuild-
ing of part of the college in 1637. In 1372 the students obtained a licence for a chapel within their premises, which was built at the expense of the earl of Arundel. This chapel was pulled down in 1629, and the present edifice was finished in 1642. Carter's Building was erected in 1729. The library was commenced in 1738, and the college was enlarged in 1817.

Oriental Club (London).—This club was founded by Sir John Malcolm in 1824.

Oriflamme of St. Denis, or royal banner of France, was borne at the head of the French armies from the 12th to the 15th century. Fabian, quoting a description from Robert Gagiun, whom Erasmus calls a discreet historiographer, says it was "a cloak of red silk, which was named the auriflamme, and borne for a banner in the field against the barbarian or heathen people, by virtue whereof the French princes won many victories; but after, when this precious relic, or auriflamme, was borne against Christian princes, the virtue thereof ceased, and was at length lost, but yet the like thereof is kept at St. Denys, and had in great reverence of the bishops and abbots of the same place." Louis VI., the Fat, used it for the first time as a royal standard in his war against Henry I. of England, A.D. 1124, and he afterwards took it from the altar of St. Denis whenever he went on an expedition; and Louis VII. of France took it with him in the second crusade in 1148. Fabian relates that it was borne by the French in the battle of Pottiers in 1356; and it is said to have been borne in battle for the last time by Louis XI. at the battle of Montlhery (q. v.), July 16, 1465.

Origenists.—The supporters of Origenes, of Tyre, a Christian father, born in Egypt A.D. 185 or 185. He was ordained a presbyter at Caesarea, in Palestine, in 228, and he died in 353. In the 4th century a great controversy arose respecting Origen, whose name, in spite of his various erroneous opinions, had always been held in veneration. The orthodox condemned his writings A.D. 378. Justinian I. issued an edict against the Origenists in 544, and they were condemned by the second council of Constantinople, being the fifth general council, May 4 to June 2, 553.

Orhuela (Spain).—The Romans are supposed to have had a station at this town. Though it was not, as some writers assert, the ancient Orcelis, it might have been the ancient Thiar. The Moors took it A.D. 713, and it was finally wrested from them by Jayme I. of Aragon in 1265. It was sacked in 1520, and has suffered severely from the ravages of war, inundations, and plagues. An earthquake did considerable damage March 21, 1829. It was made the seat of a bishop March 23, 1566. The university, established in 1568, was suppressed in 1835. The episcopal palace and the theological seminary of San Miguel were both founded in 1733. The poor-house, founded in 1743, was enlarged in 1818. The hospital was founded in 1764, and the cathedral was extended in 1829.

Orion.—A steam-ship thus named, plying between Glasgow and Liverpool, was lost on the rocks close to Portpatrick lighthouse, June 18, 1850, when nearly a hundred passengers perished.

Orissa, or Oriza (Hindostan).—This country was wrested from its Hindoo princes by Akbar, A.D. 1592. The English received permission to trade to Piplee, in Orissa, in 1634. Clive captured it A.D. 1755, and the East-India Company were empowered to receive the revenues of Orissa, Bahar, and Bengal, by the treaty of Allahabad, Aug. 12, 1765.

Orizaba (Mexico).—The peak of Orizaba, an extinct volcano near the town of the same name, was explored by Lieutenant Reynolds, A.D. 1848.

Orkney and Shetland Isles, of Orkney (North Sea), originally peopled by Scandinavians, were seized by Kenneth III. of Scotland A.D. 889. The Norwegians conquered them in 1099, and held them till 1263, when they were driven out by Alexander III., king of Scotland. The islands were afterwards retaken by the Danes. James III. of Scotland, who married Margaret, daughter of the king of Denmark, in 1469, received the Orkney and Shetland Isles as her dowry, and they have since remained part of Scotland. A lighthouse was built in 1806 on the Point of Start. Some ancient relics of the earliest Scandinavian or Scottish kings were discovered in these islands April 6, 1858.

Orleans (France), the Genubum of the Romans, was afterwards named Aurelianum, from Marcus Aurelius, who rebuilt it in the 2nd century. Cesar mentions a great insurrection which occurred here B.C. 52, after which he burned the town. Attila, who besieged Orleans A.D. 491, was defeated under its walls by Aetius. Aetius defeated the Visigoths in a battle near this town in 463. A council was held, July 10, 511, to regulate ordination and the use of litanies; and another, May 7, 538, by which many indignities were inflicted on the Jews. Other councils were held June 23, 533; in 541; Oct. 28, 549; in 638; and in 1022, when thirteen Manicheans were condemned to be burnt. On the death of Clotaire in 561, his kingdom was divided among his sons, and Orleans fell to the lot of Gontran. The Northmen captured it in 855, and again in 865. The siege of Orleans was commenced by the English Oct. 21, 1423. Joan of Arc relieved the city April 29, 1429, and the siege was raised May 8. The Huguenots, under the prince of Condé and Coligny, assembled here in 1562. Orleans was besieged Feb. 24, 1563, by the duke of Guise, who was assassinated under its walls by Poltrot de Mére. The struggle was brought to a close by the edict of Amboise, March 19, when the two parties united for the purpose of wresting Havre de Grace from the English. The cathedral was begun by Henry IV. in 1601.
ORMUS, or Hormuz (Persian Gulf) — The kings ofOrmuz, celebrated for its pearl-fishery and great wealth, became tributaries of the sultans of Kerman, until they were delivered, about A.D. 1505, by the Portuguese, who took possession of this island A.D. 1507. They were expelled by the Persians, assisted by the English, in 1622. The disciples of Zoroaster took refuge in its caves, and were afterwards called Parsees (q. e.). Milton, in “Paradise Lost” (b. ii), alludes to its reputation for wealth —

“High on a throne of royal state, which far
Outshone the wealth of Ormus and of Ind.”

ORNITHOLOGY. — Aristotle, in his “History of Animals,” b.c. 350, gives a brief account of birds; and Pliny in his “Natural History,” A.D. 72, also deals with the subject. Pierre Belon wrote upon it in 1551; Conrad Gesner of Zurich in 1555; and the three volumes of Aldrovandus of Bologna appeared A.D. 1559—1603; Willughby’s “Ornithologia Libri tres” was published posthumously in 1676, and Ray’s “Synopsis” in 1713. The first edition of “Systema Naturae,” by Linnaeus, was published at Leyden in 1735; Wilson’s “American Ornithology,” 1818—1814; Cuvier’s “Animal Kingdom” in 1817; and Latham’s “History of Birds,” 1821—1824.

Orus (Greece), a Boeotian town, was taken at an early period by the Athenians, who were expelled b.c. 412. Some of the inhabitants founded another town of the same name, further inland, b.c. 402. It was a frequent source of strife between the Boeotians and the Athenians; and it was given to the latter by Philip II. b.c. 338. The inhabitants recovered their independence b.c. 519, and Cassander obtained possession of the island in 312, but did not hold it long. The inland town is supposed to have been abandoned soon after this time.

Orphan Institutions. — It is not known when asylums for the maintenance of orphans were first established, though they evidently existed among the Romans. Trajan, the Antonines, and Alexander Severus founded several, but they do not appear to have become frequent until the introduction of Christianity. During the Middle Ages they were very numerous, especially in the Netherlands. The most celebrated orphan asylum in the world is that established by A. H. Fransé at Halle in 1698. The following are the principal orphan asylums in the metropolis and its vicinity —

Orphenists. — A party of three thousand arrived in London from France to fulfil a musical engagement at the Crystal Palace, June 24, 1860.

Orbery. — The Chinese are said to have constructed such pieces of mechanism to illustrate planetary motion b.c. 2000. Archimedes constructed one b.c. 257—212; and Posidumius b.c. 51. Huyghens (A.D. 1629—1695) attended to their construction; and Roemer invented one which he described A.D. 1735. Mr. George Graham constructed one which was presented to the earl of Orrery, from whom it derives its name, about 1700. The Royal Institution, London, had one made in 1801, and another, on a much larger scale, by Dr. Pearson, in 1813.

Orsini Conspiracy. — This attempt to assassinate the emperor Napoleon III. and the empress, on their way to the opera at Paris, by throwing hand-grenades at the carriage, was made Jan. 14, 1858. Orsini, Radiu, and Pieri, were condemned to death, and Gomez to hard labour for life, Feb. 26; Orsini and Pieri were guillotined at Paris, and Radiu’s sentence was commuted to penal servitude for life, March 13. Dr. Bernard was arrested at Bayswater Feb. 14; and, after a trial at the Old Bailey extending over six days, was acquitted April 17. Violent addresses against England, from the colonels of the French army to the emperor, appeared in the Moniteur, Jan. 27, 1858. Lord Palmerston’s conspiracy-to-murder bill was introduced into the House of Commons, Feb. 8, 1858; and defeated on the second reading by a majority of 19, Feb. 19, 1858, which led to the resignation of the first Palmerston administration.

Orsini Faction, opposed to the Colonna family, adherents of the Ghibelline party at Rome, joined the Guelphs about A.D. 1200. Their influence declined in 1212, and was re-established in 1288. With the fall of Manfred (1268), Orsini and Colonna joined against the Guelphs, but were treated with leniency.

Orosy (Turkey). — This strongly-fortified town of Wallachia, taken by the Turks in 1738, was ceded by Austria to the Porte, Sept. 1, 1739. The Austrians were defeated near Orsova by the Turks, Aug. 8, 1739, when the victors set fire to the town. New Orsova, which forms part of Servia, was captured by the Austrians, April 16, 1790.

Ortega (Sea-Fight). — Commodore Fox attacked a French fleet and convoy, amounting in all to 170 sail, off Cape Ortega, June 20, 1747. The ships of war being fast-sailing vessels escaped, but forty-eight merchantmen were captured. Their united tonnage
amounted to 16,051 tons, and the crews to 1,197 men.

Orthez, or Orthéz (France), was the residence of the princes of Bearn till the end of the 15th century; and of Jane d'Albret, mother of Henry IV., who founded a Protestant college here about 1562. A year's truce was concluded at Orthez by Ferdinand of Spain with Louis XII. April 1, 1513. The governor, Viscount d'Orthez, refused to obey the royal order for the massacre of St. Bartholomew, Aug. 24, 1572. In the vicinity, Wellington gained a victory over Soult, Feb. 27, 1814. The castle of Moncada was built by Gaston de Foix in 1240, and formed for two years the prison of Blanche of Navarre, poisoned by her sister in 1463.

Orvieto (Italy).—This town, built upon the site of the ancient Herbanum, possesses one of the finest churches in Italy, founded A.D. 1290. A league between the Pope, Venice, and Naples, against the Greek empire, was concluded here in 1281. It was dissolved by the Sicilian Vespers (q. v.) in 1282.

Osborne House (Isle of Wight).—The original name of this manor was Austerborne. It was purchased by Queen Victoria from Lady Isabella Blatchford in 1845, when the old house was pulled down, and the present mansion erected from the designs of Mr. Cubitt.

Oschophonia, a festival thus named, from the practice of carrying boughs hung with grapes was instituted at Athens, in honour of Minerva and Bacchus, or Ariadne and Bacchus, by Theseus, about B.C. 1235.

Ostmo. (See Auximum.)

Osma, or Ouxama (Spain).—This town was taken and destroyed by Alonso II. of Leon A.D. 746. It was rebuilt in 938, and fortified in 1019. The cathedral was founded in 1232, and the university in 1550. The see was established about 597.

Osmium.—This metal was discovered by Tennant in the grains of native platinum, A.D. 1803.

Osnabrug, or Osnabruck (Hanover), was surrounded by walls A.D. 1082. The cathedral at this town was built in the 13th century, and a council against heretics was held there in 1538. A university was established in 1632, but was suppressed the following year. The treaty of Westphalia was signed at Osnabrug and Munster, Oct. 24, 1648. Charlemagne founded the bishopric of Osnabrug in 780. Since the peace of Westphalia it has been held by a Roman Catholic and a Protestant bishop alternately. It was secularized and united to Hanover in 1803.

Ossory (Bishopric).—This bishopric is regarded as the most ancient in Ireland. It was founded by St. Kieran, A.D. 422, at Saighir, or King's county, and was transferred to Aghaho, or Aghavoe, in 1052, and to Kilkenney in 1180. According to the provisions of the Church Temporalities Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833), the sees of Ferns and Leighlin were united to Ossory on the death of Bishop Elrington in 1835.

Ostend (Belgium), from a small village in the 9th century, had become an important seaport about A.D. 1100. It was destroyed by the sea in 1334. Having been rebuilt, it was walled in by Philip in 1445; and fortified by the prince of Orange in 1583. The siege by the Spaniards, commencing in 1601, terminated, after a loss of 50,000 men to the garrison, and 80,000 to the besiegers, in 1604, with the capitulation of the town. It again capitulated to the allies July 6, 1706; was ceded to the emperor of Germany in 1715, and surrendered to the French Aug. 15, 1745. The French took possession of Ostend July 13, 1794; and the British as- sailed it unsuccessfully May 20, 1798. It was given up by the treaty of Paris May 30, 1814. The town suffered considerable damage by the explosion of a powder magazine in 1826.

Ostend Company, for carrying on trade with the East Indies, was established here A.D. 1717; received a charter from the emperor Charles in August, 1723; and was suspended in 1727.

Ostia (Italy) was founded by Ancus Martius B.C. 640, and exempted from military levies B.C. 207. Application for exemption from naval levies was also made, but refused, B.C. 191. A squadron in its harbour was destroyed by Cillician pirates B.C. 47; and in the civil wars the town was taken by Marius and given up to plunder by his soldiers, B.C. 87. It declined gradually, and had fallen into a state of ruin A.D. 327; but it afterwards revived, and was occupied by Ladiusans, king of Naples (1386-1414), and fortified by Sixtus IV., who built the castle. The French seized it, and were driven out by Pope Julius III., who formed a "holy league" against them, Oct. 4, 1511.

Ostracism.—This mode of banishment among the Athenians, at first for a term of ten years, afterwards reduced to five, is said to have been established by Cleisthenes B.C. 510. It was discontinued B.C. 452.

Ostrogoths, or Eastern Goths, with the other branches of the same nation, took possession of Dacia A.D. 275, and were subjected by the Huns in 376. Their king, Theodoric the Great, served under the emperor Zeno in 452 or 453, and from Pannonia marched with all his tribe into Italy in 488, and conquered and put to death Odoacer, establishing his authority over that country in 483. Their dominion was annihilated by Belisarius and Nurses about 553.

Ostrolenka, (Battle,) between the Poles and the Russians, in which the latter were defeated, was fought May 26, 1831.

Oswego (North America).—This town, situated on both sides of the Oswego river, was founded A.D. 1722. A fortress was built on the western side of the river in 1727, and a fort was erected on the opposite bank in 1755. They were both captured by Mont- caim in 1756, and were afterwards given up
to the English, who held them till 1795. Oswego was taken by the English May 6, 1814.

Oswestry (Shropshire), anciently called Oswaldstree, is said to have been named after Oswald, king of Northumbria, killed in the battle of Maserfield, Aug. 5, A.D. 642. By some authorities the site of the battle is fixed at Winwick, in Lancashire, and by others at Oswestry. Oswald was honoured as a saint, his day falling on the anniversary of his death, Aug. 5.

Otago (New Zealand) was settled by members of the Free church of Scotland, A.D. 1848.

Oceania (Pacific Ocean) was discovered by the Spaniard Quireos A.D. 1606; visited by Captain Wallis in 1767, and by Cook several times between the years 1769 and 1778. Missionaries arrived in 1797, and the king, Pomare II., embraced Christianity in 1816. By a treaty with the queen Pomare, it was placed under French protection, Sept. 9, 1842; and the French admiral on that station asserted the complete sovereignty of France over it in November, 1845. This led to a remonstrance on the part of England, and his proceedings were disavowed by the government Feb. 29, 1844.

Orford (Battle).—The Kentish men were defeated at Orford, by Otha, king of Mercia, and his army, A.D. 774.

Otranto (Italy).—The ancient Hydruntum, or Hydrus, founded at a very early period, probably by Greeks, was a port of some importance B.C. 191, and the usual place of passage from Italy to the East A.D. 400. It was one of the last cities in the south of Italy held by the Greek emperors, who lost it in the 11th century. About 12,000, being more than one-half the population, were slaughtered by the Turks when they sacked the city A.D. 1450.

Ottawa (Canada), formerly called Bytown, which name was changed to Ottawa A.D. 1854, was made the capital of Canada in 1855.

Otterburn, of Chevy Chase, (Battle), on which the well-known ballad seems to be founded, was fought between the English, under Henry Percy, son of the earl of Northumberland, and the Scots, commanded by the earl of Douglas, Aug. 10, 1388. The former having been taken prisoner and the latter slain, the victory remained undecided.

Ottoman Empire. This empire was founded by Osman, the son of Ertaghur, whose name has been corrupted into Othman, or Ottoman. The Ottomans style themselves Osmanlis.

A.D. 1429. Birth of Othman, or Osman.
1299. Othman, or Osman I., murders his uncle Deyndar, and founds the Ottoman empire.
1321. The Ottoman Turks enter Europe, and ravage Thrace and Macedonia.
1326. Death of Othman, who is succeeded by his son Orhan.
1327. Orchan makes Prusa, or Brousse, his capital, and completes the conquest of Bithynia.

A.D. 1330. The Ottoman Turks conquer Nicea, in Bithynia.
1333. Orchan forms an alliance with the Greek emperor Andronicus.
1336. Khornes, the ancient Myas, is conquered by the Turks.
1338. Karamania, the ancient Phrygia, is reduced by the Turks.
1338. The Turks make their first permanent settlement in Europe, on the coast of Thrace.
1357. Amurath I., son of Orchan, captures Gallipoli. He takes Hadrianople, and erects it into his capital.
1372. Servia and Bulgaria are reduced to subjection.
1376. Keronian is annexed to the Ottoman dominions.
1390. Amurath I. purchases the territories of the emir of Hamid.
1392. Amurath I. subdues Notiola.
1395. Part of Albania is brought under the Ottoman yoke.
1399. Aug. 27. The king of Servia, is defeated at the battle of Cossova, by Amurath I., who is received in triumph in the moment of victory.
1401. He conquers Wallachia, and obtains a footing in Constantinople.
1423. March. The death of Bajazet I. in captivity is followed by the dismemberment of his empire by his three sons. Soliman I. establishes his government at Hadrianople, Isa at Prusa, and Mohammed in Amasia, and the three wage civil war.
1419. Mohammed I. annexes Wallachia.
1422. The Ottoman empire is reunited by Amurath II.
1435 to 1437. War with Venice.
1448. John Huniades invades the Ottoman territories, and is defeated with great loss at the battle of Pagram.
1456. Mohammed II. is defeated by John Huniades, with the loss of 40,000 men, at the battle of Belgrade.
1461. The Peloponnesus is conquered by the Turks.
1462. War is declared against Venice.
1465. Egypt is annexed to the Ottoman empire.
1472. The Turks enter Italy.
1474. The Genoese possessions in the Crimea are seized by the Turks.
1479. Peace is restored with Venice.
1480. Mohammed II. takes Otranto, and sustains a terrible defeat in his attempt upon Rhodes.
1481. Spain is invaded by the Turks.
1499. Borras Keis defeats the Venetians at the naval battle of Lepanto.
1500. The Morea is wrested from the Venetians.
1503. Peace is concluded with Venice, whose possessions are reduced to the mainland of Greece are ceded to the Turks.
1511. The Janissaries dethrone Bajazet II., and coronate Alexander on his son Selim.
1514. Selim I. defeats the Persians at the battle of Shaldirane, or Kalderoon.
1515. Selim I. defeats the Persians at Khangandees, and subdues Mesopotamia and Kurdistan.
1683. Selim I. annexes Egypt to his dominions.
1685. Selim I. is succeeded by his son, Soliman II., who becomes the Magnificent.
1692. He conquers Rhodes.
1693. He assails Austria and Hungary, and defeats the Hungarians at Mohacs, Aug. 29.
1698. He is compelled, after heavy losses, to raise the siege of Vienna.
1703. Peace is restored with Austria and Hungary.
1705. Soliman II. forms an alliance with Francis I. and the emperor Charles V.
1709. The southern parts of Arabia are subdued, and an unsuccessful invasion of India is conducted by Suleiman Pasha.
1710. War recommences in Hungary, and the Turks take Buda.
1715. Transylvania is made tributary to the Turks.
1723. Dabjaft, son of Soliman II., rebels against his father.
1727. Aug. 1. The capitulation of Famagusta completes the conquest of Cyprus. Oct. 7. The Turks sustain a terrible defeat from the combined Christian fleets under Don John of Austria at the naval battle of Lepanto.
1734. Amurath III. signals his accession by the murder of his five brothers.
1738. Commercial relations are first established with England.
1739. The Turks conquer the district of Van, in Persia.
1750. The Persians obtain peace by ceding the provinces of Georgia, Azerbaijan, Shirwan, and Loristan to Turkey.
1755. Mohammed III. succeeds his father, and murders his thirteen brothers and the concubines of his father.
1760. Abd al Kalim Kanyaestji, the "Black Scribe," commences a formidable revolt in Asia.
1769. The Black Scribe is defeated and slain.
1770. The accession of Achenar, or Ahmed I., is memorable from his refusal to murder his brothers.
1775. Tobacco is introduced into Turkey.
1785. Georgia, Erivan, and Tabriz are ceded to Persia. Mustapha II. is deposed.
1788. Othman, or Osman II., is murdered by his subjects, who restore Mustapha II.
1792. An insurrection of the Janissaries is suppressed with horrid cruelty.
1795. Amurath IV. murders his brothers Dabjaft and Soliman.
1796. He murders his brother Kazim.
1797. Azof is taken by the Cossacks.
1798. The Turks take Bagdad and massacre the inhabitants.
1802. Azof is recaptured.
1804. War is declared against Persia.
1805. The grand vizier, Ahmed Koerprilli, is deposed by the Imperialists under Montecuculli at the battle of St. Ghezard.
1809. Candia is taken from the Venetians. (See Candia.)
1823. The Turks are defeated by the Poles, with the loss of more than 30,000 men, at the battle of Chocizom.
1824. War is commenced against Russia.
1825. The Ukrains and Cossack territories are ceded to Russia and peace is restored.
1829. Sept. 12. Vienna, on the point of surrendering to Mohammed IV., is relieved by John Sobieski.
1836. Buda is retaken by the Austrians.
1837. Mohammed IV. is deposed by his brother, Soliman III.
1838. Belgrade, Bosnia, Croatia, and Slavonia are restored to the Turks.
1840. Belgrade is recovered.
1841. The Imperialists totally defeat the Turks at the battle of Peterwardein, or Salankemen, in which the vizir Mustapha Koerprilli is slain.

1637. Prince Eugene defeats the Turks at the battle of Zenta, in which they lose 30,000 men killed, and 10,000 drowned in the retreat.
1690. Jan. 26. Peace is restored to Turkey by the humiliating treaty of Carlowitz.
1704. The Turks revolt against Mustapha II.
1710. The Turks declare war against Russia.
1711. July 10. Baltaji Mohammed compels Peter the Great to accede to the treaty of Falsch (q. v.), by which the Turks regain Azof.
1713. Charles XII. of Sweden is made prisoner at Bender (q. v.).
1715. The Turks reconquer the Morea.
1717. The Austrians engage the Tenempe war.
1718. Aug. 16 (N.S.). Prince Eugene gains the battle of Belgrade (q. v.).
1719. July 21. Peace with Austria and Venice is restored by the treaty of Passarowitz.
1720. War is declared against Persia. The printing-press is introduced into Turkey.
1729. Sept. 17. Achmet, or Ahmed III., abdicates in favour of his nephew, Mohammed V.
1730. Peace with Persia is restored by the treaty of Erivan, which cedes all the territory beyond the Araxes to the sultan.
1735. July 22. The Austrians are defeated at the decisive battle of Kytelska. Aug. 28. The Austrians accede to the treaty of Belgrade (q. v.).
1743. The recognition of Turkey by the great powers as an integral portion of Europe commences about this year.
1748. The Wahabee insurrection commences. (See Wahabees.)
1765. Inquisitions break out in Georgia.
1768. War is declared against Russia.
1776. The Turkish fleet is destroyed by the Russians in the bay of Teshemes. Ali Bey revolts in Egypt. The Russians under Eugene, Akermann, Azoiz, Bender, and Girm Tartary.
1776. The Egyptian insurrection is quelled. July 21 (N.S.). Peace with Russia is restored by the treaty of Koutchouk-Kainardji, by which the Tartars are declared independent in the Crimea, Cuba, and Bessarabia, and the Porte engages to govern Moldavia and Wallachia with greater equity.
1784. Jan. 5. The Crimea is ceded to Russia by the convention of Constantinople.
1787. War is renewed with Russia.
1788. War with Austria recommences. Dec. 17. The Turks, under Prince Peterkoff, storm Oczakow, and massacre 20,000 Turks.
1790. Dec. 22. Suvwarrow storms Ismail, and massacres 15,000 Turks.
1791. Aug. 11. The treaty of Galatz restores peace with Russia, which receives important cessions.
1798. War is declared against France. (See Egypt.)
1799. An alliance is formed with England.
1821. Jan. 20. The Dardanelles are declared against Russia. Feb. 18. Sir John Duckworth forces the passage of the Dardanelles (q. v.). May 29. Selim is deposed by Mustapha III.
1828. The Janissaries revolt at Constantinople and maintain the regular troops in the field.
1829. May 28. Peace with Russia is restored by the treaty of Buharest (q. v.).
1830. A Turkish army of 100,000 men ravages Servia.
1841. The Wahabees are finally subdued.
1851. March, Moldavia and Wallachia rebel. April 23 (Easter Sunday). The Christians are persecuted, and the Greek patriarch of Constantinople is hanged by the Turkish mob. (See Greece.)
1862. April 23. The Turks take Scio and massacre the inhabitants. (See Scio.)
1871. The Greek inhabitants of Pergamo are massacred.
1894. March 26. He comet Al is restored.
1824. Oct. 7. The Turkish fleet is almost annihilated by the Greeks at Mitylene. Nov. 23. The Turks evacuate Moldavia.

1825. June 15. The Janissaries are massacred, and the army is placed under a European system of discipline.

1827. Oct. 20. The Turkish fleet, numbering 30 vessels, is defeated by the combined English and French squadrons at Navarino.

1828. Jan 5. 132 French residents, 120 English, and 50 Russians, are expelled from Turkey.

1830. April 23. Turkey acknowledges the independence of Greece. May 7. A treaty is concluded with the United States. May 28. The Turks declare war against the Porte.

1831. The Albanian insurrection is suppressed, the first Turkish newspaper is established, and the cholera appears in the country. Mehemet Ali, nom Imadeddin. Ali revolts in Egypt, and invades Syria.

1834. A regular postal system is first established in Turkey.

1839. Mohammed Ali revolts in Syria (q.v.).

1842. War is declared against Persia.

1846. April 30. A commercial treaty is concluded with Russia.

1848. Insurrections break out in the Danubian principalities.
OUD

1380. May 5. Prince Gortschakoff states that the Christians in Turkey are again subjected to spoliation. June 1. England refuses to interpose in favour of the Christians, as contrary to the treaty of Perpignan. July 3. The French and Russian ambassadors declare that their governments are satisfied by the conduct of Turkey with respect to the Christians. (See Dvacevs and Mauvacevs.) Oct. 25. A large proportion of the Bulgarian clergy join the Romish communion.

OUDE (Hindostan), one of the first provinces of India, colonized from the west about B.C. 1366. The general of the emperor of Delhi conquered it A.D. 1195, and Babar's army, which had been sent to subdue the country, was defeated by the Affghans A.D. 1528. It was conquered by Akbar A.D. 1559, and the dynasty of Saadat Ali established in 1720. An action, in which the English were victorious, under Major Hector Munro, was fought at Baksar Oct. 23, 1784; a treaty with Warren Hastings was concluded in 1773; and another, which resulted in the spoliation of the Begums and the subsequent imprisonment of Hastings, was signed Sept. 19, 1785. The number was deposited, and Saadat II. restored to the throne, Jan. 21, 1785, and Wajid Ali was pensioned off with £120,000 per annum, the territory annexed, and the title of king abolished Jan. 1, 1856, the fact being announced by official proclamation Feb. 7, 1856.

OUDENAARDE (Belgium) surrendered to a force of French and English A.D. 1658. It was besieged by the stadholder in 1674, and the French were defeated here by Marlborough and Eugene, when Prince George, afterwards George II., distinguished himself, July 11, 1705.

OUVART (Battle).—A picked detachment of 110 men, chosen from the North Cork militia, under Lieutenant-Colonel Foote, attacked the Irish rebels under Father John Murphy at the Hill of Ouart, in Wexford, on Whitsunday, May 27, 1796. The rebels were driven from their position and were in full retreat, when an alarm that they were rushing on a body of cavalry caused them to turn on their pursuers, who were all slain except Colonel Foote, a sergeant, and three privates.

OUBEQUE (Battle).—Near this small town of Portugal, Count Alfonso Henriques, with a force of 13,000 soldiers, defeated the combined armies of five Moorish sovereigns, July 25, 1139. The five leaders of the infidels fell in the action, and the victorious Alfonso was immediately hailed as king of Portugal.

OZIEL GALLEY SOCIETY (Dublin).—This society, for deciding commercial difficulties by arbitration, originated in the following circumstance. Early in the year 1700 much legal perplexity was occasioned by the case of the Ozuel Galley, a vessel in the port of Dublin, and it was referred to the arbitration of a committee of merchants, who decided to the satisfaction of all parties. A permanent society was established in consequence, which received the name of the Ozuel Galley Society, in 1705. Its members consist of a captain, lieutenants, and crew, elected from the most respectable merchants of Dublin, and the general business of the society is transacted at periodical convivial meetings.

Ovation.—The first ovation, or lesser triumph among the Romans, was accorded to Publius Postumus Tubertus, after his victory over the Sabines B.C. 469.

OVERLAND MAIL.—The new route to India, via Trieste, on the Adriatic, was tried by Lieutenant Waghorn, under whose superintendence the express which arrived at Suez Oct. 19, 1845, reached Alexandria on the 20th, and was by him conveyed to London, where it arrived on the 31st, at 4.30 A.M. The overland route via Marseilles was established about the same time.

OVERSEERS of the poor were appointed for parishes by 43 Eliz. c. 1 (1601), and for townships by 18 & 14 Charles II. c. 12 (1663).

OVERTURES, called sinfonia by the Italians, originated in France, where Lulli, the father of French dramatic music, assisted to give them a settled form A.D. 1633—1687. They were introduced into concert-rooms and theatres about the end of the last century.

OViedo (Spain), the capital of a province of the same name, and known in the Middle Ages as Civitas Episcoporum, from the number of bishops who found refuge in it from the Moors, is believed to have been founded by Fruela I. A.D. 759. A great part of the town was destroyed by fire in 1521. The fortress was built by Alfonso III. in 913, and the university was founded by

* 631
Philip III. a.d. 1604. The church, erected in the 9th century, was taken down and the cathedral commenced in the 14th century, one of the towers having been finished in 1575. The library was founded in 1764; the hospicio provincial in 1752; and the consolidated hospitals of San Francisco in 1837.

Owyhee (Pacific Ocean) was discovered by Captain Cook A.D. 1778, and revisited by him on his return from Behring's Strait, when he was murdered by the natives, Feb. 14, 1779. His bones were preserved by the priests, receiving homage and the offerings of the people, till the abolition of idolatry in 1833.

Oxford (Bishopric).—This see was founded by Henry VIII. A.D. 1541.

Oxford (Oxfordshire) is said to have been founded by Alfred A.D. 849—901. Edmund Ironside died here Nov. 30, 1016, and Canute held several national councils at Oxford. Refusing to admit the Normans, it was stormed by William I. in 1067. It sustained a three months' siege from Stephen. The empress Maud made her escape, and it surrendered Dec. 21, 1142. The great charter, with all the privileges and liberties of London, was granted by Henry II. (1154—1189). John Bерефard's riot, when the colleges and halls were sacked by the townsmen, took place A.D. 1355. Henry VIII. made it his residence for some time in 1518. Queen Elizabeth delivered a long Latin speech on her visit in 1592. Here Latimer and Ridley suffered at the stake Oct. 16, 1555, and Cranmer March 21, 1556. After the battle of Edgehill, Charles I. took possession of the town Oct. 26, 1642. He established a mint, where the plate of New Inn Hall was coined for his use, and settled the exchequer here Feb. 13, 1643. Charles I. also summoned a parliament which sat from Jan. 22 till April, 1644. The city surrendered to the parliamentary forces June 24, 1646. Parliament met here Oct. 9, 1665, during the plague of London, and March 21, 1681. The family of the Veres, to whom it gave a title, became extinct A.D. 1702, but the title was revived in 1711. The town-hall was erected in 1753; the new county hall and courts in 1840.

Oxford Administration.—See (Harley Administration.)

Oxford Street (London).—By 2 & 3 Vict. c. 50 (Aug. 24, 1839), permission was given to the authorities to extend this street to Holborn.

Oxford University.—The Britons and Saxons established schools of learning at Oxford, which were restored by Alfred the Great, the reputed founder of the university, about A.D. 879. In Alfred's time the institution was styled the school or the schools, and it is mentioned as the university in a deed dated 1190. Edward III. granted a great charter to the students, June 27, 1355, and their privileges were confirmed by a charter of Henry VIII. in 1510. The university was incorporated by 13 Eliz. c. 29 (1570). During the civil war the colleges espoused the king's cause, and in January, 1643, they sent their plate to the mint to be coined for his use. A commission of inquiry into the state of the university was issued Aug. 31, 1550, and the report of the commissioners was presented April 27, 1552. The constitution of the university was changed by 17 & 18 Vict. c. 81 (Aug. 7, 1854), which was amended by 19 & 20 Vict. c. 3 (June 29, 1856). There are 19 colleges at Oxford, which, with the date of their foundation, are as follows:

Oxygen was discovered by Dr. Priestley, Aug. 1, 1774, and by Scheele, who called it empiral air, in the following year.

Oxyrhynchos (Egypt).—The name is derived from a fish of the sturgeon species, worshipped here in early times. It was made the seat of a bishop in the 4th century. The first bishop, Theodore, is represented in 372 as still occupying the episcopal throne. According to Gibbon, this stately and populous city, the seat of Christian orthodoxy, had devoted the temples, the public edifices, and even the ramparts, to pious and charitable uses.
OYER AND TERMER.-Writs of Oyer and Terminer were only to be granted before justices of either bench in eyre, save in exceptional cases, when a special royal warrant was required by 13 Edw. I. st. 1, c. 29 (1285). These regulations were enforced by 2 Edw. III. c. 2 (1328); 9 Edw. III. st. 1, c. 5 (1335); and by 20 Edw. III. c. 3 (1346). The rule by which no judge or other lawyer could act in this commission within his own county where he was born or lived, was abolished by 12 Geo. II. c. 27 (1739).

OYES.—In the old Norman law courts silence was commanded by the crier pronouncing “oyez,” “hear ye.” This injunction, corrupted into the meaningless phrase, “Oh yes,” is still used by public criers and heralds.

OYSTERS.—British oysters were much esteemed by Roman epicures, and Juvenal, in his satire, commends those of Richborough in Kent as possessing peculiar excellence. The stealing of oysters, or oyster brood, from the beds, was declared larceny by 7 & 8 Geo. IV. c. 29, s. 36 (June 21, 1827). In 1839 a convention was agreed to by France and England for settling the limits of the oyster-beds of each nation. The regulations thus established were embodied in the act 6 & 7 Vict. c. 79 (Aug. 22, 1843), which limited the period of the oyster fishery to the interval between the 1st of September and the 30th of April. All oysters and dredges found on fishing vessels from the 1st of May to the 31st of August may be seized by the coast guard and excise officers by 18 & 19 Vict. c. 101 (Aug. 14, 1855). The growth of the oyster in France has been much improved since 1855 by the labours of M. Coste.

OZONE.—Attention was first directed to this odour, evolved during the working of the electric machine, by Professor Schönenbein of Basel, A.D. 1840.

PACIFICATION.—This term was usually applied to the edicts issued by the French monarchs in favour of the Huguenots, or Protestants. The first was promulgated by Charles IX. A.D. 1562. The edict of Amboise, granting full liberty of worship to the Protestants within the towns of which they were in possession up to that date, was issued March 19, 1563. It was revoked in 1568. A fresh edict was issued in August, 1570, which was followed by the massacre of St. Bartholomew, Aug. 24, 1572. Other edicts followed, and were in turn revoked, until Henry IV. issued the famous edict of Nantes, April 13, 1598. This secured to the Huguenots freedom of worship in all the towns where their creed prevailed. It was revoked Oct. 22, 1680, when the exercise of the reformed religion was forbidden, and all the Protestant ecclesiastics were ordered to quit France within fifteen days. The Pacification of Ghent, by which several provinces of Holland united against Spain, was signed in that town Nov. 8, 1576. A treaty signed at York June 15, 1639, between Charles I. and the commissioners sent by the Scotch, is known in English history as the Pacification of York.

PACIFIC OCEAN, or the South Sea, was first seen by Vasco Nunez de Balboa in September, 1513. Magelhaens rounded Cape Horn, and entered this ocean, to which, on account of the calm weather that prevailed, he gave the name of the Pacific, in 1521.

Sir Francis Drake, the first Englishman who saw it, reached its shores in 1573.

PACIFIC STEAMER, belonging to the Collins line, running between New York and Liverpool, was totally lost, with all on board, in the early part of 1856. She left Liverpool Jan. 23, 1856, with forty-five passengers and a crew of 141 men, and was never heard of afterwards. It is supposed that she struck suddenly on an iceberg, and foundered with all on board. A bottle was picked up in 1862, containing a few lines, supposed to have been written as the vessel was sinking, and bearing date April 12, 1856.

PADUERBORN (Prussia).—This ancient town of Westphalia, made a bishopric by Charlemagne, afterwards became a member of the Hanseatic League. The cathedral, commenced early in the 11th century, was not finished till 1143. The town was taken and pillaged by the duke of Brunswick in 1822, and was annexed to Prussia in 1862. Councils were held here in 777, 780, 792, and 755. At the first, generally designated the diet of Paderborn, multitudes of the Saxons were baptized.

PADLOCK.—Du Cange states that a lock of this description was in use as early as A.D. 1381, though a later date is usually assigned for the invention.

PAISTOW (Cornwall).—This town was destroyed by the Danes A.D. 981.

PADUA (Italy).—The ancient Patavium was, according to Virgil, founded by Antenor, who escaped thither after the fall of Troy. The Patavians were constantly at war with the Cisalpine Gauls, and B.C. 301 they defeated Cleonymus the Lacedaemonian, who had landed on the Medoacus. Patavium gradually fell into the power of Rome, though it seems to have retained much of its former independence, as M. Emilius a Patavinus, a Roman consul, was sent to quell a riot here B.C. 174, and the inhabitants refused to receive the emissaries of M. Antonius B.C. 43. Patavium was occupied, A.D. 69, by Primus and Varus, the generals of Vespasian, on their advance into Italy. Attila destroyed it in 492; it is mentioned as one of the chief cities when the province was overrun by the Lombards under Alboin in 568; and was burned to the ground by Agilulph, king of the Longobardi, in 601. In 1164 Padua formed a league with other states against Frederick I., or Barbarossa; in 1617 it joined the great Lombard league; and by the peace of Constance in 1183, its freedom was recognized. Eccelino da Romano made
himself master of Padua in 1239, but was driven out in 1256, by a coalition of the towns of Upper Italy. In 1337 it came under the sway of the Carrara family, who held it till 1405, when it was taken by the republic of Venice. Maximilian I. besieged it Sept. 15, 1509, and retired Oct. 3. The French occupied it April 29, 1797, and it passed into the power of Austria by the treaty of Campoformio. The hospital was founded in 1429, and the public library in 1540. The botanical garden was instituted by the Venetian senate in 1548, and the observatory dates from 1667. A consequence of disturbances among the students which took place Feb. 9, 1848, the university was closed, and it was not reopened until 1850. A council was held here in 1350.

PAEONIA (Macedonia).—This district, inhabited by the Paeones, was overrun by Megabazus B.C. 506, and was finally annexed to Macedon by Alexander the Great.

Pagans.—This term, from pagani, or dwellers in the pagi, was applied to the heathens, because the inhabitants of the country districts were the last to receive Christianity. The Roman senate revived the practice of paganism A.D. 385; and a few years after the death of Theodosius I., which occurred Jan. 17, 395, few vestiges of paganism remained. Pagan ceremonies were revived in Christian churches in the beginning of the 6th century. Paganism was imputed to the classic enthusiasts of the 15th century, who professed a secret devotion to the gods of Homer and Plato.

Pagae (Thessaly), celebrated in mythological history as the port at which Jason built the ship Argo, was conquered by Philip II. of Macedon B.C. 353. The inhabitants were transferred to Demetrias, founded by B.C. 288. Pagae was afterwards restored, and became a flourishing city.

Pains and Penalties.—Certain bills, passed by the legislature to inflict specified penalties for particular acts against state offenders, were known by this title. The last instance was the bill of pains and penalties introduced against Queen Caroline A.D. 1820. It passed the House of Lords, but was not carried further.

Painting.—This art appears to have originated in Egypt, where it was employed about B.C. 2100, to commemorate the exploits of Osymandias; whence it was probably migrated to the Greeks, who, however, attribute its origin to their ancestors. (See Drawing.) The earliest painter whose name is recorded is Buralchus, whose picture of a battle of the Magnetes was purchased by Candaules, king of Lydia, either for its weight in gold or for as much gold coin as would cover it, about B.C. 716. Greek art was not established on an independent basis until the period of the Persian invasion in the 5th century B.C., it having been previously a mere adjunct to architecture and the celebration of religious mysteries. Polygnotus, who removed from Thassos to Athens, about B.C. 463, painted the first portrait, and is regarded as the founder of historic painting. Apolloodorus of Athens, who was born about B.C. 460, first practised nice discrimination of light and shade, in which he was much excelled by the celebrated Zeuxis of Hersalea, who was born about B.C. 450. Apelles, who flourished from B.C. 330 to 310, was remarkable for his delicacy of finish, and is regarded as the prince of ancient portrait-painters. Encaustic painting was invented by Pausias of Sicyon about B.C. 332, who was also highly celebrated as a flower-painter. The classic period of painting began to decline about B.C. 300, when Antiphilus the Egyptian, and others, introduced caricatures and pictures of still-life. Fabius Pictor introduced painting into Rome B.C. 289, but the greatest impetus was given to the art by the number of chefs-d'oeuvre which Mummbrini brought from Corinth B.C. 146. The materials of ancient art appear to have been wood, clay, plaster, stone, parchment and canvas, on which pictures were painted in distemper or with a medium of wax. The establishment of Christianity and the successive decline of the Roman empire by the invasion of the northern barbarians, occasioned a decline in painting as well as in the other arts; and the ravages of the Iconoclasts, which began A.D. 728, destroyed many valuable specimens of the semi-barbarous Byzantine school, which was chiefly employed in the decoration of churches. (See Iconoclasts and Illumination.) Giovanni Cimabue, born in 1240, is regarded as the restorer of painting; but the trammels of the Byzantine school were first shaken off by Giottto di Bondone, who was born in 1276. Leonardo da Vinci (1452—1519) and Michael Angelo Buonarroti (1475—1564) were the most eminent artists of the Florentine school; and Pinturicchio (1453—1509) founded the Roman school; and Tiziano Vecelli, better known as Titian (1477—1576), was the greatest master of the Venetian school. The earliest master of the German school was Wilhelm von Coln, or William of Cologne, who flourished in 1380. Hubert Van Eyck (1366—1426) and his brother John (1395—1441) are eminent masters of the Flemish school, which they established at Bruges. They are also the reputed inventors of oil-painting, although there is no doubt that art was only considerably improved by them, having been known at a much earlier period. The Spanish school was founded by Antonio del Rio (1446—1509) and the Dutch by Luke of Leyden, born in 1490; the French by Jeanet Clouet about 1523; and the English school may be said to have taken its rise when Holbein settled at the court of Henry VIII. in 1526.

PAISLEY (Scotland) owes its origin to a monastery founded A.D. 1160 by Walter, high steward of Scotland. Pope Honorius erected it into an abbey in 1219. It was burnt by the English in 1307; and afterwards rebuilt with great splendour. James IV. erected the small town into a burgh in 1488.
In the times of the reformers the abbey was stripped of its altars and figures, and the only part of the edifice that remains, is now used as a parish church. Linen thread was first made in Paisley in 1722; silk gauze in 1760; and nearly 25,000 people were employed in the manufacture in 1784. Towards the end of the 18th century the manufacture of shaws was introduced. The grammar-school was founded Jan. 3, 1576; and the county hall or castle in 1818. A society for the promotion of the fine arts, established here, held their first exhibition in May, 1831.

**Pallace Court**, superseding in many respects the ambulatory court of the Board of Green Cloth, or Court of Marshalsea, was instituted by Charles I. A.D. 1631, and had jurisdiction over all personal actions whatsoever within twelve miles of His Majesty's palace at Whitehall. It was abolished by 12 & 13 Vict. c. 101 (Aug. 1, 1848), and its powers ceased Dec. 1 in the same year.

**Palaeography.**—For the safe keeping of the ancient manuscripts and inscriptions, was greatly improved by the Benedictines of St. Maur, who published a compilation of palaeographical knowledge A.D. 1748.

**Palaeology.**—This illustrious Byzantine family is first mentioned about A.D. 1078, when Nicephorus Palaeologus was a faithful servant of the emperor Nicephorus III. He was killed while defending Dyrhrachium, or Durazzo, against the Normans in 1081. The Palaeologoi were the last Greek family that occupied the throne of Constantinople, and they reigned from 1269 to 1453. A branch of the Palaeologoi ruled over Montferrat in Italy from 1395 to 1530.

**Paleontology.**—This science, treating of the origin and formation of the fossil remains of plants and animals in the earth’s crust, has received illustration from the works of Cuvier (born Aug. 23, 1769, and died May 13, 1832), Owen (born in 1814), Forbes (born in 1815, and died Nov. 18, 1854), and others. A society, called the Paleontological Society, for the illustration and description of British fossil organic remains, was founded in London in 1847.

**Palamites,** the supporters of Gregory Palamas, a Greek ascetic of the 14th century, who renounced the world, retired into a cell, and practised great austerities. Having spent ten years at Mount Athos, and ten years at Berrhoea, he repaired to Thessalonica for the restoration of his health. He took the lead of the monks against Barlaam, and gained a triumph over him at a council held at Constantinople, June 11, 1341. At another council, held at Constantinople in 1345, the Palamites were condemned, and Palamas was cast into prison in 1347. Having obtained his release, he was nominated but not ordained patriarch, and in 1354 was consecrated archbishop of Thessalonica, but the magistrates refused to admit him, and he retired to Lemnos.

**Palatinate (Germany).**—This division, consisting of two parts, was under one sovereign until A.D. 1620, when the elector Ferdinand having accepted the crown of Bohemia, was defeated in a battle near Prague, and lost his dominions and electoral dignity, which were given by the emperor Ferdinand II. to Bavaria. Charles Louis recovered the Lower Palatinate by the treaty of Westphalia in 1648. Maximilian Emanuel, elector of Bavaria, having been placed under the ban of the empire, the elector palatine, John William, recovered the Upper Palatinate and the ancient rights of his house in 1706; but by the treaty of peace between Charles VI. and Louis XIV. in 1714, the elector of Bavaria regained the Upper Palatinate. In the wars of the French revolution, the French took possession of that part of the Palatinate which lay on the left bank of the Rhine, and retained it by the treaty of Luneville, Feb. 9, 1801. The territory on the right bank of the Rhine was ceded by Bavaria in 1802 for other possessions. By the treaty of 1815, Bavaria regained the greater part of the territory on the left bank of the Rhine which it had lost in 1801, the remainder being allotted to Russia and Hesse-Darmstadt.

**Palatine Counties.**—Selden, referring to counts palatine, says: "The name was received here doubtless out of the use of the empire of France, and in the like notions as it had in that use." Three English counties, viz., Chester, Durham, and Lancashire, and one Welsh county, viz., Pembroke, were counties palatine. The palatine of Chester was conferred by William I. upon Hugh Lupus A.D. 1077. In the reign of Henry III. it was annexed to the crown, giving the title of earl of Chester to the king’s eldest son. The palatine of Lancaster was instituted by Edward III., who created Henry, earl of Derby, duke of Lancaster, March 6, 1351. In the reign of Edward IV. it was vested in the crown. Durham was a county palatine till 1836, when by 6 Will. IV. c. 19 (June 21), the jurisdiction was transferred to the crown. The palatine jurisdiction of Pembroke was taken away by 27 Hen. VIII. c. 26 (1536).

**Pale.** (Cephalonia).—This town is first mentioned in the Persian war, when 200 of its citizens fought at the battle of Platea, B.C. 479. It joined the Athenian alliance B.C. 431, surrendered to the Romans B.C. 159, and afterwards became the capital of the island.

**Palambang (Sumatra).**—In 1780 the Dutch placed the rajah Muda on the throne, Palambang being his capital. They had only a factory at Palambang in 1811, when the sultan began hostilities against them, and, under pretence of carrying them to Batavia, sunk their ships. The Dutch regained their East-India possessions in 1816, but the country remained in rebellion till 1821.

**Palencia (Spain), the ancient Pallantia,** is the chief town of a province of the same name, and was made a bishop’s see of the early church. In the 10th century Alfonso VIII. of Castile founded the celebrated school, which was transferred to Salamanca.
in 1240. The cathedral, commenced in 1321, was completed in 1504. The French captured Palencia in 1503; the English entered in September, 1512; and Wellington defeated the French in some warmly-contested combats in the neighbourhood a few days afterwards. Councils were held here Oct. 25, 1114, in 1129, and Oct. 4, 1388.

Palemo (Sicily), the ancient Panormus, is first mentioned in history B.C. 480, when the great Carthaginian armament, under Hamilcar, landed here and made it their head-quarters. It was a principal naval station B.C. 406, and was one of the few cities that remained faithful to the Carthaginians at the time of the siege of Motya, B.C. 397. Pyrrhus attacked and made himself master of Panormus B.C. 276; but it was soon retaken by the Carthaginians, who held it at the outbreak of the first Punic war, B.C. 264. The Roman consuls, Attilus Calatinus and C. Scipio, captured Panormus B.C. 254, and it became one of their principal naval stations. Hasdrubal, the Carthaginian general, was defeated by L. C. Metellus, in a decisive battle, B.C. 250. It received a Roman colony B.C. 20. It afterwards fell, with the rest of Sicily, into the hands of the Goths, and was the last city of the island wrested from them by Belisarius, A.D. 535. The Saracens captured it in 555. From the top of the royal quarter, built by King Roger the Norman in 1129, Father Piazza discovered the planet Ceres in 1801. The cathedral, a magnificent Gothic structure, was built in 1180 by Archbishop Walter, an Englishman, and contains the tombs of Roger the Norman and the emperor Frederick II. When Sicily was united to Naples, the court was removed from Palermo, but again resided here from 1506 to 1814. Palermo revolted Dec. 12, 1848, against Ferdinand, king of Naples, and, after three days' fighting, a provisional government was proclaimed. The king of Naples issued the charter of a constitution for his Sicilian subjects Feb. 28, 1849; but hostilities were resumed March 26. Through the mediation of the French and English admirals, the city was given up to General Filangieri, May 13. Palermo was attacked by Garibaldi May 27, 1860, and the royal troops were driven out of the town, and took refuge in the citadel, which afterwards surrendered. The two Sicilies were annexed to Sardinia Nov. 3, 1860. The university was founded in 1447. A council was held at Palermo Nov. 10, 1388.

Palestine.—At the time of the call of Abraham, B.C. 1921, this country was inhabited by the Jebusites, Amorites, Girgashites, Hitites, Amorites, Zemarites, and Hamathites,—descendants of Ham, or Canaan, son of Noah. The Perizzites are first mentioned in Gen. xiii. 7 (B.C. 1918); and at the time of the Jewish Exodus, B.C. 1451, it was peopled by seven tribes, viz., the Canaanites, Hittites, Amorites, Perizzites, Hitites, Jebusites, and Girgashites. Antiochus, king of Syria, reduced the whole of Palestine under his authority B.C. 198, and it was erected into a Roman province by Augustus A.D. 6. The division of the country into First, Second, and Third Palestine, is first mentioned in the Theodosian code in 409.

Palestina (Italy), the ancient Praeneste, submitted to Rome B.C. 375. It became the stronghold of the Colonna family in the Middle Ages, and capitulated to the papal crusaders in 1299, when Pope Boniface VIII. expelled its rulers. After his death, Oct. 11, 1303, it was recovered and fortified by the Colonna family. Rienzo, the Roman senator, made a vain attempt to take it in 1354. It was wrested from the Colonna family by Eugenius IV. in 1437, and Urban VIII. conferred it upon the Barberini, whose palace now exists. Fragments of a Roman calendar, discovered here in 1773, were published at Rome under the title of Fasti Praenestini in 1799.

Palestro (Battles).—Two were fought near this town, in Piedmont, between the Austrians and the Sardinians aided by the French, in 1859. The first took place May 30, when the Sardinians were victorious, capturing more than 1,000 prisoners and 50 cannon; and the second June 1, when the Sardinians were again successful.

Palimpsests.—The term is applied to parchments from which the original writing has been erased by means of pumice-stone or some other substance, to make room for a fresh subject being written thereon. The practice became general with the Latins in the 9th and 10th centuries, and reached its greatest height in the 11th century. Edicts forbidding it were issued in Germany in the 13th and 14th centuries. The Clementine constitutions were published by Nicolai Janson upon palimpsest parchment in 1476. Cicero's treatise "De Republica," written on a palimpsest, was discovered in the Vatican library at Rome, and printed in 1821. The New Testament, written on palimpsest fragments, was published in Paris by Dr. Tischendorf in 1843, and he completed the work by the addition of the fragments of the Old Testament in 1845.

Palladium, generally found as an alloy with platinum and other metals, but sometimes in a pure state, was discovered by Dr. Wollaston, A.D. 1803.

Palladium.—The ancient authors give different traditions respecting the origin of this Celebrated statue of Minerva; some stating that it fell from heaven during the building of Ilium, others that it fell at Pessinus, in Phrygia, others that Electra gave it to her son Dardanus, and others that it was made on an ingenious automaton, but all agree that the fate of Troy depended on its preservation. Its capture consequently became a great object with the Greeks during the siege of Troy, and it was at length stolen by Ulysses and Diomedes, B.C. 1183. Other authorities state that only a fictitious statue was stolen, and that the real palladium was conveyed into Italy by Æneas, B.C. 1181, and was preserved with great secrecy in the
theoplate of Vesta. The profligate Roman emperor Elagabalus attempted to steal it from their keeping A.D. 219; but they substituted a counterfeit image in its stead. The Roman palladium was a small statue, three cubits and a half in height, and it was kept in a barrel and placed near other barrels to prevent theft.

PALLAS.—This planet was discovered by Dr. Olbers, of Bremen, March 28, 1802.

PALLNE (Sea-fight).—The knights of Rhodes destroyed a Turkish fleet off this headland, in the Ægean Sea, A.D. 1344.

PALL MALL (London) derives its name from the game of Pallée Maillé, somewhat analogous to cricket, introduced from France into England in the reign of Charles II., and at that time played in St. James’s Park. Pall Mall is first mentioned by Pepys July 26, 1660.

PALL, or PALLIA.—The origin of this vestment, sent from Rome to all archbishops of the Roman Catholic church, is disputed. It was worn by the bishops at Ravenna as early as A.D. 540. In the time of Gregory VII. archbishops were in the habit of going to Rome to receive it. The popes derived a large revenue from the sale of pallia in the 13th century. Gregory XI. (A.D. 1370–1378) issued a decretal which declared that an archbishop could not call a council, bless the chrism, consecrate churches, ordain a clerk, or consecrate a bishop without a pallium; and that before any archbishop could obtain this sacred vestment he should swear fidelity to the pope. It was also decreed, that upon the translation of an archbishop he was not to carry away his pall, but apply to the pope for a new one, and that his successor should make no use of the one left behind. Tertullian (A.D. 197–213) wrote a treatise entitled "De Pallio."

PALLMY SYNd, held at Rome by Theodoric, Nov. 6, 502 A.D., was called the Palmyrene synod from an edifice or hall of that name in which it was held. Its object was to investigate charges brought against Pope Symmachus, who was declared innocent, and he resumed the pontifical throne with the full authority of the synod, composed of 120 bishops.

PALLERSTON ADMINISTRATIONS.—The vote of censure against the Aberdeen administration (g.v.), for its conduct of the war against Russia, having been carried in the House of Commons, Jan. 29, 1855, by 305 against 148, the resignation of that ministry was announced Feb. 1. After various negotiations, an intimation was made in parliament, Feb. 8, to the effect that Lord Palmerston had accepted office as prime minister, and the cabinet was, Feb. 16, announced as follows:

<table>
<thead>
<tr>
<th>Minister</th>
<th>Appointment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foreign Secretary</td>
<td>Earl of Clarendon</td>
</tr>
<tr>
<td>Colonial Secretary</td>

<tr>
<td>Chief Secretary for India</td>
<td>Mr. Cardwell</td>
</tr>
</tbody>
</table>

Mr. Milner Gibson was appointed president of the Board of Trade with a seat in the cabinet, his place at the Poor-Law Board being supplied by Mr. C. P. Villiers, who also obtained a seat in the Cabinet. The earl of Elgin was sent on a mission to China, and Lord Stanley of Alderley succeeded him as postmaster-general in 1858. Mr. Sidney
Herbert was created a peer in 1681, and died Aug. 2, when his place as secretary at war was supplied by Sir G. Cornewell Lewis, Bart. **Palm Sunday**, also called Passion Sunday, the last Sunday in Lent, is so named from the ovation received by our Saviour on his way to Jerusalem to present himself in the temple (Matt. xxv. 5 & 9), April 1, A.D. 30. Caxton, in his directory for the festivals, says that the yew was our substitute for the palm. In 1584, being the second year of the reign of Edward VI., proclamations were issued, abolishing many of the ceremonies connected with this day.

**Palmyra** (Syria), the Tadmor or Thadmor of the Hebrews (1 Kings ix. 18, and 2 Chron. viii. 4), was founded, or enlarged by Solomon, about B.C. 1001. Both its Greek name Palmyra, and its Hebrew name Tadmor, signify the city of palms, and the Arabs call it Tedomor. It submitted to the emperor Hadrian A.D. 130, and rose to its highest power in the 3rd century. Sapor, king of Persia, was defeated here by Odenathus in 290. Odenathus was murdered about 266, and his wife Zenobia assumed the title of queen of the East. She was besieged in her capital by the emperor Aurelian in 272. It surrendered in 273, and having been destroyed, was restored by Justinian I. in 557. It was plundered by Tamerlane in 1400. The ruins were discovered by some English merchants in 1691. Their account was not believed; but these reports were confirmed in 1751, when Palmyra was visited by Wood and Dawkins, who published a most elaborate account of the ruins, and the inscriptions. Tibby and Mangles visited the ruins in 1816.

**Palos** (Spain).—From this small seaport town of Andalusia, Christopher Columbus sailed on the voyage in which he discovered America, Friday, Aug. 3, 1492, and here he landed on his return, March 15, 1493. Vincent Pinzon sailed from Palos in December, 1499, on the voyage in which he discovered the Amazon, and Cortes landed here after the conquest of Mexico in 1528.

**Pampeluna, or Pamplona** (Spain).—This town, rebuilt by the sons of Pompey B.C. 65, was taken from the Romans by Euric, A.D. 466. Chilperic I. sacked it in 512, and Charlemagne captured it in 778. The Saracens captured it in 802, and it was re-captured in 806 by the Franks, who repulsed an attack by the Saracens in 868. It became the capital of Navarre in 978. The bishopric was founded in 1130. Pampluna was seized by the French general d'Armagnac, Feb. 9, 1508. The English, under General Hill, blockaded Pampluna, in June, 1813. The blockade, raised July 27, was renewed in September, and the town surrendered Oct. 31, 1813. The citadel was seized by Marshal O'Donnell, and held for a short period, in Sept. 1814. The Gothic cathedral was built by Charles III. of Navarre in 1397, on the site of an older edifice, founded in 1100; the citadel was strengthened in 1521 by Charles V., and enlarged by Philip II. in 1551. A council was held here in 1023.

**Pamphlets** were in common use in England, in politics and religious controversy, about the middle of the 16th century. The publication of pamphlets without a licence was declared illegal by the judges, May 16, 1636, and a stamp duty was first imposed upon them by 10 Anne, c. 16, passed in 1712.

**Panama** (Central America).—The Isthmus of Panama or Darien, connecting North and South America, was first seen by Columbus A.D. 1502, and the first Spanish settlement took place in 1510. The town of Panama was destroyed by the buccaneer Sir Henry Morgan, in 1670. The Scotch attempted to found a colony on the west coast of Panama in 1698. (See Darien.) The Panama railway, commenced in 1850, and completed in 1854, was opened throughout for traffic, Jan. 26, 1855. It was entirely finished in 1858. These festivals in honour of Minerva were instituted at Athens B.C. 1495, or B.C. 1397. Theseus ordained that they should be celebrated every fifth year B.C. 1234. Besides the great festival, there were the lesser Panathenaeas which were celebrated annually.

**Pandects**, the chief rules of law contained in the writings of the Roman jurists, were ordered by Justinian to be prepared in December, A.D. 530. They were published at the end of three years (December, 533), although he had granted ten for the performance of the work. A story was long current that a copy of the Pandects had been found by the emperor Lotharius at Amaulphi, after the capture of the town, A.D. 1135.

**Pandosa** (Greece).—The date of its foundation, fixed by Eusebius B.C. 774, is uncertain. Alexander, king of Epirus, lost his life in an engagement with the Bruttians here B.C. 326; and it was captured by the consul P. Sempronius in the second Punic war, B.C. 204.

**Panneput** (Hindostan).—The Delhi dynasty was defeated at this town, and the Mongol dynasty founded by the sultan Baber, A.D. 1525. Here the Afghans, under Ahmed Shah, gained a victory over the Mahrattas, of whom 60,000 were slain, and 20,000 made prisoners, in 1761.

**Pangeum, or Pangaeus** (Macedonias).—Gold was discovered in this mountain B.C. 356. It also produced silver.

**Panius, or Pantium** (Battle).—Antiochus the Great defeated Scopas and the Ætolians at this town, on the coast of Thrace, B.C. 198.

**Panmelonicon.**—This musical instrument was invented by Leppich at Vienna, A.D. 1810.

**Pannonia.**—This country, inhabited by Celtic tribes, was attacked by the Romans, under Germanicus, B.C. 35; and made a Roman province by Tibertius, B.C. 8. It was ceded to the Huns by the emperor Theodosius II. about 447; came into the hands
of the Ostrogoths at the death of Attila in 453; and to the Longobardi in 500, from whom it passed to the Avari in 568. The Ungri, or Hungarians, settled here in 802, and from them it received the name of Hungary.

**Panopticon (London).—**The Royal Panopticon Institution was incorporated by charter, Feb. 20, 1851, and the building in Leicester Square, built from the designs of Mr. T. Hayter Lewis, was opened March 16, 1854. It failed as a scientific institution, and was converted into a circus for equestrian performances, and its name changed to the Alhambra Palace. It was opened with a religious service, and a concert of sacred music, Sunday, Feb. 7, 1858.

**Panorama.**—This pictorial contrivance was invented by Robert Barker, an English artist, about A.D. 1794. His first work of the kind was a view of Edinburgh. Thomas Girtin produced a semicircular view of London, taken from the top of the Albion mills, near Blackfriars bridge, about the same time.

**Pantalone.**—This musical instrument was invented by Hebenstreit towards the end of 1748, and patented in 1749.

**Pantalone appears to have been first introduced on the English stage early in the reign of Elizabeth (1558—1603).**

**Pantaloons.**—These breeches fitting tight to the leg or knee, with this name, came into fashion about A.D. 1790. The word was, however, used before that time.

**Pantheism** is fully developed in the "Vedas" of the Hindoos, a compilation which, according to some Oriental scholars, dates as far back as B.C. 1600. Speculations of this kind, among the Greeks, seem to have originated with Anaximander, of Miletus, B.C. 611—547; and were prosecuted by Pythagoras B.C. 594—499; Heraclitus, B.C. 503; and by Xenophanes, B.C. 570—470. The celebrated Latin poet John Socrates Erigens A.D. 846—886; and Giordano Bruno, burned alive as a heretic, in the Campo de Fiori, at Rome, Feb. 17, 1600. It was advocated by Spinoza A.D. 1632—1677; followed by Frederick Schelling A.D. 1775—1854; and Hegel 1770—1831.

**Pantheon (London).—**This building, originally designed by James Wyatt as a theatre and public promenade, was first opened in January, 1772. It was burnt down Jan. 14, 1792, but was rebuilt. The second building was taken down in 1812, and restored the same year, and in 1834 it was converted into a bazaar by Sydney Smirke.

**Pantheon (Rome).—**Built by Agrippa, son-in-law of Augustus, and dedicated to Jupiter and Neptune, B.C. 25. It was consecrated as the church of Santa Maria and Martyres, by Boniface IV., on the 16th of November, A.D. 608.

**Pantograph.**—This instrument for copying, reducing, or enlarging plans, was invented by Christopher Scheiner A.D. 1603. Professor Wallace improved upon it, and produced the eidograph (g. v.).

**Pantomime.—**This dramatic entertain-

ment, in which the actors express themselves by gestures and attitudes, was in vogue among the ancients from the earliest times, and was introduced on the Roman stage by Pylades and Bathylus B.C. 22. Gibbon (ch. xxxi.) says: "The pantomimes, who maintained their reputation from the age of Augustus to the 6th century, expressed, without the use of words, the various fables of the gods and heroes of antiquity; and the perfection of their art, which sometimes disarmed the gravity of the philosopher, always excited the applause and wonder of the people." The modern pantomime was invented in Italy by Ruzzante, an author and actor, who lived about A.D. 1530, and was introduced into England shortly after.

**Papal Aggression.**—The arrival of a papal brief from Rome, constituting an episcopal hierarchy in England and Wales, in place of the vicars apostolic, took place in October, 1850. By this instrument England was parcelled out into Romish dioceses, and Dr. Wiseman was constituted first archbishop of Westminster; the ceremony of his enthronization being performed with great pomp at the cathedral church of St. George's, Southwark, Dec. 6, 1850. The agitation caused by this act of papal aggression, led to the passing of the Ecclesiastical Titles Bill, July 29, 1851, which prohibited the constitution of bishops of pretended provinces under a penalty of £100.

**Papal States (Italy).—**Rome was governed by its bishops after the fall of the western empire. When Gregory II. condemned the emperor Leo, it refused to pay him the accustomed tribute, A.D. 726. Pepin having defeated Astolphus, king of the Lombards, obliged him to give up the exarchate of Ravenna and the Pentapolis "to the holy church of God and the Roman republic." A.D. 756. The concession which was confirmed and added to by Charlemagne in 774. The countess Matilda ceded territory to Gregory VII. in 1077, and the whole of her states to Pascal II. in 1102. The claim of the Church was disputed by some of the emperors, but Innocent III. succeeded in establishing it in 1197, and Rodolph of Habsburg, by letters patent, defined and recognized the States of the Church in May, 1278. The papal court having been removed from Rome to Avignon by Clement V. A.D. 1309, was brought back to the former city, and the government reduced to a regular form in 1371. Pope Julian II. conquered Romagna, Bologna, and Foruria, A.D. 1500—1513. Ferrara was annexed in 1597; Urbino in 1632; and Castello and Roncegno in 1650. The legations of Bologna, Ferrara, and Ravenna, were incorporated with the Cisalpine republic by Napoleon Bonaparte, July 9, 1796. The pope, deprived of his temporal power, was sent off to Sienna, Feb. 23, 1798, and his dominions erected into the Roman republic, March 20, 1798. The pontiff having been restored, a concordat was signed between Rome and France, in
September, 1801; but his dominions were annexed to the kingdom of Italy, May 21, 1808, and he was carried prisoner to Savona July 6, 1809. He was restored to liberty, and allowed to return to Rome, Jan. 23, 1814. Pius IX. fled to Gaeta, Nov. 25, 1848, and a republican form of government was established at Rome, Feb. 8, 1849. The pope returned to Rome, the city being occupied by French troops, April 12, 1850. The papal army, commanded by Lamoricière, surrendered prisoners of war to Ancona, Sept. 28, 1860.

PAP.—The Egyptian government held a monopoly for the growth and sale of this article, which was manufactured from the Cyperus papyrus, probably as early as B.C. 2000, and appears to have become of considerable commercial importance b.c. 330. A fine quality made at Rome was called Augustus, after the emperor. A tumult arose owing to its scarcity, in the reign of Tiberius (a.d. 14—37). The demand for paper throughout the world had increased to such an extent, that Firmus declared he had seized as much in Egypt as would support his whole army, a.d. 273. The export duty was abolished by Theodoric (455—526). Paper from cotton, called by the Greeks charia bombycina, is known to have been made as early as 1050. Meermann fixes the date of the invention of linen paper between the years 1270 and 1300. The Chinese discovered the art of manufacturing it from fibrous matter a.d. 95. At Hertford, a person named Tate had a paper-mill early in the 16th century. A German, named Spielman, who was knighted by Queen Elizabeth, had one at Dartford, in Kent, in 1588, and Thomas Watson effected important improvements in 1713. Fine paper was made by Whatman at Maidstone, in 1770. The art seems to have come into France from Spain about 1290, and to have been practiced in Germany in 1312. A patent was granted to Jerome Lanyer in London, for a method of making “velvet-paper,” May 1, 1634; and a similar article would appear to have been produced by a Frenchman at Rouen in 1620 or 1630. Paper-mills were at work in the United States in 1730; France erected its first paper-machine in 1815, and Berlin in 1818. The duty was abolished in England by 24.Vict. c. 20 (June 12, 1861).

PAPER MONEY.—Banking establishments for the issue of notes, or paper money, have existed in England since the end of the 17th century. The Bank of England, founded by William Patterson, and incorporated by royal charter July 27, 1694, has long been the greatest circulating of paper money in the world. £5 notes were first issued in 1795. An act was passed for the issue of notes under £5, March 3, 1797; and £1 and £2 notes were issued March 10. During the great monetary panic of 1825, the issue of £1 notes proved of immense service.

Paphlagonia (Asia Minor) is mentioned by Homer, B.C. 923; was incorporated in his empire by Creussus, B.C. 560—550; and in that of Persia by Cyrus, B.C. 546. Nominally independent for some time afterwards, it fell to the share of Eumenes, B.C. 323. It was united to Pontus by Mithridates, B.C. 290; formed a part of the province of Galatia, under the Romans, B.C. 47; and was made a separate province in the 4th century.

PAPIAN LAW, proposed and carried b.c. 65 by C. Papius, one of the tribunes. It required all foreigners to depart from Rome.

PAPYRUS.—The date of the origin of the manufacture of articles for use or ornament from paper, ascribed by some writers to the French, and by others to the English, is uncertain. Many of the fine old ceilings, in deep relief, in the time of Elizabeth (1558—1603), are of papier-mâché.

John Baskerville, a printer at Birmingham, manufactured it in 1745, and from that time its use has gradually spread throughout the country.

PAPUA, OR NEW GUINEA (Pacific Ocean), was discovered by the Portuguese a.d. 1512—1520; and Saavedra, a Spaniard sent from Mexico by Cortes, visited it in 1526 and 1529. Villalobos changed its name from Papua to New Guinea in 1543. Dampier sailed along the northern coast in 1699. Captain Cook ascertained it to be an island in 1700; Mac Cluer gave his name to that bay in 1792; and Flinders surveyed the coast in Torres Strait in 1802. In consequence of a survey made of the south-west coast by Klipff, the Dutch founded a colony, and erected Fort Dubus in Triton's Bay a.d. 1828.

PAPYRUS, the name given to the paper made by the Egyptians from the papyrus plant, was used for writing about b.c. 2000. The rolls of that material were made known in Europe through the French expedition, a.d. 1798; specimens of which were printed by M. Cadet in 1805. Of the funereal papyri in the Turin museum a fac-simile was published by Dr. Lepsius in 1842. The books of Numa Pompilius, containing the earliest Roman laws, probably consisted of this substance. Philostratus mentions it as a staple manufacture of Alexandria, a.d. 244. It continued to be used in Italy till about the 12th century. In the ruins of Herculanum 1,756 rolls were found about a.d. 1753.

PARE (Brazil) was founded by Francis Caldeyra, a.d. 1615. It was attacked in 1834 and 1835 by the Indians, who took it and kept possession for six months in 1836.

PARABLE.—Under this figurative form of speech, Nathan reproved David, b.c. 1035 (2 Sam. xii.); and our Saviour taught the Jews (Matt. ix. 36, &c.).

PARACHUTE.—A machine of this kind was used in Siam about a.d. 1650. The first experiment in Europe was made by Normand at Paris, a.d. 1783. Garnerin, a Frenchman, descended in London from a height of 8,000 feet, narrowly escaping with his life, Sept. 2, 1802; and his daughter twice performed the feat in 1816. Mr. Cocking was killed in making a descent
in a parachute from a balloon at Lee, near Blackheath, July 24, 1837.

PARADISE LOST.—This epic poem was commenced by Milton about A.D. 1665, and completed in 1666. It was published by Simmons in 1667, the terms being an immediate payment of £5, another instalment to the same amount when 1,500 copies had been sold; a third payment of £5 when the same number of the second edition was disposed of; and £5 after the sale of the third. After the poet's death, his widow cancelled her claims on the publisher for £8, and the third edition was issued A.D. 1678.

PARAFFIN was discovered by Reichenbach in coal, wood, and tar, A.D. 1830; and Mr. Young patented his process for procuring it from bituminous coal in 1850.

PARAGUAY (South America).—A large colony of Spaniards founded the city of Asunción A.D. 1555. The Jesuits established numerous missions here in the 16th century, and received a mandate from the Spanish court, prohibiting others from entering without permission A.D. 1630. The Jesuits were expelled, A.D. 1767. Rebell ing against the Spaniards in 1810, the country formed itself into a republic in 1811, of which Dr. Francia was made dictator in 1814, an office he held till his death in 1840. Its present republican constitution was adopted in 1844. A commercial treaty with the Argentine Republic was signed in 1852; with the United States, France, and Sardinia, in 1853; and with Great Britain, March 4, 1858. New Bor deaux, a French colony on the banks of the Paraguay, established in 1855, was soon after abandoned.

PARASOLS were used by the ancient Greeks, and the Romans employed them as a protection against the sun at the theatre. During the Middle Ages they were borne by horsemen in Italy. The modern parasol was first used in France about 1650.

PARCHMENT.—The term is derived from the Latin word pergamen, said to be taken from Pergamus, to whose king, Eumenes (B.C. 197—159), the invention has been attributed. It was, however, in use among the Persians long before that period; and among the Ionians, as mentioned by Herodotus, B.C. 450. Parchment superseded papyrus for public documents in Europe about the end of the 7th century.

PARDON, a branch of the royal prerogative in England, and said by the Saxons to be derived a lege uxu dignitatis, was declared to belong solely to the king, "united and knit to the imperial crown of this realm," by 27 Hen. VIII c. 24 (1536). By the Act of Settlement (12 & 13 Will. III, c. 2, 1701), no pardon under the great seal of England is pleadable to an impeachment by the House of Commons.

PARGA (Turkey) maintained its municipal independence after the fall of the Eastern empire, under the protection of Venice, 1641, till that state was broken up Oct. 17, 1797, when it fell into the possession of France.

Ali Pasha endeavoured to capture it after the treaty between Russia and the Porte, signed in March, 1800, when a Turkish boy was sent, who held it until a Russian garrison arrived in 1806. They gave way to a French force, by the terms of the treaty of Tilsit, July 7, 1807. The fortress was taken by the English March 22, 1814. It was handed over to the Porte, by agreement, May 26, 1817; and the entire population of 800 families, having received from Turkey £150,000, the value of their immovable property, emigrated to Paxo and Corfu in May, 1819.

PARIAN MARBLES.—This name is given to the collection of antiquities more generally known as the Arundelian or Oxford marbles (q.v.), because they were discovered in the island of Paros early in the 17th century.

PARIS (France), the Roman Lutetia, was the capital of the Parisii. Julius Caesar summoned the Gauls to assemble here B.C. 53, and the city was taken by his lieutenant Labienus B.C. 52. Councils were held at Paris in 390, 551, 557; Sept. 11, 573; in 577; Oct. 15, 615; in November, 825; June 6, 829; Feb. 14, 846; in 849, 853, 1024; Oct. 17, 1050; Dec. 2, 1104; in 1147, January, 1185; in 1196, 1201; October, 1210; in 1212; August, 1215; July 6, 1223; May 15, 1225; Jan. 28, 1226; in 1229, 1248; Nov. 12, 1253; July 13, 1255; in February, 1256; April 10, 1261; Nov. 18, 1263; Aug. 26, 1264; in December, 1281; April 10, 1302; March 12, 1303; Oct. 11 to 26, 1310; May 7, 1314; March 3, 1324; March 9 to 14, 1347; Feb. 4, 1395; May 22, 1398; Oct. 21, 1404; in 1406; Aug. 11 to Nov. 5, 1408; March 1 to April 23, 1429; and Feb. 3 to Oct. 9, 1528.

A.D.

250. St. Denis introduces Christianity. 355. Julian visits Lutetia, where he remains five years.

251. The city is preserved from the Huns by St. Geneviève.

607. He makes it his capital city.

722. Childerich I. founds the cathedral of Notre Dame.

841. Paris is ravaged by the Northmen.

858. It suffers a siege of thirteen months from the Northmen, who are repelled by Count Eudes and Bishop Goslin.

973. A horrible famine carries off numbers of the inhabitants.

998. The church of St. Germain l'Auxerrois is founded.

1169. Notre Dame is rebuilt.

1189. The university is founded about this year.

1182. The first portion of the cathedral of Notre Dame is consecrated.

1190. Paris is surrounded by walls by Philip Augustus.

1229. The Temple is built.

1233. The western front of Notre Dame is built.

1253. Robert Sorbon founds the school of La Sorbonne.

1302. The parliament of Paris is organized
The inhabitants rebel, and besiege Philip IV. in the palace of the Temple.

Philip divides Paris into three districts, and rebuilds the Palais de Justice.

The first Hôtel de Ville is founded.

The insurrection of the Matelotins breaks out in Paris, in consequence of an unpopular tax.

The arsenal is founded.

The English enter Paris at the invitation of John the Fearless.

Henry VI. is crowned king of England and France at Paris.

The English are expelled.

The École de Médecin is founded.

Francis I builds the Louvre.

The church of St. Eustache is founded.

The present Hôtel de Ville is founded.

Charles V. marches on Paris, the north-east and south quarters of which the duke of Guise surrounds with a rampart.

The Fontaine des Innocents is erected.

The palace of the Tuileries is commenced.

Henry III. founds the Pont Neuf.

The original Palais de Luxembourg is completed.

The Place Royale is completed.

The Champs Elysées are laid out.

Paris is erected into an archbishopric.

The Palais des Tuileries is established.

The church of the Val-de-Grâce is founded.

The Pont Neuf is completed.

The boulevards are opened.

The Pont St. Denis is erected, and the Observatory is completed.

The Porte St. Martin is built.

The Pont Royal is built.

The Place des Victoires is formed.

The Hôtel des Invalides is completed.

The car Étret visits Paris, and the palace of the Élysée is founded.

The Palais Bourbon, or Chamber of Deputies, is founded.

Louis XV. founds the Ecole Militaire.

The southern boulevards are completed.

Feb. 16. The Panthéon, or church of St. Geneviève, is founded.

The Odéon is built.

The Théâtre de la Porte St. Martin is founded.

The Palais de la Légion d'Honneur is built.

The Théâtre Français is founded.

The Pont de la Concorde, or Pont de Louis XV., is completed.

The Panthéon, or church of St. Geneviève, is completed.

The first National Exposition is held at Paris.

The Odéon is destroyed by fire.

The cemetery of Père la Chaise is formed.

The Rue Rivoli is commenced.

The Pont des Arts, the Arc de l'Étoile, and Arc de Triomphe du Carrousel are founded.

The Odéon is rebuilt.

Napoleon I founds the Bourse, or exchange.

Aug. 15. The column in the Place Vendôme is completed.

The Château d'Éau is erected.

March 20. Paris surrenders to the allies.

The English encamp in the Bois de Boulogne.

The Ecole des Beaux Arts is founded.

Gas illumination is introduced.

The Théâtre du Gymnase Dramatique is erected.

The Théâtre du Vaudeville and the Cirque Olympique are built.

The Pont des Invalides is completed.

July 28. Louis Philippe founds the column of July.

The tribunals of Paris are commenced.

July 28. The column of July is inaugurated.

**PARIS (Treaties).—The following are the most important treaties of Paris:**

**A.D.**

1829. April 12. Between Louis IX. and the count of Toulouse, who ceded Languedoc to the French. This treaty put an end to the war of the Albigenses.

1879. May 2. Between France and Sardinia. Savoy is ceded to the French republic.

1814. April 11. Between the allies and Bonaparte, who renounces the rulership of France. This is also called the treaty of Fontainebleau. May 30. Between France and the allied powers. France is confined within the limits of 1792.

1818. Aug. 8. Convention between Great Britain and Austria, Prussia, and Russia. Napoleon I. is committed to the custody of the English. Nov. 20. Between France and the allied powers, to settle the French boundaries, &c. France promises to pay an indemnity of 700,000,000 francs, and allow certain fortresses to be garrisoned by the allied powers for three years.

1817. June 10. Between Austria and Spain, confirming the congress of Vienna.

1832. March 20. Between Russia and Turkey. Great Britain, France, and Sardinia. This treaty terminated the Russo-Turkish war.

1861. Feb. 3. Between France and the prince of Monaco, for the cession of Mentone and Roquebrune to France.

**Parish.**—The name was sometimes applied to a bishop’s see among the early Christians. Alexandria is said to have been the first city divided into parishes. According to Camden’s account, England was divided into parishes by Honorius, about A.D. 630. Lay parish lists, according to Bede, about 700, and the division is to be found in the laws of Edgar in 970. The creation of parishes was probably not fully effected till the time of the Norman conquest, 1066.

**PARIS INDUSTRIAL EXHIBITION.**—The
“Palais de l’Industrie” was opened at Paris by Napoleon III, May 15, 1855, when Prince Napoleon, president of the commission, read a report giving an account of its rise and progress. It was visited by Queen Victoria and Prince Albert, Aug. 24, 1855. The price of admission was half a franc, and on Sunday, for the working classes, two sous. It was finally closed Nov. 15, 1856.

Park was originally a portion of the forest appropriated by the lord of the soil for the use of animals of the chase. The first park was that of Woodstock, made by Henry I. in 1125. St. James’s Park is the oldest in London, having been formed by Henry VIII. (1509—1547). It was re-arranged and planted in the reign of Charles II. by the celebrated French architect Le Notre, and was entirely remodelled in the time of George IV. — The Green Park originally formed part of St. James’s Park. — Hyde Park was a fashionable place for drives and promenades as early as the reign of Charles II. In 1550 the French ambassador hunted with the king in Hyde Park, which was then well stocked with game. Kensington Gardens formed part of Hyde Park before George II.’s time, when Queen Caroline inclosed them and formed the Serpentine. — Regent’s Park was laid out in 1812 and named after George IV., then prince regent. — Victoria Park was commenced in 1842. — Battersea Park was opened in 1858.

Parliament.—Parry (Parliaments and Councils of England, Intro. x.) remarks: "At the close of the reign of Henry III. the Curia Regis was called the King’s Parliament, a term then employed to express any assembly met for purposes of conference." It did not then denote a legislative assembly, though it began to be used in that sense at the commencement of the reign of Edward II. The two branches of the legislature assembled in the same room as late as 1342. Their joint assent became necessary before any act could become law in the reign of Edward IV.

A.D.
1855. The barons assemble at Oxford. This meeting is the first called a parliament.
1855. The earliest writ extant is issued.
1856. Borough representation is regarded as commencing this year.
1851. Annual parliaments are ordered.
1832. Wales is represented in parliament.
1837. Jan. 7. King Edward II. is deposed by both houses of parliament.
1862. English is made the language of the law.
1835. Sept. 30. King Richard II. is deposed by parliament, and the House of Commons begins to assert its control over pecuniary grants.
1840. Oct. 6. The Unlearned Parliament, so called because lawyers were prohibited from attending, meets at Coventry.
1847. Nov. 9. The Lords and Commons are permitted to assemble and transact business in the same time.
1843. May 25. Members of parliament are ordered to reside in the cities and boroughs they represent.
1849. Feb. 23. The Commons adopt the 40's qualification for county electors.
1849. The statutes are first printed.
1852. Members of parliament are exempted from arrest. (See Ferrier’s Arrest.)
1849. The eldest sons of peers are permitted to sit in parliament.
1860. Feb. 6. The House of Lords is abolished.
1860. April 25. The House of Lords is restored, but only consists of peers temporal.
1861. Nov. 20. The bishops are permitted to resume their seats in the House of Lords.
1867. An attempt is made to unite the English and Scotch parliaments.
1877. Roman Catholics are excluded from sitting in either house, by 30 Charles II. st. 2.
1894. Triennial parliaments are ordered by 5 Will. & Mary, c. 2.
1715. Septennial parliaments are ordered by 1 Geo. I. st. 2, c. 38.
1800. July 2. The Irish parliament is incorporated with that of Great Britain by 39 & 40 Geo. III. c. 27.
1829. April 13. The Roman Catholic Emancipation Act (30 Geo. IV. c. 7) permits Roman Catholics to sit and vote in either house of parliament on swearing fidelity to the king and constitution.
1832. June 9. Passing of the Reform Bill (q. v.).
1833. July 23. Jews are admitted to sit in both houses by 21 & 22 Vict. c. 49.

(See House of Commons, House of Lords, and Houses of Parliament.)

**PARLIAMENT (French).**—The ancient French parliament, which existed as early as the accession of the Capetian dynasty, A.D. 987, was a moveable court, composed of the great seigneurs and prelates of the realm, who assembled under the presidency of the king, and accompanied him in his removes from place to place. In 1190, Philip Augustus instituted the parliament of Paris, which assembled three times a year; and, in 1302, Philip the Fair divided it into three chambers, the Grande Chambre, or Chambre des Plaids, for the decision of causes relating to the crown and matters of public importance; the Chambre des Enquêtes, which regulated appeals; and the Chambre des Requêtes, for the transaction of ordinary parliamentary business. The first public ministry was formed in 1312, when avocats and procureurs généraux were appointed. In 1453, Charles VII. formed the Enquêtes into two chambers, and created a new chamber, entitled the Tournelle Criminelle, as a final court of appeal. In 1598 a Chambre de l'Edit was erected, for deciding cases referring to Protestants, it became extinct in 1669; and in 1667 the Tournelle Court was instituted, to relieve the Grande Chambre of some of its business. In 1753, Louis XV. tried unsuccessfully to substitute a Chambre Royale for the parliament, but in 1771 it became obnoxious on account of its unwise proceedings, and was suppressed. It was restored by Louis XVI. Nov. 12, 1774, but was again abolished Nov. 7, 1790.

**PARLIAMENT (Scotland).**—The ancient forms of government in Scotland seem to have been nearly analogous with those adopted in this country, the legislature being conducted by the sovereign with the advice of his council. The first assembly properly called a parliament was convoked at Scone by John Balliol, Feb. 9, 1292. Burgesses were admitted by Robert Bruce, July 15, 1326, when a grant of the tenth penny of all rents was made to the king by the earls, barons, burgesses, and free tenants in full parliament assembled. The Scotch parliament differed from that of England in having only one house, but a committee, known as the Lords of Articles, answered to some extent the purpose of a house of peers. The parliaments of England and Scotland were united by 5 Anne, c. 8 (1707).

**PARMA (Italy),** in the ancient Gallia Cispadana, was colonized by the Romans after the subjugation of the Boi, B.C. 183. It received a colony of Goths by order of Gratian, A.D. 377; it was included in Lombardy in 572; and was transferred by Charlemagne to the papal see about 778. The government was usurped by the Correggio family in 1334. When Napoleon Bonaparte invaded Italy, he compelled the duke to furnish supplies for his army, May, 1796; but peace was agreed to Nov. 6, 1796. It was decided by the congress of Vienna to make it the appanage of Maria Louis of Austria, Napoleon's wife, and at her death it reverted to the duke of Lucca, June 9, 1815. An insurrection took place, and the Austrian garrison was expelled, March 19, 1843; and the duke resigned in favour of his son, March 14, 1849. An insurrection occurred at Parma April 30, 1859, when the duchess left the capital, to which she returned May 4. Another revolution occurred soon after, and Parma was annexed to the new kingdom of Italy. Colonel Anviti was seized at Parma and put to death with great cruelty, Oct. 6, 1859. Near the capital, which bears the same name as the duchy, the Austrians were defeated by the Sardinians, June 29, 1734. The cathedral, with a fine fresco by Correggio, was conserved A.D. 1106.

**PAROS, or PARUS (Egean Sea).**—This
island, one of the Cyclades, is said to have been originally inhabited by Cretans and Arcadians. The Ionians colonized it at an early period. The Arundelian, or Oxford charter, was found here.

PARRETT (Battle).—Osnac, the caldorman, and Ealstan, bishop of Sherborne, led an army against the Danes, and defeated them at the mouth of the river Parrett, A.D. 845.

PARRICIDE.—The Athenians had no law against parricides, as they professed to believe that nobody could be so wicked as to kill a parent. This was also the case with the Romans until L. Ostius killed his father, about b.c. 172. A law was then enacted which ordained that the criminal, after he had been first scourged until the blood came, should be sewn up in a leathern sack with a dog, an ape, a cock, and a viper, and so thrown into the Tiber. This punishment was observed by the Lex Pompea into that of the sword, or burning, or throwing to wild beasts.

PARDIFORP (Armistice).—A truce, concluded at Alessandria between France and Austria, June 16, 1800, was extended to Germany, under the name of the armistice of Pardorf, July 15. Hostilities ceased at all points, and could not be resumed without twelve days' notice. It led to a negotiation, which resulted in the preliminaries of peace, on the basis of the treaty of Campi Formi, being signed at Paris July 28, 1800.

PASSEES.—Owing to the persecutions of the Mohammamedan conquerors of Persia, the Guebres, descendants of the ancient fire-worshippers, sought refuge in the northwestern parts of Hindoostan, chiefly Bombay and Gujerat, about A.D. 800, when they were called Parsese, or Persians.

PARTHENON, the temple of Minerva, protector of Athens, was built in that city in the time of Pericles,—Callicrates and Ictinus being the architects, and Phidias the chief sculptor,—about B.C. 448. It suffered from the explosion of a powder-magazine during a siege by the Venetians A.D. 1667.

PARTHENOPOLITE REPUBLIC was established in the kingdom of Naples by the French, after the completion of its conquest, Jan. 23, 1796. Cardinal Ruffo took the field against it, at the head of 17,000 Calabrians, and Macdonald received orders from the Directory to abandon Naples, May 30, 1796, and it was soon afterwards dissolved.

PARTHIA (Asia), subject at an early period to Media, to Persia, and subsequently to Alexander and his successors, threw off the Syro-Macedonian rule, when the dynasty of the Arsacids was established, B.C. 256. The empire extended from the Euphrates to the Indus, and from the Oxus to the Persian Gulf, at the death of Mithridates, B.C. 130. It was invested by the Romans, under the triumvir Crassus, B.C. 55, who was defeated and slain B.C. 53. On the death of Artabanes, the last king, Artaxerxes usurped the supreme power, and founded the new Persian dynasty called the Sassanides, A.D. 226.

PARTITION TREATIES.—A treaty, regulating the succession of the Spanish monarchy, and its partition, was made between England and Holland Aug. 16, 1698. Another treaty for the same purpose, between England, France, and Holland, was signed in London, Feb. 21, 1700, and at the Hague by the French envoy and the plenipotentiaries of the States-General, March 25. The first treaty for the partition of Poland, between Austria, Prussia, and Russia, was made in February, 1772. A second treaty was signed at St. Petersburg Aug. 5, 1772, and the third, for the final partition of the kingdom, was concluded Oct. 24, 1795.

PASARGADE (Persia).—The name of this town is sometimes written Passargadse and Pasargada. It is said to have been built by Cyrus B.C. 559, after his defeat of Astyages near this spot. The kings of Persia were consecrated here by the magi.

PASCHAL CYCLE, formed by the multiplication of the sun's cycle, 28 years, with that of the moon, 19 years, to ascertain when Easter occurs, was adopted by the general council of Nicaea A.D. 325. It was discontinued in England by act of parliament, Sept. 2, 1752.

PASQUINADE.—This name, given to a short satirical poem, is derived from Pasquin, a tailor of Rome, who, towards the close of the 16th century, wrote lampoons, and hung them on a mutilated statue during the night.

PASSARO CASTE (Sea-fight).—Admiral Byng, created Viscount Torrington in 1721, defeated the Spanish fleet off this cape on the coast of Sicily, July 31, 1718. The English captured five ships of the line and eight frigates.

PASSAROWITZ (Peace).—This treaty of peace between Charles VI., emperor of Germany, the Venetians and the Turks, was concluded July 21, 1718. The sultan ceded Belgrade and Temesvar to the emperor.

PASSAU (Bavaria).—The bishopric, of which it is the capital, originally an independent state, was secularized A.D. 1803, and united to Bavaria in 1809. A treaty, securing religious freedom to the Protestants, was signed in the building now used for the post-office, on behalf of Charles V., July 31, 1552. The colossal bronze statue to Maximilian Joseph was erected in 1629.

PASSENGERS in public vehicles are protected by 1 & 2 Will. IV. c. 22 (Sept. 22, 1831); 1 & 2 Vict. c. 79 (Aug. 10, 1838), and by 16 & 17 Vict. (June 28, 1859). The laws relating to passengers by sea were amended and consolidated by 15 & 16 Vict. c. 44 (June 30, 1852).

PASOVE, or Feast of unleavened Bread, commemorating deliverance from the destroying angel when the first-born of Egypt were smitten, was ordained by God to be observed by the Jews for ever, B.C. 1491 (Exod. xii.).

PASSPORTS are of ancient date. A
passport granted by Julius Caesar to a philosopher ran thus: "If there be any one, on land or sea, hardly enough to molest Potamon, let him consider whether he be strong enough to wage war with Caesar." The system became very oppressive in Europe at the end of the 15th century. Passports were abolished in France, as far as regards British subjects, Dec. 16, 1860.

PASTOUEREAUX, or SHEPHERDS, followers of an impostor in Flanders, called the Master of Hungary, arose A.D. 1251. They spread into France, entering the city of Orleans on St. Barnabas day, Jan. 13, and committed dreadful outrages on the inhabitants. At Bourges the leader was slain, and his followers massacred the same year. A similar rising in France was distinguished by a general massacre of the Jews A.D. 1321.

PATAGONIA (South America), so named by Magalhaens, who discovered it A.D. 1520. Sir Francis Drake sailed along the coast in 1578, and Captain Cook explored it in 1774. A settlement, formed by the Chilians at Port Famine in 1843, was removed to Sandy Point in 1850. An expedition to discover a suitable site for a new colony was despatched in 1834.

PATAY (France).—Lord Talbot was defeated and taken prisoner by the French under Joan of Arc, at this town, June 18, 1429.

PATENTS for titles of nobility were first made in the reign of Edward III. (1327 to 1377). Patents for new inventions are founded upon a statute passed in 1623, which grants the privilege "of the sole working or making of new manufactures within the realm to the true and first inventor and inventors of such manufactures." An act for improving the patent laws was passed, under the auspices of Lord Brougham (5 & 6 Will. IV. c. 83), Sept. 10, 1833. Commissioners of patent laws were appointed July 1, 1852.

PATERINES, holding Gnostic opinions, headed by a certain Gerard, made their appearance at Monteforte, and were, many of them, burned at Milan by Archbishop Herbert about A.D. 1026. The term Paterini, or Paterines, was also applied to the Paulicians, the Manicheans, and other sects.

PATERSON (North America).—This town, in New Jersey, was founded A.D. 1791 for the manufacture of cotton.

PATNA (Hindostan), in Sanscrit, Pataliputra, the Palmybothera of the Greeks and Romans, was visited by Magasthenes, as ambassador from Seleucus Nicator to Sandracottus, B.C. 305. It was incorporated with the empire of Delhi A.D. 1194. Major Carnac defeated Shah Alum here in January, 1761; Mr. Ellis captured it June 25, 1763; but the troops having been made prisoners while engaged in plunder, it was retaken Nov. 6 of the same year. An action, in which Mir Casim was defeated, secured the town to the British, Oct. 23, 1764. A column marks the grave of 200 English prisoners murdered in cold blood by Mir Casim A.D. 1763. Dr. Lyell was murdered by the mutineers in the streets here, July 3, 1857.

PATTOCH (Battle).—Louis of Baden defeated the Turks in this battle, fought Aug. 30, 1659.

PATTEE, or PATRAS (Greece), one of the twelve Achaean cities, was founded by the Ionians, took the Athenian side in the Pellenon war, B.C. 431; and, through the persuasion of Alcibiades, connected itself by a wall with the port of Athens, B.C. 419. Cassander, one of Alexander's generals, having taken it, was driven out by Aristodemus B.C. 314. The inhabitants expelled the Macedonians and renewed the Achaean League with the three towns Dyne, Phare, and Triata, B.C. 250. After the battle of Pharsalia it was taken by Cato, B.C. 48; Antony and Cleopatra chose it for a winter residence B.C. 32-31. It was restored, and colonized with Roman soldiers by Augustus, about B.C. 20. The town sent an archbishop to the council of Sardica A.D. 317, and it was destroyed by an earthquake in the 6th century. It was restored, and purchased of the Venetians in 1408; was captured by the Turks in 1446; and recovered by the Venetians in 1533. Having again been taken by the Turks, it was held till the revolution in 1828, when it capitulated to the Greeks.

PATRIARCH.—The appellation was given to the early ancestors of the Jews; also to certain governors among the Jews after the destruction of Jerusalem, A.D. 70. The order became extinct in the end of the 4th century. It was first applied to bishops, by authority of the Church, in the council of Chalcedon, A.D. 451, although Socrates in his history says it began to be used as the title of eminent bishops after the general council of Constantinople, A.D. 381. The patriarch of Constantinople was distinguished as ecclesiastical or universal patriarch, and the bishop of Rome as prince of the patriarchs.

PATRICIANS, or PATREES, an appellation given to the Roman populace by Romulus. It belonged to every Roman citizen till the creation of the patres minorum gentium by Tarquin, and formed the exclusive source of the senate, consuls, and pontifices, till B.C. 365. Headed by L. Tarquinius, they conspired against king Servius and murdered him, B.C. 534. The dignity ceased to be hereditary in the reign of Constantine I., A.D. 323—337.

PATRICK’S (St.) CATHEDRAL (Dublin) was founded by Archbishop Comyn, A.D. 1190, destroyed by fire about 1300, and, having been rebuilt, was dissolved at the Reformation, and used for courts of justice about 1539. Mary restored it to its original use.

PATRICK, St. (Order), consisting of the sovereign, a grand master, and twenty-two knights, was founded in Ireland by George III., Feb. 5, 1783.

PATRIOTIC FUNDS.—After Admiral Jervis’s victory over the Spanish fleet, a subscription was made at Lloyd’s for the
relief of the widows and orphans of those who had fallen in the engagement, March 3, 1797. At a meeting of merchants, underwriters, and other subscribers to Lloyd's, July 20, 1809, it was resolved to raise a fund on an extended scale for the widows and orphans of those killed in defence of their country, and upwards of £100,000 was subscribed by the end of the month. The committee voted, as a tribute of their consideration, swords, pieces of plate, and sums of money, to the officers and men engaged in the gallant defence of Dominica, May 1, 1805. In the House of Commons Lord Howick characterized it as "that mischievous system of rewards," tending to bring the government into contempt, Dec. 19, 1806.

In Cobbett's "Political Register," it was represented as a "grand means of making a formidable opposition to government," its funds amounting to more than a quarter of a million of pounds, Jan. 24, 1807. A commission was issued June 13, 1854, by Queen Victoria, presided over by Prince Albert, to raise and distribute a fund for those engaged in the Russian war, which, before the end of the year, reached upwards of a million. Out of the fund, which eventually amounted to £1,458,000, an institution for the education of 300 daughters of soldiers, sailors, and marines, was established, the foundation-stone being laid by the Queen, on Wandsworth Common, July 11, 1857. Another patriotic fund, for the relief of the sufferers by the Indian mutiny, originated at a public meeting held in London Aug. 23, 1857. The sum collected amounted to £434,729 in November, 1858.

PatriOTIANS, the followers of Fraxcoas, a confessor at Rome, who maintained that the Father was born of the Virgin, died upon the cross, and was buried, arose towards the end of the 2nd century. They were also called Monarchians. Tertullian wrote against Fraxcoas. The term was also applied to the followers of Noetus, a native of Smyrna, who early in the 3rd century maintained that God was united with the man Christ, and in him was born and suffered.

PAULIANS, PAULINISTS, or PAULIANS.
- The followers of Paul of Samosata, bishop of Antioch A.D. 260—270, who held some peculiar notions respecting the Godhead. Bingham asserts that he denied the divinity of Christ, and introduced a new form of baptism. Paul of Samosata was accused of heresy in 264, condemned by a council in 269, and was expelled in 270. The council of Nicea (June 19—Aug. 25, 325) ordered the Paulians to be re-baptized previous to admission into the Church.

PAULICANS, or Disciples of St. Paul, holding Gnostic or Manichean principles, originated with one Constantine, living near Samosata, A.D. 660. He fell a martyr to his principles A.D. 687. Subjected to unceasing persecution at the hands of the rulers of the Western empire, it is said that not fewer than 100,000 were extirpated by the sword, the gibbet, or the flames, in the reign of Theodora, A.D. 842—857. Carbaes, commander of the guards, followed by 5,000 of the sect, renounced the allegiance of Rome, leagued with the Mohammedans, and founded and fortified the city of Tephrice, and defeated the emperor Michael under the walls of Samosata, 845—861. Led by Chryscoheir, successor of Carbaes, they pilaged Nicea, Nicomedica, Anera, and Ephesus, turning the cathedral of the latter city into a stable for mules and horses, to manifest their abhorrence of images and relics, in 868. They were attacked by the forces of the emperor Basil I., their leader slain, and Tephrice, their stronghold, taken, in 871. Constantine V. (Copronymus), having discovered a great number of them in Melitene and Theodosiopolis, transplanted them to Constantinople and Thrace, and so introduced their doctrine into Europe, about 850. The emperor John I. (Lamiosces) died 850. The bishop of the sect from the Calyanian hills to Philipopolis in Thrace, in 970. Having spread through Italy into the southern provinces of France, a persecution was raised against them, and they were extirpated with fire and sword in 1200.

PAUL'S (ST.) CATHEDRAL (London).
- Sir Christopher Wren denies Camden's theory that St. Paul's cathedral occupies the site of a Roman temple to Diana, and asserts that "there is authentic testimony of a Christian church planted here by the apostles themselves, and, in particular, very probably by St. Paul." It is, however, doubtful whether any such building existed in London till the reign of Lucius, A.D. 185, when Faganus and Damascius visited England to consecrate buildings formerly devoted to the service of pagan divinities, to the worship of the true God. The church they founded or consecrated was destroyed during the Diocletian persecution in 303, and another erected on its site was burnt by the Saxons in the 5th or 6th century. Ethelbert, king of Kent, and his nephew Eber founded a new church in 610, which was severely injured by a fire in 962, and totally burnt in 1087, after which, Maurice, bishop of London, commenced the erection of Old St. Paul's. This cathedral was much damaged by fire in 1137. In 1221 a new steeple was erected. The choir was completed in 1240, and in 1256 Fulco Basset, bishop of London, added the Mediterranean church of St. Faith. The spire was struck by lightning Feb. 1, 1444, and again June 4, 1561, when a fire was kindled which rendered the removal of the roof and steeple a matter of necessity. Various attempts were made to effect a complete restoration, but no active measures were taken till 1633, when Inigo Jones erected a fine, but incongruous classic portico. St. Paul's cathedral was totally destroyed by the great fire of 1666. The ground was cleared for a new building May 1, 1674, and the warrant to begin the works was granted May 1, 1675. The first
stone was laid June 21, and divine service was celebrated for the first time in the uncompleted edifice on the occasion of the public rejoicings for the peace of Ryswick, Dec. 2, 1697. The last stone was set up in 1710, the whole building having been completed by Sir Christopher Wren, and by the same master-mason, and during the presidency of one bishop of London. The expense was defrayed by a tax on the coal consumed in London, and amounted to £747,954. 2s. 9d. The iron railing cost £11,302. 6s. 8d. The annual musical festivals for the benefit of the orphans and widows of the clergy have been solemnized in the cathedral since 1697. The organ was built by Bernard Schmoldt in 1694, and the bell was recast by Richard Phelps in 1716. Gas was first employed in the cathedral May 6, 1822, and it was first opened for evening service Sunday, Nov. 28, 1858. The principal dimensions of St. Paul's are as follows:—length from east to west, 510 ft.; breadth from north to south porticos, 252 ft.; breadth of west entrance, 100 ft.; circumference, 2,292 ft. The extreme height is 404 ft.; that of the campanile towers, 222 ft., and of the west pediment, 120 ft. The dome is 420 ft. in circumference, and the ball 6 ft. in diameter.

PAUL'S (St.) CROSS (London).—This ancient pulpit cross of timber stood at the north side of St. Paul's cathedral. The date of its erection is not known, but it was in existence A.D. 1259, as Henry III. summoned a general assembly to meet here in that year. In 1382 it was struck by lightning, and was restored by Thomas Kempe, bishop of London from 1448 to 1489. It was finally taken down by order of parliament in 1643.

PAUL'S (St.) SCHOOL (London).—This institution was endowed A.D. 1512 by John Colet, dean of St. Paul's, for 153 poor men's children. The present building was erected in 1823, by Mr. George Smith.

PAUPERS COLONIES.—Establishments with this name originated in Holland, A.D. 1818. General Van den Bosch, on his return from Java, laid before the king of Holland a plan for a pauper colony; a meeting was held at the Hague, and a regular society formed. A writer in the British Almanack for 1829 says:—"Having received the sanction of the king, the society was recommended to all the local authorities, and soon found itself in possession of £5,380, obtained from more than 20,000 members. With these funds, having been enabled to make the necessary arrangements, the society purchased the estate of Westerbech Sloof, on the east side of the Zuyder Zee, and not far from the town of Steenwyk. On this estate they cost them £4,660, and it contained from 1,200 to 1,300 acres, about 200 of which were under a sort of culture, or covered with bad wood, and the rest a mere heath. They let out the cultivated land, about one-tenth of the whole; deepened the Aa (which runs through the estate), so that it is navigable for boats, and built storehouses, a school, and dwellings for about fifty-two families, of from six to eight persons each. Their operations were begun in September, 1815; by the 10th of November the houses were ready; and the communes sent some poor families. The expense of each family, in English money, was as follows:—

<table>
<thead>
<tr>
<th>Item</th>
<th>Cost</th>

</tbody>
</table>

Total establishment £141

The writer goes into various details and then gives the result of the experiment. "In the course of seven years from its first establishment, the colony of Fredericks Cord contained a population of 6,778, including that of Omme Schanje, which is under a more rigid control. Among the number were 2,174 orphans and foundlings. The total number forming all the colonies in Holland, were stated to Mr. Jacob at 20,000; but he thinks it exaggerated: there were, however, 8,000 in North Holland."

PAUPERS might be put in the stocks if not provided with a testimonial from a justice of the peace, by 2d Rich. II. c. 7 (1388); were prohibited from begging, except in the hundred where they last dwelt, by 11 and 19 Hen. VII. (1495 and 1504); and if able-bodied, were to be whipped, by 22 Hen. VIII. c. 12 (1531). Compulsory payment was first instituted in support of the poor by 27 Hen. VIII. c. 25 (1536). The compulsory system was brought into full operation by 14 Eliz. c. 5 (1572), forming the basis of a subsequent act, still in operation (43 Eliz. c. 2), passed in 1601.

PAVEMENT.—The Carthaginians are said to have been the first who paved their towns with stones, and the practice was introduced into Europe by the Romans. London was first paved about A.D. 1535. McAdam's system of paving was introduced into London in 1825.

PAVIA (Italy), the ancient Ticinum, is first mentioned in history as the place where Augustus met the funeral procession of Drusus, A.D. 20. A sedition among the troops of Vitellius broke out here in 69; and while commanding its garrison, Claudius was saluted with the imperial title in 268. It was taken by Attila in 452, and by Alboin, after a siege of more than three years, in 570, when it became the residence of the Lombard kings and the capital of Italy, under the name of Pavia. It surrendered to Charlemagne, at the close of a fifteen months' blockade, in 774. It was, with its forty-three churches, reduced to ashes by the savage Magyars in 962. Victor IV. was elected pope by a council held here Feb. 5, 1160, and the emperor Frederick I. held his
stirrup and kissed his foot. The army of Charles V., under the viceroy Lamoy, came to its relief when besieged by Francis I., and in the battle (see MALAGONI) which ensued Francis I. was defeated and taken prisoner, Feb. 23, 1525. It was occupied by the French and Sardinian army Oct. 29, 1733; and again by the united troops of France, Spain, Naples, and Genoa, in July, 1745. The populace rose against the French occupants, and took the castle, May 26, 1796. The university, supposed to have been founded by Charlemagne in 774, was restored in 1361 by Galeazzo Visconte, who was styled count of Pavia. The church of St. Michael, perhaps the oldest in Italy, dates from the beginning of the 7th century; the church Del Carmine, which contains valuable paintings, was built in the 14th century; the cathedral, completed in 1469, was partly destroyed in 1527, and suffered from the French in 1796. Councils were held here in 1128, and Feb. 1160.

Pawpaw. — The emperor Augustus established a fund at Rome for lending money to those who could leave a sufficient pledge, &c. 31; Tiberius lent money on lands, a.d. 14; and Alexander Severus advanced money to the poor without interest in 222. By the papal court a fund was collected from which the poor received loans free of charge, and lending-houses were permitted to exact interest under the name of pro indennitate, the pope declaring the holy mountains of piety, "sacer monti di pieta," to be legal, the first being established at Perugia, by Barnabas Interamnensis, about a.d. 1404. Another at Savona was confirmed by Sixtus IV. in 1479. A mont de piété was established at Assisi by Bernardinus Tomitano, of the order of Minorites, in 1435, at Mantua in 1436, at Parma in 1488, and at many other towns up to the close of the 15th century. A constant hostility being kept up by some of the ecclesiastical bodies to these institutions, which were, they said, not montes pie-tatis, but impietatis, Pope Leo X. issued a bull, declaring them legal and useful. A mont de piété was founded at Rome by Gio-vanni Calvo, a Franciscan, in 1539; one at Naples in 1539 or 1540. Maximilian I. permitted the citizens of Nuremberg to drive out the Jews and establish an exchange bank, where those requiring money might leave their effects in pledge, in 1498. In the Netherlands, France, and England, such houses were known under the name of Lombards, and to evade the prohibition of the Church against interest, exacted it beforehand, as a present. The lombard, or lending-house, at Brussels was established in 1619, at Antwerp in 1620, at Ghent in 1622. The mont de piété of France was instituted by royal command in 1777. The present system in England was established by De Northburgh, bishop of London, the prac-tice being for the preacher at St. Paul's Cross, in his sermon, to declare, at the end of a year, that the article pledged would be forfeited if not redeemed in fourteen days.

The rate of interest is fixed by 39 & 40 Geo. III. c. 99 (July 23, 1800).

Pawtucket (North America). — The first cloth factory in America moved by water was established at this town, situated partly in Rhode Island and partly in Massachu-setts, a.d. 1790.

Pax. — This instrument, used in the Roman Catholic church, and sometimes called the tabula pacis, or the osculatorium, was intro-duced in the 12th or 13th century. The custom of giving the kiss of peace (q. v.) before the communion prevailed until the pax was introduced. The priest kissed the instrument first, then it was kissed by the clerk, and finally by the laity, and this pro cess was substituted for the former general exchange of salutations. A pax appears amongst the regular ecclesiastical instruments ordered in the parish churches of Yorkshire in 1230.

Paz de Ayacucho (South America). — This town in Bolivia was founded by the Spaniards a.d. 1548, under the name of Nuestra Señora de la Paz. It was made the seat of a bishop in 1605, and its name was changed, in 1825, to Paz de Ayacucho, in honour of the victory of Ayacucho.

Pazzi Conspiracy, formed by Francesco Pazzi, and sanctioned by Pope Sixtus IV., to murder the Medici, Lorenzo and Julian, at Florence, was attempted during the celebration of high mass in the cathedral. The work of assassination was undertaken by two priests, and the elevation of the host was the signal agreed upon for the onset, April 26, 1478. Julian fell beneath their daggers, but Lorenzo escaped with a slight wound. The populace took up arms, 70 of the Pazzi party, including the two assassins, were killed, and altogether more than 200 persons were put to death.

Peace. (See CONSERVATIORS AND JUSTICES OF THE PEACE.)

Peace Society, for the promotion of permanent and universal peace, was established a.d. 1816; held a meeting at Paris, Aug. 22, 1849; in Exeter Hall, Oct. 30, 1849; at Frankfort, Aug. 22, 1850; at Birmingham, Nov. 28, 1850; at Manchester, Jan. 27, 1853; and at Edinburgh, Oct. 12, 1853. A deputation from the society had an interview with Nicholas, emperor of Russia, at St. Petersburg, Feb. 10, 1854.

Pearls are mentioned by Job (xxviii. 18) as possessing considerable value, b.c. 2130. Codius, the tribune, gave a pearl, dis solved in vinegar, to each of his guests, b.c. 61. Cleopatra made a wager with Antony to serve up her pearl eardrops, worth £76,000, at a repast, a.d. 32. Ceylon was famed for its fisheries in the time of Pliny in 72; Seville imported upwards of 697 lb. weight in 1837. A pearl was obtained from Margarita, by Philip II., worth £31,875, in 1574. Joint stock companies were formed to prosecute the Columbia fishery in 1525, but were abandoned in 1826; and an English company undertook the same enterprise at Algiers in 1826. The total value imported
into the United Kingdom in 1856 was £56,162. Linnaeus announced the discovery of a method of producing these artificially in 1761, and an imitation was devised by a Par- isian house-maker, called Jaquin, about 1856.

PEASANT WAR.—A struggle, called the Bundschuh, broke out A.D. 1502, and another, the League of poor Conrad, at Würtemberg, in 1514. The peasants of the small towns rebelled in Swabia, and those of the Thurgau rose in arms in June, 1524, when many outrages were committed. The insurgents were defeated by the army of the archduke Ferdinand, May 2, again at Königshofen June 2, and were finally put down after 100,000 persons had perished, in June, 1525.

PECQUIGNY, or PÉCQUIGNY (Peace).—The treaty of Amiens (q.v.), of Aug. 29, 1755, was ratified at Pécquigny, near Amiens, on which account it sometimes passes by that name. It was renewed for the lives of Louis XI. and Edward IV. in 1477.

PEEL, Robert. (See HAWKERS.)

PEEL ADMINISTRATIONS.—The first was formed on the resignation of the first Melbourne administration (q.v.), Nov. 14, 1834. William IV. applied, Nov. 15, to the Duke of Wellington, who advised that Sir Robert Peel, Bart., at that time travelling in Italy, should be summoned to form an administration. The Duke of Wellington became prime minister, provisional arrangements were made, and Sir Robert Peel obeyed the call, and reached London Dec. 9. He immediately assumed the responsibilities of office, and his cabinet, formed at the end of the month, was thus constituted—

First Lord of the Treasury and Chancellor of the Exchequer—Sir Robert Peel, Bart.
Lord President of the Council—Lord Lyndhurst.
Privy Seal—Lord Wharncliffe.
Home Secretary—Mr. Henry Goulburn.
Foreign Secretary—Duke of Wellington.
Colonial Secretary—Earl of Aberdeen.
Admiralty—Earl de Grey.
Board of Control—Lord Ellenborough.
Secretary at War—Sir J. Herries.
Chief Secretary for Ireland—Sir Henry Hardinge.
Master of the Mint, and President of the Board of Trade—Mr. A. Baring.
Paymaster of the Forces—Sir E. Knatchbull, Bart.
Master-General of the Ordnance—Sir George Murray.

Parliament was dissolved Dec. 30, 1834, and a new parliament was summoned to meet Feb. 19, 1835. A coalition having been formed between the Whigs and the Radicals, an address to the people was proposed in the House of Commons, and carried Feb. 26, by 309 to 302. Three adverse divisions having taken place respecting the appropriation of the revenues of the Irish church, namely, first, a resolution proposed by Lord John Russell, carried April 2 by 323 to 389; secondly, the resolution carried in committee April 6, by 262 to 237, and thirdly, a further resolution in favour of the appropriation principle carried against ministers,

April 7, by 285 to 258, Sir Robert Peel announced the resignation of the ministry.

April 8. (See MELBOURNE ADMINISTRATIONS.) The second Peel administration was formed on the resignation of the Melbourne administration (q.v.), Aug. 30, 1841. The cabinet formed by Sept. 8 was thus constituted—

Treasury ............... Sir Robert Peel, Bart.
Lord Chancellor .......... Lord Lyndhurst.
President of the Council .......... Lord Wharncliffe.
Privy Seal .......... Duke of Buckingham.
Chancellor of the Exchequer .......... Mr. Goulburn.
Home Secretary .......... Lord Ellenborough.
Foreign Secretary .......... Earl of Aberdeen.
Colonial Secretary .......... Lord Stanley.
Admiralty .......... Earl of Haddington.
Secretary at War .......... Sir B. Hardinge.
Board of Trade .......... Earl of Ripon.
Treasurer of the Navy .......... Sir E. Knatchbull, Bart.
Chief Secretary for Ireland .......... Lord Elliot.

Lord Ellenborough accepted the governor-generalship of India, and was succeeded at the Board of Control by Lord Fitzgerald and Vesci, Oct. 23, 1841. The Duke of Buckingham resigned the privy seal Jan. 31, 1842, and it was intrusted to the Duke of Buc- cleuch and Queensberry Feb. 2. The Duke of Wellington was made commander-in-chief Aug. 15, 1842. The Earl of Ripon succeeded Lord Fitzgerald and Vesci (who died May 11, 1843) at the Board of Control, May 17, 1843; and Mr. Gladstone was made president of the Board of Trade and master of the mint, June 10, 1843. Sir Henry Hardinge was succeeded, May 17, 1844, as secretary at war by Sir Thomas Fremantle, Bart., who, having been appointed chief secretary for Ireland, was replaced by Mr. Sidney Herbert, Feb. 4, 1845. Lord Somerset, made chancellor of the duchy of Lancaster Sept. 14, 1841, and the Earl of Lincoln, made first commissioner of woods and forests Sept. 16, 1841, were both admitted to seats in the cabinet in 1845. A division ensued in the cabinet respecting the expediency of an immediate repeal of the corn laws in the autumn of 1845, and ministers resigned Nov. 23. Lord John Russell failed in his attempts to form an administration, Dec. 20, and the Peel administration, with the exception of Lord Stanley, returned to office. He had been summoned to the House of Peers as Baron Stanley, in 1844. He resigned the colonial secretariatship, and was succeeded by Mr. Gladstone, Dec. 20, 1845. The Earl of Lincoln succeeded Sir Thomas Fremantle, Bart., as chief secretary for Ireland, Feb. 14, 1846. Sir Robert Peel carried the repeal of the corn laws; but this change in his policy produced a division amongst his followers, the two parties being afterwards called Peelites (q.v.) and Protectionists (q.v.). The latter availing themselves of the opportunity afforded by
the second reading of the Irish Coercion Bill voted against ministers, who were defeated by 292 to 219. The division took place early in the morning, June 29, 1846, the day on which the bill for the repeal of the corn laws passed the House of Lords. The resignation of the Peel administration was announced in both houses of parliament June 29. (See RUSSELL ADMINISTRATION.)

PEELITES.—This name was given to that section of the Conservative party which, after the rupture caused by the repeal of the corn laws (q.v.) in 1846, adhered to Sir Robert Peel. They were thus designated as opponents to the Protectionists (q.v.).

PEER-O-DAY-BOYS. — This Irish faction originated at Market-hill, in Armagh, July 4, 1784. (See DEFENDERS.)

PEERS AND PEERAGE. — The nobility of the realm, consisting of barons, dukes, earls, marquises, and viscounts (q.v.), are called peers, or equals, because they enjoy an equality of right in all public proceedings. They are created either by tenure, by writ, or by patent. Peersage by tenure originated at the Norman conquest, when the land was divided between the followers of the Conqueror. The earliest peerage by writ is of A.D. 1266, when a writ of summons to parliament was issued by Henry III. The first peer created by patent was John de Beauchamp, who was made baron of Kidderminster by Richard II. Oct. 10, 1397. Peers are exempt from arrest in civil, but not in criminal cases. In cases of treason and felony, they can only be tried by their fellow peers; but in misdemeanours they are tried by an ordinary jury. Peeresses are tried by the same tribunals as peers, by 20 Hen. VI. c. 9 (1422). By 4 & 5 Vict. c. 22 (June 21, 1841), peers convicted of crimes were rendered liable to the same penalties as commoners. The elevation of Sir James Parkes to the peerage for the term of his natural life, by the title of Lord Wensleydale, Jan. 16, 1896, led to the appointment of a committee by the House of Lords to inquire into the legality of life-peerages. A report, deciding that such peerages could not entitle their holders to sit or vote in parliament, was presented Feb. 25, in consequence of which Lord Wensleydale received a patent with the usual remainder to “the heir male of his body lawfully begotten,” the following July. The peers of Scotland are regarded as forming part of the nobility of Great Britain. By the 23rd article of the Act of Union, 5 Anne, c. 8 (1706), sixteen of their number are permitted to sit in the House of Lords as representatives of the rest. As this act limits the right of election of these representatives to the Scotch peers then existing, it follows that no new Scotch peerages can be created. The Irish peers also form part of the nobility of the realm; and by the 4th article of the Irish Act of Union, 39 & 40 Geo. III. c. 67 (July 2, 1800), four of the Irish bishops and twenty-eight temporal peers are permitted to sit in the House of Lords. The same act permits the sovereign to create one new Irish peerage whenever six of those existing become extinct; and when the number is reduced to 100 noblemen, every vacancy may be immediately supplied. Sir William Dugdale’s “Baronage of England,” which was published in 1675–6, is the earliest work on the English peerage. The first edition of Collins’s “Peerage” was published in 1709.

PEGU (Asia), capital of a province of the same name, was besieged by the Burmese, and capitulated A.D. 1757. The British obtained possession of Pegu in 1824, and, having restored it at the conclusion of the war with Burmah, it was again taken and retained Nov. 21, 1852. The whole province was annexed, and the close of the war officially proclaimed, June 30, 1853.

PEIHO (China). — An attempt to force a passage up the mouth of this river by Admiral Hope, June 24, 1859, was resisted by the Chinese forts, and resulted in a disastrous repulse. The English lost twenty-five men killed and ninety-three wounded on board the gunboats, and sixty-four killed and 252 wounded in the attempt to effect a landing. The Taku forts at the mouth of the Peiho were captured by the allied French and English squadron Aug. 21, 1860.

PEKIN (China). — Zenghis Khan and his Mongols, when the inhabitants, for want of ammunition, are said to have discharged ingots of gold and silver upon their assailants, A.D. 1214. Kublai Khan rebuilt it, and made it his capital in 1290. A British embassy, intrusted to Lord Macartney, arrived Sept. 14, 1793. The city was entered by the allied armies of France and England, Oct. 12, 1860. A convention was signed Oct. 24, and they evacuated Pekin Nov. 5, 1860.

PELAGIANISM, so named from Pelagius, its founder, who began to disseminate his heresy at Rome A.D. 404; was examined by a council at Jerusalem, and another at Diospolis, in both of which the tenets passed without condemnation, in 415. It was condemned by a council at Carthage, eighteen bishops in Italy were deposed for their adherence to it, and Pelagius himself was banished from Italy by the emperor Honorius in 408. When it was extended into Britain, two Gallic bishops were called over to suppress the doctrine in 442. A conference was held at Verulam between its supporters and the orthodox party in 446, and the Pelagians were banished from Britain in 452. The council of Orange decreed the doctrine of Augustine, in opposition to Pelagianism and Semi-pelagianism, to be established, July 3, 529. Their decree was confirmed by the council of Valentia, and by Pope Boniface II. in 530.

PELAGONIA (Macedonia). — The name at first applied to a district, was afterwards conferred upon the chief town of the Pelagonies, and the capital of the Fourth Macedonia.
PELASGI, an ancient race spread over Greece, and the islands of the Ægean Sea, are first mentioned by Homer as furnishing a contingent under Achilles at the siege of Troy, B.C. 962. Niebuhr considers them to have been the original inhabitants both of Greece and Italy.

PELEKANON (Battle).—Orchan I. defeated Andronicus III., who was wounded in the encounter, A.D. 1329.

PELEW ISLANDS (Pacific Ocean) were first brought into notice (although long previously known to the Spaniards) through the wreck of the Antelope, East-Indianman, A.D. 1785. Prince Lee Boo, son of king Abba Thulle, who had been intrusted by his father to Captain Wilson, was brought to England, where he only survived five months, in 1784. The East-India Company sent information of the event to the islands in 1790, together with a present of live stock and culinary vegetables, which were found to have flourished well when the place was re-visited by an English vessel in 1798.

PELHAM ADMINISTRATION.—The death of the earl of Wilmington rendered fresh ministerial arrangements necessary, and Mr. Pelham, brother of the duke of Newcastle, was made first lord of the treasury and chancellor of the exchequer, Aug. 23, 1743. His colleagues in the cabinet were:—

Lord Chancellor ........ Lord Hardwicke.
President of the Council...Earl of Harrington.
Privy Seal ............... Earl Gower.
Lord Carteret.
Secretaries of State ..... 1 Duke of Newcastle.
Admiralty ............... 1 Earl of Winchelsea and Nottingham.
Ordnance ............... 1 Duke of Montague.
Paymaster of the Forces .Sir T. Winnington, Bart.

Earl Gower was succeeded by the earl of Cholmondeley, as lord privy seal, in December, 1743. Lord Carteret, who had succeeded to the title of Earl Granville, resigned Nov. 24, 1744, and the Pelham Administration was reconstructed. The chiefs of several parties coalesced; from which circumstance the new ministry was called the Broad Bottom Administration (q.v.).

PELIGNI, a people of central Italy, and, according to Ovid, of Sabine descent, are first mentioned in Roman history as having been attacked by the Latins, B.C. 343. They entered into a treaty of peace with the Romans B.C. 304; afforded them material aid against the Samnites at the battle of Sentium, B.C. 298; and raised volunteers for Scipio B.C. 205. At the outbreak of the Social war, B.C. 90, they joined the Marsi, making their chief city, Corfinium, the capital of the confederate states. They submitted to the Romans B.C. 88, and were soon after admitted to the franchise. In the civil war between Caesar and Pompey, their chief town, Corfinium, was garrisoned to oppose Caesar, B.C. 49; and they espoused the side of Vespasian against Titullus, which was their last appearance in history, A.D. 69.

PELLA (Macedonia).—Philip II. made this a royal residence, and Alexander the Great was born here in July, B.C. 356. Æmilius Paulus took it B.C. 168, and it became a Roman colony.

PELLA (Palestine), also called Batis, is said to have been colonized by Macedonians. Antiochus III. (the Great) took it B.C. 198, and it was destroyed by Alexander Januæus, king of the Jews. Pompey restored it, and the Jews took refuge here when Jerusalem was threatened.

PELOPONNESIAN WAR, between Athens and Sparta at the head of a confederacy, commenced with the siege of Potidæa by the Athenians, B.C. 431. The contest continued twenty-seven years, and was terminated by the defeat of the Athenians at Ægospotami, when Lysander sailed to Athens, compelled it to surrender, and demolished the walls, B.C. 405.

PELUSIUM (Egypt).—The modern Tineh, called Sin by the Hebrews (Ezekiel xxx. 15), and by the Copta Peromi. The Assyrians, under Sennacherib, encamped under its walls, when the field-mice gnawed asunder their bow-strings and shield-straps, about B.C. 715. Cambyses took it when he invaded Egypt, B.C. 525, and it fell before the Persian arms B.C. 465. Alexander the Great entered it B.C. 333. It was captured by the Persians B.C. 309, and by Antiochus Epiphanes B.C. 173. When Amron subdued the country, A.D. 618, it surrendered, and afterwards fell into decay.

PELWORM.—This island, belonging to Denmark, was detached from the larger island of Nordstrand by a flood in 1634.

PEMANKON (Battle).—John Ducas Vataxes, emperor of Nicea, defeated the Latin emperor, Robert of Courtenay, in this battle, fought A.D. 1224.

PEMBROKE (Wales).—The shire of which this town is the capital was a county palatine until A.D. 1536. The castle, a Norman structure, was widened into the hands of Gilbert Strongbow, who received the title of earl of Pembroke from Henry I. in 1107. It was captured in 1648, after a six weeks' siege, by Cromwell. Henry VII. was born in the fortress in 1456. In the suburbs are the ruins of a priory founded in 1098. The royal dockyard was removed from Milford to this place in 1814.

PEMBROKE COLLEGE (Oxford), built on the site of Broadgate Hall, and sometimes called Segrin, or Segreve Hall, was established by letters patent, June 22, 1624. The chapel was consecrated in 1732.

PEMBROKE HALL (Cambridge) was founded under the name of Valence-Mary, by Mary de St. Paul, widow of Aymer de Valence, earl of Pembroke, A.D. 1347. The chapel, built by Matthew Wren, bishop of Ely, from the designs of his nephew, Sir Christopher Wren, was consecrated in 1665.

PENAL SERVITUDE.—An act substituting penal servitude for transportation (16 & 17 Vict. c. 99) was passed Aug. 20, 1853. It took effect from Sept. 1, 1853, and was
amended by 20 & 21 Vict. c. 3, June 26, 1857.

Penance.—The practice of performing penance as expiation for sin was introduced into the Roman Catholic church about the middle of the 2nd century. The laws on the subject subsequently became so numerous, that they were compiled into a separate code by John Jenuitar, patriarch of Constantinople, about the year 535. Bingham states that the performance of penance always necessitated the penitent to assume sackcloth and ashes, and either to shave the head, or wear the hair dishevelled. It is one of the seven sacraments of the Roman Catholic church.

Penang, or Prince of Wales' Island (Strait of Malacca), was bestowed by the king of Kedah as a marriage portion on Captain Francis Light, an Englishman who had married his daughter, a.d. 1785. He transferred it to the East-India Company, and was made governor July 7, 1786. It was made an independent presidency in 1805; and, with other settlements in the strait, was again brought under the government of Bengal in 1850. It was placed under the general government of India in 1851.

Peninsular War.—Application for aid against the French invaders having been made by Spain, Sir Arthur Wellesley sailed from Cork with 10,000 men, July 12, 1809, landing at Figueras by Portugal, Aug. 1. He defeated the French at Vimeira Aug. 21. A convention called the convention of Cintra, by which Junot agreed to evacuate Portugal, was signed Aug. 30. The British army entered Lisbon, and Wellesley obtained leave to return home in September. The command of 20,000 men having devolved upon Sir John Moore, he commenced his retreat before Soult, and reached Corunna Jan. 13, 1809. A battle was fought, in which Moore lost his life, Jan. 16; and the embarkation of the troops was completed Jan. 18. Sir Arthur Wellesley again received the command, and arrived at Lisbon April 22, 1809. After several successful campaigns, the French were finally driven out of the country April 5, 1814.

Pensacola (Spain) capitulated to the French marshal Suchet, with seventy-four pieces of cannon and 1,000 men, in February, 1812. It was strengthened and garrisoned June, 1813, and was invested by the Spaniards in March, 1814; but held out till after peace had been concluded in April, 1814.

Penitence.—The order of Penitence of St. Magdalen was founded by Bernard, a native of Marseilles, for the reformation of fallen women, a.d. 1272, and was constituted by Pope Nicholas III. under the rule of St. Augustine.

Pennsylvania (North America) was first settled by the Swedes and Finns, a.d. 1627. They were reduced by the Dutch in 1655; and the whole territory, under a Dutch rule in 1664. It was granted by letters patent to William Penn, in consideration of a debt due by government, March 4, 1681. He founded Philadelphia in 1682, where the delegates of the colonies assembled to resist taxation by the mother country in 1774. The constitution was adopted Dec. 13, 1776.

Penn.—This coin, originally of silver, is first mentioned in the laws of Ina, king of Wessex, a.d. 688. It was reduced by Edward III. from twenty-two and a half to twenty grains in weight, in 1346. The first legal copper coin was introduced in the reign of James I. about 1609.

Penn Post.—The “metropolitan penny post” was set up a.d. 1681, by Murray, an Hsworthen, who assigned his interest to William Dowicka, a London merchant, in 1683. It was decided in 1697 that its revenues formed part of the general post, and Dowicka was appointed comptroller. A pension of £500 per annum for ten years was awarded to him in 1702. An additional penny was authorized by law to be laid on letters for the villages round London in 1727; and the metropolitan rate was raised from a penny to twopence in 1801. A uniform rate of a penny on inland letters, to take effect from Oct. 5, 1840, was established by 2 & 3 Vict. c. 32 (Aug. 17, 1839). A treasury minute was accordingly issued Nov. 12, 1839; fixing the rate of postage at fourpence per half-ounce, to take effect on and after Dec. 5. The uniform rate of one penny for the United Kingdom came into operation Jan. 19, 1840.

Penon de Vizela (Morocco) was founded by Pedro of Navarre, a.d. 1608. The Moors seized it in 1522, and the Spaniards regained possession in 1664.

Pen, Penna., or Petworth (Battle).—Cenwalch, king of Wessex, defeated the Britons in this battle, fought a.d. 658.

Penruddock's Rebellion, in favour of monarchy, was suppressed in Devonshire, whither the royalists had retreated, Colonel John Penruddock being taken, amongst others, and executed, May 16, 1655.

Pensacola (North America).—This town in Florida was captured by the Spaniards May 10, 1751.

Pensionary Parliament.—This name was given to the second parliament summoned by Charles II., from the number of pensions conferred during the session. It met May 8, 1661, and consisted of sixteen sessions, the last of which terminated Dec. 30, 1678. It was dissolved Jan. 24, 1679, and has also been called the Long Parliament.

Pension List.—To prevent the crown from burdening the revenue with improvident grants, a law (1 Anne, c. 7) was passed, regulating all those made after March 25, 1702; and a civil list was settled on George III. in lieu of the larger branches of the hereditary revenue in 1760. The pension list was examined by a committee of the House of Commons in 1897.

Pentateuch, or the five books of Moses, were written by the Hebrew lawgiver about B.C. 1432.

Pentecost, or Feast of Weeks, observed seven weeks after the Passover, was
established by Moses, at the command of God, B.C. 1486 (Lev xxiii. 15). The Holy Ghost descended upon the apostles at Jerusalem, according to the promise of our Saviour, on the day of Pentecost, May 26, A.D. 30 (Acts ii. 1–6).

**PENTLAND HILLS** (Scotland).—An insurrection having broken out in Scotland, on account of the feelings of hatred entertained towards Archbishop Sharp, the insurgents were defeated here Nov. 28, 1666.

**PENZANCE** (Cornwall) received a charter for a market and fair A.D. 1332; was incorporated in 1615; was burnt by the Spaniards in July, 1588; and was taken by Fairfax, the parliamentary commander, in 1646. Sir Humphry Davy was born here Dec. 17, 1778.

**PEPPER** is first noticed by Hippocrates, B.C. 460—357. It was a favourite ingredient in Roman cookery. Alaric demanded 3,000 lb. weight of pepper as a portion of the ransom of Rome, A.D. 409.

**PERA.**—The residence of the English ambassador is situated in this suburb of Constantinople, which suffered severely from a fire A.D. 1831, when the ambassador’s residence was destroyed. Pera has since suffered severely from conflagrations. (See **GALATA**.)

**PERCEVAL ADMINISTRATION.**—On the death of the duke of Portland, Oct. 30, 1809, Mr. S. Perceval became first lord of the treasury. The cabinet was thus constituted:

- First Lord of the Treasury: Mr. Spencer Perceval.
- Chancellor of the Exchequer: Lord Eldon.
- President of the Council: Earl Canning.
- Privy Seal: Earl of Westmorland.
- First Secretary: Mr. Richard Ryder.
- Foreign Secretary: Marquis of Wellesley.
- Colonial Secretary: Earl of Liverpool.
- Admiralty: Lord Mulgrave.
- Ordnance: Earl of Chatham.
- Board of Trade: Earl Bathurst.

Lord Mulgrave became master-general of the ordnance May 1, 1810, and was replaced at the Admiralty by Mr. Charles Yorke, June 23. Viscount Melville succeeded Mr. Charles Yorke at the Admiralty in March, 1812. Viscount Castlereagh became foreign minister, in place of the marquis of Wellesley, who resigned; and Viscount Sidney became President of the Council in April, 1812. As the prime minister, Mr. Perceval, was entering the lobby of the House of Commons, May 11, 1812, he was shot by a man named Bellingham. Death was almost instantaneous. (See **LIVERPOOL ADMINISTRATION**.)

**PERCussion GUNS.**—The substitution of detonating powder for flint and steel in discharging firearms was the invention of the Rev. A. J. Forsyth, of Balhelvie, Aberdeenshire, whose patent was dated April 11, 1807. Percussion-cap guns were introduced into the French army in 1830.

**PERED (Battle).**—The allied Russian and Austrian army defeated the Hungarians, commanded by Georgey, in this battle, fought June 20, 1849.

**PEREKOP** (Russia).—The Tartar lines, extending across the Isthmus of Perekopef, from the Sea of Azof to the Black Sea, were forced by the Russian marshal Münnich, May 27, 1736. The fortress of Perekop, situated on the isthmus, was assailed by Marshal Lacy, and capitulated at the end of two days, July 10, 1738. It was carried by assault, against a defending army of 50,000 Tartars and 7,000 Turks, the Russian assailants being commanded by Prince Dolgorucki, in 1771.

**PERE-la-CHAISE** (Paris).—This most important cemetery of the French metropolis is named after Pere-la-Chaise, the confessor of Louis XIV., who occupied a house on its site. The ground had for about a hundred and fifty years been the property of a convent of Jesuits, who were compelled to sell it to pay their debts, A.D. 1763. In 1800 it was purchased by the municipality of Paris, who employed M. Brongniart to convert it into the French National Cemetery. It was consecrated in the early part of 1804, and was first used for interments in May, 1821. On the approach of the allied armies to Paris in 1814, Pere-la-Chaise was strongly fortified by the pioneers of the schools of Alfort, who were, however, driven from their position by the Russians, March 30.

**PERfUMERY.**—The use of perfumes is of the highest antiquity, as they were employed by the Egyptians in the embalming of the dead, and by the Jews in the service of the temple. Babylon was celebrated by the ancients for the excellence of its perfumes. The Greeks and Romans used them extensively, and regarded them as an offering acceptable to the gods, and their poets always accompany the description of the appearance of any of their divinities by a notice of the ambrosial odours with which they were diffused. The taste for perfumes reached its height in this country in the reign of Elizabeth, whose sense of smell was remarkably acute, and pomander balls and pounce-boxes figure largely in the writings of her time. Perfumery was taxed, and dealers were compelled to take out a licence by 26 Geo. III. c. 49 (1786).

**PERGAMUS, or Pergamum** (Asia Minor).—This city is said to have been founded by a colony of Arcadians, and to have been named after Pergamus, a son of Pyrrhus. The city, with the surrounding districts, was formed into a kingdom by a Paphlagonian enmarch, named Philætæus, B.C. 283. Lysimachus, one of Alexander’s generals, had selected this place for the reception of his treasures, amounting to nine thousand talents, and he committed its government to Philætæus, who revolted. Attalus, one of his successors, who assumed the title of king, and whose name became proverbial for wealth, died B.C. 197. Eumenes II., his son, who rendered it a large and powerful kingdom,
and collected a library only inferior to that of Alexander, died B.C. 159. It was bequeathed to the Romans by Attalus III. B.C. 153, and, having reverted, was subjudice and made a Roman province under the name of Asia, B.C. 130. It contained one of the seven churches of Asia, mentioned Rev. ii. 12 (A.D. 96). A council was held here in 152.

</table>

**PERGE, or PERGE (Pamphylia).—** At this city, renowned for the worship of Artemis, Paul and Barnabas preached with great success (Acts xiii. 13 and xiv. 25), A.D. 45. The town, in the old province of Pergina, stands near the site of the Roman Vesuna, the capital of the Petcorri. Louis IX. ceded it to the English, from whom it was finally wrested by Charles V. It was a stronghold of the Huguenots, and was annexed to the French crown in 1653.

**PERME, or MEHUN (Strait of Bab-el-mandab).—** This island, commanding the entrance of the Red Sea, was occupied by the English A.D. 1799, on account of the French invasion of Egypt. The English withdrew in 1801. Another English expedition landed here Feb. 1, 1857, and took formal possession Feb. 14.

**PERTHUS (Thraco), originally a Samian colony, was founded, according to Syncellus, B.C. 599, but Panolta places its origin as early as B.C. 1000. It was taken by the Persians B.C. 506, besieged B.C. 340 by Philip II. of Macedon, who was compelled to abandon the enterprise B.C. 339. The Romans were totally defeated by Phryrus in the plain near this town, B.C. 280. An alliance with Rome was formed B.C. 278. It assumed the name of Heraclea in the 4th century of the Christian æra, and its old imperial palace and aqueducts were restored by the emperor Justinian, A.D. 527—565.

**PERIPATETIC PHILOSOPHY.**—This school of philosophy was founded by Aristotle the Stagirite, who became a pupil of Plato B.C. 367. He was appointed tutor to Alexander of Macedon, at that time a minor, B.C. 342, and was assigned the Lyceum at Athens as a school wherein to teach his disciples, B.C. 333. Having been charged with impiety and condemned to death, he fled to Chalcis, where he died, B.c. 322. From his habit of giving lessons while walking in the groves of the Lyceum at Athens, his system has received the title of the Peripatetic school.

**PERISABOR (Assyria).—** This city, also called Anbar, was destroyed by Julian during his invasion of Assyria, A.D. 363.

**PEJURY.**—The Levitical law punished the crime of willful perjury with death (Lev. v. 1). The Greeks had severe laws against it; but it was, notwithstanding, so common amongst them that Greca fidus became a proverbial expression for false witness. Other ancient nations punished it with death or fines; but most frequently it was regarded as an offence of so serious a nature that the criminal was left to the justice of the gods. The early Christians had various laws on the subject; by some of which it was atoned by severe penances, while others rendered the perjurer excommunicate for life. The Anglo-Saxons inflicted whipping, and sometimes death, on perjurers. By 11 Hen. VII. c. 25 (1494), perjury committed by unlawful maintenance, imbracing, or corruption of officers, or in the chancery, or before the king's council, shall be punished by the discretion of the lord-chancellor, treasurer, both the chief justices, and the clerk of the rolls; and if the complainant prove not, or pursue not his bill, he shall yield to the party who redressed his costs and damages. By 5 Eliz. 9 (1562), perjurers were rendered liable to six months' imprisonment, with a fine of £40, and in default of payment, to have both ears nailed to the pillory. By 8 Geo. I. c. 6 (1722), a quaker making a false affirmation incurred the penalties of a wilful perjurer. By 2 Geo. II. c. 25, s. 2 (1729), the judges were empowered to sentence persons convicted of this crime to transportation or imprisonment for seven years; and the modes of indictment and prosecution were regulated by 23 Geo. II. c. 11, ss. 1 & 2 (1749). The last-mentioned act was amended by 15 & 16 Vict. c. 100, s. 19 (Aug. 7, 1851). The Abolition of Oaths bill, 5 & 6 Will. IV. c. 62 (Sept. 9, 1835), declares the making of a false declaration to be a misdemeanour.

**PERNAMBUCO (Brazil).—** This city, properly composed of the distinct towns of Recife and Olinda, was founded by Duarte Coelho, A.D. 1530, and was seized and occupied for thirty days by the English in 1594. It was taken by the Dutch Feb. 16, 1630, and was the scene of an insurrection in 1661, when the governor was arrested by the populace, and sent home to Portugal. In 1676 it was erected into a bishop's see. An insurrection resulted in the flight of the governor, Nov. 7, 1710. Insurrections occurred here in March, 1817, in 1821, and 1829.

**PERNAU (Russia).—** Charles XII. of Sweden landed here Oct. 17, 1700, in his campaign against the Russians.

**PERONNE (France).—** Charles the Simple died a captive in its castle A.D. 927. Charles, duke of Burgundy, held Louis XI. prisoner here in 1468, extorting from him (Oct. 14) a treaty by which he abandoned the sovereignty of Burgundy, and consented to aid in the suppression of the revolt which he himself had excited in Liége. The assembly of notables that met at Tours in November, 1470, declared the treaty null and void, and pronounced the duke of Burgundy guilty of high treason. Peronne was unsuccessfully besieged by the troops of Charles V. in 1536; and here the Roman Catholic league was organized by the duke of Guise in 1576. Never having been captured, it was formerly
styled La Pucelle (the maiden), a designation rendered no longer appropriate, as Wellington carried it by assault June 26, 1815.

PERPETUAL EDICTS.—One was compiled under the directions of the emperor Hadrian, by Salvius Julianus, A.D. 132; another, stipulating terms of peace between Spain and the Netherlands, was signed at Marche-en-Famenne Feb. 12, and at Brussels Feb. 17, 1577. The brothers John and Cornelius De Witt induced the States of Holland to pass a perpetual edict abolishing the office of stadtholder, A.D. 1667; but the aggression of Louis XIV. caused it to be repealed July 3, 1672.

PERIGNAN (France), said to have been founded A.D. 1068, was taken by Louis XI. in 1474. It was restored to Spain, but re-taken by France in 1642; and ceded to that country with the province of Roussillon, by the treaty of the Pyrenees, Nov. 7, 1659. The university was founded by King Pedro in 1549, and a council was held here in 1408. Its defences were thoroughly repaired in 1823.

PERSSARUM.—The nobles of Armenia rebelled against Artaurus, abdicated in A.D. 440, and reduced his kingdom to a province of Persia, under the name of Persarmania.

PERSECUTIONS.—The most important are the ten general persecutions to which the early Christians were subjected by the Roman emperors. They are as follows:—

A.D. 64. The Christians are first persecuted by Nero, on a charge of having set fire to Rome. Tacitus enumerates crucifixion, burning alive, and baiting by dogs and wild beasts, among their tortures.

25. The second persecution, under Domitian, commences with the banishment of his uncle Domitilla, and the execution of the consul Clemens.

104. Trajan persecutes.

165. Marcus Aurelius oppresses the Christians.

198. Septimius Severus publishes his edict against the Christians.

235. The favourite of Alexander Severus is barbarously massacred by Maximin. From the circumstance of there being many Christians among them, the event is stigmatised a persecution.

249. The emperor Decius exceeds all his predecessors in the severity of his persecutions.

257. Valerian adopts severe measures against the Christians.

273. Aurelian publishes edicts against Christianity.

303. Feb. 24. Diocletian publishes his first edict against the Christians, ordering the demolition of their churches and the execution of all who refused to renounce their worship. The persecution thus commenced was continued with great barbarity for ten years.

PERSEPOLIS (Persia), supposed to have been from the earliest times the capital of Persia, contained the magnificent royal palace which, together with a large portion of the town, was burnt by Alexander the Great in his drunken frenzy, B.C. 331.

Persia, according to the national traditions of this country, its first king was Mah-a-bad, who taught the inhabitants agriculture and the manufacture of metals, and introduced other arts of civilization; but the most general opinion is that the monarchy was founded by Kaiomurs. Councils were held in Persia, A.D. 499, in 544, and 553.

B.C. 2160. Kaumarath, or Kaomaures, founds the Pischadian dynasty.

1740. Parhang, king of Turan, invades Persia with an army of 400,000 men, defeats Noder, and establishes his own son Afrasiah on the Persian throne.

1730 (about). Afrasiah retires to his own country, and is succeeded in Persia by Zu or Zobad.

1615. Ars-libaz invades Persia, and finally subverts the Pischadian dynasty.

429. Kai-Kohad, or Cyaxares, expels the Turani from Persia, and establishes the Kainianite dynasty.

460 (about). Persia is invaded and made tributary to the Scythians.

612. Kai-Kohad expels the Scythians.

726. He takes Nineveh.

935. Kai-Kohad, King of Persia, is defeated and made prisoner by the king of Turan, from whom he is rescued by Rustem.

956. Egypt, Syria, Arabia, and Asia Minor, are subjected by the Persians.

959. Cyrus, or Kai-Khooros, becomes king of Persia, and defeats the Assyrians and Babylonians.

1048. On the death of Cyaxares II. of Media, that country is annexed to Persia by Cyrus.

1485. Cyrus destroys the Egyptians at the battle of Thermopylae.

1495. Cyrus seizes Sardis and takes Crousus, king of Lydia, prisoner.

1495. Cyrus annexes Lydia and Asia Minor to his empire.

338. Cyrus conquers Babylon.

380. Phoenicia is annexed to Persia. The religion of Zoroaster is established about this date.

526. Cambyses conquers Egypt and reduces it into a Persian province.

526. Cambyses is slain by accident, and the sovereignty is usurped by Smerdis the Magian.

521. Assassination of Smerdis by seven conspirators, the chief of whom, Darius Hystaspes, ascends the throne.

517. Darius I. takes and destroys Babylon.

515. Darius I. makes Macedon, Thrace, and the country north of the Indus, tributary to his power.

510. The Persians are defeated in the Persian war.

496. The Athenians assist the Ionian rebels against Persia.

497. War is commenced between the Persians and Greeks.

498. The Greeks are defeated in the naval battle of Lade.

500. Mardonius invades Greece and is defeated both by sea and land.

516. Datis and Artaphernes invade Greece with the army of the Persians. [See MARATHON.]

518. The Egyptians revolt.

545. Xerxes I. suppresses the Egyptian insurrection.

545. Xerxes I. invades Greece. [See ARTAXERXES I., SALAMIS, AND THERMOPYLÆ.]
401. The Spartans send an army into Persia to assist the rebel Cyrus, who is defeated and slain at the battle of Cunaxa (q.v.), and his Greek allies, under Xenophon, commence the memorable retreat of the Ten Thousand (q.v.).

402. Abaranit is established as the king of Sparta, invades Persia, and gains many important victories.

403. The Spartans are defeated by the Persians and Athenians at the naval battle of the Cape Graphe (q.v.).

404. Clazomenae and the Greek colonies of Asia Minor are restored to Persia by the peace of Antaleitadas (q.v.).

405. The Thracians render themselves independent of Persia.

406. Artaxerxes I., or Ochus, disgraces his accession by murdering all his relations and many of the nobility.

407. The Thracians assist Artabazus in his revolt against Artaxerxes Ochus.

408. The Sidonians revolt, but being on the point of defeat by Ochus, they burn their city and perish in the flames.

409. Ochus invades and subjugates Egypt.

410. Ochus, with all his family, is poisoned by Bagoas.

411. Persia is invaded by Alexander the Great. (See MACKDON.)

412. Oct. 1. Alexander makes himself master of Persia by his victory at Arbela (q.v.).

413. Darius II., or Carausus, is assassinated by Bagoas, and Persia is added to the Macedonian dominions.

414. On the death of Alexander, Persia is seized by Seleucus Nicator, king of Syria.

415. Persia passes under the Parthian dynasty of the Arsacide.

A.D.

223. Artaxerxes, or Ardashir, founds the dynasty of the Sassanides.

240. Ardashir abdicates in favour of his son Shapur I.

298. Shapur I. takes the Roman emperor Valerian prisoner.

303. The Roman emperor Carus invades Persia and subdues Mesopotamia and Ctesiphon.

307. The Roman emperor Galerius invades Persia and sustains a severe defeat from Narseh.

309. Galerius defeats Narseh, and compels him to surrender Mesopotamia, Kurdistan, and other provinces to Persia.

313. Christianity is prohibited in Persia.

333. War is renewed with Rome.

335. The Romans under Constantius II. sustain a decisive defeat at Farsa.

363. April 7. The emperor Julian invades Persia. June 26. He is killed while pursuing the fugitive Persians on the banks of the Euphrates.

366. Persia is added to Persia.

412. Yazdyjird I. reconquers Armenia.

420. The death of Yazdyjird I. is followed by a war of succession, which terminates in favour of Vahranes I., or Narses, V.

421. Arbela Felix is made tributary to Persia.

422. Another Roman war is commenced.

428. Armenia is permanently united to Persia.

429. The Hun invaders Persia.

438. Firoze and most of his sons fall in battle against the Huns.

502. Anastasius I. refuses to pay tribute to Kolod, the successor of Galerius, who declares war against the Eastern empire.

540. Chosroes I., or Nushirvan, invades Syria and sacks Antioch.

573. Dara is taken by the Persians.

575. Justinianus defeats Chosroes I. at the battle of Mithylene.

588. Philippicus gains a great victory over the Persian invaders of Scythia.

590. Baharam heads a general insurrection against Hormuz, or Hormidas, who is deposed and put to death.

597. Chosroes II. invades Persia.

611. Chosroes II. overruns Syria.

614. He completes the conquest of Palestine.

619. He conquers Egypt and Asia Minor.

622. Heraclius invades Persia and defeats the Persians at Beder and Oudna.

628. Chosroes II. is murdered by his son Siroes, and peace is concluded with the Eastern emperor.

629. Ardashir, the last male descendant of the Sassanides, is murdered.

636. The Arabs invade Persia and gain the great battle of Cadis-eis, or Kudesh.

651. Yazdijird is betrayed to the Arabs, and the whole of Persia passes under the Saamoen yoke.

638. Tiberius revolts from the caliph, and establishes the Tabarist dynasty.

727. Yakoub-ben-Seis establishes the Saffarine dynasty.

784. Ismael Samanee establishes the Samanide dynasty.

819. The Bowides (q.v.) establish their authority in some parts of Persia.

817. Alp Tahir founds the independent principality of Chazerdiz.

1036. The Persian poet Ferdusi flourishes.

1036. The Seljuk Turks take Persia, and establish their dynasty.

1088. The Persians of Alp Arslan conquer Georgia and Armenia.

1157. Persia is convulsed with civil war.

1194. Defeat and death of Togrel, the last Seljuk sultan of Persia.

1223. Persia is subdued by the Mongols under Zenghis Khan.

1258. Holagou Khan, grandson of Zenghis, conquers and governs Persia.

1299. A terrible famine and pestilence ravage Persia.

1345. Bagdad is made the capital.

1350. Timour invades Persia.

1383. Timour completes the conquest of Persia.

1437. Jehan Shah conquers Georgia and great part of Persia.

1453. Death of the sultan Hyder in battle with the King of Shirwan at Gulistan.

1502. Ismael Shah Soof expels the Turks of the White Sheep, and establishes the Sjofte dynasty.

1514. Ang. the sultan Selim gains a great victory over the Persians at Kaiseron, or Shaldiran.

1519. Ismael reconquers Georgia.

1534. The Powlene defeat the Turks at the battle of Sultamash.

1571. Persia is again desolated by plague and famine.

1574. Cashin, or Karrin, is made the capital.

1584. Shah Abbas takes Cabin.

1590. Peace is purchased from the Turks by the cession of Georgia, Erivan, and Tabrecz.

1608. The district of Shirwan is annexed to Persia.

1606. Shah Abbas annexes Laristan and Kandahar to Persia.

1618. The Turks are defeated at the battle of Shihab, and are compelled to surrender Servia, Erivan, and Tabrecz.

1634. The Turks again take Erivan and Tabrecz.

1638. They take Bagdad and stain the victory by the massacre of 60,000 Persians.

1732. The Afghans defeat the Persians at the battle of Goolnabad and take Ismael. The throne is usurped by the Afghan chiefstan Mustafa Khan.

1734. June 23. A treaty for the partition of Persia is signed between Russia and Turkey at Constantinople.

1737. Nadir Shahnour expels the Afghans.

1734. Nov. 29. The Turks are defeated by Nadir Khouli, with the loss of 20,000 men, at Bagdad.
took possession of the city and erected a fortress in 1651. An attack upon churches and monasteries followed the preaching of a sermon by John Knox, May 11, 1559, and led to the introduction of a French garrison, who held Callao for Queen Mary. They capitulated to the reformers June 26, 1559. Here Prince Charles Edward proclaimed his father king, Sept. 4, 1745. (See Articles of Perth.)

PEL (South America).—The national traditions of Peru only date from the 12th century of our era, when monarchical government was introduced by the first Inca, Manco Capac, who is supposed by the natives to have acted by special divine appointment. Vasco Nunez de Balboa was first informed of its existence by a son of the cacique of Comogra in 1512, but was unable to effect any discovery. Part of the coast was explored by Pascual de Andagoya in 1522, and in Nov. 1524, Francisco Pizarro sailed from Panama on the first of those memorable voyages which resulted in the conquest of the country. The term Peru is said to be a corruption of Birii, the name of a native chieftain, with whom the Spaniards had dealings during their discoveries.

A.D.
1526. Pizarro reaches the coast of Peru, and returns to Panama.
1530. Dec. 28. Pizarro sails from Panama to conquer Peru.
1532. May. The first Spanish colony in Peru is established at St. Michael's. Nov. 16. Pizarro takes the inca Atahualpa prisoner.
1533. Aug. 8. Atahualpa is executed at Caxamca.
1544. March. A new system of laws, introduced by Vela, occasions civil war in Peru.
1545. Oct. 20. The new laws are revoked.
1718. The province of Quito is detached from Peru, and added to New Grenada.
1778. The provinces of Rio de la Plata, Potosi, Chile, Quito, and others, are separated from Peru, and erected into a distinct government.
1780. Tapo Amaru heads a formidable but fruitless insurrection against the Spaniards.
1822. May 24. The royalists are defeated at Pinchinche, Sept. 29. The Peruvian congress is formally installed, and San Martin resigns the protectorship.
1823. Sept. 1. Bolivar is invested with the chief authority at Lima.
1824. Dec. 9. The battle of Ayacucho (q. v.) secures the liberties of Peru.
1825. Jan. 23. Callao, the last Spanish stronghold in Peru, surrenders to the patriotic party.
1829. Feb. 27. The Peruvians sustain a heavy defeat from the Colombians at Tarqui, in Quito, in consequence of which a treaty is concluded between the two republics the following day.
1834. An insurrection under General Gararr is suppressed by General Miller.

PEL (Scotland), the ancient capital of the kingdom, enjoyed the privileges of a burgh a.d. 1106; was fortified by Edward I. in 1298, and besieged and taken by Robert Bruce in 1311. James I. of Scotland was murdered in the Black Friars' monastery, Feb. 20, 1437. The Gowrie conspiracy occurred here in 1600, and Oliver Cromwell 658
AD.
1853. Aug. 13. His army is totally defeated at Yacouba.
1856. Feb. 7. Salamay sustains another severe defeat, and is made prisoner, in the pass of Tingo. Feb. 18. He is executed.
1857. May 17. War is declared against Chili.
1858. Nov. 17. Peace is restored. The ports of Ecuador are declared in a state of siege.
1859. Oct. 9. Castiglia announces that he shall occupy Ecuador, unless a settled government is adopted.

PERUGIA, OR PERUSIA (Italy), is first noticed in history B.C. 310, when the Perugians shared in the great defeat of the Etruscans by the Romans at the Vadimonian lake. They allied themselves with the people of Clusium, and renewed the war against Rome B.C. 295; but, having suffered two defeats, were obliged to sue for peace, and by the payment of a large sum of money obtained a truce for forty years. Perugia afterwards became a dependency of Rome, and took a prominent part in the civil war between Octavian and L. Antonius B.C. 41. It was taken by Octavian, pillaged, and burnt, B.C. 40, and was restored by Augustus. The bishopric was founded A.D. 57, St. Herculanus, a follower of St. Peter, being the first bishop. The town was taken and occupied by Belisarius in 537; was besieged by Totila in 547, but held out for two years, and only surrendered after Belisarius had quitted Italy. It was recovered by Narses in 552. The university was founded in 1320. In 1416 Perugia came into the hands of Braccio da Montone. It was twice visited by the plague, viz., in 1349, when 100,000 persons perished, and again in 1524, when the celebrated poet Petrarco died. In 1512 it was united to the Papal States by Pope Julius II., and in 1540 the citadel was erected by Pope Paul III. The bronze statue of Julius III. was erected in 1555 in gratitude for his restoration of many of their privileges. The necropolis of Perugia was discovered in 1840.

PESELLIAN BANK. (See BARK.)

PESSARO (Italy), the ancient Pisaurum, of which town nothing is known previous to B.C. 184, when a Roman colony formed a settlement. It was one of the first places occupied by Caesar after his passage of the Rubicon B.C. 49. An earthquake destroyed the greater part of the town soon after the battle of Actium, B.C. 31. It was restored by Augustus. The manufacture of pottery, which existed at Pessaro from the time of the Roman emperors, was revived A.D. 1300 by Pope Boniface VIII., and attained great perfection under the duked of Urbino in the middle of the 17th century.

PESCHIERA (Italy).—This town of Mantua was captured by the Sardimans, May 30, 1848, and recovered by the Austrian army under Radetzky in March, 1849.

PESHAWAR (Hindostan), the capital of a province in the Punjab, was founded by the Mongol emperor Akbar. Runjeet Singh captured the place in 1818. The sepoy garrison mutinied Oct. 23, 1848, and expelled the resident, Major Lawrence.

PESIALLOZZIAN SCHOOLS of education, established by Johann Heinrich Pestalozzi, who was born at Zurich, in Switzerland, Jan. 12, 1746. He turned his farm into a school in 1775, and was compelled to give it up in 1780 from want of funds. At the request of the Swiss directory, he opened a second school in 1786 at Stanz, in Unterwalden, but was compelled to retire on account of ill health and the interference caused by the war. In 1800 he founded an educational institution at the castle of Burgdorf. It was broken up in 1825. Pestalozzi died Feb. 17, 1827.

PESHT (Hungary) was built by Arpad about A.D. 889, and walled in the 13th century. It was for nearly 100 years in possession of the Turks, who were finally expelled in 1586. An inundation of the Danube destroyed 1,200 houses in March, 1838. The Hungarian revolution broke out here Sept. 11, 1848, and Count Lamberg, the imperial commissioner, was murdered on the Buda-Pesth bridge, Sept. 23. Pesth, taken by the imperial forces Jan. 5, 1849, was evacuated by them April 21, and bombarded May 4. Near the city is the field of Rakos, where the national assembly of the Magyars met in the open air from 1288 to 1525. The Neugebaude, now used as barracks, was erected by Joseph II. in 1786. He also transferred the university from Oden to this city in 1784. The Ludovicien, a military school, was built in 1837, and the town-hall in 1844.

PESAUB (See Plague.)

PETALISMA.—This form of banishment, instituted by the Syracusans, was borrowed from the Athenian ostracism, the difference being that the names were written upon olive-leaves instead of shells, and the sentence lasted only five years. Petalism was abolished B.C. 452.

PETARD.—This implement of war, for forcing open the gates of towns, was first used by the French Huguenots at the siege of Cahors in 1579, and was soon afterwards introduced into England.

PETCHERANS, a Slavonic tribe, famous in Byzantine, Russian, and Hungarian annals from the 10th to the 12th century. After a vain attempt to enter Russia, they occupied the country between the Russian and Greek empires, and concluded a treaty of peace with Igor I. A.D. 920. They invaded Russia, for the first time, in 968, and laid siege to Kiev. It was on the point of surrendering from famine, when it was relieved by the Russians, and the siege was raised. They defeated Vladimir I. at Vasilef, on the Stugna, in 996, and in the following year they laid siege to Biegorod, 2 v 2
but were compelled to retreat. The emperor John II. drove them out of Thrace in 1122, and from that time they ceased to be formidable.

Petelia, or Petella (Battle).—Spartacus was defeated and slain by Crassus near this town, in Lucania, B.C. 71. It terminated the Servile war.

Petelia (Greece), the modern Strongoli, was an ancient city of Bruttium, founded, according to Greek tradition, by Philoctetes, soon after the Trojan war. It supported the Roman cause during the second Punic war, B.C. 216; was besieged by the Bruttians and Carthaginians, under Hamilco, and, having been abandoned by the Romans, was, after several months' resistance, compelled to surrender.

Peterborough (Bishopric) was established by order of Henry VIII., A.D. 1541.

Peterborough (Northamptonshire).—Penda, king of Mercia, having embraced the Christian religion, founded a monastery at this place, anciently called Medeshamstede, about A.D. 655. It was dedicated to St. Peter; and from this monastery the town was called Petriburgus,—hence its present name. Having been plundered and burnt by the Danes in the 9th century, it was restored in 970. The monastery was burnt Aug. 3, 1116. Here King Stephen summoned a council in 1138, and held his court in 1144. King John, in the tenth year of his reign, being displeased with the citizens of London, removed his exchequer to Peterborough. Edward I. held his parliament here in 1317. The cathedral was desecrated by the parliamentary forces in 1643. Peterborough has received numerous charters, which were all confirmed in 1796, when a new one was obtained.

Peterhead (Scotland) was founded by George Earl Marischal, A.D. 1593. James Francis Edward, the Pretender, landed here in 1715; and in the same year the estates of the Marischal family were forfeited in consequence of their adherence to the house of Stuart. The town-house was built in 1748. The south breakwater was constructed in 1773, and the north breakwater, commenced from designs by Thomas Telford in 1818, was, while in an unfinished state, nearly destroyed by a storm in 1819. It was, however, completed in 1822.

Peter le Port, or St. Peter Port (Guernsey).—Edward I. gave orders for a pier to be built here, A.D. 1274, for the benefit of the commerce of the island; but many delays took place, and the project was not executed until 1570. The church was built in 1312. Elizabeth granted a charter to the islanders, for the collection of petty customs, Aug. 28, 1550. It was confirmed by James I. June 15, 1605, and renewed by Charles II. Feb. 11, 1668. The town hospital was erected in 1742, and greatly enlarged in 1810. Port George was built after the commencement of the American war, in 1775. Queen Victoria landed at Peter le Port Aug. 12, 1859.

Peterloo Riot took place in St. Peter's Fields, near Manchester, Aug. 16, 1819. Nearly 100,000 persons, belonging chiefly to the labouring classes, had assembled in St. Peter's Fields, under the leadership of Henry Hunt, to petition for reform. The military were ordered to disperse them, when about six persons were killed and thirty or forty wounded.

Petersburg (America).—This town, in Virginia, was destroyed by a conflagration in July, 1815. The first cotton-mill was erected here in 1828.

Petersburg, St. (Russia), was founded by Peter the Great, from whom it takes its name, in May, 1703. The Swedes, under Charles XII., attacked it June 25, 1705, but failed; and in 1714 a triumphal procession took place in consequence of a naval victory gained over the Swedes. It was threatened by Gustavus III. of Sweden in June, 1788. The Hermitage palace, commenced in 1763, was finally completed in 1804. St. Petersburg was inundated by the river Neva, Nov. 19, 1824, when many lives were lost, and much property was destroyed. The imperial palace was totally destroyed by fire, Dec. 29, 1837.

Petersburg, St. (Treaties).—The following are the most important:

A.D.
1744. Feb. 9. An alliance between Russia and Poland.
1762. May 5. Peace is concluded between Russia and Prussia.
1766. June 20. A commercial treaty is concluded between Russia and Great Britain.
1772. Aug. 5. A convention for the partition of Poland is entered into by Russia, Austria, and Prussia.
1787. Jan. 11. A commercial treaty is signed between France and Russia.
1795. Sept. 25. A triple alliance is concluded between Great Britain, Russia, and Austria.
1805. April 11. A treaty against Buonaparte is concluded between Great Britain and Russia.
1812. April 5. An alliance against France is concluded by Russia and Sweden, the former country agreeing to unite Norway to the latter.

Peter's Pence, or Peter-Pence.—I., king of Wessex, is said to have imposed a tax of one penny upon every house in England, in order to found a school at Rome, about A.D. 720. It was called Rom-feoh, or Rome-scot. Offa, king of Mercia, levied a tax of one penny upon each house in his dominions possessed of thirty pence a year, for the support of the English school at Rome, in 797, and this being afterwards extended to all England, and claimed as a right instead of a gift, received the name of Peter's pence, or Peter-pence. The tax occasioned frequent disputes, and was finally abolished by 21 Hen. VIII. c. 21 (1534).

Peter's (St.) College, or Peter-house (Cambridge).—This most ancient college of Cambridge university was founded by Hugh de Balsham, bishop of Ely, for a master
PET

and fourteen fellows, A.D. 1257. Its charter was dated 1254. Andrew Perne founded two additional fellowships in 1589, Lady Ramsay two in 1601, and Thomas Parke four in 1637. Originally seven of the fellows of this college were obliged to be from the northern counties of England, and seven from the southern; but these restrictions were removed by letters patent, which took effect in June, 1639.

PETSWALDE (Convention), consisting of fourteen articles, was signed between England and Russia, at Peterswalde, in Silesia, July 6, 1813. It provided for the subsidies to be paid by England to Russia, for the maintenance of the German legion in the service of the Czar, and led to the last coalition of the allies against Napoleon I.

PETSWARDEIN, or PETSWARADIN (Austria), is said to have derived its name from Peter the Hermit, who assembled an army here for the first crusade, A.D. 1096. The Turks took the town July 15, and the citadel July 27, 1526, and Prince Eugene defeated the Turks with great slaughter here, Aug. 5, 1716. The Turkish commander and 30,000 of his troops were slain, and 250 pieces of heavy artillery captured. The Hungarians having seized it, the Austrians established a blockade, and it surrendered Aug. 17, 1849.

PETITIONERS. (See ABHORRENS.)

PETITION FOR RIGHT. (See BILL OF RIGHTS.)

PETITIONS.—By 13 Charles II. stat. 1, c. 5 (1661), no petition to the crown or parliament for the alteration of any matter of church or state established by law, was permitted to bear more than twenty signatures, unless it had previously been approved by certain stated legal authorities. The subject possessed a right to petition the crown, and by 1 Will. & Mary, sess. 2, c. 2 (1689), all prosecutions and commitments on account of exercising this right are invalid. The manner of proceeding upon electioneering petitions is prescribed by 11 & 12 Vict. c. 98 (Sept. 4, 1848).

PETRA (Arabia).—This city, the capital of Arabia Petraea, and the modern Wady Musa, is mentioned by Pliny as a great resort for travellers. It was subdued by Trajan's lieutenant, A. Cornelius Palma, and remained for many years under the dominion of the Roman emperors. Its neighbourhood abounds in ruins of the temples and mausoleums erected during the Roman occupation. Petra was an ancient episcopal see; Asterius, who occupied this diocese A.D. 547, being its first bishop.

PETRA (Colchis).—This town of the Lazi, in Asia Minor, was founded by Ioannes Tzibus, one of Justinian's generals. It was taken by Chosroes I., king of Persia, A.D. 541, and, after a protracted siege, was recovered by the Romans in 551, when it was finally destroyed. Its ruins are known by the name of Oudjenar.

PETROBULSANS.—The followers of Peter de Brueys, who preached in the south of France early in the 12th century, and after doing so for about twenty years, was burned at the stake at St. Gilles, in Languedoc, A.D. 1130. According to Peter the Venerable, who wrote a work to refute his errors in 1146, Peter de Brueys denied, "1. Infant baptism; 2. Respect for churches; 3. the Worship of the cross. The cross on which the Redeemer was so cruelly tortured ought rather to be an object of horror than of veneration. 4. Transubstantiation and the real presence. It is asserted, but not proved, that he rejected the Eucharist altogether: he probably retained it as a memorial rite. 5. Prayers, alms, and oblations for the dead. To these errors was added an aversion to the chanting and psalmody of the Church; he would perhaps replace it by a more simple and passionate hymnology."

PETROPAULOVSKI (Asiatic Russia), or, "the Harbour of St. Peter and St. Paul," the principal military station in the province of Kamtschatka, was bombarded Aug. 31, 1854, by the English and French squadrons. The attack was renewed Sept. 4, and a landing effected; but the expedition proved unsuccessful, and was abandoned Sept. 7. An English squadron was sent again in May, 1855, when the town and fort were found to be deserted, the Russians having carried off all their guns and munitions of war.

PEVENSEY (Sussex) was ravaged by the earl of Godwin A.D. 1049. William, duke of Normandy, landed here Sept. 28, 1066. King John granted it a charter April 27, 1208, and in the time of Henry III., 1220, it was a considerable port. The castle was besieged, but without success, by Simon Montford in 1265. James I. of Scotland, taken prisoner by Henry IV. in 1406, was confined in Pevensey Castle for 18 years.

Pews in churches were not known till after the Reformation. The first reading-pew is mentioned in Bishop Parkhurst's "Visitation of Norwich," A.D. 1506, and the first authority for setting up reading-desks is the canon of 1603. The earliest pew for the use of the congregation is one in the north aisle of Geddington St. Mary, in Northamptonshire, bearing date 1602. Another in the same church dates from 1604. Women's pews are mentioned in the parish accounts of Leverton, in Lancashire, for 1639, showing that the sexes were separated in church at that time.

PEFFENDORF (Battle).—The Austrians, under General Landohn, were defeated Aug. 15, 1760, at this place, in Silesia, with the loss of 10,000 men, by Frederick of Prussia.

PHALANX.—The celebrated Greek phalanx was brought to a state of perfection by Philip II., king of Macedon, in his Illyrian wars, B.C. 359.

PHANARIOTS.—Greek nobles of Constantinople, who sprung into existence soon after the capture of that city by Mahommed II., 661
May 29, 1453. They received this name because they resided in the Phanar, the quarter of Constantinople which surrounded the residence of the Greek patriarch.

Pharisees. — A Hebrew sect, whose name was derived from "Pharash," a Hebrew word signifying separated, because they made pretensions to superior strictness in religious observances. (Luke xviii. 9.) Their origin is involved in obscurity, though Josephus, himself a Pharisee, says they were a considerable sect in B.C. 110. He speaks of three sects as having been in existence B.C. 150,—the Pharisees, the Sadducees, and the Essenes.

Pharmacy. — The Egyptians, in the time of Osiris, were celebrated for their pharmacy, and the art was, at a very early date, in high estimation among the Chinese, who studied plants, boiled them in water, and prepared extracts. The first Pharmacopæa was published in 1618. The Pharmaceutical Society of London was instituted June 1, 1843, and obtained a charter Feb. 18, 1843. The constitution and management of this society, and the qualifications of pharmaceutical chemists, are regulated by 15 & 16 Vict. c. 56 (June 30, 1852).

Pharos (Egypt). — The name is said to have been derived from the pilot of Menelaus, who died here from the bite of a serpent, on his return from the Trojan war. Alexander the Great converted the island into a breakwater, B.C. 332, for his projected capital of Alexandria, and connected it with the mainland by an embankment a mile in length. The celebrated lighthouse, or tower of Pharos, commenced by Sostratus of Cnidos, B.C. 295, was completed in the reign of Tytone Philæphilus, B.C. 283.

Pharsalia (Battle). (See Pharsalus.) Pharsalus (Greece), considered by Leake to have been one of the strongest cities in Greece, is first mentioned after the Persian wars. It was besieged by the Athenian commander Myronides, B.C. 455, without success. Medius, tyrant of Larissa, took Pharsalus by force about B.C. 395. It was for some time in the possession of the Syrian monarch Antiochus, but surrendered to the Roman consul Acilius, B.C. 191. Pharsalus is chiefly memorable for the great battle fought on a plain in the vicinity, between Julius Caesar and Pompey, B.C. 48. The latter was completely defeated, and the victory made Julius Caesar master of the Roman world.

Pheres (Thessaly), celebrated in mythology as the residence of Ametus and his son Eumelus, the latter of whom took eleven ships to the Trojan war. About the end of the Peloponnesian war, Lycophon established a tyranny at Pheres, and sought to gain the dominion of all Thessaly. This was achieved about B.C. 374 by his son Jason, who was assassinated B.C. 370. Pheres, with the rest of Thessaly, became subject to Macedonia B.C. 352; it surrendered to Antiochus, king of Syria, B.C. 191, and it soon after fell into the hands of the Roman consul Acilius.

Philadelphia (Asia), the modern Allahshan, founded by Attalus Philæphilus of Pergamus, is mentioned in the Apocalypse (i. 1) as one of the seven churches of Asia. A.D. 16, it was subject to frequent earthquakes, and during the reign of Tiberius it was destroyed by one. The Turks assailed it frequently, and it was at last taken by them under Bajazet I. in 1390.

Philadelphia (North America). — The Swedes penetrated into the country bordering on Delaware Bay as early as A.D. 1627, and this city was laid out in 1682. According to the design of William Penn, it was to have rivaled Babylon in extent and splendour, but was restricted to its present boundaries by the charter of 1701. The old state-house was erected in 1735. Here the first congress assembled, Sept. 5, 1774, and adopted the Declaration of Rights, and here also was proclaimed, July 4, 1776, the Declaration of Independence. In the autumn of the same year the congress retired to Baltimore, and the city fell, Sept. 26, 1777, into the hands of the British, under Lord Cornwallis, who held it till June 18, 1778. The American Philosophical College was founded in 1740, and the Pennsylvania Hospital in 1750. A convention met here May 17, 1787, and agreed on a constitution for the United States, Sept. 17. In 1793 and 1798 the yellow fever ravaged the city. Philadelphia continued to be the capital of the United States till 1800, when it was superseded by Washington. The University of Pennsylvania was founded in 1791 by the union of two previous institutions, the first of which was erected in 1755. The first United States bank, now the Girard Bank, built of marble, in the Corinthian style, was erected in 1797. The Athenæum was founded in 1815; the Academy of Natural Sciences in 1817, and the Jefferson Medical College in 1824.

Philiphaugh (Battle). — The Royalists, under the duke of Montrose, were defeated with great slaughter by the Covenanters under David Leslie, at this village, in Selkirkshire, Sept. 13, 1645. The prisoners were butchered in cold blood, and some women captured after the battle were drowned by order of the preachers.

Philipseville (Algeria). — This town, in the province of Constantia, built from the ruins of the ancient Ruscide, was founded in October, 1838.

Philippi (Macedonia) derives its name from Philip, the father of Alexander, having been originally called Crenides, was under the dominion of the Thasians B.C. 360. In the plain of Philippi the celebrated battle was fought, B.C. 42, when Brutus and Cassius were defeated by Antonius and Octavius Caesar. This city was visited by the apostle Paul, accompanied by Silas, A.D. 48 (Acts xvi. 12—40), and again on departure from Greece in 56 (Acts xx. 6). The gospel for the first time gained a home
in Europe at Philippi in 62. The ruins of the city were visited by Dwight and Schaufler in 1839.

**Philippics**, a name given to the orations of Demosthenes against Philip, and afterwards applied to those of Cicero against Marc Antony. Demosthenes delivered his first Philippic b.c. 352, and the second b.c. 344. Cicero delivered fourteen Philippics against M. Antony, commencing September, b.c. 44.

**Philippine Company.**—This commercial company was formed in Spain a.d. 1785, with a capital of £2,000,000. Though many valuable privileges were granted to it by the crown, and a charter for twenty-five years, the speculation proved a failure.

**Philippines (Indian Archipelago).**—This group, consisting of about 1,200 islands, was discovered a.d. 1521, by Ferdinand Magalhaens, who gave it the name of the Archipelago of St. Lazarus. The Spaniards sent a fleet from Mexico in 1564, and made a settlement in the island of Zebu, naming the islands the Philippines, after Philip II. Another fleet, despatched to Luzon in 1570, effected a landing in the Bay of Manilla, and took possession of the town of Manila. The Spaniards having made an attack on the Sooloo pirates in 1590, were defeated with great slaughter. The English took Manilla Oct. 6, 1762, but restored it in 1763. Another expedition against the Sooloo pirates, who had committed many outrages, achieved a complete success in 1851.

**Philippolis (Turkey).**—This town of Thrace was founded by Philip of Macedon on the site of a town called Eumolpias or Ponorpolis. The Thracians obtained possession, and it remained in their hands until they were subdued by the Romans. Philipolis was taken by the Goths a.d. 250, after a long siege, during which 100,000 persons are said to have perished. The Turks under Amurath I. captured and annexed it to the Ottoman empire in 1363. It was almost destroyed by an earthquake in 1818, and suffered from an extensive conflagration in 1846.

**Philipsburg (Germany),** named after Philip von Sotern, archbishop of Spires, who founded it after the Thirty Years' war. The French took it July 21, 1754, and Marshal Berwick was killed under its walls. By an additional article of the treaty of Campo Formio, Oct. 17, 1797, the Austrians agreed to evacuate Philipsburg. It was besieged by the French under Bernadotte in 1799, the siege being raised April 7. It was again invested in August, the siege being raised Sept. 20. The French returned in 1800, and it was ceded to them by the convention of Hohenlinden, Sept. 28. It was afterwards restored to Prussia.

**Philistines.**—This ancient people, descended from Ham, the son of Noah, emigrated at a very early date from Egypt into Syria, where they gave the name to the country since called Palestine (q.v.). They reduced the Israelites to subjection b.c. 1156 (Judges xiii. 1), but were compelled to set them at liberty by Samson, who destroyed their chief nobility by pulling down the temple where they were assembled, b.c. 1117 (Jud. xvi. 30). In the time of Eli, b.c. 1116 (1 Sam. iv. 11), they seized the ark of the Lord, which they were compelled to restore by the miraculous plagues it brought upon them, and they sustained a severe defeat from Samuel at Mizpeh, b.c. 1096 (1 Sam. vii. 2–13). Throughout the reign of Saul they infested the Israelites (1 Sam. xiv. 52), and the death of that monarch occurred while fighting against them in Mount Gilboa, b.c. 1065 (1 Sam. xxxi. 4). David gained several victories over the Philistines, and Jehoshaphat made them tributary to him, b.c. 912 (2 Chron. xvi. 11); but in the reign of Jehoram they invaded Judah, and carried away the king's wives and sons into captivity, b.c. 888 (2 Chron. xxi. 17). They again invaded Judah, and took Bethshemesh and Ajalon, b.c. 740 (2 Chron. xxviii. 18), and subsequently were themselves invaded by the Assyrians and Egyptians, who took their strong city of Ashdod (q.v.). Pompey incorporated Philistria in the Roman province of Syria b.c. 62.

**Philosophy.**—The term philosophy, or the love of wisdom, was first employed by Pythagoras, who flourished b.c. 529; but philosophy itself is of much more ancient origin. It appears to have flourished in India and China in the most remote ages; and the earliest authentic histories we possess of the Egyptians and Assyrians represent their priesthood as highly versed in natural and speculative science, which they used to strengthen their power over the superstitious and the ignorant. Greek philosophy comprises the following schools:—the Academic, Alexandrian, Aristotelian, Cynic, Cyrenaic, Eclectic, Eleatic, Epicurean, Ionic, Megarian, Peripatetic, Platonian, Pythagorean, Socratic, and Stoic. The philosophy of the Romans was derived from that of the Greeks, but never attained equal celebrity. Domitian expelled all the philosophers from Rome a.d. 90. Mediaval philosophy commences with Boethius, who was born about the year 475. The Scholastic school originated in the 9th century, and for many years was the only system of orthodox philosophy. During the 10th century the influence of Arabian learning was felt throughout the civilized world, and Cordova became the intellectual capital of Europe. The Speculative school commenced about 1520, and the inductive method of Lord Bacon was published in the treatise on the "Advancement of Learning," in 1605. The most important modern systems of philosophy are the Cartesian, the Coper- nican, and the Newtonian.

**Philtee, or Philtra, a potion given by the Greeks and Romans to excite love. Lucretius is said to have died from drinking one, b.c. 52; and the madness of Caligula (a.d. 37–41) is attributed by some to a potion of this sort.
PHINTIAS (Sicily) was founded about B.C. 280, by Phintias, tyrant of Agrigentum, at the mouth of the river Hyrmas. He peopled it with the inhabitants of Gelq (q. v.), which town he utterly destroyed. It afforded shelter to the Roman fleet when attacked by that of the Carthaginians in the first Punic war, B.C. 249. Cicero mentions it as a seaport, carrying on a large trade in corn; but in Strabo's time it had fallen into decay.

PHOCIS (Greece).—This country, celebrated for the oracle at Delphi, which originally belonged to the Phocians, is said to have derived its name from Phocus, a son of Ornytion. The Phocians, having invaded Doris, B.C. 457, were compelled to retire by the Lacedaemonians, under Nicomedes. The Delphic oracle, which had been taken from them by the Delphians, was, through the assistance of the Athenians, restored B.C. 450. In the Peloponnesian war they were zealous allies of the Athenians, but, by the treaty of Nicias, B.C. 421, the temple was once more given into the hands of the Delphians. After the battle of Leuctra, B.C. 371, the Phocians became subject to the Thebans; but, having deserted the alliance, the Thebans, in revenge, induced the Amphictyonic council to condemn the Phocians to pay a fine, on the plea that they had cultivated the Cirrhean plain, B.C. 357. This they refused to do; the Amphictyonic council consecrated the Phocian territory to Apollo, upon which the Phocians seized the temple at Delphi, which led to the Sacred, or Phocian war. Their leader, Philomelus, was killed in a battle near the town of Neon, and was succeeded, B.C. 533, by his brother Onomarchus, who was killed B.C. 532, when his brother Phayllus assumed the leadership. They were at length conquered by Philip II. of Macedon, their towns given up, and themselves expelled from the Amphictyonic council, B.C. 344.

PHENICIA (Syria).—This maritime kingdom, one of the most ancient in the world, was originally peopled by the sons of Anak more than 25 centuries B.C. Some authorities state that Agenor was the first king of Phenicia, B.C. 1497; but all agree that the country itself was the seat of a great nation, and renowned for its naval enterprise at a much earlier period. A colony of Phenicians, led by Elissa or Dido, settled in Africa B.C. 875, and founded Carthage (q. v.). Phenicia was invaded by Shalmaneser, king of Assyria, B.C. 721; by Nebuchadnezzar, king of Babylon, B.C. 587; and by Cyrus, king of Persia, B.C. 538. The Phenicians subsequently assisted the Persians in their wars with the Greeks, and sustained a total defeat from Cimon, at the naval battle of the Eurymedon, B.C. 466. They revolted from Persia B.C. 353, and were conquered by Alexander B.C. 331. After his death, B.C. 323, Phenicia was annexed to the dominions of Titolement Soter, king of Egypt. It was seized by Antigonus of Phrygia, B.C. 315, and passed under the protectorate of Tigranes, king of Armenia, B.C. 83. It formed part of the Roman province of Syria B.C. 62, and was finally deprived of all its liberties by Augustus, B.C. 20. The Turks annexed it to their empire A.D. 1516.

PHENIX CLUBS.—A combination consisting principally of young tradesmen of Cork and Kerry, pledged to rise in rebellion at a moment's notice, was discovered in Ireland in December, 1855. Daniel Sullivan, indicted March 30, 1859, for being a member of a Phenix club, was, after three days' trial, found guilty and sentenced to ten years' penal servitude.

PHNETIC SCIENCE.—The Phnetic Society for the promotion of this science was founded in March, 1848, under the name of the Phnetographic Corresponding Society. The Phnetic News, a weekly newspaper, commenced Jan. 6, 1849, but did not enjoy a long existence.

PHOSPHORUS was discovered A.D. 1668, by an alchemist named Brandt, at Hamburg. Nearly all the phosphorus is now manufactured from calcined bones, called bone-earth.

PHOTO-GRAPHY.—This art, for producing engravings from photographs by the galvano-elastic process, was invented by Paul Pretsch of Vienna, and patented in England Oct. 29, 1832.

PHOTOGRAPHY.—This new art of engraving by the action of light was patented by Mr. Fox-Talbot April 21, 1858.

PHOTO-LITHOGRAPHY.—This art, by which a photograph is impressed on lithographic stone and copies are taken in the ordinary way, was invented by Mr. Maepherson, of Rome. Mr. Liguar, the surveyor-general of Victoria, Australia, applied it to the printing of plans in May, 1860.

PHOTO-METER.—This principle originated with Bouguer a.d. 1760. Professor Ritchie, in 1825, communicated to the Royal Society the description of a new photometer. Leslie and others have effected various improvements in this instrument.

PHOTO-ZINCOGRAPHY, a name given, in March, 1860, by Colonel James, R.E., director of the ordnance survey, to a process for copying ancient documents and plans. The reduced print is transferred to stone or zinc, from which any number of copies may be taken.

PHRENOLOGY was reduced to a system by Dr. Gall, who first propounded his doctrine at Vienna A.D. 1796. Dr. Spurzheim assisted him in his investigations in 1800; and in 1807 they removed to Paris, where they published their work on the "Anatomy and
Physiology of the Nervous System in general, and of the Brain in particular," in 1810 and 1812. Little was known of phrenology in England till 1815, when a severe criticism on its promulgators, published in the Edinburgh Review, directed attention to the subject. George Combe was led to a consideration of its truth or falsity in 1816; and in 1819 he published his "Essays on Phrenology," which is the chief English authority on the subject.

Phrygia (Asia Minor).—The traditions respecting the origin of the Phrygians are of the most conflicting character. It appears that they had their cradle in the mountains of Armenia, and that they were among the most ancient of the inhabitants of Asia Minor. In the "Iliad" they are mentioned as the allies of the Trojans. They attained the supremacy of the sea about B.C. 891, but were excelled by the Cyprians B.C. 865. Phrygia was invaded by Agesilalus, king of Sparta, in his expedition against Persia, B.C. 395; and the district known as Great Phrygia was assigned by Alexander to Antigonus, B.C. 333. Antigonus conquered Lesser Phrygia B.C. 319, and united the two under one sceptre; but they were again divided on his death, B.C. 301. Seleucus annexed both to the Syrian dominions B.C. 282; but after the defeat of Antiochus by Eumenes II. of Pergamus, at the battle of Magnesia, B.C. 190, the two provinces to that monarch. After the death of Attalus III. of Pergamus, B.C. 133, Phrygia, with the rest of his territories, became subject to Rome. It was declared free B.C. 120, but gradually resumed under the Roman sway.

Phylactery, derived from the Greek, and signifying a preservative, consisted of four scrolls or rolls of parchment, or the dressed skins of a clean animal, inscribed with four paragraphs of the law, taken from Exod. xii. 1—10; xiii. 11—16; Deut. vi. 4—9; and xi. 13—21, and other passages, was worn by the Jews on the forehead and arms. The custom, which is derived from their interpretation of Exod. xii. 9 and 16, was prevalent during our Saviour's sojourn upon earth.

Phylx (Greece), a strong fortress still called Fili, commanding the narrow pass across Mount Parnes, through which runs the road from Thebes to Athens, is memorable as the place seized by Thrasybulus and the Athenian exiles, B.C. 404, whence they commenced their operations against the thirty tyrants.

Physic.—Hippocrates, called the father of medicine, born at Cos B.C. 460, usually carried his physic about with him. Galen, who was born at Pergamus A.D. 131, was the first who compounded and sold physic at Rome. The College of Physicians in 1686 established a dispensary for the sale of pure physic, and in 1724 obtained an act for the better viewing of drugs. A dispensary was established in London in 1732 for supplying the nobility and gentry with advice and physic at the cost of 2s. a head per quarter.

Physicians.—By 3 Hen. VIII. c. 11 (1511), no one was permitted to practise within London, or seven miles thereof, as a physician or surgeon, unless he had previously examined and licensed by the bishop of London or the dean of St. Paul's. The necessity for the ecclesiastical warrant was removed by the charter of incorporation granted to the London physicians by Hen. VIII., Sept. 23, 1518, which was confirmed by the act for establishing the Royal College of Physicians, 14 & 15 Hen. VIII. c. 5 (1522—3). Physicians were allowed to practise surgery, and were released from holding public offices, by 32 Hen. VIII. c. 40 (1540). A stamp duty of £15 on physicians' licences to practise was imposed by 55 Geo. III. c. 184 (July 11, 1815), which was repealed by 22 & 23 Vict. c. 36, s. 2 (Aug. 13, 1859).

Physiognomy.—The first author who attempted to reduce the study of human character from the outward manifestations of countenance and gesture to a regular science, was Jean Gaspard Lavater, who published his treatise "Von der Physiognomik" A.D. 1772.

Physiology.—This science treats of the phenomena of living bodies in a healthy state, and is dependent upon a knowledge of anatomy (q. c.). The science of vegetable physiology was founded by Grew, whose attention was first drawn to it by Pliny in 1664, and Malpighi, whose first work appeared in 1671. They investigated the resemblance between the functions of animal and vegetable life.

Piacenza (Italy), the ancient Placentia, was colonized by the Romans B.C. 221, and plundered by the Goths B.C. 200. It was one of the first places that revived after the invasion of the northern barbarians, and in the 10th century became one of the principal marts of the Peninsula. The church of St. Antonio, at one period the cathedral, where St. Barnabas is said to have preached to the people, founded A.D. 324, was rebuilt in 903, and restored in 1104 and again in 1502. The cathedral of Piacenza was consecrated by Pope Innocent II. in 1132, and the ducal palace was erected in 1291. Piacenza revolted from the Milanese in 1447, and placed itself under the protection of Venice; but was taken by Francesco Sforza in Dec. 1447, and given up to pilage. The French, under Louis XII., took it; and it was recaptured by Pope Julius II., and remained in the hands of the popes till 1545, when Paul III. gave it to his son Peter Farnese. It formed part of the duchy of Parma until annexed to the Italian kingdom.

Piala, or Pia, festivals in honour of Hadrian at Puteoli, appointed A.D. 142 to be held in the second year of each Olympiad.

Pianoforte.—The Italians and Germans dispute the honour of this invention. Count Carl says it was invented A.D. 1722 by Bartolommeo Cristofori of Padua, during his stay in Florence. The Germans ascribe its
invention to C. A. Schreter, a German organist, in 1717. It has since received various improvements.

PICARD—This sect of Adamites (q. v.) was so called from Picard, a Fleming, who raised a rebellion in Germany A.D. 1415. He represented himself as the son of God, and having penetrated into Bohemia, was defeated in battle and slain in 1420.

PICARDY (France).—The name of this province does not date earlier than A.D. 1200, when the students from the frontier of France and Flanders were called Picards at the Paris university, on account of their quarrelsome disposition. In 1435 it was ceded to Philip the Good, duke of Burgundy; and in 1463 it was finally annexed to the French crown.

PICENTINES.—This Sabine tribe, according to Strabo, consisted of the inhabitants of Picenum transported by the Romans from that town shortly after its conquest, B.C. 268.

In the second Punic war they arrayed themselves on the side of Hannibal, for which they were afterwards punished by being kept from military service, and employed only as messengers and couriers. The Romans founded the colony of Salernum in their territory B.C. 194, that they might the more effectually hold them in check. They joined in the Social war against Rome, B.C. 90, and were subdued B.C. 89.

PICHELET'S CONSPIRACY, so called from Pichelet, its chief, a general in the French republican army, who devised this plot for the restoration of royalty in France. He was arrested in Paris Feb. 15, 1804, having just arrived from London, and was found strangled in prison April 5.

PICQUET, or PIQUET.—This game at cards is supposed by Père Daniel to have been invented in France in the reign of Charles VII. about A.D. 1430. The earliest French picquet cards that have been discovered are those formerly belonging to Henn, and are assigned to the year 1425. This, however, is doubtful.

PICTS.—The Picts are regarded as a Scythian tribe which landed in Ireland about the time of the first peopling of these islands, and being expelled therefrom, settled in the northern parts of Britain. Claudius Cesar subdued them A.D. 47; but they subsequently threw off all control, and proved a continual source of alarm to the inhabitants of the northern provinces. Several walls were erected to prevent their incursions. After the departure of the Romans, their inroads became insupportable, and led to the invitation of Vortigern to Hengist and Horsa to assist him in subduing them in 449, and thus to the ultimate establishment of the Saxons in England. The Picts waged fierce wars with their Scottish neighbours for many years, and reached their highest point of national glory during the reign of their king Uings the Great, about the year 730. In 767 the Scotch invaded the Pictish domains, and penetrated to their capital, where a great battle was fought with doubtful success. In 839 the Danes invaded their territory, and so weakened them that Kenneth II. of Scotland asserted his claim to the Pictish crown, and in 842 united all Scotland under one sovereign. (See BRITAIN and SCOTLAND.)

PICTURES. (See ICONOCLASTS, IMAGES, and PAINTING.)

PIEDMONT (North Italy).—This country, which forms a considerable portion of the Sardinian states, receives its name from its situation at the foot of the Alps, and is composed of the eastern portions of Transpadane Gaul and the northern part of ancient Liguria. It was annexed to the dominions of the counts of Savoy A.D. 1290, and on the death of Thomas II. in 1293 was erected into a separate county under his son Thomas. It was again united to Savoy in 1418. During the 15th century its territory was increased by the annexation of the following provinces:—Alessandria, Valencia, Lomellina, and Valsesia, in 1703; Tortona in 1735; Novara in 1736; and Vigevano, Anghiera, Voghera, and Bobbio, in 1745. In 1746 it was occupied by the French, and in 1814 was restored to Sardinia. (See SARDINIA and SAVOY.)

PIE-POUDRE, or PIE-POWDER COURT, held at fairs and markets, was established to decide upon the spot, in all cases of dispute between buyer and seller. The name is, according to some authorities derived from the French pie-poudre, because justice was done to an injured person before the dust of the fair was off his feet; and according to others, from pied poudreux, a pedlar. By 17 Edw. IV. c. 2 (1477), the owner of the fair or market, or his steward, was forbidden to entertain any action that did not originate in the same fair or market. The book kept by the Pic-powder court at Bartholomew fair from 1790 is preserved in the City Library at Guildhall. The last entry is—"Sept. 2, 1854. The Lord Mayor not having proclaimed Bartholomew fair, the court of Pic-powder consequently was not held."

PIERRE, St. (W. Indies).—This town, in the island of Martinico, was founded by a French planter from St. Christopher’s, A.D. 1635. It was captured, with the rest of the island, by the English in 1762, and again in 1794 and 1809. The town suffered severely from an earthquake in 1839.

PIETISTS.—This German sect consisted of the followers of Philip James Spener, who, A.D. 1639, attempted to revive, at Leipsic, what he called vital religion. With this object he formed societies, called Colleges of Piety, and this led to violent contumels and long and bitter controversies.

PIGNEROL (Piedmont).—The French took Pignerol A.D. 1639, obtained possession by purchase in 1640, and in the possession by the treaty of Westphalia in 1648. Pignerol was restored to the duke of Savoy by the treaty of Turin, in 1696. The French were driven out of Pignerol by the allies in 1799.

PILGRIMAGE OF GRACE.—An insurrection,
caused by the suppression of the smaller monasteries, broke out in Lincolnshire in Sept. 1536, and was suppressed in October. The people of York rebelled, for the same cause, in December, and termed their revolt the Pilgrimage of Grace. They bore banners on which the five wounds of Christ were displayed, and they demanded the suppression of heresy and the restitution of the property of the Church. Robert Aske was their leader, and they were joined by Lords Darcy, Latimer, Scoop, the archbishop of York, and others. They seized Hull and York, and the duke of Norfolk, who was sent against them, induced them to disperse about Christmas. Several of the ringleaders were executed in 1537.

PILOSMAGES.—One was performed by Helena, mother of Constantine I., to Jerusalem, when she founded the church of the Holy Sepulchre, A.D. 326. They became common throughout the Christian world about 500, and continued, notwithstanding the disapproval of many of the “fathers,” till they reached their height about 1000. The principal point of pilgrimage for the Mohammedans is Mecca, the birthplace of their prophet. This pilgrimage is enjoined by the Koran. The celebration of the centenary jubilee, by which pilgrims to St. Peter’s at Rome were promised plenary indulgence, was established by Boniface VIII. in 1300. It was reduced by Clement VI. to a period of fifty years in 1350. The Hindoos, who perform a journey to the temple of Juggernath twice a year, in the months of March and July, were in 1806 subjected to what was called the pilgrims’ tax, which was abolished by the British government in 1839. The three Child-pilgrimages of the Middle Ages were among the most singular of the phenomena connected with religious fanaticism. The first and most extraordinary was the Boy-crusade of 1212, which was undertaken under the auspices of a French shepherd-boy, named Stephen, who appeared at Vendôme, and announced himself divinely commissioned to conduct a crusading army of boys to the Holy Land. His preaching gathered more than 30,000 children to his standard, and the whole number embarked in seven large ships at Marseilles, under the false protection of two merchants, named Hugh Ferreus and William Foreus. A severe storm, which arose two days after they sailed, sank two of the vessels with all their passengers, but one was saved, and the remainder, on reaching the Holy Land, were sold as slaves to the Saracens by their two infamous protectors. Of the whole 30,000 who left France, not one ever returned. The second Child-pilgrimage was confined to the city of Erfurt, and commenced July 15, 1237, when more than 1,000 children assembled apparently without any previous arrangement, and proceeded to Armstadt, leaping and dancing, and exhibiting all the symptoms of the extraordinary dancing mania which at times disturbed Europe during the Middle Ages. This agitation was immediately suppressed by the parents of the children. The third Child-pilgrimage was of still less importance. It was made by more than 100 children, who set out from Halle, to Mount St. Michael, in Normandy, in 1458, and appears to have been successfully performed.

PIUMMEN.—The Mayflower, with about 100 English puritans on board, sailed from Delft haven July 22, 1620, and arrived in the northern part of Virginia in November. An exploring party reached Massachusetts Bay Dec. 11, and the spot was afterwards called Plymouth.

PILOKRY was in use among the Greeks and Romans. The Gauls also employed it as an instrument of punishment, under the name of the Boia; and for centuries it was used in most countries of Europe. It was abolished in France in 1832, and in England by 1 Vict. c. 23 (June 90, 1827).

PLINITZ (Germany).—An interview took place Aug. 27, 1791, between the emperor of Austria and the king of Prussia at the palace of Plinitz, the summer residence of the kings of Saxony, situated at a village of the same name, near Pirna, in Saxony, when they agreed to take up arms in behalf of monarchical government in France, and recommended the sovereigns of Europe to do the like.

PILOTAGE.—The establishment of pilots at particular ports is confirmed either by ancient charters of incorporation, such as those possessed by the corporations of Deptford-Strond (see DEPTFORD) and the Trinity House (q. v.), or by special statutes. The laws relating to pilotage were consolidated by 48 Geo. III. c. 104 (June 25, 1809), which was amended by 6 Geo. IV. c. 125 (July 5, 1825). Further regulations were made by 16 & 17 Vict. c. 129 (Aug. 20, 1853), which unites the Cinque Ports with the Trinity House pilots, and all the regulations on the subject were embodied in part V. of the Merchant Shipping Act, 17 & 18 Vict. c. 104 (Aug. 10, 1854).

PINE-TREES.—The stone pine was introduced into England from the south of Europe before A.D. 1548. The Norway spruce was also brought here before 1548; the cluster pine before 1596; the cedar of Lebanon from the Levant, before 1683; and Sir Joseph Banks’ pine from Chili, in 1796.

PINIKIE (Battle), fought at this place, near Musselburgh, between the English and the Scotch, Sept. 10, 1547, to enforce the marriage treaty of July 11, 1545, between Edward VI. of England and Mary queen of Scots, when the latter were defeated with a loss of 10,000 men.

PINKOW (Poland).—The anti-Trinitarians separated from the Protestant churches at a synod held here A.D. 1563.

PINS made of metal were introduced into this country from France before A.D. 1548. A law enacting how those offered for sale were to be manufactured, entitled “An act for the true making of pins,” was passed (35 Hen. VIII. c. 6) in 1548.

PROMINGO (Italy), at one time the capital of a principality, which included the island of Elba, was captured by the Genoese A.D.
1125. The principality was ceded to France by the treaty of Florence, March 28, 1801, and was bestowed by Napoleon I. on his sister Elise, June 23, 1805. Prince Bacciochi, Napoleon's brother-in-law, held possession of it from 1805 to 1816.

Piracy was the national profession, so to speak, of the Danish invaders who infested Europe in the 9th and 10th centuries. The first execution by hanging, drawing, and quartering, was that of the pirate William Marsh, A.D. 1292. This offence was afterwards regarded with considerable leniency, the only rule imposed by 31 Hen. VI. c. 4 (1522), is, that pirates robbing passengers with safety conduct, should be compelled to make restitution. By 27 Hen. VIII. c. 4 (1535), it was made punishable with death without benefit of clergy. Further provisions were enacted by 28 Hen. VIII. c. 15 (1536). The crime was defined, and a distinction made between principals and accessories, by 11 & 12 Will. III. c. 7 (1700), and further provisions on the same points were made by 3 Geo. IV. c. 24 (1722). A bounty was awarded for killing or capturing pirates by 6 Geo. IV. c. 45 (June 22, 1825), which was repealed by 13 & 14 Vict. c. 26 (June 25, 1850). The penalty for piracy was made death when the crime is aggravated by attempted murder, and transportation in other cases, by 7 Will. IV. & 1 Vict. c. 88 (July 17, 1837).

Pirmasens (Battle).—The French, under General Moreau, were defeated by the Prussians, commanded by the duke of Brunswick, at this town of Bavaria, with a loss of twenty-two pieces of artillery and 4,000 men, Sept. 14, 1793.

Pirm (Germany) was taken by the Swedes A.D. 1639. The united Austrians and Swedes defeated here by the king of Prussia in 1745, and the king of Poland blockaded the Saxon camp in Sept. 1756. The suburbs were fired by the Prussians, and 260 fine houses destroyed, Nov. 10, 1758. The intrenched camp, at Pirm, strengthened by Napoleon I. in 1813, was taken by the allies the same year.

Pisa (Italy).—Nothing certain is known of the origin of this town. Livy mentions that a Latin colony was sent to Pisa, at the request of the inhabitants, about B.C. 179. It became subject to Rome in the middle of the 6th century, and passed successively into the hands of the Goths, the Lombards, and the Carolingians. Under the last it became an independent community, with a nominal allegiance to the emperors. The Saracen pirates were defeated near the town by the Pisans, A.D. 874. Hugo of Provence came to Pisa in 926, and received the homage of the great feudatories as king of Italy. The Saracens made an attack on the town in 1006, and again invested it in 1012. The Pisans, in conjunction with the Genoese, wrested the island of Sardinia from the Moors in 1022. At this time Pisa was a republic, and, during the century, maintained the maritime supremacy of the Mediterranean. A war commenced between Pisa and Genoa in 1070, which lasted, at intervals, for more than two centuries, and ended in the ruin of Pisa. In a naval battle in 1254, the Pisans lost the greater part of their fleet, and above 16,000 men in killed and prisoners. The Genoese attacked and destroyed the Porto Pisano, and blockaded the entrance with sunken ships filled with stones in 1290. In 1405 the citadel and other strongholds were sold to the Florentines by Marshal Boucicault, but the citizens soon retook the citadel. The Florentines then blockaded Pisa, and took possession of the town Nov. 8, 1406. When Charles VIII. of France visited Italy, in 1494, and showed hostility to Florence, the Pisans drove out the Florentines and restored the republic under the protection of France. Pisa was besieged by the Florentines, without success, in 1499, again in 1504; and they took the town by blockade June 8, 1509. Pisa was then united to Florence. It was taken by the French in 1739, and delib. was re-annexed to Sardinia by a vote of the people taken March 11 and 12, 1860. The cathedral, a magnificent Gothic building, was commenced in the 11th century. Councils were held at Pisa, May 30, 1134; March 25 to Aug. 7, 1409; and Sept. 1, 1511.

Pistoja (Italy).—This town, anciently called Pistorium, was of no importance in the time of the Romans. It was inclosed within walls by Desiderius, the last of the Lombard kings, who reigned from A.D. 756 to 774. It became an independent municipality, and was subdued by Florence about 1150. A citadel was built in 1252. The feuds between two branches of a Pistoian family, named Cancellieri, at the close of the 13th century originated the factions of the Bianchi and Neri, which spread to Florence, and caused much misery to both cities. The Florentine Neri blockaded Pistoja, which surrendered April 14, 1306, on condition of safety to life and property. The victors, however, committed cruel barbarities, and razed the walls to the ground. It then became subject to Florence. The cathedral was built early in the 12th century. The palace del Commune, or degli Anziani, dates from the 13th century, and the episcopal palace from the 15th century.

Pistol.—Grose states that this fire-arm derives its name from having been invented at Pistoja in Tuscany. The wheel-lock pistol was common in Germany as early as A.D. 1512, and became the characteristic weapon of the Reiters, or Pistoliers, who were enrolled soon after. Pistols were used in France in 1544. Double-barrelled pistols, and pistols capable of discharging two or three balls from a single barrel without reloading, were invented about the middle of the 16th century, and the flint-lock is first mentioned in connection with pistols in 1588.

Pitcairn's Island (Pacific Ocean) was discovered by a young officer named Pitcairn, belonging to the ship Carteret, A.D. 1788.
1768, and was visited by Capt. Cook in 1777. The mutineers of the *Bounty* established a colony on this island in 1790, consisting of 9 British sailors, 6 native Tahitian men, and 12 women. Through diasions and massacres, there remained, in 1800, only one Englishman, Adams, the Tahitian females, and 19 children. Captain Beechey found an interesting colony of 66 persons here in 1825. A scarcity of water caused the colony to be transferred to Tahiti in 1831; but after remaining five months, they returned to Pitcairn's Island in 1832.

**PITT ADMINISTRATION.**—The first Pitt administration was formed soon after the dismissal of the Coalition ministry (q.v.), which took place Dec. 18, 1783. William Pitt, at that time not quite twenty-five years of age, was made first lord of the treasury and chancellor of the exchequer, Dec. 19. Lord Stanhope remarks that it consisted of seven cabinet ministers, of whom only one, the prime minister, was a member of the House of Commons. It was thus constituted:—

- **First Lord of the Treasury and Chancellor of the Exchequer** — William Pitt.
- **Lord Chancellor** — Lord Thurlow.
- **President of the Council** — Earl Gower, afterwards Marquis of Stafford.
- **Privy Seal** — Duke of Rutland.
- **Foreign Secretary** — Lord Sydney, made Viscount Sydney June 9, 1789.
- **Marquis of Caermarthen, afterwards duke of Leeds**.
- **Home Secretary** — Earl Howe, created Earl Howe in July, 1789.

The ministry held its first meeting Dec. 23, 1783. After an interval of a few weeks, the duke of Richmond, as master-general of the ordinance, was admitted to a seat in the cabinet. The marquis of Caermarthen was succeeded in the home office, June 5, 1789, by Mr. William Wyndham Grenville, afterwards Lord Grenville, who took the foreign office in May, 1791, and was succeeded at the home office by Mr. Henry Dundas, afterwards Lord Melville. He became colonial secretary July 11, 1794, and was replaced at the home office by the duke of Portland. Viscountess Sydney resigned the secretari ship for foreign affairs in May, 1791, and was succeeded by Lord Grenville. The third secretari ship of state for war and colonies, suppressed at the peace of 1782, was re-established in 1794, when Mr. Henry Dundas, afterwards Lord Melville, received the appointment. Mr. Windham, as secretary at war, obtained a seat in the cabinet in 1794. The privy seal was placed in commission March 8, 1784, Earl Gower, afterwards marquis of Stafford, receiving the appointment Nov. 24; it passed to Earl Spencer July 11, 1794; to the earl of Chatham Dec. 17, 1794; and to the earl of Westmorland Feb. 14, 1798. Lord, afterwards Earl Camden, replaced the marquis of Stafford as president of the council, Dec. 1, 1794.

He was succeeded, July 11, 1794, by Earl Fitzwilliam, who gave place to the earl of Mansfield, Dec. 17, 1794. The earl of Chatham was made lord president Sept. 21, 1796. The earl of Chatham succeeded Earl Howe at the admiral ty in July, 1788, and was replaced by Earl Spencer March 4, 1795. Lord Thurlow resigned the lord chancellorship June 12, 1792, the great seal being placed in commission until January, 1793, when Lord Loughborough became lord chancellor. Difficulties respecting Roman Catholic emancipation led to the resignation of Mr. Pitt early in 1801. The acceptance of office as prime minister was communicated to the House of Commons by Mr. Abingdon, Feb. 10, and his name appeared in the Gazette as chief of a new administration. (See ADDINGTON ADMINISTRATION.)—Pitt's second administration was formed on the dissolution of the Addington administration (q.v.), May 10, 1804, and Mr. Pitt's appointment was gazetted May 12. The cabinet was thus constituted:—

- **First Lord of the Treasury and Chancellor of the Exchequer** — Mr. Pitt.
- **Lord Chancellor** — Lord Eldon.
- **President of the Council** — Duke of Portland.
- **Privy Seal** — Earl of Westmorland.
- **Foreign Secretary** — Lord Harrington.
- **Home Secretary** — Earl Hawkesbury, afterwards earl of Liverpool.
- **Colonial Secretary** — Earl Camden.
- **Admiralty** — Viscount Melville.

Sir Charles Middleton, afterwards Lord Barham, succeeded Viscount Melville at the admiral ty April 30, 1805. The duke of Portland was succeeded, Jan. 14, 1805, as privy seal by Mr. Addington, created Viscount Sidmouth Jan. 12, who was followed by Earl Camden, July 10, 1805. Lord Mulgrave succeeded Lord Harrowby as foreign secretary, Jan. 11, 1805, and Viscount Castleragh became colonial secretary when Earl Camden took the privy seal, July 10, 1805. This administration was dissolved by the death of Mr. Pitt, Jan. 23, 1806. (See ALL THE TALENTS ADMINISTRATION.)

**PITTSBURG (North America).**—This town of Pennsylvania was the scene of the defeat of the English army under General Braddock by the Americans, July 6, 1755. See PETRA, SAN MARCOS, (Peru).—This city, founded by Pizarro, A.D. 1531, was the first Spanish settlement in Peru.

**PLACENTIA.** (See Piacenza.)

**PLAGUE AND Pestilence.**—"The terms pest, pestilence, and plague," says a writer in the new edition of the "Encyclopedia Britannica," "were long employed in Great Britain, as were the corresponding terms in other languages, both in ancient and in modern times, to denote rightly a disease attacking a great number of persons simultaneously and in succession, and destroying a large proportion of those whom it attacked; in short, a widely-diffused and malignant epidemic." The following table exhibits a list of the most terrible visitations of this...
kind. Provisions for the relief of plague-stricken persons were made by 2 James I. c. 31 (1604), which was repealed by 7 Will. IV. & 1 Vict. c. 91, s. 4 (July 17, 1837). (See Lazaretto and Quarantine.)

B.C.

1491. The Egyptians are visited by a terrible pestilence on the occasion of the Israelitish exodus.

1471. The mutinous companions of Korah, Dathan, and Abiram, to the number of 14,700 persons, perish by pestilence.

1017. A pestilence in Palestine destroys 70,000 persons in three days.

790. A terrible plague occurs in Italy.

710. The army of Sennacherib perishes before Jerusalem.

594. A third part of the inhabitants of Jerusalem is destroyed by plague.

480. The Peruvian army in Greece loses 150,000 men from pestilence.

492. Nearly half the population of Rome perishes from plague.

435. A pestilence breaks out in Athens.

427. A pestilence commences in Egypt, and extends almost throughout the known world.

366. The plague rages fearfully at Rome, where, at its height, it is said to have destroyed 10,000 citizens daily.

201. The destruction of vast swarms of locusts occasions a plague in Italy, and it continues for many years.

196. Africa is devastated by a plague occasioned by putrid swarms of locusts, and 800,000 persons die in Numidia, and 200,000 in Carthage.

89. The Roman army loses 10,000 men from a plague.

30. A pestilence rages throughout the known world for five years.

A.D.

40. Babylon and all the countries between Italy and India suffer from plague.

80. At Rome 10,000 persons perish daily.

88. Rome loses 30,000 of its inhabitants from pestilence.

92. A plague in Scotland destroys about 100,000 persons.

114. A pestilence breaks out in Wales, where 45,000 persons die.

185. The whole of Italy is ravaged by the plague.

218. Scotland loses 100,000 of its population from a pestilence.

250. Plague rages throughout the world.

262. The mortality in Rome from plague is said to number 5,000 persons daily.

285. Britain is visited by a deadly pestilence.

450. Pestilence breaks out at Rome, and rages for seventeen years.

502. Scotland is visited by a fatal epidemic.

560. The whole of Europe is ravaged by pestilence which continues seven years.

590. A fatal plague desolates Rome. One of its symptoms was a violent tendency to sneeze, in consequence of which it became usual to address a person sneezing with the words Domino tecum, "God bless you," or similar expressions.

717. Constantinople loses 30,000 of its population this year.

749. Another plague breaks out at Constantinople and rages with such malignity that the survivors are too few to bury the dead.

762. England and Wales are visited by pestilence which is said to have carried off 34,000 persons in Chichester alone.

874. A destructive epidemic, caused by the putrid bodies of immense swarms of l-casts, destroys the northern parts of Gaul.

940. The northern countries of Europe are ravaged by a terrible mortality among human beings and cattle, 40,000 persons dying in Scotland alone.
1777. July 6. The gale fever breaks out at Oxford, owing to the filthy state in which the prisons were brought to trial, and carries off 310 persons in a few days. The assizes are known in consequence as the "Black Assizes."

1797. A pestilential caseshtrr destroys 8,000 persons in Lübeck, 4,000 in Rome, and 3,000 in Hungary. A plague also breaks out at Grand Cairo, where 500,000 people die in eight months.

1800. Russia suffers from a famine and plague, of which 500,000 die, and 30,000 perish in Lithuania.

1810. Spain suffers from fatal epidemics, and 200,000 people die of plague at Constantinople.

1818. A plague rages in North America, and reduces the Massachusetts tribe of Indians from 3,000 persons to 300.

1825. The whole of England is visited by the plague, which carries off 30,000 persons in London alone.

1826. Pestilence destroys 69,000 persons at Lyons.

1830. An extraordinary pestilential fever destroys many lives in France. It was attended by more frightful instances of the extremities, which frequently dropped off spontaneously.

1835. Leyden loses 20,000 of its inhabitants from an epidemic pestilence.

1846. The East Indies raged with great violence in the West Indies, 12,000 persons dying at Barbadoes and St. Christopher's.

1849. Epidemic disorders carry off 300,000 persons in the southern provinces of Spain.

1854. A pestilence rages in many parts of Europe, and destroys 200,000 lives in Moscow, 13,290 at Amsterdam, 13,000 at Leyden, and 9,000 at Riga.

1856. The Neapolitan territories are desolated by the plague, which carries off 400,000 of the inhabitants.

1862. Venice loses 90,000 of its inhabitants from a pestilence.

1864. Nov. 2. The Great Plague commences in London and destroys 68,596 persons. It extended to all parts of the city and suburbs, and ceased in May, 1866.

1867. The plague destroys 11,300 persons at Malta.

1870. The sweating sickness carries off 30,000 persons in Stockholm, and 25,000 in Copenhagen.

1871. The true plague destroys 80,000 lives at Aleppo.

1872. Marseilles and its neighbourhood suffer from a visitation of the plague. One district loses 27,266 persons out of a population of 247,890.

1876. A pestilence rages at Grand Cairo in February and March, and destroys 100,000 people.

1871. A contagious fever carries off 150,000 persons at Constantinople, and 30,000 people die of famine and plague in Cyprus.

1873. Napius loses 20,000 of its inhabitants from a malignant fever.

1879. A famine, attended with pestilence, carries off more than 3,000,000 people in Bengal.

1876. Famine and pestilence destroy 169,000 persons in Bohemia, 20,000 persons in Russia and Poland, and occasion a weekly mortality of 3,000 persons at Constantinople.

1772. The gale fever carries off 133,259 persons at Moscow, and 99,000 persons at Moscow.

1871. The Asiatic cholera breaks out in Hindostan, and destroys 20,000 lives. (See CROZELLE.)

1872. Egypt loses 800,000 of its population from the plague.

1879. A severe pestilence destroys 247,000 persons in Peru, and occasions an average mortality of 3,000 daily throughout the Barbary states.

1810. A pestilence of the yellow fever type breaks out at Gibraltar, where only every one in eight men out of a garrison of 14,000 escape its attacks.

1812. The same plague carries off 100,000 persons in Constantinople.

1813. The plague at Malta destroys 4,483 lives.

1825. Grand Cairo loses 30,000 persons from a similar scourge.

1834. The plague rages with great fatality in Egypt.

1847. In Glasgow about 15,000 persons die of an epidemic remittent fever.

---

**PLA**

1810. A pestilence of the yellow fever type breaks out at Gibraltar, where only every one in eight men out of a garrison of 14,000 escape its attacks.

1812. The same plague carries off 100,000 persons in Constantinople.

1813. The plague at Malta destroys 4,483 lives.

1825. Grand Cairo loses 30,000 persons from a similar scourge.

1834. The plague rages with great fatality in Egypt.

1847. In Glasgow about 15,000 persons die of an epidemic remittent fever.

**PLANETS.** — Mercury, Venus, Mars, Jupiter, and Saturn, were known to the ancients. The four satellites of Jupiter were discovered by Galileo A.D. 1610. Saturn has eight satellites. Titan was discovered by Huygens in 1655; Japhet in 1671, Rhea in 1672, Tethys and Dione in 1684,—these were all discovered by Cassini; Mimas and Enceladus by Sir William Herschel in 1789; Hyperion by Cassini and Bond in 1848; and Chiron by Goldschmidt in 1861. The planet Uranus, Herschel, or Georgium Sidus, was discovered at Bath by Sir W. Herschel, March 18, 1781. In 1877 he discovered its satellites, Oberon and Titania, and subsequently four others, which have never been observed since. Two more within the orbits of those previously noticed, were discovered by Lassell and Otto Struve in 1847. The planet Neptune was discovered independently by Messrs. Adams and Le Verrier, Sept. 23, 1846, and its satellite by Lassell in 1847.

The following list exhibits the date of discovery of the asteroids. They are usually characterized by the number expressing the order of their discovery, which is inclosed in a small circle.

PLANTAGENET, derived from planta genista, the broom plant, a sprig of which Geoffrey, the founder of the house, wore in his cap, is the name of a line of fourteen kings who reigned in England from a.d. 1154 to 1485. The first monarch of the house, Henry II., ascended the English throne Dec. 19, 1154.

The second, Richard I., during whose reign and that of his predecessor a complete fusion of the Saxon and Norman elements of the country took place, succeeded July 6, 1189. The family was divided into the two branches of Lancaster and York on the death of Richard II., who was succeeded by Henry IV. Sept. 29, 1399. The line closed with Richard III., Aug. 22, 1485.

PLANTATIONS.—This name was originally applied to colonies (q.v.). (See Board of Trade.)

Plassey, (Battle,) was fought at Plassey, a village of Bengal, June 23, 1757. The English force, under the command of Colonel Clive, consisted of about 1,000 Europeans and 2,100 Sepoys, while the army of the soubbar, of Bengal amounted to 50,000 for 15,000 horse, with 50 pieces of cannon. Clive gained a complete victory, which gave Bengal into the hands of the English, and laid the foundations of our empire in India.

Plaster of Paris.—The method of taking casts from the human face in this material was invented by the Florentine artist Andrea Vercchio, who was born a.d. 1432, and died in 1488. Plaster of Paris was first employed as a manure in France in 1776. It derives its name from the abundance in which it is found near Paris, especially at Montmartre.

Plata, (South America,) was visited by the Spaniard Juan Diaz de Solis, who landed at the mouth of the river, and took formal possession in the name of the king of Spain, a.d. 1515. The first settlement was made by Sebastian Cabot in 1530; and Don Pedro de Mendoza founded Buenos Ayres in 1535. The Jesuits commenced missionary work in the 17th century; but they were suppressed in 1768. The country was, excepting some trifling commercial privileges allowed in 1602, and renewed in 1618 and 1622, kept dependent on Peru till 1777. A royal "audencia" was established at Buenos Ayres in 1665; the last fleet which had monopolized the trade between Europe and Spanish America, which had dwindled down to an insignificant amount, sailed from Cadiz in 1749; and free trade with several of the American ports was permitted in 1774. The Portuguese settlement in Brazil extended to the shores of the river in 1553; and a definite boundary was established between the colony and the Indians to the south in 1740. The various provinces were erected into a vice-royalty in 1778. Repudiating the sovereignty of Joseph Bonaparte, the country organized an independent government in the name of Ferdinand VII., May 25, 1810. A sovereign constituent assembly was convened at Buenos Ayres in January, 1813, which continued in power till dissolved in April, 1816; and a general congress declared the independence of the provinces July 9, 1816. General Puyyeron remained supreme director till 1820. After various attempts to recover their authority, the Spaniards were finally defeated by the troops of the republic in July, 1821. Great Britain recognized its independence in 1824; and a blockade of the port of Buenos Ayres by a Brazilian fleet, instituted January, 1826, was raised through British intervention, in October, 1828. The Argentine Confederation...
PLA

(q.c.) was formed in January, 1834. General Rossa attained absolute power in 1836. At the request of Brazil, England and France sent out a combined fleet, which forced the chains Rosas had drawn across the mouth of the river, and destroyed the batteries he had erected at Point Obligado, Feb. 19, 1845. The states opposed to the despotic rule of Rosas entered into a treaty to depose him; and General Urquiza, at the head of their troops, totally defeated the army of the dictator on the plains of Moron, Feb. 2, 1851. A federal constitution was published at Santa Fé, May 1, 1853. The country continued divided into two parties and distinct governments, and treaties of commerce, concluded between them in December, 1854, and January, 1855, were annulled March 18, 1856.

PLATE.—The exportation of gold or silver plate without a licence was prohibited by 6 Edw. III. st. 2, c. 1 (1335). By 8 Will. III. c. 8 (1699), provision was made for converting wrought plate into coin; and tax-collectors were authorized to receive the land-tax in plate instead of money. The punishment that has been stamped at the assay office renders the seller liable to a fine of £50 by 24 Geo. III. c. 53 (1754), and the counterfeiting of the assayer's stamps was made a capital offence by 52 Geo. III. c. 143, s. 8 (July 23, 1812). The penalty was commuted to transportation or imprisonment by 1 Will. IV. c. 66 (July 23, 1830). The laws relating to the assay of gold and silver plate were amended by 17 & 18 Vict. c. 96 (Aug. 10, 1854).

PLATERA (Greece) is mentioned by Homer B.C. 962. It resisted the supremacy of Thebes; formed an alliance with Athens, B.C. 519; and furnished a thousand men to the battle of Marathon, Sept. 28, B.C. 490. The people fought at Artemisium, B.C. 480; and the city was burnt to the ground by the Persians. The Persian general Mardonius was defeated with a loss of upwards of 200,000 men, by the Greeks under Pausanias, at Platea, B.C. 479. A small party of the Thebans failed in an attempt to take the city B.C. 431. It was besieged by the Peloponnesian army, when the Plateans sent off their old men, women and children to Athens, B.C. 429. The besiegers having failed in an attempt to take it by assault, raised a circumvallation of two parallel walls, with a ditch on either side of the city, over which one half of the besieged made their escape to Athens, B.C. 423. Owing to want of provisions, the remainder surrendered, and were put to death B.C. 427. The survivors received from Athens the town of Scione B.C. 420; and having been restored to their native city, it was surrassed by the Thebans and destroyed B.C. 372. They were again reinstated by Philip II., B.C. 338. The city is mentioned by Hierocles in the 6th century, and its walls were restored by Justinian I., A.D. 527–565.

PLATING.—The art is of great antiquity. By 5 Hen. IV. c. 4 (1403), all work of this kind upon copper or latten was prohibited except in ornaments for the church, of which some part was to be left uncovered to show the copper or brass. The modern method of plating with silver on copper was invented by Thomas Bolsover, an ingenious mechanic of Sheffield, in 1742.

PLATINUM, or PLATINA.—This important metal was not known before the middle of the 18th century. Mr. Wood met with the ore in Jamaica A.D. 1741, and introduced it into Europe. He published a paper describing it in 1750.

PLATOMETER.—This apparatus for measuring areas of regular and irregular plane figures was invented by Mr. John Lang, of Kirkcaldy, Dec. 24, 1851.

PLATTSBURG (North America).—The governor-general of Canada, Sir G. Prevost, having planned an expedition against this town, a flotilla from Lake Champlain, and the land batteries, opened fire simultaneously; but several assaults having failed, the enterprise was abandoned Sept. 11, 1814.

PLAY-GROUNDS.—In 1854 the attempt was made to form a society to provide play-grounds for the recreation of children of the humble class, and an act was passed April 19, 1859 (22 Vict. c. 27), to facilitate grants of land near populous places for the use of regulated recreation for adults and as play-grounds for children.

PLEBEIANS.—The people, as opposed to the patricians or nobles of Rome, revolted and obtained a decree of the senate to have two of their order elected annually as tribunes, B.C. 490. Three plebeians were created decemvirs about B.C. 450. Military tribunes were chosen from the plebeians about B.C. 490; and two plebeians were raised to the consulate about B.C. 365. A plebeian was chosen one of the censors B.C. 351, and two plebeians were appointed B.C. 313.

PLESSIS LES TOURS (France).—This castle was surrounded with a triple fortification by Louis XI., who retired here A.D. 1482, and died Aug. 30, 1483. An assembly of the states was held in the grand apartment of the castle, at which the deputy from Paris bestowed upon Louis XII. the title of "Father of his People," in May, 1506.

PLOTS, REBELLIONS, &c.—The following are the most important conspiracies and insurrections connected with English history:—

A.D.
1051. Godwin, earl of Kent, rebels against Edward the Confessor.
1071. Hereward de Wake rebels against William I.
1074. Earl Walthof and other Norman barons r-bel.
1098. Robert, duke of Normandy, assisted by his uncle, the baron of Baux, conspires against William II.
1105. Robert Mowbray heads a conspiracy for de-throning William II., and conspiring against his cousin, the earl of Albemarle.
1102. Beleane, earl of Shrewsbury, opposes the accession of Henry I.
1137. Several nobles conspire in favour of the empress Matilda, and begin the civil wars of Stephen's reign.
1173. Queen Eleanor and her sons conspire against Henry II.

1215. The barons take arms against King John

1232. Richard, Duke of Pembroke, forms a confederacy against Henry III., and his minister the bishop of Winchester.

1254. Simon de Montfort commences the Barons' War (g.v.).

1270. A rebellion of the Irish is suppressed.

1312. The barons league against Gaveston.

1322. The earl of Lancaster conspires with the Scotch against Edward II.

1326. Queen Isabella and the barons commence the conspiracy which results in the dethronement of the king.

1329. An insurrection in the south of Ireland.

1381. Wat Tyler's insurrection (g.v.).

1388. A conspiracy by the duke of Gloucester against his nephew Richard II., is alleged to have been formed this year.

1393. The Irish rebel.

1395. Henry Bolingbroke, duke of Lancaster, conspires against and dethrones Richard II.

1401. The Welsh revolt under Owen Glendower.

1408. The earl of Northumberland and Owen Glendower rebel.

1415. The earl of Cambridge, Lord Scrope, and Sir Thomas Percie, form a plot for uniting the earl of March king.

1450. Cad's insurrection (g.v.).

1452. The Yorkist insurrection against Henry VI.

1460. The Conspirators and others rebel against Edward IV.

1470. The earl of Warwick and the duke of Clarence cause Edward IV. to be dethroned.

1471. Edward IV. rebels against Henry VI. and recovers the crown.

1483. Richard, duke of Gloucester, conspires against his nephew Edward V., and obtains the crown. The dukes of Buckingham and the bishop of Ely form a plot for the dethronement of Richard III.

1486. Lambri Simnel's insurrection.

1497. Flannock's rebellion (g.v.).

1503. The duke of Suffolk conspires against Henry VII.

1534. June 11. Fitzgerald, earl of Kildare, rebels in Ireland against Henry VIII.

1538. Dr. Mackerell, under the assumed name of Captain Cobler, heads an insurrection of the Irish Catholics of Ireland. The Yorkshire insurrection, known as the Pilgrimage of Grace, breaks out (g.v.).

1556. The duke of Northumberland conspires in favour of Lady Jane Grey.

1554. Feb. 7. Sir Thomas Wyatt rebels against Queen Mary, in consequence of her intended marriage with Philip of Spain.

1556. Cleaver's rebellion is suppressed in Norfolk.

1557. Sir Thomas Stafford heads a rebellion in Yorkshire.

1559. Dr. Story plots against Queen Elizabeth.

1564. The sons of Cardinal Pole conspire against the queen.

1569. The earls of Northumberland and Westmoreland rebel.

1579. The Irish rebellion under Fitz-Maurice is suppressed.

1581. The Jesuit Campion conspires against the queen.

1584. Throgmorton's conspiracy is defeated.

1588. The Percy conspiracy (g.v.).

1594. The plot of Roderigo Lopez is detected.

1597. The earl of Tyrone rebels in Ireland.

1601. The Essex conspiracy (g.v.).

1603. Sir Walter Raleigh and others conspire against James I. and in favour of Arabella Stuart. (See Bye and Main Plots.)

1674. Nov. 4. The Gunpowder Plot (g.v.).

1677. Captain Fouch's insurrection in Warwickshire and Northampton is suppressed.

1680. Sir Cahir O'Doherty's insurrection breaks out.

1681. Oct. 23. Phelim O'Neill's Ulster rebellion (g.v.).

1682. The Belfast rebellion commences.

1683. Edmund Walker, the poet, conspires against the parliament.

1685. The insurrections of Peardrooke and Syndercomb are suppressed.

1686. Sexby conspires to assassinate Cromwell.

1690. The Lancashire rebellion of the Fifth-monarchy men against Charles II. is suppressed.

1691. Venner's insurrection is suppressed.

1695. The plot of Colonel Danvers is frustrated.

1679. The Meal-tub plot (g.v.).

1680. June 12. Discovery of the Bye-house plot (g.v.).

1685. June 20. The duke of Monmouth rebels at Taunton.

1689. Cloverhouse, Lord Dundee, rebels in Scotland against William and Mary.

1703. Simon Fraser's plot for placing the son of James II. on the throne is frustrated.

1711. Gough-Conyngham, conspires against the ministers.

1715. Sept. 6. The earl of War's rebellion in favour of the Pretender breaks out in Scotland.

1718. James Sheppard, a madman, conspires against George I.

1722. Failure of Layser's conspiracy (g.v.).

1740. A Jacobite confederacy in favour of the Pretender is formed in Scotland.

1745. April 20. The Scotch rebellion in favour of the Pretender commences.

1761. The Whiteboy insurrection in Ireland.

1762. The Levellers rise in Ireland.

1769. The Society's insurrection breaks out in Ireland.

1775. The American rebellion commences.

1784. The Irish Peep-o'-Day boys rise.

1796. The Right-boys rebel in Ireland.

1784. Horne Tooke and others are tried on a charge of implication in the conspiracies of the Corresponding Society (g.v.).

1789. A rebellion, under Lord Barrington, Fitzgerald, breaks out in Ireland (g.v.).

1815. A rebellion breaks out in Tipperary.

1815. The Grego-Barry conspiracy (g.v.).

1820. Failure of the Cato-street conspiracy (g.v.).

1857. Papineau's "Sons of Liberty" rebellion is suppressed in Canada.

1848. Smith O'Brien's insurrection is suppressed in Ireland.

1857. The native troops rebel in India (g.v.).

1858. The supposed conspiracy of the Fenian Society is frustrated in Ireland.

PLOWCE (Battle).—The Teutonic knights were defeated by the Poles and Lithuanians at this place, in Poland, A.D. 1381. According to Polish historians, 20,000 of the vanquished were left dead on the field, while they themselves only lost 500 men.

PLUM-TREE. It is believed that some varieties of the plum are indigenous to England. Pliny states that it was brought from Syria to Greece, and that it was afterwards imported into Italy and France. Lord Cromwell imported several varieties from Italy during the reign of Henry VIII. The date-plum was introduced from Barbary before 1506, and the Pishamin plum from North America before 1629. The green-gage was introduced into France by Claude,
queen of Francis I.; the American red-gage was first raised in 1790; and the Washington plum was imported from America in 1821.

PRALLITIES.—The holding of more than one benefice with cure of souls was strictly prohibited by the council of Lateran, A.D. 1215, except in the case of men specially eminent for learning, who were sometimes permitted to enjoy more than one benefice, provided they were not more than thirty miles distant from each other, and he agreed to reside in each of them for some reasonable time every year. The holding of pluralities in the Anglican church was restrained by 21 Hen. VIII. c. 13 (1529), which was amended by 57 Geo. III. c. 99 (July 10, 1817). Both these statutes were repealed by 1 & 2 Vict. c. 106 (Aug. 14, 1838), which prohibited more than two preferments, or one preferment and one benefice, to be held together, and reduced the distance permitted between two benefices enjoyed at the same time to ten miles. The laws relating to pluralities were amended by 13 & 14 Vict. c. 98 (Aug. 14, 1850); and provisions for the union of contiguous benefices were made by 18 & 19 Vict. c. 127 (Aug. 14, 1855).

PLYMOUTH (Devonshire) is supposed to have been the Tameowrth of the Saxons. At the time of the Conquest (A.D. 1066) it was known as Sutton, on South Town; and its name came to be Sutton Valedort in the reign of Edward I.; and was incorporated by the name of Plymouh in 1439. Here Edward the Black Prince embarked on his expedition to France in 1355, and landed on his return with his royal captives. In the reigns of Edward III. and Henry IV., the French landed and attempted to burn the town, but were driven back to their ships. The plague committed great ravages in 1579 and 1581. A body of Spaniards made a descent on the coast in July, 1595; but their progress was soon checked, and twenty-two chests, full of papal bulls, dispensations, and pardons, were seized and burnt in the market-place of Plymouth. Charles I. and his court, with 120 ships and 6,000 troops from Portsmouth, remained here for ten days in 1625. The royalists besieged the town from September, 1643, to the end of the year. It was afterwards blockaded for nearly a year and a half, but the parliamentarians kept possession of the town. After the Restoration the present citadel was built, and the fortifications improved. A fire occurred in the dockyard, and destroyed 500 tons of cordage, 700 sails, and 1,050 tons of hemp, on the night of July 3, 1761. Another fire broke out in the dockyard in five different places simultaneously, and consumed stores and buildings to the value of £149,680, on July 27, 1770. The last fire occurred on Sept. 27, 1840, when several ships and a large quantity of timber were destroyed. The celebrated breakwater at Plymouth, commenced Aug. 12, 1812, was completed in 1841. The grammar-school was founded in 1572; the Red-boys' school was established by will dated 1632; a school and asylum for orphans was founded in 1625; Charles's almshouses were built in 1679; the Grey school was founded in 1713; and the Athenaeum was opened Feb. 4, 1819. A mechanics' institute was established in December, 1827.

PLYMOUTH (North America).—At this place, in Massachusetts, the Pilgrim Fathers landed A.D. 1620. An annual festival is held Dec. 22, in what is termed the Pilgrims' Hall, built in 1824, to commemorate the event.

PLYMOUTH BRETHREN.—This section of the Christian church derives its name from having originated at Plymouth about A.D. 1830. The chief doctrinal peculiarities of the brethren are their professed adherence to the Christianity of the New Testament, and their condemnation both of established and non-conformist churches, the former of which they consider too latitudinarian, in desiring to embrace within their pale the whole population of a country, and the latter too sectarian, because they exclude all but the members of their own party. They hold that the presence of the Holy Ghost constitutes a church, and that doctrine, and not ordination, is the test of a divinely-appointed minister.

PODESTÀ, termed by Hallam (Middle Ages, chap. iii. p. 1) "a new and singular species of magistry," was introduced into the Lombard cities about the end of the 12th century. Frederick I. appointed podestas, instead of the elective consuls A.D. 1158, and this office was abolished in 1159. When revived by the citizens themselves, after the peace of Constance in 1183, the podesta was made the criminal judge, and preserver of the peace.

PODOlia (Russia).—This Polish province was ceded to the Turks A.D. 1672, and having been recovered by the Poles, was conquered and annexed to Russia in 1772.

PORT-LAUREATE.—Disraeli remarks (Curiosities of Literature), "The custom of crowning poets is as ancient as poetry itself." Petrarch received the laurel crown at Rome on Easter-day, A.D. 1341. Maximilian I. founded a poetical college at Vienna in 1504. In England the king's versifier existed as early as 1251. Chaucer assumed the title of poet-laureate about 1369. The title of king's poet-laureate first occurs in the reign of Edward IV. (1461—1483), when one John Kay held the office. The first patent was granted in 1630.

POETS-LAUREATE.

Andrew Bernard, in the reigns of Henry VII. and Henry VIII.
John Skelton, born about the middle of the 15th century; died June 25, 1529.
Edmund Spenser, born about 1553; died Jan. 16, 1599.
Ben Jonson, born in 1573; died Aug. 6, 1637.
Sir William Davenant, born in February, 1606; died April 7, 1668.
John Dryden, born in 1630; deposed from the office in 1688; and died May 1, 1700.

Thomas Thadwell, born in 1640; died in November, 1692.

Nicholas Rowe, born in 1674; died Dec. 6, 1718.

Rev. Laurence Eusden, born (date uncertain); died Sept. 17, 1720.

Colley Cibber, born Nov. 6, 1671; died Dec. 2, 1757.

William Whitehead, born in 1716; died April 14, 1783.

William Tharton, born in 1728; died May 21, 1790.

Robert Southey, born Aug. 19, 1774; died March 21, 1843.

William Wordsworth, born in 1771; died April 21, 1850.

Alfred Tennyson, born in 1809.

POETRY has in all ages and in every nation been the original form of literary composition. "It is the first step by which our nature raises itself above the physical impulses to which we are subject in common with the lower order of creation, the first attempt to embody thought in a connected and persistent form." (Mure, Language and Literature of Greece, i. 146.) The song of thanksgiving uttered by Moses and the Israelites after their deliverance from Pharaoh, b.c. 1491 (Exod. xv. 1—19), is usually regarded as the most ancient poetical composition extant. Among the Greeks poetry was coeval with their national existence. They referred its origin to Orpheus, who is reputed to have lived b.c. 1397; but the poetic period of the Greeks did not commence till the time of Homer, b.c. 907, and continued till b.c. 560. The early history of Rome was preserved in the rude Saturnian ballads of the reigns of Tullus Hostilius and Tarquinius Priscus, but the chief Roman poets did not flourish till a much later period, Virgil being born b.c. 70, and Horace b.c. 65. Modern poetry may perhaps be regarded as commencing with the rude songs of the Germans, one of which, composed about a.d. 883, is found in honour of a victory over the Normans, possesses great merit. The Provençal bards of France also contributed greatly to introduce modern poetry. Their productions date from about 1096. Lawrence Minot, whose poems on the wars of Edward III., were composed in 1352, is the earliest original English poet, and John Barbour, who completed his great work "The Bruce" in 1373, produced the first Scotch poem. Geoffrey Chaucer, the father of English poetry, died in 1400. The earl of Surrey, who was executed Jan. 21, 1547, was the first English author who wrote blank verse.

POISONING.—This crime prevailed to a great extent among the ancient Greeks and Romans. A vegetable poison for destroying life easily and without pain was much used in Rome about b.c. 200. By 22 Hen. VIII. c. 3 (1531) prisoners were ordered to be boiled to death. (See Boiling to Death.) A confederacy of poisoners was discovered at Rome in 1659. "Margaret d'Aubray, the wife of the marquis of Brinvilliers, pursued her fatal career of poisoning in 1670, and the crime had become so prevalent in France at this period, that a special court was established to deal with the evil. The most notorious of modern poisoners in England was William Palmer, who poisoned his friend Cook Nov. 21, 1855. His wife and brother, it is supposed, previously suffered the same fate. He was executed at Stafford June 14, 1856.

POTTERS (France), known to the Romans as Limonum, afterwards took the name of its inhabitants, the Pictavii or Pictones, who submitted to Julius Caesar. It was pillaged by the Vandals A.D. 410. A great battle between the Franks under Clovis I. and the Visigoths under Alaric, was fought in the neighbourhood in 507. The latter were defeated, and their king was slain by the hand of his rival. The Saracens were defeated here by Charles Martel in 732, and the English under the Black Prince gained a complete victory over the French under John II., who was taken prisoner, Sept. 19, 1356. Poitiers was surrendered to the English in 1369, but reverted to France in 1372. During the religious wars of the 16th century it was taken from the Huguenots by the Roman Catholics, who committed great cruelties. An unsuccessful attempt was made to retake it in 1569 by Coligny. The church of Montierneuf, which belonged to a Benedictine abbey, was finished in 1096, and the cathedral of St. Pierre, which was commenced by Henry II. of England in 1152, was not finished till 1279. Councils were held here in 590; Jan. 13, 1000, in 1023, 1075; Jan. 13, 1074; Jan. 15, 1078; Nov. 18, 1100; and June 25, 1106.

Porre (France).—This ancient province formed part of Aquitania Secunda, and was held successively by the Vandals, the Visigoths, and the Franks, and came into the possession of England by the marriage of Henry Plantagenet to Eleanor of Guienne, a.d. 1153. It was taken from them in 1294 by Philip II.; was overrun by the English, under Edward the Black Prince, in 1356, and was ceded to England in 1360. It finally reverted to the crown of France in 1372.

Pola (Sea-fight).—The Venetian captain-general Vettore Pisani sustained a serious defeat off this town of Illyria, from the Genoese fleet of Luciano Doria, May 7, 1579. The loss on both sides was heavy, the Genoese admiral being among the slain.

Poland.—The Poles regard Duke Lech or Lesko L., who began to reign a.d. 550, as the founder of their nation. His successors held the country for about 300 years; but the history of their dynasty is so involved in myths as to be regarded as entirely fabulous. The authentic history of Poland commenced with the establishment of the Piast dynasty in 842.

A.D.
842. The peasant Piastus is elevated to the throne, and founds the dynasty of the Piasts.
965. Międzyrzecz L. is converted to Christianity.

1795. The third treaty of partition is signed, by which the kingdom of Poland becomes extinct. Nov. 25. Stanislaus abdicates at Grodno.

1796. Nov. Kosciusko is set at liberty by the emperor Paul.

1798. Feb. 11. Death of the ex-king Stanislaus at St Petersburg.

1804. Nov. 27. Napoleon I fixes his head-quarters at Posen.

1812. June 2. The general diet at Warsaw proclaims the re-establishment of the kingdom of Poland.

1813. Aug. and Sept. Owing to an insurrection, the assembly at Warsaw is suspended.

1816. Personal rule is re-established, and the first Polish diet is summoned.

1819. July 31. Liberty of the press is abolished in Poland.

1820. Sept. 6. The Polish diet is opened at Warsaw.

POLAR REGIONS. (See Arctic Circle, Franklin's Expeditions, North-West Passage, &c.)

POLAR STAR, the name given to a star of the second magnitude, in the constellation called Little Bear. Polaris is the nearest visible star to the North Pole. Its discovery is ascribed by the Chinese to the emperor Yong-Cheng, who reigned in the year B.C. 1790.

POLICE.—The celebrated writer Fielding introduced, A.D. 1753, a system of paid police, who were placed under the orders of the acting magistrate at Bow Street. The Thames police was established in 1798. The new police force for the metropolis was established by 10 Geo. IV. c. 44 (June 19, 1829), and was to extend to twelve miles from Charing Cross; and the force was placed under the control of two commissioners. The city police, though similar in organization, remains under the control of the corporation. By 19 Vict. c. 2 (Feb. 28, 1856), the metropolitan police was placed under the management of one commissioner. The police for counties and boroughs is regulated by 19 & 20 Vict. c. 69 (July 21, 1856), and the police for Scotland is regulated by 20 & 21 Vict. c. 72 (Aug. 25, 1857).

POLITICAL ECONOMY.—This science, which teaches the principles which govern the production and accumulation of wealth, and its distribution and consumption, was little understood by the Greeks and Romans. It may be said to owe its origin practically to the free towns that rose in Europe in the Middle Ages, though the system was not expanded until a later period. The English claim to be the first who established the just principles of commercial intercourse, though some continental writers award the honour to the Italians and the French. Sir Dudley North's "Discourses on Trade," published in 1691; Hum's "Political Essays," published in 1752; Harris's "Essay on Money and Coins," and Adam Smith's "Wealth of Nations," published in 1767; and Mill's "Political Economy," in 1821, are the principal English works on this science.

POLITICIANS.—This term, at first applied during the religious wars in France, to both Huguenots and Roman Catholics of moderate opinions, was in 1574 given to the faction headed by the duke d'Alençon and the sons of Montmorency. The duke was arrested, and the sons of Montmorency were sent to the Bastile, and several of their subordinates were executed.

POLKA.—The lavela described by Mr. John Davies in "The Orchestra" (1866), is supposed by a writer in "Notes and Queries" (xi. 152) to have resembled the modern polka introduced into this country about A.D. 1842.

POLIT. ACT, putting a price upon the heads of many Irishmen of distinction, was passed in Ireland A.D. 1465. This tyrannical law
was first put in force by the earl of Des- 

mond.

POLLAHOKE (Battle).—Sir Eyre Coote defeated Hyder Ali at this place, in Hindostan, Aug. 27, 1781. The battle lasted from nine in the morning till sunset, and was very hotly contested.

POLLENTIA (Battle).—A great victory was gained by the Roman general Stilicho over the Goths, under Alanic, at this place, in Italy, Easter-day (March 29), A.D. 403. Magnificent spoils, and the release of many thousand prisoners, were among the results of this triumph.

POLLY, or CAPITATION TAX, was levied in the Roman empire. It was first imposed in England by the parliament held at Northampton, Nov. 5, 1380. The severity employed by the tax-gatherers in its collection led to the rebellion of Wat the tyler, in 1381. The Kentish rebels assembled at Blackheath June 12, and entered London June 13. They plundered the city, and seized on the Tower June 14. They destroyed the palace of the Savoy, the archbishop of Canterbury's palace, and the priory of St. John's, Clerkenwell. Wat Tyler was killed by Walworth, lord mayor of London, June 15, at the conference with Richard II. in Smithfield. This put an end to the insurrection. In 1667 every subject was assessed by head according to his rank. The tax was abolished by William III. in 1690.

POLOTZ (Russia).—This town was in existence as early as the time of Ruric, the founder of the Russian power, who reigned from A.D. 847 to 879. It contains a ruined castle and a handsome church and college, which formerly belonged to the Jesuits. The French seized the town in July, 1312, and it was retaken by the Russians Oct. 20.

POLTAVA, or POTTSW (Russia), was besieged by Charles XII, in May, 1709, with an army of about 18,000 men. Peter the Great came to its relief with a force of between 60,000 and 60,000 men, and, on the 15th June, the celebrated battle of Poltava was fought, in which the Swedish monarch was defeated with great slaughter and compelled to take refuge in Turkey.

POLYGAMY was allowed among the Jews; has prevailed in Asia from time immemorial; and is still permitted among the Mohammedans. Polygamy was made felony in England by an act passed in 1604.

POLYGLOT.—A name given to Bibles with the text printed in many languages. The idea appears to have originated with Origen, who arranged the Old Testament in several languages in the 3rd century. The principal Polyglots are,—1. the Complutensian Polyglot, in four languages, brought out under the superintendence of Cardinal Ximenes in 1514 and 1515; 2. the Antwerp Polyglot, in 8 vols. folio, edited by Montanus, and brought out in 1569-72; 3. the Parisian Polyglot, in 10 vols. folio, edited by Le Jay, and brought out in 1629-45; 4. the London Polyglot, in 6 vols. folio, edited by Brian Walton, and brought out in 1654-7 (it consisted occasionally of nine languages); and 5. Bagster's Polyglot, in 1 vol. folio, published in London in 1831, the Old Testament being in eight, and the New in nine languages.

POLYNESIA.—This term, signifying "many islands," is applied to the numerous islands scattered over a great part of the Pacific Ocean. The work of discovery in this region was commenced by Magelhaens, who reached the Ladrone Islands March 6, 1520. He was followed at the close of the same century by Mendana and other Spanish navigators. The Dutch made further discoveries in the 17th century, and these were considerably extended by the English navigators, the most celebrated of whom, Captain Cook, was killed in a collision with the natives of Owhyhee, Feb. 14, 1779.

POLYTELECTRON.—This musical instrument was invented by Dietz about A.D. 1828.

POTLICHENIC INSTITUTION (London), for scientific studies and amusements, was first opened to the public Aug. 6, 1839. A serious accident occurred here by the fall of a staircase, Jan. 3, 1859, when one person was killed and nearly forty injured.

POLYTHEISM appears to have originated from a superstitious feeling regarding the heavenly bodies, and the great powers of nature. The Egyptians in the time of Moses (B.C. 1570) were polytheists. The Greeks and Romans, though acknowledging a supreme god, worshipped the lesser gods, and were essentially polytheists. In many parts of the world polytheism still prevails to a great extent.

POMERANIAN.—This tree, a native of most parts of the south of Europe, and of China, was cultivated in England by Gerard, A.D. 1596.

POMERANIA (Prussia).—This province derives its name from the Wends, who settled here about the beginning of the 6th century, and called it Po More (beside the sea). Mestibock, who flourished about A.D. 960, was the first prince of Pomeranis. On the death of Sambor, in 1107, the country was divided into two parts. The eastern part came into the possession of the Teutonic knights in 1296, and rather more than a century afterwards was annexed to the Polish crown. The princes of the other part of Pomerania were recognized as princes of the German empire and dukes of Pomerania in 1182. This dukedom was separated into two in 1285; was reunited in 1479; and the ducal line became extinct on the death of Boleslas XIII. in 1637. The country was divided between Prussia and Sweden. The latter gave up part of the territory in 1720, and the remainder in 1814, when the whole was incorporated in the Prussian kingdom.

POMEROY (North America).—This town of the state of Ohio was founded A.D. 1841.

POMONA, or MAINLAND (Orkney Islands), the largest of the group, is supposed to have
been colonized by the Picts. It was conquered by the Normans about A.D. 876, and remained subject to the kings of Norway and Denmark till the year 1468, when it was annexed to the Scottish crown by treaty.

Pompeii (Italy).—The date of the foundation of this city is unknown. It is said to have been conquered by the Sammites about B.C. 440, from whom it was taken by the Romans about eighty years after. In the Social war, which began B.C. 91, Pompeii, with the other towns of Campania, revolted and joined the Marean confederacy; but it escaped the punishment which was inflicted on some of the other cities. A quarrel between its inhabitants and those of Nuceris, in which the latter were defeated, took place A.D. 59; and in 63 Pompeii was almost destroyed by an earthquake. Other shocks followed at intervals. The first recorded eruption of Vesuvius occurred Aug. 23, 79, and overwhelmed the town. It remained buried till 1755, when excavations were commenced, and the whole city was at length recovered.

Pomptine of Pontine Marshes (Italy).—The marshes in the south of Latium received this name from their proximity to the town of Suessa Pomptia. They were first drained by the censor A. Claudius Cæcilius, B.C. 312. Trajan commenced a road through them A.D. 107, and it was opened in 110. Theodoric drained them in 500.

Pondicherry (Hindostan), the capital of the French possessions, was purchased by them from the rajah of Bejapore A.D. 1672, though they did not form a settlement till 1674. It was taken by the Dutch in 1693, but restored in 1697. Pondicherry, unsuccessfully attacked by the English in 1743, was taken by them in 1761, 1775, 1783, and 1803. It was restored to the French in 1815.

Pont-a-Chin, or Tournay, (Battle), was fought near Tournay, in Belgium, between the French, nearly 100,000 strong, under Pichegru, and the allies, May 23, 1794. After a desperate struggle, which lasted from five in the morning till nine at night, the allies made a gallant charge which drove the enemy from the field. It is sometimes erroneously called the battle of Espierres.

Pontefract, or Pomefret (Yorkshire).—In the time of the Saxons this town was called Kirkby. Its present name is derived from the Latin pons fractus from the breaking of a bridge over the Aire. Pomefret Castle, the remains of which still exist, was built A.D. 1060. During the civil war, the castle was garrisoned for Charles I. It was attacked by the parliamentarians in 1644, and taken by them in 1645; retaken by the royalists in 1648, and finally surrendered to Lambert, March 25, 1649, when it was destroyed by order of parliament.

Pontianak (Borneo), the chief of the Dutch settlements in the island, was founded A.D. 1523. They founded a factory here as early as 1776.

Pontifex Maximus.—The office of chief pontiff among the Romans is said to have been instituted by Numa Pomptilus. The emperor Augustus was made Pontifex Maximus A.D. 13, and the office was held by the emperors after his time until discontinued by Gratian in 375. Maximilian I., of Germany, assumed the title in 1511, and it is borne by the popes.

Pontigny (France).—To the hospitable care of the abbott of this monastery, some miles from the river, the sovereign pontiff was conducted by Thomas Becket, when he was exiled from England, A.D. 1164. Henry II. caused the fugitive to be driven from his retreat in 1165.

Pontus (Asia Minor) originally formed part of Cappadocia, and was a satrapy of the Persian empire. This satrapy, afterwards called Pontus by the Macedonians, was bestowed on one of the royal family of Persia, named Artabazes (B.C. 480). In the time of Mithridates the Great, Pontus included the whole of Paphlagonia and part of Bithynia. Mithridates assisted the Greeks against the Scythians B.C. 112—110, and after conquering many petty Scythian princes in Europe, formed connections with the Germanic nations as far as the Danube, B.C. 108—105. His first war with Rome, B.C. 89—85, arose through the attacks of his neighbour Nicomedes, at the instigation of the Romans. He lost Bithynia, Cappadocia, and Paphlagonia. A second war with Rome took place B.C. 84—81, and a third war occurred B.C. 75—64, which ended in the destruction of Mithridates, and the reduction of Pontus to a Roman province.

Kings of Pontus.

Ponz (Mediterranean Sea).—This island, the ancient Pontia, was attacked by the British Feb. 26, 1813, and after a short conflict the governor capitulated, and the garrison of the fortress surrendered as prisoners of war.

Poonah (Hindostan), chief town of the collectorate of the same name, was included in the estate of Shahjee, who built the palace for his own residence in the 17th century. The power of the minister was made supreme by Balajee, and that of the rajah merely nominal, A.D. 1740. The minister Bajee Rao allied himself with Scindia against Holkar; but having been defeated in an engagement, he sought the aid of the British in 1802. Colonel Wellesley, after marching at the head of his horse a distance of upwards of sixty miles in thirty-two hours, took pos-
session of the city in time to save it from being burnt by the enemy, April 19, 1808. Having leagued with the native powers against the British in 1817, a treaty was formed with him, by which the Mahratta confederacy was dissolved, his claims limited to his own possessions, and Ahmedunwarg and other places were ceded to the English, June 13, 1817. In the progress of the war he was compelled to flee, and ultimately resigned his office, and retired to Benares on a pension, June 3, 1818. An earthquake occurred June 10, 1819. Water-works were completed, chiefly at the expense of Sir Jamsetjee Jejeebhoy, in 1850. The government school is now united with the Sanscrit college, established A.D. 1821.

POOR KNIGHTS OF WINDSOR. (See Chap. 
POOR-LAWS.—By 23 Edw. III. c. 2 (1349), it was declared illegal to give anything to a beggar who was able to work. Poor people were ordered to abide in the place of their birth by 12 Rich. II. c. 7 (1388). Appo- priators of benefices were ordered to distrib- ute an annual sum to their poor parishioners by 15 Rich. II. c. 6 (1391). The first act enjoining the systematic maintenance of the aged and impotent poor was 27 Hen. VIII. c. 25 (1535). The present system of poor-laws was commenced by 43 Eliz. c. 2 (1601), which appointed overseers of the poor, au- thorized the erection of poor-houses, and taxed the householders in order to raise a poor-rate. This was followed by nu- merous statutes, which were consolidated and amended by the Poor-Law Amendment Act, 4 & 5 Will. IV. c. 76 (Aug. 14, 1834). This act instituted the "Poor-Law Com- missioners," whose period of office was ex- tended by subsequent acts to 1854, when they were superseded by the "Commissioners for administering the Laws for the Relief of the Poor in England," who were appointed by 10 & 11 Vict. c. 109 (July 23, 1847). Their name was changed to that of the "Poor-Law Board," by 12 & 13 Vict. c. 105 (Aug. 1, 1849). The removal of the poor is regulated by 9 & 10 Vict. c. 66 (Aug. 26, 1846), and 11 & 12 Vict. c. 110 (Sept. 4, 1845).—The first poor-law act for Ireland was 1 & 2 Vict. c. 56 (July 31, 1838).—The Scotch poor are regulated by 8 & 9 Vict. c. 83 (Aug. 4, 1845), which has been amended by subsequent acts.

POORUNDAH (Hindostan).—A treaty of peace was concluded here with the Mah- rattas, England acquiring the island of Salsette and other territory, June 3, 1776.

POOPAYA (New Granada) was founded by Benacazar, A.D. 1837.

POP.—From the Greek παταξ or πατα, signifying a father, was the common name of all bishops in the early church. Gregory VII., at a council held at Rome in 1076, ordered the title to be restricted to the bishops of Rome. In the following list,

BISHOPS OF ROM.

**Popes John**—Some chroniclers assert that in the 9th century a female named Joan assumed male attire, became a monk, and was elected pope on the death of Leo IV., A.D. 855. This story, with many variations, was believed until the Reformation, and Joan's female statue long occupied a place among the popes in the cathedral of Sienna.

**Popes John**—This game of cards is of great antiquity, having been played in this country before the reign of Elizabeth, when it was known as Pope Julio.

Pope John—Titus Oates, who had been chaplain of a man-of-war, and dismissed the service for immoral conduct, invented a plot against the Roman Catholics, asserting that they had conspired to assassinate Charles II., and extirpate the Protestant religion. The particulars were laid before the lord-treasurer Danby, Aug. 12, 1678, and several Roman Catholics were, in consequence, accused, and upon false testimony convicted and executed; among them was the venerable Viscount Stafford, beheaded Dec. 29, 1680. Oates, who had caused the death of so many innocent men, was con-
cited of perjury, May 8, 1685, and was fined, put in the pillory, and publicly whipped. William III. pardoned him June 6, 1689, and granted him a pension. The gunpowder plot and other conspiracies are known as popish plots.

**Poplar-tree.**—In ancient times the public places of Rome were adorned with rows of this tree; hence it came to be called *populus*, as being a tree appropriated to the people. The grey poplar is indigenous to England; the Lombardy poplar was brought from Italy about A.D. 1758.

**Population.**—The population of the world is estimated as follows:

**Population of the Globe.**

The population of porcelain was carried to the Corea about B.C. 203, and thence again into Japan, where it was cultivated with great success. Oriental porcelain was introduced into London by the Portuguese, A.D. 1518, but isolated specimens had been imported through the Barbary states before that year. Soft porcelain of inferior quality was made at St. Cloud in 1635, and at Chelsea before 1693, but no advance was made towards the manufacture of hard porcelain until 1706, when it was attempted in Saxony. In 1712 the Jesuit father Francois Xavier d’Entrecolles sent a complete description of its details from China to France, and its production was prosecuted with success at Stéves in 1769. The principal English manufactures of porcelain, with the dates of their establishment, are as follows:—Derby 1750, Worcester 1751, Caughly (Shropshire) 1756, Rockingham 1757, Plymouth 1760, Bristol 1772, Nantgarw (Glouomsire) 1813, and Swansea 1814. The celebrated porcelain tower of Nankin was originally built by King A-you, about B.C. 893. It was rebuilt by Chen-wen-ti, about A.D. 375, and after being again destroyed, was a second time rebuilt by Hoang-lai-tai in 1431. (See CHINA-WARE, CROCKERY-WARE, DRESDEN CHINA, and Earthenware.)

Porcelain Laws. Three Roman laws, brought forward by three different members of the Porcian family, enacted that no magistrate should punish with death, or scourge with rods, a Roman citizen when condemned, but allow him the alternative of exile. The period when these laws were passed cannot be ascertained with accuracy.

Potter's Islands (Walland Islands) was discovered by Commodore Byron, A.D. 1765, and a small settlement made by the English, who were expelled by the Spaniards, in 1770. This nearly led to a war, but Spain surrendered the sovereignty of the islands to England Jan. 22, 1771.

Porter.—The generally received account of the origin of this beverage is, that a London brewer, named Harwood, succeeded, A.D. 1722, in brewing malt liquor which combined the flavours of ale and beer, or ale, beer, and twopenny, and called it “entire,” or “entire butt,” to show that it was

Porcelain.—The finer parts of the potter's art were brought to great perfection in China at a very early date (p. China-ware). Hence the manufacture of porcelain was carried to the Corea about B.C. 203, and thence again into Japan, where it was cultivated with great success. Oriental porcelain was introduced into London by the Portuguese, A.D. 1518, but isolated specimens had been imported through the Barbary states before that year. Soft porcelain of inferior quality was made at St. Cloud in 1635, and at Chelsea before 1693, but no advance was made towards the manufacture of hard porcelain until 1706, when it was attempted in Saxony. In 1712 the Jesuit father Francois Xavier d’Entrecolles sent a complete description of its details from China to France, and its production was prosecuted with success at Sèvres in 1769. The principal English manufactures of porcelain, with the dates of their establishment, are as follows:—Derby 1750, Worcester 1751, Caughly (Shropshire) 1756, Rockingham 1757, Plymouth 1760, Bristol 1772, Nantgarw (Glouomsire) 1813, and Swansea 1814. The celebrated porcelain tower of Nankin was originally built by King A-you, about B.C. 893. It was rebuilt by Chen-wen-ti, about A.D. 375, and after being again destroyed, was a second time rebuilt by Hoang-lai-tai in 1431. (See CHINA-WARE, CROCKERY-WARE, DRESDEN CHINA, and Earthenware.)

Porcelain Laws. Three Roman laws, brought forward by three different members of the Porcian family, enacted that no magistrate should punish with death, or scourge with rods, a Roman citizen when condemned, but allow him the alternative of exile. The period when these laws were passed cannot be ascertained with accuracy.

Porter's Islands (Walland Islands) was discovered by Commodore Byron, A.D. 1765, and a small settlement made by the English, who were expelled by the Spaniards, in 1770. This nearly led to a war, but Spain surrendered the sovereignty of the islands to England Jan. 22, 1771.

Porter.—The generally received account of the origin of this beverage is, that a London brewer, named Harwood, succeeded, A.D. 1722, in brewing malt liquor which combined the flavours of ale and beer, or ale, beer, and twopenny, and called it “entire,” or “entire butt,” to show that it was
drawn from one cock. It acquired the name of porter from its consumption by porters and labourers. Mr. Henry T. Riley, in a communication to Notes and Queries (x. 123), quotes a passage from Nicholas Amherst's "Terra Firmis" for May 22, 1721, in which porter is mentioned.

Portage Act for regulating the rates of portage on small parcels in London, Westminster, and Southwark, was passed June 21, 1769.

Port Glasgow, or New Port Glasgow (Scotland).—This town was founded by the magistrates of Glasgow, A.D. 1668, as the seaport of that city. It received a municipal constitution in 1775. A graving dock was constructed in 1762; a chapel of ease was founded in 1774; and the parish church was built in 1823.

Portici (Italy).—This town, at the foot of Mount Vesuvius, stands near the site of the ancient city of Herculaneum, destroyed by an eruption of Vesuvius, Aug. 24, 79 A.D.

Port Jackson (Australia), discovered by Captain Cook A.D. 1770, was colonized principally by convicts in 1788. Sydney, the capital of New South Wales, is situated on this port, the harbour of Port Jackson.

Portland (Dorsetshire).—This island derives its name, according to some writers, from Port, a Saxon freebooter, who settled here about A.D. 501. A party of Danish robbers landed and slew the governor in 737, and it was plundered by Earl Godwin in 1052. The French invaded it and did great damage in May, 1416. Portland Castle, the residence of the governor, was built by Henry VIII. about 1520. The stone for which this island is celebrated was first brought into repute in the reign of James I. The sea is perpetually enroaching on the land, and great falls of the cliff took place in 1665, 1734, and 1792. A breakwater is in course of construction here, the first stone of which was laid by Prince Albert July 18, 1849.

Portland (Sea-fight).—A Dutch fleet of seventy-three ships of war, commanded by Van Tromp, with a convoy of three hundred merchantmen returning from the Isle of Rhé, was encountered off Portland by an English fleet of seventy sail, under Blake, Feb. 18, 1653, and a contest ensued which continued till dusk. The Dutch attempted to escape, but were pursued and overtaken off the Isle of Wight, Feb. 19, when the engagement was renewed. A running fight was continued till the fleets were within a few miles of Calais, when the enemy effected their escape, Feb. 20, having lost eleven ships of war, sixty merchantmen, 1,500 men killed and wounded, and 170 vessels captured.

Portland Administration, was formed on the dissolution of All the Talents administration (g. t.), March 25, 1807. The cabinet consisted of

Treasury .... Duke of Portland
Lord Chancellor .... Lord Eldon
President of the Council .... Earl of Westmoreland
Privy Seal .... Earl of St. Albans

Lord Harrowby (created Earl Harrowby July 18) was made president of the Board of Trade July 11, 1809. Dissensions broke out in the cabinet, Viscount Castlereagh and Mr. Canning fought a duel, Sept. 22, having previously resigned their offices. Earl Bathurst became secretary of state for foreign affairs Oct. 11, 1809. The duke of Portland died Oct. 30, 1809, and after various negotiations, Mr. Spencer Perceval was appointed prime minister in November, 1809. (See Perceval Administration.)

Portland Vase, formerly known as the Barberini Vase, one of the choicest specimens of ancient art, was discovered at Monte del Grano, near Rome, about the middle of the 16th century, in a marble sarcophagus supposed to have been that of Alexander Severus (A.D. 222—235) and his mother Julia Mamaea. It was placed in the Barberini palace at Rome, where it remained till 1770, when it was purchased by Sir W. Hamilton, and afterwards came into the possession of the duke of Portland. The duke presented it to the British Museum in 1810, and it was broken to pieces by a man named Lloyd, Feb. 7, 1845. The fragments were skillfully put together, and the vase was restored.

Port Louis (Mauritius), the capital of the island, owes its origin to M. de la Bourdonnay, the French governor, who fortified it and made it the seat of government A.D. 1734. It was taken by the English in 1810, and ceded to England in 1815. Port Louis was ravaged by fire in 1816, and by the cholera in 1819.

Porto Bello (South America), discovered by Columbus A.D. 1502, was taken from the Spaniards by the British, under Admiral Vernon, Nov. 20, 1739. At this time the town was the great mart for the commerce of Chili and Peru; but in 1740 the galleons ceased to resort here, and it rapidly declined in importance.

Port d'Anzo (Sea-fight).—The Venetian admiral Vettore Pisani defeated the Genoese fleet, under Luigi de Fieschi, near the promontory of Antium, or Porto d'Anzo, in Italy, May 30, 1375. The engagement is remarkable as having taken place during a violent gale.

Porto Ferrajo (Elba), the capital of the island, was built and partly fortified by Cosmo I., duke of Florence, 1548. The fortifications were completed on a magnificent scale by Cosmo II. in 1628. Porto Ferrajo is celebrated as having been the residence of Napoleon I. from May 4, 1814, to Feb. 26, 1815, when he made his escape to France.

Portolongo (Sea-fight).—The Venetian fleet, under the captain-general Pisani, was
attacked by the Genoese squadron of Paganino Doria, off this place, to the south of the Morea, and completely routed, Nov. 4, 1834.

PORTO NOVO (Battle).—Sir Eyre Coote defeated Hyder Ali near this sea-port town, in the presidency of Madras, July 1, 1751. The English had 24 guns, with 55 light field-pieces, and Hyder Ali had under his command 80,000 men, with 47 pieces of heavy artillery. The former lost 587 men in killed and wounded, and the latter 10,000 men.

PORTO RICO (West Indies).—This island was discovered by Columbus a.d. 1493. Sir Francis Drake and Sir John Hawkins attempted to take it in 1585, but were repulsed. It was captured by the English towards the end of the 17th century, and abandoned in consequence of the prevalence of dysentery. It was unsuccessfully attacked by a British force under General Abercomby, in 1797. A revolt, that broke out against the Spanish government in 1820, was suppressed in 1823.

PORT PHILIP (New South Wales).—The harbour of Port Philip was discovered by Lieutenant John Murray in the beginning of the year 1802, and was named after the first governor of the colony, Colonel Collins, with a party of convicts, landed here in 1804, to found a settlement, but afterwards removed to Van Diemen's Land. Another settlement was formed in 1835. Melbourne, the capital of the colony of Victoria, called Port Phillip until 1859, is situated near this harbour.

PORT REPUBLICAIN (Hayti), formerly called Port-au-Prince, the capital of the republic of Hayti, was founded a.d. 1749, and was nearly destroyed by an earthquake in 1770. The negroes who had revolted committed great devastation in 1791, and it was taken by the English in 1794. A disastrous earthquake occurred May 7, 1842, and nearly one-third of the town was destroyed by fire Jan. 9, 1843.

PORT ROYAL (Jamaica), formerly the commercial capital of the island, was nearly destroyed by an earthquake a.d. 1692. A new town was built, and it was destroyed by an earthquake June 7, 1692; and having been rebuilt, was again destroyed by a hurricane Aug. 28, 1722. The public offices were then removed to Kingston, and the town sank into insignificance.

PORT ROYALISTS.—This order of nuns was founded by Matilda de Garlande and Eudes de Sully, who built the celebrated nunery of Port Royal, near Chevreuse, in France, a.d. 1204. In 1609 its rules were reformed by the abbess Angelica, and in 1626 the community removed to Paris. The nuns added to the name of Filles de St. Sacrament to their other names in 1647; and, in consequence of their increased numbers, re-established their old house at Chevreuse, to which they gave the name of Port Royal des Champs. The newly-constituted house embraced the Jansenist heresy, and was, in consequence, separated from the Paris house, established by royal letters patent in July, 1665. It continued a ceaseless source of trouble, till it was finally suppressed by a bull of Pope Clement XI., Oct. 29, 1708. The building was pulled down by Louis XIV. in 1710. The Paris establishment continued until the suppression of all the religious houses in 1790. On the restoration of the Bourbons in 1814, they inhabited a house in the Rue St. Antoine; and in the early part of 1841 they formed two divisions, one of which settled at Lyons, and the other at Besancon. (See Jansenists.)

PORTSMOUTH (Hampshire) derives its name, according to some authorities, from its situation at the mouth of a capacious harbour on the southern coast. Other writers say that it was thus named from Port, who, with his sons Bieda and Maggia, landed here a.d. 501, and are supposed to have founded the ancient town of Porchester, which stood about three miles to the north-west. On the retiring of the sea from this place, the inhabitants removed, and erected the present town. Alfred the Great fitted out a fleet here, and defeated the Danes in 893. It was a place of importance in the time of Henry I., and received its first charter from Richard I. in 1193. A naval station was established here in the reign of John. The French attacked and burnt a considerable part of the town, and were afterwards repulsed, with great loss, in 1377. It was strongly fortified by Edward IV. A powerful French fleet, with a large military force for the invasion of England, having anchored off St. Helen's, a British army assembled at Portsmouth; and the British fleet, after a desperate engagement, repulsed the enemy, with great loss, in 1544.

The fortifications were greatly strengthened in the reign of Elizabeth. The duke of Buckingham was assassinated here by Felton, Aug. 28, 1628. Felton was hanged at Tyburn Nov. 19, 1628, and afterwards gibbetted on Sourthea Common. During the civil war the town fell into the hands of the parliamentarians. Charles II. was married here to Catherine of Portugal, May 21, 1662. Disastrous fires occurred in the dockyard July 3, 1761, and July 27, 1770.

Another (the work of an incendiary named James Aitken, alias John the Painter) took place Dec. 7, 1776. It broke out in the day, several hours before the incendiary had purposed, and the damage was confined to the rope-house and a few adjoining stores. Painter confessed the crime, and was hanged at Portsmouth dock-gate March 10, 1777. The fortifications were strengthened and extended in the time of William III. The Royal George sank here Aug. 30, 1782, when Admiral Kempenfelt, with 400 men and many women and children, perished. A sill was proposed by Mr. Pitt in 1786 for the fortification of Portsmouth and continues, which required an outlay of several hundred thousand pounds. Lord Palmerston, in his cabinet minute on the defences of the country, in 1846, said that 10,000 men were
required for the garrisons of Portsmouth, Plymouth, and Chatham; and the duke of Wellington considered that, in the event of a declaration of war, Portsmouth ought to have a garrison of 10,000 men. The parish church of St. Thomas, founded about 1220, was rebuilt in 1693. The church of St. Paul's, Southsea, was built in 1822, and All Saints', Newtown, in 1857. A mechanics' institution was founded in 1825.

PORTSMOUTH (North America).—This town, in New Hampshire, was founded A.D. 1623, and received a charter of incorporation in 1633. A fire, which destroyed 102 buildings, occurred in December, 1802; and a still more destructive one, destroying 392 buildings, took place in December, 1813.

PORTUGAL.—This kingdom, the ancient Lusitania, anciently underwent the same political changes as Spain, and was governed successively by the Vandals, Visigoths, and Moors. (See SPAIN.) It became a distinct principality in 1095, and was erected into a kingdom in 1139.

A.D.

1438. Don Ferdinand dies in captivity among the Moors.

1440. Alfonso attains his majority.

1443. Civil war breaks out between the king and the late regent, and the latter is defeated and slain.

1445. The battle of Bragança, detected in treasonable practices, is executed.

1447. John 13. The infant, Don Alfonso, is killed by a fall from his horse.

1449. Accession of Emanuel, founder of the Viseu line, Portuguese sovereignty.

1457. Duarte sustains a disastrous defeat at Tangier from the Moors, who retain the infant, Don Ferdinand, as hostage.

1448. Duarte dies of the plague, and the crown is left to his infant son Alfonso, under the regency of his mother, Leonora.

1450. Don Pedro, duke of Coimbra, obtains the regency.

1474. John V. assumes the title of "Most Faithful Majesty."

1475. Nov. 1. The great earthquake overthrows Lisbon. (See EARTHQUAKES.)

1476. The duke of Aveiro conspires against the king, and is defeated and executed. The Jews are expelled from the kingdom on a charge of impulsion in the conspiracy.

1478. Don Pedro, prince of Brazil, marries his niece, the infant Maria, by the will of her father, Don Juan.

1479. The Spaniards invade Portugal, and seise Braganza, Miranda, Almeida, and other places.

1482. Treaty of Pardo.

1487. Peace is restored by the treaty of Parma, which annexes himself to be King Sebastian who was slain at Alcazar. (See SEBASTIANISTS.)

1488. The bishop of Braga conspires to restore the Spaniards.

1494. The Spaniards are defeated at the battle of Montijo.

1495. The Spaniards invade Portugal and seize Evora and other places.

1496. The Portuguese and General Schomberg totally defeat the Spaniards at the battle of Vilaviosa, or Montes Clarens, which secures the sovereignty of Portugal to the house of Braganza.

1497. Alfonso VI. becomes odious from intemperance, and is deposed by his brother Don Pedro, who assumes the regency.

1498. Feb. 13. Peace with Spain is restored by the treaty of Lisbon.

1499. The Cortes assemble for the last time.

1505. May 16. Portugal joins the grand alliance against France.

1506. War is renewed with Spain.

1507. John V. assumes the title of "Most Faithful Majesty."

1508. May 28. The great earthquake overthrows Lisbon. (See EARTHQUAKES.)

1509. Peace is restored by the treaty of Tordesillas.

1514. Fall of the minister Pombal.

1515. March 31. A treaty of friendship and commerce is concluded with Spain, at Pardo.

1517. Queen Isabella, crown princess, and her son John, prince of Brazil, is declared regent.

A.D. 1827, Oct. 27. A treaty for the partition of Portugal is concluded between France and Spain at Fontainebleau. Nov. 27. A French army under Junot enters Lisbon. Nov. 29. In consequence of the approach of the French, the court sails for Brazil.

1829. March 29. The French under Marshal Soult take Oporto.

1830. Aug. 27. Massena takes Almeida. Sept. 27. Wellington defeats Massena at Bussaco (q. v.).

1831. April 10. Sir Stapleton Cotton defeats Soult at the battle of Villa Franca. The English parliament grants £100,000 for the relief of the Portuguese sufferers by war this year.

1832. Apr. 24. The garrison at Oporto revolts and forms a provisional government. Sept. 15. The revolution reaches Lisbon. Oct. 1. The palace of Oporto is plundered and Lisbon is established by a constitutional junta.

1833. July 4. The court returns to Portugal, and is established at Lisbon. Aug. 21. Riots take place at Lisbon.

1834. Jan. 23. The independence of Chili is acknowledged. Oct. 1. The king swears fidelity to the constitution. Oct. 15. Brazil shakes off its independence from Portugal. (See Brazil.)

1835. May 27. The troops declare against the constitution. June 5. The king revokes the constitution.

1837. May 13. Portugal recognizes the independence of Brazil. Aug. 29. A treaty is concluded with Brazil.

1846. Oct. 27. The queen publishes a proclamation stating that she will exercise absolute sovereignty until the restoration of order. Oct. 29. General Schwarzbach defeated the rebels near Viana. Oct. 31. The royalists are victorious at Evora, and an English fleet, under Admiral Parker, anchors in the Tagus for the assistance of the queen. Nov. 2. The occupation of Palmella is abandoned. Dec. 22. Marshal Saldanha gains a great victory over the rebel forces under the count of Bomfin at Torres Vedras.

1850. June 22. An American squadron enters the Tagus to enforce the claims of the United States.

1852. July 8. The hereditary prince of Portugal swears to respect the constitution. July 9. An important additional act of the constitution is published, by which capital punishment for political offences is abolished, and other reforms are introduced. Dec. 18. The interest on the public debt is converted from five to three per cent. by order of the queen.

1853. Nov. 15. Death of Queen Maria I., who is succeeded by her son Pedro V., under the regency of his father. Dec. 19. The king regent takes the constitutional oaths.

1856. June 9. The Saldanha ministry resigns, and is succeeded by that of the marquis of Loule. The cholera rages in Lisbon this year.

1857. April 29. The marriage of the king with the Princess Stephanie of Hohenzollern-Sigmaringen is celebrated by proxy at Berlin. Nov. 27. The French slaver Charles et Georges is seized by a Portuguese cruiser and taken to Mozambique. The French government maintains that the negroes found on board were free labourers.

1859. March 15. A new ministry is formed under the duke of Terceira. July 17. Death of the young queen, from diptheria.

1861. Nov. 12. Death of Pedro V., who is succeeded by his brother, the duke of Oporto, under the title of Ferdinand II.

COUNTS OF PORTUGAL.

1810. Henrique, or Henry.

1512. Alfonso I.

1523. Alfonso II.

1533. Sancho II.

1548. Alfonso III.

1573. Denis, or Dionysius.

1625. Alfonso IV.

1637. Pedro I, the Severe.

1657. Ferdinand I.

1683. Joan, or John I., the Great.

1718. Edward.

1418. Alfonso V.

1431. Joan, or John II.

1445. Emanuel.

1521. Joan, or John III.

1573. Sebastian.

1675. Henry the Cardinal.

1680. Portugal is united to Spain.

1680. Joan, or John IV., duke of Braganza.

1656. Alfonso VI.

1706. Pedro II.

1716. Joan, or John V.

1720. Jose.

1777. Pedro III. and Maria I. (Frenchess).

1776. Maria I. Francesca alone.

1786. Joan, or John VI.

1795. Pedro IV.

1796. Maria II. (da Gloria).

1828. Miguel.

1833. Maria II. (restored).

1833. Pedro V.

1848. Ferdinand II.

POSEN (Prussia).—This province formerly belonged to the kingdom of Poland. Part of it was annexed to Prussia A.D. 1772, and the remainder in 1793. It was taken from Prussia, and annexed to the duchy of Warsaw in 1807, and restored in 1815. The secret societies for the deliverance of Poland from foreign dominion, which led to the revolution of 1830, had their ramifications in the duchy of Posen. An insurrection of this, Poles took place in April, 1848, attended by fearful atrocities on the part of the peasants, which were retaliated by the German troops. The revolt was put down in May, 1848.

POSEN, the capital of the province of the same name, was erected into a bishopric on the introduction of Christianity into Poland in the 10th century, and became the residence of the dukes of Poland in the 13th century. Napoleon I. gave an audience here to the deputies of Poland on behalf of that kingdom, Nov. 29, 1806. Murat threw up his command in the French army here, and abandoned the emperor's cause, Jan. 17, 1813. Eugene made a resolute stand at Posen for three weeks on the retreat of the French from Russia, and evacuated the city Feb. 12, 1813. An insurrection on behalf of Polish nationality broke out Feb. 14, 1846, but it was soon suppressed.

POSTING.—Cyrus, king of Persia, B.C. 559, 2 x 2
is believed to be the first who established a regular system of posting in his dominions, and Prescott states that the Peruvians and Mexicans possessed perfect institutions of the same kind, long before they were introduced into modern Europe. Edward IV. established post-stations at distances of twenty miles from each other between England and Scotland, about A.D. 1470. By 2 & 3 Edw. VI. c. 3 (1548), the hire for post-horses was made a penny a mile. The letting of post-horses was vested solely in the postmaster-general and his department by 12 Charles II. c. 35 (1660). The duty on licences for letting post-horses was regulated by 25 Geo. III. c. 51 (1755).

Postmaster-General.—The first post-master in England was Sir Thomas Randolph, who received the appointment A.D. 1551. The office was regulated by 12 Charles II. c. 35 (1660), which was repealed by 9 Anne, c. 10 (June 1, 1711). This act ordered the establishment of one postmaster-general, to be made and constituted by letters patent under the great seal.

Post-office (London).—A letter-office, in connection with the principal mails, was established A.D. 1635, under the superintendence of Thomas Witherings, whose receiving-house was in Sherborne Lane. By an act of the Long Parliament, passed in 1656, the erection of a central general office was ordered, and after the Restoration the measure was continued by 12 Charles II. c. 35 (1660), and it was amended by 9 Anne, c. 10 (June 1, 1711). At the commencement of the last century, the General Post-office was situated in Cloak Lane, near Dowgate, whence it was transferred to Bishopsgate Street, and afterwards to Lombard Street. In 1765 four houses in Abchurch Street were added to the establishment; but the accommodation proving insufficient, commissioners for choosing a new site were appointed by the private act, 55 Geo. III. c. 91 (1815), and a spot at the junction of Newgate Street and St. Martin's-le-Grand was selected. Excavations for the new building were commenced in 1818, but the proceedings were suspended, and the first stone was not laid till May, 1824. It was opened for business Sept. 23, 1829.

Post-office Savings Banks.—By 24 & 25 Vict. c. 14 (May 17, 1861), the postmaster-general was empowered to direct his officers at various places to receive cash deposits for remittance to the general office at London, to be repaid at 2½ per cent. interest. No deposit may be of less value than one shilling, and all the existing acts relating to savings banks apply to the Post-office banks. In accordance with this act, Post-office savings banks were opened throughout Great Britain, Sept. 16, 1861.

Posts and Postage.—Herodotus describes the Persian mode of forwarding communications by what they called relays, couriers being stationed along the road, one man and horse to every day's journey, B.C. 480. A somewhat similar course was pursued by the Romans in the time of Augustus, B.C. 31. Establishments of this kind existed in France under Charlemagne, Louis XI., and Charles V. In England royal messengers were employed, under the name of cokinus, nuncius, and garcio, for the conveyance of letters as early as A.D. 1259; Sir Bryan Tuke exercised supervision over these officials, holding a situation analogous to the modern postmaster-general, in 1533. An act was passed fixing the rate for post-horses at one penny per mile in 1548. Sir Thomas Randolph was the first post-master of England, appointed by Queen Elizabeth in 1581. James I. constituted the office of post-master for foreign parts, which was bestowed upon Matthew de l'Equester, in 1619. This office he assigned to William Frizzell and Thomas Witherings, who were protected by royal denunciation against private adventurers, in 1632. The letter-office of England and Scotland was established in 1635, and a weekly conveyance to all parts of the kingdom was set on foot by Edmund Prideaux in 1649, which was opposed by the common council of London; but parliament declared that the office was "in their sole power and at their disposal," March 21, 1649. The private undertakers, who performed the work for the public at a cheaper rate, continued to flourish, and expressed their determination, "by God's help," to go on; but John Manley, Esq., having farmed it for £10,000 per annum, the adventurers were forcibly put down in 1653; and an ordinance of the House of Commons, in 1657, set forth that government, holding the monopoly of posts, would be the best means to discover and prevent many dangerous and wicked designs against the commonwealth. Farmed to Daniel O'Neal for £21,500, the revenue was settled upon the duke of York, the king's brother, in 1663. It was again farmed to Sir William Petty at £43,000 in 1674. The metropolitan penny post (q.v.) was established in 1683, the net revenue being £65,000 in 1685. A distinct postal system had been organized for Scotland in 1662, and Sir Robert Sinclair received a grant from King William III. of the whole revenue, with a salary of £300 a year, to keep up the establishment, in 1698. The system was reorganized and consolidated by 9 Anne, c. 10 (June 1, 1711). The cross-posts were farmed in 1720, to Mr. Allen, who cleared out of his contract £12,000 a year, for forty-two years. The net revenue was £96,339 in 1724. The privilege of franking was confirmed and regulated by parliament in 1764. Mr. Palmer's improvements were inaugurated Aug. 2, 1784. (See Mail Coaches.) All previous post-office acts were repealed, their chief provisions being consolidated into one general statute, by 1 Vict. c. 32 (July 12, 1837); 1 Vict. c. 33 (July 12, 1837); 1 Vict. c. 34 (July 12, 1837); 1 Vict. c. 35 (July 12, 1837); 1 Vict. c. 36 (July 12, 1837), and 1 Vict. c. 76 (July 17, 1837). The London district postage was reduced to one penny, Dec. 5, 1839, and the uniform rate
of one penny came into operation Jan. 10, 1840.

Potassium.—This metal was discovered by Sir Humphry Davy A.D. 1807.

Potato.—This plant, a native of Chili and Peru, was, according to the generally received account, brought into England from Virginia by the colonists sent out by Sir Walter Raleigh, A.D. 1584, who returned in July, 1586. This, however, is not correct, the plant having first been described by Caspar Bauhin in 1590, and afterwards introduced here. For a long period the cultivation was limited to the garden, and it was not planted as a field crop in Scotland until 1732. By the middle of this century it was generally known throughout England. The failure of the potato crops in Ireland in 1845, and the four following years, caused one of the most terrible famines recorded in history.

Potosi (South America).—The silver-mines, near this town of Bolivia, in Peru, were discovered by an Indian, A.D. 1545.

Potsdam (Prussia).—The royal palace of Sans Souci, containing Frederick the Great's apartments in the state in which he left them, was commenced A.D. 1793. The town-hall was built in 1754. Over the tomb of Frederick the Great, at the hour of midnight, the emperor Alexander of Russia and the king of Prussia vowed eternal friendship, Nov. 3, 1805. Napoleon I. visited the town precisely one year after, Nov. 3, 1806.

Pottery. (See China-ware, Crockery-ware, Dresden China, Earthenware, and Porcelain.)

Poultry Compter (London).—The date of the foundation of this, the old sheriffs' prison, is not known, but it was certainly very ancient. It is stated that the name Compter, applied to debtors' prisons, is derived from computus, to account, because whoever slept in there must be sure to account, and pay well too, else he get out again." This prison was the only one spared in the Gordon riots of 1780.

Pound.—By 31 Edw. I. c. 1 (1303), the weight of the London pound was settled at twelve and fifteen ounces in different cases. A standard brass weight of one pound troy, made in 1768, and preserved in the custody of the clerk of the House of Commons, was made the imperial standard pound by 5 Geo. IV. c. 74, s. 4 (June 17, 1824), which fixes the weight of the pound avoirdupois at 7,000 grains troy.

Poundage. (See Tonnage and Poundage.)

Poynings' Act or Law.—The statute of Drogheda, restricting legislation in the Irish parliament to measures that had first been approved of by the English council, was passed A.D. 1494. It was named after Sir Edward Poynings, appointed deputy of Ireland, Sept. 13, 1494, and it was repealed in 1782.

Præmonstratensians.—This order of canons was established by St. Norbert in the Isle of France, A.D. 1120, and called from that Norbertines. Adopting the rule of St. Augustine, they were approved by Pope Honorius II. in 1126. Nicholas IV. granted them permission to eat flesh when travelling, in 1229; and Pius II. extended the licence to a general use of that diet, except during Lent, in 1460. They came into England in 1145, and were called White Canons.

Premonstrætensians, from praemonstratæ, a corrupt form of praemonstrati, to be forewarned, is the name of a writ issued for the prosecution of persons charged with certain offences, and it is also applied to the offences for which the writ is issued, which were originally such as related to the dominion of the papacy in this country. Persons convicted under writs of praemunire are placed out of the pale of the royal protection, their possessions are forfeited to the crown, and they themselves are committed to prison during the sovereign's pleasure. The first statute of praemunire is 27 Edw. III. s. 1, c. 1 (1333), but the most important is 16 Rich. II. c. 5 (1392), which prohibits the purchase of papal bulls from Rome, and declares the English crown independent of the temporal sovereignty of the pope. The killing of a person attainted in a praemunire was first declared unlawful by 5 Eliz. c. 1, s. 21 (1562). By 13 Charles II. c. 1 (1661), the assertion that parliament possesses legislative authority, independent of the royal sanction, is declared a praemunire, and by the Habeas Corpus Act, 31 Charles II. c. 2, s. 12 (1679), the illegal confinement of English subjects in foreign prisons submits the offender to the same penalties.

Pretores. —This title, originally applied to the Roman consuls, was specially appropriated to a magistrate called the praetor urbanus, b.c. 365. A plebeian first obtained the office b.c. 336. The praetor urbanus, for deciding questions in which foreigners were concerned, was created b.c. 247. Their number was increased by Sylla to eight, b.c. 80, and to sixteen by Tiberius. Praetorians were formed into nine cohorts, and made body-guards by Augustus. Claudius having been raised by them to the throne, gave to each a donation of £120, A.D. 41. Their expectations or demands in that respect rose so high that Hadrian complained that the promotion of a Caesar had cost him two millions and a half sterling in 117. The emperor Pertinax was murdered by them in 193, after which they openly put the empire up to auction, proclaiming from the ramparts that the Roman world was to be disposed of to the highest bidder, when it was "knocked down" to Didius Julianus, a Severus from Syria, convicted of death, a hundred miles from the capital, and remodelled the force, establishing the office of praetorian prefect, in 197. During a popular tumult, they were besieged by the citizens in their camp in 238. Diocletian abolished their privileges, and reduced their numbers in 303. They were totally routed by Constantine I. near Rome in 312, and he suppressed them in 313.
PRETOR PEREGRINUS.—This officer, who administered justice between Roman citizens and foreigners, or between foreigners, was created B.C. 247.

PRAGA (Poland), a suburb of Warsaw, was destroyed by the Russians, Nov. 5, 1794. The Poles, after a two days' conflict, were defeated here by the Russians, Feb. 23, 1831. An ordinance, issued by Louis IX. of France, A.D. 1268, resisting the claim of the Roman pontiffs to nominate the bishops of France, was renewed and confirmed by the states of the kingdom assembled by Charles VII. at Bourges, A.D. 1428. A concordat, abrogating the chief provisions of the Pragmatic Sanction, was signed Aug. 18, 1516, in the reign of Francis I. Another ordinance bearing this title, to regulate the succession in his family, was issued by the emperor Charles VI. of Austria, A.D. 1724. The name has been conferred upon several edicts.

FREIS (or Freiz).—The town was founded about A.D. 759, and the Neustadt, or new town, in 1348. Prague was captured by Henry the Fowler in 930. The Jews were nearly exterminated by the populace, in consequence of a rumour that they had insulted the Host, in 1290. The cathedral was commenced in 1344; the city was made the capital of Germany in 1347; the first university in Germany was founded here by the emperor Charles IV. in 1348, and the palace of the kings of Bohemia in 1363. The Hussite insurrection took place in 1419, and the famous articles of Prague were promulgated by Ziska in 1420. Sigismund captured Prague in 1435. Maximilian of Bavaria defeated Frederick V. the elector palatine, at the battle of Prague, fought Nov. 8, 1620. The peace of Prague was signed in 1635. Prague was taken by the Swedes in 1648, and was occupied, Nov. 26, 1741, by the French, under Marshal Broglio. They were blockaded by Prince Charles of Lorraine for nearly two years, when, most of the garrison having escaped, the rest capitulated (1742). In 1744 Prague was taken by Frederick II. of Prussia. He defeated the Austrians under the walls of Prague, May 6, 1757, and laid siege to the town, but was eventually obliged to retire and evacuate Bohemia. A congress of the allied powers and Napoleon I. met here July 5, 1813, and broke up Aug. 9. The people revolted against Austria June 12, 1848, and the insurrection was quelled June 19. The bishopric of Prague was founded by Boleslaus II. in 967, and councils were held here in 1355; April 29, 1351; June 17, 1392; and June 7, 1421.

PRAGUES.—Bingham states that the custom of holding morning and evening prayer daily in churches commenced in the 3rd century A.D. (See Common Prayer.)

PANTOCRATOR.—This doctrine was first taught in the Christian church by St. Augustine, A.D. 442. It led to bitter controversies, and in 469 Faustus protested against it. Lucidus, a disciple of St. Augustine and an advocate of predestination, was compelled to retract his opinion at the councils of Arles and Lyons, both held in 475. This is one of the doctrines maintained by the Calvinists.

FREEZ, or FREEZ (Denmark), owes its origin to a convent, founded A.D. 1216.

PRENZLAW, or PRENZLAU (Prussia).—St. Mary's Church, one of the most remarkable brick buildings in Germany, was built A.D. 1325. Twenty thousand Russians, under the prince of Hohenlohe, surrendered to the French at this town in October, 1806.

PREROGATIVE COURT.—This court was established for the trial of will cases, and was under the jurisdiction of the archbishop of Canterbury, who appointed its judge, and enjoyed by special prerogative a probate of all wills made in his archbishopric. Appeals from this court were at one time made to the pope, but by 25 Hen. VIII. c. 9 (1533), they were ordered to be made to the king in Chancery, this act was repealed by 2 & 3 Will. IV. c. 29 (1830), which transferred the appeal to the Privy Council, and by 3 & 4 Will. IV. c. 41 (Aug. 14, 1839), it was ordered to be made to the Judicial Committee of the Privy Council. This court was abolished by 20 & 21 Vict. c. 85 (Aug. 28, 1857).

PRESBURG, or PRESSBURG (Hungary).—Often having fallen into the hands of the Turks, A.D. 1446, Presburg was declared the capital of Hungary, and the diets were held here. It was again made the capital after the capture of Buda by the Turks in 1541, but in 1784 Joseph II. again made Buda the capital. Presburg was taken by Bethlen Gabor in 1619, and was retaken in 1621 by the Imperialists under Bouquet. A treaty was signed here Dec. 26, 1806, after the battle of Austerlitz, by which Venice was ceded to France, and the Tyrol to Bavaria. The royal palace was destroyed by fire in 1811. The defences of Presburg were strengthened in 1850.

PRESBYTERIANISM appears to have been the early form of church polity among the Waldenses, from the treatise of Archbishop Seyssel, of Turin, A.D. 1520, confirmed by a letter of Morel, a Waldensian minister, in 1590. Luther is found advising the Bohemians to elect their own pastor in 1523. John à Laseo established this form of church government at Edemburg in 1524, and its divine right was maintained in a conference held at Wesel in 1566, and also by the synod at Edemburg in 1571. It was introduced into Westphalia in 1588. The system was recognized by the Bohemian Book of Order, adopted in 1616, and has existed in Hungary since 1654. It was partially adopted in Switzerland in 1541, and made way in France in 1555; the first national synod having been held at Paris in 1559, and the last at Loudun in 1669. The first Dutch synod met at Dort in 1574. A party, consisting of fifteen ministers and a number of laymen, met at Zutphen in 1572. It was declared by parliament to be "lawful, and agreeable to the
word of God,” and an order for the election of elders was made in March, 1646. With the exception of chapels for the king and peers, all parishes were declared to be under this form of church government in 1646. It was superseded by episcopacy at the Restoration in 1660. The first general assembly of the church of Scotland met in 1560; the assembly was dissolved by Cromwell in 1653. The first meeting of a press-yard in Ireland took place at Carrickfergus in 1642.

PRESCOTT (Upper Canada).—A number of American sympathizers having landed here a.d. 1838, were attacked and compelled to surrender by the British under Captain Sandom and Colonel Young, April 16.

PRESIDENT.—The first president of the United States of America, George Washing-

ton, was elected a.d. 1789. Louis Napoleon was chosen president of the French republic Dec. 10, 1848.

PRESIDENT OF THE COUNCIL, the fourth great office of state in England, was at the new modelling of the privy council by Charles II., a.d. 1679, bestowed on Anthony Ashley, Lord Shaftesbury. This officer was styled Principalis et Capitalis Consiliarius in the time of King John.

PRESIDENT STEAMER.—This vessel, which left New York for Liverpool in April, 1841, was never heard of afterwards. Among the passengers were Lord William Lennox and Tyrone Power, the celebrated actor.

PRESSED TO DEATH.—This mode of pun-
ishment was instituted about the time of Edward I. Walter Calverley, of Calverley Hall, Yorkshire, was pressed to death Aug. 5, 1604, by iron weights placed on his breast, in York Castle, for the murder of his wife’s children; and Major George Strangways was pressed to death Feb. 28, 1657, in the press-yard, Newgate, for the murder of his brother-in-law, Mr. Fussell.

PRESS-GANG.—“The uncertainties of raising troops by voluntary enlistment,” says Hallam, “led to the usage of pressing soldiers for service,” and in the preamble of an act empowering the king to levy troops by this compulsory method, for the sup-
pression of the Irish rebellion, it is declared that no man should be compelled to go out of his country to serve as a soldier except in cases of urgent necessity, a.d. 1641. The practice of raising seamen for the Royal navy in this manner seems to have prevailed from an ancient date, and by 2 Rich. II. c. 4 (1379), a remedy is provided against their desertion. Various statutes have regula-
ted the exemptions and penalties for con-
cealment, and by 5 & 6 Will. IV. c. 24 (Aug. 21, 1835), the period of compulsory service is limited to five years. The first imprest of sailors in Ireland was made in 1678. It was decided by the judges and crown lawyers that the power was indispen-
sably inherent in the crown in 1676. A de-
bate on a bill brought into the House of Commons by William Pitt, for setting the press-gang to work, led to a duel between

the minister and Mr. Tierney, who opposed it, the hostile meeting having taken place on Putney Heath, Sunday, May 27, 1708.

PRESTON (Lancashire).—The parish church was erected a.d. 930, and dedicated to St. Wilfrid. James I. visited Preston Aug. 14, 1617. The plague broke out in 1630. Having declared for Charles I., it was taken by Sir J. Seaton after a desperate resistance, Feb. 12, 1643, and was retaken by the earl of Derby March 17. The royal forces under Sir Philip Musgrave were defeated here by Cromwell, Aug. 17, 1648. The rebels, par-
tisans of the house of Stuart, were de-
feated near this town by General Carpenter, Nov. 13, 1715, and many of them were executed in the beginning of 1716. Prince Charles Edward, the Pretender, passed through Preston in his retreat towards Scotland, Dec. 12, 1745. The first cottom-
mill was built in 1777. A riot occurred here March 3, 1854.

PRESIDENTS', (Battle.) was fought at this village, near Edinburgh, Sept. 21, 1745, between the royal army, under Sir John Cope, and the Highlanders, under Charles Stuart, the Young Pretender. The former were defeated.

PRETENDERS.—James Francis Edward Stuart, called the Old Pretender, or the Chevalier de St. George, a son of James II., was born June 10, 1688. A bill of at-
tainder was passed against him in 1701. He landed at Peterhead, in Scotland, Dec. 22, 1715, and, after a vain attempt to obtain the crown, escaped from Montrose to France, Feb. 4, 1716. Charles Edward, the Young Pretender, landed in Scotland Sept. 4, 1745. After gaining the battles of Prestonpans and Falkirk, he was utterly routed at Culloden, April 16, 1746. He wandered for six months among the Highlands, a price of £30,000 having been set upon his head. He escaped Sept. 20, 1746, and landed at a small port near Morlaix, in

Britain, on the 29th. He died at Rome March 3, 1788.

PRIDE'S PURGE, so called from the activity with which Colonel Pride seized upon the members of the Long Parliament as they entered the House of Commons, Dec. 6, 1648. Many were taken prisoners, some fled to the country, and only fifty members remained (Dec. 8), who were afterwards styled the Rump (q.v.).

PRIEST.—Melchizedek, king of Salem, is called “priest of the most high God” (Gen. xiv. 18), b.c. 1913; Aaron and his sons were consecrated to the office b.c. 1496 (Lev. viii. & ix.), and all the tribe of Levi b.c. 1496 (Num. iii.). During the famine in Egypt, when Joseph bought up the land for Pharaoh, the priests were left in possession of their portion, b.c. 1706 (Gen. xlviii. 22). The duties of the priests were con-

nected with the kingly office among the early Greeks, and were performed by the heads of families, as appears from various passages in Homer. Five priests were selected from among so many aristocratic
families to superintend the oracle of Delphi about B.C. 585.

Printers.—The first of these devotional works, in which the practice of praying to saints was denounced, with a design to weaken the papal system, was printed by John Byddyll, June 16, 1555. This was followed by a second; and a third, under the express sanction of the king, was published in 1545. The three printers, edited by Dr. Edward Burton, were published in an octavo volume by the university of Oxford in 1894.

Primo-geniture.—In the times of the patriarchs the firstborn son always inherited his father’s position as head of his family. The Roman law did not acknowledge the principle of primogeniture, and it was not recognized in France until the time of the Capets. It was established in England by the Normans, and took effect almost in all cases, except where its operation was hindered by the customs of gavelkind and borough-English (q. v.).

Prince Edward’s Island (North America), discovered by Cabot June 24, 1497, was afterwards included in the territory of New France, and was granted in 1663 as a feudal tenure to Sieur Doublet, a French naval officer. It was taken by the British in 1745, but restored at the peace of Aix-la-Chapelle; retaken by them in 1758; and, at the peace of 1763, confirmed, with Cape Breton, to England. In 1768 it was erected into a separate colony. The first house of assembly met in 1773.

Prince of Wales’ Island (Strait of Malacca). (See Penang.)

Prince’s Island (Atlantic Ocean).—This island, on the coast of Africa, was discovered A.D. 1471, and now belongs to Portugal.

Printing.—The art of block-printing was known in China as early as B.C. 202, and is said to have been introduced from that country into Europe by Marco Polo, in the latter part of the 13th century. It was first employed in this quarter of the globe in the manufacture of playing-cards and little books of devotion, consisting in most cases of only one page, illustrated by rude pictures, and containing short scripture texts. The earliest date on these books is 1422. The invention of printing with movable type is claimed for several persons, the chief of whom are Laurence Coster, of Haarlem, John Gutenberg, John Faust, and Peter Schoeffer, of Mentz. Coster is said to have printed by means of separate wooden types tied together with thread as early as 1430; but the evidence of this is extremely doubtful. John Gutenberg, or Geinitzleisch, established himself at Mainz in 1441, and printed two small books in 1442. In 1443 he took Faust, or Faust, into partnership: and in 1450 he first employed cut metal types in the production of the Mazarin Bible, which appeared five years later. About the same year Peter Schoeffer, the servant of Gutenberg and Fust, invented cast metal types, which were first used in 1459. By 39

Geo. III. c. 79, s. 23 (July 12, 1799), all persons possessing printing materials were required to send a notice thereof to the clerk of the peace, for transmission to the secretary of state. This act was amended by 51 Geo. III. c. 65 (June 10, 1811), and by 2 & 3 Vict. c. 12 (June 4, 1839).

A.D.

1455. The Mazarin Bible is printed by Gutenberg.

1457. Fust and Schoeffer print the Psalter.

1462. Count Adolphus of Nassau takes Mentz, and compels the printers to remove to other towns, whereby the art is diffused.

1465. Greek characters are first employed this year.

1466. The use of them was at first confined to quotations. Printing was first practised in Italy this year, at Subiaco, in the Papal states.

1466. Swényzcheyn and Pannartz establish the first press at Rome.

1467. The first Roman types.

1468. A book is said to have been printed at Oxford this year.

1469. The first French press is established at Paris.

1470. “Signatures” are first employed by Antonio Zorat at Milan.

1471. Caxton sets up the first press in England, at Westminster, and prints the “Game of Chess.”

1473. Printing is introduced into Spain, at Barcelona.

1476. The first work wholly in Greek type is printed at Milan.

1488. The first Bible in Hebrew characters is printed at Sorincio, in Italy.

1495. The first printing of music is introduced into England.

1500. Aldus Manutius invents italic type about this year.

1525. Ottavio Petrucci invents music-printing from metal types.

1529. The first patent of king’s printer is granted to Thomas Berthelet this year.

1540. The “Bryth of Mankyrved,” printed this year, is the earliest English work in which copper-plate printing is employed.

1542. The “Imprimerie Royale” is established at Paris by Francis I.

1551. Humphrey Powell introduces printing into Ireland.

1567. By order of the Star Chamber, the businesses of printer and type-founder are ordered to be kept distinct, and only four type-founders are permitted in the kingdom.

1638. The first press in America is set up at Cambridge, Massachusetts.

1790. Type-composing is first practised with success in England, by William Caslon.

1795. Stereotype printing is invented by William Ged, of Edinburgh.

1776. The printing of maps with movable types is invented by Conrad Swényzcheyn.

1778. Henry Johnson invents logographic printing with type.

1780. Mr. Tilloch invents an improved system of stereotyping.

1784. Valentine Hatly invents embossed typography, and applies it to printing books for the blind.

1790. Mr. W. Nicholson patents a self-acting printing machine.

1800. Lord Stanhope invents the Stanhope press.

1804. Fowles directs attention towards the improvement of the printing-press.

1811. April. The sheet H of the Annual Register, for 1810, printed this month, is the first wood print issued by a machine.

1814. Nov. 28. The Times of this day is the first steam-printed newspaper, König’s machine being the apparatus employed.

1815. Composition balls for inking type are invented by Mr. Benjamin Foster.
PRINTING IN COLOURS.—This art originated in the desire of the old printers to enable their productions to vie with the illuminated MSS. of their predecessors the monks. The Psalter of Faust and Schoefeer, printed in 1457, is one of the earliest examples, and in 1509 Lucas Cranach produced the first attempt in printing in chiaroscuro. A very fine German engraving in colours bears the date of 1543, but is of doubtful authenticity. Mr. J. B. Jackson devoted much time to the subject, and published a work on engraving and printing in chiaroscuro in 1754, and in 1819 Mr. William Sanger commenced his "Handbook on Decorative Printing." Mr. George Baxter's first efforts in printing in colours were made in 1835, and in 1837 M. Engelmann succeeded in effecting it by lithography.

PRINTING-MACHINE.—For a long period after the invention of printing, the press remained unaltered. About A.D. 1620, William Jansen Blaew introduced several improvements. The first patent for machine-printing was taken out by William Nicholson in 1790, and in 1813 Donkin and Bacon introduced a new machine, in which the type was arranged on a piston. The first practically successful machine was König's, which was constructed in 1814. In 1816 Mr. Edward Cowper made a machine for using curved stereotype plates; in 1818 one for ordinary type; and in 1827, conjointly with Mr. J. Appleyard, he invented a four-cylinder machine for the Times, which printed between 4,000 and 5,000 copies per hour. Applegarth's vertical machine, invented in May, 1848, produces no fewer than 15,000 impressions per hour. Hoe's American machine, introduced into this country about 1856, prints about 20,000 sheets per hour. (See PRINTING.)

PRIORITIES, originally offshoots from, and subordinate to, the great abbey, were introduced into this country about the commencement of the 7th century. The alien priories (q.v.) were dissolved by act of parliament, and granted to the crown A.D. 1414. Cathedrals founded for priories, were turned into deaneries and prebends in 1540. The priory of Canterbury, with others, was dissolved about 1538. The priors of cells were granted pensions of £13 per annum by Henry VIII., in 1538.

PRISCILLIANISTS, followers of Priscillian, bishop of Avila, in Spain, A.D. 372. This doctrine was a strange compound of Gnostic and Manichaean opinions, and his followers were excommunicated by the council of Saragossa, and sentenced to exile by Gratian in 380. They were condemned by the council of Bordeaux in 384. Priscillian, and two of his adherents, were beheaded at Trèves in 385, being the first reputed heretics who judicially suffered capital punishment.

PRISONERS OF WAR.—Among the ancients, prisoners of war were either sacrificed to appease the manes of such as had fallen in fighting against them, or, as was most frequent among the most polished nations, were made slaves. During the feudal ages they were redeemed by ransom, and the present custom of exchanging prisoners was not firmly established till about the middle of the 17th century. The Dutch were in the habit of selling the captives they made in Barbary to the Spaniards, as late as 1664, and in 1792 Christian prisoners of war were used as domestic slaves in Turkey.

PRISONS.—By 1 Edw. III. s. 1, c. 10 (1340), the custody of prisons was vested in the hands of the sheriffs, and heavy penalties on such as assisted prisoners to escape were imposed by 16 Geo. II. c. 31 (1743). John Howard's efforts to ameliorate the condition of prisoners commenced in 1775, in consequence of the hardships he endured during a captivity at Brest as a prisoner of war, and Elizabeth Fry began her benevolent exertions among the female prisoners at Newgate in 1808. The laws relating to the building and regulation of the prisons of England and Wales were consolidated and amended by 4 Geo. IV. c. 64 (July 10, 1823). The four inspectors of prisons were first appointed by 5 & 6 Will. IV. c. 38 (Aug. 25, 1835). In addition to Bridewell, the Fleet prison, the King's (or Queen's) Bench, Newgate, and the Poultry Comptor (q.v.), the chief prisons connected with London are the following:

Coldbath Fields Prison, or the Middlesex House of Correction, founded in 1615, and rebuilt in 1790.

Giltspur Street Comptor, a debtors' prison, built by Dance in 1791.

Holloway New City Prison was commenced Sept. 26, 1849.

Horsemonong Lane Gaol, commenced in 1791, was completed in 1798.

House of Detention, Clerkenwell, founded in 1775, and rebuilt in 1818 and 1841.

Marshalsea Prison, founded before 1376, and removed to the King's (or Queen's) Bench in 1842.

Millbank Prison, or Penitentiary, established in 1812.

Model Prison, Pentonville, the first stone of which was laid April 10, 1840, and the prison opened Dec. 21, 1842. This prison was established on the separate system.

Tothill Fields Prison, founded in 1618, repaired in 1856, and rebuilt in 1838.

Whitecross Street Prison, for debtors, built in 1813-1815.

PRIVAS (France) was held for two months against Louis XIII. by St. André Montbrun, A.D. 1629, but was at last abandoned, when its fortifications were destroyed, and the gallant defender hanged. A synod of the reformed churches was held in the town in 1612.
PRIVATEERS.—The right of the king to grant letters of marque and reprisals was declared by 4 Hen. V. c. 7 (1417); and 4 Will. & Mary, c. 25 (1692), was passed for their encouragement.

Privy Council, originating in the necessity felt by the monarch to seek advice in important state affairs at a time when the great council of the realm, or the parliament, was not assembled, existed in some form from the earliest period, but only began to be known by its present name in the early part of the reign of Henry VII., about 1488. Some authors declare that it was instituted by Alfred in 896. It assumed high arbitrary powers under Henry VIII., in 1540, of which it was deprived in the succeeding reign, about 1547. By 16 Charles I. c. 10 (1641), its interference in civil cases was prohibited, and by 6 Anne, c. 7 (1707), it was enacted that it should remain in existence six months after the demise of the crown. The judicial committee of the privy council was instituted by 3 & 4 Will. IV. c. 41 (Aug. 14, 1833). The "Privy Council Register" was commenced Aug. 15, 1840.

Privy Seal, which accompanies the royal sign manual, originated in the practice of persons using their armorial bearings to attest the mark made for their signature, when the art of writing was not very common. A charter bearing the seal of Offa, king of Mercia, A.D. 794, and another with that of Ethelwulph, king of Wessex, were found at St. Denoe in France, in 887. In Scotland the practice began with King Duncan in 1094; and in Ireland in the 12th century. It was also used by dignified ecclesiastics in France and England, the earliest known being of the year 1128. The offices of clerks of the signet and privy seal were regulated by 2 Will. IV. c. 49 (June 23, 1832). The Lord Privy Seal was called keeper of the privy seal in the time of Edward III. The office was usually filled by ecclesiastics until 1558, when Lord Marney succeeded Bishop Fox.

Prize-Money.—By an act passed A.D. 1404, the king claimed a fourth part, the remaining three-fourths to be equally divided among the captors. An act (2 Will. IV. c. 53) for consolidating and amending the laws relating to army prize-money, received the royal assent June 23, 1832. A proclamation for the distribution of naval prize-money, by which flag officers were to have one-sixteenth, captains and commanders one-sixth of the remainder, and a scale was fixed for the shares of subalterns and men, was issued March 21, 1834. James Vaughan, a watchman of Marylebone, for representing himself as next of kin to Corporal Leason, deceased, in order frequently to obtain some prize-money due to him, was hanged at Newgate, Nov. 26, 1806.

Probate Court, for testamentary matters, was constituted by 20 & 21 Vict. c. 77 (Aug. 25, 1857).

Proclamations.—By 31 Hen. VIII. c. 8 (1539), the king's proclamations were deemed as valid as acts of parliament.

Provoce (Burmah) was occupied by English troops, who held it all the summer, A.D. 1855. It was again captured by the English July 9, 1852, and having been evacuated, was retaken Oct. 9, 1852. An inundation of the Irrawaddy nearly destroyed this town in 1856.

Promissory Notes were probably introduced with bills of exchange (q.v.), to which they bear so much resemblance, in the 13th century.

Propaganda Fide.—The congregation was founded at Rome, for the propagation of Christianity, by Gregory X V., A.D. 1622; and the college was established in 1627.

Propagation of the Gospel in Foreign Parts.—This society, which grew out of the society for the Propagation of the Gospel in New England established July 27, 1649, was incorporated by William III, June 16, 1701. Its operations were extended to the West Indies in 1710, to Australia in 1795, to Hindostan in 1818, to South Africa in 1820, to New Zealand in 1839, to Ceylon in 1840, and to Borneo in 1849.

Property Tax. (See Income Tax.)

Prophesying, or meetings of the clergy for prayer and the exposition of scripture, were commenced by the Puritans at Northampton, about A.D. 1570, and were forbidden by Queen Elizabeth, May 7, 1577.

Propontis, the modern Sea of Marmora, had many colonies planted on its shores by Greeks from Miletus, B.C. 770. The Goths passed the Bosphorus here to invade Greece, destroying the ancient city of Cyzicus, A.D. 259.

Protectionists, so named from the metropolitan society for the protection of agriculture, formed in opposition to the anti-corn law league, with the dukes of Richmond and Buckingham as president and vice-president, Feb. 17, 1844. They separated from Sir Robert Peel when he brought in a bill for the abolition of the duty on corn in 1846.

Protestants.—The second diet of Spires, A.D. 1529, decided that religious differences could only be settled by an ecclesiastical council, and hence entirely disallowed the right of private judgment. A solemn protest was made against this decision by the Lutheran princes of Germany, April 19, 1529, in consequence of which the members of the reformed churches have ever since been known as Protestants. The protest was drawn up by Luther and Melancthon, and was signed by the elector of Saxony, the landgrave of Hesse-Cassel, the prince of Anhalt, the duke of Brunswick, and Ernest, hereditary prince of Saxony, and by the representatives of thirteen imperial towns.

Provence (France), forming a portion of the Gallia Narbonensis of the Romans, was taken from that people by the Visigoths and the Burgundians, A.D. 416. It was partly recovered in 450, was conquered by
the Franks in 534, and subsequently included in the empire of Charlemagne, and passed by marriage to the count of Anjou in 1245. Having been made over to Louis XI. and his successors in 1481, it was reunited to the crown of France in 1487.

PROV. — Solomon's Proverbs were written about B.C. 984. Zenobius, a sophist, made an epitome of the proverbs of Terraeus and Didymus about A.D. 200, and a collection was formed by Diogenianus also about the same time. Both of these were edited, with many additions, by Andrew Schott, at Antwerp in 1612. A large collection, by Michael Apollinus, was published by the Elzevirs in 1653; Ray's collection appeared in 1672, and Oswald Dyke's in 1708.

PROVIDENCE (North America).—This town of Rhode Island was founded A.D. 1635, and incorporated in 1649. Brown University, belonging to the Baptists, founded at Warren in 1764, was removed to Providence in 1770. The Athenaeum was founded in 1836, Butler Hospital in 1848, and the normal school in 1854.

PROVINCE WELLESLEY (Malay Peninsula) was obtained by purchase from the king of Quedah, A.D. 1802.

PROVISIONS, or reversionary grants of benefices, were made by Clement V. about A.D. 1307, on the plea that all ecclesiastical benefices belonged to the pope.

PROVISORS (Statute of), forbidding appeals to the papal court, and making it penal to procure ecclesiastical appointments from Rome (25 Edw. III. s. 6), was enacted A.D. 1350. Several statutes of a similar nature were afterwards passed.

PRUD'HOMEES, a council was established by King René, to decide disputes between the fishermen of Marseilles, A.D. 1452. Louis XI. allowed the citizens of Lyons to appoint a prud'homme to settle questions that might arise between merchants attending the fair in 1464. Napoleon I., by a decree dated March 18, 1809, established a council of nine members at Lyons to arbitrate between workmen and employers, masters and apprentices. Since that time several have been formed in various parts of France.

PRUSA (Asiatic Turkey), the modern Brusa, or Brussa, was built by Prussias, king of Bithynia, B.C. 187; taken by the Goths A.D. 259, and by Orhan, the son of Othman, in 1325. He allowed the Christian inhabitants to ransom their lives and property by a payment of thirty thousand crowns of gold, and made it the capital of the new Ottoman empire.

PRUSIA.—The early history of this country, the Latin name of which is Borussia, is involved in that of the other districts of Central Europe. During the 10th century it was inhabited by a barbarous tribe, known as the Prussians, because they occupied a territory beyond the river Kuss, a tributary of the Memel; so signifying behind.

A.D.
997. St. Adalbert, bishop of Prague, preaches Christianity to the barbarous Prussians, by whom he is murdered.
1015. Prussia is ravaged by Boleslaus L., of Poland.
1163. Berlin is founded by Albert the Bear.
1164. Boleslaus IV., of Poland, with his army, perishes in a fruitless invasion of Prussia.
1199. Casimir III., assisted by the Swedes, carries a disastrous victory against the Prussians.
1219. The Germans institute a crusade against them.
1293. The Teutonic knights complete the conquest of Prussia.
1397. They build their capital at Marienberg.
1415. Frederick VI. of Nuremberg acquires the margraviate of Brandenburg from the emperor Sigismund by purchase.
1454. The Prussians revolt against the knights, and are assisted by the king of Poland.
1466. By the treaty of Thorn, West Prussia and East Prussia are ceded to Poland.
1525. April 8. By the treaty of Cracow, Albert of Brandenburg is invested with the sovereignty of the possessions of the Teutonic knights, and establishes Lutheranism in his dominions.
1544. The university of Königsberg is founded.
1609. Cleves, La Mark, and Ravensburg, are annexed to Prussia.
1618. John Sigismund, elector of Brandenburg, assents to the title of duke of Prussia.
1648. By the treaty of Westphalia, part of Pomerania, the county of Hohestein, the archbishopric of Magdeburg, and the bishoprics of Halberstadt and Minden, are annexed to Prussia.
1656. Prussia is declared independent of Poland by treaty.
1679. Sept. 21. By the treaty of Vehlow, Poland acknowledges the independence of Prussia.
1686. The Prussians assist the Hungarians against the Turks.
1694. The elector, Frederick II., founds the university of Halle.
1701. Jan. 18. Frederick III., elector of Brandenburg, crowns himself king of Prussia at Königsberg, by the title of Frederick I.
1702. He joins the grand alliance against France.
1707. Neufchatel is annexed to Prussia.
1711. Pomerania is invaded by the Russians, Poles, and Danes.
1714. Prussia obtains Upper Guelders.
1715. War is declared against Sweden.
1720. Jan. 20. Peace is concluded at Stockholm with Sweden, which power cedes Stettin to Prussia.
1725. Sept. 3. Prussia, France, and England form the league of Herrenhausen, or Hanover, against Austria.
1730. The king's eldest son, Charles Frederick, and his friend, Lieutenant Von Kalte, are arrested and imprisoned at Custrin. Nov. 6. They are beheaded.
1731. The principality of Meurs, the county of Lingen, and the seigniories of Herstal and Tourneheut, are ceded to Prussia.
1740. Dec. 22. An expedition against Maria Theresa enters Silesia.
1741. April 10. The Austrians are defeated by the Prussians at Montils.
1742. June 3. By the peace of Bretsau (q.v.), Glatz and Silesia are ceded to Prussia.
1744. Silesia is annexed to Prussia.
1746. June 4. The Austrians are defeated at the battle of Hohenfriedburg.
1757. War with Frederick II. is declared at Hamburgh. Oct. 23. Frederick II. is defeated at Hermandorff. Dec. 15. He defeats the Austrians at Kesseldorf. Dec. 25. Peace is restored by the treaty of Dresden.
1748. The Code Frederick is compiled by the king chancellor Cocezi, and other lawyers.
1751. The crown peasants are emancipated.

1757. May 1. A secret treaty for the partition of Prussia is concluded between France and Austria. June 18. Frederick, II. sustains a severe defeat from the Saxons at Kolín. June. Prussia is invaded by the Russians. Aug. 30. The indecisive battle of Gross-Jagersdorff is fought with the Russians. Nov. 13. Frederick, II. is victorious at Rossbach. Nov. 22. He is defeated at Ertsleau (q. v.). Dec. 5. He defeats the Austrians at Leuthen (q. v.).

1760. Aug. 15. Frederick, II. defeats the Austrians under Laudon at Liegnitz. Oct. 9. Berlin is ceded to the Russians, Austrians, and Saxons. Nov. 3. Daun is defeated by the Prussians at the battle of Torgau, which reduces all Saxony, except Dresden, to Frederick, II.

1771. Feb. 15. Peace with Austria is restored by the treaty of Hubertusburg, which puts an end to the Seven Years' war, and confirms Prussia in the possession of Silesia.

1789. Aug. 25. Frederick, II. and the emperor of Austria conclude a convention of neutrality at Nielsa.

1772. Aug. 5. Prussia participates in the first treaty for the partition of Poland.

1775. July 4. Frederick, II. has a dispute with Austria respecting the Bavarian succession, and evacuates Bohemia.

1785. July 33. The Fürstentum alliance is concluded at Berlin, and commences the Germanic Confederation. Aug. 31. Death of Frederick, II.

1791. Aug. 31. Austria, Prussia, and Saxony resolve to re-establish the French monarch at the conference of Flints.

1792. The Prussians invade France.

1793. They invade Poland and seize Dantzic. By the second partition of Poland, Prussia acquires Thorn, Posen, and other places.

1794. April 21. The Prussians fail in an attempt to take Warsaw.

1795. March 5. The treaty of Basel is concluded with France. By the third treaty for the partition of Poland, concluded this year, Prussia acquires Warsaw.

1801. April 3. The Prussians seize Hanover.

1804. March 8. The convents in Prussia are suppressed.

1805. Dec. 15. By the treaty of Vienna, Prussia dissolves her alliance with England.

1807. July 7. Prussia is compelled to agree to the humiliating treaty of Tilsit (q. v.).

1810. Serfdom is abolished.

1812. March 14. Prussia is compelled to conclude an alliance with France and Austria.

1815. May 23. The congress of Vienna concludes its sittings, having ceded the Rhenish provinces to France, Dantzic to Frederick, II. of Saxony, to Prussia, which power obtained Swedish Pomerania and Rugen from Denmark in exchange for Luxemburg, and the right of the British to receive an annual exchange for Anspach and Bayreuth. Sept 26. The Holy Alliance is concluded with Russia and Austria.

1817. Aug. 4. A revolution in Breslau is suppressed with great severity.

1823. Provincial parliaments are established.

1825. May 29. Commerce with England is permitted on the same terms as with other countries.

1831. The liberals appear in Prussia.

1833. March 22. The Zollverein (q. v.) is instituted.

1842. Jan. 25. The king of Prussia officiates as godfather on the occasion of the prince of Wales' baptism.

**PRUSSIC ACID, OR HYDROBASIC ACID,** was procured by Scheele from Prussian blue, a.d. 1782. Berthollet showed its composition to be carbon, nitrogen, and hydrogen, in 1787; and Gay-Lussac isolated cyanogen in itself, showing the true constitution of the acid, in 1815.
PRUTH (Europe), from the Buckowina to its mouth, was constituted the boundary between Russian and Turkish Moldavia by the treaty of Bucharest, May 28, 1812. The river boundary was crossed by the hostile army of Russia, May 7, 1828; and a second time, leading to a declaration of war by Turkey, July 3, 1853. (See FALCZ.)

PYTHANIS, the chief magistrate in many of the Grecian states. This office was instituted at Corinth, at the death of the last king, B.C. 745, and abolished by Cypselus when he gained absolute power, B.C. 655.

PSALMS AND PSALTERS.—The Book of Psalms is the production of various authors, the earliest of whom is Moses, who composed the 90th. David wrote the greatest number, and is, par excellence, the psalmist. The Psalms were translated into the Saxon language A.D. 769; and the Latin Psalter, on vellum, published by Faust and Schoeffer, of Mentz, in 1457, is the earliest printed book to which a date is attached. Attempts were made to render the Psalms into metrical English verse as early as the reign of Henry II. or Richard I.; and in 1540 they were translated into French verse by Clement Marot. Sternhold and Hopkins's version of the Psalms was first published as part of the Prayer-book in 1552, and is known as the Old Version. The New Version, by Tate and Brady, appeared in 1698.

PSEUDOSCOPE.—This apparatus was invented by Professor Wheatstone, who described it in the Bakerian Lecture read before the Royal Society Jan. 15, 1852. It is called the pseudoscope because it "conveys to the mind false perceptions of all external objects,"—converting the appearance of a raised relief into that of a hollow cast, and producing many other illusions.

PSKOW, or PSKOV (Russia), capital of a government of the same name, is said to have been founded by the grand-duchess Olga in the 10th century. It was unsuccessfully besieged by Gustavus Adolphus A.D. 1614, and fortified by Peter the Great in 1701. The Kremlin was erected by Prince Dombont 1266—1299.

PTOLEMEIC SYSTEM, which maintained the immobility of the earth and the revolution of the planets around it, was founded by Ptolemaeus of Alexandria, A.D. 130—150, and prevailed till the time of Copernicus, A.D. 1473—1543.

PUBLICANS, denying all religious ordinances, and acknowledging only the existence of God, were tried by a tribunal of archbishops, bishops, and eminent theologians at Vezejay, seven being condemned to be burned, A.D. 1134. The sect was excommunicated by the third council of the Lateran, in 1179.

PUBLIC GOOD (League of). (See LEAGUES.)

PUBLIC SAFETY.—A committee of public safety, formed at Paris April 5, 1793, was invested with supreme power May 31, 1793. They decided that the queen, Marie An-
tomette, should be brought to trial, which resulted in her execution, Oct. 16, 1793; resolved on the destruction of the Dantonist anarchists, the chief of whom were executed, April 5, 1794; issued a decree, refusing quarter to the English or Hanoverian soldiers, and the soldiers, as the result, were taken from the English or Hanovers May 29, 1794; and sent all the farmers-general to the revolutionary tribunal, where they were at once condemned, May 8, 1794. Their power gradually declined; and they were defeated in an attempt to save Fouquier Tinville, July 30, 1794.

PUCKLECHURCH (Gloucestershire) was the court of the Saxon king Edmund I., who was assassinated here by an outlaw named Liofa, May 26, 946.

PULLEY.—The invention of the pulley is ascribed to Archimedes, B.C. 287—212.

PULPIT.—The pulpitum of the Romans, where the actors on the stage recited their part, was described by Pollux in his "Onomasticon," dedicated to the emperor Commodus, A.D. 176. In churches it generally faced the west, that the people might sit facing the east, till the direction was changed by Sir Walter Mildmay on his foundation of the chapel of Emanuel College, Cambridge, A.D. 1584. It was ordered that clocks should be placed over the pulpets in 1483.

PULTSK (Poland).—The united army of the Saxons and Poles was defeated here by Charles XII. May 1, 1703. An action, of which both claimed the victory, was fought here between the French and the Russians, Dec. 26, 1806.

PUMPS, according to the statement of Vitruvius, were invented by Ctesibius of Alexandria, and thence called machina Ctesibica about B.C. 200. Laddies or cups for drinking were first attached to wells and springs by Edwin, king of Northumberland, A.D. 617—633.

PUNCTUATION was not introduced into Greek literature till B.C. 365. For some time after the invention of the art of printing, arbitrary marks were employed to divide sentences. The common parenthesis, interrogation, and period were gradually introduced in the 16th century. The colon is found in the "Acts of English Worthies," published in 1550, and the semicolon in Hackluyt's Voyages, which appeared in 1590.

PUNIC WARS.—The first of these wars between the Romans and Carthaginians commenced B.C. 264, and closed with conditions severely humiliating to the latter, B.C. 241. The second began by the capture of the island of Saguntum by Hannibal, B.C. 218, and closed with his defeat at Zama, B.C. 202. The third opened B.C. 149, and terminated with the destruction of Carthage B.C. 147.

PUNJAUB (Hindostan) was invaded by Alexander, who defeated Porus, with his army, 5000 men, 12,000 horse, and 200 elephants, B.C. 327. The Macedonians effected some conquests about A.D. 705. It was overrun by Mahmud of Ghizni in 1000.
The dynasty of the slave kings, with Delhi for their capital, was founded in 1205. Tamerlane invaded it in 1389; and Nanak founded the Sikh power in 1649. It was raised to an independent kingdom, under Ranjit, 1791—1839. Hostilities broke out between them and the British, and the battle of Moodkee was fought, in which Sir Hugh Gough commanded and Sir Robert Sale was wounded, Dec. 18, 1845. The battle of Goojerat, in which the Sikhs were totally routed, fought Feb. 21, 1849, was followed by the annexation of the country, March 29, 1849.

Purveyors for the royal household were subjected to some restrictions in the exercise of their arbitrary duties, by Magna Charta, June 15, 1215, and many subsequent statutes. The prerogative was abolished by 12 Charles II. c. 24 (1660).

Pusey (b. 1660) was a disciple of John Henry Newman, and a considerable influence in the establishment of the Oxford Movement, and is a worthy representative of Dr. Pusey, Hebrew professor at Oxford. The Puseyite movement commenced with the publication of the Oxford tracts in 1833, and speedily attracted attention, from its alleged Romish tendencies. In 1839 Dr. Pusey addressed a letter on the subject to the bishop of Oxford, wherein he repudiated this imputation; but thecession to Rome of the Rev. John Henry Newman, one of the authors of the tracts, in 1845, and subsequently of many other members of the party, proved that it was not altogether groundless. A meeting, composed of the vice-chancellor, heads of houses and proctors, assembled at Oxford March 15, 1841, and passed a resolution condemning these tracts. The receivers of this system are known as Anglo-Catholics, Puseyites, or Tractarians.

Putoli (Italy), the modern Pozzuoli, originally called Dicarchia, was founded by a colony of Samians, b.c. 521; fortified by the Roman senate against Hannibal b.c. 215; became the principal port for landing supplies of corn for the Roman army b.c. 212, and received a Roman colony b.c. 194. St. Paul landed here on his journey to Rome a.d. 59 (Acts xxviii. 13). It was captured by Alaric in 410, by Genseric in 455, and by Totila in 545. An eruption of the Solfatara caused much destruction in 1198, and a volcanic disturbance of the Monte Nuovo did considerable damage in 1538. It was a favourite resort of the Roman nobility towards the close of the Republic, and here Cicero had a villa, which he named Academis, b.c. 45. In its theatre, capable of containing 25,000 spectators, Augustus presided at the games, b.c. 31, and Nero entertained Titradas I., king of Armenia, with combats of gladiators and wild beasts, a.d. 66.

Ptydm (Greece), whence Themistocles took ship for Asia, b.c. 466; was captured by Archelaus, who removed its site twenty stadia from the sea, b.c. 411. It was betrayed to Philip in the beginning of the Social war, when Demosthenes ransomed some Athenian citizens who had been sold into slavery, b.c. 359—356. Olympias took refuge here, and it was besieged, and she was made prisoner by Cassander, b.c. 316. The fate of the Macedonian monarchy. The statues and remembrances of the Persian war remained there down to the battle of Actium.

Pyrenean was procured by the Phoenicians, and is procurable by the swordfish. They Tyrians being famed for cloth dyed in this manner, b.c. 2112. It is mentioned in connection with the construction of the Jewish tabernacle (Exodus xxv, 4), b.c. 1491, and was worn in Greece b.c. 559. Its use was restricted to the person and palace of Justinian I., under a penalty of death, in 552. After having been lost for ages, the method of producing the Tyrian purple was rediscovered in the 17th century.

Puritans.—The name was first applied to persons who, in the time of Queen Elizabeth, refused to adhere to the episcopal form of worship. They returned in considerable numbers from the continent, a.d. 1558. Many of the clergymen were deprived of their benefices in 1565. Conferences were held with them by James I. at Hampton Court, Jan. 14, 15, 16, 1604, and they were forbidden to leave the kingdom without licence, July 21, 1635. James II. published his declaration of indulgence, April 4, 1687; and the Toleration Act, passed May 24, 1689, relieved from the penal statutes all Protestant dissenters except Unitarians.

Puren was procured by the Phoenicians, and is procurable by the swordfish. The Tyrians being famed for cloth dyed in this manner, b.c. 2112. It is mentioned in connection with the construction of the Jewish tabernacle (Exodus xxv, 4), b.c. 1491, and was worn in Greece b.c. 559. Its use was restricted to the person and palace of Justinian I., under a penalty of death, in 552. After having been lost for ages, the method of producing the Tyrian purple was rediscovered in the 17th century.
PYLYS.—The inhabitants of this city, the modern Navarino, emigrated to Cyllene at the close of the second Messenian war, B.C. 663. A fort was erected upon the promontory by Demosthenes, the Athenian commander, B.C. 424. Here, with five galleys now gored in defence, he was besieged by the Spartans. Eurymedon came to his relief, and he defeated the fleet of the besiegers B.C. 425. A treaty was made by which the Athenians agreed to give up the fortress to the Lacedaemonians, B.C. 421 ; nevertheless they retained possession till B.C. 409. The Avars settled here, from whom it received its name of Avarino, subsequently corrupted into Navarino, in the 6th century.

PYRAMIDS (Egypt).—The great pyramid is ascribed to Cheops, who employed 100,000 men twenty years in building it, B.C. 1082 ; the second to Cephren or Cepheus, B.C. 1032; and the third to Mycerinus, B.C. 960. They were explored by Mr. Davison, A.D. 1763 ; by Belzoni in 1815 ; by Captain Caviglia in 1816, and by Colonel Vyse in 1836. A victory gained here by Bonaparte over the Mamelukes, who lost 2,000 of their best troops, July 24, 1798, is called the battle of the Pyramids.

PYRENEES (Treaty).—This peace between France and Spain, by which the former was confirmed in possession of Alsace and Pignerol, and received Roussillon and Cerdaigne to the foot of the Alps, was concluded Nov. 7, 1660.

PYROMETER, or fire-measurer, was invented by Musschenbroek, A.D. 1730. Ramsden's was described in 1785, and Wedgwood's in the "Philosophical Transactions" for 1782, 1784, and 1786. Professor Daniel constructed one, which gained him the Rumford medal, in 1830. Mr. Ericson's was shown at the great Exhibition in 1851.

PYROTECHNY. (See Fireworks.)

PYRRHIC, or MARTIAL DANCE, in which the two performers were armed, and went through all the military evolutions, is ascribed to Mervors, and was revived by Pyrrhus, B.C. 318—273. It formed a regular part of the discipline of the Roman legions, A.D. 95—180.

PYRRHONISM, or scepticism, was founded by Pyrrho of Elis, about B.C. 340, and his system was fully expounded by Sextus Empiricus, about A.D. 180.

PYTHAGOREAN PHILOSOPHY, instituted by Pythagoras, who was born in Samos B.C. 580, was carried into practice at Crotona, where he settled B.C. 535. A dispute having arisen regarding the spoil of the conquered Sybarites during the popular tumult that ensued, the house of Milo was fired, and many of the Pythagoreans perished in the flames, B.C. 510. The general persecution of the sect throughout Magna Grecia, which followed, only ceased on the establishment of a democratic form of government. Pythagoras died, it is said, at Metapontum, about B.C. 507. Its distinguishing feature, the metempsychosis, or the doctrine of the transmigration of souls, prevailed amongst the Egyptians and the Hindoos.

PYTHIAN GAMES, originally musical contest near Delphi, in celebration of the victory of Apollo over the Python, were said to have been established by Apollo himself. They were kept every ninth year till B.C. 589, and afterwards every fifth year, till about A.D. 394. A flute contest and athletic sports were added B.C. 586, and chariot-races B.C. 582.

QUACKERY.—Impostors in the practice of medicine have abounded in all ages, and the ancient Greeks and Romans were inundated with them. Hippocrates Rides (May 17, 1686) sketches one thus: "His sagacity is remarkable; for he hath found out an art both to conceal his own ignorance and impose on that of other folks, to his own advantage. His prime care is to get the names of diseases without book, and a bead-roll of rattling terms of art, which he uses to beguile the mobile,—first of their senses, and next of their pence. He has an excellent talent in persuading well people they are sick; and, by giving them his trash, verifies the prediction, and is sure to make them so." A quack who exhibited upon a stage in Covent Garden in 1690, amused his spectators by taking thirteen grains of some poisonous drug, under the inspection of several surgeons and physicians. He contrived by some means to prevent any visible ill-effects from a dose that would have killed twenty men. St. John Long, a celebrated quack, was tried for the manslaughter of one of his patients (Miss Cashin) Oct. 30, 1830. He was found guilty, and fined £250. A coroner's inquest returned a verdict of manslaughter against the same quack Nov. 11, 1830, for having occasioned the death of Mrs. Catherine Lloyd. He was tried on this charge, and acquitted, Feb. 19, 1831.

QUADI.—This ancient people inhabited that part of Germany known as Moravia. They submitted to the Romans in the reign of the emperor Titus Antoninus, about A.D. 198. At a later period they joined a confederacy of German nations against Rome. They led the Romans into a defile, where no water could be obtained, occupied every strong post, and left their enemies to perish, A.D. 174. The second war lasted three years,—from 178 to 180,—with no decisive result, and the Quadri remained unsubdued. In the reign of Constantius II. they invaded the Roman empire, about 353; but the emperor repelled them, and spread desolation and terror throughout their country. They were finally defeated in 407, and their name disappears from history about the 5th century.

QUADRAGESIMA SUNDAY, so called because it is the fortieth day before Good Friday. The festival of the establishment of St. Peter's Chair at Antioch, instituted about A.D. 36, is kept on Quadragesima Sunday by
the Roman Catholic church. Edward III. celebrated a jubilee on this day in 1376.

**QUADRANT.**—The first astronomical quadrant which we have any account of is that used by Ptolemy, a celebrated astronomer, who flourished in Egypt about the middle of the 2nd century. The instrument known as Davis's quadrant or back-staff, was invented by Captain John Davis A.D. 1590. A portable quadrant was invented by Gunter in 1618. Hadley's quadrant, supposed to have been invented by John Hadley, who died Feb. 15, 1744, is the chief instrument now in use for observing altitudes at sea.

**QUADRATURE, or Squaring the Circle.**—Archimedes (b.c. 260—212) is the first who attempted a practical solution of the question. Gregory of St. Vincent, an able mathematician, published his work on the quadrature of the circle A.D. 1647. It was refuted by Descartes and other eminent mathematicians. After the time of Newton (born Dec. 25, 1642; died March 20, 1727), mathematicians seem to have relinquished the attempt to solve the problem, though numerous pretended solutions were put forward. Mathulon, a Frenchman, in 1727 offered 3,000 livres to any one who should prove his solution wrong, and he was actually compelled by a court of law to pay the reward. Causans in 1753 offered to bet 300,000 francs on the correctness of his process, and deposited 10,000 francs, which were claimed by several persons, and, amongst others, by a young lady, who brought an action for them; but the bet was declared void. The French Academy of Sciences resolved in 1755 not to examine any more pretended solutions, a course which was followed by the Royal Society in this country a few years afterwards.

**QUADRILLE, a dance of French origin, was introduced into this country about A.D. 1813.**

**QUADRUPLE ALLIANCE.**—This treaty of alliance between Great Britain, France, and the emperor, for the purpose of guaranteeing the succession of the reigning families in Great Britain and France, and settling the partition of the Spanish monarchy, was signed in London Aug. 2, 1718. On the accession of Holland to this treaty shortly afterwards, it obtained the name of the Quadruple Alliance. Spain acceded to the terms of this alliance Jan. 26, 1720.

Quarrelles successively, that Rome had the management of the public treasure. Two quaestors were first appointed b.c. 485. Their number was doubled b.c. 420; and it was decided that the four quaestors should be chosen from the patricians and the plebeians. It was not, however, till b.c. 409 that a plebeian succeeded in making his way to the quaestorship. After the Romans had made themselves masters of Italy, the number of quaestors was increased to eight, b.c. 369. During the time of the emperors their number varied; and from the reign of the emperor Claudius (a.d. 41—54) it became customary for quaestors, on entering office, to give gladiatorial spectacles to the people; so that none but the wealthiest Romans could aspire to the office.

**QUAKERS, or Society of Friends.**—This sect was founded a.d. 1647 by George Fox, who was born at Drayton, in Lancashire, in July, 1624, and died in London in 1691. Fox was brought before Gervase Bennet at Derby in 1650. "He," says Fox, "was the first that called us Quakers, because I bid them quake at the word of the Lord." A Quaker in Colchester starved himself to death upon the presumption that he could fast forty days, in April, 1656. Another Quaker, who personated Jesus Christ at Bristol and other places, was found guilty of blasphemy, and was sentenced to be whipped, put in the pillory, and his tongue bored through with a hot iron, Dec. 17, 1656. An address was presented to James II. by the Quakers in March, 1685. After congratulating him on his accession, it proceeded thus: "We are told thou art not of the persuasion of the Church of England any more than we, and therefore we hope that thou wilt grant unto us the same liberty which thou allowest thyself." An act of indulgence to the Quakers, that their solemn affirmation should be accepted instead of an oath, was passed in 1696, and in 1728 their affirmation was allowed in civil and criminal trials. In 1761 members engaged in the slave-trade were disowned. The Hicksite schism commenced in America in 1827, and the Beeamites arose soon after. Great changes have recently occurred amongst this sect. Mixed marriages were sanctioned Nov. 2, 1858. By 23 Vict. c. 18 (May 15, 1860), which came into force June 30, marriages solemnized according to the usage of Quakers, where only one of the parties is a Quaker, are declared valid.

**QUARANTINE was devised for the purpose of preventing the communication from one country to another of contagious diseases. The term originally signified a period of forty days, during which persons coming from foreign parts were not permitted to land. It originated at Venice, where pest-houses, or lazaretos (q.v.), were established a.d. 1423. Regulations for ships to perform quarantine were passed in 1710. All former quarantine acts were repealed by 6 Geo. IV. c. 78 (July 27, 1825), and the existing quarantine regulations depend upon its provisions and orders in council issued under its authority.**

**QUARRIES.**—Egypt in ancient times possessed numerous quarries, those in the neighbourhood of Syene and in the island of Elephantine being the most famous. The masterpieces of Grecian sculpture were executed in the white marble obtained from the quarries of Attica and the islands of the Archipelago. The quarries at Ephesus constituted an immense labyrinth. One of these in the hill Epipole, with the stone from which the edifices of Syracuse were built, about b.c. 732, was large enough to hold 7,000 Greek soldiers taken prisoners when Nicias retreated from that city, b.c. 413.
The Greek and Roman quarries were worked by slaves. The most celebrated quarries in England are those of Portland, which furnished Sir Christopher Wren with the stone for St. Paul's cathedral, the Monument, and most of the public edifices in London, built after the Great Fire in 1666. The quarries near Plymouth, which were opened in 1812, furnished the stone for the construction of the breakwater.

**Quarterly Review.**—The first number appeared in April, 1809, under the editorship of William Gifford, a celebrated political writer and critic, who was born at Ashburton, in Devonshire, in April, 1757, and died in London, Dec. 31, 1828.

**Quarterly Sessions Court** was ordered to be held in every quarter of the year, or oftener if required, A.D. 1838; and by subsequent statutes, quarter sessions were directed to be held at uniform periods. By 1 Will. IV. c. 70 (July 23, 1830), these periods were fixed at the first week after Oct. 11, the first week after Dec. 28, the first week after March 31, and the first week after June 24.

**Quatre Bras, (battle,)** fought at this village in Belgium, between the allied army and the French, under Marshal Ney, June 16, 1815. The inferiority of the allies in numbers, and their want of artillery and cavalry, the Belgian horse, 2,000 strong, having left the field in a panic early in the action, rendered the combat for a long time unequal. The British, however, received reinforcement, and after a most desperate struggle the battle ended in favour of the allies.

**Quebec (Canada),** founded by the French, July 3, 1608, was captured in 1629 by the English, and restored March 17, 1632, to the French, who fortified it in 1800. A British army under General Wolfe attacked and defeated the French under Montcalm, on the Heights of Abraham, near Quebec, Sept. 13, 1759. Both armies lost their commanders, and the French surrendered the city Sept. 18. It was finally ceded to the English by the peace of Paris, Feb. 10, 1763. During the revolutionary war, the Americans under Montgomery attempted to take the city by assault on the night of Dec. 31, 1775, but they were repulsed with great loss. A fire which destroyed 1,650 houses, and rendered 12,000 persons homeless, occurred May 28, 1845, and another, which destroyed upwards of 1,200 dwellings in less than eight hours, and left 15,000 people without shelter, took place June 28, 1845.

**Queen.—** The word, derived from the Saxon queen, signifying wife, originally referred exclusively to the wife. The wives of the Roman emperors were distinguished by the title Augusta. By 25 Edw. III. st. 5, c. 2 (1350), it was made high treason to conspire the death of a queen consort, or to violate her chastity. The Salic law (q.v.) excluded females from exercising royal authority; but by 1 Mary, s. 3, c. 1 (1553), the dignity of queen-regnant was declared constitutional in this country. Queens-consort are regarded in law as being out of some respects, and may possess private property, which they are entitled to bequeath or sell. This liberty was confirmed by 39 & 40 Geo. III. c. 88 (July 28, 1800).

**Queen Anne's Bounty.**—The first-fruit and tenths (see ANNUITIES), which originally formed part of the papal exactions from the British clergy, were, by 26 Hen. VIII. c. 3 (1534), annexed to the revenue of the crown, and continued to form part of the royal income until Queen Anne, in 1705, obtained the act 2 & 3 Anne, c. 11, authorizing her to devote them to the augmentation of the livings of poor clergywomen, which she did by letters patent, dated Nov. 3 in that year. By 1 & 2 Vict. c. 20 (April 11, 1838), the offices of first-fruit, tenths, and Queen Anne's bounty, were consolidated, and by 4 & 5 Vict. c. 39, s. 4 (June 21, 1841), provisions were made for substituting an equivalent for the first-fruits and tenths paid by the ecclesiastical commissioners to the governors of the bounty.

**Queen Anne's Farthings.**—In accordance with a suggestion made by Dean Swift, A.D. 1712, that the copper money of the realm should be re coined, and adorned with devices of a medallion type, a few pattern farthings were struck. The most celebrated is the farthing of 1713, which bears a bust on the obverse, and a figure of peace in a car, with the legend "Pax missa per orbem" on the reverse. The farthing of 1714, known as the "canopy farthing," from the device of Britannia seated under a portal, was issued, but is now very rare. Another pattern farthing dated 1715, after the queen's death, has the motto "Bello et pace" in basso-relievo, and is the most scarce. Some impressions in gold and silver were struck from the same dies, but the designs were poor, and the project was abandoned. A Queen Anne's farthing of the ordinary type is worth from 1½ to 2½; but due to changes in prices have been paid.

**Queen Charlotte Islands (North Pacific).—**This group of islands, forming part of British Columbia, was first discovered by Captain Cook, while exploring the north-west coast of America, A.D. 1778, and were thought by him to form part of the continent. They were discovered to be islands by Captain Dixon, in 1787, who gave them their present name. They were included in the colony of British Columbia by 21 & 22 Vict. c. 99 (Aug. 2, 1858).

**Queen Charlotte Islands (South Pacific Ocean) were discovered by Mandana, D. D. 1725, and a principal one named Santa Cruz. They were visited by Captain Carteret in 1767, and, probably in ignorance of Mandana's discovery, named by him Queen Charlotte Islands, which appellation they have since retained.

**Queen's Bench.** (See King's (or Queen's) Bench.)

**Queen's College (Cambridge) was**
Queensland (Australia).—Moreton Bay was separated from New South Wales and erected into a colony, under the name of Queensland, by letters patent published Dec. 4, 1859.

Queen's Letter. (See Brief.)
Queen's Prison. (See King's (or Queen's) Bench Prison.)
Queen's Theatre (London).—This theatre, in Tottenham Street, Tottenham Court Road, was built by Paschali for the concerts of ancient music, which were removed, A.D. 1794, to the King's Theatre, in the Haymarket. It was next hired by Colonel Grenville, for his entertainment, the Pic-Nic Society,—in 1802; and it was converted into a theatre, under the name of the Regency Theatre, in 1810.

Queentown (Canada).—The Americans were defeated here by the British, Oct. 13, 1812, their commander, General Wadsworth, with 900 men, being taken prisoners. It was occupied by the Americans in May, 1813; and in December of the same year they made an attempt to destroy the town with red-hot shot, but were defeated by a British force. It was again occupied by the Americans in June, 1814.

Queens (Canada).—The queen on her first visit to Ireland, Aug. 3, 1849. It was previously called the Dove of Cork, and was, as recently as 1756, a small village inhabited by a few pilots and fishermen. During the French war it became a place of some importance, and a rendezvous for shipping. A pier was built in 1805, and the handsome parish church was erected in 1810.

Queen Victoria Stramer, Capt. Church, sailed from Liverpool for Dublin, with 112 persons on board, Feb. 14, 1853. About midnight she passed the Bailey lighthouse, where a thick snow-storm commenced, which rendered surrounding objects nearly invisible. In a short time the ship struck upon the Howth rocks, at the entrance to Dublin harbour, and sank almost immediately. Efforts were made to use the boats, but, owing to the general panic, they proved of little service, and fifty-nine of the passengers were drowned. The calamity was attributed to the carelessness of the captain and his officers, who all perished.

Queen, St. (France), the ancient Augusta Veromandorum, was the seat of a bishopric, which was transferred to Noyon in the 6th century. It was besieged by a Spanish army of 50,000 men, with an auxiliary corps of 8,000 English, in 1557, and was bravely defended by Admiral Coligny. The constable, Montmorency, who came to its relief with a considerable army, was defeated by the Spaniards, Aug. 10, 1557, whereupon the town surrendered. It was a strongly-fortified place at this time, and was considered one of the bulwarks of France on the north-eastern frontier.

Queen.—This primitive hand-mill, formed of two heavy stones, is said to have been used by the Romans. Boswell states that it was the ancient instrument of the Highlanders, and that he and Dr. Johnson observed a woman using one in the Isle of Sky during their tour in the Hebrides, A.D. 1773. He adds that it had then almost entirely gone out of use.

Quicksey (France).—A siege of this town, A.D. 1340, is mentioned by Froissart. It was captured by Turenne in 1654. The duke of Ormond besieged it June 8, 1712, and it surrendered July 4. It was recaptured by the French Oct. 4 in the same year. The Austrians took it after a short siege, Sept. 11, 1793; and the French were defeated in a great battle in the neighbourhood Sept. 13. The French regained possession Aug. 15, 1794. It was taken by the allied armies June 29, 1815.

Quiberon Bay (France).—An English
fleets destroyed some French ships and dismantled the forts in this bay in September, 1716. Admiral Hawke defeated the French fleet here Nov. 20, 1759. A body of French emigrants and soldiers, to the number of about 3,000, conveyed by a British fleet, landed in Quiberon Bay June 27, 1793. They took possession of Fort Ponthièvre June 30; but their hopes of support from the population of the surrounding country not being realized, they were expelled by the republican army, July 21, 1795. The British fleet, owing to stormy weather, could not approach the shore to succour them; and the royalists capitulated, on condition that the lives of the soldiers should be spared, and the emigrants allowed to embark. In spite of this, the National Convention decreed that all the prisoners should be put to death; and 800 were shot, the remainder being allowed to escape. The fleet at this time was attacked and dismantled by an English squadron under Sir Edward Pellew, June 4, 1800. A monument to the memory of the victims of the expedition of 1795 was erected, under the auspices of Marshal Soult, in 1814.

Quicksilver was known to the ancients from the remotest ages. The most productive quicksilver-mine is that of Almaden, in Spain, mentioned by Pliny as producing, in his time, 10,000 Roman pounds annually. The next in importance is that of Iridia, in Illyria, discovered accidentally by a peasant A.D. 1407. The mines of Guancavelia, in Peru, were discovered about 1586 or 1587. Its use for refining silver was discovered in the 16th century, and it was first employed for this purpose in the silver-mines of Peru in 1571.

Quietism.—The views of this sect were embodied in the works of Michael Molinos, a Spanish priest in the 17th century. His books were condemned at Rome, and he was imprisoned, and died A.D. 1696. About the same time Madame Guyon, or Guion, became a great advocate of quietism in France. She fixed her residence at Paris in 1683 or 1689, and wrote several works in its favour, which were condemned by Bosseuet, who caused her to be confined in a monastery for six months. She was afterwards imprisoned in the Bastille for several years, and died in 1717. The archbishop of Paris called her writings "a monstrous and diabolical system." They were defended by Fenelon, which led to his condemnation by the pope in 1699.

Quillota (Chili), founded A.D. 1728, has suffered severely from earthquakes, and was nearly destroyed by one in 1823. The copper-mines in its vicinity are the richest in Chili.

Quills are said to have been first used for writing in the 5th century. The earliest authentic account of their use is in the writings of Isidore, who died April 4, 636.

Quilloa, or Keelwa (Africa), situated on an island close to the mainland, was taken by the Portuguese after repeated attacks, A.D. 1505. When they made Mozambique 708

the centre of their settlements in Africa, the town fell into decay, and was ultimately wrested from them by the imam of Muscat. On its first occupation by the Portuguese it was the capital of Eastern Africa, but no traces of its ancient splendour existed when visited by Captain Beaver in 1812.

Quilon (Hindostan).—This town on the coast of Travancore was formerly called Coulan, and is said to have been founded A.D. 825. The Dutch wrested it from the Portuguese in 1662, and it afterwards fell into the hands of the English.

Quimper, or Quimper-Corentin (France), derives its present name from its first bishop in the 5th century, previously to which it was called Coriospitum. Charles of Blois took the town A.D. 1345, and put the greater part of the inhabitants to death. It was besieged and taken by the English auxiliaries of de Montfort in 1564. In the Breton war, Quimper sided with the party of the duke of Mercœur, but was compelled to submit to Henry IV. in 1595. The cathedral dates from 1424.

Quinze.—Some writers regard the quince as a Phoenecian importation into this country; others say that it was introduced by the Romans. It was cultivated in English gardens in the time of Gerard, a famous herbalist, born at Nantwich, in Cheshire, A.D. 1545. It is also mentioned in Peacham's Emblems as a feature of the fruit-garden in 1612. The Portuguese quince was cultivated in England in 1759, and the Japan quince in 1786.

Quindecimviri, an order of priests appointed by Tarquin the Proud, about B.C. 534, to take care of the Sibylline books. At first only two were appointed; but the number was increased to ten about B.C. 367, and to fifteen (hence their name) by Syilla, B.C. 80.

Quinine.—This important vegetable alkaloid, contained principally in the yellow bark, was discovered by Pelletier and Caveton A.D. 1820.

Quintesextan Council, called also the council in Trullo, from the chamber in the imperial palace at Constantinople in which it was held, was summoned by the emperor Justinian II. A.D. 691. It is the great author- ity for the discipline of the Greek church.

Quinquagesima Sunday, or Shrove Sun- day, is so called because it occurs about the fiftieth day before Easter. Its observance was instituted by Pope Gregory XIII. about A.D. 1572.

Quinquennial Games were instituted at Rome by Nero, A.D. 60, in imitation of the Greek festivals, and were celebrated every four years. They consisted of musical, gymnastic, and equestrian contests. The celebration of these games appears to have ceased after Nero's time. They were revived by Justinian in honour of Jupiter Capito- linus, A.D. 86, and were called Capitoline Games.

Quintilian, a sect of heretics of the 2nd century, so called after their founder, a
female named Quintilia, of Carthage. They attributed extraordinary gifts to Eve, for having eaten of the tree of knowledge, and allowed women to be priests and bishops. They denied water-baptism. Tertullian wrote against this heresy early in the 3rd century.

**Quirites**, the name given to the Sabines, who settled in Rome and built a new town on the Quirinal and Capitoline hills in the time of Romulus, B.C. 722. On the death of their chief, Titus Tatius, Romulus became king over both Romans and Quirites.

**Quisitello** (Battle).—The Austrians defeated the French at this place, on the Secchia, Sept. 15, 1734.

**Quito** (South America), the capital of the republic of Ecuador, founded by Sebastian Benalcazar A.D. 1534, was incorporated as a city by Charles V in 1541, and made a bishop's see in 1545. A plain near the city was chosen by the French and Spanish astronomers in 1738 for measuring a degree of the meridian; and their labours from that time till 1742 are commemorated by an alabaster slab, with a Latin inscription, placed in the church of the Jesuits. Earthquakes are of frequent occurrence, and one Feb. 4, 1797, is said to have destroyed above 40,000 persons in the province. During the revolt against the mother country, the leaders of the Junta of Quito, to the number of 300, were slaughtered by the Spanish viceroy of Santa Fé de Bogota and Peru in 1811. A dreadful earthquake occurred March 22, 1850, which reduced the city to ruins.

**Quoits**.—This game, called by the ancients *discus*, is said to have been invented by Perseus, a Greek, who, having inadvertently slain his grandfather, Acrisius, in throwing a quoit, exchanged the kingdom of Argos (to which he was heir on the death of Acrisius) for that of Tirynthus, and founded the kingdom of Mycenae about B.C. 1313. Quoits formed a favourite amusement amongst the lower classes of London in the reign of James I. In the country the rustic, not having round perforated quoits to play with, used horse-shoes; and in many places the quoit itself is called a shoe.

**Quorum**, a term derived from the words *unum A. B. esse volumus*, "of whom we will that A. B. be one," thus rendering it necessary that certain individuals (said to be of the quorum) should be present at the transaction of business. Hence, when in a meeting, &c., it is necessary that a certain number should be present to give validity to its acts, that number is said to form a quorum.

**Quo Warranto Act** was passed Nov. 7, 1290. By this act a writ may be directed to any person who holds any office or franchise, to inquire by what authority he does so. A quo warranto was brought against the charter of the corporation of London by Charles II., and the court of King's Bench gave judgment against the city, and declared their charter forfeited June 12, 1683. An act for restoring the city to its ancient rights and privileges passed May 20, 1690.

**Raab** (Hungary).—A battle was fought near this town between the Austrians, under the archduke John, and the French, under Eugene Beauharnais, June 14, 1809. The former were defeated, and the town fell into the hands of the French June 24. They began building a fortress Aug. 15. Raab was occupied by the Austrians under Windgrätz, Dec. 26, 1848. The Hungarians took it again afterwards, and were driven out by the Austrians under General Haynau, June 28, 1849.

**Racing** formed an important part of the Greek games, the race for full-aged horses having been introduced B.C. 649; that for mares, called the Calpe, B.C. 493; and for under-aged horses B.C. 253. It is believed to have been practised by the Anglo-Saxons, and King John held running horses in high estimation. Edward III. purchased running horses in 1326, and Henry VIII. took great pains to improve the royal stud in 1509. Racing, which had languished in Elizabeth's reign, was revived under James I. at Gatley, in Yorkshire. Races took place at Chester in 1512 for two silver bells; and on St. George's day, in 1609, three silver bells of good value were offered as prizes. The first races at Newmarket took place in 1640, and the round course was made in 1666. Oliver Cromwell kept a stud of race-horses in 1663. A ladies' plate was advertised to be run for at Rippon-heath, Yorkshire, women to be riders, Tuesday, Sept. 14, 1725. A silver bell was the prize in the reign of James I. Camden speaks of a golden bell as the prize; whence the proverb, "bears the bell." Mr. Surtees, in his "Durham," mentions subscription purses in 1613; the bell was altered to a cup, with the exploits and pedigree of the horse engraved upon it, 1661—1685. At Pisa, the prize was a mantle of some kind of rich stuff in 1284.

**Racquet** or **Racket**, hand-tennis, is said to have originated in the 14th century. This game was first played with the naked hand, and then with a glove. Afterwards thongs or cords were bound round the hands to make
the ball rebound more forcibly, and from this, according to St. Foix, the game derived its name. In 1424 a damsel named Margot played at hand-tennis at Paris better than any man.

Radcliffe Library.—Dr. John Radcliffe, who died Nov. 1, 1714, bequeathed by will £40,000 to the university of Oxford for a library. The first stone of the building was laid May 12, 1737, and it was opened April 13, 1749. An observatory, of which the foundation was laid June 22, 1772, was completed in 1786. The Radcliffe Astronomical Observatory on Headington Hill (1827) received a portion of the funds left by this benevolent man, and was called the Radcliffe Asylum.

Radcot Bridge (Battle).—De Vere, created duke of Ireland, who had raised an army in support of the cause of Richard II., was defeated at Radcot Bridge, in Oxfordshire, Dec. 20, 1387. He made his escape into Ireland.

Radicals.—The extreme democrats in England first received the name of Radicals about A.D. 1819.

Radschtadt, or Rastadt (Baden).—The margraves of Baden, Louis William, fixed his residence at this place, then a small village, towards the end of the 17th century. Prince Eugene and Marshal Villars signed a treaty of peace here March 6, 1714, which put an end to the war of the Spanish Succession. The palace, built on the model of that of Versailles, was till 1771 the residence of the margraves of Baden. A Congress assembled at Rastadt Dec. 9, 1797, to negotiate a peace between France and the German empire. It was dissolved by the emperor of Germany April 7, 1799. During the insurrection in Baden in 1849 the insurgents shut themselves up in Rastadt. After a month's siege they surrendered to the Prussians, July 23.

Rafts.—Hiram, king of Tyre, entered into a contract to supply Solomon with cedar of Lebanon for the building of the temple, which was to be brought to Jaffa in floats (1 Kings v. 9; and 2 Chron. ii. 16), B.C. 1014. The Romans transported timber by water for building purposes and for firewood. It appears to have been conveyed in this manner to the river Saale, in Saxony, the duty being remitted to the monastery of Porta, A.D. 1255. The duty on floats on the same river was reduced in 1418. A citizen of Freiberg commenced the conveyance of timber on the Mulda by rafts in 1491, and the nobility unsuccessfully attempted to prohibit it in 1486. Timber was first floated on the Elbe for building the church of Aschersleben, in 1495. The city of Paris having consumed all the wood in its neighbourhood, John Rouvel, a merchant, suggested bringing supplies by means of rafts in 1549, and his plans were carried out by René Arnoul in 1566.

Ragged Schools.—Thomas Cranfield commenced what he called a fragment school in Mint Street, Southwark, early in the 19th century. Efforts were made to establish schools for the neglected and outcast, and in 1837 the first ragged school was opened in London. The Field-Lane ragged school was opened in 1843, and the Ragged School Union was formed in 1844. The Bristol ragged school for boys and females was established in 1846, and schools of a like description were opened in the same year in Manchester, York, and other towns. A ragged school for boys was opened in Aberdeen in 1841.

Ragman's Roll, containing the legal attestation of allegiance of the nobility and gentry of Scotland to Edward I., was subscribed a.d. 1296, and having been deposited in the Tower, was published in Frye's Records in 1666, and by the Bannatyne Club in 1834.

Ragusa (Austria).—This town was enlarged and fortified in the 7th century. From 1260 to 1368 Ragusa was governed by Venetian rectors, who held office for two years, and were chosen from the patrician families of Venice. War broke out in 1368 between Venice and the king of Hungary, and Ragusa gained her independence and power to negotiate her own treaty. In 1414 the Ragusans purchased peace with the Ottomans by agreeing to pay an annual tribute of 500 ducats. The manufacture of woollens was introduced here in 1433 from Florence. The Turks ravaged the district of Canale in 1471, and Ragusa purchased safety by paying a tribute amounting to 8,000 ducats. The town was nearly destroyed in 1667 by an earthquake. During the 17th and 18th centuries, Ragusa continued to enjoy her independence. Napoleon I. seized the town May 27, 1806, and defeated the Russians under its walls, Sept. 29. In 1814 it came into the possession of Austria.

Railways.—Wooden rails for the transport of coal were constructed at the Newcastle collieries about A.D. 1630, and in 1716 a surface of iron was laid upon the rails. Rails wholly composed of cast iron were made at Whitehaven in 1738, and an edge-rail of similar materials was laid down at Colebrookdale about 1767. In 1776 Mr. John Curr introduced an improved rail nailed to wooden sleepers, and in 1789 Mr. William Jessop invented a rail and wheel, specially adapted for each other. Stone blocks were first employed instead of wooden sleepers in 1800 by Mr. Benjamin Outram, of Little Eaton, Derbyshire, and roads so constructed were known as "Outram roads," and afterwards as "tram roads." The first important edge-rail was that at Penrhyn slate-quarries, which was laid down in 1801, and the first line for
public use was that of the Surrey Iron Railway, incorporated the same year. The first patent for a locomotive steam-carriage was taken out by Richard Trevithick and Andrew Vivian, March 24, 1802. This engine was adapted for traction on common roads, but in 1804 Trevithick invented an engine to work on iron rails, which was tried at Merthyr Tydvil the same year, and proved a scientific triumph, though its application to business purposes was impracticable. In 1811 Mr. Blenkinsop patented a locomotive with racked wheels, intended to work on clogged rails, and a line on this principle was actually opened at the Middleton collieries near Leeds, Aug. 12, 1812. A locomotive to work upon legs, moving alternately like those of a horse, was projected by Mr. Brunton, of the Butterley works, in 1813, but blew up during its construction, and the needlessness of all contrivances to increase the adhesion of wheels upon railroads was demonstrated by Mr. Blackett, of Wylam, the same year. George Stephenson’s first engine was tried upon the Killingworth railway, July 25, 1814, and excelled all its predecessors, although its speed was not greater than that of a horse’s walk. In 1815 Mr. Stephenson discovered the steam-blast, and applied it in the construction of a second engine, and in 1829 he employed a multitubular boiler in the Rocket, which proved the victor in the competition of engines, held at Rainhill in October of that year, attaining a maximum speed of 29 miles per hour, and an average speed of 15 miles. The Liverpool and Manchester railway was the first public line worked by steam power. It was opened Sept. 15, 1830. (See Liverpool.) Mr. Brunel introduced the broad gauge in 1838, and it was adopted in the Great Western railway. Stationary engines were originally employed on the Blackwall railway, which was opened July 4, 1840. They were afterwards abandoned for locomotives. Trains worked by atmospheric pressure were started on the Kingston and Dulkey lines in 1843, on the Croydon line in 1845, and on the South Devon railway in 1847; but the system proved a failure. The mania for railway speculation reached its height in 1845, when prospectuses were issued, and warrant obtained for the construction of no less than 1,428 new lines. The conveyance of mails by railroad was regulated by 1 & 2 Vict. c. 96 (Aug. 14, 1838). Companies were compelled to provide proper gates and gate-keepers at places where railroads and public highways cross by 2 & 3 Vict. c. 46 (Aug. 17, 1839), and railroads were placed under the supervision of the Board of Trade by 3 & 4 Vict. c. 97 (Aug. 10, 1840). The phraseology of railway bills was much simplified by the Railway Clauses Consolidation Act, 8 & 9 Vict. c. 20 (May 8, 1845), and the gauge was regulated by 9 & 10 Vict. c. 57 (Aug. 18, 1846). The jurisdiction of the Board of Trade was transferred to a body of railway commissioners by 9 & 10 Vict. c. 105 (Aug. 26, 1846). This act was repealed by 14 & 15 Vict. c. 64 (Aug. 7, 1851), which restored the authority of the board. Malicious acts upon railways are punished by 14 & 15 Vict. c. 19 (July 3, 1851), and further measures for the regulation of the railroad system were made by 17 & 18 Vict. c. 31 (July 10, 1854). Stephenson’s engine was introduced into France in 1829. The first line in America was constructed in 1830 in Massachusetts, and was about four miles in length. A comprehensive railway system, extending over a distance of 347 miles, was sanctioned by the Belgian government, May 1, 1854. The English government authorized the construction of two lines in India in 1849. George Stephenson, the father of English railroads, died at Tatton, near Chesterfield, Aug. 12, 1848. The following is a list of the principal lines in Great Britain and Ireland:—

A.D.

Rain (Battle).—Gustavus Adolphus, at the head of a Swedish army, defeated Tilly, at Rain, on the banks of the Lech, in Germany, April 5, 1632. Tilly died of a wound received in this battle, and the victorious leader, Gustavus Adolphus, fell at Lützen, Nov. 6 in the same year. The battle of Rain is sometimes called the battle of Lech, or Leck.

Rainbow.—Newton ascribes the first explanation of the rainbow to Antonio de Dominus, bishop of Spalatro, whose account, said to have been composed A.D. 1590, was published at Venice in 1611. The true theory was explained by Descartes, in his “Dioptrics.” Mariotte, in 1686, considered it to be produced by refraction.

Rajmahal (Hindostan), according to native authorities, was founded B.C. 3000. The English obtained possession A.D. 1765. The splendid palace, the ruins of which still exist, was built by the sultan Sujah, brother of the emperor Aurungzebe, in 1630, and was greatly injured by a fire, which also destroyed a large portion of the town, in 1633

Rajpootta (Hindostan).—This extensive district, so called from the Rajpoorts, its early inhabitants, was conquered by the Mohammedans, but maintained a half independence, A.D. 1194. At the death of Aurungzebe, in 1707, it became nominally subject to the emperor of Delhi, and its chiefs achieved their independence in 1748.

Rakowitz (Battle).—A large army of Turks was defeated by Stephen, valvode of Moldavia, in this battle, fought A.D. 1475.

Raleigh’s Conspiracy.—James I. having broken faith with the Roman Catholics, to whom he had promised toleration and indulgence.
gence, a design was formed, A.D. 1603, to take away his life and that of his eldest son, Prince Henry, and to place Arabella Stuart upon the throne. The conspirators, amongst whom were Raleigh, Sir Griffin Markham, lords Grey and Cobham, with many others, were arrested in July. They were removed to Winchester in November. Sir Griffin Markham and others were found guilty Nov. 15, Sir Walter Raleigh Nov. 17, Lord Cobham Nov. 25, and Lord Grey Nov. 26. None of these were executed. William Clarke and William Watson, two priests concerned in the conspiracy, hanged Nov. 29, and Brooke, Lord Cobham’s brother, beheaded Dec. 5, were the only persons who suffered the extreme penalty of the law for their share in this plot.

Rambouillet (France).—The castle was the residence of the kings of France to the time of Charles X. Here Francis I. died in 1547, and Charles X. signed his abdication of the French throne Aug. 2, 1830. Napoleon III. converted the castle into a seminary for officers’ daughters in 1852.

Rambouillet (Battle).—The allies under the command of the duke of Marlborough defeated the French under Marshal de Villeroi with great slaughter, at this village in Belgium, May 12 (O. S.), 1706.

Rammekens (Holland), constructed as a fortress, A.D. 1547, and called Zeebourg, was one of the Cautern towns (q. v.) given to Queen Elizabeth by the States-general, for the aid rendered her by Spain in July, 1585.

Ramusuggur (Hindostan).—This town in the Punjab was stormed by Maha Singh, father of Ranjeet, A.D. 1778. Several severe skirmishes between the English under Lord Gough, and the Sikhs under Shere Singh, took place in the neighbourhood, in November, 1843, and Lord Gough gained a signal victory here Dec. 3.

Ramsgate (Kent), called also Riums Gate, or gate of Rium. After the Revolution, A.D. 1688, the inhabitants began to trade with Russia, and in the beginning of the 17th century this place, at that time a small fishing village, gradually increased in importance. The pier was commenced in 1750, and is described by Pennant in 1773 as the finest existing. The harbour was formed in 1780—1795. A stone lighthouse was erected in the commencement of the present century, and the parish church in 1827.

Ranelagh Gardens (London).—This celebrated place of public entertainment at Chelsea was commenced about A.D. 1740, on ground once the property of Viscount Ranelagh. The Rotunda, which constituted the principal attraction, was founded in 1741 and opened April 5, 1742. Ranelagh was last used in 1802, when an installation ball of the knights of the Bath was held there. It is now completely obliterated, a portion of its site being occupied by the gardens of Chelsea Hospital.

Rangoon (Hindostan).—This town, the name of which signifies “City of Victory,” built A.D. 1753, by Alompra, the founder of the Burmese monarchy, was occupied by the British May 11, 1824, during the first Burmese war. It was entirely destroyed by fire Dec. 28, 1850, and was shortly afterwards rebuilt nearly a mile from the site of the old town. In the second Burmese war it was attacked by the British Jan. 2, 1852, and was stormed and captured April 14. Rangoon suffered severely from conflagrations in February, 1853, and December, 1855.

Ranters, a sect which sprung up A.D. 1643, received this name, which was also given to the Primitive Methodists, who separated from the old Methodist society June 28, 1808. The first general meeting after the society had been divided into circuits was held at Nottingham in 1819, and a society of Ranters was founded in London in December, 1822.

RAPER.—The ancient Jewish laws punished this crime with death when the woman was betrothed to another man; and in other cases compelled the ravisher to marry her, and pay a fine of 50 shekels to her father. The Roman codes made it in every case a capital offence; and it was treated with the same severity by the laws of the Goths and the Anglo-Saxons. William the Conqueror commuted the penalty to mutilation and blinding, and by 3 Edw. I. c. 13 (1275), it was reduced to a mere misdemeanour, punished by two years’ imprisonment and a fine, unless the offender were proved guilty of a capital felony in commission of the crime. In consequence of the inefficacy of this law, rape was made a capital felony by 13 Edw. I. c. 34 (1285); and by 18 Eliz. c. 8 (1574), persons convicted of this crime were deprived of benefit of clergy. The laws on the subject were consolidated by 9 Geo. IV. c. 31 (June 27, 1829), which made the carnal abuse of a girl under ten years of age a capital felony, and of females of greater age a misdemeanour, punishable by imprisonment at the pleasure of the court. Transportation for life was substituted for the capital penalty by 4 & 5 Vict. c. 56 (June 22, 1811).

Raphia (Syria).—A great battle was fought near this maritime city B.C. 217, between Ptolemy Philopator and Antiochus III., of Syria, in which the latter was defeated with great loss. It was represented by its bishop in a council held at Ephesus A.D. 476, in one held at Constantinople in 536, and at the fifth general council held at Constantinople from May 4 to June 2, 553.

Raphon (Bishopric).—This Irish see is of great antiquity, and is said to have been founded by St. Eunan in the 5th century. By the Church Temporalities Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1833), this see was annexed to Derry.

Raspberry.—The Virginian raspberry was brought from North America before A.D. 1696, and the flowering raspberry from North America in 1700. Some seeds of this plant found in the cavity of the stomach of an ancient Briton exhumed at Dorchester were sown, and germinated about 1835.
RATHEWALL, or RATHENOW (Battle).—Frederick William, elector of Brandenburg, defeated the Swedes, who had been subsidized by the French to invade his territory, near this town of Prussia, in June, 1675.

RATMINES (Battle).—The marquis of Ormond, while besieging Dublin, was attacked by Colonel Jones, at this place, in the vicinity, and after a struggle which lasted two hours, was totally defeated Aug. 2, 1649.

RATIBOR (Prussia) became a principality A.D. 1288, and was united to Oppeln in the 15th century.

RATIONALISM, denying the possibility of a revealed religion, began to assume a systematic form in Germany under the advocacy of Reimarus, professor of philosophy at Hamburg, who died March 1, 1768. Among theologians, Eichhorn took the lead in the Arch of Biblical Literature (1789-1801). Afterwards the system was more fully developed by Dr. Paulus of Heidelberg in his "Commentary on the New Testament" (1800-1804) and "Life of Jesus" (1825). An opposition was commenced by Reinhard, which continued from 1810 to 1817, producing a second form of the sceptical system that was fully applied by Dr. Strauss in his "Life of Christ," published in 1835 and 1836.

RATISBON (Bavaria).—A council was held here A.D. 708 or 709, and a stone bridge was built over the Danube in 1135. The Scotch Benedictine church of St. James was founded in 1155, and the Gothic cathedral, commenced in 1275, was completed in 1384. Ratisbon was made a free city in 1200. In the bishop's palace, now a brewery, the emperor Maximilian II. died, Oct. 12, 1576. Since the 10th century Ratisbon has sustained seventeen sieges. Near the cathedral is the old hall in which the German diets held their meetings from 1683 till 1806. In the middle of the 17th century, Ratisbon began to decline. The German empire was governed by the diet of Ratisbon in 1792, and a congress of German princes met here Aug. 3, 1802. It was captured by the Austrians April 28, 1809. The Walhalla, founded in 1830, was completed in 1842. A monument was erected in 1817 to Kepler, who died here in 1630. Councils were held here in August, 792, Jan. 20, 799, and Jan. 14, 932.

RATISBON (Treaties).—A peace was concluded at this place between France and the emperor, Oct. 13, 1630, which resulted in the settlement of the Mantuan succession. A truce for twenty years was agreed at Ratisbon, between France and Spain and Germany, Aug. 15, 1634. A convention was also signed here between the emperor of Austria and the elector of Wurttemberg, June 2, 1804.

RAUCOUX, or ROCOUX (Battle).—Marshal Saxe defeated the allies under Prince Charles of Lorraine at this village, in Belgium, Oct. 11, 1746. The loss of the allies was estimated at 12,000 men in killed and wounded, and 3,000 prisoners.

RAVENNA (Italy).—Strabo relates that this city of Cispadane Gaul was of Thessalian origin. It became subject to Rome B.C. 234, and was occupied by Metellus, the general of Syria, B.C. 82. Augustus made it a permanent naval station of the Roman Adriatic fleet, and erected a celebrated lighthouse or pharos at the mouth of its harbour. It was besieged and taken by Maximian A.D. 307, and was erected into the capital of the Western empire by Honorius in 404. Odoeasar, king of Italy, was besieged here for three years by Theodoric the Ostrogoth, and a few days after his surrender was stabbed by his captor, March 5, 493. In December, 539, Belisarius took the city from the Gothic king Vitiges, and in 568 it was made the capital of an exarchate, comprising the provinces of Rome, Venice, and Naples, besides other territories. Luitprand, king of the Franks, took the place and used the exarchate in 750, and in 754 it was wrested from the Lombard monarch Astolphus, and presented to the pope by king Pepin. From this time its prosperity declined. Pietro Traversari declared himself duke of Ravenna in 1218, and in 1275 it passed into the power of the Polenta family. In 1441 it was seized by the Venetian republic, by which it was finally ceded to the pope in 1609. A terrible battle between the French and the allied Spanish and papal forces was fought here on Easter Sunday, April 11, 1512, in which the French were victorious, though they lost their general, Gaston de Foix. The vanquished lost 800 men-at-arms, 1,500 light cavalry, and 7,000 infantry; and the victors 700 men-at-arms, 880 archers, and 9,000 infantry. The result of the battle was the seizure of the city by the French. Ravenna was annexed to the new kingdom of Italy in 1860. The bishopric of Ravenna was founded by St. Apollinaris, a disciple of St. Peter, A.D. 44, and it was erected into an archbishopric in 439. Councils were held at Ravenna in February, 418, 874; July 22 to September, 877; in 895; April 20, 967; in 968; May 1, 988; in 1014; April 30, 1016; in 1128; April 28, 1253; in 1261; July 6, 1296; June 17, 1310; June 17 to 21, 1314; Oct. 10, 1314; and Oct. 27, 1317.

The family of its counts became extinct in 1346. It was afterwards conferred upon the duke of Juliers, and in 1666 it was annexed to Prussia.

RAVENSDUR (Yorkshire).—Edward IV., accompanied by his brother Richard, duke of Gloucester, landed at this town, at the mouth of the Humber, with 2,000 men from Zealand, March 14, 1471.

Reading (Berkshire) was in possession of the Danes A.D. 871, who were compelled to evacuate it in 872. It was burned by them in 1006, and an abbey of nuns was dedicated. The abbey council was held at Reading July 30, 1279. Henry VI. summoned a parliament to meet here March 6, 1453; and in consequence of the severity of the plague in London, the Michaelmas sitting of the courts of justice were transferred to Reading in 1625. During the civil war it was taken by the parliamentarian forces under the earl of Essex, April 27, 1643. A Benedictine monastery was erected by Henry I. in 1121; in which he was buried in 1135. The church of St. Lawrence, a Norman structure, was repaired in 1344, St. Mary's was rebuilt in 1551; the Free Grammar-school was founded in 1556; the Oracle, for the employment of the poor, was founded by Mr. John Kendrick in the 17th century; and the Roman Catholic chapel was erected in 1840.

REALISTS. (See NOMINALISTS.)

REAL PRESENCE.—The second council of Nicea, Sept. 24 to Oct. 23, 787, determined that the elements in the Lord's supper were the real body and blood of Christ, and the doctrine that this was the effect of a miraculous change had gained ground in the Greek church as early as 813. Radbert, a monk, who became abbot of Corbev, defined and maintained it in 831. Scotus in his "De Eucharistia" opposed it in 844; and a violent controversy on the question took place between Lanfranc and Berengarius in 1059. It was opposed by Wycliffe in 1381. Luther maintained it under the name of consubstantiation in 1524. Disputations on the doctrine were held at Oxford and Cambridge in 1549 and 1550.

REAPING-MACHINE was invented by the Rev. Mr. Bell, Carmylie, Forfarshire, about A.D. 1836. At a trial of reaping-machines, held at Keilor farm, Forfarshire, Sept. 4, 1852, the unanimous verdict of the judges was given in favour of this machine. Hussey's American machine competed on this occasion.

REASON (Temple).—The National Convention at Paris ordered the worship of the Goddess of Reason, Nov. 10, 1793. Gobel, archbishop of Paris, with a number of the clergy, abjured the Christian faith at the bar of the National Assembly, and soon after Madame Maillard, a member of the opera corps, was driven in a horse-drawn sedan to the cathedral of Notre Dame, where she was elevated on the high altar, and received homage from the crowd. The sacred edifice was thenceforth styled the "Temple of Reason." A similar act of impiety was afterwards enacted in the church of St. Sulpice, the Divinity being personated by Madame Monmaro.

REATRE (Italy).—This ancient city, one of the chief strongholds of the Sabines, is first mentioned in history about the date of its subjection to Rome, B.C. 290. Its inhabitants sent many volunteers to serve under Scipio, B.C. 205, and they were assisted by Cicero in a legal contest with the citizens of Interamna, B.C. 54. Reate was erected into a bishopric at a very early date, St. Prosdocimus, who flourished A.D. 45, being its first bishop. Its modern name is Rieti, and it was the scene of a victory gained by the French over the Neapolitans in 1798.

REBECCA RIOTS, against toll and turnpike gates, broke out in Wales in February, 1843, and spread from the rural districts of Pembroke and Caermarthenshire into the mining and manufacturing districts in July. An old woman, keeper of a toll-gate, having been murdered Sept. 10, a proclamation, offering £500 reward for the discovery of incendiaries, appeared in the Gazette Oct. 3, and a commission to inquire into the operation of the turnpike laws in Wales was appointed Oct. 10. A special commission for the trial of the prisoners was opened at Cardiff Oct. 27, when several persons were sentenced to various terms of transportation and imprisonment. It closed Oct. 30.

REBELLIONS. (See PLOITS.)

RECEIPTS.—Stamp duties were first laid upon receipts for money by 23 Geo. III. c. 49 (1783), which was amended by 24 Geo. III. c. 7 (1784), and 31 Geo. III. c. 25 (1791). Additional duties were imposed by 35 Geo. III. c. 55 (May 5, 1795), and a uniform stamp of one penny on all sums above £2 was imposed by 16 & 17 Vict. c. 59 (Aug. 4, 1853). The forgery of receipts was made a capital felony by 46 Geo. III. c. 59 (July 10, 1805).

RECIROCITY TREATY, for commercial purposes, was concluded between the United States and Great Britain at Washington by Lord Elgin, June 7, and ratified by the senate Aug. 5, 1854.

RECRUTATIVE.—This mode of singing was first employed by Jacopo Peri in his opera of "Eurydice," which was performed at Florence A.D. 1600. It is supposed to be a restoration of the method of singing among the Greeks and Romans, but there is no reason to believe the supposition is correct.

RECORD.—This officer acts as a legal adviser of the lord mayor and aldermen. As a judge in their courts, and in corporations, he takes precedence of all who have not filled the office of mayor. The earliest known recorder of the city of London is John de Norton, who was appointed to the office A.D. 1290.

RECORDS, PUBLIC.—The public records of England were first preserved by order of Henry I., A.D. 1100, and a roll of his reign is still in existence. The pipe rolls extend in an unbroken series from the year 1156.
to 1831, and form a collection of public documents unequalled in the archives of Europe. The making of false entries in the records was declared punishable by fine by 8 Rich. II. c. 4 (1384). The records are mostly written on parchment, the earliest on paper being of the time of Edward II. They are generally in the Latin language, except during the Interregnum, when English was substituted. Latin was finally abolished in the keeping of the records, as well as in other legal matters, by 4 Geo. II. c. 26 (1731). Many efforts have been made for the systematic arrangement of the records. A commission, to inquire into the best measures to be adopted, was appointed July 19, 1800, and was frequently renewed, the last time being by royal letters dated March 12, 1831. The commissioners presented their report Feb. 7, 1387, and the result was the passing of the "Act for keeping safely the Public Records," 1 & 2 Vict. c. 94 (Aug. 14, 1838), which established the Public Records Office.

RECOVERIES AND FINES in fictitious suits were abolished by 3 & 4 Will. IV. c. 74 (Aug. 28, 1833).

RECUTTER (Kent).—The ancient fortress of Regulbium was erected by the Romans towards the end of their occupation of Britain, and the Saxons changed its name to Raculf Caestic. Ethelbert, king of Kent, gave up his palace at Canterbury to St. Augustine, and retired to this place A.D. 597. In 669 Egbert conferred it upon Bassa, a mass-priest, that it might form the site of a monastery, and in 949 the castle and monastery were granted to Canterbury cathedral by Edred. The church was pulled down in 1804, and the only ruins remaining are the west towers, which are known as "the Sisters." The sea encroaches on the coast at this place at an average rate of two feet every year, and the beach beneath the old churchyard is strewn with the bones that have been washed out by the tide.

RECUSSANTS.—Persons who refused to attend church on Sundays and holidays were so styled by 1 Eliz. c. 2 (1559). Dissenting Protestants were relieved from the penalties of this act by 1 Will. & Mary, c. 18 (1689), and Roman Catholics in 1791. The act itself was repealed by 7 & 8 Vict. c. 102 (Aug. 9, 1844).

REDAN (Sebastopol), one of the defences of this town, was attacked by the English, who were repulsed with loss by the Russians, June 18, 1855. They experienced another repulse Sept. 8, 1855, and it was evacuated by the Russians Sept. 9, 1855.

REDDHILL REFORMATORY (Surrey), for juvenile offenders, was established by Robert Young A.D. 1788, and incorporated in 1806. Its operations were for many years carried on in St. George's-in-the-Fields. Land was purchased at Redhill, and the school was opened in April, 1849. Forty-five of the boys were confirmed by the bishop of Winchester in May, 1859.

REDHINA (Battle).—Wellington defeated the French under Massena and Ney at this place in Portugal, March 12, 1812.

RED ROSE. (See LANCASTRIANS and YORKISTS.)

RED RUSSIA.—Galicia and Lodomeria were generally known under this name until A.D. 1773.

REFORM ASSOCIATION, to insure the registration of electors and protect them in the exercise of the franchise, was instituted at a meeting held in Westminster, May 20, 1838.

REFORMATION.—The earliest efforts directed against the errors of the Romish church were those of the Paulicians, in the 7th century.

A.D. 1377. A reformation is attempted in France by the Albigeouses (g.v.).

1408. John Huss introduces reformed doctrines in Bohemia (g.v.).

1408. Jerome Savonarola, the Dominican precursor of the Reformation, is burnt for heresy.

1517. Martin Luther commences the Reformation in Germany.

1519. It is introduced into Switzerland by Ulrich Zwinglius.

1521. Andreas Bodenstein, better known as Carlstadt, from the place of his birth, introduces the Reformation into Denmark.

1525. The progress of the Reformation in Germany produces the war of the peasants.

1526. Prussia receives the reformed faith.

1527. It is officially establis hed in Denmark.

1528. Patrick Hamilton is burnt at St. Andrew's for preaching the Reformation in Scotland.

1529. The Reformation is established in England, and the receivers of the new views assume the title of Protestants (g.v.).

1532. John Calvin preaches in France.

1534. The papal supremacy is abolished in England.

1535. George Browne, the first Protestant archbishop of Dublin, introduces the Reformation into Ireland.

1536. The reformed views are widely adopted in Norway.

1539. The Reformation is officially recognized and adopted in Saxonv.

1541. Protestantism is preached in Venice and Naples.

1544. It is completed in Sweden.

1545. Hungary and Transylvania receive the principles of the Reformation.

1550. The Reformers are numerous in Spain.

1556. John & Lacso preaches the Reformation in Poland.

1559. Gustavus Vasa introduces reformed Christianity into Lapland.

1566. Protestantism is established in Scotland.

1567. The reformation of the Reformation are numerous in Holland, where they are persecuted by the duke of Alva.

1614. It is adopted by the elector of Brandenburg.

REFORMATORY SCHOOLS, for the better care and reformation of youthful criminals in England and Scotland, were established by 17 & 18 Vict. c. 86 (Aug. 10, 1854).

REFORM BANQUETS (French).—A reform banquet was held at Macon Sept. 20, 1847, and the leaders of the French opposition determined on holding a grand reform banquet at Paris, Jan. 19, 1848. The project was prohibited by the police, according to a law passed Aug. 24, 1790; but they persisted in their design, and on the 14th of February announced their intention of celebrating the
feast the following Feb. 22. A large open space in the Champs Elysées was selected, and preparations made for the accommodation of 6,000 guests, when a compromise was effected with government, by which the banquet was to be converted into a procession. Owing to the refusal of the opposition deputies to take part in the procession, addresses were published on the afternoon of Feb. 21, announcing the abandonment of the entire scheme. On the following day the people assembled according to the first arrangements, and remained in order till the evening, when barricades were erected, and the revolution commenced, which resulted in the expulsion of Louis Philippe from France (q.v.).

REFORM BILLS.—Mr. Pitt's bill for reform in parliament was lost by a majority of 20, May 7, 1782. His proposal was again defeated by a majority of 144, May 7, 1783, and of 74, April 18, 1785. Sir Francis Burdett's plan was negatived by a majority of 95, June 15, 1809; and Mr. Daniel O'Connell's project for introducing universal suffrage, triennial parliaments, and the ballot, was rejected by 306 votes, May 28, 1830. The first reform bill introduced by government was that of the Grey administration, which was brought before the House of Commons March 1, 1831. The first division took place March 22, when a majority of one declared in favour of the second reading. On the question of a committee, General Gascoyne proposed as an amendment, "that the number of representatives for England and Wales ought not to be diminished," which was carried by a majority of eight, April 19. The bill was relinquished in consequence, and parliament dissolved April 22. A new parliament assembled June 14, and the bill was again introduced June 24. The motion for its second reading passed by a majority of 136, July 6; and a majority of 109 declared in favour of the third reading, Sept. 21; but the bill was rejected in the Lords on the question of its second reading, by a majority of forty-one, Oct. 7. A new bill was introduced by Lord John Russell, Dec. 12, and passed its first reading without a division. The motion for its second reading was carried by a majority of 162 (the number of assentents being just double that of the dissentients), Dec. 17; and it was read a third time by a majority of 116, March 22, 1832. This bill was read a first time in the Lords March 26; and the second reading was carried by a majority of 9, April 13. The bill was consequently carried into a committee of the Lords, where an amendment by Lord Lyndhurst for considering the question of enfranchisement before that of disfranchisement was carried against government by a majority of 36, May 7. The ministry resigned May 9, but resumed their offices May 15, having obtained three days to create a sufficient number of new peers to secure them a majority in the Lords. The bill passed the Lords' committee May 30, and was read for the third time by a majority of 84, June 4. It received the royal assent June 7, and appears in the statute-book as the "Act to amend the Representation of the People in England and Wales, 2 & 3 Will. IV. c. 45 (June 7, 1832)." The representation of Scotland was amended by 2 & 3 Will. IV. c. 65 (July 17, 1832), and that of Ireland by 2 & 3 Will. IV. c. 59 (Aug. 7, 1832). Lord John Russell received leave to introduce another reform bill Feb. 13, 1834, which, in consequence of the Russian war, was withdrawn April 11. Mr. Disraeli introduced a bill Feb. 28, 1859, which was thrown out on the second reading by a majority of 39, March 31. Lord John Russell introduced another measure March 1, 1860, which was withdrawn June 11.

REFRESHMENT-HOUSES in England were subjected to a licence duty by 23 Vict. c. 27 (June 14, 1860), and in Ireland by 23 & 24 Vict. c. 107 (Aug. 28, 1860).

REGALIA, or the insignia of England, at present kept in the jewel-house of the Tower, were made for the coronation of Charles II., April 23, 1661, the former set having been destroyed in 1649 by order of the Long Parliament. An attempt was made to carry off the regalia from the Tower by the notorious Colonel Blood, May 9, 1671.

REGATE, from the Italian, meaning a race on the water, was first applied to a fête at Venice, in which the gondoliers contended for prizes. The term was introduced into this country and applied to boat-races about the end of last century, such a contest, which took place on the Thames June 23, 1775, being announced as a novelty.

REGED (Scotland), corresponding to Annandale, in Dumfriesshire, formed one of the numerous small kingdoms into which the country was divided A.D. 626.

REGENCY BILLS.—A measure of this kind was passed, appointing the prince dowager of Wales regent, on the death of Frederick, prince of Wales, should the crown descend to a minor, A.D. 1761. During the first illness of George III, he himself proposed one, the name of his mother being included, April, 1765. The premier moved three resolutions in the House of Commons, when George III. was a second time attacked by his malady, to consider what steps should be taken to provide for the government, Dec. 10, 1788. The decision of the legislature as to what powers should be invested in the regent, was submitted to the prince of Wales, Dec. 30, 1788, and a bill, which passed the Commons, after a warm discussion, was introduced Feb. 3, 1789, and reached the second reading in the Lords, Feb. 19, 1789, after which it was abandoned, owing to the recovery of his majesty. It was, however, revived and passed Feb. 5, 1811, and the prince of Wales exercised the regency till the death of his father. By 1 Will. IV. c. 2 (Dec. 23, 1830), the administration of the government, in the event of the crown descending to the Princess Alexandrina Victoria in her mi-
ority was provided for; and by 3 & 4 Vict. (Aug. 4, 1840), Prince Albert was appointed regent in the event of the demise of the crown during the minority of the next in succession.

Regents were first appointed in England by Henry III. under the name of Custodes regni, about a.d. 1250. The Black Prince, then duke of Cornwall, was left guardian of the kingdom, in 1339, when he was but ten years of age, and his son Richard, when still younger, during the absence in France of Edward III. in 1372. During the minority of Henry VI. the duke of Bedford was appointed protector, and the duke of Gloucester in his absence in 1422; and when Henry's mental incapacity became decided, the peers elected the duke of York protector in 1454. This regency terminated with the recovery of the king, but he relapsed after the affair at St. Alban's, and the duke was re-appointed by parliament, Nov. 19, 1455. Among the minorities of Edward VI. his uncle, the earl of Hertford, created duke of Somerset, was declared protector, March 13, 1547. When George I. went to Germany, he left the prince of Wales guardian of the kingdom, July 7, 1716, and George II. appointed Queen Caroline regent when he visited Hanover, May 17, 1729. The prince of Wales (George IV.) assumed the regency on account of his father's mental incapacity, Feb. 5, 1811. On the death of Louis XIV. of France, the duke of Orleans was recognized as regent of the kingdom, Sept. 2, 1715.

Regent's Canal (London).—The new branch, uniting all the principal canals in the kingdom with the river Thames, which had been nearly seven years incomplete, was finished under the superintendence of J. Nash, and opened Aug. 1, 1820.

Regent's Park (London).—This park forms part of old Marylebone Park, which has been long disfigured. It was commenced by Mr. James Morgan a.d. 1812, but the public were not admitted to the inner plantations until 1838. The terraces surrounding the park were designed by John Nash and Decimus Burton.

Reggio, or Reggio (Italy), was founded by the Chalcidians about B.C. 720; became the head-quarters of the Pythagoreans after the death of their master, B.C. 497; rose to great prosperity under Anaxilas, who died B.C. 476, expelled his two sons B.C. 461, and fitted out a large fleet and army against Dionysius of Syracuse B.C. 399. After sundry attempts he took the city, and destroyed it, slaughtering the citizens, or selling them for slaves, B.C. 387. It was restored by the younger Dionysius, whose yoke was thrown off B.C. 351. Through fear of Pyrrhus, it formed an alliance with the Romans, received from them a garrison of Companion troops, who rose agains the inhabitants, putting the men to the sword and reducing to slavery the women and children, B.C. 280. The Romans took the city, and punished their rebel soldiers, B.C. 270. An earthquake nearly destroyed it B.C. 91, and it became a Roman municipium B.C. 88. Octavius made it the head-quarters for his fleet and army in the war with Sextus Pompeius, B.C. 38—36. It was captured by Alaric A.D. 410, and by Totila in 549. Having been subject to the Greek emperors, and taken by the Saracens, it came into possession of Robert Guiscard in 1060. It was sacked by the Turks in 1543, again in 1558, and a third time in 1568. An earthquake in 1783 did not leave a house uninjured, and a second did much damage in 1841.

Regifugium, or Fugalia.—This festival, said by some writers to have been instituted in commemoration of Tarquin's flight from Rome, was held annually, in that city, Feb. 24 according to some authorities, and May 24 according to others.

Regillus. (See Lake Regillus.)

Regiments appear to have been first conscripted and designated in France, about a.d. 1562. The French regiments were raised by Charles IX. for his personal defence in 1563. In England mention is made of them during the threatened invasion in 1558, and in connection with the army in Ireland in 1598. Just after the restoration in 1661, the army having been disbanded, two regiments, one of foot and the other of horse, were re-formed in 1661. The Scotch corps, which returned from France in 1661, and was called the first, or royal regiment of infantry, is the oldest regular corps in Europe. The two regiments of lifeguards at the head of the army list were raised in 1758. One regiment of infantry was raised in Ireland in 1684, afterwards called the Royal Irish, in honour of its gallant conduct at the siege of Namur in 1695.

Registration of Births, Deaths, and Marriages.—It was enjoined in the 12th article of Cromwell's injunctions, issued in September, 1658, that a record of these should be kept in each parish. Various subsequent injunctions having met with little attention, a bill to enforce the performance of the royal mandate was introduced into parliament in March, 1563, but was not passed. The archbishop of Canterbury made some exertions in the matter in 1597, and again in 1605. By 6 & 7 Will. III. c. 6 (1694), certain duties on marriages, births, and burials, also on bachelors and widows, and for having them duly registered, were imposed, to enable the king to carry on the war with France. By 52 Geo. III. c. 146 (July 28, 1812), alterations were made in the existing law. The registration act, 6 & 7 Will. IV. c. 86, passed Aug. 17, 1836, came into force July 1, 1837. This was amended by 1 Vict. c. 22 (June 30, 1837). The registration in Scotland was assimilated to that of England by 17 & 18 Vict. c. 80 (Aug. 7, 1854).

Registration of Deeds.—Bargains and sales of land were required to be registered by 27 Hen. VIII. c. 16 (1536). A register was established for the West Riding of York—
shire by 2 & 3 Anne, c. 4 (1703); one in the
East Riding for wills and deeds by 6 Anne,
c. 35 (1707); one for Middlesex by 7 Anne,
c. Vitro, and one in North Riding by 8 Geo.
II., c. 6 (1734). Bills of sale of per-
sonal chattels, to prevent fraud upon cred-
itors, are required to be registered by
17 & 18 Vict. c. 36 (July 10, 1854).

REGISTRATION OF VOTERS was established
by 2 Will. IV. c. 45, s. 26 (June 7, 1832).
The law was amended by 6 Vict. c. 18
(May 31, 1843). The law in Scotland was
amended by 19 & 20 Vict. c. 58 (July 21,
1859).

REGISTRATION DONUM, or Royal Gift, to the
amount of £600, was granted as secret
service money by Charles II., to be dis-
tributed annually among the Presbyterian
clergy of Ireland, A.D. 1672. Having
been discontinued, it was renewed in 1690
by William III., who increased the sum to
£1,200. George I. granted a considerable
sum for the relief of ministers belonging to
the Presbyterians, Independents, and Bap-
tists, in 1723. It was further augmented to
£2,200 in 1784, to £5,000 in 1792, and to
£36,953 in 1856.

REICHENBACH (Germany).—Preliminaries
of peace were signed between Prussia and
Austria at this town, July 27, 1790. A con-
gress was assembled here by the British
ministry to form an alliance against Russian
aggression in 1791. The treaty that laid the
foundation of the grand alliance against
Napoleon I. was signed here June 14, 1813;
and Austria gave her adherence to it July 27.

REICHENBERG (Germany).—The troops
of the emperor Frederick, under the prince
of Bevern, drove the Austrians, commanded
by Count Königsegg, from a strong position
near this town of Bohemia, April 27, 1577.
It was occupied by the French in 1613.

REICHSHOF, or council of the Austrian
empire, was extended by an imperial patent
March 5, 1800. It met in May, and a new
constitution was promulgated Oct. 21. Both
houses re-assembled May 1, 1861.

REIGATE (Surrey), anciently called Cherch-
felle, or Churchfield, at which place a church
existed A.D. 1199, in the reign of King John.
Reigate castle is said to have been built
before the Norman conquest, and in 1216
was in possession of Louis, dauphin of
France. It was demolished by order of the
Long Parliament, July 4, 1645. Reigate
priory is said to have been built by William
Warren, in 1240. Reigate received a charter from Edward II. in 1315,
and another from Charles II. in 1673.
It first sent two members to parliament in
1285, and continued to do so till 1582, when
the number was reduced to one by the
Reform Bill.

REIGN OF TERROR.—The first period of
anarchy, bloodshed, and confiscation, called
the reign of terror, commenced in France
after the fall of the Girondists, May 31, 1793,
and extended to Danton's death, March 31,
1794. The second period extended from
April 5 till the fall of Robespierre, July 27,
1794. Nearly a million persons were put to
death during this short time.

RELIQUARY.—Those of St. Andrew, St. Luke,
and Timothy, were transported in pomp by
Constantine II. to the church of the Apostles
at Constantinople, A.D. 330; and what were
called the ashes of Samuel, the prophet and
judge of Israel, received a like distinction
about 410. An immense trade in relics sprung
up at Jerusalem, the articles consisting of dry
bones, chips of wood, rusty nails, and rotten
rags of cloth, which were said to possess the
virtue of working every description of miracle,
A.D. 604. At the taking of Constantinople by
the Latins, April 9, 1204, these formed a
valuable portion of the pillage, the abbot
Martin securing as his share “a stain of the
blood of the Lord, a piece of the holy cross,
the arm of the apostle James, some of the
bones of John the Baptist, some of the milk
of the Blessed Virgin, and many more.
Baldwin II. sold to St. Louis the crown of
thorns which had been placed on the head
of the Saviour for the sum of ten thousand
marks of silver, the relic being transferred
from Venice to Paris, where the king, bare-
foot and in his shirt, carried it in triumph
through the streets in 1261. When the
council of Basel met for the deposition of
Pope Eugenius, and many bishops absented
themselves through timidity, their place was
supplied by the collected relics of many
famous saints, which were borne by the
priests through the city, and introduced into
the hall of council May 16, 1439. The shrine
of Thomas Becket was plundered, and many
objects of superstitious veneration in Eng-
land were destroyed in 1538. The sale of
relics was prohibited by Pope Innoceint III.,
A.D. 1198.

RELIGIONS.—The following tables exhibit
the numerical strength of the most important
religious systems according to the best au-
thorities. For the chronology see each ar-
ticle separately.

REMONSTRANCE, called the Great Remon-
strance, consisting of 203 articles, condemna-
719
tery of the acts of Charles I., was debated seventy times in the house of Commons, and carried by a majority of eleven, the numbers being 159 for, and 148 against, Nov. 22, 1641. It was presented to the king Dec. 1.

REMONSTRANTS, so called from a remonstrance presented by the followers of James Arminius to the states of Holland, setting forth the grievances under which they suffered, and praying for redress, a.d. 1610. (See ARMINIANS.)

RENSBURG (Denmark) was encircled by walls a.d. 1539, and was till 1581 alternately in the hands of the Holsteiners and Danes. It was fortified anew by Frederick III. of Denmark in 1669, and additional fortifications were constructed in 1685 and 1695. The general assembly of the states met here April 5, 1848, and the town was taken by the Russian and Holstein troops in 1848. The Danes regained possession and dismantled it in 1852.

RENNES (France), captured a.d. 541, was the capital of a country till 902, and was the seat of the parliament instituted by Henry II. in 1555. Rennes was devastated by a fire, which lasted from Dec. 22 to 29, 1790, consuming 850 houses. The parliament house of the states of Brittany, now the Palais de Justice, was erected in 1670. In 1788 twelve hundred gentlemen of the states of Brittany met at Rennes and St. Brieux and chose twelve of their number as a deputation to bear the remonstrances of the various states to the king. An insurrection broke out Jan. 26, 1799. A council was held here May 22, 1273.

RENTS.—The system of paying rents in money instead of in kind was introduced a.d. 1199. Sir Richard Philips estimates the import of rents to produce as follows: "In the age of the Plantagenets, rents were to produce as 1 to 30; at the Revolution, 1 to 12; under the funding system they rose as 1 to 7. In the paper-money times they became as 1 to 5 and 4; and under the fall of markets, have, since 1830, been as 3·5, and 3·1." A great reduction in rents was made in 1821, owing to the cheapness of wheat, and in 1703 a sudden fall in prices rendered farmers unable to pay their rents. Rents experienced their greatest rise about the year 1812. By S. Anne, c. 14 (1709), no goods could be taken in exaction unless the sheriff has previously paid the landlord the rent due, and by 4 Geo. II. c. 25 (1731), arrears of all kinds of rent were made recoverable by distress. No arrears can be recovered for more than six years by 3 & 4 Will. IV. c. 27, s. 42 (July 24, 1823).

REPEAL OF THE UNION.—Daniel O'Connell first commenced to form associations for the repeal of the union, a.d. 1829. The house of Commons by a majority of 455 rejected his motion for repeal, April 27, 1834. The National Loyal Repeal Association, which had been formed in 1840, was again put into active operation early in 1843, and a monster meeting was held at Trim, March 16, 1843. O'Connell was tried and convicted Feb. 12, 1844, and was released Sept. 5.

REQUESTS (Court of). (See CONSCIENCE.)

RESCUE FORCES.—By 22 & 23 Vict. c. 40 (Aug. 13, 1859), the Admiralty was empowered to raise a body of men, not exceeding 30,000, to be called the Royal Naval Volunteers; and by 22 & 23 Vict. c. 42 (Aug. 13, 1859), the sovereign was empowered to raise and keep up in the United Kingdom a reserve force of soldiers not exceeding 20,000 men.

RETFORD, EAST (Nottinghamshire).—The first charter was granted to this town by Henry III., A.D. 1246, and a second by Edward I., Nov. 27, 1279. It first sent representatives to parliament in 1315, but in 1330 the burgesses petitioned the king to release them from the privilege, on account of their being too poor to pay the expenses of their representatives. A fresh charter, granted by Edward III. in 1336, was confirmed by another granted by Henry I. in 1424. The town-hall was built in 1388, and rebuilt in 1755. East Retford again sent representatives to parliament in 1571, but, owing to the bribery and corruption of the voters, an act was passed, July 23, 1830, which extended the franchise of Retford to the whole of the freeholders of the hundred. A great flood happened in 1795, which caused much damage to the town. Retford was first lighted by gas Dec. 22, 1831.

RETHEL (France) is supposed to have been built on the site of a Roman fort. In the Middle Ages it was ruled by its own counts, and was, a.d. 1551, made the seat of a duchy, conferred by Henry III. on the duke of Nevers, whose descendants sold it to Cardinal Mazarin. Rethel was taken by the Spaniards in 1659, and was retaken by Turenne in 1665. The Austrians were defeated by the French in a battle fought near this town, Dec. 15, 1650.

RETREAT OF THE TEN THOUSAND, known to the ancients as the "Return of the Cyprian Greeks." Cyrus II., king of Persia, took the field with 100,000 barbarians and 13,000 Greeks, commanded by Clearchus, and encountered the army of his brother, Artaxerxes II., near Cunaxa, losing the engagement and his own life, B.C. 401. The Greeks were victorious on their part of the field, and commenced their return homeward to the city of Ephesus in Ionia. Clearchus, having fallen by the treachery of the Persians, Xenophon was chosen leader. The march terminated at Cotyora, after many dangers and difficulties, as narrated by Xenophon in his "Anabasis," the distance, 3,650 English miles, having been accomplished in fifteen months.

RETSS (Germany).—Several small states of Germany bore this appellation, and three
of them became extinct, one A.D. 1236, another in 1532, and the third in 1550. Two only, namely Reuss Greiz and Reuss Schleiz, now exist, derived from the two sons of Henry the Peaceful, who died in 1535. The rank of counts of the empire was bestowed upon them in 1673, and the title of prince was conferred upon the elder, or Reuss Greiz line, in 1773, and upon the younger, or Reuss Schleiz line, in 1806. They both joined the Germanic confederation in 1813.

Reuss (Germany).—Pope Benedict XII., the tool of Philip of France, having renewed the excommunication of Louis, emperor of Germany, the electors met at Reuss A.D. 1338, and declared that the pope had no jurisdiction over the German empire. They prohibited the publication of papal bulls in Germany without the previous consent of the German bishops.

Revel, or Revel (Russia), was founded as a bishopric by Valdemar II. of Denmark, about A.D. 1218. The oldest church is the Estonian, mentioned in 1234. That of St. Olai was founded in 1229, and having been destroyed by fire, was rebuilt in 1820. Revel was captured by Peter the Great in 1710.

Revelation of St. John the Divine. (See Apocalypse.)

Revenue.—The greater portion of the public revenue of England was accidently derived from the rents of the crown property. As the royal estates decreased in extent, while the maintenance expenditure became more heavy, the system of tithes or fifteenths (see Aid and Benevolence) was introduced, by parliament granting to the crown a tenth or fifteenth part of the moveable property of the people. This system gradually became obsolete, and the revenue is now mainly derived from the customs, stamp, and excise duties, and the assessed, income, land, and property taxes, with the receipts of the post-office. The public revenues of Great Britain and Ireland were consolidated by 56 Geo. III. c. 98 (July 1, 1816). The following table exhibits the public revenue of England at different periods—

| William I. | 2,001,885 |
| William II. | 3,892,605 |
| Henry I. | 5,691,603 |
| Stephen | 6,705,643 |
| Richard I. | 52,810,680 |
| John | 6,762,643 |
| Richard II. | 71,333,000 |
| Edward III. | 59,000,000 |
| Edward IV. | 61,660,090 |
| Edward V. | 1821—1843 |
| Henry VII. | 1821—1843 |
| Henry VIII. | 1821—1843 |
| Edward VI. | 1821—1843 |
| Mary | 1821—1843 |
| Elizabeth | 1821—1843 |
| James I. | 1821—1843 |
| Charles I. | 1821—1843 |
| Interregnum | 1821—1843 |
| Charles II. | 1821—1843 |

REVIEWS.—The Journal des Savans, commenced at Paris A.D. 1665, is said to have been the first publication of the kind. The "Monthly Review," established in 1749, was the first in England.

The Principal Reviews.

Revivals.—The first great period of religious enthusiasm to which the name of "revival" was given, was that which commenced in New England in December, 1734. The last great revival occurred Sept. 23, 1857, when Mr. J. C. Lamphier commenced a series of weekly prayer-meetings at Fulton Street, New York. These meetings were at first poorly attended, but gradually excited great interest, and were held every day, besides being imitated throughout the United States. The movement afterwards passed into Scotland and the north of Ireland. Belfast was one of its chief centres, and it reached its height about September, 1859.

Revolutions.—The following is a list of the most important, which are described at greater length under the countries where they took place:

REVOLVER.—The earliest example of a revolving firearm in existence is a matchlock in the Tower armoury, supposed to be of the 15th century, which has a revolving breech with four chambers. A specimen of the 17th century, in the Hôtel Cluny at Paris, has eight chambers; and a brass pistol with six chambers, and supposed to be of the time of Charles I., forms part of the collection in the United Service Museum, London. Elisha H. Collier patented a rotating chamber-gun in America in 1818; and in August, 1819, Cornelius Coolidge patented a weapon in which an attempt was made to assist the chambers to revolve. Samuel Colt commenced his improvements in repeating firearms in 1829, and patented the revolver which bears his name in 1835. In 1836 he produced a weapon combining his pistol with the American bowie-knife; but the combination proved a comparative failure, and was abandoned. (See Arquebus.)

RHEA (Europe).—This ancient country became known to the Romans in the 2nd century B.C. After a struggle of many years, Rheia was conquered by the Roman consul Drusus and Tiberius, B.C. 15. According to tradition, the Rhetians were a tribe of Etruscans, driven from the plains of Lombardy by the Gauls.

Rhé, Isle of (France), having been taken by the French Huguenots, was wrested from them by Cardinal Richelieu, A.D. 1625. It was attacked by an English fleet and army, under the command of the duke of Buckingham, July 9, 1627. The attack failed, and Buckingham returned to England with the loss of two-thirds of his forces.

Rhegium. (See Reggio.)

RHEIMS (France), the ancient Durocor- torum, was the capital of the Remi; and, having been captured by the Romans, was made by them the capital of Belgica Secunda. Christianity was introduced into Rheims about A.D. 360, from which date it was the seat of a bishop. Clovis and the chief lords of his court were baptized by St. Remi, then bishop of Rheims, in 496, and in 744 it was erected into an archbishopric. The abbey church of St. Remi, the burial-place of St. Remigius, the apostle of the Franks, was erected between 1048 and 1162, and the cathedral, commenced in 1212, was finished in 1241. The archbishop's palace dates from the 12th century, and various sovereigns of France have at different times lodged within its walls. In 1678 it was taken by the English, who were driven out by Joan of Arc in 1429; and in the same year Charles VII. was crowned in the cathedral, Joan of Arc bearing her sacred banner. This town was taken March 12, 1814, by a corps of Russians under St. Priest, a French emigrant, but was retaken the next day by Napoleon I., when 2,000 Russians and their commander were slain. The town-hall, begun in 1627, was not finished till 1628. Councils were held here in 1623, July 8, 743, July 6, 900; in 923, 975, 987; Jan. 23, 988; June 17, 991; May 12, 1015; Oct. 3, 1049; in 1093; Sept. 17, 1094; in 1097; July 12, 1105; March 28, 1115; Oct. 19 to 30, 1119; Oct. 19, 1131; March 21, 1148; Oct. 26, 1157; in May, 1164; July 23, 1235; Oct. 1, 1287; Sept. 30, 1302, and April 28, 1408.

RHINEFELD (Switzerland).—This free town was ceded to the duke of Austria by the emperor Louis V., A.D. 1390. A battle took place here Feb. 18, 1638, in which the imperialists were totally routed, and the town surrendered May 13 following.

RHINE. (See CONFEDERATION OF THE RHINE.)

RIO COROUBA (between Egypt and Palestine), the modern El-Arish (q.v.), was founded, according to Diodorus Siculus, as a penal colony, by a king of Ethiopia, and derived its name from the convicts having their noses cut off. Baldwin, king of Jerus- alem, returning from his Egyptian expedi- tion, fell sick and died here, A.D. 1118.

RHODE ISLAND (North America) was settled by Roger Williams, when he fled from religious persecution in Massachusetts, in June, 1636. He received a grant of terri- tory from the Narraganset Indians, March 24, 1638. It received a charter from Charles II. in 1663, which remained in force till 1842. Having joined in the war of inde- pendence, it was seized by the British, Dec. 8, 1776; attacked by the French and Americans without effect, Aug. 8, 1778; abandoned by the British in 1779; and occupied by the French, July 11, 1780. Rhode Island was the last of the states that gave in their adherence to the federal con- stitution, which was done in May, 1790. In the war with England in 1812 it lent no aid to the United States forces. An effort was made to upset the constitution in 1830. A number of the people took up arms in 1841 under a man named Dorr, who was made prisoner in 1842. A new constitution was agreed to and adopted in 1843.

RHODES (Archipelago) was taken posses- sion of by a branch of the Doric race, who held it at the time of the Trojan war, B.C. 1184. It was of small political impor- tance among the states of Greece till the city of Rhodes was built and made the capital of the island, B.C. 408. It was com- pelled to pay tribute to Athens at the out- break of the Peloponnesian war, B.C. 431. The inhabitants changed sides in the contest B.C. 415. The appearance of Conon with his fleet in their waters brought them back to the Athenian cause, B.C. 396. The de- monstrations which had been established proving unsatisfactory, the banished aristocrats, with the assistance of Sparta, recovered power,
RHO

b.c. 390. During the Social war it took part against Athens, b.c. 357—355. It submitted to Alexander, and received a Macedonian garrison, which was expelled b.c. 323; gaining the highest distinction by its resistance to the successors of the conqueror, until it was besieged by Demetrius Poliorcetes, b.c. 304. Under favour of the Romans it extended its authority to several of the adjacent islands, and fought against Mithridates, b.c. 108. In the war between Caesar and Pompey the Rhodians took part with the former, b.c. 50; and continuing their aid to Cassius, were defeated by the Romans and completely subjugated, b.c. 42. They then held their liberties by the caprice of the emperors, and their city was made by Constantine I. the metropolis of the Provincia Insularum a.d. 330. It was taken by Chosroes II., king of Persia, in 616; by the Saracens in 651, and by the Knights of St. John, Aug. 15, 1309. Mohammed II. besieged it ineffectually in 1489, and the sultan Soliman II. compelled it to capitulate after a vigorous siege and brave defence, that lasted from June to December, 1522. The famous Colossus, 70 cubits high, built by Chares, pupil of Lysippus, and by Laches, was completed about b.c. 280. It was overthrown by an earthquake about n.c. 224.

RHODIUM.—This metal, so called from the rose-colour of one of its solutions, was discovered by Dr. Wollaston, a.d. 1803.

RHICRIFUM (Asia Minor), the post assigned to Ajax for defence at the siege of Troy, where his sepulchre was erected, and the citizens celebrated his memory with divine honours, b.c. 1184.

RHUDDLLAN, or RHYDD DLAN (Wales), was attacked by Harold II. when he invaded the country with Tostig, and its castle burned, a.d. 1063. It was again destroyed by Llewylyn and his brother David, when fighting for their independence, in March, 1282. The parliament at which the statute of Wales was enacted, was held here by Edward I., May 24, 1284. Here his infant son was acknowledged prince of Wales in 1284. The castle, held for Charles I. in the civil wars, was taken by General Mytton in 1646.

RIAZAN (Russia), capital of a province of the same name, was so called by Catherine II. a.d. 1777.

RIBBON-MEN.—Owing to the secret nature of the constitution of this faction of Irish Roman Catholics, the date of their institution is not known. Some authorities refer their origin to about the commencement of the present century, while others state that they were not heard of till nearly twenty years afterwards. They first appear to have been mentioned in March, 1820, and they have ever since been intimately connected with the troubles of Ireland. Numerous murders were committed by them in 1858 and 1862.

RIBSTON PIPPIN.—This species of apple-tree is traditionally said to have sprung from some pips brought from Rouen by Sir Henry Goodricke, and sown at Ribston Hall about the beginning of the 18th century.

RICE, probably originally a native of India, and an important item of food to a large proportion of the human race, was described by Theophrastus b.c. 322; by Dioscorides a.d. 54; and by Pliny a.d. 72.

RICHARD THE FIRST, the fourth child and third son of Henry II. and his wife Eleanor, was born at Oxford, Sept. 13, 1157, succeeded to the English throne July 6, 1189, and was crowned Sunday, Sept. 3. When young he was betrothed to Adelais, daughter of Louis VII. of France; but the union did not take place, and Richard married Berengaria of Navarre, at Limesol, in the island of Cyprus, May 13, 1191, and she was crowned queen on the following day. They had no children. Richard I. died Tuesday, April 6, 1199, from the effects of a wound received before the castle of Chalus Chabrol, March 26. He was buried at Fontevrault.

Richard I. was named Cœur de Lion, or lion-hearted, on account of his great bravery. Berengaria, who survived him, died in 1230.

RICHARD THE SECOND, son of Edward the Black Prince and Joan of Kent, was born at Bordeaux in February, 1366. He succeeded to the throne, Monday, June 22, 1377, and he was crowned at Westminster July 16. In 1382 Richard II. married Anne of Bohemia, called the "good queen Anne," who died in 1394. He married Isabella, a child seven years old, daughter of Charles VI. of France, in 1396. He was finally deposed Sept. 30, 1399, and is generally believed to have died at Stirling in 1419. He left no issue by either marriage, and his second queen died Sept. 13, 1409. Richard II. was surnamed Bordeaux from the place of his birth.

RICHARD THE THIRD, the youngest son of Richard, duke of York, born at Fotheringay, Oct. 21, 1450, assumed the crown June 26, 1483, and was, with his queen, Anne, daughter of the earl of Warwick, and widow of Prince Edward, crowned at Westminster July 6, and again at York Sept. 8. They had but one child, Edward, born at Middleham, in Yorkshire, in 1473. He died April 9, 1484, and the queen herself died March 16, 1485. Richard III. was killed at the battle of Bosworth Field, Monday, Aug. 22, 1485, and was buried at Leicester, Aug. 25. He was surnamed Crookback.

RICHBOURGH (Kent), one of the forresses for the protection of the sea-board, erected by the Romans, was commenced a.d. 43, and completed in 205. Richard "the Coward" (Surrey), originally called Sheen, the name of the palace of Henry I., which, having been burned down, Dec. 21, 1498, was rebuilt, and the name changed to Richmond by Henry VII., a.d. 1499. He died here April 21, 1509. Chaucer was surveyor of works to the palace in 1389. Edward III. died at Richmond June 21, 1377, as did the "good queen Anne" of Richard II. in 1394. Queen Elizabeth, who
had been imprisoned here by her sister, and
had afterwards chosen it as her favourite
residence, breathed her last within its walls,
March 24, 1603. Philip I. of Spain was
here the guest of Henry VII. in 1506, and
it lodged Charles V. in 1522. It was de-
stroyed during the great rebellion. A priory
of Carthusian monks was founded by Henry
V. in 1414. Henry VIII. seized and appro-
priated it in 1540, Mary restored it in 1557,
and it was finally suppressed in 1559. The
convent of Observant friars was founded by
Henry VII. in 1499, and was suppressed in
1534. Bishop Duppa's almshouses were
founded in 1661; the theatre was built in
1766. Richmond bridge, begun Aug. 23,
1774, was finished, at a cost of £26,000, in
1777, and the church of St. John was erected
in 1831.

RICHMOND (America).—This city, the
capital of Virginia, was founded by an act
of legislature A.D. 1742, and was made the
seat of government in 1780. A fire, which
broke out in the theatre, Dec. 26, 1811, 
cast the death of 72 persons.

RICHMOND PARK (Surrey) was enclos-
ed by Charles I., A.D. 1636. It was thrown
open to the public Dec. 20, 1752.

RIFLE CORPS. (See VOLUNTEERS.)

RIGA (Russia) was founded by Albert,
bishop of Livonia, A.D. 1290. In the 13th
century it joined the Hanseatic League, and
in the beginning of the 16th century it be-
longed to the Teutonic knights. It contains
two palaces, the most ancient having been,
until 1561, the residence of the masters of
the Brethren of the Sword, an order of
knighthood which preceded the Teutonic in
these countries. Riga was taken by Gusta-
vus Adolphus in 1621, and by Peter the Great
in 1710. Part of it was destroyed by fire in
1812, and a granite column was erected in
1817 to commemorate the repulse of the
French by the citizens in 1812. A council
was held here in 1429.

RIGHTS. (See BILL OF RIGHTS AND
DECLARATION OF RIGHTS.)

RIMEHUT (Battle).—The Spaniards, under
Don John of Austria, were defeated at this
town, in France, by the allied English and
Dutch, under Norris, A.D. 1578.

RIMINI (Italy), the ancient Ariminum
(g.v.), was made a bishopric A.D. 260. The
celebrated council of Arians and Atha-
nasians was held here in 593. On the fall of
the Western empire, it became one of the
cities of the Pentapolis, and was subject to
the exarchs of Ravenna till the invasion of
the Lombards in the 6th century. It be-
tended to the German emperor Otho III.,
in 1200, Malatesta acting as his viceroy. It
was seized by Venice in 1504, by the French
in 1512, and was destroyed by an earthquake
in 1672. The church of St. Francesco, now
the cathedral, built in the 14th century, 
assumed its present form in 1450. The
library was founded in 1617.

RIMNIK (Battle). (See MARTINESTI.)

RINGMERS (Battle).—The Danes having
landed at Ipswich, defeated Ulfitel, the

general of the East Angles, in a battle fought
here, May 18, 1010.

RINGS.—Pharaoh gave Joseph his ring
(Gen. xii. 42), B.C. 1715; the Israelites of-
f ered to the Lord, amongst other orna-
ments, the rings they had taken from the
Midianites, B.C. 1451 (Num. xxxi. 60). The
use of rings and seals was common in
Egypt B.C. 1700. Rings were also worn by
the Etruscan and Sabines. The Romans
used iron rings, and gold rings are first men-
tioned B.C. 321. It is recorded that, after
the battle of Canne, Aug. 2, 216 B.C., Ha-
nibal collected several bushels of gold rings.
Love rings were used in the 15th century.
The ring was used in marriage among Chris-
tians as early as 860.

RIO DE LA PLATA (South America).—This
river was discovered by De Solis, a Spanish
navigator, A.D. 1515. De Solis landed with
a small party, and fell, with five companions,
into an ambuscade of the Indians, who
killed their captives, roasted and devoured
them. It was next visited and explored by
Sebastian Cabot, and in 1526, who gave the
river the name of La Plata. (See PLATA, La.)

RIO JANEIRO (Brazil).—The bay of Rio
was discovered Jan. 1, 1531, by Martin Al-
fonso de Sousa, a Portuguese navigator.
The Portuguese founded the city of Rio in
1567. The French captured it in 1711, and
it was restored in 1713. In 1763 Don Joseph
transferred the viceregal residence here,
from Bahia, hitherto the capital of Brazil.
In 1808 it became the residence of the Por-
tuguese court, and in 1822 was constituted
the capital of the independent empire of
Brazil. A revolution took place in 1831,
when the emperor Pedro I. abdicated in
favour of his son, who assumed the sove-
reignty under the title of Pedro II.

RIOTS.—The following are the most im-
portant riots in English history. (See
PLOTS, &c.)

A.D.
1189. The accession of Richard I. is disgra-
ced by violent riots at London and York, in
which many Jews are massacred.

1221. Westminster Couvent, London, is destroyed
by a riotous mob. The ringleader is hanged,
and several of his followers are condemned
to lose their hands and feet.

1262. A skirmish takes place in London between
the goldsmiths' and tailors' companies.
Thirteen of the most violent rioters are
hanged.

1371. Newark Cathedral and monastery are burnt
by rioters.

1381. Riotous assemblies and inconduite fires occur
in London, Cambridge, and other places,
during Wat Tyler's insurrection (g.v.).

1515. The "clear the causeway" riot at Edinburgh
results in the death of 530 of the rioters.
(See EDINBURGH.)

1517. The London Riot Day riots. (See APPRENTICES.)

1608 Dr. Lanse is murdered in London by a
riotous mob.

1637. July 23. Edinburgh is the scene of religious
riots on the occasion of the introduction of
the liturgy.

1682. The Guildhall, London, is the scene of violent
riots on the occasion of the election of a
sherriff.

1710. Feb. 23. The partisans of Dr. Sacheverel
cause disturbances in London, and destroy
many dissenters' chapels, &c.

Riot Act.—Means for the suppression of riots were provided by 17 Rich. II. c. 8 (1393), by 13 Hen. IV. c. 7 (1411), by 2 Hen. V. st. 1, c. 8 (1414), and by 3 & 4 Edw. VI. c. 5 (1548). The last-mentioned act made it high treason for an assemblage of twelve or more persons to refuse to disperse upon proclamation. The act usually known as the Riot Act is 1 Geo. I. st. 2, c. 5 (1714).
The capital penalty it enforced was removed by 7 Will. 1. & 1 Vict. c. 91 (July 17, 1837), and by 4 & 5 Vict. c. 56 (June 22, 1841).

Ripon (Bishopric).—The erection of this see was recommended in a report of the Ecclesiastical Commissioners, dated March 17, 1836, and was carried into effect Oct. 5, 1836.

Ripon (Yorkshire).—The first historical notice of this town occurs A.D. 661. The monastery, built by Archbishop Wilfrid in 678, having been totally destroyed by the Danes in the middle of the 10th century, was afterwards rebuilt, and for the third time destroyed by William I. in 1069. It soon revived, but, with its monastery, was burnt by Robert Bruce in 1323. Ripon Minster was built by Thurstan, archbishop of York, in 1140, and he founded St. Mary’s hospital in 1144. During the plague in London in 1401, Henry IV. retired with his court to Ripon, and James I. rested here in 1617 on his way to Scotland. The grammar-school was founded in 1566. Charles I. was at Ripon in 1633. It was taken by the Parliamentary forces under Sir Thomas Mauleverer in 1643, and again occupied by Charles I. in 1644. In 1677 an act was passed for making the river Ure navigable from its junction with the Swale. The market was built in 1781, the theatre in 1792, the town-hall in 1801, and Ripon minster was erected into a cathedral in 1836.

Rivoli (Battle).—The French under Napoleon I. defeated the Austrians under Alvinci at this town, near Verona, Jan. 17, 1797.

ROADS.—The invention of paved roads has been ascribed to the Carthaginians, and the Greeks are regarded as the earliest nation that legislated for their repair and maintenance. The Romans were eminent for the excellence of their military roads, the earliest of which, the Via Appia, was constructed by Appius Claudius B.C. 312. Julius Caesar caused roads to be made between all the chief cities of Italy, which were thus brought into connection with the Roman forum, the centre of the internal communication of the empire. Milestones were established throughout their entire length, and a system of post-houses was instituted, which enabled the traveller to progress at the rate of a hundred miles per day. Gibbon states, “If we carefully trace the distance from the wall of Antoninus to Rome, and from thence to Jerusalem, it will be found that the great chain of communication, from the north-west to the south-east point of the empire, was drawn out to the length of four thousand and eighty Roman miles,” of which only eighty-five miles was by water-communication. He adds: “They united the subjects of the most distant provinces by an easy and familiar intercourse; but their primary object had been to facilitate the marches of the legions; nor was any country considered as completely subdued till it had been rendered, in all its parts, pervious to the arms and authority of the conqueror.” The most important Roman roads in Britain are Watling Street, Hermin Street, Ikenild Street, and the Fosse. The first, and most celebrated of these, ran from Richborough, in Kent, through London, to Chester, and was named by the Saxons in honour of the sons of Watlin, one of their mythic heroes. Hermin Street extended from Petneys to the south-east of Scotland, and was called Hermin Street by the Saxons, in honour of one of their divinities. Ikenild, or Inkfield Street, extended from the coast of Norfolk to the south-west of Cornwall, and is of uncertain etymology; and the Fosse, or Ryknield Street, from the mouth of the Tyne to St. David’s, in Wales. From the time of the Romans no measures were taken to secure the proper regulation of the roads of the kingdom, until the passing of 13 Edw. I. stat. 2, c. 5 (1285), which ordered highways between market-towns to be increased in breadth. The earliest statute providing for the systematic repair of roads was 2 & 3 Philip & Mary, c. 8 (1555), which ordered two surveyors of highways to be elected annually in every parish. Turnpikes were established by 16 Charles II. c. 1 (1669), but the system did not become general till 1767, when it was extended to all the chief roads of the kingdom. The use of the spirit-level in laying out roads was commenced in Scotland by Lord Daer in 1790; and in 1815 Mr. Thomas Telford introduced his system of roadmaking in the Holyhead road. John Loudon Macadam introduced his method about 1815, and macadamized roads are now the most frequent. Wooden pavement was introduced in London about 1830, but proved unsuccessful, and was removed. It was again employed in Holborn in 1841, but again failed. Prescott states that the art of roadmaking was carried to extraordinary perfection by the incaes of Peru.

Roanoke (N. America).—This island of North Carolina is celebrated as the place where Sir Walter Raleigh made the first British settlement in North America A.D. 1584.

Roasting Alive.—In the reign of Henry V., Sir John Oldcastle, called Lord Cobham, was roasted alive in London, in December, 1418. He was hung in chains by the middle and his legs broken. Sir Roger was roasted alive at Genoa, on a charge of heresy, June 17, 1553. (See Burning Alive.)

Robbers.—According to the English laws, robbery is the crime of theft attended with threats or violence. Hallam (“Middle Ages,” ii. 376) states that “highway robbery was, from the earliest times, a sort of national crime.” The Anglo-Saxons punished it with fine, and, in the reign of Henry I., it was made a capital offence. It was included in the list of capital crimes by 7 & 8 Geo. IV. c. 29 (June 21, 1827), which was repealed by
7 Will. IV. & 1 Vict. c. 87 (July 17, 1837), except in cases where the offence was attended with cutting and wounding.

ROBERT VALENTE LINES, named after M. de Roswey, who claimed to be their inventor, are said to have been first known in Italy A.D. 1644. They were noticed by James Gregory on his visit to Padua in 1668, and published in his "Universal Geometry." in 1692.

ROCCASARCA (Battle).—Ladislaus, king of Naples, was defeated by Louis of Anjou, in this action, fought May 19, 1411.

ROCHDALE (Lancashire).—A church existed here prior to A.D. 1193. Edmund De Lacy obtained a charter for a market in 1241, and the grammar-school was founded in 1564. John Byron was created Baron Byron of Rochdale by Charles I. in 1642. St. Mary's church was erected in 1740, St. James's church in 1814, and the Presbyterian chapel in 1727. The Rochdale canal was opened in 1829. Rochdale first sent a member to parliament in 1832.

ROCHEFORT (France) was founded by Louis XIV. A.D. 1644, and made a naval station in 1666. An expedition against Rochefort, contemplated by the English in 1757, was not carried out. In 1809 Lord Cochrane burnt five French vessels which lay at anchor here. Napoleon I., defeated in a vain attempt to escape to America after the battle of Waterloo, gave himself up at Rochefort, July 15, 1815, to Captain Maitland, of the Bellerophon. A million of francs was voted in 1840 for building a fort to protect the roadstead.

ROCHELLE (France).—By the marriage of Eleanor of Guienne to Henry II., May 18, 1152, this town came into the hands of the English, and was captured by Louis VIII., in 1224. In 1260 it was ceded to England, but was finally recovered by Bertrand de Guesclin in 1372. The Huguenots held it from 1557 to Oct. 28, 1628, when it surrendered to Louis XIII. who razed it to the ground. It was again fortified by Vauban in the reign of Louis XIV. An attempt made by the English in 1809 to destroy the French fleet here, was only partly successful.

ROCHESTER (Bishopric).—This diocese was founded by Ethelbert, king of Kent, A.D. 604, and Augustine ordained Justus as its first bishop. The patronage of the see was vested in the archbishop of Canterbury by King John, Nov. 22, 1214. By an order in council Aug. 5, 1845, great alterations were made in its extent and territory, large districts in Kent being separated from Rochester and added to Canterbury and London, in exchange for the whole county of Hertford and the greater part of Essex.

ROCHESTER (Kent).—A missionary church, afterwards the cathedral, was established here A.D. 600, by St. Augustine, who consecrated Justus first bishop of Rochester in 604. The cathedral suffered much from the incursions of the Danes, and at the Norman conquest was in ruins. Gundulf, who was made bishop in 1077, restored it. The castle is supposed to have been built by Osulf of Bayeux in 1087. The cathedral was roofed with lead in 1199, and it suffered much in 1264 from the troops of Simon de Montfort, who used it as a stable while they were besieging the castle. Queen Elizabeth visited Rochester in 1575, and James I. and the king of Denmark in 1606. Watt's hospital was built in 1579, the church of St. Nicholas was rebuilt in 1624, and the town-hall was founded in 1687. A free school was founded in 1701. The bridge was rebuilt in 1867.

ROCHESTER (North America) was incorporated as a village in 1817, and as a city in 1834. In 1812 the post was brought on horseback by a woman.

ROCKETS for war purposes were invented by Sir W. Congreve, Bart., born May 20, 1772, and died May 14, 1823. They were first used in an attack upon Boulogne, Oct. 5, 1806. They were employed at the siege of Copenhagen. In 1807, at the bombardment of Flushing in 1809, at the battle of Leipzig, Oct. 16 to 18, 1813, and at Waterloo, June 18, 1815. At the siege of Acre in 1840, the explosion of the powder magazine, which proved so disastrous to the enemy, is said to have been caused by a rocket.

ROCKINGHAM ADMINISTRATIONS.—The first was formed on the dissolution of the Grenville administration (q.v.) in July, 1765, and the marquis of Rockingham was gazetted first lord of the Treasury July 13. The cabinet was thus constituted:

Treasur y ................ Marquis of Rockingham.
Lord Chancellor ............ Earl of Northington.
President of the Council... Earl of Winchelsea.
Privy Seal ................. Duke of Newcastle.
Chancellor of Exchequer.. Mr. Dowdeswell.
Principal Secretaries of State ... J. Mr. Conway.
Admiralty ............... Earl of Egmont.
Board of Trade ........... Earl of Dartmouth.

The duke of Grafton resigned, and the duke of Richmond was appointed one of the principal secretaries of state in his place, May 6, 1766. This administration was succeeded by the Chatham (second) administration (q.v.), July 30, 1766. The second Rockingham administration took office on the dissolution of the North administration (q.v.), March 20, 1782. The cabinet was thus constituted:

Treasury ................ Marquis of Rockingham.
Lord Chancellor ............ Marquess Thurlow.
President of the Council... Lord Camden.
Privy Seal ................. Duke of Cleveland.
Chancellor of Exchequer.. Lord John Cavendish.
Principal Secretaries of State ... Earl of Shelburne and Mr. Charles James Fox.
Admiralty ............... Viscount Keppel.
Commander-in-Chief ........ General Conway.
Ordnance ............... Duke of Richmond.
Duchy of Lancaster ....... { Mr. Dungie, made 
                            Baron Ashburton.

Mr. Thomas Townshend was secretary at war, and Edmund Burke paymaster-general in this administration, which was dissolved 1727.
on the death of the marquis of Rockingham, July 1, 1782. (See Shelburne Administration.)

Rocky Mountains (North America).—This extensive mountain-range of North America commences on the south with the plateau and cordilleras of Mexico and California, and terminates on the north in the broken ridges of Russian America. Alexander Mackenzie, employed by the Northwest Fur Company, was the first European who crossed these mountains. He accomplished this feat in 1793. Messrs. Lewis and Clarke, dispatched by the United States Government to reach the Pacific overland, succeeded, after a toilsome march of 50 days, in crossing the Rocky Mountains in 1805.

Rocroy (France) was only a village until fortified by Francis I. to defend the northern frontier, A.D. 1537. It was raised to the rank of a town in the reign of Henry II. (1547 to 1559). Rocroy is celebrated as the scene of the great victory gained by the French, under the youthful prince de Condé, over the Spaniards and Walloons; under Farmery, July 10, 1559. In this battle, which laid the foundation of Condé's military renown, 9,000 Spaniards and Walloons were slain.

Rodez (France) is mentioned by Ptolemy, who lived about the middle of the 2nd century, under the name of Segodunum, as the principal town of the Ruteni, a people of Gaul. Rodez became the capital of the province of Rouergne in the Middle Ages, and was united to the crown of France on the accession of Henry IV. in 1589. It is the seat of a bishop, and contains a fine Gothic cathedral of the 13th century.

Rogation Week. (See Litanies.)

Rogation Week.—In former times it was a general custom for the people to accompany the bishop or some of the clergy into the fields, on one of the three days preceding Holy Thursday, to implore the mercy of God, to pray that he would avert the evils of plague and pestilence, that he would send good and seasonable weather, and give in due season the fruits of the earth. The litanies or rogations then used gave this week the name of rogation week. They were first observed by Mamertius, bishop of Vienna, A.D. 550. He introduced, at the same time, the custom of perambulating parishes during rogation week. In the time of Cuthbert, archbishop of Canterbury, made in 747, the clergy and the people are ordered to observe with great reverence the three days before Ascension-day, according to the custom of our forefathers. In the injunctions issued in Elizabeth's reign (1559 to 1603) it is ordered that the people, with the curate and substantial men of the parish, shall walk about the parishes with willow wands, and at their return to church make their common prayers; that the curate, at the convent of the convenant, shall admonish the people to give thanks to God, in the beholding of God's benefits, for the increase and abundance of his fruits, saying the 103rd Psalm, &c., at which time the minister shall inculcate this or such-like sentences: "Cursed be he which translateth the bounds and doles of his neighbour;" or such order of prayer as shall be hereafter appointed.

Rohilcund (Hindostan).—This province was occupied by the Mongols under Baber A.D. 1526, and became a flourishing country. A body of Afghans of the tribe of Roh or Rohillas, conquered it about 1673. The nabob of Oude, who had long coveted the country, entered into a treaty, in 1773, with Warren Hastings, for its subjugation, and a quarrel with the Rohillas was made the pretext for claiming the assistance of the British. A corps under Colonel Champion defeated the Rohillas, April 23, 1774, and the country was handed over to the nabob, who put several tribes to the sword, without regard to sex or age. It was ceded to the British, Nov. 4, 1801. A body of 15,000 Mahratta horse, under Meer Khan, invaded Rohilcund in February, 1805, and took possession of its capital, Moradabad. A British force immediately advanced on the town, when the Mahrattas fled; but were pursued and defeated, March 2. They suffered a second defeat March 10, which so disheartened the survivors, that they retired across the Ganges.

Rohillas.—This tribe of Afghans, from the mountains which separate Persia from India, erected an independent state in Hindostan, about A.D. 1758. They defeated the last army the Mongols ever assembled, in 1749. The Mahrattas invaded and devastated their country in 1771, when Zabita Khan, their chief, made a treaty with the subahdar of Oude for their expulsion; but he made no effort to perform this service. The Mahrattas retired across the Ganges; but returned in 1772, and extorted a sum of money as the price of their retreat. The subahdar of Oude made a treaty with Warren Hastings, in October, 1773, for the assistance of English troops in the conquest and extermination of the Rohillas. A British force was despatched against them, and an obstinate battle took place, April 23, 1774, when the Rohillas were defeated. They were now in the power of the nabob, who put man, woman, and child to the sword. The Rohillas, with few exceptions, were exterminated.}

Rolls Chapel (London), founded by Henry III. (A.D. 1216 to 1272), as an hospital for the reception of converted Jews, was soon crowded with converts. Edward I. bestowed upon it half the estates of several Jews, who were hanged for chipping the current coin, in 1279. The expulsion of the Jews from England in 1290, to the number of 16,511, caused the House of Converts to become neglected. They appear to have retained their residence till 1577, when the
house was converted into a receptacle for valuable records, or rolls of parchment; and hence the present name.

**ROMAGNA (Italy).—**This name was given in the Middle Ages to a tract of country north of the Apennines, extending along the coast of the Adriatic, from the river Foglia, near Pesaro, to the Scultena, or Panaro, which partly separates Bologna from Modena. The name of Romagna, or Romaniola, is said to have been given to it in consequence of the exarchs having fixed their residence at Ravenna (A.D. 568), which thereby became a second Rome, being the seat of the imperial government in Italy. It was annexed to the Papal states by Julius II. (1503 to 1513). After the division of the country into legations, the name of Romagna continued in use, being applied more especially to the eastern part of the country near the Adriatic. The inhabitants of the Romagna decided in favour of annexation to Sardinia, March 11 and 12, 1860.

**ROMAINVILLE (Battle).—**The French, after a desperate resistance, were defeated by the allies on this elevation, in the neighbourhood of Paris, March 30, 1514.

**ROMAN CATHERS.**—For table exhibits the most important incidents in the history of the Roman Catholics or Papists:

| 1824. | The Roman Catholic Association is founded at Dublin, by Mr. Daniel O'Connell. |
| 1829. | Feb. 12. The Roman Catholic Association votes the Roman Catholic Relief Bill passes the Commons by a majority of 178. April 10. It is passed by the Lords, majority 104. April 18. It receives the royal signature, and appears among the statutes at 10 Geo. IV. c. 7. April 28. The duke of Norfolk and Lords Clifford and Dormer take their oaths and seats in the house of peers, being the first Roman Catholic members of that house. |

**ROMAN WELLS.**—Wells were erected to defend Britain from the incursions of the Picts and Scots. The first wall, 80 Roman miles in length, extended from the Tyne to the Solway Firth, and was built by the emperor Hadrian, A.D. 121. The second wall, 32 Roman miles in length, extended from the Firth of Forth to the Firth of Clyde, and was built by Lollius Urbicus, in the reign of Antoninus Pius, about 140. The first wall was renewed and strengthened by Septimius Severus, in 208. It had battlements and towers to commands. Many remains of these walls still exist.

**ROME (Italy).—**Chronologists have referred the foundation of Rome to various dates: Varro, B.c. 753; Cato, B.c. 751; Polibius, B.c. 750; Fabius Pictor, B.c. 747; and Cinceius, B.c. 728. The computation of Varro is that usually adopted. Councils were held at Rome in 197, 251, 256, 258, 290, 313; June, 342; 349, 352; 358, 364, 366, 367, 369, 372, 375, 377, 378, 379, 382; Jan. 6, 380; in 390, 400; Aug. 11, 430; in May, 431; July 31, 438; in 444, 445; Sept. 29, 447; Feb. 22, 449; in Oct. 449; 451, 456, 462; Nov. 17, 465; Oct. 5, 485; March 13, 488; in 495; 4963; March 41, 499; in 501; Nov. 6, 502; in 503, 504, 530; Dec. 7, 511; in 533, 540; Dec. 590; Feb. 591; July 5, 655; in 600. April 5, 601; in 606; Feb. 27, 610; in 640; Jan. 641; 646, 650; Dec. 19, 667; in Oct. 679; March 27, 680; in 704, 731, 731, 732; March 22, 745, Oct. 25, 745; April 12, 769; in 774, 799; Dec. 800; 816, 823; Nov. 15, 826; in 848; Dec. 8, 863; in 890, 891, 863, 863, 868; Oct. 4, 729.
868: in 872, 875; in April, 876; July, 877; 878; May 1, 879; in Aug. 879; 896 or 897, 898, 949; Nov. 6 to 22, 963; Feb. 26, 964; in Jan. 967; 968, 969; April 23, 971; in 975, 979, 981; April 24, 993; Jan. 6, 1001; Dec. 3, 1002; Nov. 1, 1007; April 6, 1027; in 1044; Jan. 1047; April 11, 1049; May 2, 1050; in 1051, 1053; April 18, 1057; April 13, 1059; in 1061, 1063, 1065, 1070, 1072; Feb. 24, 1075; in 1076; Lent, 1078; Nov. 1078; Feb. 1079; 1080; May 4, 1081; Nov. 20, 1083; in 1084; Jan. 1085; 1086; Aug. 7, 1089; April 25, 1090; in March, 1102; 1104; March 26, 1105, in May, 1105; March 7, 1110; in 1144, 1200; Nov. 1210; Nov. 18, 1227; in 1228; Oct. 30, 1302; in 1412, and 1413.

n.c.
750. The forcible abduction of the Sabine women leads to a war with the Sabines.
747. The Sabines settle on the Capitoline and Quirinal, and form a league with Romulus.
732. Romulus founds the Circensian games.
716. He is assassinated by the senators.
715. The Romans elect Numa Pompilius as his successor.
710. Numa regulates the priesthood about this year.
670. The victory of the Horatii renders Alba subject to Rome.
665. Tullius Hostilius defeats the Alban and destroys their city.
640. End of this punic order, and foundation of the port of Ostia.
621. The Laurentii festivals are established.
618. Foundation of the Capitol (n. c.).
603. The Circus Maximus is erected.
600. The Cohors are built.
578. The first Roman money is coined.
566. The first census is taken, and the number of citizens estimated at 34,706.
550. Servius Tullius divides the Romans into six classes, institutes the Comitia Centuriata, and surrounds Rome with a wall and ditch.
534. Servius is murdered by his daughter, Tullia, and her husband, Tarquiniius Superbus.
520. The Sibylline books are removed from Cumae or Cuma to Rome.
510. The violation of Luceria by Sextus Tarquiniius results in the expulsion of the Tarquins and the establishment of a consular government, under L. Junius Brutus and Lucius Tarquiniius Collatinus.
508. The Romans conclude a commercial treaty with Carthage. Rome is taken by Porcius or Caiusius of Carthage.
502. War is commenced against the Latins.
500. The patricians and plebeians commence their civil contests.
499. The dictatorship is instituted, and the Romans are victorious at Lake Regillus (q. v.).
496. The Romans take Fidenae (q. v.).
494. The plebeians secede to Mona Sacer, the Sacred Mountain.
493. Rome is compelled to acknowledge the independence of the Latins. Caius Martius takes Corioli (q. v.). The Comitia Tributa are established, and the city is visited by a severe famine.
492. Coriolanus is banished, and takes refuge with the Volsci.
498. He leads a besieging army of Volsci against Rome.
488. At the intercession of his mother, Volumnia, he withdraws from Rome, and is murdered by the incensed Volsciens.

R.C.
486. The first Agrarian law (q. v.) is proposed, for the division of the conquered territory of the Hernici.
485. Quinarian laws are appointed.
477. July 16. The family of the Fabii, with the exception of one child, perishes in battle with the Veientani at the Cremenna.
474. A public festival of forty years is concluded with Veii.
471. The Pubbilia lex is passed, which vests the election of the plebeian magistrates in the Comitia Tributa.
468. The Romans take Antium.
465. L. Quinctius Cincinnatus, "awful from the plough," is elected to the consulship.
458. Hostilius, the last dictator, and delivers the Romans from the Sabines and the Equli.
456. The Aventine Mount is assigned to the plebeians.
454. A embassy is despatched to Greece to investigate the Grecian laws.
453. Appointment of the Decemviri.
449. In consequence of the attempted violation of the temple of Appius Claudius, and her deliver from his power by death at the hands of her father, the decemvirs are abolished; and the plebeians secede a second time to the Sacred Hill.
447. The election of the quaestors is, for the first time, intrusted to the plebeians.
445. Marriage between patricians and plebeians is permitted by the Lex Canuleia.
444. Three public libraries are erected.
443. The office of censor and that of the naval duumvirate are instituted.
440. Rome is visited by a severe famine.
438. The Fidenaeans revolt, but are reduced to submission the following year.
434. War is declared against the Etruscans.
433. The Temple of Apollo is dedicated.
431. Tullius defeats the Equli and Volsci at Mount Algidus.
430. Fidenae again revolts, and is taken and destroyed by the Romans.
429. The number of quaestors is raised from two to four.
418. Ioviici is taken from the Equli, and erected into a Roman colony.
419. These plebeian quaestors are elected.
407. The Romans are defeated by the Volsciens.
406. The Roman army first receives regular pay this year.
405. The Romans lay siege to Veii.
403. Barcians are taxed by the "Ex Uxorum."
400. The first Lectisternium, or public banquet of the gods, is celebrated, in consequence of a change.
396. Veii is taken by the dictator Camillus.
393. The lands of the Veientani are partitioned among the plebeians.
389. The city is rebuilt.
387. Institutions of the Capitoline games.
384. Manlius Capitolinus is convicted of having aimed at sovereign power, and is hurred from the Tarpeian rock.
380. Procestes is taken by the Romans.
376. Civil war recommences between the patricians and plebeians.
375. The "Rogationes Liciniae," passed this year, ensure that one of the consuls shall be a plebeian.
365. Lucius Sextus is the first plebeian elevated to the consular dignity. The office of praetor is restricted; and curule ailes are first appointed.
364. The Ludi Scenici, instituted this year in consequence of a pestilence, are the earliest commercial performances held at Rome.
362. M. Curtius, in obedience to an oracle, leaps into a gulf opened in the Forum.
361. Manlius Torquatus defeats the Gallic champion.

74. The seat of government is transferred to Constantinople, and Christianity is formally recognized as the established religion. Constantine I. divides the empire into the Eastern, Illyrian, Italian, and Gallic prefectures.
According to Theodoric Rome is besieged by Alaric, king of the Goths, who retires the following year on the receipt of a heavy ransom.

The government of the Western Empire is transferred from Rome to Milan.

Rome is besieged by Alaric, king of the Goths, who retires the following year on the receipt of a heavy ransom.

It is sacked by Count Ricimer, general of the barbarians.

Codex Theodosius, the Roman and assumes the title of king of Italy, which event terminates the history of ancient Rome, and puts an end to the Western empire.

Theodoric visits Rome.

March. He is compelled to raise the siege by Belisarius.

Another siege is commenced by the Gothic king Totila, who takes the city December 17.

Belisarius recovers Rome.

Totila again seizes the city.

It is finally wrested from the Goths by Narses, and annexed to the Eastern empire.

Belisarius abdicates.

According to Gibbon, "Rome had reached, about the close of the 6th century, the lowest period of her depression."

Rome becomes an independent republic, under the temporal sovereignty of the pope.

Rome is delivered from the Lombards by Pepin.

Dec. 6. Charlemagne is crowned emperor of Rome and of the West at Rome.

Rome is threatened by the Arabs.

The emperor Henry IV. lays siege to Rome.

March. The gates are opened to him.

The Roman senate is restored.

Arnold of Brescia is burnt at Rome for heresy and sedition, i.e., for attempting to restore the ancient constitution.

The Romans are defeated by the Germans at the battle of Tusculum.

They are defeated at the battle of Viterbo.

Belisarius flourishes under the government of the senator Brancalone.

The Romans elect Charles of Anjou perpetual senhor.

Charles is compelled by the pope to abdicate.

The pope removes to Avignon.

April 8. Petrarch is crowned with laurel in the Capitol.

from injury, Henry kept her in a secret bower at Woodstock, the approaches to which formed a labyrinth so intricate that it could only be entered with the guidance of a silken thread which the king used for that purpose. Queen Eleanor is said to have discovered Rosamond’s retreat by means of this thread, and to have poisoned her rival. Rosamond was buried at Godstow church, whence her bones were removed to the common cemetery by the bishop of Lincoln in 1191; but they were afterwards replaced in the church.

Rosary.—A Roman Catholic devotional practice, said to have been first instituted by St. Dominic about A.D. 1200, in honour of the Virgin Mary. It consists in reciting fifteen times the Paternoster, and 150 times the Ave Maria; and as the computation is made by means of beads, the string of beads used for this purpose has acquired the name of a rosary. According to the Abbé Prevost, it consists of “fifteen tens said to be in honour of the fifteen mysteries in which the Virgin Mary bore a part.”

Rosas (Spain), anciently called Rhode, was besieged and taken by the French, Feb. 3, 1795. They were defeated here by the Spaniards, July 11, 1808. A French fleet of eleven armed vessels in the bay, protected by the powerful batteries of the town and castle, were cut out by the boats of an English squadron, under Lieutenant Tailour, and the whole of them captured or destroyed, Nov. 1, 1809. Rosas, which had been occupied by the Spaniards, was besieged by the French, under Marshal St. Cyr, in Novem-ber, 1809; the town was soon taken, and the citadel and Fort Trinidad were breached, Nov. 27. The governor was about to surrender, when Lord Cochrane arrived in the bay, threw himself into Fort Trinidad with a British force, and repulsed two assaults of the French with great slaughter. The citadel, however, surrendered Dec. 4, and Lord Cochrane retired with the garrison of the fort on board his vessel. Rosas was surrendered by the French in April, 1814.

Rosbach (Battle).—A victory was gained at this place, in Prussia, by Frederick the Great, over 30,000 French and 20,000 Austrians, Nov. 5, 1757. The French and Austrians lost nearly 9,000 men in killed, wounded, and prisoners. The battle-field of Rosbach was visited by Napoleon I. in October, 1806, when he ordered the column, erected by the Prussians to commemorate the victory, to be sent as a trophy to Paris.

Roscommon (Ireland).—The Auteiri, a people mentioned by Ptolemy, A.D. 139, were the earliest inhabitants. At a later period it was occupied by the red and the brown O’Conors, the Macdermots, the O’Dalys, and the O’Kellys. Miles de Cogan, an English adventurer, assisted by Murrough, son of Roderic, king of Ireland, having invaded it, was compelled to retreat in 1073. It was ravaged by William de Burgo Fitzaldein, lord of Limerick, in
1204. Athlone Castle was built in 1216, and that of Roscommon in 1268. The power of the O'Conors was broken in a victory gained over them by the English in 1315. The county was divided into baronies in the reign of Elizabeth. The O'Connor Don having taken part with the Ulster insurgents, his estates were confiscated in 1641, but he was reinstated in possession of greater part of them at the Restoration in 1660. The abbey of Boyle, now in ruins, was founded in 1148. Roscommon, the chief town of the county, derived its origin from the abbey founded by St. Coman in 550. It formerly sent two members to parliament, but was disfranchised Jan. 1, 1801. The abbey for the order of Preaching Friars was founded by O'Connor, king of Connaught, about 1257; and the castle, the ruins of which are still to be seen, was built by Sir Robert de Ufford a few years later.

Rosetta Stone. This stone was introduced from Egypt before a.d. 1596; the damask rose, from the south of France, before 1573; the moss rose, from North America, before 1724; the rose without thorns, also from North America, before 1726; and the China rose, from China, about 1759.

**ROSES (War of).** (See **LANCASTRIANS and YORKISTS**.)

Rosetta (Egypt) is said to have been founded by the son of the celebrated Haroun-al-Rashid, about a.d. 875. It was taken and fortified by the French in 1798, and captured from them by the British and Turks, April 13, 1801. A British force was defeated here by an overwhelming body of Turkish horse, April 22, 1807.

Rosetta Stone is the name given to a stone in the British Museum, which was discovered by the French among the ruins of Fort St. Julien, near Rosetta, A.D. 1801. It came into the possession of the British on the capitulation of Alexandria, Aug. 22, 1801, and was brought to England in 1802. It is a piece of black basalt, about 3 feet long and 2½ feet wide, with an inscription in three languages; viz. hieroglyphic, exocharial—or characters of the country—and Greek. The inscription in Greek eulogizes the virtues of Ptolemy Epiphanes, who succeeded to the throne B.C. 205, when only four or five years old. It appears to have been erected about B.C. 193.

Rosicrucians. — A sect of visionary speculators in Germany, whose existence became first known to the public in the 17th century. In 1619 John Valentine Andreas, a German scholar, published a work containing an account of Christian Rosenkreuz, a German noble of the 14th century, who after a long sojourn in the East, returned to Germany and founded a secret society of a few adepts who lived together in a building called Sancti Spiritus, where he died at the age of 106. The society survived from time to time by the admission of new members in silence and obscurity, according to the last injunctions of its founder. The Rosicrucians have not been heard of as a separate order since a little after the middle of the 18th century. Mosheim contends that the name was applied to the Chemists, or Fire-worshippers.

Roskilde (Sweden). — Charles Gustavus, king of Sweden, after gaining several victories over the King of Denmark, concluded a peace by the mediation of France and England, Feb. 25, 1658.

Ross (Hereford) was made a free borough by Henry III., and sent members to parliament A.D. 1305. This privilege was relinquished on the petition of the inhabitants in 1306. Charles I. rested here on his way from Ragland Castle in 1645. John Kyrie, immortalized by Pope as the "Man of Ross," died here at the age of 94, in 1724.

Ross, or New Ross (Ireland), was surrounded with walls A.D. 1268. It was taken by Cromwell, and the fortifications demolished in 1646. Some insurgents who attacked the town were defeated with great slaughter by General Johnston, June 20, 1641.

Rostock (Germany) was raised to the rank of a city A.D. 1030, and was taken and burnt by Valdemar I., king of Denmark, A.D. 1161. It was annexed to Mecklenburg in 1322, and joined the Hanseatic League, from which it separated in 1492. St. Peter's Church, remarkable for a steeple 420 feet in height, was founded at the end of the 12th century. The university of Rostock was founded in 1419. Rostock was repeatedly occupied by hostile troops in the 18th century.

**ROTA CLUB.** — This political society for contriving an equal government by rotation, was formed in London during the Interregnum. All the principal officers of state were to be chosen by ballot, and a certain number of members of Parliament were to be changed annually by rotation—whence the club took its name.

Rothenburg (Bavaria) was anciently in the possession of the counts of Rothenburg, who became extinct about A.D. 1100, when the town was ceded to the emperor of Germany. It was mortgaged by Conrad IV. and Louis IV. to the house of Hohenlohe; but on the last occasion the town redeemed itself, and obtained a promise from Louis IV. in 1335 that it should not be mortgaged again. This promise was confirmed by Charles IV. and Wenceslaus. Rothenburg remained in possession of the empire till 1520, when it was bestowed upon the Elector of Bavaria.

Rotherham (Yorkshire) is supposed to have been founded early in the Saxon period, and possessed a weekly market and annual fair before the Conquest. A second market and fair were granted to the town by Edward I. in 1307. The parish church, a handsome Gothic structure, was built in the reign of Edward IV. A college, founded in 1482, was suppressed in the reign of Edward VI.; the remains still exist, and are used as an inn. The Free Grammar-school was founded in 1584. Hollis's schools, for the education of their children, were founded in 1663. A meeting-house for Dissenters was built in 1705. Almshouses for four aged females were founded in 1780. A public library was
established in 1775, which, with the news-
room and dispensary founded in 1806, oc-
cupied a substantial building erected in 1828.

ROTHERITHE (Surrey), commonly called
Redriff, a parish and suburb of London, is
noted for its numerous docks. The great
dock, finished A.D. 1700, was leased by the
South-Sea Company in 1725, and called
Greenland dock. It was purchased by a
company of merchants in 1807, and after-
wards much enlarged, and called the Com-
cercial dock. A new dock was added to it
Jan. 22, 1812. The church was built in 1714
and 1715; but the tower was not finished till
1739. It contains a monument to Lee Boo,
prince of the Pelew Islands, who died of
small-pox Dec. 27, 1784. A fire, which
consumed 206 houses, occurred June 1, 1785.
The Asiatic cholera broke out here in Feb-
uary, 1832.

ROTHESAY CASTLE. — This steam-packet
from Liverpool to Beaumaris was wrecked
near the latter place Aug. 17, 1831. From
135 to 145 persons were supposed to have
been on board, of whom only twenty-two
were saved.

ROTHWEIL (Germany) was seized by the
French A.D. 1643. The imperial forces were
defeated here by the French, under Turenne,
in 1644, and it was taken by the French in
1796. It was bestowed on the duke of Wür-
temberg in 1802.

ROTTERDAM (Holland) derives its name
from the river Rotte, which runs through the
city. It was founded in the 13th century, and
from this time its importance dates. Maximillian besieged it A.D.
1459, and after an obstinate defence of six
months, the city surrendered, on condition of
an amnesty. A body of Spaniards, retreat-
ing from the siege of Briel in 1572, were
allowed to pass through the town in bodies of
fifty with unloaded arms. The first detach-
ment on entering slew the guard at the gates;
the rest then rushed in, and all persons
found in arms were slain. The inhabitants
were treated as if the town had been taken
by assault. The time of Rotterdam's greatest
prosperity was the 17th and 18th centuries.
It was occupied by the French in January,
1795. The Exchange was built in 1736, and
the Academy of Sciences was founded in 1771.

ROUEN (France), anciently called Roto-
magus, is first mentioned by Ptolemy, in
the beginning of the 2nd century, as the capital
of the Vellocasses, a Celtic people. It
was taken and sacked by the Danes A.D. 841; and
was seded, with the whole of the province of
Neustria, of which it was then the capital, to
the Normans, under Rollo, about 911 or 912.
It was unsuccessfully besieged by the count
de Cotentin, in 930, and by Otho I. and
Louis IV. of France in 948. Prince
Arthur was murdered here by order of his
uncle John, April 3, 1202. It was conquered
by Philip II. June 4, 1204, and remained
subject to the kings of France until taken by
the English, under Henry V., Jan. 19, 1419.
John of Arc was burned to death here
May 30, 1431. The town was recovered by
the French, under Charles VII., in 1449. It
revolted against Louis XI. in 1465, and was
retaken by him in 1466. The Huguenots
captured it in 1562, and it was immediately
besieged by the Royalists, and captured by
the duke of Guise, Oct. 20, 1562, when it was
given up to pillage for eight days. Four or
five hundred Protestants were massacred
here on the eve of St. Bartholomew, Aug. 24,
1572. It was besieged for eight months by
Henry IV. in 1593, and at last taken by the
treachery of its governor. A famine occurred
in 1789; and the revolution gave rise to some
troubles in 1792, 1793, and 1795. Louis
Philippe visited it in May, 1831, and again
in 1832. The most remarkable building in Rouen
is the cathedral of Notre-Dame, a splendid
Gothic edifice commenced in the 13th cen-
tury, but not completed till the 16th. The
abbey church of St. Ouen, to which it was
attached, was founded in the 6th century,
was rebuilt in the 12th century, and having
been destroyed by fire, was again rebuilt in
the 14th and following centuries. It was
much damaged by the Huguenots in 1562.
The great clock-tower was built in 1389, and
the court-house was completed in 1499. The
railway to Havre was opened May 13, 1847.
Rouen was made an archbishopric in 260; and
councils were held here in 659, 1049, 1055,
1072, 1073, 1074; Feb. 1096; Oct. 7 to
Nov. 5, 1118; in November, 1119; October,
1126; Feb. 11, 1190; March 27, 1223; in
1251; June 18, 1290; and Dec. 15, 1445.

ROUY. (See ICONIUS.)

ROUNDHEADS. (See CAVALIERS.)

ROUNDWAY DOWN (Battle). — An encounter
between the Royalists and the Parliament-
arians took place on Roundway Down, near
Devizes, July 13, 1643, in which the latter
were routed with great slaughter.

ROUSSILLON (France). — This old province,
nearly identical with the modern department of the
Pyrénées-Orientales, obtained its name from the
town of Ruscino, afterwards called
Rosciolena, now Tour de Roussillon, near
Perpignan. The province was made subject
to the Romans about B.C. 85. It was united
in the 9th and 10th centuries with the county
of Ampurias, in Spain; but was separated
towards the close of the latter century, and
governed by its own counts, the last of whom
bequeathed it to the kings of Aragon in 1178.
John II. of Aragon ceded it to Louis XI.
of France, in 1462, as security for money
borrowed; but it was restored by Charles
VIII. to Ferdinand of Aragon, in 1493. It
was conquered by Louis XIII. in 1642, and
was finally annexed to France by the treaty of
the Pyrénées in 1659. The Spaniards
invaded it in 1793, and were expelled in 1794.

ROVEREDO (Battle). — The Austrians were
defeated by the French near this town, in
the Tyrol, Sept. 4, 1796. So close was the
pursuit, that the republicans entered Ro-
eredo pell-mell with the fugitives.

ROXBURG CASTLE (Scotland), supposed to
have been built by the Saxons while they
held the sovereignty of the Northumbri-

snow, kingdom, was made a royal palace by David I.
on his accession to the throne, A.D. 1124. It was surrendered to the English by William the Lion in 1174, as a part of the price of his freedom, but was restored in 1189. The castle was seized by Edward I, and the court of King's Bench was held here in 1292. It was taken by Sir James Douglas by stratagem March 6, 1313, and was shortly afterwards demolished by Robert Bruce. Edward III. restored the castle, and kept Christmas here in 1335. Sir Alexander Ramsay took it by escalade in 1342; but it was regained by the English in 1346, who held it till Aug. 8, 1460, when James II. of Scotland lost his life in besieging it. His widowed queen, Mary of Gueldres, then captured the castle, and it was entirely demolished. The duties of Somerset partly restored it in 1547. It was given up to the Scowt in 1550, and again destroyed.

ROXBURG (America).—This city of Massachusetts was incorporated A.D. 1630, and was made a city by charter in 1646.

ROYAL ACADEMY (London) was founded under the patronage of George III. Dec. 10, 1768. The first exhibition of the academicians took place in Pall-mall in 1769. George III. granted them apartments in old Somerset House, and afterwards in 1750 in new Somerset House. Their first exhibition at the latter took place in May of that year. They removed to the National Gallery, where the first exhibition was opened May 1, 1838.

PRESIDENTS OF THE ROYAL ACADEMY.

Sir Joshua Reynolds .................................. 1768
Benjamin West ...................................... 1792
Sir Thomas Lawrence .............................. 1829
Sir Martin A. Shee ................................ 1839
Sir Charles Eastlake .............................. 1850

ROYAL ACADEMY OF MUSIC.—A society bearing this title was established at London A.D. 1720 for the encouragement of the Italian opera. George Frederick Handel, Giovanni Bononcini, and Attilio Ariosto, the three most eminent composers of the day, were engaged to supply works and superintend arrangements, but the institution was never very successful, and after an existence of about nine years was dissolved in consequence of the quarrels of the singers. The present Academy of Music was founded by the earl of Westmorland in 1822. The first concert took place Dec. 8, 1828, and the charter of incorporation was granted in 1830.

ROYAL ADELAIDE.—This steamer from Cork to London arrived at Plymouth March 28, 1850, and left on the following day, with about 180 passengers and a crew of 24 men. She was totally wrecked on the Tongue Sand off Margate, on the night of Saturday, March 30, when all on board perished.

ROYAL CHARTER screw steamer, Captain Taylor, bound from Port Phillip, Australia, to Liverpool, was totally wrecked in Redwharf Bay, on the Anglesey coast, during the night, Oct. 25, 1859, and 459 lives were lost. The vessel had from £500,000 to £900,000 worth of gold on board, much of which was recovered.

ROYAL EXCHANGE (Dublin) was founded Aug. 2, 1769, and opened in 1779, at a cost of £4,000. This sum was raised partly by parliamentary grants, partly by subscriptions, and partly by lotteries.

ROYAL EXCHANGE (London).—The foundation of the original edifice was laid by Sir Thomas Gresham, June 7, 1566. Queen Elizabeth opened it Jan. 23, 1571, and by the sound of trumpets her herald named it the Royal Exchange. It was destroyed by the great fire in September, 1666. Charles II. laid the foundation of another structure, Oct. 23, 1667, and it was opened Sept. 29, 1668, having cost £63,862. It was repaired, and beautified in 1769, parliament contributing £10,000 towards the expense. This edifice was destroyed by fire, Jan. 10, 1838. The new Royal Exchange, commenced in 1838, was opened by Queen Victoria in state, Oct. 28, 1844.

ROYAL GEORGE, of 108 guns, commanded by Admiral Kempenfeldt, sank at Portsmouth, nearly a thousand lives being lost, at ten o'clock in the morning, Aug. 29, 1762. A court-martial which was held on Captain Waghorne, relative to the catastrophe, acquitted him Sept. 9. Sixteen guns and other things were recovered by the diving-bell, Nov. 21. The wreck was surveyed by aid of the diving-bell, when the whole of the deck was found to have fallen in, May 24, 1817.

ROYAL HOUSEHOLD.—The duties of the different officers of the royal household were first defined and reduced to order by Edward III. The expenses connected with it were fixed at £12,059 9s. 11d. by the private act, 11 Hen. VII. c. 36 (1494), which was amended by subsequent statutes. The duties of the great master of the king's household were regulated by 32 Hen. VIII. c. 39 (1540), which was repealed by 1 Mary, st. 3, c. 4 (1553). (See Lord Steward of the Household.) The purveyance system, which empowered the officers of the royal household to purchase goods for their master's use without the consent of the Commons, was ended by 12 Charles II. c. 24 (1660). Edmund Burke commenced his efforts against the extravagance of this department in 1780, and procured the suppression of several unnecessary offices by 22 Geo. III. c. 82 (1782).

ROYAL INSTITUTION OF GREAT BRITAIN.—This institution was founded by Count Rumford and Sir Joseph Banks, March 9, 1799, and received its charter of incorporation, Jan. 13, 1800. Its laboratory is celebrated as having been the scene of some of the most important discoveries of Sir Humphry Davy and Professor Faraday, and has not been officially connected with the institution. In 1830 John Fuller, of Rose Hill, endowed two professorships, of chemistry and physiology, and in 1838, Mrs. Acton, of Euston Square, gave £1,000.
towards establishing a septennial prize for the best essay on the goodness of Providence as exemplified by scientific research.

ROYAL MARRIAGE ACT, 12 Geo. III. c. 11 (1772), prohibited members of the royal family from contracting marriage without the consent of the king, signed under the great seal, until they attained the age of twenty-five years.

ROYAL PREROGATIVE.—Blackstone defines the sovereign's prerogative as "that special pre-eminence which the king has, over and above all other persons, and out of the ordinary course of the common law, in right of his regal dignity." He enjoys supreme sovereignty in civil and ecclesiastical affairs, and he is declared politically perfect, it being a constitutional maxim "that he can do no wrong." He is the supreme head of the military and naval force of the kingdom, the fountain of justice, mercy, honour, office, and privilege, and the only person empowered to send or receive ambassadors, to declare war or conclude peace, and to coin the money of the realm. The royal prerogative was defined by 17 Edw. II. stat. 1 (1324), and the supreme power of the crown was confirmed by 27 Hen. VIII. c. 34 (1535). Constitutional limitation of the royal powers was secured by the Petition of Rights, 3 Charles I. (1627), which placed the sole power of granting money to the sovereign in the hands of the people's representatives in parliament. The feudal rights of the crown were abolished by 12 Charles II. c. 24 (1660), and the dispensing power of the crown was destroyed by 1 Will. & Mary, ss. 2, c. 2 (1689).

ROYAL SOCIETY (London).—A number of gentlemen residing in London, among whom were Drs. Wilkins, Walsis, and Goddard, with Forster, professor of astronomy at Gresham College, associated themselves for scientific investigation, A.D. 1645. Some of them removed to Oxford in 1652, and formed a similar society there. The two were united, and held their meetings in London in 1659. They were suspended for some time, but the Restoration in 1660 were resumed in Gresham College. A code of rules was drawn up Nov. 23, and the first formal proceedings took place Dec. 5. The society having presented a congratulatory address to Charles II., his majesty granted it a charter in 1662, which was amended and renewed in 1663. The king bestowed a mace upon the society in 1663; and signed his name in the charter-book as its founder, in 1664. The first number of the "Philosophical Transactions" was published March 6, 1665. The place of meeting was changed to Arundel House in January, 1667, and again to Gresham College in October, 1674. The delivery of medals was commenced in 1674, and a sum of money for a lectureship was left by dame lady Sadler, widow of Dr. Croone, in 1676, the first of which was delivered in 1738. The Bakerian lecture on electrochemistry was founded in 1774. A legacy of £400, received on the death of the bishop of Chester (Dr. Wilkins), was expended in the purchase of certain farm rents at Lewes, in January, 1675. The college and lands at Chelsea, which had been granted to the society, were sold, and the proceeds were invested in stock in January, 1682. A paid secretary was appointed at a salary of £50 per annum in 1686. The house in Crane Court, Fleet Street, whither the society removed, was purchased in 1701, and the government assigned it apartments in Somerset House in 1702. Sir Isaac Newton was appointed president in 1703, holding the office till his death in 1727. The society published the first edition of his Principia in 1686. Originally issued monthly, the "Philosophical Transactions" were collected and published in ninety volumes, embracing the period from 1665—1800. Sir Godfrey Copley founded a gold medal, purchased with the interest of £100, in 1709; Count Rumford presented a sum of £1,000 in the 3 per cents, for a like purpose in 1796; and George IV. made an annual grant of a hundred guineas for two medals in 1825.

RUBICON (Italy).—This river formed the northern boundary of Italy at the time Julius Caesar held the government of Cis-Alpine Gaul. The passage of this river was considered as a declaration of hostilities, and precipitated the Social war B.C. 49. In the controversy regarding its identification, the arguments in favour of Fiumicino seem to preponderate, although a papal bull pronounced in favour of another stream, the Luso, A.D. 1756.

RUEL, OR RUEL (France).—During the civil strife between the parliament on the one hand, and the queen mother with Mazarin on the other, a treaty of peace was signed at this town March 11, 1649.

RUFFLES appear to have come into use as an article of dress in the reign of Henry VIII. Hand-ruffs were plaited and edged with lace in the time of Elizabeth. The Rev. William Cole, in his journey to France in 1765, was taken for a clergyman because he did not wear ruffles. They seem to have gone out of fashion during the French revolution of 1789.

RUGBY (Warwickshire).—The school was founded by Lawrence Sheriff, a London tradesman, and native of the place, A.D. 1567. It was regulated by act of parliament in 1777, and rose to great distinction under the mastership of Dr. Arnold, 1827—1842. The Elaborow school was founded by Richard Elborow in the 15th century; the parochial schools were built in 1830; St. Matthew's church was founded in 1841; and the Literary Institute in 1847.

RÜGEN (Baltic Sea), the Holy Island of the Slavonic Varini, captured by the duke of Poland A.D. 1124, and by the king of Denmark in 1189, was ceded to Sweden by the peace of Westphalia, Oct. 14, 1648. It was taken by the Danes in 1677. Having been restored to Sweden, Sept. 2, 1679, it was taken when Peter I. sent the Russian fleet against Charles XII., Nov. 17, 1715. Rügen was assigned to Sweden by the peace of Nystad, Aug. 30, 1721. It capitulated to
the French Sept. 7, 1807, and was ceded by Sweden to the Danish crown, by the treaty of Kiel, Jan. 14, 1814, and by Denmark to the king of Prussia, June 4, 1815.

This West-Indian spirit is the product of molasses and the refuse of the sugar-manufactory. It is not known when the manufacture of rum commenced, or whence the spirit derived its name. Ships carrying rum must be of at least fifty tons burden, by 16 & 17 Vict. c. 107, s. 144 (Aug. 20, 1853), which prohibits the importation of the spirit in casks of less than twenty gallons, or in bottles of more than three pints. The duties charged upon its importation have undergone several changes. By 21 Vict. c. 16 (May 11, 1858), a rate of 8s. 2d. per gallon is charged on every gallon of rum brought into the United Kingdom.

RUM PARLIAMENT.—After the Long Parliament had been sitting eight years, Colonel Pride, invading the House of Commons, sent forty-seven members to prison and excluded ninety-six more, leaving a remnant of about fifty, Dec. 6, 1648. It voted the late treaty with King Charles I. dishonourable and dangerous, Dec. 13; and that he should be tried for treason against the people, Dec. 23. On the peers refusing their concurrence, the Commons passed the ordinance for the king's trial, Jan. 6, 1649; and the members who wished to accept the king's concessions were expelled the house Feb. 1. This parliament voted the House of Lords "useless and dangerous" Feb. 6, and the office of king unnecessary Feb. 7. It passed acts abolishing the office of king and the peerage, March 17 and 19, 1649. It took the style of "Parliamemum Reipublicae Angliae" Feb. 9, 1650. It passed the celebrated Navigation Act affecting Dutch commerce, Oct. 9, 1651, and in the same month fixed its own dissolution at Nov. 3, 1654. An act prohibiting the use of titles conferred since Jan. 4, 1642, was passed January, 1652; and an act of amnesty was passed Feb. 24, 1652. Between it and the council of officers considerable differences arose as to the constitution of the new legislature. Cromwell entered the house with a strong guard, and terminated its existence by expelling the members, April 20, 1653.

RUNIC CHARACTERS, the alphabet, consisting of sixteen letters, used by the Teutonic nations, were ascribed by tradition to the god Odin, B.C. 508, although it was probably introduced to the people on the coast of the Baltic by Phoenician traders long before the Christian era. The invention has also been ascribed to Ulfilas, bishop of the Goths, A.D. 350. They ceased to be used in Sweden in 1001, and were condemned in Spain by the council of Toledo in 1115.

RUSE (Surrey).—King John met the barons on this plain, near Egham, and granted Magna Charta, June 15, 1215.

RUSIA (Italy), the navale Thuriorum, which had been transferred to Rusciamum, or Rossano, was besieged by Totila, A.D. 547, and after two attempts on the part of the Romans, under Belisarius, to relieve the garrison, fell in 548.

RUSSELL ADMINISTRATION was formed after the resignation of Sir Robert Peel and his colleagues, announced in parliament June 29, 1846. Lord John Russell completed his arrangements early in July, and the cabinet was thus constituted:

The earl of Bessborough, lord lieutenant of Ireland, died May 16, 1847, and the earl of Clarendon succeeded him, May 20. Mr. Laboucre was appointed to the Board of Trade July 22, and his successor, as chief secretary for Ireland, did not receive a seat in the cabinet. The earl of Auckland died Jan. 1, and Sir Francis T. Baring became first lord of the Admiralty Jan. 15, 1849. The earl of Carlisle became chancellor of the duchy of Lancaster, March 6, 1850, in place of Lord Campbell, appointed lord chief justice. Sir Thomas Wilde, created Lord Truro, became lord chancellor July 15, 1850, Lord Cottenham having resigned June 19, and Mr. Fox Maule, afterwards Lord Panmure, obtained a seat in the cabinet as secretary at war. The government having been for some time in a precarious state, was defeated by 100 to 52, Feb. 20, 1851, upon a motion to bring in a bill to make the franchise in the counties of England and Wales the same as that of the boroughs, and resigned office Feb. 21. The earl of Aberdeen and Sir James Graham having refused to assist Lord John Russell in the reconstitution of his cabinet, and Lord Stanley having declined the task of forming an administration, the Russell ministry finally resumed office, and the ministerial crisis terminated March 3. Earl Granville, who had succeeded Mr. Macaulay as paymaster of the forces, and Lord Seymour, made first commissioner of works April 15, 1850, obtained seats in the cabinet in 1851. Lord Palmerston resigned the foreign secretariaship, and Earl Granville was appointed as his successor Dec. 16, 1851. Mr. Fox Maule replaced Lord Broughton at the Board of Control, Feb. 5,
1852. An amendment proposed by Lord Palmerston to the government Militia Bill was carried by 135 to 126, Feb. 20; and the announcement of the dissolution of the Russell administration was made in both branches of the legislature Feb. 23. (See Derby (First) Administration.)

Russell Institution (London).—A lease for the ground was obtained from the duke of Bedford, July 26, 1802, by James Burton, who proposed to erect a suite of assembly and ball-rooms. The progress of the work was delayed by a fire, which occurred in 1802. The Russell Assembly-rooms were opened in February, 1804. This speculation failed, and early in 1808 meetings were held for the establishment of a literary and scientific society, and it was agreed to raise 12,500 guineas in five hundred shares at twenty-five guineas each. General meetings were held April 20 and July 7, and the property was transferred to trustees for the formation of the Russell Institution, Oct. 18. The news-room was opened July 15, 1808, the circulation of books commenced Jan. 29, 1809, and lectures were first delivered in 1810. The ball-room was converted into a library, which was opened March 23, 1814. The first catalogue was published in 1809, the second in 1814, the third in 1820, the fourth in 1826, the fifth in 1835, and the sixth in 1849.

Russia.—The kingdom, extending over great portions of Europe and Asia, partly corresponds with the ancient Sarmatia. It is said to derive its name from the Rhoxolani or Rhoxani, a Gothic people that settled there at a very early period, though several other derivations are given. It is first mentioned as Russia about A.D. 839.

A.D.
862. Ruric the Norman, chief of the Varangians, establishes his government at Novgorod.
863. The Russians attack Constantinople, and are repulsed by the emperor Michael III.
879. Death of Ruric, who is succeeded by his infant son Igor, under the regency of his kinsman Oleg.
882. Oleg seizes Kiev as his capital.
907. Another expedition against Constantinople is conducted by Oleg, who receives a large tribute from the emperor Leo VI.
912. A commercial treaty is concluded with the Eastern empire.
914. Igor invades the Eastern empire, and is repulsed by the emperor Romanus.
945. A second treaty is signed with the emperor. Igor is assassinated at Korsos, and is succeeded by his son Sviatoslav, his widow Olga acting as regent.
967. The queen regent, Olga, visits Constantinople, where she is baptized.
969. Sviatoslav, prince of Kiev, overthrows the empire of the Khazars.
978. He defeats the Bulgarians in a great battle.
979. He crosses the Balkan and invades Thrace.
981. July. He sustains a great defeat from John I. at Dorystation or Durostoro.
977. Civil war breaks out between the brothers Vladimir, Yaropolk, and Oleg.
980. Yaropolk is assassinated by his brother Vladimir.
988. Vladimir the Great takes Cherson from the Greek emperor Basil II., whose sister Anne he marries; he also embraces Christianity. 1018. Yaroslav promulgates a code of laws.

A.D.
1043. Vladimir, prince of Novgorod, attacks Constantinople and is defeated with great loss.
1158. Yaroslav I., founds Vladimir and makes it his capital.
1223. The Tartars of the Golden Horde (q.v.) establish themselves in the south-east parts of Russia.
1235. Russia is invaded by 1,500,000 Mongols, under Batou Khan.
1236. The Tartar khan of Kipshach exercises the supreme power in Russia.
1241. Alexander Nerski defeats an invading army of Swedes and Danes at the battle of the Neva (q.v.).
1255. He retires the title of Grand Duke from the Tartars.
1318. The Russians make Moscow their capital, and invade Finland.
1320. The principality of Kiev is seized by Gedimin, duke of Lithuanis.
1328. Ivan I., surnamed Kalita, becomes grand prince, and establishes the principle of hereditary succession.
1340. Red Russia is conquered by the Poles and Hungarians.
1382. Red Russia is seized by the Lithuanians.
1388. Dimitri, or Demetrieus III., defeats the Tartars at the great battle of the Don, and is surnamed Donisk in consequence.
1388. War is carried on against the Tartars, who burn Moscow.
1395. Russia is invaded by Timour the Tartar.
1425. Death of Василий Дмитриевич, in whose reign the first Russian coinage was established.
1441. The crown of the Kipshak Mongols is divided into four principalities.
1462. Accession of Ivan III., or John Basilowitz the Great, the real founder of the modern Russian empire.
1472. Ivan III. marries Sophia, niece of the last Greek emperor Constantine XIII., and adopts the title of czar, and the two-headed eagle as his badge.
1476. The Russians discontinue paying tribute to the Tartars.
1477. War is commenced with the Tartars.
1478. Jan. 31. The republican city of Novgorod surrenders to Ivan III.
1490. The Mongol power in Russia is destroyed by Ivan III.
1491. Ambassadors are first received at the Russian court.
1492. The Russians employ artillery for the first time this year.
1497. Ivan III. defeats the khan of Cazan at the battle of Sviaga.
1498. War breaks out with Sweden.
1499. A league against Denmark is concluded with Sweden. The punishment of the knout is introduced into Russia about this time.
1506. A war is undertaken against Poland.
1510. The Tartars invade Russia.
1521. The Crimean Tartars are defeated at the battle of Smolensk.
1523. Peace is concluded with Poland.
1524. The Russians sustain a defeat from the Tartars on the Volga.
1530. Peace is concluded with the Tartars.
1539. Death of the queen-regent Helena, whose young son, Ivan IV., is kept in tutelage by the three brothers Shuiski.
1541. A Tartar invasion, under the khan of the Orkhan, is repelled.
1543. Ivan IV., at the age of 14, puts to death Andrew Shuiski and assumes the government, which he conducts with great harshness.
1545. Ivan IV. is solemnly crowned czar by the patriarch, being the first Russian monarch whose coronation was a public and ecclesiastical ceremony.
1546. He establishes the "Strelitzes," the first standing army in Russia.
1550. War is resumed with the Tartars.

741
A.D. 1618. The czar Ivan is murdered by the czar, and its inhabitants are massacred.
1654. The Russians discover Siberia.
1655. The czar exacts tribute from the Siberians.
1657. The peasant are declared the property of the crown.
1658. War is commenced with the Teutonic knights.
1662. Russia and Sweden unite in a war against Poland.
1670. Jan. In consequence of a pretended insurrection at Novgorod, Ivan IV. massacres 89,000 of the inhabitants.
1671. Russia is overrun by the Tartars, who burn Moscow.
1676. The Cossacks are formed into a regular army of defense against the Tartars.
1679. Ivan IV. solicits the hand of Elizabeth of England, and puts his eldest son to death.
1689. The Greek Church in Russia is declared independent of the patriarch of Constantinople.
1698. Death of the czar Fedor, and extinction of the Ruric dynasty.
1704. A monk pretends to be Demetrius, a declaration by the English government, to effect a union between Russia, Poland, and Saxony.
1707. Russia takes part in the Seven Years' war, against Prussia.
1712. May 5. Peace is concluded at Prussia at St. Petersburg, July 10. A revolution breaks out at St. Petersburg, where the czar Peter III. is deposed. July 10. He dies.
1724. The imprisioned czar, Ivan VI., is put to death.
1725. Turkey declares war against Russia. (See Ottoman Empire.)
1726. Russia participates in the first partition of Poland.
1727. Rebellion of the Cossack Pugatcheff, who claims to be the deceased czar, Peter III.
1728. July 10. Russia gains considerable acquisitions in Turkey by the treaty of Koutchour-Kainardjii (g.v.).
1729. The impostor Pugatcheff is broken on the wheel.
1732. Prince Fopotemkin is made minister.
1738. War is commenced with Sweden.
1741. The Turks are defeated at St. Petersburg, May 21. June 13. Peace with Poland is restored by the treaty of Wisna.
1749. The laws are revised.
1758. English traders are excluded from Russia.
1764. The Cossacks are taken under Russian protection, which occasions a war with Poland.
1766. Oct. 3. The truce of Wilna, or Niemetz, is concluded with Poland.
1767. The czar refuses to receive an ambassador from Oliver Cromwell.
1768. July 1. The peace of Oliva is concluded with Sweden.
1769. Jan. 30. By the treaty of Andrussow, Russia cedes Servia, the Ukraine, and several towns, to Poland.
1773. Russian ambassadors are first sent to the courts of France and Spain.
1771. The insurrection of Steuko Radzin terminates in his execution.
1772. Subjection of the Kovnoyurt Tartars.
1778. War is commenced against the Turks.
1781. The Turks resign all claim to the Ukraine and the Cossack territory, and peace is restored.
1782. A mutiny breaks out among the Strelitzes.
1786. May 6. An alliance between Russia and Poland against Turkey is signed at Moscow.
1788. The czar Ivan V. resigns his share of the government.
1797. Peter visits England and Holland.
1798. In consequence of a revolt Peter I. puts to death all the Strelitzes.
1800. Nov. 30. Peter I. sustains a severe defeat from the Swedes at Narva. He builds the first Russian frigate, and founds the navy.
1803. May 27. Foundation of St. Petersburg (g.v.).
1808. Revolt of the Cossacks under Mazupka, who is assisted by Charles XII. of Sweden.
1809. May. Charles is defeated by Peter I. at Poltava (g.v.).
1810. War is commenced with Turkey.
1817. July 10. The treaty of Falci (g.v.). A directing senate is established.
1819. Catherine, the wife of Peter, receives the title of Czarina.
1806. A Russian army occupies Moldavia and Wallachia. Nov. 28. The French enter Warsaw for the purpose of aiding the Poles against the Russians.

1808. May 18. War is declared against Austria. Sept. 17. Peace with Sweden is restored by the treaty of Fredericksshavn.

1815. Jan. 25. The emperor of Russia is proclaimed king of Poland.

1817. Dec. 27. The ministry of public instruction is united to that of religious affairs.

1820. The Serbs are expelled from Russia.

1821. The grand-duke Constantine resigns his right to the throne.

1822. The emperor Alexander I. makes a tour through the dominions. Dec. 1. He dies at Taganrog, and is succeeded by his brother, Nicholas I. Dec. 26. A military revolt, under Colonel Pestal, is suppressed at St. Petersburg. Dec. 29. The troops at Moscow are ordered to disband.

1823. Feb. 2. Peace with Persia is restored by the treaty of Taurkmanahi. April 28. War is declared against the Ottoman empire (q.v.).

1824. May 24. Coronation of Nicholas I. at Warsaw as king of Poland. Sept. 14. Peace with Turkey is restored by the treaty of Hadrissapole (q.v.), by which Circassia is annexed to Russia.

1825. Nov. 22. A revolution in the Russian army breaks out in Poland (q.v.).

1826. Jan. 27. Death of the grand-duke Constantine. Sept. 8. The capture of Warsaw by the Russians reduces the Poles to submission.

1827. Feb. 10. A treaty for the surrender of Polish refugees to the Russian authorities is concluded with Austria and Prussia.

1831. The Circassian war commences.

1849. May. A Russian force is sent to the assistance of the Austrians in Hungary (q.v.). Napoleon I. proposes the expulsion of Hungarian refugees from Turkey.

1850. Jan. 6. A conspiracy against the emperor is detected.

1851. May. St. Petersburg and Moscow railways are commenced.

1853. July 2. The Russians occupy the Danubian principalities. Sept. 24. The emperors of Russia and Austria have an interview at Olmutz. Oct. 2. Nicholas I. meets the emperors of Austria and the king of Prussia at Warsaw. Nov. 9. War is declared against Turkey. (See Russo-Turkish War.)

1854. Feb. 7. Baron Brunow, the Russian ambassador, leaves England. March 5. Ten of the Russian government ministers in London, Poland, are declared in a state of siege. April 23. Nicholas I. issues a manifesto asserting that his only object in the war is the release of the Christians in the Crimea. June 26. Nicholas I. issues the decree that his object is the suppression of the Christian faith. July 25. Nicholas I. issues the decree that his object is the restoration of Christianity in the Ottoman empire. July 2. The cossacks, under the command of the grand-duke Constantine, make an expedition against the Turks in the Crimea.

1858. Jan. 15. A committee is established under the presidency of the emperor, to consider the best measures for ameliorating the condition of the serfs. May 28. A frontier treaty is concluded with the emperor of China at Alurn. June 9. A treaty of commercial navigation is concluded with Belgium. July 2. The royal peasants are admitted to personal rights. Dec. 31. A commercial treaty is concluded with Great Britain.

RUS

1853. May 28. A manifesto is issued to the great powers by the Sultan. June 8. The British fleet, under Admiral Dundas, is ordered to the Dardanelles. July 2. The Russian army crosses the Pruth. Oct. 5. Turkey declares war. Oct. 23. The first encounter takes place at Iaschka. Oct. 25. The British fleet enters the Bosporus. Nov. 4. The Turks are victorious at Olenitza, the Russians losing 1,000 men. Dec. 31. The "Identick Note" is accepted by the Sultan.

RUSSIA COMPANY.—The English trade through Archangel was opened by some Englishmen who went on a voyage of discovery, A.D. 1553. They were sent for by Ivan IV., when international commerce was established, and a company formed in London, Richard Chancellor and Anthony Jenkinson being the agents, in 1554.

RUSSO-TURKISH WAR.—The sultan of Turkey finding it impossible to comply with the demands of the Czar respecting the holy places and the Turkish subjects professing the Greek religion, the Russian embassy was recalled from Constantinople, May 21, 1853.
RUS

RUSSCHUK (Turkey).—This town was taken by the Russians under Generals Langeron and Markow, Oct. 14, 1811; and it again admitted a Russian force in 1828.

RUTHENUM.—Klaus proved the existence of this metal in platinum ores, A.D. 1844.

RUTHVIN. (See RAYN OF RUTHVIN.)

RYH (Sussex). One of the Cinque Ports, supposed to be the Novus Portus of the Romans, was pillaged by a party of piratical Danes, under Hastings, A.D. 893. The castle was built by the earl of Kent, 1134-1154. A charter, conveying permission to fortify the town, was granted by Richard I. in 1184. The Huguenots, driven from France by Catherine of Medicis, found refuge here in 1572. The harbour was nearly choked up in the 16th century, and an act was passed for improving it in 1545. An attempt to form a grammar-sch. in 1750, having been found useless, was abandoned, and the old one was again restored to and improved in 1778. The free grammar-school, founded by Thomas Peacock in 1685, and a school for poor children, by James Saunders, in 1702, are now united.

RYE-HOUSE PLOT, for an insurrection in England and Scotland, in order to secure the succession to the duke of Monmouth, was discovered June 12, 1683. The earl of Essex, son of Lord Capel, was found in the Tower with his throat cut, July 13; Lord William Russell was executed July 21, and Algernon Sydney Dec. 7, 1683. The duke of Monmouth was pardoned, and Hampden fined £40,000 Feb. 6, 1684. The conspirators intended to murder Charles II. and the duke of York.

S.

SALEFELD (Germany).—This small walled town of Saxe-Meiningen contains the ruins of an old castle erected in the 8th century. The cathedral of St. John was built A.D. 1212, and is remarkable for its four painted windows. Bavaria entered into an alliance with the confederates of Smalcald at this town, Oct. 24, 1531.

SABBREBRUCK, or SABREBRUCK (Prussia).—Its palace, which at one time belonged to the princes of Nassau-Saarbrücken, was destroyed by the French A.D. 1793.

SAAKHAM (Holland), celebrated as the place where Peter the Great resided when working as a common shipwright, A.D. 1696.

SAARLOUIS (Prussia).—This strong fortress, erected by Vauban, A.D. 1681, was ceded to Prussia in 1815.

SAAZ, or SAATZ (Battle).—Ziska defeated the Germans at this place in Bohemia, Sept. 1, 1421.

SABBATARIANS.—The term was applied in the 4th century to the followers of Sabbatius. In the 16th century a division of the Anabaptists, who observed the seventh, instead of the first day of the week, received the name of Saba'tarians. It is uncertain when they first appeared in the Protestant church, but Fuller says they existed as early as 1633. There are two congregations of Saba'tarians in London, the first dating as far back as 1678. One is among the General, and the other among the Particular Baptists. A tract supporting this doctrine was published in 1740. They are sometimes called the Seventh-Day Baptists.

SABBATH, as a name for Sunday, was, according to the elder Disraeli, first used in England a.d. 1554. In low Latin, and the languages derived from the Latin, the term designates Saturday.

SABBATICAL YEAR.—The Jews received the command for its observance every seventh year, in which they were neither to sow their fields nor prune their vineyards (Exod. xxiii. 10 & 11), n.c. 1491. The injunction is repeated in Lev. xxx.

745
The followers of Sabellius, according to some authorities a bishop, and according to others a presbyter of Upper Egypt, who flourished in the 3rd century, and taught that the Father suffered on the cross, and that there is but one person in the Godhead. Pope Dionysius pronounced condemnation of the doctrines of Sabellius in a council held at Rome A.D. 263. Marcellinus, bishop of Ancyra, maintained the doctrine in 325. The "Historia Sabelliana" was published by Wormius in 1696. The Sabellians were also called Patrapians and Modalists. Hallam says that Servetus held what were nearly Sabellian opinions.

Sabines, a most ancient people of Italy, supposed to have been named from Sabus, one of their deities. Little is known of their history. They were at war with the Romans at a very early period. A war broke out between them B.C. 504, when a portion of the Sabines migrated in a body to Rome, where they were welcomed as citizens, and gave rise to the powerful family and tribe of Claudi. The Sabines carried their ravages to the very gates of Rome, B.C. 469, and, when defeated by Marcus Horatius, B.C. 449, their camp was found full of plunder obtained in the Roman territories. They were again at war with the Romans B.C. 290, and were soon vanquished, many having been sold as slaves. The remaining citizens were admitted to the Roman franchise, but without the rights of suffrage. These were granted to them B.C. 266, and from that time they enjoyed all the privileges of Roman citizens. The last time they are mentioned as a distinct people is during the second Punic war, when they served as volunteers in the army of Scipio.

Sac (Brethren of the).—This religious order, established in the beginning of the 13th century, had monasteries in France, Germany, Italy, and England. They never ate flesh or drank wine, and only wore wooden sandals, in addition to the sac, from which they took their name.

Sacatoo (Africa).—A kingdom under this name was established in Soodaan A.D. 1816. The town of Sacatoo was founded in 1803. The traveller Clapperton died here, April 13, 1827.

Sacheverell Riots.—Dr. Henry Sacheverell, rector of St. Saviour’s, Southwark, preached two sermons, one at Derby and another at St. Paul’s, the latter Nov. 5, 1709, of which Mr. Dolben complained as being contrary to revolution principles. The House of Commons voted them “scandalous and seditious,” and ordered Dr. Sacheverell to be impeached, Dec. 13. Dr. Sacheverell, brought to trial Feb. 27, 1710, was found guilty March 23, and sentenced to suspension for three years. The people, conceiving the church in danger, during the progress of the trial broke into several meeting-houses, tore down the pulpits and pews, and made a bonfire of them in Lincoln’s-inn Fields. Soldiers were called upon to disperse the mob, and the London trained bands were kept on duty. In 1713 Sacheverell was presented to the living of St. Andrew’s, Holborn, and he died in 1724.

Sacrament.—In the primitive ages of Christianity there were but two sacraments, Baptism and the Lord’s Supper. Other bishop of Bamberg, was the first who, A.D. 1124, enumerated seven sacraments. Through the influence of Peter Lombard and of Gratian, this number was generally adopted by the Romish clergy, and received the approval of Pope Eugenius IV. at the council of Florence in 1439. The council of Trent, Dec. 13, 1545—Dec. 3, 1563, decided that there were seven instead of the two instituted by Jesus Christ. A sect sprung up in England early in the 18th century, founded by Dr. Deacon, who increased their number to twelve. The founder published his views on Christianity in 1748.

Sacramentaries.—These liturgical books were used in the Roman Catholic church, and contained the prayers and order of the celebration of mass and of the sacraments. The most celebrated sacramentaries are those of Pope Gelasius (492—496) and Pope Gregory the Great (590—604). About the 11th or 12th century they were incorporated with the mass-books or missals (q.v.). No sacramentaries were employed by the Greek church. Luther denounced Zuinglius and his followers as sacramentaries in 1521.

Sacramento (California).—The city of Sacramento, founded in the spring of 1849, contained more than 10,000 inhabitants in 1852.

Sacred.—The Christian emperors never used the term until the time of Justin II., A.D. 565. It was first added to the title of majesty, in this country, by James I. in 1603.

Sacred Wars.—The first, in which the Amphictyonic council declared war against the Cirrhæans, B.C. 595, in defence of Delphi, lasted until B.C. 556, when Cirrhæa was taken, razed to the ground, and the surrounding country dedicated to the god. A second lasted from B.C. 448 to B.C. 447. The Phocians having been sentenced by the Amphictyonic council to pay a fine for having, as they pretended, cultivated the Cirrhæan plain, B.C. 357, seized the temple, which led to the third Sacred war. It was brought to a conclusion by Philip I. of Macedon B.C. 346, and the temple was restored to the Amphictyons. By some writers the first contest is termed the Cirrhæan war, and the two latter the first and second Sacred wars.

Sacrifice.—Cain offered one of the fruit of the ground, and Abel of the firstlings of his flock, B.C. 3875 (Genesis iv. 2—4). Noah, after leaving the ark, offered up a burnt-offering, B.C. 2547 (Genesis viii. 20). Abraham was commanded to offer up his son Isaac as a sacrifice, B.C. 1872 (Genesis xxii. 2). The Jewish system of sacrifice was instituted B.C. 1496. A decree of the Roman senate abolished human sacrifices B.C. 99. The Egyptians, says Herodotus, offered up wine to Dionysus, god of the Nile, and to
the Moon, B.C. 408; and the Scythians to their deities sacrificed chiefly horses, B.C. 408. Caesar found the Druids of Britain practising human sacrifices, B.C. 55. "The altars of Phœacia and Egypt, of Rome and Carthage, have been polluted with human gore," and the Arab tribe of the Dumatians annually sacrificed a boy in the 3rd century. The Mohammedan pilgrimage to Mecca is constituted by a sacrifice of sheep and camels. The tribes of the Sabei were in the habit of resorting to the sacred wood or sonnenwald, in the marquisate of Lusace, and there offering human sacrifice, A.D. 243. Theodosius prohibited sacrifice at Rome in 381.

SACRILEGE.—A statute was enacted against it (4 Hen. VIII. c. 2) A.D. 1512. It was made punishable with death by 7 & 8 Geo. IV. c. 29, s. 10 (1827), and with transportation for life by 5 & 6 Will. IV. c. 81 (Sept. 10, 1835). The penalty was further reduced to a term of imprisonment for three years by 6 Will. IV. c. 4 (1836).

SACRIFORTUS (Battle).—The consuls Marcus the younger and Papirius Carbo were defeated at this place, in Italy, with the loss of 20,000 slain and 8,000 prisoners, by Sylla, B.C. 82.

SADDLES.—Zonaras relates that Constantine the younger was killed A.D. 340 by a fall from his saddle, which seems to be the first mention of them. They appear to have been made of wood in the time of the emperor Theodosius. In 385 he ordered that saddles of more than sixty pounds weight should not be put upon post-horses. The emperor Maurice ordered those of the cavalry to have large coverings of fur in the 6th century. Ethelbert, king of Kent, bestowed one adorned with gems upon St. Augustine's abbey in 605. In a reformation of the Cluniacs, in 1283, it is ordered that no abbot or prior ride without one. Among the old Germans and Franks, carrying a saddle from place to place was an ignominious punishment.

SADDUCES, who denied the existence of departed souls, and the resurrection from the dead, derived their name from Sadoc, a follower of Antigonus Sochaeus, president of the Jewish Sanhedrim about B.C. 250. The last-mentioned was the founder of the sect.

SADLER'S WELLS (London).—A band of music was provided for the entertainment of the drinkers of the medicinal waters here, A.D. 1683. Mr. Rosoman sold three-fourths of his interest in the place for £7,000, June 10, 1771. The theatre was opened in 1765. An accident occurred through a false alarm of fire, by which fourteen persons were suffocated or trampled to death, Oct. 19, 1807. Two benefits took place for the relief of the sufferers, Nov. 2 and 3, and two brothers were convicted at the Middlesex sessions for having caused the riot which led to the catastrophe, Dec. 4, 1817.

SAFETY LAMP.—The "Davy" was invented by Sir Humphrey Davy A.D. 1815, and the "Geordy" by George Stephenson in 1815. It was decided to be sometimes a source of danger when ventilation was neglected, by a committee formed to inquire into the subject after the great explosion near Sunderland in 1839.

SAFFRON, the same as the Latin crocus, which was much used by the ancients as a perfume and in cookery, was first introduced into Spain by the Arabs and into England by a pilgrim, who brought a bulb from the Levant in the reign of Edward III. Its cultivation was an important feature of European husbandry in the 15th and 16th centuries. In the neighbourhood of Saffron Walden it was much cultivated. Henry II., king of France, issued an order against its adulteration in 1550.

SAGAN (Prussia) was sold to Wallenstein by Ferdinand II. for 150,800 guilden, about a fourth of its value, A.D. 1627. It passed at his death in 1634 to the princes of Lobkowitz, who sold it to Peter, duke of Courland, in 1785. The duke abdicated his sovereignty in 1795, and his second daughter was created duchess of Sagan in 1845.

SAGH.—Mexican sage was introduced into this country from Mexico A.D. 1724, and blue African sage from the Cape in 1731.

SAGONE BAY (Corsica) is also called Lazona Bay. Here two French store-ships and a large transport were discovered lying under the protection of a battery, by Captain Robert Barrie. He attacked and destroyed the vessels and demolished the fortification, May 1, 1811.

SAGRAMENTO, St., or COLONIA DEL SACRAMENTO (Brazil).—This Portuguese settlement on the Plata was founded by the governor of Rio Janeiro A.D. 1678, and was claimed by the Spaniards in 1680. They relinquished their claim by the treaty of Lisbon, June 18, 1701, and by a treaty signed at Utrecht Feb. 6, 1715, but at length it was ceded to Spain by the treaty of Lisbon, Jan. 13, 1750. Portugal recovered it by a convention signed Feb. 12, 1761; but on the commencement of war between the two countries in 1762 it was again seized by the Spaniards, who resigned it for the fourth time by the treaty of Paris, Feb. 10, 1763. Hostilities recommenced, however, and continued until the Portuguese ceded it to Spain by the treaty of St. Ildefonso, Oct. 1, 1777. It was finally annexed to the empire of Brazil in 1825.

SAGUNTUM, or SAGUNTUS (Spain), was besieged while in alliance with the Romans, by Hannibal, and taken after a brave resistance, when all the male adults were put to death, B.C. 218. This led to the second Punic war. It was recovered by the Romans, who restored and made it a colony, B.C. 210. A mosaic pavement of Bacchus was discovered A.D. 1745. The town of Murviedro (muri veteres) now occupies its site, and the convent of La Trinidad that of the great temple of Diana.

SAINTS' HOME (London Docks) was founded A.D. 1829, and the new building, by Mr. George Green, was opened in May, 1835.
SAL

SAINTES (France).—This ancient town contains a cathedral, built on the site of a church founded by Charlemagne. The church of St. Eutrope was founded in the 11th century. Councils were held here in 562; January, 1081; Nov. 4, 1089; March 2, 1097; and in 1282.

SALAMANCA (Spain), the Roman Salamancaica, and called by the Spaniards, from its fine architectural remains, Roma la Chica, or Little Rome, was stormed and captured by Ordonno A.D. 862. It was captured by the earl of Galway, June 7, 1706, and was occupied by a Spanish force, under the duke del Parque, in October, 1809. Wellington reached it June 17, 1812; took the fort by assault on the 26th; and totally defeated the French, near the town, July 22. The bridge of twenty-seven arches across the Tormes rests on the piers of Trajan's bridge. The university was founded by Alfonso IX. of Leon, in 1290, and united with that of Salamanca. It had 14,000 students in the 14th century. The schools of the university were built in 1415; the four colegios mayores were founded—San Bartolome, in 1410; Cuenca in 1506; Santiago in 1521; and King's College in 1625. Their privileges were much curtailed in 1770. The Jesuits' college was built in 1614. The old cathedral was erected in the 12th century; the new one, begun in 1513, was finished in 1734. The Plaza Mayor, capable of containing nearly 20,000 persons, and sometimes used as a bull arena, was erected between 1700 and 1733. Twenty convents, and about twenty colleges, were destroyed by the French during their occupation of the town before the retreat of 1812. Councils were held here Oct. 21, 1310; May 24, 1335; Nov. 23, 1380 to May 19, 1381, and in 1410.

SALAMIS (Greece), the modern Kuluri, was colonized by the Εακιδες of Εαγις at an early period; Ajax, the son of Telamon, king of the island, accompanying the expedition against Troy with twelve ships, B.C. 1193. It continued independent till a dispute arose, B.C. 620, between the Athenians and the Megarians for its possession, both claimants citing the "Iliad" in support of their pretensions, when it was finally adjudged to the Athenians. It voluntarily received a Macedonian garrison B.C. 318, and they held it until it was purchased by the Athenians B.C. 232. The Persian fleet of Xerxes was defeated by the Greeks off the coast, B.C. 490. Budorum, the western promontory of the island, was taken by the Peloponnesians, B.C. 429.

SALANKEMAN (Battle).—A splendid victory was gained, Aug. 19, 1691, at this place, in Hungary, by Louis, margrave of Baden, over the Turks, 20,000 of whom, the vizier Mustapha Kiooril being among the number, were slain.

SALASSI.—This powerful Alpine tribe, probably of Ligurian origin, is first mentioned in history in connection with an unprovoked attack made upon it by the Roman consul Appius Claudius, who suffered a defeat and lost 5,000 men in the engagement. Having repaired his disaster in another attack, and slain a like number of his opponents, he claimed a triumph, B.C. 143. To prevent the ravages of the tribe, a Roman colony was established at Eporedia (Ivrea), at the mouth of the valley leading to their country, B.C. 100. They revolted B.C. 35, but were subdued by Valerius Messala B.C. 34. Again revolting, Terentius Varro compelled them to lay down their arms, and sold the whole nation (36,000 persons) into slavery, B.C. 25. The gold-washings of the valley constituted the chief cause of dispute.

SALIAN (Battle).—The Persian general Sarbaraza having retired within the walls of this town, it was suddenly attacked by the Romans under Heraclius; and taken, after a brave defence, A.D. 624. Sarbaraza effected his escape.

SALANHA BAY (Africa).—A Dutch fleet was captured by Commodore Johnston in this bay near the Cape of Good Hope, three ships, of 1,100 tons each, being saved from the fire, and afterwards brought to England, July 21, 1781. A Dutch squadron with 2,000 troops on board, destined to attack the English at the Cape of Good Hope, was captured in the same place by Admiral Elphinstone, Aug. 17, 1796.

SALerno (Italy), the Roman Salernum, capital of the province of Salerno, or Principato-Citrea. The Romans decided to establish a colony here B.C. 197, the settlement being actually formed, B.C. 194. It was taken by Papius, the Samnite general, during the Social war, B.C. 90—88, and again by the Goths in the 6th century. Having fallen into the hands of the Lombards, it was besieged by the Saracens A.D. 872. The siege was raised by the emperor Louis in 873. The Saracens eventually succeeded in capturing it in 905. The Greek emperor dispossessed the Saracens in 920. Having reverted to the Lombards, the Saracens laid siege to it in 1005. In another attempt, in 1016, a force of Norman knights, on their way from Jerusalem, came to the rescue. It was captured, after a siege of eight months, by Robert Guiscard, who deposed Gisulph, the last of the Lombard princes, in 1077, and the city rose to great eminence, being classed with the opulentissime urbes of Campania. Its school of medicine was celebrated as early as 1069. Pope Gregory VII. died here, May 25, 1085. An assembly of barons met and elected Roger II., duke of Apulia, king of Naples and Sicily, in 1130. The citizens betrayed the empress Constance to Tancred, king of Sicily, in 1191. It was sacked by the emperor Henry VI. in 1193. Urban VI., in his struggles with Charles III., king of Naples, took refuge here in 1385. The crew of the Cogliari were undergoing their trial here when they were, with the fleet, taken up to the British government, June 8, 1858. The cathedral of St. Matthew was built by Robert Guiscard in 1084, on the site of an
older edifice destroyed by the Saracens. The bronze doors were erected in 1099; the harbour was commenced by John of Procida in 1260; the tomb of Pope Gregory VII. was restored in 1578; and the university, probably the oldest in Europe, was replaced by the Lyceum in 1517.

SALISBURY (Bishopric) was originally established at Sherborne, A.D. 705, when St. Aldhelm was appointed its first bishop, and it was removed to Salisbury, then known as Old Sarum, by Bishop Herman in 1072. By an order in council dated Oct. 5, 1086, the entire county of Berkshire was separated from the diocese of Salisbury, and annexed to Oxford.

SALISBURY, or NEW SARUM (Wiltshire), had its origin in a quarrel between the bishop and canons of Old Sarum. The captain of the castle sided with the clerical party, and founded a cathedral at New Sarum A.D. 1220. It was completed in 1255, and the city received a charter from Henry III., and was walled in 1315. It has returned members to parliament since 1294. A council was held here by Edward II. Oct. 20, 1324; a parliament by Edward III. Oct. 16, 1325; and another by Richard II. April 29, 1384. A rising in favour of Charles II. was made by Sir Joseph Wagstaffe, who surprised the judges March 11, 1655. During the great plague the court removed from London to Salisbury, July 27, 1665. James II. having joined the main body of his army here, was deserted by the duke of Grafton and Lord Churchill Nov. 22, 1688. The poultry-market contains a hexagonal cross of the time of Edward III.

SALIENTINES, or SALIENTINES, inhabiting the southern part of the Italian peninsula, are mentioned by Livy as having been defeated by the consuls L. Volumnius, who took some of their towns B.C. 306. According to some writers the historian confounds them with a neighbouring nation. In the fourth Samnite war they joined the confederacy against the Romans, and were defeated by L. Æmilius Barbula B.C. 281. War was declared against them by the Romans B.C. 267; and their conquest was completed B.C. 266. Having revolted, they were subdued B.C. 213, after which their name disappears from history.

SALONIA, or SALONIE (Dalmatia), became the chief town of Dalmatia after the fall of Dalmium, B.C. 117, was taken by Coscomius B.C. 78, and by Asinius Pollio B.C. 39. M. Octavius, commanding a squadron for Pompey, was compelled to retreat from before it with loss B.C. 34. It maintained a siege against Bato, the native leader, A.D. 6. Diodorean built the palace, which gives its name to the modern town of Spalato, and many public buildings, when he retired here after his abdication in 305. Glycerius, emperor of the West, accepted its bishopric when he resigned his sceptre in 474. It was taken by Odoacer, king of the Heruli, in 481. Belisarius made it his starting-point in the expedition to Italy in 544, as did Narses in 552. It was pillaged and burned by the Avars in 639. A council was held here in October, 1076.

SALONICA, or SALONIÆ (European Turkey), the ancient Thessalonica, in early times also called Emathia, Halia, and Therma, was the resting-place of Xerxes on his march to invade Greece, and was taken by Pausanias about B.C. 479, occupied by the Athenians B.C. 431, and appears to have been rebuilt B.C. 315. It surrendered to the Romans June 22, B.C. 168. Cicero found refuge here during his banishment, B.C. 58. It was the head-quarters of the Pompeian party in the first civil war, B.C. 64, and, siding with Octavius and Antoninus in the second, was made a free city B.C. 42. The apostle Paul addressed epistles to its church A.D. 52. It was made a Roman colonia in the middle of the 3rd century. The widow and daughter of the emperor Diodorean were beheaded here in 313. Its inhabitants were massacred for sedition by order of Theodosius the Great in 399, and it was besieged by the Ostrogoths, who are said by historians to have been driven off by the Saracens in 479. Salonica was stormed after a few days' fighting, and the citizens were slaughtered or sold into slavery by the Saracens, whose fleet appeared before the city July 29, 904. It was taken by the Normans of Sicily Aug. 15, 1185. Boniface, marquis of Montferrat, founded the Latin kingdom of Thessalonica in 1204. Theodore Angelus expelled Demetrius, the son of Boniface, and assumed the title of emperor in 1222. Vataces, emperor of Nicea, united it to his own empire in 1234. On the marriage, in 1284, of Violante with Andronicus, the Greek emperor, her father William, marquis of Montferrat, gave up as her dowry the nominal sovereignty of Thessalonica. After various changes, it was taken from the Venetians by the sultan Amurath II. in 1430.

SALSETTE (Hindostan).—This island, formerly part of the Mongol empire, was taken by the Portuguese in the 16th century. The Mahrattas conquered the island in 1750, and the British Dec. 28, 1774. The causeway connecting it with the island of Bombay was constructed in 1813. The temple-caves of Kennery, the largest of which is a Buddhist temple, are of great antiquity.
Salt was imported into this country by the Phoenicians, according to Posbroke, and the Romans made pits and mines here (those at Droitwich being mentioned) A.D. 816. The art of making common salt was published by Dr. Brownrigg in 1748. Beds of rock-salt were discovered in searching for coal at Marbury, near Northwich, about 1670, and near Lawton in 1779. A second stratum was found at Northwich in 1751. In Lower Normandy it has been procured by filtration through sea-sand and evaporation from sea-water since the 9th century; and in Sardinia since 1550, from which place the process was introduced into Saxony in 1569. The works at Ostia, on the Tiber, were formed B.C. 640; those at Wilieska, in Poland, A.D. 1237; and at Bochnia, Galicia, in 1251. Those on the banks of the lagunes originated a quarrell between Venice and Padua in 1336. A duty of 10s. per bushel was imposed in this country in 1798. It was increased to 15s. in 1805, reduced to 2s. in 1823, and abolished Jan. 5, 1825.

SALTERS' COMPANY (London).—A livery was granted to this company by Richard II. A.D. 1394. The Salter's Hall, built in Bread Street about 1451, was destroyed by fire in 1533. Arms were granted by Henry VIII. in 1539. The company was incorporated by letters-patent of Elizabeth, July 29, 1558. The hall is mentioned in 1578 as having been rebuilt, but was again destroyed by fire in 1598. The present hall, commenced Oct. 16, 1823, was finished in 1827.

SALTPEETER, OR NITRE, is mentioned in the works of Roger Bacon, who died A.D. 1278. Lullius speaks of obtaining aquafortis from it before 1315. Gunther, archbishop of Magdeburg, granted the right of collecting it, as it occurred in the form of an incrusta- tion on walls of houses, in 1419. A burgher of Halle obtained a like grant in 1460; and another had a contract for collecting it from two heaps of rubbish before the gates of Halle in 1544. The magistrates of that town had a manufactory for saltpeeter in 1545. In the Prussian states the royal right of collecting it was, on the urgent representation of the people, abolished,—an indemnification being made to government in 1798.

SALOUZUO (Italy).—The French, under the Duke of Montmorency, took possession of Saluzzo A.D. 1630. The marquisate was annexed to the duchy of Savoy in the beginning of the 17th century; and the ancient castle, once the residence of the marquises of Saluzzo, has been converted into a prison.

SALVADOR, SAN (Central America), was conquered by Alvarado, one of the officers of Cortes, A.D. 1523. It remained under Spanish rule, attached to Guatemala, till united to Mexico by the revolution of 1821. A confederation was formed with Honduras, Guatemala, Nicaragua, and Costa Rica, under the name of the Confederation of Central America, in 1823. It was dissolved in 1840. The capital, bearing the same name, was totally destroyed by an earthquake April 16, 1854.

SALVADOR, ST., OR CAT ISLAND (Bahama or Lucayos Islands), called by the native Indians, Guanahani, or Cat Island, discovered by Columbus in his first voyage to America, Oct. 11, 1492, was the first land in the New World reached by this enterprising navigator.

SALZBACH (Baden).—Turenne, who commanded the forces of Louis XIV., was killed near this town, as he was visiting a battery on the eve of giving battle to the troops of the emperor; under Montecucculi, July 26, 1675.

SALZBURG (Austria), the ancient Juavum, capital of the duchy of Salzburg, the residence of the native kings of Noricum, was destroyed by the Heruli, on the decline of the Roman power, A.D. 448, but was restored in the 7th century. The Benedectine church contains fine painted glass windows of 1480. St. Margaret was built in 1455. Paracelsus, whose grave is in the churchyard of St. Sebastian, died here in 1541. The university church was built between 1696 and 1707; the cathedral, with a façade of white marble, between 1814 and 1868. One of its eight gates, called the New Gate, was cut through the Monk's Hill, by Archbishop Sigismund, in 1767. By the treaty of Campo Formio, signed Oct. 17, 1797, Salzburg was ceded to Austria. The French were defeated here in a great battle, by the Austrians under Archduke John, Dec. 14, 1800. The university was abolished, and a lyceum or academy established, in 1806. Salzburg was ceded to the Duke of Tuscany in December, 1802; was occupied by the French in 1805; and again ceded to Austria by the peace of Presburg, signed Dec. 26, 1805. The Austrian general Jellachich was defeated here by the French April 29, 1809; and by the peace of Vienna, signed Oct. 14, 1809, Salzburg was ceded to Bavaria. In 1818 the city was partly destroyed by fire. The botanical garden was opened in 1850. Councils were held here Jan. 26, 807; Feb. 1, 1178; in 1274, 1281, 1287; Nov. 11, 1288; in 1291, 1310, 1340; July, 1380; January, 1386; Nov. 18, 1418; Feb. 8, 1451; and Oct. 19, 1490.

SALZBURG (Duchy).—This country having been wrested from the Celts by the Romans, and reduced to a state of ruin on the fall of the empire, was visited by Hrodbert, or Rupert, a Scotsman, who converted the people to Christianity, and became their first bishop, A.D. 716. Arno, the seventh in succession, was made archbishop by Pope Leo III. in 798. The Protestants, having received permission, left the duchy in 1732, to the number of 30,000, and settled in Prussia, Württemberg, and Georgia (North America). The see having been secularized, was given, with the title of elector, to the ex-duke of Tuscany in 1801, and was annexed to Austria in 1806. It came into the possession of Bavaria in 1809, but reverted to Austria in 1815.

SAMANIDES.—Ismael, founder of this dy-
nasty, invited by the Abbassides, crossed the Oxus with 10,000 horse, conquered the Sogdian army, and established himself in Persia, A.D. 874. He was recognized as padishah, or king, by the caliph in 900. After a duration of 126 years, the Samnites were conquered by the Ghaznevides in 999.

SAMARA (Russia) was built a.d. 1591, as a defence against the Calmucks, and surrounded by a wall and moat. The fortifications were destroyed in 1708. The country was formed into a government by a ukase issued in December, 1850, and Samara was made the capital.

SAMARCAAND (Tartary), according to Strabo, was built by Alexander the Great. The manufacture of silk paper was known here A.D. 650. It was taken in 1219 by Zenghis-Khan, and in 1359 by Tamerlane. It was united to Bokhara by Abdulah at the close of the 16th century.

SAMARITANS, a people brought from beyond the Euphrates to inhabit Samaria when the ten tribes of the Israelites were carried into captivity by Shalmaneser, B.C. 721, and always retained the origin, habits and the temple of the Samarians B.C. 109. They were rebuilt by Herod B.C. 25. A small remnant of the Samaritans still exists. They were visited by missionaries A.D. 1823, and again in 1838.

SAMAS (Borneo).—The Dutch began to trade here about A.D. 1604. In consequence of the piratical habits of the inhabitants, a British expedition was despatched against Sambas in 1812, but it was repulsed with great loss. Another expedition was sent in the following year, under Colonel Watson, who carried the fort by storm July 3, and compelled the rajah to retire into the interior of his dominions.

SAMIAN WAR, between the Athenians and the Samians, occurred about B.C. 440. In the beginning of this war Pericles, the Athenian commander, defeated the Samian fleet, landed his troops on the island, and besieged Samos. Having heard that a Phenician fleet was coming to the assistance of the Samians, he drew off part of his forces to intercept it. The besieged taking advantage of his absence, carried the naval encampment of the Athenians by surprise. Pericles hastily returned, and again closely besieged the town. The Samians ventured upon another battle, in which they were defeated. They held the town for nine months, when they capitulated through famine. The Samians were condemned to dismantle their fort, deliver up their ships, and pay the cost of the siege by their ships, and the temple of the god Zevs.

SAMNITES.—This people, of Sabine origin, conquered Campania between B.C. 440 and B.C. 420, afterwards overran Lucania, and within a century spread themselves almost to the southern extremity of Italy. The Samnites concluded a treaty with Rome B.C. 354. The first Samnite war began B.C. 343, and after several victories gained by the Romans was concluded B.C. 341. The second Samnite war commenced B.C. 327. The Roman army having been decoyed by the Samnites into a narrow pass called the Caunide Forks, B.C. 321, had to pass under the yoke in the presence of the whole Samnite army. After suffering many defeats, the Samnites were compelled to sue for peace, which was granted B.C. 304. The third Samnite war commenced B.C. 298. The Samnites with their allies the Gauls were defeated in a great battle B.C. 296, and were compelled to sue for peace B.C. 290. They joined Pyrrhus B.C. 252, and finally submitted to Rome B.C. 272. The Samnites declared for Hannibal B.C. 216, but renewed their submission to Rome B.C. 209. They joined in the Social war, and many of them were in the army of the younger Marius, which was defeated at Sacriportus B.C. 82. The Samnites having again revolted, were defeated by Sylla at the battle of the Colline gate, Nov. 1, 82 B.C.

SAMOAN ISLES. (See Navigator's Islands.)

SAMOSATA (Syria) was taken by Marc Antony B.C. 35. It was the native place of Paul, bishop of Rome, who denied the divinity of Christ, and was deported A.D. 269. The town, captured by Chosroes II. in 609, was recovered by Heraclius in 625.

SAMOS, OF SAMUS (Archipelago).—This island was occupied by Carians, Ionians, &c., in the 10th century before Christ. The Samians became remarkable for their commerce about B.C. 776. During the reign of Polycrates, B.C. 532—522, the Samian navy was the most powerful in Greece. Near this island was fought the celebrated battle of Mycale, B.C. 479, in which the Greeks gained a decisive victory over the Persians. The maritime strength of Samos was broken B.C. 440 (see SAmian War), and from B.C. 42 to 114 Samos remained without a fleet. It came under the sway of Rome B.C. 84, and was the residence of Antony and Cleopatra B.C. 32. It was plundered by the Arabs in the 8th century, and was recovered by the emperor Leo in the 13th century. Mohammed II. assailed it in 1453, and it was sacked by the Turks in 1550. A battle was fought here between the Greeks and Turks, Aug. 17, 1824, in which the latter were defeated.

SAMOTHRACE (Egean Sea).—The inhabitants of this island joined Xerxes in his expedition against Greece, and a Samothracian ship sank an Athenian ship at the battle of Salamis, in Cyprus, B.C. 446. Pericles took refuge here after he was defeated by the Romans at the battle of Pydna (q.v.), B.C. 168. St. Paul passed a night here at anchor on his first voyage from Asia to Europe (Acts xvi. 11), A.D. 48.

SAMFORD-COURTENAY (Battle).—The insurgent Roman Catholics of Devon and Cornwall were defeated by the Protestant forces under Lord Russell, at Sampsford-Courtney, in Devonshire, Aug. 17, 1649. This action terminated the hopes of the
Cornish rebels, and most of them perished in the flight. Their leaders were taken prisoners and executed.

SANCTUARY.—The custom of setting apart places where criminals were safe from legal penalties is of great antiquity, and was sanctioned by the legal authority of cities of refuge. (See Asylum.) The right of sanctuary is said to have been introduced into this country by King Lucius about A.D. 181, and it was expressly recognized by the code of Ina, which was promulgated in 693. Alfred the Great in 887 allowed criminals to obtain safety for three days by fleeing to a church; and in 1670 William the Conqueror made express laws on the subject. Sanctuary was understood to be merely a temporary privilege, and by 21 Hen. VIII. c. 2 (1526), felons or murderers availing themselves of it was compelled to be branded with the letter A on the right thumb, in token that they abjured the realm. (See Abjuration of the Realm.) The privilege of sanctuary was taken away from all persons guilty of high treason by 26 Hen. VII. c. 13 (1534), and from pirates by 27 Hen. VIII. c. 4 (1535). By 27 Hen. VIII. c. 19 (1536), all persons in sanctuary were compelled to wear badges, and were prohibited from wearing weapons, and from going abroad before sunrise or after sunset. By 32 Hen. VIII. c. 12 (1540), many sanctuaries were abolished, and the only places permitted to retain the privilege were cathedrals, parish churches, and hospitals, together with Wells, Westminster, Manchester, Northampton, Norwich, York, Derby, and Lancaster. The same statute abolished the privilege of sanctuary in cases of wilful murder, rape, burglary, highway robbery, and arson. Westchester was substituted for Manchester as a sanctuary city by 33 Hen. VIII. c. 15 (1541). These acts were all repealed by 1 James I. c. 26, s. 34 (1604), and the abolition of sanctuary was again enforced by 21 James I. c. 28, s. 7 (1623). In the case of debtors, however, it continued to exist in a modified form until it was finally removed by 8 & 9 Will. III. c. 27 (1697). The London sanctuaries were the Minorie; Salisbury Court, Whitefriars; Ram Alley and Mitre Court, in Fleet Street; Fulwood’s Rents, Holborn; Baldwin’s Gardens, Gray’s-Inn Lane; the Savoy; Montague Close, Deadman’s Place; and the Mint, in Southwark. Owing to the laxity of the authorities, the Mint retained some of its privileges as a sanctuary until the reign of George I.

SANDBURST.—The ancient Egyptians wore sandals of papyrus and sometimes of leather, and people of rank are said to have carried magnificence in this article of dress to a great extent. The emperor Elagabalus wore sandals adorned with precious stones, near using the same pair twice.

SANDEMANIANS. (See Glasites.)

SANDBURST (Berkshire).—The Royal Military College, established at High Wycombe A.D. 1799, was removed to Great Marlow in 1802 by its founder, the late duke of York, and to the splendid establishment erected for the purpose at Sandhurst in 1812.

SANDWICH (Kent) is first mentioned A.D. 695. The Danes, defeated here by Athelstan in 851, destroyed the town in 893, and again landed in 1011, when they besieged Canterbury, which they burned. Canute visited the town on leaving England in 1014; landed here in 1016, and again in 1029. The Danes ravaged it in 1048, and William I. made it the chief of the Cinque Ports in 1067. The corporation held the power in 1315 of inflicting capital punishment by drowning. The French, under Marshal de Brézé, plundered the town in 1438 and again in 1456. The castle was held in 1471 against Edward IV. by Falconbridge and his followers. A mole was constructed in 1463. The harbour began to be difficult of access in 1500, and a century later was quite closed. A great number of Flemings settled here in 1561 and introduced silk-weaving. St. Thomas’s Hospital was founded in 1392, and the grammar-school in 1563. Queen Elizabeth visited the town in 1573, and the Guildhall was erected in 1579.

SANDWICH ISLANDS (Pacific Ocean) were discovered by Captain Cook, Jan. 19, 1778, and again visited by him on his return from Behring’s Strait in 1779. He was killed by the natives at Owyhee (q.v.), Feb. 14, 1779. His bones were preserved by the priests, and continued to receive homage until 1819, when idolatry was abolished and the natives embraced the Christian religion. The king and queen came to London in 1824, and died soon after their arrival. The Sandwich Islands are supposed to be identical with a group discovered by the Spanish navigator Gaetan in 1542, and named by him “the King’s Islands.”

SAN FRANCISCO (California).—Its original name was Yerba Buena, and it was connected with a Spanish settlement of missionaries called San Francisco, founded A.D. 1776. The modern city was founded in 1839. Gold was discovered in the neighbourhood in 1847, and San Francisco was ceded to the United States in 1848. A mint was established in 1853.

SANGALA (Hindostan).—This ancient city was besieged and taken by Alexander the Great B.C. 326, when 17,000 Indians were killed and 70,000 made prisoners. The town itself was razed to the ground.

SANHEBRIM.—The great council of the Jews consisted of seventy-one or seventy-two members, and decided the most important affairs of church and state. It is usually considered to have originated in the seventy elders who were appointed by Moses (Num. xi. 16) to assist him in his judicial duties, B.C. 1490. It was in existence in the time of Jesus Christ. The Grand Sanhebrim was summoned by the emperor Napoleon I. in July, 1806, and met at Paris to the number of seventy-one, March 9, 1807. This was the first meeting of the kind since the dis-
persion of the Israelites after the destruction of Jerusalem, A.D. 70.

SANITARY SCIENCE.—A writer in the "Encyclopaedia Britannica" (xix. 602) remarks—"In the books of Moses we have a surprising instance of the care which was taken to prevent disease by the inculcation of hygienic precepts and the adoption of sanitary laws." Hippocrates, who died B.C. 357, embodied many valuable directions for the preservation of health in his work on "Air, Waters, and Places;" and the Roman physician Celsus, who is supposed to have flourished at the commencement of the Christian era, devoted considerable attention to the same subject. The earliest measures for securing attention to the laws of hygiene in modern Europe arose from the frequent epidemics which repeatedly depopulated entire nations. (See Plague and Lassaettlo.) In 1802 the French government established a council of health for the sanitary regulation of Paris; and in 1851 the entire country was brought under control of a central council, with minor branches in each department. The public health movement in this country was commenced by Dr. Southwood Smith, who made several suggestions tending to sanitary reform in his work on fevers, published in 1830. In 1839 his report on the state of Bethnal Green and Whitechapel excited considerable attention. Mr. Edwin Chadwick's report on the condition of the labouring poor appeared in 1840, and his report on infestation in towns in 1843. The Health of Towns Association was formed in November, 1844, and numerous legislative and popular measures, amongst which the following deserve particular notice, have since been adopted.

Baths and Wash-houses Act, 9 & 10 Vict. c. 74 (Aug. 28, 1846), amended by 10 & 11 Vict. c. 61 (July 25, 1847).

Nuisances' Removal Act, 9 & 10 Vict. c. 96 (Aug. 25, 1846), renewed, amended, and made perpetual by 11 & 12 Vict. c. 123 (Sept. 4, 1848), and by 12 & 13 Vict. c. 111 (Aug. 1, 1849). The provisions on the subject were consolidated by 18 & 19 Vict. c. 121 (Aug. 14, 1853), which was amended by 23 & 24 Vict. c. 77 (Aug. 6, 1860).

Towns' Improvement Clauses Act, 10 & 11 Vict. c. 31 (June 21, 1847).

Public Health Act, 11 & 12 Vict. c. 63 (Aug. 31, 1848), amended by 14 & 15 Vict. c. 50 (Aug. 1, 1851), and by 21 & 22 Vict. c. 98 (Aug. 2, 1858).

Metropolitan Interments Acts, 13 & 14 Vict. c. 52 (Aug. 31, 1848), extended by 16 & 17 Vict. c. 83 (July 1, 1853), which was amended by 16 & 17 Vict. c. 134 (Aug. 20, 1853), and 18 & 19 Vict. c. 138 (Aug. 14, 1858).

Common Lodging-houses Act, 14 & 15 Vict. c. 28 (July 24, 1851), extended by 26 & 27 Vict. c. 41 (Aug. 4, 1853).

Labouring Classes' Lodging-houses Act, 14 & 15 Vict. c. 34 (July 24, 1851).

Smoke Nuisance Abatement Act, 16 & 17 Vict. c. 138 (Aug. 20, 1853).

SANQUHAR (Scotland) is supposed to owe its origin to the old castle of Sanquhar, the ruins of which are still extant on an eminence to the south-east of the town. Taken by the English in the reign of Edward III., it was reconsecrated a burgh in 1484, and was made a royal burgh by James VI. in 1506. The town-hall, a handsome edifice, was built and presented to the town by the duke of Queensberry in 1794. The old church, part of which is supposed to have been built by the Picts, was taken down, and a new one erected on its site, in 1823.

SANTA CRUZ (Canary Isles), discovered by Bartholomeu Diaz, A.D. 1486. A Spanish fleet of sixteen vessels, protected by the guns of the castle and seven batteries erected on the shore, was attacked and destroyed by Admiral Blake, April 20, 1657. An unsuccessful attempt to take Vera Cruz was made by Nelson, who lost his right arm in the engagement, July 24, 1797.

SANTA MARIA. (See Leucadia.)

SANTANDER (Spain).—This seaport-town, capital of a small province of the same name, was taken and sacked by the French in June, and again in November, 1808. The Spaniards carried it by assault in the beginning of June, 1809; and it was retaken with great slaughter by the French on the 10th of the same month. It was evacuated by them Aug. 15, 1812. Santander was declared a free port by a government decree, March 30, 1818.

SANTIAGO (S. America), the capital of Chili, was founded by Pedro de Valdivia, Feb. 24, 1541. It suffered severely from earthquakes in 1822 and 1829.

SANTIAGO, or SANTIAGO DE COMPOSTELLA (Spain), was one of the first towns wrested from the Moors by the successors of Pelayo, and was held by them until 997, when it was retaken by the Moors, who destroyed the temple, and placed its bells in the mosque at Cordova, where they remained till that town was taken by Ferdinand III. in 1235. They were then brought back to Santiago on the shoulders of his Moslem captives. On the building of the cathedral, about the end of the 9th century, the bodies of the apostle St. James, and two of his disciples, Athanasius and Theodorus, were, according to tradition, discovered, and placed in a subterranean chapel, under the principal altar. This circumstance brought pilgrims to Santiago from all parts of Europe; and to protect them on their way from the attacks of the Moslems, the celebrated order of Santiago was founded in 1158 by Ferdinand II. No less than 916 pilgrims left England for Santiago in 1428, and this number increased to 2,280 in 1438. The offerings of the pilgrims were supposed to have made the church immensely rich. When the town was taken by the French in 1809, Marshal Ney ordered half of the money to be handed over to pay his troops, and it amounted to £40,000. The town was abandoned by the French in 1814. An hospital for pilgrims was erected in the 15th century. Santiago is the see of an archbishop, and the seat of a university founded in 1532.

SAPIENZA (Mediterranean).—This island on the south coast of the Morea, anciently
SAP

called *Sphaerita*, is famous for a naval victory obtained near it by the Athenians over the Lacedaemonians B.C. 425. The Genoese captured and destroyed the Venetian fleet here Nov., 1541.

**Sapphic Verse**, attributed to the celebrated poets, Sappho, who was born at Mitylene, in the isle of Lesbos, about B.C. 610. In consequence of a hopeless love for Phaon, a young Lesbian, Sappho is said to have thrown herself into the sea from Mount Leucas, and was drowned. The Lesbians paid her honour after her death, and stamped their coinage with her image.

**Sapphire.**—This gem was known to the ancients as early as the time of Job, B.C. 1520 (Job xxvii. 6), and was one of the jewels employed in constructing Aaron's breastplate, B.C. 1491 (Exod. xxvii. 18). It was also used in the costume of the Tyrian nobles. Sapphires are found in greatest abundance in the Alps, especially in Austria, and Albany. A few specimens have been found in Bohemia, France, and Saxony. They are, next to diamonds, the hardest and most valuable of precious stones, although their constituents are almost entirely clay, with a little iron as colouring matter.

**Saracens.**—The name of this renowned Arab tribe is derived from *Sarah*, the wife of Abraham, whom they are said to claim as their foundress, to avert the stigma of their descent from the bond-woman Hagar. Bochart denies this theory, and asserts that they were called Saracens in consequence of their nomadic and predatory habits, *Saraka* being the Arabic verb "to plunder." Reidel states that the word simply denotes the eastern origin of the Saracens, *Sharaka* being a modification of the Arabic "to rise," and applied in this case because the east is the quarter in which the sun rises. They are mentioned by the classical geographers, who do not define very exactly the locality they occupied. In consequence of their predatory encroachments, the emperor Decius caused a number of lions to be conveyed into their country from Africa, and turned loose among them, A.D. 251. The name was subsequently applied to all Moorish and Mohammedan people, and especially to the opponents of the Crusaders. (See Crusades, Moors, Mohammedans, &c.)

**Saragossa, or Zaragoza** (Spain), capital of the old kingdom of Aragon, is said to have been founded by the Phcenicians or Carthaginians. It was rebuilt by the Roman emperor Augustus, who gave it the name of Cassarea Augustea, and was taken A.D. 470 by the Goths, who were expelled by the Saracens in 712. It was made the capital of a separate Moorish state in 1017. Alfonso of Aragon besieged and took the town in 1018, and it was subsequently united to the kingdom of Castile. Saragossa is celebrated in modern history by the two sieges it sustained during the Peninsular war. The French, who attempted to carry the town by assault, June 16, 1808, were repulsed with great loss. They then commenced a regular siege, and succeeded in getting into the town Aug. 4, when a deadly struggle commenced, which lasted for eleven days. The Spanish commander Palafox having been reinforced, the French abandoned the siege during the night of Aug. 14, with the loss of several thousand men. The second siege commenced Dec. 20, 1808. The outworks were soon taken by the French, and a series of sanguinary combats ensued day and night until Jan. 27, 1809, when a general assault was made, and the French succeeded in penetrating into the town. The garrison made an obstinate defence; but an epidemic fever broke out amongst them, and Palafox surrendered the town on honourable terms, Feb. 20, 1809. During the siege, 54,000 persons perished, of whom only 6,000 were killed by the enemy, the rest having been destroyed by the plague. The Spaniards were defeated near this town by the French, June 16, 1809. It was renamed Saragossa by the French in July, 1813. A large body of Cossacks were intro- trated into the town, and occupied the principal posts, March 2, 1838. The inhabitants, without chiefs, and badly armed, attacked the assailants, made 2,000 prisoners, and expelled the remainder.

**Sarah Sands.**—This iron screw steamer, with 300 soldiers on board, left Portsmouth for Calcutta in the middle of August, 1857. A fire broke out in the hold Nov. 11. The soldiers succeeded in clearing out the powder-magazine with the exception of two barrels, one of which exploded shortly afterwards, and the ship became a mass of flames. The fire, after raging twenty-four hours, was subdued by the exertions of the soldiers and the crew. A strong gale sprung up, and the vessel, with 15 feet of water in the hold, suc- ceeded in reaching the Mauritius Nov. 21, and not a single life was lost.

**Saratoga** (North America).—Near this town, a British force under General Burgoyne surrendered to the Americans under General Gates, Oct. 17, 1777.

**Sarawak** (Borneo), the capital of a settlement of the same name, was founded A.D. 1841 by Sir James Brooke, who was appointed its rajah. An outbreak of the Chinese settlers took place Feb. 15, 1857. They attacked and burnt the dwelling- houses of the Europeans in Sarawak, and killed several persons. Sir James Brooke and the greater part of the English escaped. The opportune arrival of a small steamer enabled the rajah to drive the Chinese out of the town, when they were attacked by the native Dyaks, and after a guerrilla warfare of several days utterly routed. The Chinese settlements were destroyed, and out of a population of four or five thousand, not more than two thousand escaped.

**Sardinia.**—This ancient town of Illyria was considerably enlarged by the emperor Trajan. According to Zonaras, the emperor Decius I. besieged it without success A.D. 267. A council, at which English bishops are said to have been present, was held here in 347.

**Sardinia** (Mediterranean Sea).—This
SAR

1478. A rebellion, headed by the marquis of Oristano, is suppressed.
1492. The Inquisition is established.
1527. Andrea Doria, with the combined fleet of the Holy League, falls in an attack upon Sardinia.
1540. The island is desolated by a terrible famine.
1710. The Spaniards, under the duke of Turins, fail in an attempt at its recapture.
1714. Sardinia is ceded to the emperor by the treaties of Utrecht, Rastadt, and Baden.
1717. Aug. 22. A Spanish fleet, under the marquis de las Lores, arrives at Cagliari, and recovers the whole island in less than two months.
1720. Feb. 17. Sardinia is restored to the emperor Charles VI., who cedes it the same day to Victor Amadeus of Savoy, in exchange for the island of Sicily.

(See SARDINIA, KINGDOM.)

SARDINIA, KINGDOM (Ital), comprising Savoy, Piedmont, and the island of Sardinia, was established by Victor Amadeus I. (II. of Savoy) A.D. 1720. (See SARDINIA and SAVOY.)

A.D.
1730. Sept. 2. Abdication of Victor Amadeus I. in favour of his son Charles Emanuel I.
1732. Oct. 31. He expires in prison, where he is confined for an attempt to regain the throne.
1736. June 6. Tortona and Novara are ceded to Sardinia by the treaty of Luxemburg.
1742. Feb. 1. A convention is signed at Turin with Mariva Theresa.
1742. Sept. 19. By the alliance of Worms, Sardinia obtains the marquessate of Finale on condition of assisting Austria against Spain.
1748. Oct. 18. By the treaty of Aix-la-Chapelle Milan reverts to Austria, and Finale to Genoa.
1762. A decree is issued liberating the serfs in Savoy.
1770. A new code of laws is adopted in Savoy.
1792. The French invade the Sardinian territories, and occupy Savoy andNice.
1796. May 15. Peace with France is restored by the treaty of Paris, which cedes Savoy and Nice to France. Oct. 16. Death of Victor Amadeus II.
1798. Dec. 9. The king of Sardinia is deposed by the French, and compelled to retire to Leghorn.
1799. March 29. He removes to Cagliari, and is acknowledged king by the Sardinian islanders. May 27. Turin is occupied by the Austrians and Russians.
1805. May 30. Napoleon I. is crowned king of Italy at Milan, and includes Sardinia in his kingdom.

SAR

island, which was also called Ichnusa and Sandaliots, is said to have been originally peopled by a colony of Libyans, who crossed over from Africa under the leadership of Sardus, under the name Sardinia, about B.C. 1200; but the traditions relating to its early history are obscure and conflicting. Its authentic history commences with its capture by the Carthaginians, of which the precise date is unknown. Sardinia was one of the chief corn-growing provinces of the Roman empire.

500—460. Sardinia is conquered by the Carthaginians about this period.
465. The Carthaginian fleet of Libia, in Sardinia, and afterwards takes the city.
526. The island is ravaged by the Romans, under C. Sulpicius.
583. The Carthaginians cede their right to the island to the Romans.
631. The Manibus Torquatus gains several victories over the natives.
715. The inhabitants revolt under the native chief Happscius, who is subdued by Torquatus, and commits suicide.
765. A revolt of the mountainiers is suppressed, with great severity, by the consul Tiberius Sempronius Gracchus.
114. An insurrection is suppressed by M. Cecilius Metellus.
46. Julius Caesar visits Sardinia.
39. It is ceded to Sextus Pompeius by the treaty of Misenum.

The following table gives a summary of the principal events:

SDA 456. Sardinia is wrested from the Roman empire by Generic the Vandal.
534. It is recovered for Justinian by Cyrillius.
581. It is seized by the Goths, under Totilla.
593. Sardinia, governor of Sardinia, compels the barbarous mountainiers to embrace Christianity.
790. The Carthaginians obtain a footing in the island, and pillage Cagliari.
793. They are expelled.
1060. It is conquered by the Moor Musat, who assumes the title of king of Sardinia.
1092. Musat is expelled by the allied forces of Genoa and Pisa.
1164. Frederick Barbarossa sells Sardinia to Bariona, native prince or judge of the province of Aragon. He adopts the royal title, and is crowned at Pavia, but from want of funds is unable to support the dignity.
1165. The Pisans obtain the sovereignty of Sardinia.
1309. James II. of Aragon receives the investiture of Sardinia and Corsica from Pope Clement V.
1324. The infant Don Alonso of Aragon conquers the Pisan alien Manfred, at the battle of Luccicentena.
1325. The fleet of the Pisan fleet, under Gaspar Doris, by the Aragonese admirals Francesco Carre, in the Bay of Cagliari, establishes the authority of the king of Aragon over the greater part of the island.
1335. April 15. Pedro IV. of Aragon establishes the representative government of the Stamenti.
1336. The Pisan laws known as the "Carta de Logu" is promulgated.
1409. June 29. Don Martin, infant of Sicily, gains a great victory over the rebellious Sar-dini ans near Cagliari.
1428. Alfonso V. of Aragon obtains the formal cession of the province of Arborea, and thereby extends his authority over the whole island.
1898. The army is increased by the addition of 120,000 men.

1899. Nov. 28. A commercial treaty is concluded with Sweden.

1847. The establishment of public instruction is created.

KINGS OF SARDINIA.

SARDIS, or SARDES (Asia Minor), the ancient capital of Lydia, was taken by the Cimmerians about b.c. 635, and remained in their possession until Alyattes II. drove the Cimmerians out of Asia, b.c. 617. It became subject to the Persians b.c. 554, and was taken by the Ionians, assisted by the Athenians, b.c. 504, the town being destroyed by fire. The Persians were defeated by the Greeks in the plain before Sard, b.c. 395. It surrendered to Alexander the Great b.c. 334, and was taken by Seleucus, in his war against Lysimachus, b.c. 283. Antiochus the Great made himself master of it b.c. 214, and held it for twenty-five years, when the inhabitants, in the absence of Antiochus, delivered it up to the Romans, in whose custody it remained. It was destroyed by an earthquake in the reign of Tiberius, and was rebuilt by order of the emperor. Sardis was one of the first towns to embrace Christianity,—having, it is said, been converted by the apostle John. It is one of the seven churches of Asia mentioned in the book of Revelations. The town was captured by the Turks in the 11th century, and again in the 14th century. It was also taken by Tamerlane. Sart, which now occupies the site of Sardis, is a miserable place, consisting of a few mud huts.

SAREPTA (Russia).—This fortified town, on the Volga, was founded by a colony of Morrisian Brethren A.D. 1765.

SARMATIA, a name given by the Romans to all the country in Europe and Asia between the Vistula and the Caspian Sea. The people inhabiting this country were usually called Sauromatae by the Greeks, and Sarmatae by the Romans. The Sarmatians first began to threaten the Roman empire in the reign of Nero. They assembled on the borders of Thrace A.D. 64, for the purpose of invading that province; some of them having been defeated by the Romans, the rest dispersed. They entered Mosia A.D. 69, defeated ten Roman cohorts and ravaged the country, but were defeated and driven across the Danube. Hadrian defeated them in 119, and Marcus Aurelius in 161; and the emperor Caracalla gained some victories over them in 215, assuming, on that account, the surname of Sarmaticus. They were defeated by Aurelian in the reign of Claudius, and by the emperor Carus, 16,000 having been cut to pieces and compelled to recross the Danube in 282. They were subdued by Constantine the Great in 322; and he espoused their cause in 332 against the Goths, whom he defeated, and nearly 100,000 perished by famine and the sword. The Goths defeated them in 374. The Sarmatians, with the Goths against the Romans in 378, and were defeated with great slaughter by Theodosius I. They joined the Vandals and other barbarians in an invasion of Gaul in 407, and committed dreadful devastation. Those who remained in Sarmatia were afterwards subdued by Attila, and, with their princes, served in his army when he invaded Gaul in 451. Upon his death, in 453, they recovered their liberty, and were allowed by the Roman emperor to settle in Pannonia, Mosia, and other provinces on the Danube, where they remained in peace, till finally subdued by the Goths, with whom, in process of time, they became one nation.

SARNO (Battles).—The first battle was fought near this river, in Italy, between the troops of Justinian, under Nurses, and the Goths, under their king Teias, A.D. 553. The battle lasted two days, and ended in the defeat of the Goths, whose king fell in the encounter. John of Anjou defeated Ferdinand II. of Naples near the Sarno, July 7, 1460.

SARUM, or OLD SARMUM (Wiltshire), was originally a British settlement, and is supposed to have been taken by Vesuvian (A.D. 48—50), and made a Roman station, called Sorbiodunum or Sorrodiunum. The Saxons wrested it from the Britons in 582, and named it Seavesbyrig. It was the residence of the kings of Wessex till the octarchy. The town was fortified by Alfred the Great, and here Edgar convoked a wettinagemote in 980, to deliberate on the best means of defence against the incursions of the Danes. It was taken and burnt by Sweyn, afterwards king of Denmark, in 1005. The seat of the bishopric of Sherborne was removed to this place in 1072, and a cathedral founded, which was finished in 1092. On the completion of the Norman survey in 1086, William I. summoned all the bishops, abbots, barons, and knights of the kingdom to Sarum, to do homage for the lands they held by feudal tenure. William II. assembled a council here in 1085 or 1096, in which William, count of Eu, was im-
peached for high treason. Henry I. resided here in 1100, 1106, and 1116. The castle was repaired on the accession of Henry II. in 1154. The oppressions of the castellans, or captains of the castle, and their disputes with the bishops and clergy, led to the removal of the cathedral to its present site at New Sarum, or Salisbury (q.v.), in 1220. The inhabitants gradually established themselves in the vicinity of the new cathedral, and Old Sarum began to decay.

SARZANA (Italy).—This town was taken from the Florentines by the Genoese A.D. 1407, and ceded to Thomas de Campo Frégo, on his abdication of the dignity of doge of Genoa in 1421. It was recovered for Florence by Lorenzo de Medici, May 22, 1457. It is the seat of a bishopric, which was founded at Luna, under Bishop Habet-deus, who flourished A.D. 454.

ASSANIDES, a name given to the Persian dynasty by Artaxerxes I. about A.D. 226. They governed Persia until the Mohammedan conquest in 632.

SATIN.—This variety of silk is mentioned in the 13th century. It was originally imported into Europe from China.

SATIRE, from the Latin satira, originally signifying a collection of various things, is said to have been first written by Ennius (B.C. 235—169). Lucilius was the first who used it in a regular poetical form B.C. 148, and formed the model which Horace awkwardly followed (B.C. 65—A.D. 8). Varro, the most learned of all the Romans, wrote his "Menippian," ororical satires, B.C. 116—23. Juvénal adopted it to lash the vices of his age (A.D. 59—128). Persius, who lived in the reign of Nero, applied it with great circumspection to that tyrant (A.D. 34—62). In this country it was used by Butler to ridicule the Puritans in his "Hudibras," the first part of which appeared in 1663. Dryden (1631—1700) and Pope (1688—1744) employed it in numerous compositions.

SATURDAY, the seventh and last day of the week, so called from the idol Seater, worshipped on this day by the ancient Saxons. Others say it derived its name from having been dedicated by the Romans to Saturn.

SATURNIA, festivals in honour of Saturn, instituted, according to some authorities, before the foundation of Rome. Others assert that the Saturnalia were first observed at Rome in the reign of Tullus Hostilius; whilst some maintain that they were first celebrated B.C. 497, after a victory obtained over the Latins by the dictator Posthumius.

SAUGOR AND Nerbudda Territories (Hindostan), conquered by Akbar and annexed to the empire of Delhi about A.D. 1559. The peishwa obtained a nominal supremacy when Delhi fell in 1803. The country was ceded to the British in 1818. In the fort of Saugor, the 42d native regiment attempted to raise the 31st to mutiny. The latter not only remained faithful, but had a regular battle with their tempi, and drove them from the station July 7, 1857.

SAUMUR (France) was taken from the count of Blois by Fulk of Anjou, A.D. 1050, and was annexed to the French crown in 1570. It was taken by the Vendeans after a brilliant victory over the republican army, June 10, 1783. They were forced to abandon it a few days afterwards. The castle was constructed at different periods between the 11th and 13th centuries. A Protestant academy was founded by Duplessis Mornay, while governor of the town in the reign of Henry IV. It was dissolved by Louis XIV. in 1684. Councils were held at Saumur Dec. 2, 1253; Aug. 31, 1276; March 9, 1294; May 9, 1315; and in 1432.

SAVANDROOG (Hindostan).—This strong fortress of Mysore, seated on the top of a rock, was, notwithstanding its great strength, taken by the English, after a siege of seven days, in 1791.

SAVANNAH (North America).—This town in Georgia was founded by Genoa, Oglethorpe, in 1734. It was taken by the British in 1777, and held by them till 1782, when it was abandoned. A fire, which destroyed 463 buildings, and other property to the value of nearly £300,000, occurred June 10, 1820.

SAVIGLIANO (Battle).—The French defeated the Austrians at this town, in Sar- dinia, Nov. 5, 1799. It is also called the battle of Genola.

SAVINGS BANKS.—Defoe, in his "Giving Alms no Charity," published A.D. 1704, suggested a substitution of savings for poor-rates, by passing acts of parliament "which shall make drunksards take care of wife and children; spendthrifts lay up for a wet day; lazy fellows diligent; and thoughtless, sotish men careful and provident." Francis Maseres carried a bill through the Commons, which was, however, rejected by the Lords, to enable ratepayers of parishes to receive and invest savings, in 1771. A savings-bank was established at Hamburg in 1778, and one at Berne about 1787. Mrs. Priscilla Wakefield opened one for children at Tottenham in 1798, and another for adults in 1804. The Rev. Joseph Smith, of Wendover, issued propositions to his parishioners on the subject in 1799. One was founded at Bath, by eight ladies and gentlemen, in 1808. The first institution carefully organized was the Baptist Friendly Society of Ruthven, by the Rev. Henry Duncan, in 1817. Savings-banks were first placed under the protection of government by 57 Geo. III. c. 105 & 130 (July 11 & 12, 1817). By 9 Geo. IV. c. 92 (July 28, 1828), the laws relating to savings-banks in England and Ireland were consolidated, and all former statutes repealed. This act was slightly amended by 3 & 4 Will. IV. (June 10, 1833). These acts were extended to Scotland by 5 & 6 Will. IV. c. 37 (Sept. 9, 1833). Further amendments to the savings-banks acts were made by 13 & 14 Vict. c. 53 (Aug. 9, 1844). (See Post Office Savings-Banks.)

SAVONA (Italy) had formerly two harbours, but one was filled up by the Genoese, from
commercial jealousy, A.D. 1525. An explosion of gunpowder in the citadel destroyed half the houses in the town in 1648. A fleet of sixteen French and Spanish vessels, laden with munitions of war, was sunk in the harbour, by a British squadron, in 1745. Savoy was taken by the Sardinians in 1736. A corps of 10,000 Austrians and Piedmontese was defeated here by the French in 1794, and the town was occupied by the French in 1796. It was taken by the Austrians in April, 1800, and was surrendered to them by the French, June 15. Pope Pius VI. was detained here in 1810-11, by order of Napoleon I. The Sistine chapel at Savona was founded by Sixtus IV., and the cathedral was built in 1604.

SAVOY (Europe).—Part of the ancient Sapaedia, whence the name Saboia, or Savoy, is derived.

A.D.
413. Savoy is annexed to Burgundy.
888. It forms part of the duchy of Burgundy.
1027. Death of Berthold, count of Maurienne, and founder of the house of Savoy.
1534. Humbert II. receives large accessions of territory from the emperor Conrad II.
1111. Amadeus II. of Maurienne receives the title of count of Savoy from the emperor Henry V.
1174. Savoy and Piedmont are invaded by the emperor Frederick I.
1297. Count Thomas receives large grants of land in Piedmont from Philip of Germany.
1299. Count Boniface is made prisoner by his subjects.
1526. Peter of Savoy acquires the city of Berne, which he greatly improves.
1516. Amadeus IV., or the Great, receives Maulevrier in Normandy from Philip V., or the Long, of France.
1411. Geneva is brought under the dominion of the counts of Savoy.
1472. Feb. 19. Savoy is erected into a duchy under Amadeus VIII.
1481. The lordship of Piedmont is added to Savoy.
1485. Oct. 5. Nice and other territories are ceded to Savoy by the treaty of Chambery.
1489. Charlotte, queen of Cyprus, confers that island upon the dukes of Savoy. The archbishop of King of Cyprus, though they never take possession of their kingdom.
1534. The inhabitants of Geneva rebel against Charles III., and are assisted by Francis I. of France.
1537. Feb. Francis I. claims Piedmont as part of his hereditary kingdom.
1557. Aug. 10. Emanuel Philibert defeats the French at the important battle of St. Quentin.
1559. April 2. The French conquer Savoy and are restored by the treaty of Cateau-Cambresis (q.v.).
1601. Jan. 17. By the treaty of Lyons the marquise of Saluces is ceded to Savoy.
1703. Victor Amadeus II. declares war against France and Spain.
1766. Sept. 7. The French, under the duke of Orleans and Marshal Martin, are defeated by Victor Amadeus and Prince Eugene at the battle of Tucha, and compelled to leave Italy.

A.D.
1713. April 11. Savoy is recognized as an independent state by the treaty of Utrecht, and Sicily is annexed.
1790. By the quadruple alliance Sicily is exchanged for the island of Sardinia, and the dukes of Savoy assumes the title of king of Sardinia (q.v.).

(See Sardinia.)

SAVOY PALACE (London) was built by Peter, earl of Savoy and Richmond, A.D. 1245. He bestowed it upon the friars of Montjoy, from whom it was bought by Queen Eleanor, wife of Henry III., for her son Edmund, earl of Lancaster. John II., king of France, resided here, when a prisoner in England, in 1357, and again in 1363. It was destroyed by Wat Tyler, May 24, 1381, and was restored by Henry VII., who endowed it, in 1505, as the hospital of St. John the Baptist, for the relief of 100 poor people. Henry VIII. completed the building and granted the hospital a charter, July 5, 1513. Edward VI. (1547 to 1553) suppressed the hospital, but it was re-endowed by Queen Mary (1553 to 1558). The "Savoy Conferences," for the revision of the Liturgy, was held here from April 15 to July 25, 1661. The sick and wounded in the Dutch war of 1666 were lodged in the Savoy. It was removed to make way for Waterloo Bridge and the Strand approaches.

SAW.—According to Pliny, the saw was invented by Daedalus, an Athenian, who flourished about B.C. 1000. Others say it was invented by Talus, the nephew of Daedalus. Saws to work with water-power, first introduced at Augsburg in 1322, were erected in Madeira in 1420, at Breslau in 1427, and in Norway about 1530. The bishop of Ely, ambassador from Mary, queen of England, to the court of Rome, describes a sawmill he visited at Lyons in 1355. The attempts to introduce them to England met with great opposition, and one erected near London, in 1663, had to be abandoned. When again introduced, in 1676 or 1678, the first mill erected at Limehouse was destroyed by the mob. The damage was made good by the government, and a new one erected.

SAXA RUBRA (Battle).—Constantine I.

759
defeated his rival Maxentius at this place, about nine miles from Rome, Oct. 28, A.D. 312.

SAXE-ALLENBURG (Germany), a small duchy on the northern frontiers of the Thuringian forest, formed part of the ancient Osterland, and appears to have been governed by the margraves of Meissen from a very early period. After undergoing many changes, it was formed into a separate principality A.D. 1603. The house of Altenburg becoming extinct in 1672, the greater part of the principality fell to Ernest the Pious, duke of Gotha, and from this period it remained in the Saxe-Gotha family, till the decease without issue of Frederick IV. in February, 1825, when, by a compact between the three junior branches of the house of Gotha (Meiningen, Hildburghhausen, and Coburg), the duke of Hildburghhausen resigned his own territory to Meiningen, and regained the duke of Altenburg, Nov. 15, 1826. The duke of Saxe-Altenburg is a member of the Germanic confederation, and has one vote.

SAXE-COBURG-Gotha (Germany), formerly dependent upon the emperor, came into possession of the house of Meissen A.D. 1348, and fell to the house of Saxon in 1428. By the treaty of Leipsic in 1485, it was allotted to the Ernestine branch of that family. It was made a separate duchy in 1542, and first became an independent state in 1640. Ernest left seven sons, who reigned jointly from 1675 till 1690, when they partitioned the country and formed seven new lines. That of Coburg expired, and the division was annexed to Salfeld in 1699. The line of Eisenberg having become extinct, its possessions were united to Gotha in 1707. Frederick II. introduced the right of primogeniture into Gotha in 1710. Gotha was joined to Coburg, and Salfeld to Meiningen, in 1826. The constitution of the duchy was reformed by Ernest II., brother of Prince Albert, in 1846.

SAXE-MEININGEN (Germany), originally a portion of the domains of the counts of Henneberg, fell to Bernhard, third son of Ernest the Pious of Gotha, A.D. 1580. The line of Coburg became extinct in 1600, and a part of its territory was adjudged to Meiningen by the Aulic council in 1723, and it acquired nearly the whole of the duchy of Hildburghhausen in 1826.

SAXE-WEIMAR-EISENACH (Germany) formerly belonged to the electorate of Saxony, and was apportioned to the Ernestine line, A.D. 1485. John Frederick I. was deposed in 1547, and Weimar was given to his eldest son, the remaining portion being awarded to the second son in 1566. A subdivision took place in 1672; and a reunion by the extinction of the line of Jena in 1690, and that of Eisenach in 1741. The right of primogeniture was introduced in 1719.

Charles Augustus, who took part against Napoleon I., received some acquisition of territory and the title of grand-duke from the congress of Vienna, June 9, 1815. Representative government was introduced in 1816.

SAXON—The name probably derived from Sachs or sachs, a knife,—are first mentioned by Ptolemy, who describes them as occupying the country called Sachalia together with France islands off the coast, A.D. 140. Their descents upon the northern coast of England became so troublesome, that the Roman emperor appointed an officer, who afterwards received the title of "Count of the Saxon shore," in 286. Etuprius represents them as infesting the coasts of Armorica and Belgica with the Franks in 287. A horde of Saxons in one of their predatory excursions to the coast of Gaul, was almost exterminated by the Roman army under Valentinian I. in 371. St. Chiloche erected several fortifications to defend Britain from their attacks in 396. A large body under Hengist and Horvat succeeded in forming permanent settlements in the country after the departure of the Romans about 450. Some Saxons, aided by the Franks, conquered, but afterwards abandoned, the northern part of Thuringia about 530. The southernmost part was made tributary to the Franks about 550. Their long contest with Charlemagne was brought to a close by the treaty of Salz on the Saale, by which they consented to become Christians, and were put on a footing of equality with the Franks, 808.

SAXONY (Germany) was invaded by Charlemagne, who compelled the inhabitants to embrace Christianity, A.D. 804. Henry the Fowler, elected German emperor in 918, was the first of the Saxons who obtained that distinction. He erected the margravate of Meissen in 922, as a bulwark against the Slavonians, and so formed the nucleus of the present kingdom. The family of Wettin, in whom the office has become hereditary, added their own possessions to the margravate in 1130. The emperor Sigismund invested Frederick the Warlike with the electoral title and the duchy of Saxony in 1422. Ernest and Albert, sons of Frederick II., by the division of the country at their father's death, founded the two lines that bear their names in 1492. Frederick III. supported the cause of the Reformation and patronized Luther (1486—1525). John the Constant headed the Protestant princes at the diet of Spires in 1529. John Frederick the Magnanimous took a prominent part in the war against Charles V., and was defeated and made prisoner at the battle of Mühlberg, April 23, 1547. He was deprived of his dignities, which were transferred to his cousin Maurice, of the Albertine line, in 1548. John George I., in whose reign the Thirty Years' war took place, remained on the emperor's side and obtained from him part of the see of Magdeburg, and the two Lusatian margravates in 1655. Frederick the Strong served against an invasion of his territory by Charles XII. of Sweden through turning Roman Catholic and obtaining the crown of Poland in 1697. His son Frederick 760
Augustus II. was also elected king of Poland in 1733. He took part with France and Prussia in the war of the Austrian Succession in 1740, but sided with the empire in the Seven Years' war (1756-1763). A rising of the peasantry led to the redress of some of their grievances in 1790. Having supported Prussia against France for some time after the battle of Jena, Frederick Augustus allied himself with Napoleon I., taking the title of king, and becoming a member of the Confederacy of the Rhine in 1806. The territory was nearly doubled by other cessions from Austria in 1809. It became the theatre of the struggles with Napoleon I. in 1813; and the king was deprived of upwards of one half of his dominions by the treaty of peace with Prussia signed May 18, 1815. A new constitution was framed in 1831. Various changes were made, but the old state of things was restored by the diet elected in 1852.

SCALPING appears to be alluded to in Psalm cxviii. 21, A.D. 1045, and according to Herodotus (book iv. 64) was practised by the Scythians upon their enemies, B.C. 678. The custom was found to exist among the Indians of America on the discovery of that country, A.D. 1492.

SCANDALUM MAGNATUM, or scandal against peers, judges, or other officers of state, was defined with its penalties by 2 Rich. II. c. 5 (1378). Although this statute is still in force, it has not for a long period been resorted to, the last instance being that of the duke of Richmond against Castellom in 1710.

SCANDINAVIA, or SCANDIA (Europe), the ancient name of the country now occupied by Denmark, Norway, and Sweden, is first mentioned by Piny, who speaks of it as an island, A.D. 72. The monarchies of Sweden and Norway were formed by a combination of numerous small sovereignties in the 12th and 13th centuries. Margaret, queen of Denmark, obtained Sweden by conquest and Norway by inheritance, and by the union of Calmar, concluded in June, 1397, they were never to be disjoined.

SCARBOROUGH (Yorkshire), probably of Saxon origin, the name signifying a fortified rock, was incorporated by Henry II. The castle was built in the reign of Stephen. Tostig, earl of Northumberland, having failed in his attempt to effect a landing on the isle of Thanet, arrived here A.D. 1066. Piers Gaveston, having been besieged by the barons in the castle, was obliged to surrender, May 10, 1312. The town was made a bonding port in 1841. Christ's Church was erected in 1223.

SCARLET, the oriental kermes dye, was known from the earliest times. The dye made from cochineal and tin was accidentally discovered A.D. 1634. A bailiff of Shrewsbury, Mr. Thomas Edwards, refused, on religious grounds, to wear robes of that colour in 1599. It is recorded by Julius Ferreratus that soldiers commonly wore a short red sagum to conceal the blood from their wounds, about 1650.

SCEPTRE.—Socrates, who flourished B.C. 469—B.C. 399, has been called the founder of this sect, from his acknowledgment that "all he knew was, that he knew nothing:" although its real founder was Pyrrho of Elis, B.C. 365—315 (See PYRRHONISM.) The school, called the "later sceptics," originated with Menesdemus, a physician, about the 3rd century. Of modern sceptics, the most noted are Montaigne (A.D. 1533—1592); Glanville, a member of the Royal Society, about 1660; Peter Bayle (1647—1706), and David Hume (1711—1776).

SCEPTRE, originally a mere walking-staff, came to be the symbol of sovereign authority, and is mentioned by the patriarch Jacob—"the sceptre shall not depart from Judah, &c.," when imparting counsel to his sons (Gen. xlix. 10), B.C. 1688. Achilles swears by his staff or sceptre (Iliad, i. 246), B.C. 1193. Cyrus, as related by Xenophon, was always attended by 300 sceptre-bearers, B.C. 401. It was first assumed among the Romans by the elder Tarquin, B.C. 621. The sceptre of the Merovingian kings of France was a golden rod as tall as the king himself, A.D. 448.

SCHAFFHAUSEN (Switzerland), the principal town of the canton of the same name, 761
originated in the building of a large monastery in the neighbourhood in the 11th century. It was walled in and received imperial rank in the 13th century. It recovered its independence, and joined the Swiss cantons in the 15th century; became a member of the confederation in 1501; and of the new league in 1515. The fine single arch bridge across the Rhine was burned by the French in 1799. The constitution of the canton became democratic in 1831.

Schaffhausen (Battle).—The Hungarian insurgents, commanded by Bern, were defeated by the Russians under General Lüders, at this town, in Transylvania, July 31, 1849.

Scherhallien (Perthshire).—The Royal Society having resolved to make some experiments to determine the mean density of the earth, a.d. 1772, Mr. Charles Mason selected this mountain for the purpose in 1773. Dr. Maskelyne effected the measurements between June 30 and Oct. 24, 1774. The subsequent calculations intrusted to Dr. Charles Hatton were published in the Philosophical Transactions of 1778.

Schélnitz (Hungary).—In consequence of the importance of its mines, yielding 300 pounds of gold and 43,400 pounds of silver annually, a mining academy was founded here by Maria Theresa, a.d. 1760.

Schism Act (13 Anne, c. 7, 1713), requiring from those desirous of exercising the profession of a teacher, a license from the bishop, and a declaration of conformity to the established church, was repealed by 5 Geo. L. c. 4 (1719).

Schönbrunn, (Peace,) was signed at the palace of Schönbrunn, near Vienna, Oct. 14, 1809, between France and Austria. It consisted of six articles. France obtained possession of Trieste, Carniola, Friuli, and several other places. Russia, Saxony, and the Confederation of the Rhine gained some advantages, and the Tyrol was given up to Bavaria.

Schools. (See Education, &c.)

Schumla (Turkey).—The Russian general Rüdiger was driven from his intrenched position at this town, by the Turks under Hussein Pasha, August 25, 1828.

Schwäbisch (Bavaria).—The earliest Protestant confession was drawn up here by Luther, in 1529, and its articles were adopted by the Smalcald League in 1531. The handsome fountain in the marketplace was erected in 1716.

Schwarzburg (Germany).—A party of the electors assembled here and chose Gunther emperor, in opposition to Charles IV., a.d. 1347. The town, originally dependent upon Saxony, purchased its independence in 1699. The two present reigning families of Schwarzburg-Rudolstadt and Schwarzburg-Sondershausen are descended from the two sons of Gunther IX., who died in 1552. Schwarzburg-Rudolstadt received a representative constitution in 1816.

Schweidnitz (Prussia) having suffered several sieges during the Thirty Years' war, was fortified by Frederick II., a.d. 1742; taken by the Austrians, after a siege of sixteen days, Nov. 12, 1757; recovered by the Prussians April 16, 1758; and carried by assault by the Austrian Marshal Laudon, Oct. 1, 1761. The Austrians under Marshal Daun were attacked and defeated near this town by Frederick II. of Prussia, May 16, 1762. On this occasion the Prussians put feathers in their caps to enable their wild Cossack allies to distinguish them from the Austrians, an ornament since generally adopted in European armies. Frederick's campaign in Silesia was closed by the surrender of its garrison, after a siege of sixty-four days, Oct. 9, 1762. It was captured by the French in February, 1807.

Schweiz, or Schwyz (Switzerland), which has given its name to the country, declared its independence of the house of Austria in January, 1303. It had a dispute with Zurich respecting the country of Toggenburg in 1436. The French defeated the Swiss here in 1799, and the Austrians Aug. 14, 1799. In a diet convoked here in 1803, an absolute democratic constitution was re-established. It declared against Napoleon L. Dec. 31, 1813, and joined the Sonderbund (g. v.) in 1844.

Schymemotes.—County-courts held in English shires, twice every year by the bishop and the ealdorman or sheriff, during the Anglo-Saxon period. In the reign of Canute (a.d. 1016 to 1035) the Schymemotes were held thrice a year. Edward the Confessor, in 1065, appointed the Schymemote to be held twelve times a year.

Scilly Isles (Cornwall), known to the ancients under the name of Cassiterides, or Tin Islands, were used by the Romans as a place of banishment. In the 16th century they were occupied by the English crown by Athelstan. They were held from the time of Elizabeth till 1580 by the family of Godolphin. After the defeat of the royal cause in the west, in 1645, they afforded shelter to Prince Charles. They were fortified in 1649 by Sir John Grenville, the royalist, who converted the rocks into a stronghold for privateers, and did so much damage to the trade of the Channel that the parliament fitted out a powerful fleet under Blake, which compelled Sir John to surrender in June, 1651. Sir Cloudesley Shovel was wrecked with all his fleet off these islands, Oct. 22, 1707, when upwards of 2,000 cows were lost.

Sculcher (Hindostan) was occupied by the Aryan nation B.c. 1400, and they possessed the country when Alexander made his Indian expedition, B.C. 326. It was subdued by the Mohammedans A.D. 711, and held by the caliphs till conquered for Mahmoud of Ghiznee in 1026. The Sumna tribe acquired it about 1200. They were supplanted by another native tribe, the Sammoo, in 1340. Shah Beg Arghun reduced them in 1541, and Akbar brought the country under Mongol sway in 1560. The Kalhoras threw off their allegiance to Delhi in 1796, and that of the kings of Cabul, which they had previously
acknowledged, was altogether renounced in 1813. It was conquered by the British and annexed March 24, 1843.

Sciro (Zigean Sea), the ancient Chios (q.v.), was taken in the early part of the 14th century by the Turks, who massacred the inhabitants. The Genoese seized it in 1346, and kept it nearly 250 years, when it was again taken by the Turks. They massacred nearly all the inhabitants, April 11, 1822. Out of a population of 120,000, only 900 are said to have escaped.

Scone (Scotland).—Edward I., king of England, brought away from this village, near Perth, the stone upon which for many ages the kings of Scotland had been crowned, A.D. 1296, and placed it in Westminster Abbey. Charles II. was crowned here, Jan. 1, 1661.

Scorpion, a kind of tube for firing gunpowder, was in use about A.D. 1440. It was held in the hand, and called by the English hand-cannon, or hand-culverine, and was introduced into England by the Flemings in 1471.

Scotists and Thomists.—With reference to these parties, who long divided the schools, Milman (Lat. Christ. b. xiv. ch. iii.) remarks, "It is not easy to define in what consisted their imvable, unforgotten points of difference. If each combatant had been compelled rigidly to define every word or term which he employed, concord might not perhaps have been impossible; but words were their warfare, and the wars of words their business, their occupation, their glory. The Conceptualism or Eclecticism of St. Thomas (he cannot be called a Nominalist) admitted so much Realism under other forms of speech; the Realism of Duns Scotus was so absolutely a Realism of words, reality was with him something so thin and unsubstantial; the Augustinianism of St. Thomas was so guarded and tempered by his high ethical tone, by his assertion of the loftiest Christian morality; the Pelagianism charged against Scotus is so purely metaphysical, so balanced by his constant, for him vehement, vindication of Divine grace, only with notions peculiar to his philosophy, of its mode of operation, and with almost untraceable distinctions as to its mode of influence, that nothing less than the invertebrate pugnacity of Scholastic Teaching, and the rivalry of the two Orders could have perpetuated the strife. That strife was no doubt heightened and embittered by their real differences, which touched them most sensitive part of the Medialeval Creed, the worship of the Virgin. This was coldly and irreverently limited by the refusal of the Dominican to acknowledge her Immaculate Conception and birth; wrought to a height above all former height by the maintenance of that tenet in every Franciscan cloister by every Franciscan Theologian."

Scotland.—According to tradition, the Scots derive their origin from Cethus, son of the Athenian king Cecrops, who married Scotia, daughter of Pharaoh, king of Egypt, and removed with his family into Spain in consequence of the preaching of Moses. Here he is said to have established a government over a nation whom he called Scota, in honour of his wife Scotia. Under his descendants the Scots removed into Ireland, and subsequently into England. B.C. 639, into the northern part of Albion, which consequently received the name of Scotland. War afterwards broke out with the Picts (q.v.), and the Scots despatched an embassy to Ferquard, king of Ireland, who sent his son Fergus to their assistance. Fergus was acknowledged king by the Scots, and was crowned at Argyll, B.C. 330.

B.C. 330. Establishment of the Celtic Caledonian monarchy by Fergus I.

55. The Scots assist the Britons against Julius Caesar.

A.D. 84. The Caledonians, under Galgacus, sustain a terrible defeat from Julius Agricola, in the battle of Mount Gramipus.

360. The Scots and Picts invade Britain.

1066. The last sovereign of the line of Fergus I., is slain in battle against the Rouman general Maximus.

403. The monarchy is restored under Fergus II.

406. Christianity is introduced into Scotland by St. Patrick.

843. The Picts and Scots are united into one nation by Malcolm II.

933. Scotland is ravaged by Athelstan.

1031. It is invaded by Canute, who exacts tribute.

1049. Duncan is murdered by his cousin Macbeth, who usurps the crown.

1056. Macbeth is slain at Lanarchanahan.

1061. The Scotch invade Northumberland.

1067. Malcolm III., marries Margaret, sister of Edgar Atheling, the Saxon heir to the English throne.

1093. Nov. 13. Malcolm III. is slain by Roger de Mowbray at the battle of Alnwick.

1094. The throne is usurped by Duncan II., who is assassinated by his subjects after a reign of about two months.

1138. Aug. 29. David I. invades Northumberland, and is defeated at the battle of Coton Moor, or Northallerton (q.v.).

1139. By the treaty of Dunstaffane the entire sovereignty of Northumberland, except Newcastle and Banbury, is ceded to Scotland.

1174. William I., or the Lion, is made prisoner by the English at Alnwick, Dec. By the treaty of Falaise, Henry II. agrees to liberate him on condition of his paying homage to England for his kingdom.

1181. Scotland signs the peace interdict.

1183. Richard I, on his accession to the English throne releases William I. from his feudal subjection on the receipt of 10,000 marks.

1185. Hako IV., of Norway, invades Scotland, and is defeated and compelled to resign his possessions in the Hebrides by Alexander III.

1191. Margaret, daughter of Alexander III., is married to Eric II., king of Norway.

1195. Sept. Margaret, the maid of Norway, dies at Orkney on her voyage to Scotland, and the question of the succession is referred to Edward I.

A.D.
1293. Balliol supports his claim in presence of the English parliament.
1296. Balliol renounces his homage, in consequence of which he is dethroned by Edward I., who invades Scotland, and receives the submission of the Scotch nobility.
1297. Sir William Wallace opposes the English, and defeats them at Cambuskenneth (q.v.).
1298. July 22. He is defeated at Falkirk (q.v.).
1305. Aug. 24. Execution of Sir William Wallace at Scone. He is slain with the flower of the Scotch nobility at Flodden Field (q.v.).
1306. Aug. 22. James IV. invades England. Sept. 9. He is slain with the flower of the Scotch nobility at Flodden Field (q.v.).
1313. June 24. Robert I. defeats the army of Edward II. at Bannockburn (q.v.).
1320. A conspiracy is formed against the king by his nephew, the earl of Brechin, and others, who are detected and executed.
1325. Edward III. invades Scotland. The battle of Dunipin Moor (q.v.). Sept. 24. Edward Balliol is crowned at Scone, and young David Bruce is sent to France, where he remains for nine years, although his rival only enjoys the crown for three months.
1332. The English are victorious at Halidon Hill (q.v.).
1336. A grievous famine desolates Scotland.
1346. He is made a prisoner by the English at the battle of Durham, or Neville's Cross (q.v.).
1397. Oct. 3. He is released on payment of 100,000 marks as ransom.
1398. Death of Edward Balliol, the last of the family. Nov. 26. David II. acknowledges Edward III. of England as his successor in the event of his decease without male issue.
1371. Feb. 22. Death of David II. without an heir. March 26. The Stuart line commences by the coronation of James at the crown of the lord high steward as Robert II.
1380. Aug. 10. The English encounter the Scotch, under Douglas, in the battle of Chieve Chase or Otherbar (q.v.).
1402. Robert III. sustains a severe defeat from the English at Homildon Hill (q.v.).
1405. Robert's only son, James, is made prisoner by the English at Flamborough Head.
1403. April 4. Death of Robert III., who is succeeded by his imprisoned son, James I., under the regency of the duke of Albany.
1411. The Highlancers, under Donald of the Isles, are defeated by the Lowland forces of the earl of Mar, at the battle of Harlaw, which establishes the superiority of the Lowlands. St. Andrew's university is founded.
1426. A treaty is concluded with Denmark, by which James I. agrees to pay an annual sum of 500 marks for the sovereignty of the Hebrides and the Isle of Man.

SCREW.—Archimedes is said to have invented a screw for facilitating irrigation in Egypt, about B.C. 250. A screw, called by the Germans a water-screw, was invented A.D. 1746, by Andrew Wirtz, a pewter at Zurich. A patent was obtained in 1800 by Maullin for casting screws, and in 1817 a patent was obtained for making wire screws.

SCREW PROPELLER.—A screw to work in water on the plan of a windmill, was invented by Robert Hooke, A.D. 1680. This was improved by Wm. Lyttleton, Nov. 11, 1794; B. Woodcroft, Sept. 26, 1832, and many others. F. P. Smith, a farmer at Hendon, took out a patent for a screw propeller, May 31, 1836. It was first fitted to a model boat, which was placed on a pond at Hendon, and a boat of six tons burden, propelled by a screw, was exhibited to the public on Paddington canal, Nov. 1, 1836. The Admiralty, wishing the invention to be tested on a larger scale, built the Archimedes of 237 tons burden, which was launched Oct. 18, 1838, and made her first trip in 1839. The Rattler, 888 tons, the first screw vessel built for the Royal Navy, was laid down at Sheerness in 1841, and launched in 1843.

SCROFULA. (See King's Evil.)

SCULLABOGUE MASSACRE.—During the rebellion in Ireland, 184 Protestants, men, women, and children, were forced into a barn by the Roman Catholic rebels, who then set fire to it, and every soul perished, June 5, 1798.

SCULPTURE.—The inventor of this art, and indeed the nation where it originated, are alike unknown. Sculptured monuments have been discovered in Egypt at as early a date as B.C. 1700, and the art was brought to its greatest perfection in that country about B.C. 1350. Next to the Egyptian school of sculpture, in point of antiquity, must be ranked the Assyrian, and after that the Etruscan. The Greek school became celebrated in the 7th century B.C., and attained its greatest perfection about the middle of the 5th century, when Pheidias, or Phidias, Myron, and Polycletus flourished. Praxiteles, who lived B.C. 360, and introduced statues of the nude female figure, and Cleomenes, who probably flourished about B.C. 220, are among the most celebrated Greek sculptors. The regna of Trajan, Hadrian, and the Antonines are usually regarded as the golden age of Roman sculpture, though it is doubtful whether the art was ever practised by the natives. After the decline of the arts, sculpture remained in abeyance till the early part of the 13th century A.D., when it was revived by Nicolo Pisano. Donatello, born in 1383; Michael Angelo, in 1474; Roubillac (1695—1762); Thomas Banks, R.A. (1735—1805); Joseph Nollekens (1737—1823); John Bacon (1740—1799), and John Flaxman (1755—1826), are amongst the most celebrated of modern sculptors.

SCUTAGE, OR ESCUAVE, a pecuniary payment instead of personal service, assessed at first only on military tenants who were ecclesiastics, but made general A.D. 1159. King John, by chapter 12 of Magna Charta (1215) consented that in future no scutage should be imposed without the consent of the great council of the kingdom. This clause was omitted by Henry III. in his confirmation of Magna Charta in 1225, and the 37th clause only provided that scutage should be taken as it was in the time of Henry II. By 25 Edw. i. c. 5 & 6 (1297), it was enacted that no scutage should be taken by the king without the consent of the realm.

SCUTARI ( Asiatic Turkey), the ancient Chrysopolis, was the scene of the defeat of Licinius, by Constantine i. A.D. 323. The Sultan Mahmoud's barracks were occupied in 1853 by the British troops on their march to the Crimea. They were turned into an hospital for the wounded of the allied armies Sept. 24, 1854, and Miss Nightingale and thirty-eight nurses arrived Nov. 6.

SCYLLA (Italy).—This town of Naples was almost totally destroyed by an earthquake, Feb. 5, 1783. Most of the inhabitants, who, with the aged prince of Scylla, had sought refuge on the beach, perished from the effects of another shock in the evening.

SCYROS (Aegean Sea).—The original inhabitants of this island were Pelasgians, Carions, and Dolopians. According to tradition, Theseus, the son of Agenor, retired to Scyros, where he was at first hospitably received, though he was afterwards treacherously cast into the sea. The Macedonians subsequently obtained possession of the island, which the Romans compelled them to restore to the Athenians, B.C. 196.

SCYTHIA (Territory), in the eastern half of northern Europe, and in western and central
Asia, but of very uncertain extent, was inhabited by the Scythians, who invaded Media, and defeated Cyrus the Great in 522 BC. A battle, in which they were engaged with the Persians, was interrupted by an eclipse of the sun (foretold by Thales, May 28, BC 584). Darius made an unsuccessful inroad upon the country BC 507.

The bishops of the see of Alexandria, about BC 400. Alexander gained a success over the people dwelling between the Oxus and the Jaxartes, BC 329. They merged into tribes of various names soon after their attack upon the king of Bosporus, about BC 63.

SEA.—The Venetians claimed the sovereignty of the Adriatic about AD 1400, and imposed a toll on all vessels navigating in the name of the Adriatic. Austria resisted this claim in 1508, and a war that lasted twenty years ensued. According to Selden, most of the maritime states of Europe admitted the claim of England to the sovereignty of the seas in the reign of Edward I. Holland acknowledged it by the treaty of Breda, July 10, 1667 (O.S.).

SEA-FIGHTS. (See Index.)

SEAL.—The use of seals is very ancient. Jezabel sealed the orders for Naboth's death with the king’s seal (1 Kings xxvi. 8), BC 899. The first sealed charter extant is that of Edward the Confessor for the foundation of Westminster Abbey, AD 1065. The impression upon all laymen's seals until 1218 was a man on horseback. Only archbishops and bishops were allowed, by a decree dated 1237, to bear on their seals their title, office, dignity, and names. In 1540 it was ordered that all deeds, writs, &c., should be signed as well as sealed.

SEAL ISLANDS. (See LOROS.)

SEBASTIANS.—Sebastian, king of Portugal, was supposed to have perished with his entire army at the battle of Alcázarquivir, in Africa, Aug. 4, 1578; but as his body was never identified, an opinion prevailed that he had escaped from the field, and was living in captivity among the Moors or in retirement in his own kingdom. In consequence of this notion, a native of Alcaza, of low birth and vicious character, asserted, in 1585, that he was the missing monarch. He was arrested, convicted of gross imposture, and condemned to the galleys for life. A second claimant appeared the same year, in the person of a stonecutter, named Alvares, who was made prisoner and hanged. In 1594 Gabriel de Spinosa claimed identity with the lost Sebastian. He was also seized and publicly executed. The most remarkable of the pseudo-Sebastians was a person who asserted his claim at Venice in 1598, and who exhibited, in manners and features, a most wonderful resemblance to the king. His age corresponded with that of Sebastian, his body exhibited moles and other marks which the king was known to have possessed, and he related circumstances connected with the private life of the sovereign which afforded the strongest confirmation of his statements. His story was, that after the battle he had returned to Portugal, with the intention of assuming a religious life, in expectation of the distress in which he had involved his country; but the fear of discovery had induced him to visit Persia, where he had long been engaged in the service of the shah. Notwithstanding the plausibility of this person's tales, and the interest his appearance excited, his ultimate fate is unknown. The strongest fact connected with the story of the lost sovereign is, that the belief in his re-appearance existed long after he must naturally have died, and even as late as the present century. The Sebastians have been encouraged in their superstition by numerous prophecies, which asserted that the Hidden One, or the Encoberto, was concealed in an undiscovered island, and that his return might be expected about the year 1808.

SEBASTIAN, St. (Spain), was captured by the French Aug. 19, 1719, and again Aug. 4, 1794, when the guillotine was erected, and the blood of many priests and nobles shed. It was again taken by the French in 1808. It was besieged by the British, under General Graham, June 29, 1813. An assault, which was repulsed, took place July 24. The siege was converted into a blockade, which was raised July 28. The siege was resumed Aug. 26. The town was captured Aug. 31, and the castle Sept. 8. The Carlists were defeated here by the queen's forces Oct. 1, 1836.

SEBASTOCRATOR.—This title of honour was introduced by Alexius Comnenus, AD 1081, to reward the piety of his brother Isaac without giving himself an equal.

SEBASTOPOL (Russia), the Tatar Akhtiar, was founded by Catherine II. AD 1790. The docks and other important works, planned by Upton, at one time assistant to Telford, and carried on by him for nearly thirty years, were commenced about 1826. The land defences were begun in 1837. Its siege was commenced by the allies during the Russo-Turkish war (q.v.), Sept. 26, 1854; and it was captured Sept. 9, 1855. The fortifications having been demolished, the town was restored to Russia July 12, 1856.

SEBASTOPOLIS (Battle).—Justinian II., having broken his truce with the Turks, collected an army near this town, on the Phasis, where he was defeated AD 992.

SECRETARY OF STATE.—This title occurs for the first time AD 1253. By 27 Hen. VIII. c. 11 (1555), all grants passed under the king's seal were to be first delivered to the principal secretary of state. In the commencement of the reign of Charles I. there were two secretaries of state. The number has varied in different reigns. A secretary of state for India was added in 1808, which makes the number five.

SEDAN (France), for many years the capital of a principality belonging to the dukes of Bouillon, was forfeited to the crown AD 1642. Near this town the count
of Soissons, who perished in the encounter, defeated the army of Richelieu in 1641. Mazarin took up his abode here in 1652.

SEDAN CHAIRS, invented at Sedan, in France, whences their name, were first used in England A.D. 1551, and in London in 1634. They were in general use in 1649. An act was passed in 1711, limiting the number of licensed sedan chairs to 200. It was increased to 400 in 1726.

SEDGEMOOR (Battle).—The duke of Monmouth was defeated on this plain, near Bridgewater, by the royal troops, under the earl of Faversham, July 6, 1685. Monmouth, who was taken after the battle, was beheaded July 15.

SEEKERS.—This sect arose in England A.D. 1643. They derived their name from maintaining that the true Scripture and ordinances for which they pretended to be seeking were lost.

SEGEBED (Treaty).—The celebrated treaty of peace between Amurath II. and Ladislaus IV., king of Poland and Hungary, was concluded at this town in September, 1444. A truce of ten years was agreed upon, but it only lasted ten weeks. Cardinal Julian declared the treaty null and void, because it had been made without the consent of the pope, and Christian princes were not bound to keep faith with infidels.

SEGESTAN (Asia).—This fertile and flourishing country, containing many large cities and towns, was devastated by Tamerlane A.D. 1383. The first European traveller to visit Segestan was George Forster, who penetrated into the country in 1788. Captain Christie traversed it from north to south in 1810. It is now called Seistan.

SEGONIA (Spain), the capital of a province of the same name, contains one of the finest cathedrals in Spain. It was commenced A.D. 1525. The French captured Segovia in 1808, and occupied it until 1814.

SEIDILICE (Battle).—The Poles defeated the Russians at this village, near Warsaw, April 10, 1581. They captured two standards, fifteen pieces of cannon, and 6,000 prisoners.

SELBY, (Battle,) was fought at this town, in Yorkshire, between the royal troops, under John Bellasis, governor of York, and the parliamentarians, under Lord Fairfax, April 11, 1644. The former was made prisoner, and his army defeated.

SELENTUM.—This non-metallic, solid, elementary body was discovered A.D. 1818 by Berzelius.

SELEUCIA PIERIA (Syria), "rivers of water," according to Strabo, was founded by Seleucus Nicator, prior to B.C. 280. Ptolemy, founder of Epiros, having captured it during his Syrian expedition, B.C. 245, held it by an Egyptian garrison until Antiochus the Great, forming a siege by sea and by land, compelled it to surrender about B.C. 220. Paul and Barnabas embarked from this port on their first mission to Asia Minor in May, A.D. 44 (Acts xiii. 4). The only communication between the city and the sea was by means of an extraordinary excavation through the solid rock, upwards of twenty feet in width and height, and nearly 1,100 yards long, which was surveyed by Captain Allen in 1850.

SELEUCIA TRACHEOTIS (Cilicia), represented by the modern town of Selefkich, was founded by Seleucus Nicator, some time prior to B.C. 280. Under the Romans, it remained a free city from the time of Augustus, A.D. 14. The Issurians made an unsuccessful attack upon it in 355. It was the birthplace of Xenarchus, B.C. 40, and Athenaeus the Peripatetic, B.C. 30.

SELEUCIDE.—This era commenced with the establishment of the kingdom of Syria by the Seleucids, B.C. 311. (See Alexander, Era of.)

SELF-DENYING ORDINANCE.—A resolution to the effect that, during the war, no member of either house should hold any office or command, military or civil, conferred by either house of Parliament, or any authority derived from them, passed the House of Commons on Monday, Dec. 9, 1644; and an ordinance to this effect was ordered to be introduced. It was passed Dec. 19, and sent up to the Lords, who rejected the third reading, Jan. 13, 1645. After much controversy, the ordinance was, with certain amendments, agreed to by the Lords, April 8, 1645.

SELGE (Battle).—Trigibald the Ostrogoth, having rebelled against the Eastern empire, was attacked by the peasantry of Pamphylia in this narrow pass and defeated, with the loss of his bravest troops, A.D. 399.

SELINUS (Sicily) was founded by a colony from Megara about B.C. 628. The inhabitants were engaged in war with the people of Segesta B.C. 580. They joined the Carthaginians B.C. 480, and assisted the Syracusans to eject Thrasylulus B.C. 466. They were again at war with the Segestans B.C. 416. The latter, having sought aid from the Carthaginians, defeated the people of Selinus B.C. 410. The Carthaginians sent Hannibal, and, after a siege of only ten days, the city was taken and most of the inhabitants were slain, B.C. 409. Hannibal destroyed the walls, but allowed the surviving inhabitants to return and occupy it as tributaries to Carthage. They took part with Dionysus in his war against Carthage, B.C. 397. They submitted to Pyrrhus B.C. 276. Before the close of the first Punic war the Carthaginians removed all the inhabitants of Selinus to Lilybaeum, and destroyed the city.

SELLASIA (Battle).—Cleomenes, king of Sparta, was defeated near this ancient town of Sellasia in B.C. 223, by the Achaean League, under Antigonus, king of Macedon. This victory extinguished the power of Sparta.

SELSEY (Sussex).—Wilfrid, archbishop of York, was wrecked on the coast near this town, A.D. 680, when Christianity was introduced, and a bishopric established. It was removed to Chichester about 1082.

SELYMBRIA (Turkey), the modern Si-
livri, is believed to have been founded by a colony from Megara, about B.C. 662. Alcibiades received pecuniary aid from the inhabitants B.C. 410, and took the town by treachery B.C. 408. Xenophon met Medesades, the envoy of Sestus, here, B.C. 400. It was in alliance with the Athenians B.C. 351, blockaded by Philip II. B.C. 343, and captured by the Turks, after a vigorous resistance, A.D. 1463.

**SEMI-ARIANS.**—The Arian sect separated into two divisions A.D. 321. The Arians maintained that the Son of God was unlike the Father; the Semi-Arians refused to receive the word substantially, but acknowledged the Son of God to be of a like substance with the Father. From this they were called Semi-Arians.

**SEMINARA (Battles).**—A body of Spaniards sent to aid the king of Naples, under the command of Gonsalvo de Cordova, was completely defeated by a small body of French and Swiss, under Stuart d'Aubigny, A.D. 1495. The Spanish general, Andrades, defeated d'Aubigny here, and compelled him to retire into the fortress of Angiòola, April 21, 1503.

**SEMI-PELAGIANS,** at first called Massilians, took their rise from John Cassian, a pupil of Chrysostom, at Marseilles, A.D. 425. The monks of southern Gaul, including Vincent, had generally adopted the tenets by 434; and their doctrines were sanctioned by councils held at Arles and Lyons in 426. The decrees of Origen and the Augustinian doctrines in opposition to those of the Pelagians and Semi-Pelagians, July 3, 529; and Pope Boniface II confirmed the decree in 530.

**SEMPACH (Battle).**—Leopold, duke of Austria, in an attempt to reduce Lucerne to obedience, was defeated at this town in Switzerland, by the Swiss, July 9, 1386. Leopold and 2,000 of his men, a third of whom were nobles and knights, fell in the battle.

**SENATE.**—That of Rome, which consisted at first of a hundred members, was raised by Tarquinius Priscus to the number of 300. Tarquinius Superbus put many to death, and sent some of them into exile. The principal plebians of the equestrian order were admitted, under the name of "conscripsi," after the expulsion of Tarquin, B.C. 509. Sylla raised the number to 600, B.C. 82, and Caesar to 900, B.C. 59. Augustus purified it, and reduced the number to 600, taking upon himself the title of "prince of the senate." Severus deprived it of all legislative, as well as executive power, A.D. 193. Soemias, the mother of Elagabalus, having sat by the side of the consuls and subscribed the decrees as a regular member, a law was afterwards enacted, excluding women for ever from the senate, and devoting to the infernal gods the head of whoever should violate it. Alexander Severus restored its lost dignity and authority in 222. They met in the temple of Castor, according to an ancient form of secrecy, and ratified the election of the two Gordians, once more assuming the reins of government in 238.

On the death of the Gordians, they elected two of their own body, Maximus and Balbinus, to be joint emperors, July 9, 238. A decree was issued by Gallienus prohibiting senators from holding any military employment, or even approaching the camp of the legions, in 259. It regained its most important prerogatives in 275, refusing the emperor's request to nominate his brother, Florianus, to the consulsipship. Dicletes and Maximian took measures to degrade the body and abolish its power, getting up imaginary plots against its most illustrious members, in 303. At a full meeting of the senate, the question whether paganism or Christianity should be the religion of the state, was decided in favour of Christianity in 358. A warm discussion took place in 488, on the demand of Alaric the Goth for a ransom, which resulted in the payment, under the name of a subsidy, of four thousand pounds of gold. In the reign of Justinian I., about 553, it seems to have become altogether extinct. The institution was restored in 1144.

**SENEGAL (Africa) was partly settled by the French, A.D. 1626. Two forts erected by the Dutch were taken by the French in 1678, and by the English in 1692. They were retaken by the French in 1693. They built Fort Louis in 1692. Their fort commanding the mouth of the river Senegal was reduced to the British, April 22, 1758. Commodore Keppel took possession of the island of Goree, with its forts, Dec. 29, 1758. Goree was restored to France, the British retainer St. Louis, by the treaty signed at Paris Feb. 10, 1763. St. Louis was taken by the French, who, thereupon, abandoned Goree in January, 1779. Sir Edward Hughes seized and garrisoned Goree, Aug. 8, 1799. The whole of the settlements ceded to France by the treaty signed at Versailles Sept. 3, 1783, were retaken by the British, July 13, 1809. They were finally restored to France in 1815.

**SENSAGAMBA (Africa).**—said to have been visited by Hanno, the Carthaginian general, about B.C. 290, was discovered by the Portuguese A.D. 1444—1469. Their settlements were neglected after the discovery of the route to the East Indies by the Cape in 1497. A settlement was formed at Senegal by the French in 1626, and one at Gambia by the English in 1686. A large portion of the country was, in 1817—1820, traversed by an expedition sent out by the British government. Explorations were made by Laing in 1822, and by the French travellers Mollien in 1813, and Caillé in 1827.

**SENAL (Sussex), supposed to be the modern "Battle," near Hastings (q.v.).

**SENS (France).**—The ancient Augusteum. A treaty of peace between Charles VIII. of France and Maximilian I. was concluded here, May 23, 1493. Councils were held here in 873; July, 928;
SENOES, a Gaulish nation settled on the coast of the Adriatic, laid siege to Clusium B.C. 330, and afterwards advancing towards Rome, defeated the Romans at the confluence of the Allia and the Tiber. They entered Rome and besieged the Capitol, but, withdrawing to a distance of eight miles from the city, were defeated by Camillus. In a second attack upon Rome they were driven off, B.C. 367. From that time their attempts upon Rome were almost annual occurrences, until, having laid siege to Aretinus and gained a victory over a body of Roman troops, they were utterly routed in a pitched battle by the consul Dolabella, B.C. 235. Greece was invaded by them, and Macedon plundered, B.C. 279. They were slaughtered by the Greeks near the banks of the Sperchius, B.C. 275; and, having returned with reinforcements, suffered severely in an engagement with Antigonus Gonatas, and sued for peace, B.C. 277. In combination with the transalpine Gauls they invaded the Roman territory, and, quarrelling over the division of the booty, turned their arms against each other, B.C. 237. On the coast of Pise they were routed by the Romans, with a loss of 40,000 men, their king Congolitanus being among the slain, B.C. 225. Marcellus completed their overthrow at Clastidium, where their king Viridomarus fell, B.C. 223.

SENS (France), the ancient Agendicum, chief town of the Senones, formed the winter quarters of Julian, where he was besieged for thirty days by the Germans, A.D. 337. On partment of a ransom by Charles II. the Danes, who were besieging Paris, retired to this town in 886. Thomas Becket retired to Sens when he fled from England in 1164, and his canonical vestments are still exhibited. It was taken by Henry V. of England in 1420, and by the allies on their march to Paris in 1814. It was made a bishopric about 100. The country of which it was the capital was united to the French crown about 1031. Councils were held here in 601, 848, 1048; June 24, 1130; in 1239; Nov. 15, 1252; Oct. 24, 1366; Oct. 28, 1378; Sept. 25, 1380; and June 22, 1455.

SENTINUM, (Battle,) fought B.C. 295, during the third Samnite war, near this city of Umbria. In this battle the united forces of the Sabines and Gauls were defeated by the Romans under Quintus Fabius.
25,000 serfs, or one-eleventh of the population of England, were registered in the Domesday Book in 1066. The emperor Frederick II. emancipated all those on his own estates in 1230, and those in Italy all became free early in the 16th century. In some countries of Germany the greater part had acquired their liberty before the end of the 13th century. In France, Louis X. emancipated the serfs on the royal domains, on payment of a composition, in 1315. An edict with the same object was issued by Philip V. in 1318. Predial service was not abolished in all parts of France till the revolution of 1789. A decree for its gradual abolition in Denmark was issued in 1766. The alteration in the land-tax by the emperor Joseph II. of Austria to effect the same object, was made in 1782. A ukase was issued by the emperor of Russia, to ameliorate the condition of the serfs, April 14, 1842; and the gradual abolition of serfdom in that country was decreed by the emperor Alexander II. in 1862.

Seringapatam (Hindostan) is said to have been founded by a devotee of Vishnu, a.d. 1404, and was in the possession of Raj Wodegar, a Mysore chief, in 1610. An ineffectual attempt was made by the Mahrattas to capture it in 1697. It was again attacked, and the city paid a ransom of £150,000 in 1772. It was stormed by the British, under Major-General Baird, and Tipoo was killed, May 4, 1799.

Serpent-at-Law, serviens ad legem, was established as a legal degree, when the professors of law formed themselves into a society about a.d. 1216.

Serpent-worship, Obearism, or Opheolatry.—The Rev. John Bathurst Deane, in his treatise on the "Worship of the Serpent," p. 387, states that "in every known country of the ancient world, the serpent formed a prominent feature in the ordinary worship, and made no inconceivable figure in their hieroglyphics, entering alike into legendary and astronomical mythology." He traces its origin from the traditions connecting the serpent with the fall of man, and asserts that it preceded antediluvian polytheism, and originated in Babylonia, whence it found its way into Persia, China, Phcenicia, Mexico, Britain, Scandinavia, Africa, and indeed over the entire globe. Tradition asserts that it was re-introduced into Egypt after the Deluge by Tsaatus Thoth, or Hermes, the great founder of Egyptian civilization.

Servants.—The apparel and diet of servants were regulated by 37 Edw. III. c. 8 (1363). By 5 Eliz. c. 4 (1562), they were protected from sudden dispossession, prohibited from sudden desertion of their situations, by the rule that a quarter's warning might be claimed by the master or servant; and by 32 Geo. III. c. 56 (1792), penalties were prescribed for persons offering themselves as servants under false representations. Persons employing domestic servants are guilty of a misdemeanor if they neglect to supply them with necessary food, or if they assault them, by 14 & 16 Vict. c. 11 (May 20, 1851). A duty was imposed upon male servants by 17 Geo. III. c. 39 (1777), and other acts, which were repealed by 25 Geo. III. c. 43 (1785). This act altered all the existing duties on male servants, and also taxed the employers of female servants. The duties on female servants were abolished by 32 Geo. III. c. 3 (1792).

Servia (Europe).—The Servi, a tribe of Slavonians, received some land south of the Danube from the emperor Leo VI. in the 10th century. The Greeks failed in an attempt to take Servia under their control in the 11th century. The Greek army penetrated into Servia in order to re-establish their dominion, but were utterly annihilated a.d. 1043. Pope Honorius III. erected Servia into an independent kingdom in 1217. The Servians, Hungarians, and other Christians, were defeated in the plain of Cossova in September, 1389, by the Turks, who, in the next century, reduced the whole country under their sway, and it remained a province of the Turkish empire until 1717. Austria having conquered part of Servia in 1718, was obliged to resign it in 1739. Marshal Landohn retook Belgrade in 1789. Austria restored it to the sultan in 1791. In 1805 the Servians rose against the Turks and drove them out of Servia. The Turks regained what they had lost in 1814, and Servia again became a pashalic. Another insurrection broke out in 1815, when the country gained its independence. By the treaty of Paris, March 30, 1856, Servia was placed under the protection of the Great Powers.

Session, Court of, the principal tribunal of civil jurisdiction in Scotland, was constituted a.d. 1532, being based upon institutions of a much earlier date. The Court of Session was divided into two divisions in 1808, the lord president presiding in one, and the lord justice clerk in the other. The practice of jury trial was united with that of the Court of Session in 1830.

Settlement. (See Act of Settlement.)

Sevarambians.—In 1676 a work was printed in England, entitled "History of the Sevarites," and purporting to narrate the adventures of one Captain Siden, or Liden, among a people of that name, inhabiting an unknown country in the Southern Ocean. The book was, in fact, a very clever romance, and formed the basis of a "Histoire des Sévarambes," published at Amsterdam, in three vols., between 1677 and 1679. Both works have attracted considerable attention on account of the uncertainty as to the authorship. The English edition being ascribed to Denis Vairasse d'Alais, Algeron Sidney, and Isaac Vossius, and the French, with much greater certainty, to Vairasse. The subject of the authorship was discussed in Notes and Queries, vols. iii. & iv.

Seven Churches of Asia, addressed by the apostle John from the isle of Patmos, A.D. 96 (Revelation i. 4, &c.), were,—1. at

3 d 2
Ephesus, in Asia Minor, founded by St. Paul, A.D. 53, of which he ordained Timothy first bishop; 2. Smyrna, settled by a colony of Ephesians, the first bishop, Polycarp, having been put to death in the Stadium, A.D. 166. 3. Pergamus, in Mysia, which rose into importance under Lysimachus, B.C. 253. 4. Thyatira, in Lydia, which existed under other names prior to receiving this designation from Seleucus Nicator, about B.C. 321. Lydia, a seller of purple, converted by St. Paul, at Philippi. was a native of this city (Acts xvi. 14), A.D. 48. 5. Sardis, capital of Lydia, under Croesus, B.C. 560. The two Greek servants of a Turkish miller were the only remaining representatives of the church here A.D. 1826. 6. Philadelphia, in Lydia, founded by Attalus Philadelphia, B.C. 159. It contained twenty-four churches, mostly in ruins, in 1827; and 7. Laodicea, in Phrygia, called Diospolis and Rhos, until rebuilt by Antiochus Theos, and named after his wife, B.C. 280. St. Paul mentions the church here (Colossians iv. 16), A.D. 62.

SEVEN.—The grammar-school was founded A.D. 1418, by Sir William de Sev enoke, or Sennocke. Here Jack Cade and his rebel army defeated the king’s troops, under Sir Humphrey Stafford, who fell in the action, June 27, 1450. A school for poor children was founded in 1675, by Lady Margaret Boswell.

SEVEN-SHILLING PIECES.—Gold coins of this value were first issued in England, Nov. 29, 1797.

SEVEN YEARS’ WAR, carried on in Germany by Prussia against Austria, lasted from 1756 to 1763. It was brought to a close by a treaty of peace signed at Huberts burg, Feb. 10, 1763.

SEVILLE (Spain), the capital of a province of the same name, was the ancient Hispalis. Julius Caesar made it his capital, B.C. 45. The Goths wrested it from the Romans, and it was taken by the Moors A.D. 711. Abd erahman made it his capital in 756, and it continued subject to his dynasty till 1031. It was besieged, Aug. 20, 1247, by Ferdinand III., king of Castile, and taken by him Nov. 23, 1248. From that time it formed a part of the kingdom of Castile, until the whole of Spain became one kingdom. The cathedral, occupying the site of a Moorish mosque, was commenced in 1348, and opened in 1519. The giralda, a lofty tower, part of the ancient mosque, and built in 1196, serves as a belfry to the cathedral. Seville was greatly injured by an earthquake in 1395. The university was founded in 1502, and the exchange erected by Philip II. in 1523. A junta was formed at Seville in 1808, which issued a proclamation against Napoleon I., June 6. It surrendered to the French, Jan. 31, 1810, was occupied by Soult in May, 1810, and again July 7, 1811. Seville was bombarded by Espartero, July 21, 1849.

SEVRES (France).—The porcelain-works of Vincennes were transferred to this small town A.D. 1755.

SEWERS.—The remains of sewers have been discovered in the ruins of the great palace of the Assyrian kings at Nimroud. The earliest known to the classic authors were those at Pheax, in Syria, which were constructed of freestone. The celebrated cloaca maxima, the chief sewer of ancient Rome, was constructed by Tarquin ius Priscus (B.C. 600), and is one of the most stupendous monuments of antiquity. It is still used in the drainage of the city. Commissioners of sewers were first appointed by 6 Hen. VII. c. 5 (1427), and their authority was regulated and defined by 23 Hen. VIII. c. 5 (1531). This act, after having been continued by 3 & 4 Edw. VI. c. 8 (1549), and 13 Eliz. c. 9 (1570), was amended by 3 & 4 Will. IV. c. 22 (June 28, 1833). (See DRAINAGE.)

SEWING-MACHINES.—Thimonnier patented a sewing-machine at Paris A.D. 1831, and Heilman exhibited an embroidering sewing-machine in 1834. The first machine for producing what is called the mail-bag stitch was invented by Walter Hind, of New York, in 1834. It was greatly improved by Thomas, of London, who took out a patent in June, 1846. Great improvements have been effected of late years in the sewing-machine.

SEXAGESIMA SUNDAY. (See Septuagesima Sunday.)

SEXTANT.—Newton made some improvements on the old instrument used for taking altitudes at sea A.D. 1699. Hadley’s quadrant was invented in 1730.

SEXTILIS.—The month of August was called by the Romans Sextilis, i.e. the sixth month from March, from which they began their computation. It was changed to August in honour of the emperor Augustus, B.C. 8.

SEYCHELLES (Indian Ocean) were discovered by Vasco da Gama A.D. 1502, and were explored by Lazarus Picault in 1743. A French colony was formed on the island of Mahé, the largest of the group, about 1768. They capitulated to the English in 1794, were not occupied till 1810, and were formally ceded to England by the treaty of Paris in 1815.

SHAFFERSbury (Dorsetshire) was built A.D. 880 by Alfred the Great, who founded the monastery here in 887. Two mints were erected here in the reign of Athelstan. This town was made the see of a suffragan bishop by Henry VIII., John Bradley being consecrated first bishop Feb. 23, 1565. The town-hall was built in 1578.

SHAHJAHANPORE (Hindostan).—The province and town formed part of the possessions of the Rohilla Patans previous to their total overthrow by the British, A.D. 1774. Shahjahanpore was then transferred to Oude, and was ceded to the East-India Company in 1801.

SHAKESPEARE’S WORKS.—William Shake speare, the son of John Shakespeare, and
his wife, Mary Arden, was born at Stratford-upon-Avon, April 23, 1564, and baptized April 26. He married Anne Hathaway in 1552, and repaired to London about 1556. He died at Stratford-upon-Avon, April 23, 1616, and was buried in the chancel of Stratford church, April 25. The first collected edition of his works was published in folio in 1623; the second edition appeared in 1664, and the fourth in 1685. The Shakespearean forgeries were executed by Samuel William Henry Ireland, son of a dealer in curiosities in Norfolk Street, Strand. He first conceived the idea of committing the fraud in 1755, while on a visit with his father at Stratford. One of the plays, "Vortigern," was purchased by Sheridan for Drury Lane, and produced, with John Kemble as Vortigern, in 1796, when it failed. Ireland acknowledged the fraud, and exonerated his father from any participation in the same, in his "Confessions," published in 1805. The first great festival, called the jubilee in honour of Shakespeare, was projected by David Garrick, and was celebrated at Stratford-upon-Avon, Sept. 6 to 8, 1769. This entertaining, which comprised a public breakfast in the town-hall, a performance of the oratorio of Judith in the church, an assembly, a masquerade, a recitation by Garrick in praise of Shakespeare, a display of fireworks, and a horse-race, was severely ridiculed by many contemporary writers. A similar festival was celebrated in September, 1770, April 23, 1830, and on other occasions. The house in which the poet is supposed to have been born was sold by auction, Sept. 16, 1847, and purchased for £3,000, by an association formed for the purpose. Two amateur performances were held at the Haymarket theatre, in aid of the project, in May, 1845; and it was proposed to establish Mr. James Sheridan Knowles in the office of curator; but this portion of the plan was abandoned. In May, 1856, Mr. John Shakespear, professor of Oriental languages at Addiscombe, signified his willingness to give £2,500 for the purpose of purchasing and pulling down the contiguous houses, to remove the danger of fire; and the gift was accepted, and applied as proposed. This gentleman, who was not related to the poet, died June 10, 1858.

Shaldiran (Battle).—Ishmael, Shah of Persia, was defeated in the valley of Shaldiran, in Persia, by Selim I., sultan of the Ottomans, A.D. 1515.

Shamrock, used by the Druids for curing diseases, and by the Irish as food, is said to have been employed to symbolize the Trinity by St. Patrick, A.D. 433.

Shanghai, or Shanghai (China).—This city, captured by the British June 19, 1842, was restored to the Chinese in the following year. It was captured by the insurgents Sept. 7, 1853, but was soon after regained by the Imperialists.

Shawls.—The manufacture of shawls originated in Cashmere, whence the finest kinds are still imported, and it was introduced into this country by Barrow & Watson, of Norwich, A.D. 1784. A shawl-manufactury was established at Paris in 1802, and in 1805 the Norwich makers succeeded in producing an article entirely wrought at the loom, the pattern having been previously embroidered by hand.

Shechem, or Sichem (Palestine), also called Sychar, Neapolis, and Naplous, the first city in the land of Canaan visited by

773
Abraham, and the place where he received a renewal of the promise that his posterity should inherit the land (Gen. xii. 7), B.C. 1291, was appointed as one of the cities of refuge (Josh. xx. 7), B.C. 1444, and Joshua assembled the tribes of Israel, and delivered to them his valedictory address here (Josh. xxiv. 1, B.C. 1427. Abimelech was elected king by its inhabitants (Judges ix. 6), B.C. 1235, and "all Israel" came there to make Rehoboam king (1 Kings xii. 1), B.C. 975. At Jacob's well, near this city, our Saviour talked with the woman of Samaria (John iv. 6), May 13, A.D. 27. It was the birthplace of Justin Martyr, about the beginning of the 1st century.

Sheep.—Cotswold sheep were sent by Edward IV., to Henry IV. of Castile and John II. of Aragon, A.D. 1464. Merino sheep were first introduced into Sweden in 1723. The Leicester breed of sheep first came into notice in 1755, and in 1780 the South Downs were introduced. Merino sheep were brought to England in 1791.

Sheepshanks Collection.—This fine collection of paintings, which embraces many of the best productions of Sir Edwin Landseer, Mulready, Leslie, and other leading English artists, was presented to the British people by John Sheepshanks, Feb. 2, 1857, and has been deposited in the gallery erected for the purpose at South Kensington Museum.

Sheerness (Kent).—A fort was built here, mounting twelve guns, A.D. 1667. The Dutch entered the river Medway, and captured this fort, July 10, 1667. The docks were much improved in 1815. A great fire, which destroyed fifty houses and much property, occurred here, July 31, 1827.

Sheffield (Yorkshire).—Early in the reign of Henry I. the manor of Sheffield was in the possession of the family of De Lovetot, who built a bridge over the Don, and formed the nucleus of the town. The castle was built A.D. 1237, and Edward I. granted a charter to hold a weekly market Nov. 12, 1296. The wooden bridge was replaced by one of stone in 1485. Cardinal Wolsey was detained prisoner, Nov. 8, 1530, and Mary Queen of Scots was brought to Sheffield castle in 1570. The earl of Shrewsbury's hospital was built in 1616, and in 1624 the cutlers obtained an act of incorporation. Sheffield castle surrendered to the Parliamentary army Aug. 10, 1644. It was demolished by order of the Long Parliament, April 23, 1648. The town-hall was erected in 1709, and St. Paul's church in 1729. The first silk-mill, which proved a failure, was erected in 1758. The first bank was opened in 1770, and a cotton-mill, started in 1792, was soon after abandoned. The general infirmary was erected in 1798, and the town received its charter of incorporation as a municipal borough, Aug. 24, 1843. The railroad to Manchester was opened Dec. 22, 1845. John Arthur Roe buck, whose family was connected with the town, was first returned as its member in May, 1849.

Sheffield Administration was formed soon after the death of the marquis of Rockingham, which occurred Monday, July 1, 1782. This ministry, gazetted July 10, was thus constituted:

- Treasury: Earl of Shelburne.
- Lord Chancellor: Lord Thurlow.
- President of the Council: Lord Camden.
- Privy Seal: Sir Henry Erskine, Bart.
- Chancellor of the Exchequer: William Pitt.
- Principal Secretaries of State: Thomas Townshend, Viscount Sydney.
- Admiral: Sir Earl Keppel.
- Secretary at War: Sir G. Yonge, Bart.
- Treasurer of the Navy: Sir Henry Dundas.
- Ordnance: Duke of Richmond.

This ministry was dissolved in consequence of the vote of censure passed on the peace of Versailles, Feb. 21, 1783. (See Coalition [North and Fox] Administration.)

Shendy (Nubia).—Little is known of the history of this place, formerly of much importance. It was laid waste by the Egyptian forces A.D. 1522.

Shepherds Kings (See Hycks.)

Sheppy (Kent).—This island was ravaged by the Danes A.D. 832. They wintered here in 855, and in 1052 it was plundered by Earl Godwin. Queenborough Castle was built by Edward III. in 1340, and so named in honour of Philippa. It was rebuilt by him in 1361, William of Wickham, afterwards bishop of Winchester, being the architect. The castle was repaired by Henry VIII. in 1536. The Long Parliament passed an ordinance (July 16, 1650) for the sale and destruction of the castle, which was soon afterwards demolished.

Sherrborne (Bishopric).—This town in Dorsetshire was made an episcopal see A.D. 705 by Ina, king of the Huns. The council of London, held in 1078, decreed that several bishops' sees should be removed from obscure places to more important towns. The bishopric of Sherrborne was transferred to Old Sarum.

Sherriff, Shire-reve, from the Saxon cean-fan, to levy, to seize, was appointed by Alfred to assist the alderman and the bishop in the discharge of their judicial functions in counties. One of the "Provisions of Oxford," June 11, 1258, required that the freeholders should have the privilege of electing a sheriff annually. This privilege appears to have been confirmed or renewed by 28 Edw. I. c. 8 (1300). In making the periodical circuit of his shire he was attended by the nobles until they were relieved from the duty by 52 Hen. III. c. 10 (1267). By 14 Edw. III. c. 7, it was enacted that he should be "ordained on the morrow of All Souls, November 3, by the chancellor, treasurer, and chief baron of the Exchequer" (1341). Although the sheriffs are now nominated on the morrow of St. Martin's (Nov. 12), the
“pricking” takes place on the morrow of the Purification (Feb. 3). The office for Durham was hereditary in the bishop till 1836. By 1 Edw. IV, c. 2, all sheriffs except those of London were forbidden to proceed judicially (1461).

**SHERIFF-MUTIR** (Scotland).—The Scotch rebel army, under the earl of Mar, was attacked on this plain, near Dunblane, by the royal troops, under the duke of Argyll, Sunday, Nov. 13, 1715. The loss was nearly equal on both sides, and no advantage was gained by either.

**SHETLAND ISLES.** (See ORKNEY ISLES.)

Shipbuilding, in Hebrew a stream or flood, was the test applied by the Galleadites to the fugitive Ephraimites. When required to utter the word, they pronounced it Sibboleth, and were put to death, 42,000 falling victims on that occasion, b.c. 1187 (Judges xii). 6.

Shiites, the followers of Ali, cousin and son-in-law of Mohammed, are called by the Somnites, Shiites, or reprobates. Ali became caliph in 651, and reigned four years and nine months, when he was assassinated. The Somnites are the established sect in Turkey, and the Shiites in Persia and parts of India. Picart enumerates the various points of difference between them. They were afterwards called Fatimites.

**SHILLING, or TESTOON,** was first coined by Henry VII, a.d. 1503, although Pinkerton says coins of that name were struck at Hamburg in 1407. Henry VIII, caused the pound of silver, one-third fine, to be coined into forty-eight shillings in 1547. The ministers of Edward VI, produced seventy-two out of the pound, three-fourths being alloy (1547—1553). It was first completely milled in 1651.

**SHIP-BUILDING.**—This art is said to have originated in Egypt, whence it was imported into Greece by Danaus, b.c. 1455. The Phcenicians practiced it at an early date, and were the first people who ventured on long sea-voyages. Masts and sails are said to have been invented by the Athenian mechanician Desalus, about b.c. 1240, and triremes, or galleys, with three banks of oars, by the Corinthians, b.c. 786. The Romans constructed three classes of ships: the naves longa, used in war; the naves oneraria, or ships of burden, employed in commerce; and the naves liburna, vessels of great speed, which served as dispatch-boats. Oak was first employed in marine architecture by the Venetians. Copper and brass fastenings were substituted for iron in the reign of Nero (a.d. 64—68), and caulking with flux and sheathing with metal were also practised at the same time. The ancient Britons used coracles of leather and wicker-work; and the Danes and Saxons used stout single-masted ships, adorned at the prow with the sculptured head of some animal as an ensign. Alfred the Great constructed a fleet of long galleys, like the war-ships of the Romans, in 897; and, owing to their success, they were generally adopted in the northern seas, and continued to be the general pattern of the English navy until the reign of Edward III, when sailing-vessels became general. Fore and stern-castles, and top-castles at the mast-head, were also introduced about this time. Caracks, an important class of large vessels, are first mentioned about 1449; and lateen sails were used in small ships in 1483. The Great Harry, built by Henry VII, in 1548, is memorable as the first ship of the royal navy, and had five masts. Port-holes were invented in France by Descharges about the year 1500, and in 1572 spirt-sails are mentioned. The first three-decker on record is a Spanish vessel engaged in an action with Sir Richard Grenville off the Azores in 1591. The Shipwrights' Company was founded in 1605, and incorporated by royal charter in May, 1612. The Sovereign of the Seas, launched in 1637, was the first English three-decker; and the Constant Warwick, built in 1649, the first English frigate. The earliest English work on shipbuilding is "The Invention of Shipping," published by Sir Walter Raleigh in 1650. A Society for the Improvement of Naval Architecture was instituted in 1791; and in 1811 a government school of naval architecture was established at Portsmouth dockyards. Steam-ships (q. v.) were first constructed, with success, in 1812; and in 1833 Mr. Fairbairn commenced the manufacture of iron ships (q. v.).

**SHIP-MONEY.**—Ethelred II, ordered a fleet to be prepared to oppose the Danes by a levy on all land throughout England, a.d. 1008. The impost was also collected under Elizabeth in 1588. Under Charles I, a writ from the council ordered it to be enforced in London and other seaport towns in October, 1635. The sum thus raised being insufficient, writs were issued to all counties and towns alike, and the judges supported it by the opinion that it was legal, in 1636. John Hampden, refusing to pay it, was cited in the court of Exchequer, when all the twelve judges, with the exception of Coke and Hutton, gave judgment for the crown, June 12, 1637. A bill was passed in parliament, annulling this judgment and declaring the tax illegal, five of the judges who had argued in favour of it being imprisoned in 1641 (16 Charles I. c. 14).

**SHIRAZ (Persia),** once the capital of the kingdom, and residence of the Shahs, is said to have been founded a.d. 697. The principal mosque was built in 1226. It suffered from earthquakes in 1812 and 1824, and was nearly destroyed in April, 1853.

**SHIRE.**—The division of England into shires or counties existed as early as the time of Ina, who reigned in Wessex from a.d. 685 to 727.

**SHIRT.**—This article of dress was in general use in the 4th century. The Anglo-Saxons wore shirts in the 5th century, and were attired in them when dead. They were embroidered with silk and gold and silver thread in the 16th, and the doublets were greatly shortened, so that a large por-
tion of the shirt might be seen, in the 17th century.

Shirvan (Russia in Asia).—This province formed part of the Armenian monarchy, until the 6th century, when it came under the sway of Persia. At a subsequent period it recovered its independence, and in the 9th century passed under the sway of the caliphs. It was conquered by the Persians in 1580, and was ceded to Russia in 1812. It was divided into two governments in 1847.

Shoeblocks.—The ancient Greeks and Romans cleaned shoes with a sponge, and the medievals Europeans by washing. Oil and other kinds of grease, and soap, were employed as preservatives of the leather, previous to the invention of blacking, which was originally composed of soot, and produced no polish. Owing to the unpaved condition of the streets, shoeblocks were common in London during the 18th century, but gradually became extinct. Charles Knight alludes to "the last of the shoeblocks" as seen in Fleet Street about the year 1820. The existing ragged school shoeblock brigade was founded in 1851, to provide for the foreign visitors to the Great Exhibition. Five boys were sent out Monday, March 31 in that year, and by March 31, 1854, 256 boys plied their vocation as shoeblocks under the auspices of the Ragged School Union.

Shoemakers, among the Romans, wrought in stalls, which proved so obstructive to the streets of the city, that an order for their removal was issued by Domitian (A.D. 81—96). The "cobbler's wax" of the present day was employed by the ancients, and bristles appear to have been substituted for needles at least as early as the 12th century. (See Cordwainers.)

Shoes.—The ancients usually wore sandals (q. v.), which are frequently mentioned under the title of buskins and cothurni, and were often of extreme magnificence. The crescent was employed as an ornament in the shoes of Romans of exalted rank, who appear to have carried on the art of shoe-making with great taste and skill. Only one instance is known of an ancient monument exhibiting shoes with separate heel-pieces. The custom of making shoes right and left was common in classical times. The earliest decorations for the feet used by the Britons were brogues of raw cow-hide, with the hairy side turned outward, and known as espidau; they also wore a species of buskin, called the bwtuais, or butis. The Saxon and Norman shoes mostly covered the ankles, and were convenient in form and tasteful in appearance; but in the reign of William II. absurd boots and shoes with peak toes, called orca rostrata, were introduced. The reign of Edward III. is memorable in the annals of shoemaking, on account of the remarkable elegance of the decorations of the shoes. At the time of Richard II. the peak-toed shoes were carried to such an excess that the toes were chained to the knees of the wearer, to enable him to walk with freedom. This fashion gave way to the opposite extreme, towards the end of the reign of Edward IV., when shoes with extremely broad toes were introduced and worn till the reign of Elizabeth. Slashed shoes with large rosettes were then introduced, and maintained their ground till the Puritan period of the Rebellion. Philip Stubbes enumerates, among the excesses of the gentry, that "they have coked shoes, puisnets, pantofles, and slippers; some of them of black velvet, some of white, some of green, and some of yellow; some of Spanish leather, and some of English, stitched with silk, and embroidered with gold and silver all over the foot, with other gewgaws innumerable." Chopines, or Chopineys, a kind of over-shoe with very thick soles, were introduced from the East in the 17th century, and are mentioned by Thomas Coryate as forming a remarkable part of Venetian female attire in 1611, and as being "of a great height, even half a yard high; and by how much the higher a woman is, by so much the higher are her chopineys." He adds that the wearers of these chopines "are assisted and supported either by men or women when they walk abroad, to the end that they may not fall." They were discontinued in Venice in 1670. At the Restoration an ugly shoe with high heels, square toes, and enormous stiff tiss, which stood out on both sides for some inches, was introduced; and in the reign of William III. small buckles were substituted for the tiss. At this period the fashion of colouring the high heels red became general, and continued till about 1790, when ladies ran into the other extreme, and adopted shoes without raised heels. Shoe strings were substituted for buckles about 1800. (See Boots.)

Sholapoor (Hindostan), is mentioned A.D. 1478 as one of the principal strongholds of the Bahmani sovereigns. Aurungzebe took it in 1685. In the early part of the 18th century it fell into the hands of the Marhattas, and was taken by the British in January, 1818. It was formed into a separate collectorate in 1838.

Shop-tax.—A system of duties on all shops except those occupied by bakers was prepared by 25 Geo. III. c. 30 (1755). This act was explained and amended by 26 Geo. III. c. 9 (1764), and the duties were repealed by 29 Geo. III. c. 9 (1789).

Shorthand, or Stenography.—Among the Greeks its invention was variously ascribed to Pythagoras, b.c. 555, and to Xenophon, b.c. 424. Ennius, the Latin poet, also enjoys the distinction of being the inventor, b.c. 239—169. It is likewise ascribed to Cicero, b.c. 106—43, who certainly practised it and taught the art to his freedman Tiro, the oration on the conspiracy of Catiline having been preserved by this means b.c. 63. The first English work on the subject is Dr. Timothy Dwight, dedicated to Queen Elizabeth, appeared in 1588. Another, by Peter Bale, was published in 1600. The
first regular alphabet was published by John Willis in 1602. Treatises on the art, by Edmund Willis, appeared in 1618; by Witt in 1630; and by Dix in 1633. One by Rich, which received the commendation of John Locke, was issued in 1654. Mason's system was published in 1682. The system of Mr. Thomas Gurney was published in 1753. That of Dr. Byrom was perfected in 1720. Fifty copies for his friends were printed in 1749, and having been secured by act of parliament was published after his death in 1767. Taylor's system appeared in 1786; Mavor's in 1789; and Lewis's in 1815. Mr. Isaac Pitman's system, under the name of phonography, was published in 1857.

**SHORT-LIVED ADMINISTRATION.**

**SHOT.—**Stone shot was employed in China as early as A.D. 757, and a cannon to fire square shot was tried at Bruges in 1346. Bullets of iron, lead, brass, and stone, are mentioned during the 14th century. The method of making shot by pouring melted lead from a great height into cold water was invented about 1752 by Watts, a plumber of Bristol.

**SHREWSBURY (Battle).** (See Hatfield Field.)

**SHREWSBURY ADMINISTRATION.**—Two days previous to her death (July 30, 1714), Queen Anne appointed Charles, duke of Shrewsbury (at that time lord chamberlain and lord lieutenant of Ireland), lord treasurer, in place of the earl of Oxford, who had been compelled to resign on the 27th. The other members of the Oxford ministry (see Harley Administration) remained in office. No sooner had Queen Anne expired (Aug. 1, 1714) than, by order of the elector of Brunswick, the following nineteen peers were appointed under the Regency Bill as lords justices of the kingdom:

- Earl of Pembroke.

By the eleventh clause of the Regency Act the administration of the government until the sovereign arrived devolved upon the following seven great officers:—

- Lord Harcourt, Lord Chancellor.
- Duke of Buckingham, Lord President.
- Duke of Shrewsbury, Lord High Treasurer.
- Earl of Dartmouth, Privy Seal.
- Earl of Strafford, First Lord of Admiralty.
- Sir Thomas Parker, afterwards Lord Parker, Lord Chief Justice.

The lords of the regency appointed Joseph Addison their secretary Aug. 3. Lord Bolingbroke was dismissed by order of the new king; and three of the lords of the regency went to receive his seal of office Aug. 31.

Lord Townshend was appointed in his place, Sept. 17. Lord Harcourt was removed from the lord chancellorship Sept. 19. George I. entered London Sept. 20. Other changes were made, and a ministry was formed by Lord Halifax, Oct. 5. (See Halifax Administration.)

**SHROVE-TUESDAY.**—This day was formerly known as Fasquntide, Fastingtide, Fastens, or Fastmass, from its having been a time of fasting, and Confession-Tuesday because it was a day on which it was customary for Roman Catholics to confess themselves. The custom of eating pancakes on Shrove-Tuesday originated in the circumstance that penitents were permitted to indulge in amusements after confession, but not to exceed any of the usual substitutes for flesh-meat in their repasts. In 1445 Simon Eyre, lord mayor of London, commenced the practice of giving a pancake-feast to the apprentices of the city on this day, and the custom was continued by several of his successors. The Monday preceding Shrove-Tuesday was vulgarly known as Collop-Monday, from a peculiar dish which was usually eaten on that day.

**SIAM (Asia).**—The Portuguese, after the conquest of Malacca, established communications with Siam, A.D. 1511. Having been subjected by the Burmese, it recovered its independence about the close of the 16th century. The Dutch obtained a footing here in the early part of the 17th century. The first English vessel visited Ayuthia in 1612. Phaulkon, a native of Cephalonia, who had been a sailor on board English vessels, gained considerable influence with the king, and was promoted to an important office about the end of the 17th century. He persuaded the king to send an embassy to Louis XIV., which he did, and it reached France in 1684. The embassy also visited London, and concluded a commercial treaty with the government of Charles II. in 1684. A French embassy was dispatched with the view of converting the king to the Roman Catholic religion, in 1685; and another, accompanied by a corps of 500 soldiers, in 1687. The French soldiers having been put in possession of the fort of Bangkok, by Phaulkon, a revolution took place. The king was dethroned, the ministers were slain, and the French driven from the country in 1690. It was invaded by the Burmese, who captured Ayuthia, the capital, in 1766. The king having lost his life, a Chinese adventurer seized upon supreme power, but was dispossessed in 1782. A truce was concluded between the Burmese and the Siamese in 1793. The marquis of Hastings, while governor-general of India, endeavoured to establish commercial relations with Siam in 1822, but with little success. The English received its support in their war with the Burmese in 1824, and negotiated a commercial treaty in 1826. A new treaty was concluded with England by Sir John Bowring, April 30, 1846.
1855, and it was ratified April 5, 1856. Ambassadors from Siam having arrived at Portsmouth, Oct. 27, 1857, her Majesty Queen Victoria held a court for their reception, Nov. 16, when they presented letters and presents from the two kings of the country.

Siberia (Asia) was invaded by the Mongols, who, to the number of 15,000 families, settled here, A.D. 1242. Yermak Timofeyev, a Cossack, crossed the Ural and made considerable conquests in 1580. He was drowned in the Irtysh in 1584. The Russian power gradually extended, and the city of Tomsk was built in 1604. An expedition conquered the Yakutes, and reached the Sea of Okhotsk in 1639. The nation of the Buriates, partly subdued in 1620, was conquered in 1668. The town of Irkutsk was built by Iwan Pochaboff in 1661. Disputes with the Chinese government respecting the conquest of Da-Uria were settled by treaty in 1689. It was confirmed by another, which fixed the boundaries between the two countries in 1727. The Swedish prisoners taken in the war were exiled to Siberia by Peter I., in 1710.

Sibyl.—The sibyl of Cumæ is the most famous of these female soothsayers. According to the legend, "A woman of strange appearance presented herself to King Tarquinius, offering him nine books of the prophecies of the Sibyl, for 300 pieces of gold. The offer was contemptuously refused; whereupon the prophetess burned three of the books, and offering the remainder for the same price, these were again scornfully refused. The Sibyl then retired, and having burned three other books, again returned, asking the same price for the remaining three. The king, much amazed, demanded of the augurs what he should do. They said that he had acted unwisely in refusing them, and commanded him by all means to purchase the remaining books. The sacred volumes were put into a stone chest, which was deposited underground in the Capitol, and two persons, called the guardians of the sacred books, were appointed in charge of them." A new collection of sibylline verses was made when the temple of Jupiter was burned down, B.C. 83. They were again burned and restored in the reign of Nero. A proposal was made in the senate to consult them, A.D. 270. The temple of Jupiter was burned in 368, and again in 395. A complete collection published at Amsterdam in 1609. Some fragments, discovered in the library of Milan, were published in 1817, and some others by Struve in 1818.

Sicambri.—This German tribe having retreated before Caesar, returned and gained some successes over the Romans on the left bank of the Rhine, B.C. 51. Driven across the Rhine, they again invaded Gallia Belgica, B.C. 16. Drusus compelled them to retire into their own country, B.C. 10. Tiberius I. obtained considerable success against them B.C. 8. Marcus Vinicius, when holding command in Germany, was attacked by them A.D. 1, and they joined the Frankish confederation in 240.

Sicilian Vespers.—The brother of the French king, Charles of Anjou, having seized Sicily by virtue of a grant from Pope Alexander IV., the natives rose against the French, March 30, 1282. The massacre which ensued commenced at Palermo, and is known in history as the Sicilian Vespers.

Sicily (Mediterranean Sea).—A tradition exists that this island was originally called Triucaria, in consequence of its triangular form, and that it was originally peopled by the Sicani, a people whom Trucydides regards as of Iberian extraction. It received the name Sicily from its ancient inhabitants, the Siculi, who crossed over from Italy about B.C. 1290.

B.C.
735. Naxos is founded by the Carians.
734. The Corinthians found Syracuse (q. e.).
690. Gela is founded by the Rhodians and Cretans.
596. The tyrants of Syracuse are expelled.
587. Anarchus, son of Gela, found Agrigentum (q. e.).
485. Gelon, of Gela, takes Syracuse, and makes it the most important city of Sicily.
461. A general congress is held between the chief Sicilian cities.
451. Duretius, a Sicilian chief of the interior of the island, conspires against the supremacy of the Greek cities, and is defeated and banished by the Syracusans.
424. A peace is concluded between the Greek cities in Sicily.
415. Sicily is invaded by the Athenians, who fall in an attack upon Syracuse.
409. The Carthaginians invade Sicily.
405. Dionysius of Syracuse concludes a peace with the Carthaginians, on terms which leave them masters of the greater part of the island.
397. Dionysius I. restores the war.
397. Dion revolts against Dionysius II., and takes Syracuse.
353. Assassination of Dion.
343. The Corinthian general Timoleon finally expels Dionysius II., and restores the Greek cities to freedom.
317. Archelaus establishes a despotate at Syracuse.
310. He is defeated by the Carthaginians at Himera.
299. Death of Agathocles.
278. Sicily is invaded by Pyrrhus, king of Epirus.
276. Pyrrhus is compelled to return to Italy.
264. The Romans invade Sicily, which becomes the theatre of the first Punic war.
263. Hieron of Syracuse forms an alliance with the Romans.
262. The Romans take Agrigentum, and sell the inhabitants into slavery.
241. The Carthaginians are defeated in a sea-fight off the islands of the Ægates, and abandon their Sicilian possessions to the Romans, who establish the province of Sicily, which embraces the entire island, except the kingdom of Syracuse.
215. Hieronymus, king of Syracuse, abandons the Romans, and concludes an alliance with the Carthaginians.
212. The Romans take Syracuse.
210. The whole of Sicily is united into a Roman state.
135. Commencement of the Servile war in Sicily, occasioned by the revolt of 200,000 armed slaves under Ennus.
129. The insurrection is suppressed by the consul Fulvius Flaccus.
103. The second Servile war commences, under Saturninus and Athenion.
100. They are conquered by M. Aquilinus.
73-70. Sicily suffers much during the pretorship of Verres, who is publicly accused by Cicero.

39. Sextus Pompeius receives Sicily by the treaty of Misenum.

36. Sextus is defeated by Agrippa in the great sea-fight of Naulochus, which restores Sicily to the Roman empire.

A.D.

440. The Vandals, under Genserico, ravage Sicily.

453. It is conquered by Theodoric, the Goth.

535. Sicily is reconquered by Belisarius, and annexed to the Eastern empire.

827. It is invaded by the Saracens.

878. They take Syracuse, thereby completing the conquest of Sicily.

1081. Sicily is invaded and subdued by the Normans, under Roger Guiscard.

1072. Guiscard takes the title of count of Sicily.

1130. The governments of Sicily and Naples are united by Roger II.

1139. The pope invests Roger II. with the sovereignty of the Two Sicilies.

1194. Sicily is conquered by Henry VI. of Germany.

1282. Sicily shakes off the French yoke by the "Charles of Naples" (q. v.), and is seized by the king of Aragon.

1302. Sicily is unsuccessfully invaded by Charles of Valois.

1394. The Sicilian barons rebel against Mary and Martin I.

1409. Sicily becomes a province of Aragon.

1453. Alfonso I., of Sicily and Aragon, takes possession of Sicily.

1503. Sicily, Naples, and Spain form one monarchy under Ferdinand II. of Spain.

1513. Palermo (q. v.) is made the capital of the kingdom of Sicily.

1564. An unsuccessful rebellion under the duke of Guise is suppressed.

1672. Messina revolts against Spanish supremacy, and is assisted by the French. (See Messina.)

1715. The pope endeavours to exorcise a revolt against Victor Amadeus on the part of his Sicilian subjects.

1720. Victor Amadeus cedes Sicily to the emperor Charles VI. in exchange for Sardinia.

1755. July 3. Don Charles is crowned king of the Two Sicilies at Palermo, by the title of Charles III.

1763. The Jesuits are expelled.

1776. An insurrection is suppressed in Sicily.

1789. The French conquer Naples (q. v.), in consequence of which Ferdinand III. removes his court to Sicily.

1803. March 31. Sicily is proclaimed by the British.

1812. Lord William Bentinck, the British ambassador, obtains a new constitution for Sicily.

1815. June 17. Ferdinand IV. of Naples and III. of Sicily returns to Naples (q. v.), and abdicates the Sicilian constitution. He reigns as Ferdinand III. of the Two Sicilies.

1817. Nov. Sicily is divided into intendancies.

1830. The Sicilians revolt against the absolute power of the crown.

A.D.

1849. Feb. 23. Ferdinand II. grants a new constitution to the Sicilians. March 9. It is rejected by the Sicilian chambers, which convented the Sicilian senatorial guards between the ages of eighteen and thirty years to join the army, under the leadership of Mierciaski. April 2. Catania surrenders to the Neapolitans. April 22. They take Syracuse. May 13. Palermo falls into their power.

1853. Feb. Numerous arrests take place in consequence of a political agitation.

1856. Nov. A successful rebellion breaks out under Baron Bentivenga.

(For the rulers of Sicily, see Naples.)

Sicyon (Greece), also called Ajaxia and Mecone, under which latter name it has been celebrated as "the dwelling-place of the blessed," is said to have existed long before the arrival of Pelops in Greece, B.C. 1284. It was conquered by Agamemnon B.C. 1291, and, having become a Dorian state, joined the Messenians in the first Messenian war, B.C. 737. A.D. 697. It became subject to the Orthogorids about B.C. 576. The Sicyons sent a large force to aid in resisting Xerxes, B.C. 480. Their territory was invaded by the Athenians under Tolmides, B.C. 456, and again under Pericles, B.C. 454. It assisted the Megarians in their revolt against Athens, B.C. 445, took part with Sparta in the Peloponnesian war, B.C. 431; and aided Brasidas against the Athenians, B.C. 424. In union with Corinth it opposed the erection of a fortress on the Achæan promontory of Rhium, B.C. 419. A revolution took place, and an oligarchy was formed by the Lacedaemonians, B.C. 417. It aided Lacedaemon in the war against Corinth, B.C. 394, and against Thessaly, B.C. 387. It emanated from it to join the Spartan alliance, B.C. 368; and in the Samian war it took part with the Greeks against Macedonia, B.C. 323. Alexander, the son of 779
Polysperchon, having obtained possession, was murdered B.C. 314, and his wife Crate-
sipolis betrayed the city to Ptolemy B.C. 308. Demetrius Poliorcetes took it B.C. 303. Demetrius removed the inhabitants to the site of the ancient Acropolis, giving it the name of Demetrias, which it soon, however, lost, and Aratus having delivered it from the tyrant Nicocles, induced the inhabitants to join the Achaean league B.C. 251. It was invaded by Cleomenes B.C. 233, by the 
Etolians B.C. 221, and was conquered by Rome B.C. 146. Under the Byzantine em-
pire it was called Hellas, and the inhabitants Helladici. It continued to exist till the 6th

SIMON (Syria), the modern Saida, deriving its origin and name, according to Josephus, from the first-born son of Canaan, was founded about B.C. 2750. In the division of Canaan, B.C. 1444 (Josh. xvi. 24), it fell to the share of the tribe of Asher, although it was never conquered by them. The Si-
donians were defeated by the king of Ascalon, and took refuge in Tyre, B.C. 1210, and they are mentioned as the oppressors of Israel (Judg. x. 12), B.C. 1187. It separ-
pated from Tyre and surrendered to Shah-
manezer, B.C. 728, furnished ships for the
fleet of Xerxes, B.C. 480; took a leading part in the revolt against Persia, B.C. 352; and was betrayed to Ochus by the king, Tennes, when the people burned the city, 40,000 persons being consumed in the flames, B.C. 351. Having been rebuilt, it submitted to Alexander the Great, B.C. 333. Ptolemy annexed it to his kingdom after the death
of Alexander, B.C. 323; but it was taken from him by Antigonus, B.C. 315. With the rest of Syria it fell under the Roman power, B.C. 65; and was deprived of its ancient privileges by Augustus, B.C. 20. It was invested by the Crusaders, A.D. 1109; and taken by Baldwin in
1111. Having been captured by the Saracens, it was recovered in 1197 by the Christians, who abandoned it in 1291. Important commercial relations were estab-
lished with France in 1658; the French holding a monopoly of the trade till they were driven out by Jezzar Pasha in 1791. It was bombarded and taken by Admiral Napier, Sept. 27, 1840. The manufacture of glass for which it was renowned, made from the fine sand on the coast near Mount Carmel, is spoken of by Pliny, A.D. 77. At Bijoun, eight miles from the town, Lady Hester Stanhope, after a long residence there, died June 23, 1839.

SIEGES.—See alphabetical list of the most
important sieges in the Index.

Siena (Italy), the ancient Sena Julia, was probably founded by Caesar about B.C. 50. It was a bishop's see in the 6th century. Nicholas II. was elected pope at a council held here, Dec. 28, 1058. It sided with the Ghibelline party in the struggle between the emperors and the popes, and their militia, with the aid of auxiliaries, defeated the Guelphs from Florence at Monte Aperto,
in 1258. The intestine dissensions which had harassed the republic for half a century resulted in the expulsion of the reformers, to the number of 4,000 in 1384. It was visited by the emperor Sigismund in 1432; and by Pope Pius II., who attempted to heal the discord, in 1460. Another revolution took place in 1492; and the exiles in returning recovered power in 1497. Pandolfo Petrucci acquired a dictatorship, which he held till
1512. The emperor Charles V. imposed a Spanish garrison upon it in 1547, which was

drawn out in 1552. Duke Cosmo of Florence uniting his troops with those of the emperor, the Maremma was reduced to a wilderness, and the town was starved into a capitulation in April, 1555. Bestowed by Charles V. on his son Philip, it was given up to Cosmo, and united with Tuscany in 1557. The cathedral, with its rich marbles, sculptures, and paint-
ings, was erected in the 11th, 12th, and 13th centuries, and consecrated by Pope Alex-
ander III., in 1180. The university was founded in 1203; the Palazzo Pubblico, begun in 1295, was finished in 1327; the Piazza del Campo, celebrated by Dante in his "Purge-
torio," contains the Loggia di San Paolo, the seat of a commercial tribunal in the Middle Ages.

Sierra Leone (Africa).—This colony, philan-
thropically designed for the reception of negroes, 470 having been removed from
London to it the first year, was settled A.D.
1787. It was attacked and burned by a neigh-
bouring chief in 1789; and 1,196 negroes were removed to it from Nova Scotia in 1790. It was plundered by a French squadron in 1794; received an addition to its population of 550 maroons, who were transported from Jamaica in 1800, and was made a British colony in 1808. The Isles de Losse were added to it in 1818. On the disbanding of a coloured regiment in the West Indies, 1,222 of the soldiers and their wives were settled here in 1819. The slaves captured by British cruisers have been sent here since 1807. Free Town was founded in 1790. Sir Charles Macarthy, the governor of the colony, was murdered by the Ashantees, at the time engaged in hostilities with the Fantee tribes, Jan. 21, 1824.

Signalmasters.—(See Beacon.

Sign-Meal.—The royal sign-manual came into use soon after the reign of Richard II., A.D. 1399, previous to which time the kings of England employed their seals to attest a document. In Germany, Maxi-
milian I. introduced it when he abolished the use of monograms in 1486. Henry the Eighth's hands became so swollen that he could not write, and he granted power to three of his ministers Aug. 31, 1546, to sign all the royal commissions and acts of grace, in his name. A like power to some of his council, to seal with his signet, and put his stamp to all acts to which the king's hand was required, was granted Oct. 16, 1546. During the illness of James I. a number of instruments were signed by his stamp, which was in the keeping of the earl of
Annandale, Oct. 28, 1824. The same plan was resorted to in the last illness of George IV., May 29, 1830.

Sikhs.—Nanak, their first teacher, and founder of their religion, died at Kartarpur, A.D. 1539. His descendants continued to occupy the office of guru, and to disseminate his doctrines, till one of their number, Har Govind, taking up the sword, transformed his disciples into a nation of warriors. He died in 1645. Govind, the tenth leader, who developed the martial character of his followers, entered upon an unsuccessful war with the Munggees, the Mogul emperor, and was murdered at Nadarah in 1708. After suffering much persecution, they figured prominently during the invasion of India by Nadir Shah, of Persia, in 1738. They captured Lahore in 1756; they erected several forts, and were successful in operations against the Afghans; but were defeated by Ahmad Shah, with a loss of 20,000 men, at the battle of Ghulam Ghara in 1762. Lahore, which they had lost, was recovered, coins were struck, and they divided themselves into twelve confederacies in 1764. A treaty between them and the British was formed, precluding Runjeet Singh from extending his territory southward, and inaugurating friendly relations, April 26, 1809. They took Moottan in June, 1818, and annexed Cashmere and Derah Ghazi Khan in 1819. Having defeated the Afghans at Naushabra, they sacked Peshawar, March 14, 1823. The tripartite treaty, which led to the Affghans war, was concluded June 26, 1838. War was declared with the English, Nov. 17, 1845. The battle of Moodkee, Lord Gough commanding the English, was fought Dec. 18, 1845. The battle of Sobraon, in which the Sikhs were defeated, closed the campaign, Feb. 10, 1846, and the treaty of Lahore was signed March 9, 1846. The murder of Mr. Agnew and Lieutenant Anderson, April 18, 1848, led to the second Sikh war, which was brought to a close by the battle of Goojerat, which lasted from six in the morning till four in the afternoon, the English being victorious, Feb. 21, 1849. This was followed by the annexation of the Punjab (q.v.), March 29, 1849.

Silesia (Prussia) became a province of Poland in the 10th century. It was divided and governed by three independent princes in 1163; invaded by the Mongolians in 1241; by John of Bohemia in 1325, and it placed itself under the protection of the king of Bohemia in 1449. Matthias Corvinus, king of Hungary, took possession of Silesia, and extended his protection to the descendants of John Huss, in 1475. It fell to the house of Austria in 1526. Baner, the Swedish general, entered it in 1639. After the battle of Parnitz, April 10, 1741, it submitted to Frederick II., who restored the greater portion to Maria Theresa by the treaty of Breslau, June 11, 1742. It was retaken by Frederick II. in 1757, and occupied by the Austrians, who compelled the Frussians to retire, in 1760. Austria refused the offer of Napoleon I. to receive it in exchange for her share of Poland in 1806. The fortresses having been all reduced, Jerome Bonaparte was made governor in 1806; and it was restored to Prussia by the treaty of Tilsit, July 7, 1807.

Silicium, or Silicon, the principal constituent of the earth's crust, was first separated from silica by Sir Humphrey Davy, A.D. 1823.

Silistria (Turkey) was unsuccessfully besieged by the Russians, A.D. 1773, and threatened by Marshal Romanzow in 1774. The Russians were defeated in an engagement near the town, and compelled to evacuate Bulgaria, Sept. 26, 1809. General Rosh failed to take it, after a siege of some months' duration, in 1828; but the Russians captured it June 30, 1829. It was invested by the Russians, March 28, 1854. After a brave defence, during which the fortifications were nearly destroyed, the Turks compelled them to raise the siege, June 15, 1854.

Silk was cultivated and manufactured by the Chinese as early as b.c. 2000. It was woven in the island of Cos by Pamphilia and her maids, b.c. 1000. Aristotle is the first Greek writer who mentions it, b.c. 350. Two Nestorian monks of Persia brought some eggs of the silk-worm from China to Constantinople, and taught the subjects of Justinian I. the art of rearing them, A.D. 551. The art was transferred to Sicily by Roger I. in 1146, and to Spain by the Saracens in 1253. Artisans were conveyed, in 1521, from Milan to Lyons, by Francis I., to commence the manufacture, and when the artificers of Antwerp took refuge in England in 1555, they introduced the art. James I. issued circular letters recommending the subject to persons of influence in 1605. The duty on raw and thrown silk was abolished by 8 & 9 Vict. c. 12 (May 8, 1845). By an act passed in 1542, a person whose wife wore a silk dress was bound to find a charger for government. Silk armour, proof against bullet or steel, was in vogue about 1660.

Silures, the early inhabitants of South Wales, Herefordshire, and Monmouthshire, were conquered by Ostourius Scapula, and their king, Caractacus, was treacherously given up to the Romans, A.D. 50.

Silver.—Abraham paid four hundred shekels of silver for the field of Ephron for a burying-place (Gen. xxiii. 16), b.c. 1860. Silver was introduced into Attica by Erichnthion, b.c. 1437. The Lydians, according to Herodotus, first used it for money, b.c. 560, and it was first coined at Rome b.c. 266. Mines were worked by the Egyptians in Nubia, producing upwards of 4,000 pounds weight annually, b.c. 117. In England it was first coined in the time of Cunobelin, about b.c. 44. It was wrought into threads and threads for mixing with stuffs by the Romans, about A.D. 170. The mines of Potosi were discovered in 1545; those of Kongsberg, in Norway, in 1623; those of
Sierra Almagrera, Spain, which have proved very productive, were opened in 1839; and the mines of Hiendelencia in 1843. A mass of the native metal, weighing 154 lb., was found in a Chilian mine in 1850.

**Silver Coin.**—Some fine specimens of Greek manufacture, bearing date B.C. 500, have been discovered. The Lydians used this for its purpose B.C. 560. It was first struck at Rome about B.C. 266, and in Britain in the time of Cunobelin, about B.C. 44. The Anglo-Saxon Sceatta dates from the 6th century, and the silver penny from 658.

**Simnel's Conspiracy.**—Lambert Simnel, a youth of about twelve years of age, having been induced to personate Edward, earl of Warwick, was crowned in Ireland as Edward VI., May 2, 1487. Troops were raised to support the pretender, who landed in Lancashire June 4. They were defeated by Henry VII. at Stoke, near Newark, June 16. Simnel himself, who was taken prisoner, was made a scullion in the king's kitchen, and afterwards a falconer.

**Simonians.**—Simon Magus wished to purchase the gift of the Holy Ghost from the apostles with money at Samaria, A.D. 35. He is said to have gone to Rome in 42, and his followers were called Simonians.

**Sion** had increased to such an extent in the church, that a council held at Rome in January, 1047, acknowledged that if the laws against it were strictly enforced, the church would be deprived of nearly all its pastors. A complete system of sale of ecclesiastical offices was organized by Boniface IX. in 1338. By 44 Geo. III. c. 43 (1803), a person obtaining orders by money forfeits ten pounds, and is incapable of preference for seven years; and the person giving such orders forfeits forty pounds.

**Simplon (Switzerland).**—Napoleon Bonaparte sent an agent to negotiate with the republic of the Monfs for the establishment of a communication by means of the Simplon pass with the Cis-alpine republic, A.D. 1797. The French effected the passage in 1800. Napoleon's engineers commenced the construction of the famous road across the Simplon in 1802; it was completed in 1807. The sovereignty was assumed by Napoleon I. when he incorporated the Valais republic with the French empire, Nov. 13, 1810. It was occupied by the allies in 1814.

**Sion.** (See **Felhusum**.)

**Sina (Arabia).**—The children of Israel arrived at this mount the third month after their flight from Egypt (Exod. xix. 1, 2), B.C. 1491, and Moses received the commandments here (Exod. xx.).

**Sinecurus** in the church are regulated by 5 & 6 Will. IV. c. 30 (Aug. 21, 1835), by 6 & 7 Will. IV. c. 67 (Aug. 13, 1836), and by 1 Vict. c. 71 (July 15, 1837).

**Singapore (Straits of Singapore).**—This island, being the chief portion of the settlement called Singapore, was purchased by the English A.D. 1519. Its chief town, of the same name, was taken by the king of Java A.D. 1525, and was placed under the provincial government of the Straits settlement in 1826. With Malacca and Prince of Wales Island, it was constituted a separate government by the East-India Company in 1851. The institution for instruction in English, Malay, and Tamil, was founded by Sir Stamford Raffles in 1823.

**SINGARA (Babylonia).**—At this town, the modern Sinjar, the Romans, under Constantius II., met with a signal defeat from the Persians, commanded by Sapor II., A.D. 345. The town was captured and the fortifications were dismantled by Sapor II. in 380.

**SINGIDENUM (Servia).**—This town, the site of which is occupied by the modern Belgrade, captured by the Huns A.D. 441, was destroyed by the Avars, and its inhabitants sold into slavery, in the 6th century.

**Sinking Fund,** for the gradual reduction of the national debt, a million sterling being devoted to that purpose, was proposed and carried by Pitt, March 29, 1786. As there was no surplus to meet the payment, it was determined to appropriate part of the fund to the public exigencies, March 3, 1813. The plan of keeping up a nominal fund was abandoned in 1824, and it was directed that one-fourth of the actual surplus revenue should in future be applied to the purpose, July 10, 1828.

**Singope (Asia Minor),** the modern Sinab, after various vicissitudes, was recovered by the Milesians, B.C. 632. The inhabitants assisted Xenophon and his force on their return from Persia, B.C. 400. It was unsuccessfully besieged by Mithridates IV. of Pontus, B.C. 220. Pharnaces I. captured it B.C. 183, when it was made the chief residence of the kings of Pontus. After the disaster of Mithridates the Great at Cyzicus, Lucullus obtained possession of the town, and put the Pontian garrison to the sword, B.C. 74. It formed part of the empire of Trebizond, A.D. 1204, was captured by the sultan Azeddin in 1214, and was taken by the Turks in the reign of Mohammed II. in 1461. It was treacherously bombarded, and the Turkish fleet destroyed by the Russians, Nov. 30, 1853.

**Sion College (London),** organized by a mercur of the city, after whom it was called Elson's Spital, or hospital, A.D. 1329, was dissolved in 1539. It was endowed as a collegiate establishment by Dr. Thomas White, vicar of St. Dunstan in the West, in 1623, built in 1624, incorporated in 1631, and received a charter from Charles II. in 1664.

**Sipontum, or Sirusa (Italy),** said to have been founded by Diomed, was captured by Alexander, king of Epirus, B.C. 330. A Roman colony was settled here B.C. 194, and it was deserted B.C. 184. Owing to the malaria from the marshes, the population was removed by Manfred, king of Naples, to a distance of a mile and a half, where he built the city of Manfredonia, at first called Novum Sipontum, A.D. 1250.

**Siris (Magni Greciae),** said to have been
slavery.

**SISTOVA (Turkey).—A treaty of peace between Russia and Turkey was signed here Aug. 4, 1791. It surrendered to the Russians, who reduced it to a heap of ruins, transporting the inhabitants 20,000 in number, across the Danube, A.D. 1512.**

**Six Acts.**—A name given to six measures for the prevention of seditious meetings and the regulation of political publications, passed A.D. 1819.

**Six Articles, or Bloody Statute, the name given to an act (31 Hen. VIII. c. 14) passed June 28, 1539. It was enacted for abolishing diversity of opinions in certain articles concerning the Christian religion.**

**The six articles enforced were transubstantiation, communion in one kind, celibacy of the clergy, vows of chastity, private masses, and auricular confession. All persons denying the first were to be punished as heretics, and those who denied any of the remaining five as felons. This statute was repealed in 1547.**

**Six Clerks, officers who received and filed proceedings in chancery, and performed other duties, had their number limited to six by 12 Rich. II. (1388). An order was made limiting the number of under-clerks in 1596. The office was altogether a sinecure in 1630. An order was made for dividing the fees between them and the under-clerks in 1668. The office was abolished by 5 Viet. c. 5 (Oct. 5, 1841).**

**Six-Mile Bridge (Clare).—An election riot took place here, when five persons were killed by the military and several wounded, July 22, 1852. The bills of indictment against the soldiers were ignored by the grand jury, Feb. 24, 1853.**

**Sixxers.**—God made coats of skins for Adam and Eve before they were expelled from Eden (Gen. iii. 21), n.c. 4003. They appear to have been an article of commerce in the time of Job, n.c. 2130 (Job ii. 4). According to Cæsar, the ancient Britons were clad in skins, n.c. 55.

**Sixth of June.**—The institution of slavery is referred to the “giants” who flourished in the antediluvian period. After the Deluge it was denounced upon Ham and Canaan by Noah, n.c. 2347 (Gen. ix. 25—27), and it appears to have prevailed universally in the time of Abraham, n.c. 1930. The Levitical laws contain many regulations for the condition of slaves, and draw a wide distinction between such as were native Jews and such as were acquired from other nations by purchase or conquest. By the Roman laws creditors exercised the right of ownership over their debtors, and Tacitus relates that the ancient German gamblers frequently staked their liberty, and became the slaves of the successful player. Constantine I., A.D. 334, passed a law prohibiting the separation of slave families, and made the murderer of a slave amenable to the same penalties as that of a free man. Slaves, or villeins, were very numerous in England during the Anglo-Saxon period, when they enjoyed some sort of legal protection. If a master struck out the eye or tooth of a slave, he recovered his freedom, and if he killed him, the murder was recompensed by a fine. Under the Normans the slaves exceeded the free tenants in number, and the
oppressive manner in which they were treated occasioned many of the insurrections of the period.

A.D. 1547. By 1 Edw. VI. c. 3, any person found wandering and unemployed is ordered to be branded with a V, and to be sold as a slave for two years. The first attempt at escape submits the offender to be branded with S, and to become a slave for life; and the second attempt is regarded as a capital felony.

1574. Queen Elizabeth abolishes servitude on her own estates.

1580. Personal slavery is finally abolished in England by 12 Charles II. c. 24.

1617. Slavery is adopted in Carolina.

1685. Louis XIV. publishes the Black Code, for the regulation of French negro slaves.

1705. Slavery is partially abolished in Prussia.

1716. Negro slavery exists in France.

1740. The legislature of South Carolina imposes a penalty of £100 on any one convicted of selling Negroes.

1766. Slavery is abolished in Denmark.

1772. Mr. Granville Sharp obtains a judgment in favour of the negro Somerset, in the English court of King's Bench. This decision establishes the great principle that a slave attains his freedom immediately he touches British soil.

1790. March 1. An act for the gradual extinction of slavery is adopted in Pennsylvania.

1791. Slavery is abolished in Bohemia.

1792. It is partially extinguished in Germany.

1784. The legislatures of New Jersey and Connecticut pass acts for the gradual abolition of slavery.

1785. Vassalage is abolished in Hungary.

1787. July 4. The territory to the north-west of the Ohio, comprising the states of Ohio, Indiana, Illinois, Michigan, Wisconsin, and Iowa, is declared free ground.

1792. The legislature of New York commence a series of acts for the gradual abolition of slavery.

1803. Indiana is purchased by the American government, and made a slave state.

1815. Personal slavery is abolished in Courland.

1820. The American congress adopts the Missouri Compromise (q. v.).

1822. May 31. Mr. Wilberforce presents a petition to the House of Commons in favour of the abolition of slavery.

1833. Aug. 28. Slavery is abolished throughout the British Empire by 5 & 6 Will IV. c. 73, which takes effect from Aug. 1, 1834. The slave-owners receive £20,000,000 as compensation.

1840. June. An international congress for considering the most effectual means of abolishing slavery meets at London.

1845. Texas is admitted into the United States as a slave state.

1848. Slavery is abolished in the French colonies.

1850. Aug. Henry Clay passes his "omnibus measure," by which California is admitted a free state of the American union, and the Fugitive Slave Bill is passed, for recovering runaway negroes escaped into free states.

1854. Nebraska and Kansas are erected into slave-holding territories by an act of the American congress, which ignores the Missouri compromise.

1861. Serfdom is abolished in Russia.

SLAVE TRADE.—Nimrod is usually regarded as the first dealer in slaves, and

Babylon as the earliest slave-market. A writer in the "Encyclopedia Britannica" observes (vol. xx. p. 319), "with other abominable customs, the traffic in men quickly spread from Chaldea into Egypt, Arabia, and over all the East; and by degrees found its way to every known region under heaven." The Greeks and Romans habitually sold their captives into slavery, and until comparatively recent times the same fate awaited all prisoners of war.

A.D. 651. The king of Ethiopia undertakes to send the Moslem emissaries of Egypt a large number of negro slaves annually.

1103. The exportation of English slaves to the continent is prohibited by a council held at Westminster.

1442. The Portuguese commence the transport of negro slaves from Africa.

1503. Dec. 20. Ferdinand and Isabella authorize the Spanish colonists of America to compel the native Indians to work for them.

1580. African slaves are first imported into Spanish America.

1652. Sir John Hawkins, the first English slave-dealer, commences a trade between Guinea and Hispaniola.

1690. African slaves are imported into Virginia by the Dutch.

1701. Foundation of the Assiento, or Guinea Company, for the African slave-trade. (See above.)

1712. The importation of slaves is prohibited in Massachusetts.

1762. Anthony Penzance, a Quaker, publishes a work on the abuses of the slave-trade.

1775. The first motion for abolishing the trade is made in the English parliament.

1788. May 19. Mr. Wilberforce delivers his first parliamentary speech against the slave-trade.

1794. Feb. 5. The French Convention abolishes the slave-trade, which is restored during the consulate.

1807. March 25. The British slave-trade is finally abolished by 47 Geo. III. c. 36, which takes effect from May 1, 1807.

1808. Jan. 1. The importation of Africans in America is prohibited by Congress.

1815. May 14. The trade in slaves is declared felony; punishable by fourteen years' transportation, or five years' imprisonment, by 51 Geo. III. c. 13.

1815. March 25. Napoleon I. abolishes the slave-trade in France, June 9. The representatives of Austria, France, Great Britain, Portugal, Prussia, Russia, Spain, and Sweden, at the congress of Vienna, record their desire to abolish the trade.

1829. The American congress makes it a capital piracy to engage in the foreign slave-trade.

1824. March 31. The conveyance of slaves from Africa is made piracy by 5 Geo. IV. c. 17.
1850. 

A.D. 1850. Nov. 6. A treaty for suppressing the trade is concluded with Sweden at Stockholm.

1853. Nov. 23. An abolition treaty is signed with Brazil at Rio Janeiro.

1854. A treaty for the abolition of the traffic is concluded with France.

1857. July 24. Denmark agrees to abolish the trade by the treaty of Copenhagen. Dec. 3. A similar treaty is concluded with Sardinia at Turin.

1858. June 28. Spain agrees to a total abolition of traffic, on her part, by a treaty signed at Madrid.

1859. Nov. 24. Tuscany unites with the other states in the efforts for its suppression by the treaty of Florence.

1863. March 15. The republic of Venezuela renounces the traffic by the treaty of Caracas. 

1860. Sept. 35. A treaty for the suppression of the trade is concluded with Bolivia at Sucre.

1841. Feb. 24. A similar treaty is concluded with the Mexican government at Mexico.

1843. Sept. 15. Emperor of Brazil publishes a decree making the importation of slaves piracy.

1845. The French government adopts a plan of free negro emigration, which afterwards becomes a cloak for the forcible abduction of the negroes.

1859. Jan. 6. The French government abandons the free emigration system. In consequence of the abuses revealed in the affair of the Charles et George. (See Portugal.)

Slaves to Vrifie.—This order was instituted in Germany A.D. 1662.

Slavonia (Austria).—After undergoing numerous vicissitudes, the Avars, who obtained possession of this country A.D. 568, were conquered by Charlemagne, and supplanted by a tribe of Slavonians from Dalmatia, about the end of the 8th century. Cyril and Methodius, from Byzantium, visited it as Christian missionaries in 864. A large portion of Slavonia was seized by the Hungarians about 1100. This led to a struggle with the Eastern empire; but, after a succession of fierce contests, it was finally ceded to the Hungarians in 1185. The Turks made themselves masters of it in 1526, and it was restored to Hungary by the peace of Carlowitz, January 26, 1699. The military frontier was separated from Slavonia in 1734. Slavonia was separated from Hungary in 1848.

Sleswig (Denmark).—This seaport town, capital of the duchy of the same name, was a place of some note as early as the 9th century, and remained the most important city in the kingdom for nearly six centuries. It was repeatedly pillaged and devastated in the 12th and 13th centuries, and suffered much from fire and violence in the 14th century. The sitting up of the mouth of the Sley in the beginning of the 15th century, combined with the rivalry of the Holsteiners, led to its gradual decline. It was taken by the Swedes Aug. 10, 1584. The cathedral, built in the 13th century, contains a screen before the altar, admirably carved in wood by Hans Brüggmann in 1521. Councils were held here in 1061 and 1222. (See Holstein.)

Sliding scales, regulating the duty payable upon corn, according to the average market price, was enacted by 9 Geo. IV. c. 60 (July 11, 1828). With a view to imposing a fixed duty, the secretary of state for foreign affairs in 1840 addressed a circular to the consuls residing at the principal Baltic ports, requesting to know what amount of grain could be exported. The document embodying the replies was laid before parliament in 1841. Alterations were made in the scale by 5 Vict. c. 14 (April 29, 1842). The sliding scale was abolished by 9 & 10 Vict. c. 22 (June 26, 1846).

Sligo (Ireland), chief town of the county of the same name, first received distinction by the building of its castle by Fitzgerald, earl of Kildare, A.D. 1242. Having been destroyed by the natives, it was rebuilt about 1300. A Dominican monastery was founded in 1252. Sligo was incorporated in 1613, and obtained a charter of the staple in 1621. The English army, commanded by Sir Charles Coote, captured it in the rebellion of 1641. It took the side of James II., was occupied for William III. by the Enniskilleners, taken by General Sarsfield, and ultimately surrendered to the earl of Granard in 1688.

Slings.—Among the Benjamites who went up to battle against Israel, there were 700 men, all left-handed, who could sling stones with great dexterity (Judg. v. 14, 15; 1 Sam. viii. 49). Pliny ascribes the invention to the Phoenicians, and Vegetius to the Balearic islanders. The Greeks had mounted slingers, and sometimes shot fire-balls instead of stones. There is reason to suppose that the ancient Britons used a sling made of wood. It was a formidable weapon in the hands of the Anglo-Saxons. The English slingers preceded the army and opened the battle.

Sloane Museum (London) was formed by the celebrated physician and naturalist Sir Hans Sloane, who was born at Killyleagh, in Ireland, April 16, 1660, and died at Chelsea, Jan. 13, 1753. He bequeathed his museum, which had cost him £50,000, to the public, on condition that £20,000 should be given to his family. The legacy and the conditions were accepted by 26 Geo. II. c. 22 (1753), and from this collection the British Museum had its origin.

Slyts (Holland).—Hardiecanute sailed from this place for England, to assume the crown, on the death of Harold I., A.D. 1040. Edward III. defeated the French in a naval engagement off the port, with a loss to them of 230 ships, 30,000 men, and two admirals, June 24, 1340.

Smallcald (League) was formed by the Protestant princes of Germany for mutual defence against the emperor Charles V. of Germany, Dec. 31, 1530. A threatened invasion of Hungary by the Turks, and the
apprehension that France and England would join the league, induced the emperor to sign a treaty, called the Peace of Nuremberg, in July, 1532, granting liberty of conscience to the Protestants.

Small-pox is supposed to have existed in China and Hindostan for some centuries previous to its introduction into Europe. The first authentic account of its appearance in the West is at the siege of Nicaea by the Abyssinians, a.d. 572, when it committed great ravages in the invading army. It soon spread to Alexandria, and was first described by Ahron, a physician of that city, in the beginning of the 7th century. The Saracens carried it into Europe in the 8th century. Inoculation for the small-pox was introduced into England by Lady Mary Wortley Montague about 1721. A small-pox hospital was established in London in 1746. Dr. Jenner discovered and introduced cow-pox as a preventative in 1798.

Smithfield (London) was celebrated as a horse and cattle fair as early as a.d. 1174. Sir William Walworth slew Wat Tyler on this spot, June 15, 1381. A grand tournament was held here by Richard II. on Sunday after Michaelmas, 1390, and lasted four days. Here Margery Jourdain was burnt in 1441, and John Rogers, the first martyr in Queen Mary's reign, Feb. 4, 1555. Smithfield was paved by order of James I., at a cost of £1,600, in 1614. A turbulent meeting, presided over by Henry Hunt, was held here July 22, 1819. Great military parades were once held here, and 6,000 special constables sworn in to preserve the peace of the city on this occasion. Bartholomew fair, once one of the leading fairs in England, was held here till 1852. An act for closing the cattle-market (14 & 15 Vict. c. 61) was passed Aug. 1, 1851, and it was formally closed June 11, 1855.

Smoke nuisance.—An act of parliament, 16 & 17 Vict. c. 128, was passed Aug. 20, 1853, to abate the nuisance arising from the smoke of furnaces in the metropolis, and from steam-vessels above London bridge. It was amended by 19 & 20 Vict. c. 107 (July 1857), which came into operation Jan. 1, 1858. The act was extended to Scotland by 20 & 21 Vict. c. 73 (Aug. 25, 1857), which came into operation Aug. 1, 1858.

Smolensk (Russia), the capital of the government of the same name, is mentioned in Russian annals as early as A.D. 879. It subsequently became an independent principality, and was ravaged by the plague in the 12th century, when 43,000 of its inhabitants perished. The same dreadful scourge destroyed nearly the whole of the population in the 14th century. It was taken by the Lithuanians in 1413, and was afterwards alternately in the hands of the Poles and the Russians till finally taken by the latter in 1654, and was formally ceded to them by the Poles by the treaties of 1667 and 1866. Smolensko was attacked by the French under Napoleon I. Aug. 16 and 17, 1812. After a most sanguinary contest, in which the French lost 15,000 and the Russians 10,000 men, the latter remained masters of the city. The French, who returned to the attack on the 18th, found the city deserted and in ruins. The Russian general, Barclay de Tolly, was deprived of his command for having given up this holy city, as the Russians called it, without a pitched battle. It was occupied by the French, on their disastrous retreat from Moscow, Nov. 9 to 17, 1812. On leaving they blew up part of the ramparts. Smolensk is the see of an archbishop, and contains two cathedrals, built in the 12th century, one of which is classed among the most celebrated ecclesiastical edifices in the north of Europe.

Smugglers.—Numerous statutes were formerly passed against smugglers. By 19 Geo. II. c. 34 (1736), known as the Smugglers Act, forcible acts of smuggling were made felony without benefit of clergy. All previous acts were repealed, and the laws on the subject consolidated by 6 Geo. IV. c. 108 (1826). This and several subsequent acts were superseded by 3 & 4 Will. IV. c. 53 (1834), and 4 & 5 Will. IV. c. 13 (1835).

 Smyrna (Turkey), according to Herodotus, was first colonized by the Æolians, who held it till B.C. 683, when, through the intrigues of some exiles from Colophon, it was transferred to the Ionian league, of which it formed the thirteenth city. It was taken and destroyed by Sadyattes, king of Lydia, about B.C. 627, and remained in ruins for nearly 400 years, when Antigonus founded a new city near the site of the old one, which became, according to Strabo, the finest in Asia. It was one of the seven churches mentioned in the Apocalypse. Polycarp, a disciple of the apostle John, who suffered martyrdom here about A.D. 167, is said to have been the first bishop. The city, destroyed by an earthquake A.D. 178, was rebuilt by the emperor Marcus Aurelius. Smyrna fell into the hands of a Turkish pirate at the end of the 11th century, and was almost destroyed by a Greek fleet. Having been rebuilt by the emperor Comnenus, it was soon afterwards taken by the Franks, and held till 1365. Tamerlane took it in 1402, and erected within its walls a tower constructed of stones and the heads of his enemies. It was captured by the Turks in 1424. A massacre of several thousand Greek inhabitants of the town by the Mohammedans took place June 15, 1821, and another massacre of above 1,000 Christians occurred Nov. 2, 1826, and following days. A fire which destroyed 12,000 houses took place in July, 1841; and an earthquake caused much damage in 1846.

Sneezing has been considered as an omen from the most ancient times. The custom of blessing persons when they sneeze is sup-
posed to have been derived from the ancients, though many writers affirm that it originated A.D. 750, under Pope Gregory the Great, when a pestilence occurred at Rome, in which those who sneezed died, whereupon the pope appointed a form of prayer to be said to persons sneezing.

**Smuf-Taking.**—The custom of taking snuff appears to have originated in Ireland soon after the introduction of tobacco into this country, about A.D. 1563. Howell (born about 1596, died 1650) says of the custom in England, ""The servant maid upon the combing cock, and the swan under the plough-share, when they are tired with labour, take out their boxes of snuffin and draw it into their nostrils with a quill."

**Soane Museum (Loudon) was formed by Sir John Soane, the architect, who was born at Reading, Sept. 10, 1753, and died at his house in Lincoln's-Inn Fields, Jan. 20, 1837. He obtained an act of parliament in 1833, vesting his museum in trustees for the use of the public.

**Soap.**—The first express mention of soap occurs in Pliny (born A.D. 23, died A.D. 79), who speaks of it as an invention of the Gauls. An excise duty on soap of 1d. per pound was first imposed in Great Britain in 1711. It was raised to 14d. in 1713, and in 1732 hard and soft soap were first distinguished, the former being rated at 24d. and the latter at 14d. per pound. The duty on hard soap was increased to 3d. in 1816. It was reduced to 14d. per pound for hard, and 1d. per pound for soft, May 31, 1833, and was totally abolished by 18 & 17 Vict. c. 39 (July 8, 1853).

**Sobraon (Battle), fought on the banks of the Sutlej, near the village of Sobraon, between the Sikhs and the British, under Lord Gough, Feb. 10, 1846. The Sikhs occupied an intrenched camp, defended by 30,000 of their best troops and 130 pieces of artillery. They were attacked by the British with 100 guns, and after a most obstinate contest were defeated with a loss of 10,000 men. The British had 920 killed and 2,003 wounded.

**Socialists, a name given to the followers of Robert Owen, the founder of socialism, or general community of goods. Robert Owen was born at Newtown, in Montgomeryshire, A.D. 1771. He married the daughter of David Dale, a manufacturer of Glasgow, in 1801, and soon afterwards undertook the management of the extensive manufactury of New Lanark, on the Clyde. Here he amassed a large fortune, and first developed his theory of socialism in his "Book of the New Moral World," published subsequently to 1812. He introduced the system into his establishment at New Lanark. He relinquished his connection with this place in 1823, and proceeded to North America, where he founded the settlement of New Harmony, in Indiana, in 1824. Here he envaooured to carry out his system; but it proved a failure, and he returned to England in 1827. On the invitation of the Mexican government, he went to Mexico in 1828, in order to carry out his scheme, but nothing was done. He died in 1858.

**Social Science. (See National Association for the Promotion of Social Science.)**

**Social War between the Athenians and some of her principal confederates, who wished to throw off her yoke, began with the revolt of Chios, Rhodes, and Byzantium, about midsummer, B.C. 357. Chares and Chabrias, the Athenian commanders, laid siege to Chios. The attack on the town was defeated at the end of B.C. 357, and the allies became masters of the sea. With a fleet of 100 sail they ravaged Lemnos and Imbrus, and laid siege to Samos B.C. 356. A report having reached Athens that the Persian court was fitting out a fleet of 300 galleys to cooperate with the confederates, the Athenians were induced to grant a peace, acknowledging the independence of the allies, about midsummer, B.C. 355.

**Social War (Roman history).—M. Livius Drusus proposed a law for investing the Italian allies with the privileges of Roman citizens; but it was strongly opposed by the senators, the knights, and the people, and Drusus was assassinated B.C. 92. The Italians then entered into a secret confed- eracy, which was first discovered at Ascelum, and Q. Servilius was sent to punish the offenders; but he was massacred with all the other Roman citizens in the town, B.C. 91. The Marsi, the Paeligni, the Samnites, the Lucani, and almost every nation in Italy, except the Latins, Tuscanis, and Umbrians, now revolted, and established a republic in opposition to that of Rome. In the first campaign the Romans met with some severe losses. Nola was taken by the Samnites; the consul P. Rutilius and his lieutenant Q. Capio, were defeated and slain, and many cities were captured. On the other hand, Sylla and Marius obtained a great victory over the Marsi, and L. Caesar defeated the Samnites. Towards the close of B.C. 91, the Umbri and the Tuscanis showed signs of joining the allies, but this was averted by the Romans passing a law admitting all the Italians, who had continued faithful to Rome, to the rights of citizenship. In the second campaign, B.C. 90, the Romans defeated the Marsi, and induced them, together with the Vestini, Paeligni, and Marrucini, to make a separate peace. Sylla, the Roman general, destroyed the town of Stalit, defeated a large army near Nola, reduced the Hirpini to subjection, and defeated the Samnites. The Romans were now induced, hearing that Mithridates, king of Pontus, was going to aid the allies, to adopt measures of conciliation, and one state after another submitted and received the gift of Roman citizenship. After the close of this campaign, the war dwindled away, until it was brought to a conclusion, B.C. 88, by the remainder of the Italian states receiving the concessions they
required. During this war 300,000 men were slain.

SOC.

SOCIETIES.—By 17 & 18 Vict. c. 112 (Aug.
1854) provisions were made "to afford
greater facilities for the establishment of
institutions for the promotion of literature
and science and the fine arts, and to provide
for their better regulation." The following
is a list of the principal institutions of the
kind in Great Britain and Ireland. Many of
the most important are noticed under their
respective titles:

Abbott's Club A.D.
1834
Aberdeen Society 1788
Aberdeen Association 1788
Anglo-Scottish Society 1847
Antiquarian Society 1751
Archæological Association 1843
Archæological Institute 1833
Architectural Publication Society 1848
Architectural Institution 1831
Arundel Society 1849
Association of Brompton and
Sandon Park 1829
Bannatyne Club 1826
Belfast Botanical Institute 1835
Belfast Antiquarian Society 1789
Belfast Historical and Literary
Society 1824
British and Foreign Bible Society 1804
British Association 1831
Calvin Translation Society 1843
Cambrian Antiquarian Society 1846
Cambrian Archæological Association 1843
Cambridge Antiquarian Society 1849
Cambridge Philosophical Society 1819
Camden Society 1828
Cavendish Society 1845
Celtic Society 1847
Chemical Society 1841
Chetham Society 1829
Decorative Art Society 1843
Dilettanti Society 1734
Dublin Geological Society 1825
Dublin Micropædochical Society 1846
Dublin Natural History Society 1834
Dublin University Philosophical Society 1831
Ecclesiastical Society 1839
Edinburgh Archæological Society 1836
Edinburgh Geographical Society 1834
Edinburgh Medical Society 1734
Edinburgh Royal Physical Society 1771
Eton College Society 1733
Electrical Society 1837
Entomological Society 1834
Epidemiological Society 1850
Ethnological Society 1843
Gaelic Society 1830
Geographical Society 1830
Geological Society 1837
Geological Society of the West Riding 1833
Glasmohr Philosophical Society 1807
Hahnemann Medical Society 1850
Hakluyt Society 1846
Harley Society 1834
Harvard Society, Edinburgh 1792
Homeopathic Association 1845
Horticultural Society 1814
Hull Literary and Philosophical Society 1829
Hunterian Medical Society, Edinburgh 1824
Incorporated Law Society 1827
Institute of British Architects 1834
Institute of Civil Engineers 1828
Irish Archæological Society 1840
Juridical Society, Edinburgh 1773
Law Society 1827
Leeds Literary and Philosophical Society 1835
Linnean Society 1788
Liverpool Literary and Philosophical Society 1812
Liverpool Polytechnic Society 1836
London Institution 1800
Maitland Club 1828

758

Manchester Geological Society 1838
Manchester Literary and Philosophical Society 1824
Manchester Natural History Society 1821
Medical Society 1824
Medico-Chirurgical Society 1805
Meteorological Society 1851
Microscopical Society 1859
National School Society 1833
Naval and Military Bible Society 1820
Newcastle Antiquarian Society 1813
Numismatic Society 1836
Oxford Architectural Society 1837
Paleontographical Society 1847
Palestine Association 1805
Parker Society 1840
Pathological Society 1849
Pentang, Natural History, and Antiquarian
Society 1839
Percy Society 1840
Perth Literary and Antiquarian Society 1824
Pharmaceutical Society 1834
Philibiblon Society 1854
Philological Society 1849
Philomathic Institution 1849
Physiological Society 1810
Phonetic Society 1843
Photographic Society 1853
Physico-Medical Society 1771
Physiological Institution 1811
Pomological Society 1834
Provincial Medical Association 1833
Ray Society 1844
Religious and Literary Society 1824
Rochester Club 1832
Royal Academy of Arts 1768
Royal Academy of Music 1824
Royal Agricultural Society 1806
Royal Asiatic Society 1833
Royal Astronomical Society 1829
Royal Botanical Society 1839
Royal Chemical Society 1835
Royal College of Physicians, 1618
Royal College of Surgeons 1800
Royal Cornwall Polytechnic Society 1833
Royal Geographical Society, Cornwall 1814
Royal Institution 1809
Royal Irish Academy 1789
Royal Literary and Philosophical Society of Ireland 1823
Royal Society 1869
Royal Society of Literature 1823
Russell Institution 1808
Scottish Philosophical Society 1816
Shakespeare Society 1840
Sheffield Literary and Philosophical Society 1822
Shropshire and North Wales Natural History
and Antiquarian Society 1835
Smeatonian Society of Civil Engineers 1771
Society for the Diffusion of Useful Knowledge 1823
Society for Promoting Christian Knowledge 1818
Society for the Propagation of the Gospel in
Foreign Parts 1701
Society for the Reformation of Manners 1690
Society for the Support and Encouragement of
Sunday Schools 1728
Society of Antiquaries of Scotland 1770
Society of Arts 1733
Spalding Club 1839
Statistical Society 1834
Surtess Society 1834
Sussex Archæological Society 1846
Sydney University Society 1810
Sydenham Society 1843
Syro-Egyptian Society 1844
United Service Institution 1830
Wesleyan Methodist Church 1839
Wernerian Society 1838
Whitby Literary and Philosophical Society 1822
Worcestershire Natural History Society 1833
Yorkshire Philosophical Society 1833
Zoological Society 1828

(See Missionary Societies.)

SOCIETY ISLANDS (Pacific Ocean).—This
group of islands, discovered by the Spanish navigator Pedro Fernandez di Quiros, a.d. 1606, remained unknown to the west of the world till visited in 1767 by Captain Wallis, who, thinking himself the first discoverer, gave Tahiti the name of King George Island. Captain Cook visited the group in 1769, and after surveying the chief island, and discovering several others, he gave to the whole the name of Society Islands, in honour of the Royal Society of London. Cook again visited them in 1777. Idolatry was abolished in Tahiti in 1815, and in the other islands a year or two afterwards. Missionaries were established in these islands in 1817, and they have been very successful in educating the people, who are now all professing Christians.

Society for Promoting Christian Knowledge was founded a.d. 1698. Dr. Thomas Bray, who died in 1730, was instrumental in establishing this society.

Socinians, a sect of anti-Trinitarians, founded by Laelius Socinus (born at Siena, in Tuscany, in 1525, and died at Zurich in 1562) and his nephew Faustus Socinus (born at Siena in 1539, and died at a village near Cracow in 1604). The chief school of the Socinians was at Rakow, in Poland, where they obtained the grant of a settlement. All their first books were published here. In consequence of the intemperate zeal against popery, of some Unitarian students in this city, a law was passed in Warsaw in 1638, enacting that the academy of Rakow should be destroyed, its professors banished, the printing-house of the Socinians destroyed, and their churches shut up.

Socontusco (Mexico), formerly belonging to Guatemala, was, with Chiapas, the department in which it is situated, taken by Mexico a.d. 1843.

Socorea (Indian Ocean).—This island was known to Ptolemy, who notices it under the name of Dioscorid Insula, about the middle of the 2nd century. It was visited by the Portuguese Fernandez Perara, a.d. 1504, and was taken possession of by Albuquerque in 1507. The Portuguese are supposed to have evacuated the island before the close of the 16th century, when it came under the sway of the sultan of Kisseen. It remained undisturbed till 1801, when the Wahabees made a descent on the northern coast, and held waste of it, together with the town of Tamardia. Socorea still belongs to the sultan of Kisseen, but the government is chiefly delegated to one of the principal inhabitants.

Sodium.—This metal was discovered by Sir Humphry Davy a.d. 1807.

Sodom and Gomorrah (Palestine).—These cities were destroyed; on account of their wickedness, by fire from heaven (Gen. xix. 24, 25), B.C. 1997. The only persons who escaped were Lot and his two daughters.

Sodor and Man (See of).—This diocese originally comprised the Åboda, or Western Isles, and the Isle of Man, and is said to have been founded by Amphibalus, who sought an asylum in the Isle of Man from Diocletian's persecution about a.d. 300. Other authorities state that Germanus was appointed the first bishop of the Isles by St. Patrick in 447.

Soest (Prussia), one of the Hanseatic towns, was incorporated with the county of Mark a.d. 1449. The cathedral was erected in the 11th and 12th centuries. The Wiesen-Kirche, founded in 1314, was completed in the 16th century, and restored in 1850. Sir Peter Lely, painter of the beauties of the court of Charles II., now in Hampton Court, was born here in 1617.

Sopharides Dynasty, so called from the occupation of its founder, a brazier, supplanted that of the Taherites, in Persia, a.d. 872. It came to an end in 902.

Sogdiana (Asia).—This ancient country, between the rivers Jaxartes and Oxus, nearly corresponded with the modern Bokhara, in Turkestan, and was the residence of Alexander the Great B.C. 329. The Sogdians revolted the same year, and suddenly attacked the fortresses occupied by the Macedonians, and massacred the garrisons. These fortresses were speedily retaken with great slaughter, and the revolt suppressed. They again revolted B.C. 328, and intrenched themselves in their mountain fastnesses. Alexander besieged and captured the strongest of these, known as the Sogdian Rock, defended by 30,000 men. Among the prisoners was the king of Bactria's daughter, whom he afterwards married.

Soissons (France) is mentioned by Caesar, under the name of Novidum, as the capital of the Suessones. Under the Romans it took the name of Augusta Suessionum. The Roman general Syagrius was defeated here by Clovis, a.d. 486, when it became the capital of the Franks, and afterwards of the kingdom of Soissons in the 6th and 7th centuries. Here Childeric III., the last Merovingian king, was deposed, and Pepin the Short, the first Carolingian king, installed in 752. Charles the Simple was defeated here by the troops of his rival Robert, in 922. It was taken by the faction of the Armagnacs, who committed dreadful excesses in 1415, and suffered much in the religious wars of the 16th century, and in the troubles during the minority of Louis XIII. (1610 to 1643). A congress of the representatives of France, Spain, Germany, by Great Britain, and the Northern Powers, was opened here June 19, 1778. Soissons was stormed by the Russians Feb. 13, 1814, but was evacuated from strategical motives the same day, and re-occupied by the French. It capitulated to the allies March 3, 1814, was unsuccessfully assaulted by the French March 5, and was occupied by Napoleon I. March 11. Councils were held here March 2, 744; April 26, 863; in 861, 862; Aug. 18, 866; in 941; about 1082; Jan. 6, 1115; in 1122; June 10, 1155; in March, 1201; and July 11, 1456.

Solar System, discovered and taught by Pythagoras of Samos, who flourished from
about B.C. 586 to B.C. 506, was revived by Co-
permitus in his great work published at Nu-
remberg a.d. 1543. Its truth was demonstrated
by Newton in his “Principia,” published in
1687.

Soldiers’ Daughters’ Home (London).—
In August, 1857, the central association in
aid of the wives and families of soldiers on
active service during the Crimean war gave
their surplus funds, amounting to nearly
£13,000, to this institution, distinguishing
the gift as the Pows’ Endowment Fund, in
recognition of the services of their secretary,
Major Powys. The institution, erected at
Hampstead, was opened by Prince Albert
in 1859.

Soldin (Prussia), supposed to have
been founded a.d. 1212, was formerly
the capital of Neumark, a division of
Brandenburg.

Solebay, or Southwold Bay (Sea-
fight).—A naval engagement took place in
this bay on the coast of Suffolk, between the
Dutch fleet and the combined English and
French fleets, May 29, 1672. The Dutch were
defeated, after a most sanguinary struggle, in
which the gallant earl of Sandwich, who com-
manded the English van, was blown up.

Solemn League and Covenant. (See
Covenanter.)

Soleure, or Solothurn (Switzerland),
the capital of a canton of the same name,
was anciently called Castrum Solodurensis,
and was originally a Roman station. The
town was besieged for ten weeks without
success by Duke Leopold, a.d. 1318, and
was admitted into the Helvetic confedera-
y in 1481. The cathedral, reckoned the finest
in Switzerland, commenced in 1762, was
finished in 1772, at a cost of £50,000.

Sombrero (Battle).—At this village of
Lombardy, the emperor of the French and
the king of Sardinia gained a victory over
the emperor of Austria, June 24, 1859. It
was followed by the armistice of Villa Franca
which led to the termination of the war.

Solicitor-General.—The earliest holder
of the office of king’s solicitor was Richard
Fowler, whose patent is dated March 12, 1461.

Solifidians.—This name was given to the
Antinomians, a sect founded by John Agri-
cola, of Eisleben, between a.d. 1538 and
1545. They held that faith alone is sufficient
for salvation.

Solitaries, a denomination of the nuns
of St. Peter of Alcantara, instituted by
Cardinal Barberini at Farsa, in Italy,
a.d. 1676. The design of the institute was
that the inmates should imitate the severe
penitent life of St. Peter of Alcantara, keep
continual silence, and employ their time
solely in spiritual exercises.

Solomon’s Islands (Pacific), also called
New Georgia, were discovered by the Spa-
niard Mendana, a.d. 1567. They were
visited by Bougainville in 1768, by Surville
in 1769, and by Lieutenant Shortland, of the
British navy, in 1785.

Solomon’s Temple (Jerusalem) was com-
cmenced in May, b.c. 1011, and dedicated
b.c. 1004. It was plundered by Shishak,
knight of Egypt, b.c. 970. A collection of
silver for its restoration was made by Joash,
knight of Judah, about b.c. 556. Ahaz, king
of Judah, pillaged it to hire the assistance
of the king of Assyria, profaned it by the eec-
ration of a heathen altar, and ultimately
closed it entirely, b.c. 742—726. Hezekiah,
his son, repaired and re-opened it b.c. 726—
698. Manasseh practised heathen rites
within its precincts, for which he was
caused away captive by the king of Babylon,
b.c. 677. It was repaired and purified by
Josiah, b.c. 624. Nebuchadnezzar, king of
Babylon, despoiled it of part of its sacred
vessels, b.c. 606, of another portion b.c. 599;
and finally besieging Jerusalem, the re-
mainder of the treasures of the temple were
carried off, and the edifice itself destroyed
by fire, b.c. 588.

Solway Moss (Battle).—The Scotch,
to the number of 10,000, were routed at this
place, in Cumberland, by a small body of
English horse, not more than 500 in number,
under Daun and Wetmar, May 23, 1752.
Above 1,000 prisoners were taken.

Sombrero (Battle).—The Spaniards, under
Morillo, were defeated at this town of Vene-
zuela, South America, by the Venezuelans,
under Bolivar, Feb. 16, 1818.

Sombrero (West Indies).—Robert Je-
ffery, a seaman on board the Ulysses, as a
punishment for several acts of peculation,
was put on shore on this island, Dec. 13,
1807. Captain W. Lake, by whose orders
this was done, was tried by court-martial
at Plymouth, and dismissed the navy, Feb.
10, 1810. Jeffery was rescued by an Ame-
rican ship, and landed in America.

Somerset House (London).—Old Som-
erset House, built by the protector Somerset,
uncle of Edward VI., was commenced in
March, 1547, and was the first specimen of
Italian architecture erected in this country.
The architect is supposed to have been John
of Padua, an Italian, who was appointed
“devisor of his majesty’s buildings” in 1544.
On the execution of Somerset, Jan. 22,
1552, Somerset House came into possession
of the crown; and Edward VI. assigned it
to the princess Elizabeth for her use when
she visited the court. In the reign of
James I. it became the residence of his
queen Anne of Denmark, and he com-
manded it to be called Denmark House in
1616. Charles I. assigned it to his queen,
Henrietta Maria, in 1626; and a chapel,
designed by Inigo Jones, was built within
the walls in 1632, for the free use of the
Roman Catholic religion. On the death of
Charles II. in 1665, it became the residence
of Catherine of Bragança; and on her
return to Portugal in 1692, it was inhabited
by some of the nobility and poorer persons
about the court. Buckingham House was
settled on Queen Charlotte, in lieu of So-
merset House, April 10, 1775. The old
palace was then demolished to make way for
the present edifice, which was designed by Sir William Chambers, and built between the years 1776 and 1786. The whole of the east wing, left incomplete by Sir W. Chambers, was finished from designs by Sir R. Smirke in 1829, and now forms King's College.

**Somers' Islands. (See Bermuda.)**

**Somma (Italy).**—Hannibal gained his first victory over the Romans on Italian ground, near this town, on the Ticino, B.C. 218. Scipio, who commanded the latter, was wounded.

**Somershausen (Battle).**—The French, under Turenne, and the Swedes, under Wrangel, defeated Maximilian, elector of Bavaria, at this place, near Augsburg, May 7, 1648.

**Somnambulism.**—Natural and artificial somnambulism was known to the ancients. Of the former, Aristotle says, "there are individuals who rise in their sleep and walk about, seeing as clear as those who are awake." Artificial somnambulism is said to have been practised by the Brahmins and Faquirs of India at a very early period. Magnetic somnambulism was discovered in France by the Marquis de Puysegur, May 8, 1794, though it is asserted that Mesmer was acquainted with the phenomena, and that they were witnessed by his disciples in Paris in 1778. A well-authenticated case of a lady, aged 64, who had an ulcerated cancer of the right breast, of several years' standing, removed whilst in a state of magnetic somnambulism, was communicated to the French Academy April 16, 1829.

**Somnauth Gates** were carried away from a Hindoo temple as a trophy by Sultan Mahmoud, the Mohammedan conqueror of India, on his invasion of Goojerat, about A.D. 1025, and were subsequently placed over his tomb, in the village of Rossa, near Ghuznee. On the taking of Ghuznee by the British, under General Nott, Sept. 6, 1842, the gates were brought away from the tomb by order of Lord Ellenborough, and were conducted with great pomp across the whole of India, and restored to Goojerat.

**Somno (Battle).**—The Milanese, commanded by Francesco Sforza, defeated the Venetians near this town in Italy, May 17, 1491.

**Sonderbund.** A name given to the league formed A.D. 1846, by the seven Roman Catholic cantons of Switzerland against the Federal diet, which had decreed the expulsion of the Jesuits. The diet voted that the Sonderbund was illegal, July 20, 1847. Freiburg, their stronghold, was captured Nov. 13, Lucerne Nov. 24, and the Sonderbund was dissolved.

**Sonnet.**—The invention of the regular sonnet of fourteen lines has been ascribed to Guido d'Arezzo, the inventor of a musical scale, who flourished about A.D. 1024. Francesco Petrarch (1304—1370) first raised this form of poetry into repute, though Hallam denies his right to be regarded as its inventor. Shake-speare's sonnets were published in 1609, and Milton's about 1650.

**Sonnetes.** The name given to the orthodox Mohammedans, who now possess the Turkish empire, as distinguished from the Shiiites (q.v.), or followers of the Caliph Ali, who was killed by three fanatics, a.d. 660.

**Sooloo Islands (East-Indian Archipelago).**—This group derives its name from Sooloo, the principal island. The early history of the Sooloos is involved in obscurity. They assert that they once formed a part of an ancient Borean empire founded by the Chinese; but the inhabitants of Magindana, one of the Philippine islands, contend that they were formerly subject to them. From the time the Spaniards discovered the Philip-pines (A.D. 1521), they have been frequently engaged in warfare with the Sooloos. The sultan of Sooloo ceded Balambangan, one of the group, to the British, in 1762. His subjects murdered the garrison and burned the settlement in 1775. It was re-established in 1803, and abandoned in the following year. The sultan and his chiefs were formerly notorious for their piracy, and kept up a large fleet for that purpose. Their power was destroyed by the Spaniards in 1851.

**Sophia, St. (Constantinople).**—A church dedicated by Constantine I. to St. Sophia, for the Eternal Wisdom, was destroyed by fire in a popular tumult, A.D. 532. Justinian I. laid the foundation of a new edifice in the same year. The builders were Anthemius of Tralles and Isidore of Miletus. Ten thousand workmen were employed in its erection. Its form is that of a Greek cross inscribed in a quadrangle, two hundred and forty-three feet in breadth, by two hundred and sixty-nine in length. The dome, lighted by four-and-twenty windows, has a diameter of one hundred and fifteen feet, and rises a hundred and eighty feet above the pavement. The walls are of brick, with a crust of marble. Eight columns of porphyry from the temple of the sun, and eight of green marble presented by the city of Ephesus, added to its splendours; and at the lowest computation the whole cost is estimated at a million sterling. It was consecrated in 537. An earthquake having in 558 overthrown the eastern part of the dome, it was restored, and the church re-dedicated by Justinian I. in 563. It was fortified with new buttresses by Andronicus the elder in 1317, and was converted into a mosque by Mohammed II. in 1453.

**Sophists,** a class of men who went about Greece discoursing and debating, and sometimes educating the sons of noble families. Socrates (put to death, B.C. 396, in the 70th year of his age) was their great opponent. Protagoras (born about B.C. 470) is said to have been the first who adopted the name of sophist.

**Sopron, or Soprony.** (See Ordenburg, or Ordenburg.)

**Sorbonne (Paris).**—This celebrated college was founded by Robert of Sorbonne,
confessor and chaplain to Louis IX., for the use of poor students in divinity, a.d. 1252. Cardinal Richelieu rebuilt it in 1629, and added a chapel, which was begun in 1635, but not completed till 1659. Printing was first introduced into France, at Paris, by the doctors of the Sorbonne in 1469. They supported the faction of the Guises in the religious wars of the 16th century, and strongly opposed the Reformation. The college was suppressed April 5, 1792.

SORCERERS.—The earliest case of sorcery in England of which any authentic details exist, is that of John of Nottingham, a sorcerer of Coventry, who was tried for an attempt to compass the death of Edward II. by sorcery, a.d. 1324. Sorcery was frequently used as an instrument of political intrigue in the 14th and 15th centuries. Pope Boniface VIII. was accused of sorcery by the agents of Philip IV. of France, in 1303, and the king called a council at Paris to hear witnesses and pronounce judgment. But the pope declined to acknowledge the council, and, it is said, died from the effects of the charge in the same year. Laws (33 Hen. VIII. c. 8, 1541, and 1 James I. c. 12, 1609) enacted against sorcerers in England were repealed by 9 Geo. II. c. 5 (1735).

SOUTHAN, or Soudan (Africa).—BELED EL SUDAN, "the land of the blacks," also called Nigrita, is the central region of the continent, unknown except from the descriptions of Arabian geographers, and of Leo Africanus, till entered from the west by Houghton, a.d. 1790. He was killed in 1791. Mungo Park added much to the knowledge of the country, having traversed the northwestern regions in 1780 and 1797. Denham and Clapperton explored the central parts between 1822 and 1826; Callie, the southwestern regions in 1828; and Richard Lander the valley of the Quarra in 1830.

SOULAGES COLLECTION of Italian art and workmanship, formed by M. Soulages, of Toulouse, in France, having been purchased by an Englishman, formed part of the Art Treasures Exhibition at Manchester, a.d. 1857.

SOUND, a narrow strait, forming one of the communications between the Cattegat and the Baltic, and separating the Danish island of Zealand from the coast of Sweden, was forced by the British fleet, under the admirals Parker and Nelson, March 30, 1801, and again under Gambier, in August, 1807.

SOUND DUES, levied by the king of Denmark on all merchant vessels passing through the Sound, were first imposed a.d. 1348, for lighting the Sound and protecting vessels from pirates. Sweden was exempted from the toll by the treaty of 1644; but this privilege was withdrawn in 1720. By a treaty between Denmark, Great Britain, Austria, Belgium, France, Hanover, Meklenburg, Oldenburg, the Netherlands, Prussia, Russia, Sweden and Norway, and the Hanseatic cities, Bremen, Lübeck, and Hamburg, the Sound duties were abolished March 14, 1857, and a compensation of £3,386,258, of which Great Britain's share was £1,125,206, granted to Denmark in lieu, on condition of maintaining the lighthouses and superintending the pilotage.

SOUNDINGS AT SEA.—Peter the Great of Russia constructed a deep-sea sounding apparatus, and was the first to attempt to obtain specimens of the bottom of the sea. Soundings taken by Sir J. C. Ross in the Atlantic, near St. Helena, Jan. 3, 1840, showed a depth of 2,425 fathoms, and he failed to obtain soundings 486 miles from the island of Trinidad, at 4,600 fathoms, or 27,600 feet, June 3, 1840. Lieutenant Dayman, of H. M. S. Cyclops, sounded the Atlantic between Ireland and Newfoundland in 1857. The greatest depth was about 2,500 fathoms, and the pressure at that depth nearly three tons to the square inch.

SOUTHAMPTON (Hampshire), forming a county of itself, anciently called Hantox, or Hanhume. The age of its foundation is unknown, but it probably arose on the decay of the Roman military station of Clausentium, situated about one mile to the north-east of the present town. It was attacked without success by the Danes, a.d. 873, plundered by them in 980, and again in 992. Canute occasionally made it his residence, and it is here that he is said to have administered his well-known reproof to his courtiers, by showing that the sea would not obey his royal command. Henry II. and his queen landed here on their return from France in 1174. The town was sacked and destroyed by an allied force of French, Spanish, and Genoese, in October, 1358, and in the following year the fortifications were repaired and strengthened. The castle—supposed to have been the most ancient of the Saxon castles in England—was rebuilt, and the fortifications were extended by Richard II. (1377 to 1379). Philip II. of Spain landed here on his way to espouse Queen Mary in 1554. The fortifications were strengthened in the reign of Edward VI. (1547 to 1553). Southampton was first incorporated, by charter in the reign of Henry I. (1100 to 1135), but the earliest existing charter, which is simply enfranchising, is that of Henry II. (1154 to 1189). This was confirmed by Henry VI., who erected the town and surrounding district into a county of itself. A house of Grey Friars was founded in 1240. The almshouses in St. Mary's parish were built in 1565, the charity school in 1760, and Thornor's almshouses in 1789. The barracks were enlarged and converted into a military asylum in 1816, and the public dispensary was established in 1823. The royal pier was opened in 1833, and the new docks were opened in 1842. Southampton was made the packet-station for the Madeira, West Indian, Mexican, and Mediterranean mails, on the 28th of September, 1843.

SOUTH AUSTRALIA.—Various discoveries were made in the southern parts of Aus-
tralia by the Dutch A.D. 1627, by D'Entrecasteaux in 1792, by Grant in 1800, by Flinders in 1805, and by Sturt and Mitchell in 1831. A company was formed for its colonization in 1834, under the title of the "South Australian Colonization Commission," and an immense tract of land was vested in their hands, to be erected into a colony on the Wakefield system. The boundaries of the province were fixed by 4 & 5 Will. IV. c. 95 (Aug. 13, 1834), and it was officially proclaimed a colony by the first governor, Captain Hindmarsh, Dec. 28, 1836. After some years of depression, the discovery of the Burra-Burra copper-mines in 1842 raised the prosperity of the new colony to a high state; but the gold discoveries of 1851 in Victoria and New South Wales exerted an injurious, though only temporary, effect. The parliament was first summoned April 22, 1857, and consists of two chambers, the members of which are elected by ballot, and enjoy a term of office of three years.

SOUTHCOTTIAN DELUSIONS.—Joanna Southcott, a fanatic, was born in Devonshire about A.D. 1750. Originally a domestic servant, she set up for a prophetess, and announced herself as the Messiah, spoken of in the 12th chapter of the book of Revelations. She published her prophecies to the world, and her followers amounted to 100,000. When beyond the age of sixty, she announced that she would be the mother of a second Shiloh, Oct. 19, 1814. Her proselytes in great numbers assembled round her door day and night till the 19th passed away. The promised Shiloh did not appear, and the multitude were informed that the prophetess had fallen into a trance. She died Dec. 27, 1814. Her followers committed a breach of the peace in London Jan. 13, 1819.

SOUTHERN CONFEDERATION.—Mr. Buchanan, president of the United States, in his message to Congress, declared the threatened secession of the southern states, and recommended such changes in the constitution as might satisfy them, Dec. 4, 1860. South Carolina taking the lead, seceded Dec. 20; and a requisition made by a deputation to the president, that the troops should be withdrawn from the forts of Charleston harbour, was refused Jan. 3, 1861. Fort Sumter was bombarded, and surrendered to the Confederates April 13. The Federal commissioners destroyed the arsenal and fifteen thousand stand of arms at Harper's Ferry, April 18. President Jefferson Davis sent a message to the southern congress, announcing the ratification of a permanent constitution, April 29. (See UNITED STATES.)

CONFEDERATE STATES.

Alabama. Mississippi.
Arkansas. Missouri.
Carolina, S. Tennessee.
Florida. Texas.
Georgia. Virginia.
Louisiana.

SOUTHERN CONTINENT.—The belief in the existence of a continent in the antarctic regions, which has been styled the Terra Australis incognita, arose from the reported discovery of terra firma by Juan Fernandez, who sailed from the coast of Chili A.D. 1576. Alvaro Mendana discovered Solomon's Islands in 1567, but failed to find them on a second voyage in 1585. His chief pilot, Pedro Fernandez, sailed in quest of the southern territory, and discovered Pitcairn's Island, the New Hebrides, and other islands, between 1605 and 1606. A ship belonging to Rotterdam, commanded by Dirk Cherrits, was driven southwards as far as the land now known as South Shetland, in 1599. Captain Cook undertook his second voyage in order to ascertain whether there really was another continent in those seas, and is the first European known to have entered the antarctic circle, having reached the highest latitude Jan. 30, 1774. He found no land, however, to the south of 60°. The South Shetland Islands were discovered by William Smith in 1819, and Petra Island by Bellinghausen, a Russian, in January, 1821. Weddell reached three degrees farther south than Cook in 1822. Enderby's Land and Graham's Land were found by Biscoe in 1831 and 1832. A French expedition, under D'Urville, explored some of the coasts in 1837. Balleny discovered Sabrina Land, and the islands that bear his name in 1839. The largest tract of coast was discovered by an expedition fitted out by the United States government, under Charles Wilkes, and one by the French government, under D'Urville, in 1840. An expedition from England, under Sir James Clarke Ross, in an attempt to reach the south magnetic pole, discovered Victoria Land, Jan. 12, 1841. Ross in 1843 added in some measure to previous discoveries.

SOUTH KENSINGTON MUSEUM (London), opened June 24, 1857, contains collections of sculpture and ornamental art; educational collections; animal, mineral, and vegetable productions; original statues and casts by British artists; models of patented inventions; and a splendid collection of pictures, bequeathed to the nation by Sheepshanks, Vernon, Turner, and others. It also contains an art library. Occasional evening lectures are delivered to working men.

SOUTH-SEA COMPANY.—This disastrous speculation commenced Sept. 8, 1710. The company, established by 9 Anne, c. 15 (1710), was incorporated by 3 Geo. I. c. 9 (1716). The famous South-Sea Act for redeeming the national debt (3 Geo. I. c. 4) was passed April 7, 1720; and the directors, by the prostitution of dividends, and other infamous acts, raised the original £100 shares to the enormous price of £1,050. The bubble lasted till Sept. 8, when the stock began to fall. By Sept. 29 it had sunk to £150, and thousands of families throughout the country were reduced to beggary. An act (7 Geo. I. c. 1 & 2) was passed in 1721 to punish the directors. Their estates were 793
seized, and other measures were taken by the government to afford relief to the suf-ferers.

Southwark (London).—A perpetual right of magistracy was granted A.D. 1327. A grant of its liberties was made in April, 1550, to the city, together with estates belonging to the monastery of Bermondsey, and property in Newington, St. George’s Fields, and Lambeth Marsh, on payment of £647.2s. per annum. An act having been passed to relieve all those debtors under fifty pounds, who had taken refuge in the Mint, some thousands of them left their sanctuary in a body, July 16, 1723. The first stone of the bridge was laid by Lord Keith, May 23, 1815, and it was opened March 24, 1819. A committee of the House of Commons was appointed to inquire into the subject of removing the toll, April 26, 1841.

Southwold Bay. (See Solebay.)

Sovereign.—A gold coin of this denomina-tion was first issued of the value of 22s., and one twenty-fourth part of the weight of a pound of gold, in the reign of Henry VIII, about 1540. Sovereigns were coined at 20s. apiece, and half-sovereigns at 10s., in 1542. The sovereign passed for 24s. in 1550, and for 30s. in 1552. By 56 Geo. III. (1816) it was provided that sovereigns coined weighing 20 21-parts of a guinea, were to pass for 20s. They were issued July 5, 1817.

Sozopetra (Syria) was besieged and taken by the Greek emperor Theophilus, A.D. 838, and although Motassem interceded in favour of the town, it was levelled to the ground.

Spa Fields (London).—A popular meet-ing of the distressed manufacturers and me-chanics, to get up a petition to the Prince Regent, was held here Nov. 15, 1816. It was followed by another meeting, Dec. 2, when, after some violent speeches, the mob, headed by a man named Watson, marched towards the city. On their way they broke into the shop of Mr. Beckwith, a gunsmith, on Snow Hill, and a Mr. Platt, who interfered, was shot at and wounded by Watson. The rioters spread over the city, broke into the gunmakers’ shops search-ing for arms, and committed much injury before the military succeeded in suppressing the riot. £500 reward was offered by government, and £200 by the city, for the apprehension of Watson. He escaped to America. One of the rioters, named Cashman, was hanged opposite Mr. Beckwith’s house on Snow Hill, March 12, 1817.

Spain.—A succession of disastrous de- feats of the Turkish armies by the Aus-trians, produced a revolt of the Spanis, or cavalry, at Constantinople, A.D. 1603. Through the intrigues of Hassan, the grand vizier, the Janissaries were induced to support the government, and by their aid the revolt was quelled. The sultan, terrified at the influence of Hassan over the Janis-saries, deposed him from his office, and soon afterwards caused him to be strangled.

The Spanish peninsula was known to the ancient Greeks under the name of Iberia, and to the Romans under that of Hispania.

B.C.

297. The Carthaginian general Hamilcar esta-blishes his authority in Spain.

299. His son-in-law, Hasdrubal, founds New Carthage, or Cartagena. (q.v.)

221. Assassination of Hasdrubal, who is succeeded by his son Hannibal.

218. Hannibal takes the city of Saguntum, and marches into Italy, thereby commencing the second Punic war. A Roman force, under Cneius Scipio, invades Spain.

212. Defeat and death of Publius and Cneius Scipio in Spain.

910. Scipio Africanus takes Cartagena.

206. The Carthagilians are finally expelled from Spain by the Romans.

205. Spain is divided into the provinces of His-pania Citerior and Hispania Ulterior, or Hither and Further Spain.

179. A revolt of the Celtiberians is suppressed by Tiberius Gracchus, father of the celebrated brothers.

145. The Lusitanian general Viriathus defeats the Romans in Western Spain.

141. Viriathus obtains a treaty from the Romans, acknowledging the independence of the Lusitanians.

149. Viriathus is murdered by the Romans.

133. Sack of Numantia, and end of the Numantine war (q.v.). This victory secures the Romans in the possession of central Spain.

104. Spain is ravaged by Cumbrian invaders, who are compelled to retire by the Celti-berian warriors.

A.D.

203. Christianity is said to have been introduced into Spain about this year.

260. Spain is invaded by the Franks and other barbarians.

406. Spain is invaded by the Alani, the Suevi, and the Vandalus.

411. Ataulphus, or Adolphus, obtains the pro-vinces of Southern Gaul and Spain, and establishes the kingdom of the Visigoths.

417. Peace is concluded with the Romans.

427. The Vandals cross over into Africa.

452. Theodoric I. conquers the Suevi, and takes their king, Rechiorius, prisoner.

466. Urlic establishes his authority over the whole of Spain.

560. The Suevi in Spain renounce Arianism.

587. Roderic I. expels the Franks from Spain.

588. The Roman Catholic religion becomes the established faith.

712. Musa passes over into Spain.

716. Abdesla, son of Musa, marries Egilona, the widow of Roderic.

716. The Goths, Pelayo, establishes an independent monarchy in Asturias (q.v.).

733. The Spanish Saracens under Abderrahman are defeated by Charles Martel at Tours.

742. Large numbers of Syrian and Egyptian infidels are induced to enter Spain.

756. Abderrahman I. becomes the first Mo-hammedan king of Cordova.

780. An insurrection against Abderrahman I. is suppressed at Toledo.
1515. Dec. 2. Goulavado de Cordova, the “Great Captain,” expires at Granada.
1516. Jan. 29. Death of Ferdinand V.
1517. Cardinal Ximenes assumes the sole power. Nov. 8. He dies.
1519. June 28. Charles I. is elected to the Imperial throne of Germany, which he ascends as Charles V.
1520. An insurrection breaks out in Castile.
1527. An insurrection of the Moriscos is suppressed.
1554. July 25. The marriage of Prince Philip of Spain and Queen Mary of England is solemnized at Winchester.
1566. Jan. 17. Charles V. abdicates the Spanish throne in favour of his son, Philip II. Sept. 5. The Spaniards, under the duke of Alva, invade the Paoted states.
1585. Feb. Pope Paul IV, issuin a bull ordering the Inquisition to suppress Protestantism in Spain; and a terrible persecution is the result. Sept. 29. Death of Charles V. at the monastery of St. Just (q.v.). Nov. 7. The death of Mary of England leaves Philip II. a widower.
1582. April 3. Peace with France is restored by the treaty of Cateau-Cambresis (q. v.). June 24. Philip II. marries the Princess Elizabeth or Isabella of France by proxy.
1583. April 23. Foundation of the Escorial (q. v.).
1585. The Dutch Protestants rebel against Spain.
1590. Dec. 29. Don John of Austria takes the field against the Moriscos.
1597. Nov. 11. Don John, having suppressed the rebellion, resigns his command.
1576. Don John is appointed Spanish governor of the Netherlands.
1577. Philip II. declares himself protector of the French Roman Catholic league.
1578. The United Provinces renounce their allegiance to Philip II. (See HOLLAND.) The duke of Alva conquers Portugal, which is annexed to the Spanish crown.
1580. Death of the duke of Alva, who is equally celebrated for his consummate military skill and for his pitiless cruelty.
1586. Destruction of the Spanish Armada. (See ARMADA.)
1592. Philip II. abolishes the free constitution of Aragon.
1609. April 9. A truce of twelve years is concluded with the Dutch. The Moriscos are expelled by Philip III.
1616. Death of Miguel de Cervantes, author of “Don Quixote.”
1641. Aug. War is renewed with Holland. The new king, Philip IV., abandons the reins of government to the duke of Olivares.
1651. April 6. Spain loses her ascendency in Italy by the peace of Chierasco.
1634. War is commenced against France.
1655. The Spaniards under the Cardinal Infante invade France without success.

A.D. 1515. Dec. 2. Goulavado de Cordova, the “Great Captain,” expires at Granada.
A.D. 1516. Jan. 29. Death of Ferdinand V.
A.D. 1519. June 28. Charles I. is elected to the Imperial throne of Germany, which he ascends as Charles V.
A.D. 1520. An insurrection breaks out in Castile.
A.D. 1527. An insurrection of the Moriscos is suppressed.
A.D. 1554. July 25. The marriage of Prince Philip of Spain and Queen Mary of England is solemnized at Winchester.
A.D. 1585. Feb. Pope Paul IV, issuin a bull ordering the Inquisition to suppress Protestantism in Spain; and a terrible persecution is the result. Sept. 29. Death of Charles V. at the monastery of St. Just (q.v.). Nov. 7. The death of Mary of England leaves Philip II. a widower.
A.D. 1582. April 3. Peace with France is restored by the treaty of Cateau-Cambresis (q.v.). June 24. Philip II. marries the Princess Elizabeth or Isabella of France by proxy.
A.D. 1583. April 23. Foundation of the Escorial (q.v.).
A.D. 1585. The Dutch Protestants rebel against Spain.
A.D. 1590. Dec. 29. Don John of Austria takes the field against the Moriscos.
A.D. 1597. Nov. 11. Don John, having suppressed the rebellion, resigns his command.
A.D. 1576. Don John is appointed Spanish governor of the Netherlands.
A.D. 1577. Philip II. declares himself protector of the French Roman Catholic league.
A.D. 1578. The United Provinces renounce their allegiance to Philip II. (See HOLLAND.) The duke of Alva conquers Portugal, which is annexed to the Spanish crown.
A.D. 1580. Death of the duke of Alva, who is equally celebrated for his consummate military skill and for his pitiless cruelty.
A.D. 1586. Destruction of the Spanish Armada. (See ARMADA.)
A.D. 1592. Philip II. abolishes the free constitution of Aragon.
A.D. 1609. April 9. A truce of twelve years is concluded with the Dutch. The Moriscos are expelled by Philip III.
A.D. 1616. Death of Miguel de Cervantes, author of “Don Quixote.”
A.D. 1641. Aug. War is renewed with Holland. The new king, Philip IV., abandons the reins of government to the duke of Olivares.
A.D. 1651. April 6. Spain loses her ascendency in Italy by the peace of Chierasco.
1640. The Spaniards are expelled from Portugal by John of Braganza.  
1643. Fall of Olivaras.  
1648. Philip IV. renounces his right to Holland by the peace of Westphalia, or Munster.  
1655. War is declared against England.  
1659. Peace with France is restored by the treaty of the Pyrenees.  
1660. Peace is restored with England.  
1663. Sept. 17. Death of Philip IV., who is succeeded by his infant son, Charles II., under the regency of his mother, the Queen-dowager Anne.  
1668. Feb. 12. Peace with Portugal is restored by the treaty of Lisbon.  
1675. The king attains his majority, and abdolishes the regency.  
1691. The French invade Aragon.  
1694. They ravage Catalonia.  
1697. Sept. 13. Peace with France is restored by the treaty of Ryswick.  
1698. The first treaty for the partition of the Spanish monarchy is concluded at the Hague, England, France, and Holland.  
1700. The second partition treaty is signed by the same powers at London and the Hague. Nov. 1. Death of Charles II., the last sovereign of the house of Austria. He is succeeded by Philip V., the Bourbon, grandson of Louis XIV., and duke of Anjou.  
1702. May 15. The war of the Spanish Succession is declared by the allies at London, Vienna, and Aix-la-Chapelle, in consequence of his share in effecting this treaty.  
1708. Oct. 1. By the treaty of St. Idefonso, Spain cedes Faro to the French.  
1718. Oct. 5. Godoy invites the Spaniards to unite against Napoleon I.  
1720. Oct. 18. A French army enters Spain en route to Portugal. Oct. 27. By a treaty for the partition of Portugal is signed with France at Fontainebleau. Oct. 29. Godoy accues the prince of Asturias of a design against the lives of the king and queen. Nov. 5. The prince is reconciled to his parents.  

1815. Sept. 15. General Portier is convicted of an attempt to restore the constitution. Oct. 3. He is hanged.

1817. Sept. 23. A treaty with Great Britain for the suppression of the slave-trade is signed at Madrid.

1821. Sept. 18. Riego is arrested for conspiracy at Madrid.

1822. July 7. The royal guard is abolished by the Cortes.

1850. July 12. The queen gives birth to a son, who dies shortly afterwards.

SPALATRO, OF SPALATRO (Dalmatia).—The ancient Salona, after the fall of Dalmatium, A.D. 117, became the capital of Dalmatia and the head quarters of L. Caecilius Metellus. It was besieged, and opened its gates to Cn. Cosconius, A.D. 78, and was taken by Asinus Pollio, after his defeat of the Parthemi, A.D. 39. Dalcetic built a palace here A.D. 303, to which he retired after his abdication in 305. It was taken by Odoacer, king of the Heruli, in 481. The cathedral was built about 650, Giovani of Ravenna being the first bishop. Spalatro, taken by the Venetians in 1285, was wrested from them by Stephen III., king of Hungary, in 1171. Subsequently it came into the hands of the Venetians, who inclosed the town with regular curtains and bastions in 1645. A terrible plague raged at Spalatro in 1607. The French, by order of Marshal Marmont, pulled down the castle and walls in 1807, and Spalatro is now an open town. It was taken from the French by the Austrians Nov. 2, 1813. The ruins of Dalcetic's palace were visited by the emperor Francis II. of Austria in 1815, when he assigned a fund for carrying on the excavations and the formation of a museum. Councils were held here about 870; in 1069 or 1069; in 1098; November, 1075; and in 1185.

SPANDAU, OR SPANDOW (Prussia).—The citadel, which stands on an island in the Havel, was commenced A.D. 1535 by the elector, Joachim II. It was taken by the Swedes in 1631, and was restored in 1634. Spandau was taken by the French in 1806; and on their retreat from Berlin, March 2, 1813, the suburbs of the town were burned, and 3,000 troops were placed in the fortress by Prince Eugene. It was taken by the Prussians, April 26, 1813. The church of St. Nicholas was built in the 12th century.

SPANISH ARMADA. (See Armada.)

SPANISH MARRIAGES.—By the 6th article of the treaty of Utrecht, April 11, 1713, it was stipulated that the duke of Anjou, grandson to Louis XIV., on taking the Spanish crown, should renounce all claim to the French crown, and that the French monarch should renounce all claim to the Spanish crown, which was to descend to

799
certain princes of the male line, the possessor of the French throne being always excluded. The Salic law, excluding females, was, however, set aside, and France and England entered into the quadruple alliance, which placed Queen Isabella II. on the throne in 1344. Various projects of marriage both for the queen and the infants Louis, King of France, were broached, and at length they were united at the same altar in the palace, the queen to the duke of Cadiz, and the infants to the duke of Montpensier, Oct. 10, 1846.

Spanish Succession.—As Charles II. of Spain (A.D. 1665 to 1770) had no issue, numerous intrigues were formed to induce him to name his successor. After long hesitation, the French party prevailed in 1700, and Charles II. appointed Philip d'Anjou. Louis XIV. immediately acknowledged his grandson as king of Spain; but the emperor Leopold of Austria claimed the throne for his son, the archduke Charles, and William III. of England and the Stadtholder urged a partition. This led to the war of the Spanish Succession, which lasted from 1701 to 1713, and ended by leaving Philip V. in possession of the throne.

Spanish-Town, or St. Iago de la Fega (Jamaica), the capital of the island when captured by the English from the Spaniards, in May, 1665.

Sparta (Greece).—The city of Sparta, or Lacedemon, the capital of Laconia, was founded by Lacedemon and his wife Sparta, and subsequently gave its name to the whole district of which it was the capital. Its early chronology is chiefly mythical.

B.C.
1590. Foundation of Sparta.
1585. The marriage of Tyndareus, king of Sparta, with Leda, is placed by Greek mythologists at about this date.
1228. Abduction of Helen by Theseus, king of Athens.
1216. Marriage of Helen and Menelaus, king of Sparta.
1214. Abduction of Helen by Paris, son of Priam, king of Troy.
1192. Commencement of the Trojan war.
1176. Menelaus and Helen return to Sparta.
1194. On the return of the Heracleids, Sparta is seized by Aristodemus.
1100. A triarchy is established in Sparta, under Eurysthenes and Procles, sons of Aristodemus.
884. Commencement of the legislation of Lycurgus.
889. Sparta is the scene of civil wars, in consequence of ill-feeling between the rich and poor classes.
848. War commences between Charilias, of Sparta, and Polyneuma, of Arcadia.
813. Alcmenes, king of Sparta, wages war against the Messenians.
757. Theopompus introduces the Ephori (g. v.).
743. The Spartans declare war against the Messenians. (See Messenian War.)
735. A battle is fought between 300 Argives and 300 Spartans, and only two Argives and 10 Spartans survive.
730. Emepha, king of the Messenians, falls in battle against the Spartans at Ithome.
723. The Spartans take Ithome, and thereby conclude the first Messenian war.
718. War is carried on against the Argives.
707. The Parthenes and the inhabitants of Heloi fall in an attempt to overthrow Spartan freedom.
800.
gerford, in 1377. The speaker is elected by the Commons, subject to the royal pleasure. The power of rejecting the choice of the house has been exercised on one occasion, in the case of Sir Edward Seymour in 1678. Sir John Trevor was deprived of the speakership, and expelled the house in 1694, for having accepted a gratuity of £1,000 from the city of London, after the passing of the Orphans Bill. No provisions existed for supplying the place of the speaker in the event of his unavoidable absence until Aug. 4, 1853, when it was resolved that in such a case his place should be filled by the chairman of ways and means. This resolution was acted upon for the first time May 7, 1855.

SPARKS

B.C.
277. An alliance is concluded with Athens and Egypt.
255. The Spartans assist the Carthaginians.
244. Agis IV. endeavours to restore the laws of Lycurgus.
243. Abduction of Leonidas II.
240. Leonidas II. murders Agis IV., and becomes ruler of Sparta.
236. Cleomenes III. overcomes the Ephori, and restores the code of Lycurgus.
231. Antigonus Doson, king of Macedon, defeats Cleomenes III. in the battle of Sellasia. The Ephori are murdered by the Spartans.
218. Sparta is invaded by Philip V. of Macedon.
216. The Ephori are abolished by Mechanidas.
208. Mechanidas is defeated and slain by Philopoemen, praetor of the Achaeans at Mantinea.
206. Nabis usurps the sovereign power in Macedonia.
210. Sparta is fortified by the tyrant Nabis to protect it against the Roman army of Quintius Flamininus.
192. Philopoemen attacks Sparta, and defeats Nabis, who is slain by the Aiolians. Sparta joins the Achaean league.
188. Sparta renounces the Achaean league, and is conquered by Philopoemen, who abolishes the laws of Lycurgus.
174. Sparta is subdued by the Romans, under Metellus.
21. Augustus establishes the confederacy of the free Laconian cities.

AD.
396. Sparta is taken by Alaric.
1248. William, prince of Achal, founds Misthura, or Mistra, about three miles from ancient Sparta.
1263. Misthura is ceded to Michael VIII.

SPARTACUS'S INSURRECTION.—Spartacus, a Thracian, having been taken prisoner by the Romans, was reduced to slavery and made a gladiator at Capua. He escaped, with seventy of his fellow-bondsmen, and took refuge in a strong position on Mount Vesuvius. Here he was joined by a number of slaves and outlaws, and defeated two Roman expeditions sent against him, b.c. 73. He marched into Cisalpine Gaul at the head of 100,000 men, b.c. 72, and after successfully defeating two Roman armies, he ravaged the greater part of the province of Italy, and retaliated the cruelties of the Romans towards the gladiators, by making a number of his captives fight as gladiators round the funeral pile of one of his commanders, and thus caused such terror at Rome, that Crassus, the praetor, was invested with full powers to put down the insurrection, and he marched against him. Spartacus took up a position in a peninsula near Rhegium, where Crassus inclosed him by a rampart drawn from sea to sea. Spartacus, after several desperate attacks, forced his way through the praetor's lines, and endeavoured to make his escape from Italy, but being foiled in this, he turned upon Crassus, and a desperate battle ensued, in which Spartacus and most of his followers were killed. The prisoners, to the number of 6,000, were hung or crucified along the road leading from Rome to Capua, b.c. 71.

SPEAKERS OF THE HOUSE OF COMMONS.
Peter de Montfort exercised the functions of Speaker of the House of Commons a.d. 1260, but the first speaker to whom the title was expressly given was Sir T. Hun.
it for himself, and asserted that he had described the trumpet invented in England in his "Musurgia," published in 1650.

Spectacles were first used about the end of the 13th century. Some authorities are of opinion that the first hint of their construction and use was taken, either from the writings of Alhacen, who lived in the 12th century, or of Roger Bacon, who died about 1292. Others affirm that they were invented by Salvino Armati, a Florentine, who died in 1317, and that the invention was rendered common by Alexander de Spina, a monk of Florence, about 1285. Jordan de Rivalto, in a sermon preached in 1305, calls them an invention of twenty years before.

Spectator was commenced March 1, 1711, and continued to Dec. 6, 1712. It was revived June 18, 1714, and terminated Dec. 20 in the same year. Addison and Steele were the principal contributors.

Spectrum.—The phenomenon of the prismatic spectrum, although well known to philosophisers, was first explained by Newton about A.D. 1700; the colours into which he found the ray of light divided by dispersion being red, orange, yellow, green, blue, indigo, and violet. Similar phenomena are observable in the case of diffraction, the laws of which were investigated by Dr. Young in 1802, and by Fresnel in 1821. It has received an important practical application to chemical analysis, by which, amongst other discoveries, Professors Bunsen and Kirchoff showed, in 1860, that the solar atmosphere contains the metals potassium and sodium.

Spheres.—The celestial and terrestrial globes were invented by Anaximander, who was born B.C. 610 and died B.C. 546. The auxiliary sphere is said to have been invented by Eratosthenes of Cyrene (born B.C. 276, died B.C. 194), and the planetarium was invented by Archimedes (born B.C. 287, died E.C. 212).

Spielberg (Moravia).—This castle, formerly the citadel of Brunn, has, since its fortifications were destroyed by the French, A.D. 1539, been converted into a prison for state prisoners. General Mack, who surrendered Ulm to the French Oct. 20, 1805, was imprisoned here.

Spinning.—The ancient mode of spinning was by means of the spindle and distaff. Areas, king of Arcadia, taught the art to his subjects about B.C. 1500; and representations of it are found among the sculptures of the early Egyptian tombs. The spindle and distaff were superseded in England by the spinning-wheel about the end of the reign of Henry VIII. The next improvement in the art was the invention of the spinning-jenny by James Hargraves in 1767. This was followed by the introduction of the spinning-frame by Arkwright, who obtained his first patent July 3, 1769. It was originally worked by horse-power, but this was found too expensive for machinery on an extensive scale; and the first water spinning-mill was

SPEAKING - TRUMPET.—The great horn used by Alexander the Great (B.C. 336 to 323) to assemble his army is considered by some to be the oldest speaking-trumpet on record. A similar instrument was also known to the natives of Peru, in America, A.D. 1535. The invention of the modern speaking-trumpet is generally ascribed to Sir Christopher Wren. It was patented in 1670, though Athanasius Kircher, a Jesuit, in the preface to his "Phonurgia," published in 1673, claimed

802
SPI

erected in 1771 at Cromford, in Derbyshire, which is styled "the nursing-place of the factory, opulence, and power of Great Britain." The next great invention was the machine-jenny, which combined the drawing-roller of Arkwright with the jenny of Hargraves, made by Crompton in 1779; but it was not brought into general use before 1786, owing to its interference with the patent of Arkwright. Parliament rewarded the inventor with £5,000; and he made a large fortune of the cotton-manufactory at Arkwright in England in 1812, when he found between four and five millions of spindles at work on his system.

SPES (Bavaria), called Noviomagus by the Romans, was the seat of the bishop of Augsburg, in the 16th and 17th centuries. The first assignment of the see was made by the Emperor Conrad II. in 1030, and completed by Henry IV. in 1061. This see was regularly restored in 1699, but it never regained its former prosperity. It was taken by the French Sept. 29, 1792, and again Jan. 19, 1794.

SPIRIT-RAPPING.—Voltaire notices a case of a sentence passed upon some monks of Orleans, Feb. 18, 1535, for having resorted to spirit-rapping for the purpose of extorting money. An account of the extraordinary case was found in a manuscript of 1770, in the royal library of the king of France. Sir Thomas Tresham, of Rushton Hall, near Kettering, Northamptonshire, left a letter written by himself about A.D. 1584, in which he states that on one of his commitments for recusancy, being in an old lodge near his mansion, he usually having my servants here allowed me to read nightly an hour to me after supper, it fortunes that Fulcis, my then servant, reading in the Christian Resolution, in the treatise of Proof that there is a God, &c., there was upon a wainscot table at that instant three loud knocks (as if it had been with an iron hammer) given, to the great amazing of me and my two servants, Fulcis and Nillton; and De Foe, referring to a story of spirit-rapping in Richard Baxter's "Certainty of the Worlds of Spirits, &c." published in 1691, remarks that "what in nature can be more trivial than for a spirit to employ himself in knocking on a morning at the wainscot by the bed's head of a man who got drunk over-night, according to the way that such things are ordinarily explained? And yet I shall give you such a relation as this that not even the most devout and precise Presbyterians will offer to call in question." The modern spirit-rapping originated in America, in the family of John D. Fox, in March, 1848.

SPIRITS.—Distilled spirits were first used in Europe about A.D. 1150. (See Distillation.) In consequence of the excessive quantities of ardent spirits drunk by the English working classes in the reigns of George I. and George II., a duty of 20s. a gallon was imposed on all spirits by 9 Geo. II. c. 23 (1730); but as this restriction merely increased the illicit sale of contraband liquors, the duty was repealed by 16 Geo. II. c. 8 (1743). The chief acts relating to the duties on spirits were 4 Geo. IV. c. 94 (July 18, 1823), regulating the duties in Ireland and Scotland, and 6 Geo. IV. c. 80 (June 27, 1825), which referred to England. The distillation of spirits from mangold wurzel was permitted by 2 & 3 Will. IV. c. 74 (Aug. 1, 1832); and the scale of duties was again altered by 5 Vict. sess. 2, c. 25 (May 31, 1842). Spirits of wine were allowed to be used in the arts and manufactures free of duty by 18 & 19 Vict. c. 38 (June 28, 1855). A uniform duty of 6s. per gallon for the United Kingdom was imposed by 21 Vict. c. 16 (May 11, 1858), and the excise regulations relating to the distilling, rectifying, and dealing in spirits, were amended and consolidated into one act by 23 & 24 Vict. c. 114 (Aug. 28, 1860).

SPIRITUALISTS, called also the Zalouns, or the Spirituals, formed a portion of the great order of Franciscans, who, about 1245, under the name of Spiritualists, advocated the strict observance of the rule and vow of poverty, which had been one of their fundamental laws. In 1283 they had become an influential body, and were, after the year 1294, subjected to great persecution.

SPIRALFIELDS (London).—In 1835 Walter Brune founded the priory of St. Mary Spital, which was dissolved by Henry VIII. in 1534. At the number of houses of Spital Square formerly stood a pulpit for open air preaching. Here the celebrated SpiatSunday sermons on Easter Monday, Tuesday, and Wednesday, were delivered. On the revocation of the edict of Nantes by Louis XIV. in 1685, numbers of the Huguenots driven from France settled in Spitalfields, and commenced the manufacture of silk. Riots against the introduction of foreign silks took place in Spitalfields Oct. 14, 1767, and Oct. 7, 1769.

SPIELED (Hampshire).—This famous roundhead is named from the Spit, a sand-bank about three miles long, between Portsmouth and the Isle of Wight. A grand naval review took place here in presence of Queen Victoria, Aug. 15, 1853. Sir Charles Napier arrived at Spitalfield, on his return from the Baltic, Dec. 17, 1854; and another grand naval review took place here before the queen, April 23, 1856.

SPIZBERGEN (Arctic Ocean).—This group of islands, observed by Sir Hugh Willoughby A.D. 1553, was discovered by Barentz, a Dutch navigator, in 1596. The

803
Dutch commenced whale-fishing in 1613. The king of Denmark sent a squadron to assert his exclusive right to the island of this name, the chief of the group, in 1613, but afterwards gave up the point. The South-Sea Company embarked largely in whale-fishing here in 1724.

**Spoleto (Italy).**—The ancient Spoleotium was colonized by the Romans B.C. 240. Hannibal was repulsed from its gates B.C. 217, and it was distinguished for its fidelity to Rome B.C. 209. A battle was fought beneath its walls between Pompey and Crassus, in which the latter was defeated, B.C. 82. About A.D. 570 it became the seat of a duchy which lasted till the 12th century.

**Spontaneous Combustion.**—Numerous instances of what is called spontaneous combustion have been recorded, though professor Liebig contends that it is absolutely impossible. Dr. Lindsley has compiled a table from the Dictionnaire de Medicine and containing nineteen cases, the first of which is said to have occurred at Copenhagen in 1692.

**Sports. (See Book of Sports.)**

**Springfield** (North America).—This town of Massachusetts was incorporated A.D. 1645.

**Spurs with rows are said to have been invented in the reign of Henry III. (A.D. 1216—1272).** They were worn on foot as well as on horseback, and in the last parliament of Elizabeth, in 1601, the speaker ordered members of the House of Commons not to come with spurs.

**Spurs (Battle). (See Guinegate.)**

**Stabat Mater Dolorosa.**—This celebrated Latin hymn, performed in the Romish churches during Holy Week, was written by a monk named Jacopone in the 13th century. The Bianchi (q.v.), or White Penitents, sang it as they passed through Italy in 1399.

**Stade Tolls.**—These dues, levied by the Hanoverian government on vessels and goods passing up the Elbe, take their name from the little town of Stade, situated on the Schwinge, near its junction with the Elbe; and they were first levied by the archbishops of Bremen, according to a grant made to them by the emperor Conrad II., A.D. 1098. By the treaty of Westphalia, signed at Osnaburg Oct. 24, 1648, the toll was ceded to Sweden. In 1712 it passed, with the duchy of Bremen, into the possession of Denmark; and subsequently it was ceded to Hanover, by a treaty with Denmark, in 1717, and a further treaty with Sweden in 1719. George II., as elector of Hanover, issued a proclamation permitting British vessels to proceed directly to Hamburg, without detention at Stade, Dec. 1, 1736; and the dues were revised and amended, according to a convention signed between Hanover and other states bordering on the Elbe, Apr. 13, 1744. The British government proposed the abolition of the toll, June 2, 1860, on terms approved by the Hanoverian administration, Hanover receiving £3,000,000 as compensation. The Stade dues are frequently styled the Brunshausen tolls, from the village where the duties are collected.

**Staff College** (Sandhurst).—The first stone of this college was laid by the duke of Cambridge Dec. 14, 1559. The object of the institution is to enable military officers who have served a probationary course of regimental duties to qualify themselves for promotion to staff appointments.

**Stafford** (Staffordshire), the ancient Stafford or Staffordford, to which St. Berlinitz, son of a Mercian king, retired A.D. 705, when several houses were built, which formed the nucleus of the present town. Ethelfleda, countess of Mercia, erected a castle in 913. A priory of Black Canons was founded in 1181. King John granted the town its first charter in 1207, and it has exercised the elective franchise since 1295. The grammar school was rebuilt and endowed by Edward VI., in 1550. Noel's Almshouses were founded in 1640. An indecisive battle was fought between the royalist and parliamentary troops at Hopton Heath, near this town, March 10, 1643. The County Infirmary was instituted in 1766, and the present building erected in 1772. The County Lunatic Asylum was established in 1818.

**Stage Carriages, or Coaches,** were introduced into England in the 17th century, and the earliest public document in which they are mentioned, is dated April 26, 1658. In 1678 a six-horse stage-coach was established between Edinburgh and Glasgow, and a through communication between London and Edinburgh was established before 1754. Mail-coaches (q.v.) were introduced in 1784, and omnibusses (q.v.), which are included under the legal term of stage-carriages, in 1829. The duty on stage-coaches was first imposed by 5 & 6 Will. & Mary, c. 22 (1694). The number of passengers to be carried in such vehicles, and the measures to be taken to insure their safety, were regulated by 50 Geo. III. c. 48 (June 9, 1810). The old duties were repealed, and new ones imposed, by 55 Geo. III. c. 185 (July 11, 1815), and the laws relating to the subject were consolidated by 2 & 3 Will. IV. c. 120 (Aug. 16, 1832), which was amended by 3 & 4 Will. IV. c. 45 (Aug. 23, 1833). They were again amended by 5 & 6 Vict. c. 79 (Aug. 5, 1842).

**Stalingomen** (Egean Sea), the ancient Lemnos (q.v.), was taken from the Eastern empire by the Venetian republic, and erected into a grand-duchy in favour of Philocol Navagier, A.D. 1207. In 1478 it was ceded to the Turks, from whom it wasretaken by the Venetians in 1656. In 1657 it was again taken by the Turks, who still retain possession.

**Stamford** (Lincolnshire).—The Picts and Scots were defeated here by the Britons and Saxons, A.D. 449. Edward the Elder took it in 922 from the Danes, who afterwards regained possession. Edmund I. recovered it in 942. The Danes again obtained possession soon after, and held it till 1041. The monas-
Sta.

tery of Grey Friars was founded in 1206; St. Michael's church in 1230; the monastery of Black Friars in 1241; St. George's church was rebuilt in 1450, upon the site of a younger edifice; St. John's was founded in 1450; All Saints about 1465; and Brown's Hospital in 1485. Radcliffe's School was established by the bequest of W. Radcliffe, who died in 1530; the grammar-school was founded in 1548, and in 1572 Lord Burleigh settled a number of Flemish Protestant refugees, who introduced the art of silk and serge weaving. The town-hall was rebuilt in 1776, and the girls' national schools were founded in 1815.

**STAMP ACT.**—The celebrated "Act for granting and applying certain Stamp Duties, and other Duties in the British Colonies and Plantations in America, &c." 5 Geo. III. c. 12 (March 22, 1765), passed both houses of parliament with scarcely any discussion. It took effect (July 3, 1765), and was repealed by 6 Geo. III. c. 11 (March 15, 1766). (See American Stamp Act.)

**STAMP DUTIES.**—By 22 & 23 Charles II. c. 9 (1670), certain duties were imposed on deeds enrolled, crown grants, and law proceedings, but they were not denoted by stamps. Stamp duties, properly so called, were introduced into this country from Holland, and were first imposed by 5 Will. & Mary, c. 21 (1694). By 6 & 7 Will. III. c. 6 (1694), they were granted on marriages, births, and burials, and by 8 Anne, c. 9 (1709), on premiums with apprentices. Newspapers were first taxed by 10 Anne, c. 19 (1711). Stamp duties were introduced into Ireland in 1774. Bills of exchange and notes were subjected to the stamp laws by 22 Geo. III. c. 35 (1792), and patent medicines by 23 Geo. III. c. 62 (1793). All the stamp duties were repealed by 44 Geo. III. c. 99 (July 28, 1804), which was amended by 48 Geo. III. c. 149 (July 4, 1808). Both these statutes were repealed by the general stamp act, 55 Geo. III. c. 184 (July 11, 1815). By 7 & 8 Geo. IV. c. 55 (July 2, 1827), the stamp offices of Great Britain and Ireland were consolidated, and by 4 & 5 Will. IV. c. 60 (Aug. 13, 1834), the boards of stamps and taxes were united. The stamp laws were amended by 13 & 14 Vict. c. 97 (Aug. 14, 1850); 16 & 17 Vict. c. 59 (Aug. 4, 1853); 16 & 17 Vict. c. 69 (Aug. 4, 1853); 17 & 18 Vict. c. 83 (Aug. 9, 1854); and by 23 & 24 Vict. c. 111 (July 28, 1854). (See Standard (Battle).—The battle of Cuton Moor, or Northallerton (q.v.), is so called because the English barons rallied round a sacred standard, consisting of a ship's mast fixed in a four-wheeled vehicle, and bearing the banners of St. Peter of York, St. John of Beverley, and St. Wilfred of Ripon, surmounted by a pyx containing the consecrated host.

**STANDARD FOR GOLD AND SILVER.**—The appointment of a fixed standard of fineness for the precious metals is very ancient, as the method of testing known as the Trial of the Pyx, is mentioned as early as 1283; and by 25 Edw. III. c. 13 (1350), all coin is ordered to be made of standard metal. The standard was regulated by 12 Geo. II. c. 26 (1739), and was reduced, as far as gold wares are concerned, by 36 Geo. III. c. 69 (June 21, 1798), and by 17 & 18 Vict. c. 96 (Aug. 10, 1854). Wedding-rings are exempted from restrictions as to standard by 18 & 19 Vict. c. 60 (July 23, 1855).

**STANDARDS were first used by the Egyptians, who carried some animal at the end of a spear. The earlier Greeks set up a piece of armour as a rallying signal. In later times each state assumed some distinctive badge. The earliest standard employed by the Romans was a bundle of hay fixed to a pole; but in after-years effigies of the gods and emperors, and of animals and birds, especially of the eagle, were adopted. The barbarians generally used the figure of a dragon, and this also was employed by the Roman legions during the Empire, and was for many years the chief ensign of the Western empire, and of the English and Norman sovereigns. (See Banner, Eagle, Flags, &c.)**

**STANFORD BRIDGE (Battle).**—Tostig, with an army of English and Flemish, and his ally Harold Hardrada, with an army of Norwegians, were defeated at this place, on the river Derwent, in Yorkshire, by Harold II., king of England, Sept. 25, 1066. Tostig and Harold Hardrada were killed in the encounter.

**STANNES (Middlesex).—The manor of Stanmore became the property of the abbey of St. Albans A.D. 1231. Archbishop Boyle was rector of Stanmore from 1610 to 1618. The church, restored in 1636, was consecrated by Archbishop Laud July 16, 1632.**
instituted at a very remote period for the convenience of the Cornish tin-miners. They are mentioned in charters of the reign of John, and their privileges were confirmed by Edward III. a.d. 1359. Their jurisdiction was regulated by 16 Charles I. c. 15 (1641), and the courts themselves were remodelled by 6 & 7 Will. IV. c. 106 (Aug. 20, 1836). The Statmary laws were amended by 2 & 3 Vict. c. 58 (Aug. 17, 1839), and by 18 & 19 Vict. c. 32 (June 15, 1855).

Staple Inn (London).—This inn of chancery was formerly a frequent resort of wool-merchants, in consequence of which it was called Staple Hall. Dugdale states that it became an inn of chancery in or before the reign of Henry V. (1413—1422); but it did not become the property of a law society until the time of Henry VIII. (1509—1547).

Star Chamber.—A patent was obtained, a.d. 1796, by Lord William Murray, for making starch from horse-chestnuts, and Wickham obtained a patent in 1824 for making it from rice. O. Jones, in 1849, produced starch from rice by a new process, and in 1841 Berger took out a patent for making rice starch by the action of an alkaline salt. James Colman obtained a patent in December, 1841, for making starch from Indian corn.

Star Chamber.—The etymology of the name of this celebrated court is very uncertain. Some contend that the chamber where it held its sitting received its name from the starry decorations of its roof, and others that Star Chamber is a corruption of "Star" Chamber; and that the room was so called because it was used as a repository for contracts made with Jews—"Star" being the old name for such contracts. Hallam considers that this court originated in the Consilium Ordinarium, which had been the subject of numerous statutes from the time of Edward III.; but the usual opinion is that it was erected by 3 Hen. VII. c. 1 (1486). Its constitution and authority were defined more particularly by 21 Hen. VIII. c. 20 (1529), by which the president of the council was made one of its judges, and it was finally abolished by 16 Charles I. c. 10 (1640). An attempt to restore the jurisdiction of the court of Star Chamber was made without success in 1662.

Star of India (Order).—This order of knighthood was instituted by Queen Victoria by letters patent dated Feb. 23, 1861. It consists of twenty knights, exclusive of the sovereign. The first and principal knight and grand master of the order, is the viceroy and governor-general of India for the time being.

Staten Island (United States), about eleven miles S.W. of New York, was occupied by the British army under General Howe, July 9, 1776.

State-Paper Office.—This office was established a.d. 1578, and is the depository of the official correspondence of the country from the reign of Henry VIII. An attempt to improve the catalogues was made in 1764 and in 1800 the office was placed under an improved system of management. The publication of the calendar of State Papers was commenced in 1857.

States-General of France. (See Parliament (French) and National Assembly.)

States of the Church. (See Papal States.)

Stationers.—The company of stationers or text-writers were formed into a guild a.d. 1409, and received their first charter May 4, 1557. It was confirmed by Elizabeth in 1558. The entries of copies commenced in 1558, and the delivery of books in 1662. The first hall, in Milk Street, was destroyed in the great fire of 1666. It was rebuilt in 1670.

Statistical Society.—The government, a.d. 1793, established a Board of Agriculture in England, which collected and published many statistics referring to the state of agriculture. Nothing of a practical character, however, was accomplished until 1832, when Lord Auckland and Mr. Poulett Thompson, who then presided over the Board of Trade, established a statistical office in that department. The Statistical Society of London was established March 15, 1834.

Statistics.—Hallam (Literature of Europe, pt. iv. sec. 109) states that "the Italians were the first who laid anything like a foundation for statistics or political arithmetic." They were succeeded by the English, whose earliest work on the subject is Graunt's "Observations on the Bills of Mortality," published in 1661. The earliest attempt to comprehend all the details of statistical science within the limits of one work was made in the "Statistical Account of Scotland," which was published by Sir John Sinclair in 1791. In 1832 Lord Auckland and Mr. Poulett Thompson established a statistical office in connection with the Board of Trade; and in 1833 a similar department was instituted by the British Association. The Statistical Society of London was founded March 15, 1834, and commenced the publication of its journal in May, 1838. A central statistical commission was established in Belgium by a royal decree, in October, 1841; and international statistical congresses have been since held under its auspices. The first of these congresses assembled at Brussels, Sept. 19, 1853; the second at Paris, in September, 1865; the third at Vienna, in September, 1857; and the fourth at London, July 16, 1860.

Statues.—Phidias, the greatest sculptor who ever lived, was born at Athens about B.C. 500. The first statue executed by an Englishman was that of Thomas Sutton by Nicholas Stone, in 1615. The first equestrian statue erected in England was that of Charles I. by Le Seur, in 1678. Public statues within the metropolitan police district were placed under the control of the commissioners of public works and buildings by 17 & 19 Vict. c. 33 (July 10, 1854).
STEAM-CARRIAGE.—The earliest example of a carriage propelled by steam was one invented by Theophilus Cugnot, a.D. 1763, which proved a failure. In 1784 James Watt suggested a plan for a steam-carriage, but it was not carried into effect. In 1796 William Symington, in Scotland, and Oliver Evans, in North America, both laboured to introduce steam-propelled vehicles on common roads, and in 1802 Messrs. Trevithick and Vivian patented an engine which was partially successful. Julius Griffith's carriage was patented in 1821, the experiments of David Gordon commenced in 1822, and Mr. Goldsworthy Gurney's patent was taken out May 14, 1825. In consequence of the conflicting claims of different inventors, a committee of the House of Commons was nominated, which presented a report, Oct. 12, 1831, favourable to the introduction of steam-carriages on common roads. In 1860 a carriage, invented by the earl of Caithness, attained very satisfactory results. (See Railroads.)

STEAM, STEAM-ENGINE, &c.—Hero of Alexandria, writing about B.C. 120, describes some apparatus in which motion was produced by the force of steam. The Italian architect Branca imparted a rotatory motion to a series of wheels by means of the forcible emission of steam from an orifice in a boiler, a.D. 1529. The first work in which steam is scientifically treated, was published at Basel by John Ziegler, in 1769. Dr. Robson's experiments on the temperature and elasticity of steam were made in 1778, and Dr. Dalton published a valuable series of discoveries in 1793. The following table exhibits a chronological view of the leading inventions connected with the steam-engine:

<table>

STEAM-ENGINE.—The first example of a steam-engine, which was in the hands of Hero of Alexandria, was described by him in the "Clermont," a regular steam-boat packet between New York and Albany. The engines were furnished by Watt & Boulton.

A.D. 303. The marquis of Worcester constructs a rude steam-engine, which he describes in the "Dictionary of Inventions.

1689. Dr. Denis Papin invents the safety-valve.

1690. He invents the cylinder and piston.

1693. He suggests an atmospheric steam-engine.

1700. July 24, Captain Thomas Savery patents an invention for raising water by steam power.

1704. Invention of Thomas Newcomen's engine.

1720. Leopold produces the first idea of a high-pressure engine.

1773. James Watt directs his attention to the subject of the steam-engine.

1775. James Watt invents the condenser.

1779. Jan. 5. James Watt takes out his first patent.

1783. Smeaton improves the atmospheric engine.

1784. Watt and Boulton commence their partnership.

1775. Watt's patent is extended for twenty-five years.

1807. Oct. 3. Mr. Robert Fulton establishes the Clermont, as a regular steam-boat packet between New York and Albany. The engines were furnished by Watt & Boulton.

1812. Jan. 18. Mr. Henry Bell institutes the steam-navigation of the Clyde, by starting the Comet between Glasgow and Greenock.

1815. Jan. 23. The first steamer plies between London and Gravesend, and is the first Thames steamer. Steam-packet is established between Glasgow and London.

1817. Oct. 14. Mr. James Watt, Jun., crosses the Clyde in the Caledonia, and ascends the Rhine, thus making the first steam voyage on the sea.

1819. The Savannah steam-boat crosses from America to Liverpool.

1822. The Comet steam-boat is built for the Royal Navy.

1829. The Corazon makes two voyages between Holland and the West Indies.
by 40,000 from practised the weapons, steel, a nearly 1770. Smith constructs the Archimedes screw steamer.

STEEL, a solid transparent substance, was first made known by Chevreul a.d. 1823.

STEINDERS, so called from a district in the duchy of Oldenburg where these heretics were most numerous. They flourished in the early part of the 12th century, and were nearly exterminated in 1234 by an army of 40,000 crusaders. They refused to pay tithes, and were charged with holding various absurd notions by their papal persecutors. They were also called Hallean heretics, from a town of that name in Swabia.

Steel.—One kind, called stomoma by the Greeks, and another chalyba, manufactured by the Chalybes, was in use in the time of Homer, b.c. 962. Diodorus describes a process followed by the Celtiberians, in Spain, for oxidizing the iron to make steel, which was afterwards forged into weapons, b.c. 43. Japan has long been famed for the quality of this metal used in the manufacture of sabres. The method of hardening by immersion in water was practised in the 11th or 12th century. Oils and other fluids were used for the same purpose, the archduke Cosmo, of Tuscany, enjoying the credit of having discovered a valuable one a.d. 1555. The art of converting bar-iron into steel, by dipping into other fused iron, is described by Reaumur, about 1730, although it was known much earlier. A costly description of the metal was the ferrum Indicum, a hundred talents of which were presented to Alexander in India, b.c. 327. Some pieces, under the name of wootz, were sent from that country to the Royal Society in 1795. Damasked steel, a famous quality, was early obtained from the Levant. Cast steel was first made by Huygens at Asterdam, in 1665. In 1770, Faraday and Stodart published a series of experiments, showing how the quality might be improved by alloy with silver and other metals, in 1822. Heath, who spent a fortune on his experiments, devised a mode of combining carbon with manganese to produce a carburet, by which good steel was made from English iron, in 1839. Bessemer's process for converting pig-iron into malleable iron, and that again into steel, without any additional consumption of fuel, for which he has taken out several patents, was announced at the meeting of the British Association in 1856.

Steel pens were first brought into use about 1803. They have since undergone various improvements, and are the subject of numerous patents.

Steelyard was known to the Romans under the name of statera, and frequently made of brass, as described by Vitruvius, b.c. 27. From the manner in which it is spoken of in a tract of the time, it seems to have been little known in England in 1778. Martius, the Index Weighing-Machines and many other modifications have been devised; and M. Hams, a Frenchman, received a prize from the Society of Arts for one in 1790.

Steelyard, or Stillyard.—The Germans of the Steelyard were located in London a.d. 979, but the company was erected, according to some authors, in 1215, according to others, by Henry III. in 1232. Their privileges were extended in 1260, and Edward I. granted them a charter in 1260. It was confirmed by Henry V. in 1413, and renewed by Edward IV. in 1466. Their privileges were revoked by Edward VI. in 1552, restored by Mary in 1554, and finally abrogated by Elizabeth in 1578. Their house was shut up in 1507, and its German inhabitants sent away.

Steelkirk, or Steelkirk (Battle).—At this village, in France, William III. of England was defeated by the French, under Marshal Luxemburg, Aug. 3, 1692.

Stenography. (See Shorthand.)

Stephen, third son of Stephen, count of Blois, and Adela, daughter of William I., was born about a.d. 1096, and was crowned king of England, Thursday, Dec. 26, 1135. Stephen married Matilda, daughter of the count of Boulogne, by whom he had three sons and two daughters. He waged a long war against the empress Matilda, daughter of Henry I., she having claimed the crown. She was recognized as "lady of England," at a council held at Winchester, April 7, 1141. This was brought to a close by the treaty of Winchester, signed Nov. 7, 1153, which provided for the succession to the throne of her son Henry, on the death of Stephen, which occurred Oct. 25, 1154.

Stephen's Chapel (London), built by King Stephen about a.d. 1135, and rebuilt by Edward III. in 1347, became the seat of the English parliament in September, 1552. It was totally destroyed by fire Oct. 16, 1834.

Stethoscope, an instrument for determining the specific gravity of liquid and other bodies, was invented by Say, a French officer of engineers, a.d. 1797.
STEREOSCOPE.—Professor Wheatstone read a treatise before the Royal Society, on the phenomena of binocular vision, and illustrated his theories with what he called the "reflecting stereoscope," A.D. 1838. Sir David Brewster communicated to the same society his lenticular, or refracting stereoscope, in 1843. M. Duboseq, of Paris, manufactured a very fine one, which, with a set of daguerreotypes, was presented to Queen Victoria in 1851. The principle on which the instrument depends was known to Euclid, B.C. 300, and described by Galen A.D. 174.

STEREOTYPE is said to have been invented in Holland, bibles having been printed at Leyden from stereotype plates A.D. 1711. The art was, however, brought to perfection in England. Books were printed from stereotype plates by Ged of Edinburgh, in 1729; and plates for bibles and prayer-books were cast at Cambridge in 1729. Earl Stanhope introduced a type of London in 1805. Appleton obtained a patent in 1818 for improvements in stereotype plates.

STETHOSCOPE, a wooden cylinder used by medical men to ascertain the condition of the lungs, was invented by M. Laennec of Paris, A.D. 1823.

STETTIN (Prussia) owes its origin to a Wendish castle, and a large village existed here as early as A.D. 830. A Wendish temple erected here was destroyed and rebuilt several times during the struggle between Christianity and Paganism, and was finally destroyed on the triumph of the former in the 13th century. A treaty of peace was concluded at Stettin, in 1570, between Norway and Sweden, the principal articles being that John III., king of Sweden, should restore his Norwegian and Pomeranian dominions, and that Frederick II., king of Norway, should also restore his conquests, receiving, however, Elblag and a large sum of money. The ancient castle was the residence of the dukes of Pomerania from 1357 to 1637, when the line became extinct. Stettin, with the rest of Pomerania, was conquered by Russia in 1713, and, after undergoing various changes, was finally ceded to Prussia in 1814.

STICKLASTADT (Battle).—Olaf II., king of Norway, having been driven from his throne by Canute the Great, was defeated and slain in this battle, fought for the recovery of his kingdom, July 23, 1030.

STIRLING (Scotland).—The earliest charter given by Alexander I. is dated A.D. 1119. The castle, of the early history of which nothing is known, was, in the 12th and 13th centuries, one of the strongest fortresses in Scotland. It was besieged by Robert Bruce in 1313. James II. stabbed the earl of Douglas here in 1452. The church, formerly a Franciscan monastery, was founded by James IV. in 1494. James VI. was crowned at Stirling July 24, 1567. The earl of Lennox was murdered in the castle Sept. 4, 1571. Gowans's hospital was erected in 1639. The remnant of the Scottish army having retreated to Stirling after the battle of Dunbar, Sept. 3, 1560, surrendered to General Monk Aug. 14, 1651.

STIRRUPS were not used before the 6th century. Hippocrates and Galen speak of a disease of the feet and ankles from suspension without a resting-place when riding.

STOCKHOLM (Sweden) was founded by Birger Jarl about A.D. 1260. Christian I., king of Denmark, was crowned here in 1457, and John II., king of Denmark and Norway, was crowned king of Sweden, at Stockholm, in 1497. It was strongly fortified and defended by Queen Christina of Denmark, against the Swedish insurgents, from Oct. 7, 1501, to March 27, 1502; and a still more heroic defence was that made by Christina Gyllenstierna in 1520, against Christian II. of Denmark. Stockholm replaced Upsala as the capital of Sweden in the 17th century. The palace, commenced in 1697, was finished in 1753. The royal library in the palace was destroyed by fire in 1697. A granite obelisk was erected by Gustavus IV. in 1795, to commemorate the zeal and fidelity of the citizens in the war against Russia from 1788 to 1790. A revolution took place at Stockholm March 13, 1809, when Gustavus IV., king of Sweden, was deposed.—A treaty of peace with Russia was signed here March 3, 1813, by which Sweden bound herself to employ a body of 30,000 men to act with the Russians against the French in North Germany. A treaty between England, France, and Sweden, was concluded here Nov. 21, 1855.

STOCKINGS were unknown to the Romans till after the time of Hadrian, A.D. 138. They were used by the Anglo-Saxons in the 8th century, and made of cloth in the 12th century. The ladies of the time of Edward II. wore them of precisely the modern form. Henry VIII. wore silk stockings. A Spanish pair, which included breeches, stockings, and shoes, was presented to Edward VI. A pair of knitted silk stockings made in England was presented in 1601 to Queen Elizabeth, who afterwards refused to wear any other sort. A London apprentice made the first worsted knitted stockings in England, taking the hint from a pair that were brought from Mantua in 1564. In France young men of fashion wore them of different patterns upon each leg in the 16th century. A company of stocking-knitters was formed at Paris in 1527.

STOCK-JOBING ACT.—By 7 Geo. II. c. 8 (March 28, 1734), provisions were made for the prevention of stock-jobbing, and by 10 Geo. II. c. 8 (1737), these provisions were rendered perpetual.

STOCKPORT (Cheshire).—The castle was held A.D. 1173 by Geoffrey de Costentlyn against Henry II. The free school was founded in 1467. Stockport was taken by Prince Rupert in 1644, and retaken by the Parliament army, under Leslie, in 1645. It was occupied on two occasions in 1745 by Prince Charles-Edward, the Pretender.

STOCKS.—It was enacted by 7 Hen. IV. c. 17 (1465), that every village and town should have a pair of stocks; and by 4 James I.
c. 5 (1606), that every person convicted of drunkenness should be fined five shillings, or spend six hours in the stocks. This last act was confirmed by 21 James I. c. 7 (1629).

Stockton (Durham).—This town is supposed to have received its first charter from King John, A.D. 1201. In 1310 Bishop Anthony Beke granted a weekly market to Stockton; and in 1322 the town was burned and plundered by the Scotch. They held the castle in 1644. The parliament ordered it to be dismantled in 1647, and it was entirely destroyed in 1652. The church, commenced June 5, 1710, upon the site of an old chapel dating as far back as 1334, was finished and consecrated Aug. 21, 1712. The bridge over the Tees, commenced Aug. 23, 1764, was finished in April, 1771. The Stockton and Darlington Railway was opened for traffic in September, 1825.

Stoics.—The disciples of Zeno, a Greek philosopher, were called Stoics, because he taught in the Στοις, or porch. Zeno was born at Citium, a small town in the island of Cyprus, about B.C. 357, taught at Athens B.C. 299, and died about B.C. 263.

Stoke-Upon-Trent (Staffordshire).—The old church of St. Peter is mentioned as early as A.D. 1291. Lambert Simnel was defeated and made prisoner in a battle fought near this town, June 16, 1487. The completion of the Grand Junction canal to Stoke in 1777 gave a great increase to the trade. The first newspaper published in this town appeared Jan. 1, 1809. St. Peter's church was pulled down and a new one erected in 1820.

Stolbova (Russia), celebrated for the peace between Russia and Sweden, signed here Jan. 26, 1617. It was purchased by Russia on the following terms: viz., the surrender to Sweden of Ingria, Carelia, the whole country between Ingria and Novgorod, the renunciation of Livonia and Esthonia, and a large sum of money. It was renewed by the treaty of Cardis (q. v.).

Stone.—The Egyptians chiefly used granite in their buildings, the Assyrians alabaster, and the Greeks and Romans marble. The ancient Britons used stone in their remarkable Druidical circles (see Stonenhenge), and stone circular towers of a very early date exist in Scotland and Ireland. During the Roman occupation of this island, numerous stone edifices were erected, and in England, in 1290, the British builders are mentioned as the most skilful masters known. After the departure of the Romans, however, the art of building in stone declined, and was not restored until the year 674, when it was revived by Wilfrid, bishop of York, and Benedict Bishop. The first stone church in Scotland was erected in 710. A commission to inquire into the kinds of stone most suitable for building purposes was appointed in 1839, in order to insure a sound material for the new house of parliament, but the result has not proved satisfactory. Frederick Ransome patented his artificial stone Oct. 22, 1844. Hutchinson's process for the preservation of stone was patented in 1847, Barrett's in 1851, and Daines's in April, 1856. F. Ransome's system of coating stone with an insoluble silicate was patented Sept. 27, 1856.

Stone.—The operation for this disease is mentioned by Hippocrates (b.c. 460—357). Celsus gave an exact description of it A.D. 17. Germain Colot, a French physician, performed it on a criminal at Paris in 1747. The present method was first taught at Paris by Frère Jacques in 1697. The operation by crushing the stone, called lithotripsy (q. v.), was first proposed in 1812.

Stonenhenge (Wiltshire), on Salisbury Plain, is believed to be the remains of a Druidical temple. Owing to a rapid thaw, three of the large stones, the smallest weighing about twenty tons, fell from their place, Jan. 3, 1797. Geoffrey of Monmouth states that it was erected by Aurelius Ambrosius in memory of 460 Britons put to death by Hengist. Polydore Virgil says the Britons erected this monument in memory of Aurelius Ambrosius. Inigo Jones believed it to be a Roman temple.

Stoney Point (North America), taken by the English after a sharp cannonade June 1, 1779, was retaken by the American brigadier Wayne, July 15. The latter evacuated the fort after having destroyed the works, and it was again occupied by the English.

Storms.—The earliest attempt to arrive at a scientific knowledge of the law of storms was made by Captain Langford, who published a paper on the West-Indian hurricanes in the Philosophical Transactions for 1698. In 1743 Don Juan de Ulloa described the rotary storms of the Pacific, and in 1801 Colonel Capper made some observations on the hurricanes of Malabar. William Redfield, of New York, published a valuable paper on the management of ships in storms and the use of the barometer, in 1814; and in 1838 the law of storms was established on a definite scientific basis by Lieutenant-Colonel William Reid, of the Royal Engineers. Henry Piddington's publications on the subject commenced in 1839.

Storting, or Norwegian parliament, was first held at Bergen by Hako IV., A.D. 1223. By an agreement made with the king of Sweden, the two crowns were united May 17, 1814. Both chambers passed a motion to abolish hereditary nobility in 1815. The royal assent was refused, but the chambers carried their point in 1821.

Stourbridge (Worcestershire).—The free grammar-school, at which Dr. Johnson was scholar, A.D. 1726, was founded by Edward VI. in 1551. The church was built by subscription in 1742. A riot took place among the colliers, Nov. 14, 1767, when they compelled the farmers to sell their corn at five shillings a bushel. The railway to Dudley was opened in 1852.

Strove.—The ancient Greeks and Romans usually employed charcoal braziers for heating their apartments. The first important
scientific work on stoves was published in France by Cardinal Polignac, A.D. 1713. Dr. Neil Arnott patented his stove Nov. 14, 1821, and William Jackson patented a method of using and ventilating apparatus to the Arnott stoves, Oct. 22, 1838.

STOW-ON-THE-WOLD (Battle). — Lord Astley, with 3,000 cavalry, marching from Worcester to join Charles I. at Oxford, was defeated at this place, in Gloucestershire, by Colonel Morgan. His men were killed, captured, or dispersed, and he was taken prisoner, March 22, 1646.

STRAFFONDIANS.—Lord Digby and fifty-four other members of the House of Commons voted against the bill of attainer against the earl of Strafford, April 21, 1641. Their names were posted in the streets as "Straffonians, who, to save a traitor, would betray their country."

STRAFFORD (Birth) was founded by Jaromar, prince of Rügen, A.D. 1209. It became a free imperial town and a member of the Hanseatic League, and was besieged by Wallenstein, who, notwithstanding his boast that he would "take it if it were bound to heaven with chains," had to abandon the attempt, after losing 12,000 men, in 1628. Sweden obtained possession at the peace of Westphalia, Oct. 24, 1648. It was captured, after a bombardment, by Frederick-William of Brandenburg in 1678, and was restored to Sweden in 1679. Charles XII., on his return to Europe, arrived here Nov. 22, 1714. It surrendered to the combined forces of Prussia, Denmark, and Saxony, Dec. 21, 1715, and was again restored to Sweden in 1720. The Prussian general Dohna blockaded the place, but left to follow the Russian army, in February, 1758. By a convention with Sweden, England paid £50,000 to put it in a state of defence, Oct. 3, 1805. General Essen, commander of the fortress, issued forth, and attacked and defeated the French blockading force in April, 1807. The French having collected an overwhelming army under its walls, the Swedish monarch listened to the entreaties of the inhabitants and surrendered it, Aug. 22. Colonel Schill, a Prussian officer, took possession in 1809. The French, under General Gratien, recovered it by assault, Schill falling in the defence, May 21. Napoleon I. seized it with all the steps in the harbour, arming them as privateers against the commerce of England, in January, 1812. A treaty with Sweden secured to England the right of an entrepôt in the harbour for twenty years, March 3, 1813. It was finally ceded to Prussia in 1815.

STRAND (London).—Henry III. granted this important thoroughfare to his uncle, Peter of Savoy, A.D. 1245, and the result was the erection of the Savoy Palace (q.v.). The Strand was first paved in 1532. Somerset House (q.v.) was commenced in 1549; Salisbury House was finished in 1602, and pulled down in 1695; and Northumberland House was built about 1608. The Strand, or Waterloo Bridge (q.v.), was commenced in 1811, and various improvements in the road were authorized by the Strand Improvement Act, 7 Geo. IV. c. 77 (May 31, 1829).

STRASBURG (France), the ancient Argentoratum, originally a town of the Triboci, where the Romans had a manufactory of arms, was the scene of a victory gained by Julian over the Alemanni A.D. 357. It fell into the hands of the Alemanni in 455, and after the victory gained over them by Clovis, in 496, a fort, called Strateburgum, was built on the site of the city, which had been reduced to ruins. An improvement in its condition took place after the abbey of St. Etiene was founded by Adelbert, duke of Alsace, in 718. It was annexed to the German empire in 870. Louis II. the German and Charles the Bald renewed their alliance here in 843, the oath taken by Charles on the occasion being the most ancient existing specimen of the Romance language. It obtained important privileges from the emperor Philip in 1205, and formed, with other cities on the Rhine, a league to protect the navigation of the river in 1253. Protestantism having gained ground, its adherents obtained a number of the churches in 1523. A contest for the bishopric took place between the two religious parties in 1593. With the province of Alsace, it was ceded to France, Louis XIV. making a solemn entry into the city Oct. 23, 1681. Dreadful atrocities were perpetrated by the mob during the revolution in 1789, and still greater by the Convention, upon the inhabitants, on account of a royalist reaction in 1793. Moreau, with his army, crossed the Rhine near Strasburg, June 23, 1796. Louis Napoleon was foiled in an attempt to create a revolution here, Oct. 29, 1836, and sent off to America. The cathedral of Notre Dame was founded in 1015, and completed in 1439. The tower, of which Erwin of Steinbach was the architect, was carried on by his son and his daughter after his death in 1318. The famous clock was constructed in 1571.

STRATFORD-UPON-AVON (Warwickshire) was a place of importance as early as A.D. 700. The long stone bridge was built by Sir Hugh Clopton, lord mayor of London, in 1461, during the reign of Henry VII. The free grammar-school, at which Shakespeare was a pupil, was founded in 1482. The town-hall was built in 1768, and the ancient church was repaired at considerable cost in 1840. It is celebrated as the birthplace of Shakespeare (q.v.).

STRATFORD.—This kingdom, between the Roman walls extending from Cumberland to the Clyde, was occupied by an independent British tribe about A.D. 600. It was ravaged by Halfdane, a Northman, in 875, and the people chose Edward the Elder for their king in 924.

STRATFIELDSAYE (Hampshire).—This estate, near Silchester, was purchased for the duke of Wellington by the British nation for the sum of £263,000, Nov. 6, 1817.
STRATTON (Battle).—The Cornish-men who took up arms for Charles I. defeated Henry Grey, earl of Stamford, at this place in Cornwall, May 16, 1643. The parliamentarians suffered severely in the battle.

STRAWBERRY HILL (Surrey).—This house at Twickenham, near London, was built by Mrs. Clevenix, who let it to Horace Walpole, earl of Orford, in May, 1747, and sold it to him the following year. In 1750 he commenced his improvements for converting the building into a miniature Gothic castle, and in 1757 he established the Strawberry Hill private printing-press. The extensive collection of articles of taste accumulated here by Walpole was sold by auction in April and May, 1842, the total proceeds amounting to £29,615. 8s. 9d.

STREET RAILWAYS.—Stone tramways for carriages were introduced in the Commercial Road, London, A.D. 1830, and subsequently in many other streets. Iron tramways were established in America, and introduced at Birkenhead in 1860. The first London line, extending from the Marble Arch to Bayswater, was opened March 23, 1861; the line from the Victoria station to Westminster Abbey was first used April 15; and the line from Westminster Bridge to Kennington in the same year. They were all removed in 1862.

SREILITZ, a military body resembling the Janissaries of Turkey, was instituted by Ivan IV., of Russia, about A.D. 1547. A serious revolt broke out among them in 1682. They took up arms in favour of Sophia, step-sister to Peter I., in 1689. This revolt was suppressed, but they rebelled again in 1688, when Peter I. abolished the corps, and substituted regular troops in their place.

STRIKES.—The practice adopted by operatives of endeavouring to compel employers to accede to their demands by 'striking,' or refusing to work, was introduced by the Trades Unions (q. v.).

A.D. 1810. About 30,000 spinners remain on strike in Lancashire for four months, and at length return to work at reduced wages.

1836. Nov. 5. The operatives at Preston unite in an unavailing strike, which continues thirteen weeks, and occasions a total loss of £10,136.

1837. April 8 to Aug. 5. The Glasgow cotton-spinners strike for an increase of wages, but are compelled by necessity to return to work without gaining their object. The strike occasioned a loss of £194,540.

1839. A strike takes place among the operative engineers.

1845. Nov. 5. to April 30. About 18,000 factory hands strike at Preston, which incurs a total loss of £653,916.

1850. July. The London builders strike in favour of the nine hours' movement. Oct. 31. The masons return to work. The total loss caused by this strike was £449,873.

SUBMARINE TELEGRAPH.—The first successful transmission of an electric discharge through water was effected by Dr. Watson, between Westminster and Lambeth, July 14, 1747, and in 1849 successful subaqueous
telegraphs were laid across the Rhine, by Werner Siemens, Charles V. Walker attached two miles of gutta-percha covered wire to the line at Folkstone, and, after steering out into the open sea, transmitted messages to London, thus proving the practicability of submarine telegraphy, Jan. 10, 1849. Jacob Brett laid an experimental wire between Dover and Calais, Aug. 28, 1850, and the permanent cable was laid Sept. 25, 1851. The line from Holyhead to Dublin was completed June 1, 1852; and that from the South Foreland to Ostend, May 4, 1853. The first line of any length was from Varna to Balacalava, which was laid during the Crimean war in 1855, and established communication through a distance of 310 miles. In 1854 Whitehouse commenced his researches on the possibility of an Atlantic telegraph, and 2,500 miles of cable were prepared, and stowed in equal quantities in the English steamer Bulldogs, Agamemnon, and the American man-of-war Niagara. The Niagara commenced paying out her cable from Valentia, on the west coast of Ireland, Aug. 7, 1857, but the cable snapped Aug. 11, and operations had to be suspended. The two vessels again sailed from Queenstown, May 29, 1858, on an experimental trip, after which they returned to Plymouth, and Thursday, June 10, they left Plymouth for the purpose of laying the cable. They reached the middle of the Atlantic June 26, and having joined their cables, commenced paying the mout, but after a series of breakages, they were again compelled to return to Queenstown, whence they once more set sail July 17. They reached the point of junction July 23, and on the following day they parted, the Agamemnon steering for Valentia, and the Niagara for Trinity Bay, Newfoundland. Both vessels arrived in safety at their respective ports, Aug. 6, and on the 7th, Cyrus W. Field announced the successful completion of the enterprise. The first public despatch, a message from the Queen to President Buchanan, was received Aug. 17, and the cable continued effective until September 1, when the signals became unintelligible.

Subsidies, or duties imposed by parliament on certain staple commodities in addition to the custuma antiqua et magnus, were first levied by Ethelred II. to defray the expense of the Danegelt. A.D. 901. They were also demanded by William I. By Edw. III. stat, 1, c. 20 (1340), the Commons granted liberal subsidies of wool to defray the expenses of the French wars, and by 11 Hen. IV. c. 7 (1409), they are confounded with the ordinary customs. In 1888 the parliament made the unusually large grant of two subsidies and four-fifteenths, in consequence of the Spanish armada. The last acts granting subsidies to the sovereign, were 15 Charles II. cc. 9 & 10 (1663).

Succadana, or Sacadina (Borneo).—The chief town of a state of the same name, to which the Dutch began to trade in A.D. 1604. In 1623 they abandoned their factory here. They joined the sultan of Pontianak in fitting out an expedition against this place, which they took and utterly destroyed in 1786.

succession. (See Act of Settlement and Hanoverian Succession.)

succession Duty.—By 16 & 17 Vict. c. 51 (Aug. 4, 1858), real property was made subject to the legacy duty, paid on succession to every kind of property. This act was to be taken to have come into operation May 19, 1858.

succession War.—In anticipation of the death of Charles II. of Spain, a treaty was signed Aug. 19, 1698, by England, the German empire, Holland, France, and smaller states, partitioning his empire amongst the competitors for the crown—the prince of Bavaria, the dauphin of France, and the Archduke Charles—in certain proportions. Charles II., however, bequeathing by will, his empire to the prince of Bavaria. He died suddenly, Feb. 6, 1698, and another secret partition treaty was signed March 25, 1700. Charles II., by advice of the papal court, declared Philip, duke of Anjou, his sole heir, and died Oct. 21, 1700 (O. S.). The new monarch having been crowned as Philip V., his title was generally acknowledged, except by the emperor Leopold I., when war commenced in Italy, and the French were defeated by Prince Eugene, at Carpi, in August, 1701. England and Holland afterwards joined the emperor, and the triple treaty of the Grand Alliance was signed Sept. 7, 1701. Marlborough was despatched to Holland, and war was declared against France and Spain on the same day, May 4, 1702, at the Hague, Vienna, and London. It was brought to a close by the treaty of Utrecht, signed by France, Portugal, Prussia, Savoy, the United Provinces, and England, March 11, 1713 (O. S.). The emperor acknowledged Philip V. by the peace of Radstadt, signed March 6, 1714 (O. S.).

Sudbury (Suffolk).—A convent of Dominican friars was established here A.D. 1272. The grammar-school was founded in 1491. The town received its first charter of incorporation from Queen Mary in 1554. It was confirmed by Elizabeth in 1559. Sudbury was disfranchised by 7 & 8 Vict. c. 59 (July 29, 1844).

Suez. —This powerful Gothic tribe, known to the Romans as early as B.C. 125, invaded Gaul B.C. 71, and were defeated and driven across the Rhine B.C. 53. They joined Rada-gaisus A.D. 405, and, having been defeated, recrossed the Rhine in 406. They entered Spain in 409, and founded a kingdom. Part of their territory was wrested from them by Wallia, general of the Goths, in 417, and other parts were captured by the Vandals in 429. They were almost exterminated in a great battle fought near Astorga by the Visigoths in 456, and the remnant of the tribe was incorporated with them in 554.

Suez Canal.—In 1852, M. de Lesseps, a
French engineer, formed the idea of obtaining funds by means of a joint-stock company for cutting a ship canal across the Isthmus of Suez. He received a firman from Mohammed Said in 1854, and he came to England to give information on the scheme in 1855. The charter of concession was granted by the viceroy of Egypt Jan. 5, 1856. The subscription was opened in November, 1855, and the company was definitely constituted Jan. 5, 1859.

Suffide, Sefi, Soofee, or Seafavean Dynasty, was founded in Persia by Ismael Shah, descended from Ali, cousin and son-in-law of Mohammed, a.d. 1502. It was expelled by Nadir Shah in 1736.

Suffolk (England) formed part of the kingdom of the East Angles a.d. 570. Alfred planted a colony of Danes in Suffolk in 879. The archdeaconry was erected in 1127.

Suffragan Bishops, before the Reformation, consecrated to serve in the absence of the diocesans on embassies, were established by 26 Hen. VIII. c. 14, which named twenty-six places as their nominal seats, a.d. 1555. This act was repealed by 1 & 2 Philip & Mary, c. 8 (1555), but re-enacted by Elizabeth. They are named as ministering holy orders in the thirty-fifth canon of 1608; and Charles II., in his Brevia declaration (1689), expressed his intention to establish them in every diocese. A catalogue of those who had filled the offices in England was drawn up by Wharton, and published in Dr. Pegge's dissertation on bishops in partibus in 1784. By 52 Geo. III. c. 62 (1812), the consecration of coadjutors in Ireland was authorized.

Sugarcane was called by the Romans mel arundinaceum, and is spoken of by Pliny as used only in medicine, a.d. 72. It was not known in northern Europe as an article of food till about the end of the 11th century. Probably people were only acquainted with it in the form of sugar-candy, which is mentioned in the Arabians as Litium in 1538. Marggraf discovered it in beet-root and other plants in 1747; and M. Achard for the Prussian government in 1799. Napoleon I. encouraged the cultivation of the beet-root in France, with a view of injuring the colonial trade of England, and he offered a premium for the manufacture of sugar from this plant, March 25, 1812. The first tax on sugar was imposed by 1 James II. c. 4 (1685). The duties on British and foreign, and free and slave-grown sugar were equalized by 9 & 10 Vict. c. 63 (Aug. 15, 1846), regulated and reduced by 11 & 12 Vict. c. 97 (Sept. 4, 1845), again increased by 18 & 19 Vict. c. 21 (May 25, 1855), and reduced by 20 & 21 Vict. c. 61 (Aug. 25, 1857).

Sugarcane, as flourishing in India and Arabia Felix, is referred to by Dioscorides about a.d. 54. It was introduced from Asia into Cyprus, where it was much cultivated in 1148. From that island it was transplanted about 1420 to Madeira, whence it was carried to the West Indies in 1506. There were twenty-eight sugar-works in St. Domingo in 1518. It is said to have been cultivated in Spain before the Moorish invasion of 711.

Sugar-refining.—The Saracens seem to have practised the boiling down of the juice of the cane, to produce sugar, in Spain, in the 8th century. In Europe the Venetians were the first to purify the raw article, the art being probably derived from the East. It was commenced in England in 1544, but at that time sugar could be procured cheaper from Antwerp. Dresden had a refinery in 1597. Loaves of sugar were sold in this island in 1263. The vacuum-pump was invented by Howard in 1812, and Dr. Scroffen introduced important improvements in 1849.

Suharupunte (Hindostan).—On the dismemberment of the Mongol empire, about a.d. 1757, this town was given to a Rohilla chief, at whose death, in 1755, it came into possession of his son, and subsequently into that of Scindia, from whom it was taken by the British in 1803. A botanic garden was formed here in 1817, and a medical garden was annexed to it in 1826.

Suicide.—The earliest recorded examples of self-destruction are those of Samson, B.C. 1117, and Saul, B.C. 1055. The Greek philosophers condemned it as criminal, and by the laws of Thebes and Athens the bodies of suicides were deprived of funeral honours. The first instances of suicide at Rome occurred during the reign of Tarquinius Priscus (B.C. 618–578), in consequence of the aversion of the soldiers to labour in the construction of sewers. Plutarch mentions an extraordinary mania for suicide that raged at one time among the women in ancient Miletus, and states that it was at length checked by an edict, announcing that in future the bodies of those who destroyed themselves should be dragged naked through the streets by the rope with which the act was committed. Sixty people committed suicide at Rome in 1506, and no fewer than 1,300 cases of self-destruction occurred at Versailles in 1783. The old practice of burying the bodies (with a stake through them) of suicides at the meeting of four cross-roads, was abolished by 4 Geo. IV. c. 52 (July 8, 1823), which ordered that in such cases the interment should take place between the hours of nine and twelve at night, in an ordinary churchyard, and without any religious ceremony.

Sulphur was used by the ancients to purify the houses of the guilty and the unfortunate; and Pliny mentions it in the purification of wine a.d. 72. The Sicilian government entered into a contract with M. Taix, a Frenchman, by which he received a monopoly of the extensive mines there, Aug. 1, 1838. Through the interference of the British government, this monopoly was abolished in July, 1840. Compensation to British subjects who had been engaged in the trade was paid, to the amount of £65,610, in January, 1842.

Sumatra (East-Indian Archipelago).—This island is first mentioned by Nicolò di
Celebes, that Portuguese landed here in 1500. The Portuguese shipping in the harbour of Acheen was destroyed by the natives in 1575, and the Portuguese tried to get possession of the town in 1582, but were defeated. The Dutch established themselves on the west coast in 1600. They erected another factory at Padang in 1649, and a third factory at Palembang in 1664. The English established a colony at Bencoolen in 1838, and all the Dutch possessions, together with the island of Java, fell into the hands of the English in 1811. They were restored in 1816. The Dutch exchanged Malacca and some settlements in Hindostan for the English possessions at Bencoolen in 1824.

SUMMERHAUSEN (Battle).—Albert of Brandenburg, called the Wild, was defeated by Duke Maurice at this place, in Germany, after a murderous engagement, July 9, 1553. Maurice died of his wounds two days afterwards.

SUMPTUARY LAWS.—The code of Lycurgus, B.C. 546, contained many severe enactments for the suppression of luxury among the Spartans, and the Locrian legislator Zaleucus passed several sumptuary laws, the most remarkable of which prohibited the use of pure wine, B.C. 660. The Lex Oricha, passed B.C. 181, limited the number of guests permitted at the feasts of the Romans, and a law for restraining the expense at such entertainments was passed by the consul Fannius, B.C. 161. Marcus Emilius Scaurus introduced a severe sumptuary law B.C. 115, for regulating the diet of the different classes. Numerous enactments were made in England for the suppression of extravagance, especially during the reigns of Edward III., Edward IV., and Henry VIII. (see LUXURY, etc.), which were repealed by James I. c. 25 (1604). A restriction upon the number of dishes allowed at dinner, imposed by 10 Edw. III. st. 3 (1336), was repealed by 19 & 20 Vict. c. 64 (July 21, 1856), which finally abolished the English sumptuary laws.

SUM.—Archimedes of Syracuse, who died B.C. 212, endeavoured to measure the sun's diameter, and Hipparchus, who died B.C. 135, made several important discoveries respecting its motion. The solar apogee was discovered by Albategnus or Al Batani, A.D. 880. Copernicus adopted his system in 1507 (see COPERNICAN SYSTEM), and Tycho Brahe, who died in 1601, taught that the sun, with its circumrevolving planets, moves round the earth. The solar spots were observed by Galileo in 1611, and the revolution of the sun round its axis was discovered in 1676. The phenomena known as Bailey's Beads were first observed at the eclipse of 1793, and during the eclipse of 1860 Mr. Warren de la Rue obtained two excellent photographs of the sun's disc. (See ASTRONOMY and ECLIPSES.)

SUNDAY (Middlesex).—This small village, on the banks of the Thames, is supposed to have been the place at which the Iceni, under Boadicea, were defeated by Suetonius Pau-
SUNDAY SCHOOLS.—In 1699 a Sunday school was established by the Abbé John Baptist de la Salle at Paris; but after six years it was abandoned. The Rev. Theophilus Lindsey established a Sunday school at Catterick in Yorkshire in 1763, and in 1769 Miss Ball commenced a similar establishment at High Wycombe, Bucks; but the honour of having founded the Sunday-school system is awarded to Robert Raikes, of Gloucester, in 1783. The Society for the Support and Encouragement of Sunday Schools was formed in 1785, and the Sunday-School Union in 1803.

SUNDAY-TRADING BILL.—Lord Robert Grosvenor obtained leave in the House of Commons to bring in a bill for the prevention of Sunday trading in the metropolis, April 17, 1855. The second reading met with much opposition, but was agreed to without a division, May 3. A demonstration against the measure was made in Hyde Park, Sunday, June 24; and another, when it was estimated that 100,000 persons were present, July 1. On the same day a meeting was held in Greenwich park, 10,000 persons being present. The bill was withdrawn July 2.

SUNDERLAND (Durham).—A monastery founded at Monkwearmouth, A.D. 674, in which the venerable Bede was educated, was destroyed by the Danes in the 9th century. Sunderland is first mentioned as a port in a charter granted by Hugh Pudsey, bishop of Durham, at the close of the 12th century. A fresh charter of incorporation was granted by Bishop Morton in 1634, and Charles II. granted another, greatly extending the privileges of the borough, in 1661. The south pier was commenced in 1723, and the north pier in 1756. The first Sunderland life-boat was constructed in 1799. The church was built in 1719, and the iron bridge over the river Wear, commenced Sept. 24, 1793, was finished Aug. 9, 1796. The exchange was opened May 26, 1814, and the town was first lighted with gas March 9, 1824. Sunderland docks were opened in June, 1850, and the bridge, which had been widened and much strengthened and improved, was re-opened in 1859. The Orphan Asylum was opened in 1860.

SUNDERLAND ADMINISTRATION.—A modification of the Stanhope administration (q.v.) ensued in 1718, the earl of Sunderland becoming first lord of the Treasury, and president of the Council, March 20. The cabinet consisted of—

First Lord of the Treasury and President of the Council
Lord Chanceller
Privy Seal Duke of Kingston
Privy Seal Earl Stanhope and Mr. State
Chancellor of Exchequer Mr. Aislabie
Secretary at War Lord Castlereagh
Admiralty Earl of Berkeley

Earl Cowper resigned the lord-chancellorship April 15, 1718, and the great seal was placed in commission until May 12, when Lord Parker was raised to the office. The earl of Sunderland retired from the presidency of the council Feb. 6, 1719, and was succeeded by the duke of Kingston, who gave up the office of privy seal, which the duke of Kent received. Robert Walpole joined the ministry as paymaster-general, June 4, and Lord Townshend as lord-president of the council, June 11, 1720. The duke of Kingston, who gave up that office, superseded the duke of Kent as privy seal, Mr. Aislabie resigned the chancellorship of the exchequer Jan. 23, 1721, and Earl Stanhope died Feb. 5, 1721. Lord Townshend became secretary of state in his place, Feb. 8, and, March 4, Lord Carteret succeeded Mr. Craggs, who died Feb. 16. Sir Robert Walpole became first lord of the treasury April 3, 1721. (See WALPOLE ADMINISTRATION.)

SUNDIAL. (See DIALS.)

SUPERANNUATION ACT.—By this act, 22 Vict. c. 26 (April 19, 1859), the laws concerning superannuations and other allowances to persons holding civil offices in the public service are amended.

SUPPORT THE LORD.—For a thousand years after the institution of this sacrament, common bread was used in its celebration, wafers being introduced about the 11th century. Sometimes the sacramental wine was mixed with the ink used for signing documents, to add to the solemnity of the signature. The earliest known instance of this custom took place in 645. (See COMMUNION.)

SUPRA-LAPSARIANS. (See CAVENDISH.)

SUPREMACY. (See ACT OF SUPREMACY.)

SURAT (Hindostan) is first mentioned A.D. 1530, when it was taken and destroyed by the Portuguese. The English obtained permission to establish a factory here in 1612, and all the possessions of the East-
The English Company were placed under the council of Surat in 1657. It was plundered in 1664 by the Maharatta chief Sevagee, when the English factory was defended with success. The seat of the presidency was transferred to Bombay in 1666. The Dutch captured the castle of Surat in 1731, and the nabob resigned his government to them, May 13, 1800. The English church was consecrated by Bishop Heber in 1825.

Surgeons were separated from the barbersurgeons (q.c.) A.D. 1745. Their privileges were confirmed, and the title changed to that of the Royal College of Surgeons in London, in 1800. The college received a new charter, and its name was changed to the "Royal College of Surgeons of England." A.D. 1844. Power to hold examinations and grant certificates was confirmed by 21 & 22 Vict. c. 90, stat. 45 (Aug. 2, 1858). This statute took effect from Oct. 1 in that year. The hall in Lincoln's-Inn Fields was erected in 1800, and rebuilt from designs by C. Barry in 1836. The annual commemorative oration is delivered Feb. 14.

Surgery was practised with considerable skill by the ancient Egyptians. Hippocrates, of the school of Cos, is pre-eminent for the degree of advancement to which he brought the art, B.C. 400. The practice of dissecting the human subject did much to improve it, and was commenced by Erasistratus, at Alexandria, in the 3rd century. It was long discon tenuated among the Romans, who were enjoined by public edicts to follow the good old plan of healing, through the medium of religious incantation. Asclepiades made some efforts to break through the popular superstition B.C. 96. Celsus enjoyed considerable celebrity as an operator about A.D. 17. Claudius Galen, of Pergamum, in Asia Minor, who ultimately settled at Rome, obtained great eminence, 130—200. It was practised by the Jews on those of their own nation, and also on Christians and Mohammedans in the 12th century; and by the monks, against whom Pope Innocent II. launched prohibitions, threatening them with severe penalties, in 1139. Pitard laid the foundation of the College of Surgeons at Paris in 1271. Vesalius brought the light of anatomy to bear upon it in 1539, and Ambrose Paré, surgeon to four successive kings of France, exerted a potent influence upon his profession (1509—1590). Wiseman, surgeon—surgeon to Charles II., wrote extensively on the art in 1676; and Harvey is known by his discoveries in 1628. Other distinguished names in England are Percivall Pott (1713—1758); John Hunter (1728—1793);ordinary, the successful lithotomist (1635—1753); Monro, his pupil (1697—1767); Abernethy (1763—1831), and Cooper (1768—1841).

Surinam (South America).—The coast of Dutch Guiana, on which the colony of Surinam is situated, was discovered by Columbus in August, 1498, and was visited by Sir W. Raleigh in 1595. Surinam was visited by the French in 1640, was taken by the English in 1660, and granted by charter of Charles II. to Lord Willoughby in 1632. The Dutch wrested it from the English in 1667. It was shortly afterwards retaken, but was ceded to the Dutch in 1669. By the peace of Westminster, signed in 1748, it was allotted to the Dutch, in exchange for the province of New York. It was taken by the English in 1799; restored at the peace of Amiens, March 25, 1802; again taken May 5, 1814; and finally restored to Holland in 1814.

Surnames, or Sirenames.—The former signifies names over and above Christian names; and the latter, names derived from a sire or father. The Greeks and Romans used patronymic appellations, in addition to their own individual names. Camden states that surnames first became fixed in France A.D. 1000, and that the practice of distinguishing English families by them was established after the Norman conquest. Hallam says they originated in the 11th century, when "the nobility began to add the names of their estates to their own; or, having acquired a distinctive appellation, transmitted it to their posterity." The use of surnames in a few instances may be traced to the beginning of the 10th century, though they did not become general till the 13th. The ancient Scotch prefix Mac, signifying son, and the Irish O', or grandson, are still common. The English commoners also added the affix "son" to the father's Christian name, and thus produced a numerous class of surnames.

Surplice became an ecclesiastical vestment at an early date, and was probably derived from the white linen ephod of the Jewish priests. The custom of wearing white garments by priests is mentioned by St. Jerome as early as A.D. 376. In the ancient church the surplice was the same as the alb, which was worn during divine service, and by the inferior clergy, who were forbidden to take it off until the conclusion of the liturgy by the council of Narbonne in 589. The word surplice was introduced about the 12th century. By the twelfth canon of the council of Narbonne, in 589, the clergy were directed not to take off the alb (probably at that time the same with the surplice) till after mass.

Suprise Plot. (See Bye, and Surprize or Surprising Plot.)

Surry (England).—This county formed part of the kingdom of Sussex, founded by Ella A.D. 491. It was annexed to the kingdom of Wessex in 725, was subsequently conquered by the Normans, and again reverted to Wessex, under Egbert, in 823. The archdeaconry of Surrey was founded about 1120, and sheriffs were first appointed by Henry II., Oct. 23, 1154. Thomas Holland, earl of Kent, was created duke of Surrey Sept. 29, 1307, but the title was forfeited in 1400. An ecclesiastical commission to inquire into all church matters in this county was issued by Cromwell, Dec. 7, 1657.
of steel was erected over the Danube at Vienna in 1827 and 1828, and an iron one across the same river, constructed by Tierney Clark, in 1849, is considered the finest in the world.

Sussex (England) was held by the Regni at the Roman invasion B.C. 55. Ella, with his three sons, landed and commenced to found the South Saxon kingdom A.D. 477. Having taken Andreas-cestre, he assumed the title of king in 491, and was chosen Bretwalda in 492. Wilfred, archbishop of York, introduced Christianity about 650.

Sutlej (Hindostan), variously called, in ancient times, Hyphasis, Hypasia, Bibasis, Hypanis, and in the Sanscrit, Satadru, forming the limit of Alexander's march, B.C. 327, when he erected twelve altars, equal to the highest fortifications, on its banks, as monuments of his victories, and to define the extent of his empire. (See Alivay and Sobraon.)

Sutri (Italy), the ancient Sutrium, at one time an Etruscan city, was attacked with uncertain success by the Romans, B.C. 391. It was taken by them B.C. 390, was besieged and taken by the Etruscans, and on the same day recovered by the Romans, B.C. 389. It received a Roman colony B.C. 383. The Etruscans again besieged it, and were defeated in an engagement under its walls, B.C. 311. It was occupied by Agrippa at the outbreak of the Peruvian war, B.C. 41. A council held here A.D. 1046 affirmed the ancient title of the emperor before the Holy See, and deposed three rival popes. The anti-pope Gregory VIII. was besieged here by Pope Calixtus II. in 1121, taken prisoner, and carried to Rome seated on a camel, with his face to the tail, and a bristling hog-skin for a robe. Another council was held here in January, 1059.

Sutter, meaning in the Sanscrit a chaste and virtuous wife, is a term applied to the act of self-immolation on the husband's funeral pile, practised by the Hindoo women in India. It is spoken of by writers of the age of Alexander the Great. Diodorus relates an instance B.C. 300. A regulation passed by the governor-general, Lord W. Bentinck, in council, Dec. 14, 1829, declared the practice of burning the widows of Hindoos illegal.

Suzzi, or Wolodomer (Russia).—This province was erected into a distinct principality by Anrej, A.D. 1157, and was conquered by the Golden Horde in 1238.

Swabia (Germany), originally called Alemannia, took its present name when subdued by the Franks, under Clovis, A.D. 496. It was united to Austrasia, under Siegbert, son of Clotaire I., in 861. Christiani was introduced by St. Columba, about 600. Charles the Fat obtained it in part of the kingdom of East France in 876. It was included in the country of Franconia in 890, and erected into a duchy in 916. The duchy was made hereditary in the family of Frederick of Hohenstaufen, by Henry IV. in 1080. The line became extinct.
on the execution of Conrad in 1288. Swabia was made one of the six circles of the empire in 1501.

In 1519, the Swabian League, to put down private wars and maintain the public peace, was formed under the auspices of the emperor Frederick III. a.d. 1483, and, together with the troops of the empire, made such a demonstration against Albert, duke of Bavaria, as reduced him to submission and brought him into their alliance, a.d. 1492. The League deprived Ulrich Württemberg of his duchy, for breach of the public peace in 1519, and sold the territory to Austria in 1520. Its army, numbering 16,000 men, under the command of George Truchsess, destroyed several castles of the Franconian knights in 1523. The peasants arose in insurrection against the nobles in June, 1524. After several engagements they were finally checked by the army of the League, united with the troops of the elector Palatine, at Königshofen, June 2, 1525. The League effected the destruction of above 140 strongholds of nobles and banditti, from its establishment to its dissolution in 1533.

**Swansea** (Sea-fight).—Alfred defeated the Danish fleet off this place, supposed to be the modern Swansea, a.d. 877.

**Swan River** (Western Australia).—The first settlement was made in August, 1829, under very unfavourable circumstances, by a number of English emigrants, Captain Stirling having arrived out in the capacity of lieutenant-governor. Upwards of 2,000 settlers had reached the colony by March, 1830, and the site of the township of Perth was marked out towards the close of that year. The condition of the colony appeared so hopeless that serious thoughts were entertained of abandoning it in 1848. The inhabitants petitioned for a supply of convict labour, which they received in 1849.

**Swans** were only allowed to be kept by possessors of freehold lands and tenements valued at five marks per annum, free of charge, according to 22 Edw. IV. c. 6 (1483). By 11 Hen. VII. c. 17 (1497), the taking of their eggs was prohibited.

**Swanseæ** (Glamorganshire), called Aber-taw in Welsh, from its position at the mouth of the river Tawy, was made a corporate town a.d. 1835. The castle, built by Henry Beaumont, earl of Warkworth, in 1180, was used as a debtors' prison till abolished for that purpose in 1859. The first cooper-works were established in 1719, and the first cargo of foreign ore arrived in 1827. An act was passed for improving the harbour in 1791. The free grammar-school was founded in 1682; the town-hall was erected in 1827; the market-place, built at a cost of £20,000, was opened in 1839; the Wesleyan Methodist Chapel was erected in 1846, the Unitarian Chapel in 1847, and the National Schools were opened in 1849.

**Sweden** (Finland) was built by Gustavus I. of Sweden, and burned during the war with Russia, a.d. 1725. Admiral Greig attacked the Swedes in the roads off the town, capturing and burning the Gustavus Adolphus of 68 guns, whilst the Russians blockading the harbour effectually prevented the egress of their fleet, in 1785. It was invested by the Russians in the first week of March, and surrendered by the Swedish commander, after a three weeks' siege, with 2,000 pieces of cannon and a large flotilla, in 1808. Admirals Dundas and Penaud brought their vessels into battle-array before it Aug. 8, 1855, the bombardment commenced on the morning of the 9th, and, after destroying a great amount of property but producing small impression on the fortifications, the French and English fleets returned to Norna Aug. 11.

**Sweating**.—Sweating on the Gospels was introduced about a.d. 523. By 21 James I. c. 20 (1623), cursing and swearing are an offence punishable by law, and a series of fines may be imposed on such as practise them, by 19 Geo. II. c. 21 (1756). The last-mentioned act contained a clause ordering it to be read in churches four times a year. This provision was abolished by 4 Geo. IV. c. 31 (May 30, 1823). By the second article of war, 22 Geo. II. c. 33 (1749), seamen in the royal navy guilty of this vice are liable to trial by court-martial.

**Sweating sickness** first appeared in the army of the earl of Richmond when he landed at Milford Haven, a.d. 1455. It reached London Sept. 21, and after carrying off several thousand victims, ceased its ravages in October. In the summers of 1506, 1507, and 1528, it reappeared in this country, its final outbreak having been at Shrewsbury, where it raged from April to September, 1551. Holland, Germany, Denmark, Sweden, Poland, and part of Russia, were visited by it between the years 1525 and 1530. It broke out in Amsterdam, where it proved very fatal, Sept. 27, 1529.

**Sweden**.—This country was anciently inhabited by the Gothenes, and the people, like the other Scandinavian nations, regard the mythical Odin as the author of their civilization:

- Odin arrives in the north.

---

1318. According to Swedish historians, Christianity is introduced this year.

1100. The Swedes and Danes defeat Olaf I of Norway, and divide his kingdom between them.

1101. Olaf's Skatkonung ascends the throne and establishes Christianity.

1819. Valdemar I is compelled to abdicate.

1319. On the death of Hakon V. of Norway, the sceptre of that kingdom devolves on Magnus VII. of Sweden.

1899. Albert I. is defeated and made prisoner by Magnus of Denmark.

1307. June. Sweden is united to Denmark and Norway by the Union of Kalmar.

1400. The Swedes depose Eric of Pomerania.

1403. Sweden recovers her independence under Charles Knutson.

1470. Sten Sture obtains the protectorate of Sweden.

1476. The university of Upsal is founded by Sten Sture.

1477. Christian I. of Denmark relinquishes his claim to the Swedish throne.
A.D.
1451. Sten Sture, administrator of Sweden, opposes John of Denmark.
1497. Nov. 19. Sweden is again reduced to submission by John of Denmark.
1500. Feb. John invades Sweden and is defeated by the insurgents, at the battle of Meldorp, with the loss of 11,000 men.
1520. Death of Sten Sture.
1529. Sten Sture the younger heads the Swedes in arms for abolishing the Union of Calmar.
1592. Christian II. of Denmark invades Sweden, kills Sten Sture in battle at Bogesen (p. v.), and massacres the Swedish nobility.
1628. Jan. Gustavus Vasa lands at Calmar and takes the field against the Danes at the battle of 3,000 men.
1660. June. The peace of Stockholm is concluded with Denmark.
1701. Aug. 30. Peace with Russia is restored by the treaty of Nyostad, which establishes Russian superiority over Sweden.
1703. Rise of the factions of the Caps and Hats (g. v.).
1709. The Royal Academy of Arts is founded under the presidency of Linnaeus.
1713. August. War is declared against Russia.
1714. August 31. Peace with Russia is restored by the treaty of Abo.
1715. Execution of Count Brâhâ, Baron Horn, and six other noblemen, for conspiring to restore absolute monarchy in Sweden.
1717. Aug. 1. The senate is abolished, and absolutism is restored.
1788. War is declared against Russia and Denmark.
1798. March. Poland is invaded by the French, and becomes involved in religious difficulties with his subjects in consequence.
1813. Sigismund III. is restored by the diet of Arbooga.
1816. The States refuse their allegiance to Sigismund III., owing to his Roman Catholic tendencies.
1821. Gustavus Adolphus is made general of the Protestant allies during the Thirty Years' war.
1826. Gustavus Adolphus agrees to a six years' truce with Poland.
1832. Nov. 16. Gustavus Adolphus is slain at the battle of Parnawa.
1835. The truce with Poland is renewed for twenty-six years.
1836. March 29. An alliance against Austria is concluded with Prussia.
1839. War is commenced with Germany and Denmark.
1846. Sweden is raised to a high position by the peace of Westphalia.
1854. June 15. Queen Christina abdicates in favour of her cousin Charles Gustavus.
1863. Charles X. subjugates Poland.
1869. He invades Denmark and obtains the cession of important territories.
1870. May 3. Peace with Poland is restored by the treaty of Oliva (g. v.).
1874. Charles XI. invades Brandenburg.
1875. War is commenced with Denmark.
1879. Oct. 6. Peace with Denmark is restored by the treaty of Lune堡.
1880. The senate is deprived of its legislative power.
1887. The ex-Queen Christina dies at Rome.
1889. An act is passed declaring the king's authority absolute.
1899. The Kings of Denmark and Poland unite with the Czar against Sweden.
1900. Nov. 30. Charles XII. gains a splendid victory over the Russians at Narva (g. v.).
1918. Charles XII. invades Poland.
1706. Sept. 24 (O. S.). Peace with Poland is restored by the treaty of Alt-Ranstadt.
1707. The supremacy of Sweden is finally destroyed by the battle of Pultusk (g. v.). Charles XII. retreats to Bender (g. v.).
1714. Charles XII. leaves Bender and returns to Sweden.
1751. Dec. 11. Charles XII. is killed at the siege of Fredrikshall (g. v.). He is succeeded by his sister Ulrica Eleanora, who restores the constitution of Union.
1784. Aug. 30. Peace with Russia is restored by the treaty of Nyostad, which establishes Russian superiority over Sweden.
1793. Rise of the factions of the Caps and Hats (g. v.).
1795. The Royal Academy of Arts is founded under the presidency of Linnaeus.
1814. Aug. 31. Peace with Russia is restored by the treaty of Abo.
1796. Execution of Count Brâhâ, Baron Horn, and six other noblemen, for conspiring to restore absolute monarchy in Sweden.
1817. Aug. 1. The senate is abolished, and absolutism is restored.
1818. War is declared against Russia and Denmark.
1819. March. Poland is invaded by the French, and becomes involved in religious difficulties with his subjects in consequence.
1829. Sigismund III. is restored by the diet of Arbooga.
1830. The States refuse their allegiance to Sigismund III., owing to his Roman Catholic tendencies.
1835. Gustavus Adolphus is made general of the Protestant allies during the Thirty Years' war.
1840. Gustavus Adolphus agrees to a six years' truce with Poland.
1846. Nov. 16. Gustavus Adolphus is slain at the battle of Parnawa.
1849. The truce with Poland is renewed for twenty-six years.
1850. March 29. An alliance against Austria is concluded with Prussia.
1853. War is commenced with Germany and Denmark.
1856. Sweden is raised to a high position by the peace of Westphalia.
1864. June 15. Queen Christina abdicates in favour of her cousin Charles Gustavus.
1873. Charles X. subjugates Poland.
1879. He invades Denmark and obtains the cession of important territories.
1880. May 3. Peace with Poland is restored by the treaty of Oliva (g. v.).
1892. April 14. Sweden withdraws from the triple alliance and concludes a treaty with France at Stockholm.
1894. Charles XI. invades Brandenburg.
1895. War is commenced with Denmark.
1899. Oct. 6. Peace with Denmark is restored by the treaty of Lune堡.
1899. The senate is deprived of its legislative power.
1886. The ex-Queen Christina dies at Rome.
1888. An act is passed declaring the king's authority absolute.
1899. The Kings of Denmark and Poland unite with the Czar against Sweden.
1900. Nov. 30. Charles XII. gains a splendid victory over the Russians at Narva (g. v.).
A.D. 1659. May 3. Charles XV. and his queen, Louise, are solemnly crowned at Stockholm May 21. The laws prohibiting secession from the established (Lutheran) religion are abolished.

KINGS OF SWEDEN.

SWEDENBORGIANS, named after Emanuel Swedenborg, born at Stockholm, Jan. 29, 1688, who professed to have immediate intercourse with the inhabitants of the invisible world. He died in London, March 29, 1772. Swedenborgians are those who believe in the mission of Emanuel Swedenborg to promulgate the doctrines of the New Church, signified by the New Jerusalem in the Apocalypse. They numbered five persons in 1753, and had increased to thirty in 1787. Their first public association took place in Great Eastcheap in 1788. The Swedenborgian Printing Society was established in 1810, and the Swedenborgian Missionary and Tract Society in 1821.

SWEDISH EAST-INDIA COMPANY was formed at Gottenburg a.d. 1731.

SVENKA SOUND (Sea-fight).—The Russians, under the prince of Nassau, were defeated in this bay with a loss of 4,500 men, by Gustavus III., king of Sweden, July 9 and 10, 1790.

SWISS GUARDS were created by Louis XI. of France. A number of them were murdered by the mob that attacked Mar- selies, Oct. 6, 1799, and they were nearly exterminated in their defence of the Tuille- ries, Oct. 10, 1792. The corps was reorga- nized by Louis XVIII., Sept. 1, 1815. It was defeated during the three days' insurrection, July 27, and the last of them were dismissed at Valogne by Charles X. on his flight, Aug. 10, 1830.

SWITZERLAND (Europe).—This country was, in ancient times, inhabited by the Helvetsi, a Celtic people, and from them it afterwards received the name of Helvetia.

B.C.

120. Is inhabited by a confederation of four tribes of the Helvetsi.

107. One of the tribes, the Figurini, defeat the Roman consul, C. Cassius Longinus, on the banks of the Lake of Geneva.

51. They set out in a body to settle in the fertile districts of Gaul.

58. They are encountered by the Romans under Julius Caesar, who defeat them with great slaughter.

A.D.

69. Having been completely subdued by the Romans, an insurrection breaks out, which is supressed with great cruelty.

450. The Burgundians form a settlement in one part, and the Alemanni in another part of the country, reducing the inhabitants to a state of servitude.

534. The Franks conquer the country, and establish Christianity, which had been introduced in the time of the Roman domination.

840. It is agreed between Louis of Bavaria and Lothaire I., emperor and king of Italy.

889. Count Rodolph is proclaimed king of Burgundian Helvetia.

1016. It is bequeathed to the emperor Henry II. by Rodolph III.

1052. The whole country is incorporated with the German empire under Conrad II.

1097. Henry IV. appointed Bertold of Zahringen imperial varden.

1264. Rodolph of Habsburg by various inheritances became one of the most powerful lords.

1273. Rodolph is elected emperor, and exercises a tyrannical rule over the country.

1308. The cantons of Schwyz, Uri, and Unterwal- den, irritated by the tyranny of Gessler, who was killed by William Tell, throw off the yoke of Albert I., and form the con- federation of Schwyz, which afterwards gave its name to the whole country.

1315. Nov. 16. They defeat the Austrians with great slaughter at Morgarten.

1386. July 9. Leopold of Austria is defeated and slain at the battle of Sempach.

1388. April 9. The Austrians sustain a severe defeat at N afels.

1389. A twenty years' truce is concluded with Austria.

1415. The cantons invade and divide the Aareau.

1420. A great break out between Zurich and the cantons.

1444. Zurich is besieged by the cantons. A de- sperate engagement takes place outside the walls of Basel, between the troops of the French king, Charles VII., under the dauphin Louis, and the Swiss, which resulted in the defeat of the latter, followed by a truce.

1452. Sigismund, duke of Austria, mortgages to Zurich the town of Winterthur, his last remaining possession in the country.

1476. April 5. Charles of Burgundy is defeated at Grammont. June 24. Charles of Burgundy is defeated at Morat.

1477. Jan. 4. Charles of Burgundy is defeated and slain at Nancy. The states of Upper Burgundy purchase peace by payment of 150,000 florins.

821
1430. Owing to the disbandoing of troops, the country is in such a lawless condition, that nearly 1,600 assassins and robbers are condemned to death.

1431. The federal constitution of the Swiss cantons is set aside and regulated by this year's treaty of Stanly.

1499. Maximilian I, after several defeats, makes peace with the Swiss, and thus terminates their struggle for independence.

1513. The admission of Appenzell into the confederation completes the number of thirteen cantons. The Reformed doctrines begin to spread.

1531. Some cantons adopt the Reformed faith, and war takes place. Oct. 11. The battle of Cappel is fought, at which the Reformers are defeated, and Zwinglius is slain.

1648. The confederation is acknowledged as an independent state by the peace of Westphalia.

1712. Aug. The third and last religious war terminates by the Roman Catholics suing for peace, which is accordingly concluded at Aarau.

1728. A new constitution is adopted at Geneva.

1729. The territory of Basel is invaded and annexed by the French.

1789. Veltelina, Chiavenna, and Bormio, are annexed by Napoleon Bonaparte to the Cappine republic.

1798. The Bernese having been defeated by the French, Geneva, is annexed. April. The Helvetic republic is established.

1799. The French are driven from the central cantons by the Russians and Austrians. Massena defeats the Russians at Zurich.

1800. The Helvetic directory is suppressed.

1801. The French evacuate Switzerland. A general diet is called to re-organize the constitution.

1802. A general insurrection having broken out, Napoleon I. offers his assistance to restore order, and the Act of mediation is promulgated Feb. 20.

1813. The act is repudiated by the allied powers, whose armies pass through the country on their way to France after the battle of Leipzig.

1823. March 29. The independence of the country is acknowledged by the congress of Vienna. Aug. 7. A new federal compact is signed by all the deputies at Zurich.

1830. The dissolution of the constitution is effected in most of the cantons peaceably. In others it is attended with popular commotion and bloodshed.

1834. Peace is despatched by the proceedings of a number of Polish, German, and Italian refugees, who are expelled the country.

1839. A law of the diet comes into operation to establish a system of education independent of the clergy. It creates intense excitement, and caused the dissolution of the government at Zurich.

1844. A proposition from Aargau for the expulsion of the Jesuits, is brought before the diet and rejected.

1845. The disappointed party, raising a body called the black corps, invaded Lucerne, and under the command of Colonel Ohsenbein, sustained a severe defeat in April.

1846. The Sonderbund, or separate league, is formed by seven Roman Catholic cantons, Lucerne, Uri, Schwyz, Unterwalden, Freiburg, Zug, and Valay, to defend themselves against the Free Corps.

1847. July 5. The constitution of the diet declares the Sonderbund illegal. July 29. It decrees the expulsion of the Jesuits. Sept. 3. The Sonderbund resist the decree of the diet. Nov. 11. The armistice is signed. Freiburg, Nov. 24. At Lucerne. This is followed by the entire submission of the league, the suppression of the monasteries, and the expulsion of the Jesuits.

1848. Sept. 28. A new constitution is promulgated, the basis of which is a federal assembly, a federal council, and a federal tribunal. Both chambers of the federal assembly were the federal city.

**SWORD.—** This weapon, among the ancient Greeks, was straight, and frequently had both blade and hilt inlaid with gold, as mentioned by Herodotus, B.C. 409. It was made of brass by the ancient Romans, and afterwards of iron. The right to wear it was confined to military men and certain magistrates, under Augustus. The ancient Britons had a two-edged sword, and in Wales brass swords have been dug up. The claymore, a broad-bladed sword, was used by the ancient Highlanders. The Toledo blade was famed in Roman times, but is surpassed by the celebrity of that of Damascus. A company of sword-cutters was incorporated in England A.D. 1699. The London sword-dealers petitioned the lords of the Treasury for permission to import German swords, duty free, on account of the bad quality of those of English manufacture, in 1783. This stigma on our skill in that branch of manufacture was, however, entirely removed by Gill, of Birmingham, in 1786. Swords were used as an article of dress in England at the commencement of the 18th century; and, after falling somewhat into disuse, soon to have fixed themselves into fashion, in 1790. An order was issued by the earl marshal, prohibiting footmen from wearing them, Dec. 30, 1701. **SYBARIS (Magna Graecia), one of the oldest of the Greek colonies in this part of Italy, was founded by the Achaean s. B.C. 720. It attained the height of its power about B.C. 580. A number of the leading citizens having been driven from the town, took refuge in Crotona, whereupon the Sybarites marched against the place with an army of 300,000 men, but were totally defeated, the victors turning the course of the river Crathis through their city, and utterly destroying it, B.C. 510. An attempt made by the surviving inhabitants to establish themselves on the site was defeated by the Crotonians, B.C. 452. They were devoted to luxury,—hence the modern use of the term Sybarite. **Sycamore-tree.—** Some botanists regard this tree as indigenous to Britain; but others state that it is a native of the mountainous districts of Switzerland, Germany, and Italy. It is first mentioned as an object of culture in this country A.D. 1651; and in 1597 Gerard alludes to it as a stranger, much used in gardens for its
umbageous foliage. The sycamore is a species of maple; and experiments for ascertaining the quantity and quality of the sugar contained in its sap were made at Cannon Park, Stirlingshire, March 7 and 8, 1818. It was found that 116 parts of sap yielded one part of sugar. The purple-leaved sycamore originated in Jersey about 2188.

SYDNEY (New South Wales), capital of the colony, was founded and named after Viscount Sydney, then secretary for the colonies, Jan. 26, 1788. A printing-press and the Sydney Gazette were established by George Howe, March 5, 1803. The plans upon which the town was built were laid down in 1803. A legislative council was appointed in 1829; a bishopric was established in 1836; the museum was founded in 1838, and incorporated in 1853; and its university, founded in 1850, was opened Oct. 11, 1852. A branch of the royal mint was established here in May, 1855. By 18 & 19 Vict. c. 54 (July 16, 1855), a new constitution was conferred, and it was proclaimed in November following. St. Philip's, the oldest church in the colony, was built in 1798.

SYDNEY SUSEX COLLEGE (Cambridge) was founded by Lady Frances Sydney, widow of the earl of Sussex, A.D. 1598.

SYMONDS' INN (London).—This inn of court, in Chancery Lane, is supposed to derive its name from Thomas Symonds, who died in June, 1621. It was formerly the seat of the offices of the masters in chancery.

SYMPATHETIC INC. (See Inc.)

SYNAGOGUES, or Jewish places of worship, are of uncertain origin, ascribed, by some, to the period of the promulgation of the ceremonial law, B.C. 1401, and by others to the return from the Babylonian captivity, B.C. 536. Jerusalem is said to have contained 480.

SYNDERCOMBE'S PLOT.—John Syndercombe was employed by Colonel Sexby to assassinate Cromwell, and he made the attempt Jan. 19, 1657. He was tried and condemned Feb. 9, and died in prison Feb. 13.

SYND. (See Council.)

SYRIA (Aegean Sea).—The ancient Syros was noticed by Homer for its agricultural wealth B.C. 962.

SYRACUSE (Sicily), the most ancient of the Greek colonies in the island, was founded by the Corinthians, under Archias, B.C. 734.

B.C.

641. The Athenians are compelled to lay down their arms, 7,000 being made prisoners, and not a ship of their fleet escapes.

645. Dionysius, taking advantage of the popular sycamore consequent on the success of the Carthaginians, raises himself to despotic power, and soon after concludes a peace with them.

495—387. Dionysius fortifies the town, constructs new harbours, and greatly increases the naval force.

397. War is commenced against Carthage. Aided by a pestilence which broke out in the camp of their enemies, the Syracusans are completely victorious.

356. Dion makes himself master of Syracuse.

344. Timoleon obtains possession after a severe struggle, and introduces 80,000 immigrants.

275—216. Hieron II. reigns as king, concludes a treaty with the Romans, and raises the city to its highest degree of wealth and splendour.

214. The siege is formed by the Roman general Marcellus.

212. A part of the city is taken by the besiegers. The Carthaginians come to its assistance but, afterwards abandon it, and the other pordion surrenders. The magnificence works of art which are carried as plunder to Rome give the first impulse to the love of Greek art among the conquerors.

21. The city having fallen into decay, Augustus endeavours to restore it by sending a Roman colony.

A.D.

356. It is taken from the Goths by Belisarius.

669. The Saracens having captured it, accept a ransom.

783. It is again taken by the Saracens after a siege of nine months. The inhabitants are expelled, and the city is burned.

1088. Count Roger of Sicily makes himself master of Syracuse.

1542. With other towns on the island it is nearly destroyed by an earthquake.

1693. The eruption of Etna, accompanied by an earthquake, commits great havoc.

1798. July 16, Nelson, after his unsuccessful search for the French fleet, puts into the port for water and provisions, and is joined by all his missing frigates.

1814. The revolutionists select Syracuse as one of the seven towns in which military camps are to be formed.

1819. April 8. It surrenders without resistance to the Neapolitan fleet.

1860. Sept. 25. The garrison expost the cause of Garibaldi.

SYRIA (Asia), the ancient Aram, derived its name from the patriarch Aram (Gen. x. 22). The appellation Syria is supposed to be an abbreviation of Assyria, and it is first employed by Herodotus.

B.C.

1921. Abraham, having left his home at the command of God (Gen. xii. 1—4), arrives in Aram.

1047. Hiram, king of Tyre, sends workmen, and they build a house for King David (2 Sam. v. 11).

1040. David wages war against the Syrians and subdues them (2 Sam. vii. 11).

975. The country recovered its independence after the death of Solomon.

833—836. Jehoshah, or Joash, king of Israel, obtains three important victories over Benhadad (2 Kings xiii. 27).

740. Rezin, the first independent ruler, having formed an alliance with Israel against Judah, Tiglath-Pileser, king of Assyria, takes the field, slays Rezin, and reduces the country to a dependency.
SYR

B.C.

604. Having been for some time a province of Assyria, and afterwards seized by Pharaoh-Necho, king of Egypt, it is captured by Nebuchadnezzar.

333. After a subjection to the Babylonian and Persian powers of three centuries' duration, it falls under the rule of Alexander the Great, whose victory at Issus.

323.Seleucus Nicator assumes the sovereignty, founding the dynasty of the Seleucids.

301. His right, which has been disputed by Antigonus, is decided by the battle of Ipsus, and Antioch is founded as the capital.

114. The kingdom is rent by dissensions, and Antiochus the Great, brother of the reigning monarch, establishes a new sovereignty at Damascus.

65. The descendants of the Seleucids having continued to occupy the throne, Antiochus XIII. is defeated by Pompey, and the country subjected to the Romans.

63. A great number of the cities receive the gift of freedom from the Romans.

57. Gabinius, pro-consul, restores many of the cities which had been destroyed.

47. The rights which had been granted to the cities are confirmed by Julius Caesar.

A.D.

6. Judah and Samaria are added to the province.

17. Under the Cæsars it flourishes greatly, and the eastern boundary is fixed by Hadrian at the Euphrates.

258. It is overrun and nearly conquered by Sapor I., king of Persia.

261-264. Odenathus effects its deliverance.

61. The Persian Chosroes II., having reduced several other towns, takes Antioch, which he nearly destroys.

64. Chosroes II. conquers Palestine.

62. Heracleus takes the field against Chosroes II.

67. Heracleus drives him across the Tigris.

69. Siroes, the son of Chosroes II., makes a treaty of peace with Heracleus, one of its conditions being the restoration of the "true cross."

390. Some of the towns of Syria are taken by Mohammed.

392. His successor, Abu Bekr, summons the Arab tribes to his invasion.

393. A large army is corresponding to the call, siege is laid to Damascus.

364. July 30. The battle of Alzadin is fought, in which the Greeks under Varadan, general of Heracleus, are almost annihilated by the Arabs.

398. Another army of Greeks meet a similar fate on the banks of the Yarmuk.

397. Jerusalem is allowed an honourable capitulation.

408. Aleppo submits, Antioch pays a ransom of three hundred thousand pieces of gold, and Heracleus flees to Constantinople, leaving the province in the hands of the Saracens.

61. Damascus is made the seat of government.

762. The seat of government is removed to Bagdad by the Abbasis.

698. The Turkish usurper Ahmed Ebn e Tooloon subdues the provinces, together with Egypt, and establishes the Toolonides dynasty.

906. It is recovered by Caliph Moktafe.

909. Subjugated by Alakhd Mohaunem Ebn Tugh, another usurper.

970. Mouez conquers it after making himself master of Egypt, and founds the Fatimite dynasty, which holds the throne for a capital.

1076. Syria is invaded by the Turks, who established an independent kingdom under the princes of the house of Ortok.

1096. The caliph Mustali is dispossessed of a large portion by the Crusaders.

SZI

A.D.

1098. The Christian kingdom of Jerusalem is established.

1187. Saladin conquers it, and founds the Byoobite dynasty.

1250. It is partially destroyed by the revolt of the Babarihe Memlooks.

1260. Damascus is recovered by Seifed Deen, who is afterwards slain in an invasion of the Mongols.

1340. Syria is invaded by Tamerlane.

1416. The Cressian Memlooks are overthrown by the Turks, and the country is united to the Ottoman empire by the sultan Selim I.

1798. Feb. 6. Syria is invaded by Napoleon Bonaparte from Egypt. May 28. Napoleon Bonaparte abandons it after having been foiled in his attempt to take St. Jean d'Acre.

1833. May 8. The sultan having claimed the assistance of Russia, France and England in time of need, and peace is concluded.

1839. May. Hostilities are renewed. June 25. The Turkish army is defeated by Ibrahim at Nezib. July 4. The Turkish fleet desert to Egypt.

1840. July 13. England, Austria, Russia, and Prussia, conclude a treaty to enforce the submission of Mehmet to Turkey.

1841. Jan. 19. After hostilities of some duration, and much negotiation, Congress commits to give up Syria, and receives from the sultan the hereditary government of Egypt.

1860. May 28. A general attack is made upon the Maronites in the neighbourhood of Beyrout and the Lebanon by the Druses, when about 3,200 persons are massacred, the Turkish soldiers offering no protection to the unfortunate victims. June 21. Through the treacherous conduct of the governor of Doir al-Kamar, another shocking butchery upon the Maronites is perpetrated at that place. July 9. Similar atrocities are perpetrated at Damascus. July 14. A body of 5,000 Turkish troops set out from Beyrout to restore order, but before they arrive the murderous work has ceased. Aug. 3. The Turkish government, professing itself incompetent to put down the outbreak, a convention is entered into between England, Austria, Russia, France, and Prussia, to restore order. Fued Pasha is invested by the sultan with plenary powers to execute summary vengeance upon the assassins, and sets out from Constantinople. 167 persons are publicly executed at Damascus for being concerned in the massacres. It is estimated that about 12,000 persons lost their lives, 200 of whom were priests. 163 villages, 220 churches, and seven convents were also destroyed.

SYRO-MACEDONIAN ERA, called also the era of the Greeks, the era of the Seleucide, and the era of Alexander (B.C.), is the second of the two epochs adopted by the Greeks.

SZENTA, or Zenta (Battle).—A victory was gained over the Turks, by Prince Eugene, at this town of Hungary, Sept. 11, 1696.

SZISTÓVA. (See SISTÓVA.)
TABASCO (Mexico), the capital of the department of Tabasco, is celebrated as the scene of a great victory gained by the Spaniards, under Cortes, over the Indians, March 25, 1519. (See CEUTA.)

T A B E R N A C L E.—Three sacred tabernacles are mentioned in the Old Testament.—1. The ante-Sinaitic tabernacle, which was probably the dwelling of Moses, and was placed by the camp of the Israelites in the desert for the transaction of public business, B.C. 1491. 2. The Sinaitic tabernacle, which was set up on the first day of the first month in the second year after leaving Egypt, B.C. 1489. This is pre-eminently the tabernacle. 3. The Davidic tabernacle, which was erected by David, in Jerusalem, B.C. 1045, for the reception of the ark, while the old tabernacle remained at Gibeon, as the place where sacrifices were offered, until the days of Solomon.

T A B L E BAY (Atlantic Ocean), near the southern extremity of Africa, was discovered by Bartholomew Diaz, A.D. 1486.

T A B L E T U R N I N G AND M O V I N G is referred to in a passage in Ammianus Marcellinus (I. xxi. c. 1), who relates that two persons were brought before a court of justice for disseminating prophecies injurious to the emperor Valens, A.D. 370. It was first performed in modern times by two American girls, Margaret and Catheriné Fox, at a village near New York, A.D. 1849. A German merchant at the latter place communicated the mystery to his brother, in Bremen, and by the beginning of 1853 it had become a mania throughout Europe. The Rev. N. S. Godfrey, and other divines, ascribed the phenomenon to Satanic agency, others attributed it to electricity, while M. Arago, in France (July, 1853), and Faraday, and others in England, considered it the result of mechanical force.

T A B O R I T E S, a violent sect of Hussites (q.v.), so named from their stronghold on Mount Tabor, in Bohemia, which they fortified on being compelled to quit Prague, A.D. 1419. Under the command of their leader, John Ziska, they demolished monasteries, burned the priests alive, and then returned to Prague, May 20, 1420, and destroyed all that remained of the former magnificence of the churches. They defeated the imperialists near Kolin, Jan. 1, 1422, and again at Deutschbrod, Jan. 8, which town they burned, putting all the inhabitants to the sword. Their leader, Ziska, died Oct. 12, 1424. A civil war broke out between the Taborites and Calixtines (q.v.), another sect of Hussites, in 1433, and the latter, aided by the Roman Catholics, stormed and drove the Taborites out of New Prague in 1434, and defeated them with great slaughter at Bohemischbrod, May 28, 1434. Their leaders, the two Procops, fell in this battle, and two days after 10,000 pri-soners, who had been promised safety, were slain in cold blood. The Taborites rose again, but were completely annihilated by the emperor Sigismund in 1436.

T A B R I Z, or T A F B E E Z (Persia), is said to have been founded by the wife of Haroun-al-Rashid, A.D. 791. The castle, formerly a mosque, was built about 1250.

T A D M O R. (See PALMYRA.)

T A F F E T Y, a fine smooth silken stuff used in the 16th century for various articles of dress, and considered as a luxury. John Tyce, of London, brought its manufacture to a high state of perfection about 1571 or 1572.

T A G A N R O G (Russia).—This seaport was founded by Peter the Great, A.D. 1697. It was given up to the Turks, by treaty, in 1711, but was restored to the Russians, and rebuilt by them, in 1769. The emperor Alexander I. died here Dec. 1, 1825, and it was bombarded by the allied fleet, June 3, 1855.

T A G L I A M E N T O (Battle).—The French, under Napoleon Bonaparte, defeated the Austrians, under the archduke Charles, on the banks of this river in Italy, March 16, 1797.

T A G L I O C O Z Z O (Battle).—The French, under Charles of Anjou, defeated Conredin, the son of the emperor Conrad IV., of Germany, at this town of Naples, Aug. 23, 1268.

T A R R I T E S.—This dynasty was founded in the province of Khorassan, in Persia, by the Mohammedan general Taher, A.D. 820. It was supplanted by the Soffarides dynasty in 872.

T A H I T I. (See O T A H E T E.)

T A I L L E R B O U R G (Battle).—Henry III. of England, having passed over to France, advanced against this town, and sustained a defeat from Louis IX., July 20, 1242.

T A I L L O R S, among the Romans, were only required for mending, as the toga came from the loom ready for use. A thimble, similar to that now in use, was found in Herculaneum, destroyed in the Vesuvian eruption of A.D. 79. Tailors worked cross-legged upon boards in the 14th century. A strike amongst the journeymen tailors in the metropolis, which lasted several weeks, was brought to a termination by their acceptance of the masters' terms, April 27, 1834.

T A L A V E R A-D E- L A - R E Y N A (Spain).—This ancient town of Spain, called by the Romans Ebora Talabriga, was taken by the Moors A.D. 714, and again taken and destroyed by them in 1109. It was soon rebuilt, and became an appanage of the queens of Spain. Here 22,000 English, under Wellington, engaged and defeated about 45,000 French, under Marshals Victor and Jourdain, July 27 and 28, 1810. Cuesta, the Spanish general, was left in command of the town, but he abstained from effecting any material resistance, and on the approach of the French, in August, 1810, it was evacuated by the French Aug. 15, 1812.

T A L B O T Y P E, the name given to a process

823
of photography on paper, discovered by Fox Talbot, A.D. 1840, and patented by him in February, 1841.

TALLY-OFFICE.—The Tally Court in the Exchequer derived its name from the French taille, or tallier, to cut or notch. A tally is a piece of wood written upon both sides, containing an accquittance for money received, which, being cleft asunder by an officer of the exchequer, one part was delivered to the person who had paid the money, and the other was preserved in the exchequer. The use of tallies was abolished by 23 Geo. III. c. 82 (1782), but the old tallies were preserved in the exchequer, until the remodelling of that office by 4 Will. IV. c. 15 (May 22, 1834), when they were ordered to be destroyed. They were accordingly used to heat the stoves in the House of Lords, and are said to have been the cause, from having been burned in too large quantities, of the fire which destroyed the two houses of parliament, Oct. 16, 1834.

TALMUD.—The Jews have been accustomed to divide their law into written and unwritten—the former contained in the Pentateuch, the latter handed down orally, until the restoration of Jerusalem, under Hadrian, A.D. 135. The oral law is an interpretation of the written, and constitutes the text of the Talmud, which was first permanently composed by the rabbi Judah Haleakadosh, A.D. 220 or 225. A twofold code was subsequently added to it, one called the Jerusalem Gemara, composed in the 3rd century, and the other the Babylonian Gemara, compiled A.D. 500.

TAMUNNE (Euboea) was taken by the Persians when they attacked Eretria, B.C. 490. A great victory was gained here by the Athenian general Phocion, over Callias of Chalica, B.C. 350.

TANAGRA (Greece).—This town in Boeotia, also called Pheanandra, from the fertility of its neighbourhood, was the scene of a defeat of the Athenians, by the Lacedæmonians, B.C. 457. The Athenians invaded the country, and gained a decisive victory over the Boeotians, near Tanagra, B.C. 456 (see ΕΝΟΦΗΤΑ), and again B.C. 426. Tanagra continued to flourish in the 6th century.

TANGIER (Morocco).—This seaport, on the site of the ancient Tingis, which became a Roman colony and the capital of the province of Tingitana in the reign of the emperor Claudius (A.D. 41–54), was taken from the Moors by the Portuguese in 1471, and ceded by them to the English, as a gift to Charles II. on his marriage with Catharine of Bragança, May 20, 1662. The English retained possession for twenty-two years. It was almost destroyed by an earthquake April 12, 1773; was ravaged by the plague in September, 1818; and was bombarded by the French Aug. 6, 1844.

TANJORE (Hindostan), the capital of a district of the same name in the Madras presidency, was conquered by the Mahratta chief Vencajée, A.D. 1675, and from him the line of rajas was descended. The English were repulsed here in 1749, and the French in 1755. It was besieged and taken by the English in 1773. The nabob of Arcot, supported by the Madras government, claimed tribute from Tanjore, and the raja was deposed; but he was restored on consenting to pay tribute and a subsidy for an English force in Tanjore in 1781. A dispute for the succession between Serfojée and Ameer Sing was decided by the English in favour of the latter in April, 1787. He was, however, deposed, and Serfojée elevated to the throne in 1798. The new raja yielded Tanjore to the East-India Company for an annual subsidy in 1799, retaining only sovereign authority in the fort. He died in 1832, and was succeeded by his son Sevajée, who died in 1855, when the dignity of raja of Tanjore became extinct.

TANNENBURG (Battle).—Ladislaus V., king of Poland, defeated the Teutonic knights at this place, in Prussia, July 15, 1410. The knights lost, it is said, 40,000 in killed and 30,000 taken prisoners.

TANNING.—This art is of oriental origin, and is mentioned by Moses. In England tanners had been accustomed to keep hides in the tan-pit a year or more; but owing to alterations in the process in the 16th century, complaints were made that they were tanned in three weeks; and in consequence an act was passed, 2 & 3 Edw. VI. c. 11 (1548), prohibiting tanners from selling hides that had not been nine months in the tan-pit. Tanners were prohibited from carrying on the trade of shoe-makers by 13 Rich. II. c. 12 (1389), or that of curriers by 1 Hen. VII. c. 5 (1485). Butchers were prevented from being tanners by 5 Eliz. c. 8 (1562). All restrictions were removed from the trade by 11 Geo. IV. c. 16 (May 29, 1830). Great improvements were introduced in the process of tanning by Seguin, a French chemist, in 1795; and the art was first reduced to scientific principles by Sir H. Davy in 1809.

TAPA.—This name was given to a supposed new metal discovered by Ekeberg in some Swedish minerals. Dr. Wollaston, in 1809, proved it to be identical with the metal discovered in 1801 by Hatchett in a ferruginous mineral from North America, and called columbium (q. v.).

TAPESTRY.—The invention of tapestry has been ascribed to Attalus III., king of Pergamus, who died B.C. 133. The ordinary kind of tapestry was borrowed from the Saracens, and hence the early manufacturers in France were called Sarazinois. It was introduced into England in the 16th century, and was made for the church of Auxerre prior to 840. Poitiers was noted for its manufacture as early as 1025. The Flemings were celebrated for tapestry from the 12th century, and its manufacture attained its highest perfection in Flanders in the 16th century. Tapestry was introduced into England as furniture by Eleanor, wife of Prince Edward, in 1235. The supply came principally
from the continent. Tapestry-weaving was brought into England by Sheldon, late in the reign of Henry VIII. Shortly a tapestry factory was set up at Mortlake by Sir F. Crane in 1619. It was for the use of this establishment that Charles I. purchased the famous cartoons of Raffaello. After the Restoration, Charles II. endeavoured to revive the manufacture, but without success. Henry IV. of France re-established the manufacture of tapestry in Paris in 1697, and the art made great progress in France in the reign of Louis XIV. The Gobelin tapestry dates its origin from this time. (See Bayeux Tapestry.)

TAR.—Becher, a German chemist, who died in London A.D. 1855, was the first to propose the making of coal-tar. An account of the manufacture of tar from a blackish stone in Shropshire was given by the inventor, Martin Erle, in the "Philosophical Transactions" published in May, 1697. Owing to the inconvenience caused by the refusal of the Swedish Tar Company to supply it, excepting in such quantities and at such prices as they might choose, the English parliament offered bounties for its importation from the British colonies in North America in 1703. In consequence of the American war, some lamp-black manufacturers at Bristol turned their attention to its manufacture from pit-coal about 1779, and Lord Dundonald obtained a patent for improvements in these processes in 1781.

TARA (Ireland).—At this place, in Meath, the Irish gained a great victory over the Danes, A.D. 980. The Hill of Tara was in ancient times the chief seat of the Irish kings. Here the insurgent Irish were defeated by the royalists, May 26, 1798; and here a monster meeting of the "repealers," computed at 1,000,000 persons, according to the highest calculation, and 250,000 at the lowest, was held by O'Connell, Aug. 15, 1843.

TARANTO (Italy).—This town occupies the site of the acropolis or citadel of the ancient town of Tarentum (q.v.), and is situated on an island in the Gulf of Taranto. It was founded after the sacking of Tarentum by the Saracens, A.D. 890, and was taken by Robert Guiscard in 1085, and from that time it formed part of the kingdom of Naples. It was taken by Aragon in 1414.

TABES (France), anciently called Bigorra, was the capital of the country of Bigorre in the Middle Ages. It came into the possession of the English monarchs as part of the dowry of Queen Eleanor A.D. 1152, and remained under their sway for 300 years. Edward the Black Prince occasionally resided here. The French were defeated here by the English, March 20, 1614.

TARENTUM (Italy) was founded by a Spartan colony, B.C. 708. Of its early history little is known. The forces of Tarentum and Rhegium were defeated by the Messapians, B.C. 473. Soon after the Tarentines engaged in a war with the Thurnians, to prevent them occupying the district of the Siritis. The dispute was settled by the establishment of a joint colony named Heracleia in the contested territory. The war with their neighbours, the Lucanians, caused them to apply to Archidamus, king of Sparta, for assistance. He landed B.C. 346, and was defeated and slain B.C. 338. They then sought the aid of Alexander of Epirus, who arrived B.C. 332, and, after defeating the enemies of Tarentum, turned against his allies and took Heracleia. They were relieved from this new antagonist by his death, B.C. 323, and again applied to Sparta for aid, B.C. 303, when Cleonymus came to their assistance, and compelled the Lucanians and Messapians to sue for peace. The Tarentines now made a treaty with Rome, by which vessels of that nation were not permitted to enter the Gulf of Tarentum. In 1703, the Roman fleet was sent to assist the Thurians, B.C. 252. The Tarentines attacked the fleet and destroyed and captured five vessels, and then took Thuris and expelled the Roman garrison. War was declared against them by the Romans B.C. 251, and the Tarentines applied to Pyrrhus, king of Epirus, for assistance. Though at first successful, he was finally defeated by Curius, and withdrew from Italy B.C. 274, leaving his general, Milo, to protect Tarentum. It surrendered to the Romans B.C. 272, from which time it remained subject to them. In the second Punic war, Tarentum was seized by Hannibal, B.C. 212. The citadel, however, held out, and the Carthaginian general tried in vain to take it by storm. He then blockaded it for two years. Fabius came to the assistance of the Romans, took the city, and put the Carthaginian garrison and a large part of the inhabitants to the sword, B.C. 209. Tarentum, taken by Belisarius, was retaken by Totilla, A.D. 549, and continued in the hands of the Goths till captured by Narses in 553. The Lombards took it in 661. The Saracens landed at Tarentum in 890.

TARIFF (Spain), a seaport deriving its name from Tarif Ibn Malik, who landed here when sent by Musa, the Musulman emir, to reconnoitre before his invasion from Africa, A.D. 712. It was taken by Sancho IV. in 1292, and was held by Alonso Perez de Guzman against the Moors in 1294. He would not surrender it, though they threatened to behead his own son, and actually carried out the threat before his eyes. The kings of Castile and Portugal gained a great victory here over the Moors, Oct. 28, 1340, when the latter were besieging the town. It was successfully defended by 1,500 British and 700 Spaniards against a French force 13,000 strong, from Dec. 19, 1811, to Jan. 4, 1812, when the French raised the siege, having lost about 1,000 men.

TARIFF.—These duties were originally granted for the use of the king, as is shown by 25 Edw. I. c. 7 (1296). They were contained in two books till 27 Geo. III. c. 13 (1796), when all the duties were ordered to
be paid according to a new book of rates annexed to that statute. The British tariff has undergone several important alterations during the present century. It was much simplified, and the duty on a great number of articles abolished by 5 & 6 Vict. c. 47 (July 9, 1842), and 8 Vict. c. 12 (May 8, 1845).

Tarpeian Rock (Rome).—According to the legend, Tarpeia, the daughter of the governor of the citadel of Rome, surrendered it to the Sabines, who were advancing against Romulus (b.c. 723) to avenge the abduction of the Sabine virgins—on condition of receiving the gold bracelets they wore upon their left arms. Tatius, the Sabine king, to punish her perfidy, as she entered the gates, cast not only his bracelet, but his shield upon her. This example was followed by his soldiers, and Tarpeia was crushed to death. Tarpeia was buried in the Capitol, and her memory was rendered still more infamous by naming that rock the Tarpeian, from whence traitors were afterwards hurled.

Tarragona (Spain).—The ancient Tarracon was originally settled by the Phoenicians, and became a Roman colony during the second Punic war (b.c. 218—b.c. 202), when the town was enlarged and fortified. It was made the capital of a province by the emperor Augustus, was taken by the Goths a.d. 467, and by the Moors in 714. They completely destroyed it, and it remained in ruins for four centuries. The town, rebuilt in the beginning of the 12th century, was taken by Alfonso of Aragon in 1220. It was captured by the English in 1705, but afterwards abandoned by them, and was taken by the French, June 7, 1808, and again June 29, 1811. The English, having attempted to retake it in the end of July, 1813, raised the siege Aug. 17, on the approach of the French, under Marshal Suchet, who entered the town and destroyed the fortifications, Aug. 18. It surrendered to the French in the Spanish revolutionary war in June, 1823. Councils were held here in 1464; Nov. 6, 516; May 1, 1230; April 19, 1239; May 8, 1240; May 13, 1242; in 1244; May 1, 1247; in 1248; April 9, 1253; March 22, 1252; in 1294; in 1305; in 1307; and Feb. 22, 1317.

Tarsus (Asia Minor). It is considered probable that the references to Tarshish in the Scriptures point to two distinct emporiums, one situated at the extremity of the Mediterranean, and the other in the Indian Ocean. Tarshish, in Spain, is supposed to have been the western, and Point de Galle, in Ceylon, the eastern Tarshish. The prophet Ezekiel, writing in the 6th century b.c., describes Tarshish as the "Merchant of Tyre by reason of the multitude of all riches."

Tarsus (Asia Minor), the metropolis of Cilicia, is said to have been founded by Sardegna, a brother of Pyramus. It was a great and flourishing city when taken and plundered by the younger Cyrus, b.c. 401. Alexander the Great took it b.c. 333, and was detained here some time with a dangerous fever. In the war between Cesar and Pompey (b.c. 47) Tarsus sided with the former, and took the name of Julopolis. It was made a free city by Augustus. The apostle Paul ("Saul of Tarsus," Acts ix. 11) was a native of the city (A.D. 33). It was seized by the Saracens in the early days of their empire, but was taken from them, after an obstinate resistance, in the second half of the 10th century. Soon afterwards it was restored to them, and has remained under their sway ever since. Councils were held here in November, 431; 435; and 1177.

Tartaric Acid, first discovered in a separate state by the celebrated chemist Scheele, who was born at Stralsund, in Sweden, Dec. 19, 1742, and died at Kiöping, May 24, 1786. Liebig formed tartaric acid by artificial means in 1839.

Tartars.—According to Pritchard, the Tarars, or Tartars, were a tribe nearly allied to the Mongols in race, who dwelt near Lake Bouyr, in the eastward of Mongolia. They were among the first of the Mongol conquests, and they took afterwards so conspicuous a place in the army of Zenghis Khan, that their name became synonymous with that of the Mongols. Their proper name was Tarats. It is said to have been changed into Tartar in consequence of an expression of St. Louis, who, when the devastations of Zenghis Khan were heard of with horror in western Europe, is reported to have exclaimed, "Ergat nos, mater, celeste solium, quia si proveniant ipsi, vel nos ipsos quos vocamus Tartaros ad suas Tartaracases sedes, unde excirunt, retrudemus, vel ipsi nos omnes ad eolum adventum.""  

Tartary (Asia).—This tract of country, bounded on the north by Russia, on the east by China, on the south by Afghanistan and Persia, and on the west by the Caspian Sea, was conquered by Toulun, who assumed the title of khan of Tartary, about a.d. 405. The name of Tartary has disappeared from geography, and the greater part of the country is known by the name of Turkestan. (See Scythia.)

Tasmania (Australia).—This island, formerly called Van Diemen's Land, was discovered by Tasman, Dec. 1, 1642, and named after Van Diemen, the governor of the Dutch East-India settlements. The coast was explored by Marion, Furneaux, Cook, Bruné d'Entrecasteaux, and Kermadec, between 1772 and 1792, and the island was taken possession of by the British for a penal settlement, in connection with the penal head-quarters at Sydney, in August, 1803. Collins landed with a party of convicts Feb. 19, 1804, and founded the city of Hobart Town, of which he was the first governor. He died in 1810. It became a distinct colony in 1825. An anti-transporation society was formed in 1851. Their efforts to abolish transportation were successful; and by permission of the Queen its name was changed from Van Diemen's Land to Tasmania. The present system of self-
government was established in 1855 and 1856.

TAUNTON (North America).—This town in Massachusetts was founded a.d. 1637.

TAUNTON (Somersetshire), originally called Tantun, and subsequently Taunton and Thoneton, from its situation on the river Thone, is supposed to have been a Roman station; but the earliest authentic account of the place refers to the period of the Octarchy, when a castle was built by Ina, king of Wessex, A.D. 700. It was destroyed by his queen Ethelburga in 722, and remained in ruins till the reign of William the Conqueror, when it was rebuilt by the bishops of Winchester, to whom the town and manor were granted. It was taken in 1047 by Perkin Warbeck, who abandoned it on the approach of the royal troops. Colonel, after- wards Admiral Blake, defended it against 10,000 Royalists until relieved by Fairfax in 1645. James, duke of Monmouth, was proclaimed king here June 21, 1685, and many of his followers were put to death by General Kirke, Aug. 27. A charter, granted to the town in 1627, was taken away at the Restoration (1660), and its walls were razed to the ground in consequence of the seal displayed by the inhabitants for the parliament. The charter, subsequently restored, was forfeited in 1792. Taunton has returned two members to parliament since 1695. The church of St. Mary Magdalen, built in the 14th century, was richly decorated by Henry VII., in return for the support given by the town to the Lancastrian cause. The free grammar-school was founded in 1522, and endowed in 1554. The almshouses at East Gate were founded in 1635; the hospital was founded in 1809, and opened March 25, 1812; and the eye infirmary was established in 1816. The canal between Taunton and Bridgewater, projected in 1811, added much to the prosperity of the town. The museum, library, &c., were erected in 1821, and the Taunton and Somerset Institution was established in 1823. The railway from Bristol to Exeter was opened as far as Taunton in July, 1842.

TAURUSMENIUM (Sicily), the modern Taormina, was founded by the remaining inhabitants of Naxos, who were driven into exile after the destruction of that town by Dionysius I. B.c. 396. It was ineffectually besieged by Dionysius I. B.c. 394, and submitted to him B.C. 392. It is considered, however, to have first become truly a Greek city when Andromachus, father of the historian Timaeus, brought together the exiled Naxians who were scattered over the island, and located them here, B.c. 393. It had risen to a considerable degree of opulence, when Timoleon landed, B.c. 345, and was incorporated with the kingdom of Syracuse shortly after B.C. 278. Having passed with the island under Roman domination, it was held by the insurgent slaves, and suffered severely B.C. 134—132. Sextus Pompeius made it one of his chief strongholds of defence against Octavius, and gained an important naval victory over him, B.C. 36. Augustus expelled its former inhabitants, and settled a Roman colony in their place, B.C. 25.

TAUSS (Battle).—The Hussites defeated the Imperialists near this town, in Bohemia, Aug. 14, 1431.

Taverns.—Places of entertainment so called, can be traced in England to the 13th century. They were ordered to be closed at curfew by 2b Edw. I. c. 5 (1284). The oldest tavern in London is said to have been the "Boar's Head," in Eastcheap, where Shakespeare represents Prince Henry and his dissolute companions indulging in their revels, before 1413. The "White Hart" tavern, in Bishopsgate Street, was established in 1450. The number was limited in London to forty, and in Westminster to three, by 7 Edw. VI. c. 5 (1553), in consequence of complaints having been made of their great increase, "to the hurt and debauching of the morals of the people." Taverns were first licensed in 1752.

Taxation.—The Greeks and Romans possessed systems of taxation almost as comprehensive and varied as those which exist at the present day; but at the decline of the Roman empire the feudal system of personal service was introduced. The modern institution of taxes originated in the practice of compounding for feudal service by payments of money. Immunity from arbitrary taxation was established by 25 Edw. I. c. 5 & 6 (1297), and by the Bill of Rights, 1 Will. & Mary, sess. 2, c. 2 (1689). (See Customs, Excise, Income and Property Tax, Land Tax, Stamp Duties, &c.)

TCHAD, or TSAD (Africa).—This lake, in the central regions of the continent, 120 miles in length, with an average breadth of about 70, was discovered and partly explored by Clapperton and Denham, a.d. 1823. Overweg and Barth made further explorations in 1851, and Dr. Vogel in 1854.

TCHERNAYA (Battle).—The Russians, under General Liprandi, were defeated by the French under Marshal Pelissier and General La Marmors, on the banks of this river, near Sebastopol, in the Crimea, Aug. 16, 1855.

TCHERNIGOV, or CZERNIGOF (Russia), capital of the province of that name, the oldest town in the European portion of the empire, was built a.d. 1024.

TCHERMSM (Sea-fight).—The Turkish fleet was destroyed by the Russians, near this small town of Anatolia, in Asia Minor, in July, 1770.

TEA.—The tea-plant, supposed to be indigenous to China, according to its writers, was first discovered in the 8th century. An impost was levied on tea by the emperor T'ae-Tsang, a.d. 781. Japanese writers maintain that it was brought there from China in the 9th century. It was introduced into Europe by the Dutch in 1591, and was used in England, on rare occasions, some years prior to 1657, and sold at from £6 to £10 the pound. Thomas Garway, the first English tea-dealer, retailed it in 1657, to the public,
in the leaf, at from 15s. to 50s. the pound, and also in the infusion. It was first imported by the East-India Company in 1737, when they received from China 4,713 pounds, which glutted the market for several years. Green tea was first used in England in 1715. A duty of 8d. per gallon on all ready-made tea prepared for sale was imposed by 12 Charles II. c. 23 (1666), but the leaf was first taxed by 1 Will. & Mary, sess. 2, c. 6 (1689), which imposed a duty of 5s. per lb. and 5 per cent. on the value. By 10 Geo. I. c. 10 (1723), the duty was reduced to 4s. per lb.; and by 18 Geo. II. c. 26 (1745), it was again reduced to 1s. per lb. and 2s. 5d. per cent. on the value. All previous duties were repealed by 24 Geo. III. sess. 2, c. 38 (1784), which effected an average reduction of 10 per cent. by imposing a window-tax. The duty was nearly doubled by 35 Geo. III. c. 13 (March 16, 1795); and by 59 Geo. III. c. 53 (July 2, 1819), it was raised to £06 per cent. on tea worth less than 2s. per lb., and to £100 per cent. on tea above that price. These ad valorem duties were repealed by 3 & 4 Will. IV. c. 101 (Aug. 29, 1833), which ordered that, after April 22, 1834, rates of 1s. 6d., 2s. 2d., and 3s. per lb. should be charged on teas according to their qualities. This arrangement proved unsatisfactory, owing to the difficulty of deciding the quality of the article. Hence the duty of 2d. per lb. on every lb. of tea imported was imposed by 5 & 6 Will. IV. c. 32 (Aug. 21, 1835). An addition of 5 per cent. was imposed by 3 & 4 Vict. c. 17 (June 19, 1840). By 16 & 17 Vict. c. 106 (Aug. 20, 1853), it was arranged that till April 5, 1854, the duty should be 1s. 10d. per lb.; that it should then remain at 1s. 6d. till April 5, 1855, when it should fall to 1s. 3d.; and that after April 5, 1855, it should be 1s. per lb. In consequence of the expenses attending the Russian war, these provisions were repealed by 18 & 19 Vict. c. 9 (March 16, 1855), which raised the duty to 1s. 6d.; and by 19 & 20 Vict. c. 21 (May 25, 1856). It was again reduced to 1s. 5d. per lb. It was reduced to 1s. 5d. by 20 & 21 Vict. c. 61 (Aug. 25, 1857).

TEA

TEI

TELESS VICTORY.—When the news of a great battle, gained by the Spartan king Archidamus over the Arcadians, b.c. 368, or, as it came to be called “the tearless battle,” reached Sparta, all the Spartans who heard it burst into tears.

TE DEUM, a kind of hymn, or song of thanks, supposed to have been composed by St. Augustine and St. Ambrose, is sung in the Roman church with extraordinary pomp and solemnity upon the gaining of a battle or other happy event. It was also sung in Protestant churches on days of thanksgiving for a victory, peace, or other national event. A Te Deum was performed at St. Paul’s cathedral when Queen Anne went in state to give thanks for the victory of Blenheim, A.D. 1704; and one was performed there, with vocal and instrumental music, on the thanksgiving day for the battle of Ramillies, in 1706. This was the first time an instrumental band was permitted to accompany the voices in St. Paul’s. Handel’s Te Deum for the battle of Dettingen, in 1743, and Graun’s for the king of Prussia’s victory at Koln, in 1757, are celebrated compositions.

TEETH.—The Mathematical Jewel, published a.d. 1585, contains an account of one Sir John Blagrave, “who caused his teeth to be all drawne out, and after had a sett of ivory teeth in agayne.” Artificial teeth were in common use in England in 1609.

TEETotality.—This term was first used in September, 1833, by Richard Turner, a working man of Preston, in addressing temperance meetings, to describe his thorough abstinence from intoxicating beverages.

TEFLIS, or TIFLIS (Asia), the capital of Georgia, and of all the Transcaucasian provinces of Russia, was built by Vachtag, the founder of a dynasty which ruled from the Euxine to the Caspian, A.D. 469. It was taken by Tamerlane in 1386, and by the Turks in 1576, and again in 1723. Kouli Khan retook it in 1784, and it was captured and destroyed by Aga Mohammed in 1795. The Russians became masters of it in 1801. It was devastated by the cholera in 1830.

TEGR (Greece), one of the most powerful cities of Arcadia, is said to have been founded by Tegeates, a son of Lycaon, and is mentioned by Homer in connection with the siege of Troy, b.c. 1184. The Spartans were defeated in an attempt to acquire dominion over it, and Charillus, their king, and all the survivors of the army, made prisoners, b.c. 850. It submitted to Sparta b.c. 560. A contingent of 500 men fought at Thermopyla b.c. 480, and one of 3,000 at the battle of Platea, b.c. 479. Leotychides, king of Sparta, found refuge here b.c. 489, and Pausanias b.c. 394. In the Cleomenean war it was taken by Antigonus Doson, and annexed to the Achaean League b.c. 222. It was completely destroyed by Alaric about A.D. 400.

TETHRA (Battle). The Thesamans under Pelopidas gained a victory over the Laecadianians at this town of Boiotia, b.c. 375.

THEKAN, or THEKAN (Persia), the modern capital, was, previous to the present century, an insignificant town. It was made the metropolis of the empire by Aga Mohammed Khan about a.d. 1790. A body of French engineers was sent here by Napoleon I. in 1807, to organize the military resources of Persia. The Russian minister was assassinated here Feb. 12, 1829. Near the town are the ruins of the ancient Rhages, the capital of the Parthian kings, where Alexander halted for five days in his pursuit of Darius, b.c. 390.

TRIGMOUTH (Devonshire) was originally an insignificant village, and is said to have been the first landing-place of the Danes in England, a.d. 787. It contributed seven ships towards the expedition against Calais in 1347. The town was burned by a French pirate in 1530, and was plundered in July, 1690, by the French, who also burned 116
houses, with a number of ships and small craft in the harbour. Being threatened with a similar attack in 1744, the inhabitants obtained permission to erect a fort on the beach at East Temignouth. A market and fair were granted the town in the reign of Henry III. The school for the gratuitous instruction of poor children was founded in 1731. The quay was constructed in 1820.

**TELamon** (Italy).—This city of Etruria is first mentioned B.C. 225, as the scene of the defeat by the Romans of the Cassian Gauls. Marcellus landed here from his own ships, which from exile B.C. 87. The town was in existence as late as the 4th century, but from this time all trace of it disappears till the 14th century, when a castle was built on its site.

**Telegraph.**—The word telegraph, from τῆλε, at a distance, and γραφω, I write, signifies any method of communicating intelligence to a distance by means of visible signals, and was brought into use about A.D. 1793. The ancients employed fire and flags for the purpose. Polybius (B.C. 204—122) states that a rude system of telegraphy had been invented by Cleoxenes and Democritus, and improved by himself. The marquis of Worcester describes some ingenious telegraphic inventions of his own in the "Century of Inventions," 1663. Dr. Hooke described a clever plate telegraph May 21, 1684; but no practical advantage was taken of the invention until 1793, when Chappe introduced a system of semaphore telegraphs in France. In 1801 John Boaz of Glasgow patented a nocturnal telegraph. In 1806 a new plan was adopted, and in 1816 Sir Home Popham introduced great improvements. The principle of these telegraphs was the same as that of the various semaphore signals employed on railways. (See Electric and Submarine Telegraphs.)

**Telescope** is said to have been invented by Zacharias Jansen, an optician of Middelburg, A.D. 1590. Another account assigns the discovery to 1610; and Hallam states that the date of the invention, or at least of its publicity, is referred beyond dispute to 1609. Others ascribe the invention to Adrian Metius, at Alckmaar, about 1607. Galileo heard of the discovery while at Venice in 1609, and from the description constructed an instrument of the kind, with which he discovered the four satellites of Jupiter in 1610. The astronomical telescope was greatly improved by Huyghens about 1655. James Gregory published suggestions for forming a telescope on a new plan in 1665. Newton made use of this principle, which is known as the Gregorian telescope, and also completed his reflecting telescope in 1672. This last was further improved, by Dr. Hooke in 1674, and by Hadley in 1718. Achromatic telescopes were made by Chester More Hall in 1729. Sir William Herschel perfected the reflecting telescope, and commenced one of the Newtonian kind in the end of 1783, which was finished Aug. 28, 1789. Lord Rosse's monster reflecting telescope, erected at Birr Castle, near Parsonstown, Ireland, was finished in 1844.

**Tellurium**, a scarce metal, discovered by Müller, of Reichenstein, in Germany, A.D. 1793. Klaproth, who, about 1798, ascertained its properties more minutely, gave it the name it now bears.

**Temeswar** (Hungary), the capital of the Banat, is supposed to be identical with the ancient Tibiscus, to which Ovid was banished A.D. 8. It was taken and sacked by the Turks in 1552, in whose possession it remained till 1718, when it was regained by Prince Eugene, and strongly fortified. It was incorporated with Hungary in 1775. The Hungarians besieged it in April, 1849; but it was bravely defended by General Rukawina for 107 days, when the garrison were relieved by General Haynau. He defeated the Hungarian army in a well-contested battle Aug. 10, and entered the town in the evening of the same day.

**Tempe** (Greece), the ancient name of a beautiful valley in Thessaly between Mounts Olympus and Osseus, through which the waters of the Peneius force their way into the sea. When Xerxes invaded Greece, B.C. 480, the Greeks sent a force of 10,000 men to Tempe, to defend the pass against the Persians; but having learnt that there was another pass across Mount Olympus into Thessaly, they withdrew to Thermopylae. The Romans, under Q. Marcius Philippus, dislodged Persians, king of Macedon, from a position here, and opened the pass B.C. 169.

**Temperance Societies.**—The first society on the principle of entire abstinence from spirits was established at Moreau, in North America, A.D. 1806. The next was the American Temperance Society, founded at Boston Feb. 15, 1826. A thousand societies were in existence in the United States at the end of 1829. A society was founded at New Ross in Wexford, Ireland, in August, 1829. The Glasgow and West of Scotland Association was formed Nov. 12, 1829; and the society at Bradford, in Yorkshire, in Feb. 1830. The British and Foreign Temperance Society was organized in London June 29, 1831, and by this time societies had been formed in the chief towns throughout the kingdom. The Preston society was the first to adopt a pledge renouncing "all liquors of an intoxicating quality" in March, 1833. The British Teetotal Society was formed in London in 1835, and this was merged into the New British and Foreign Society for the Suppression of Intemperance, Aug. 20, 1836. The old partial abstinence societies were either dissolved or joined the new movement, and the exertions of the Rev. Father Mathew in Ireland in 1839, 1840, and 1841, and in England in 1843, gave a great impetus to the cause. The parent societies of London were merged into the National Temperance Society in June, 1843. The Maine suppression law in America was passed June 2, 1851. The London Temperance League was formed in July, 1851, and the United Kingdom Alliance, for the legislative suppression of
of the traffic in intoxicating drinks, was founded at Manchester June 1, 1853.

TEMPLES, of KNIGHTS OF THE TEMPLE, first called the "Poor of the Holy City," were instituted for the protection of pilgrims to the Holy Sepulchre, by Baldwin II., king of Jerusalem, A.D. 1118 or 1119. Their first systematic embodiment was made by Hono-

rion II. in 1128. Jerusalem was the head province and residence of the grand master till 1187, Antioch till 1191, and Acre till 1217. They took refuge in the town of Limisso or Limasol, in Cyprus, when the Latin power was destroyed in Palestine in 1192. Philip IV. of France assisted Clement V. to the papal chair in 1305, on the understanding that he would lend him his aid in destroying the order. Jaques de Molay, their grand master, was summoned to Europe to con-

sult with the pope concerning the union of the Templars and Hospitallers in 1306.

Accusations of unspeakable enormities were made against the Templars and all the knights in France, including De Molay, were seized, and their stronghold in Paris taken possession of by the king, Sept. 13, 1307. The knights in England were thrown into prison by Edward II. in December of the same year. Pope Clement V. issued a bull requiring all authorities to aid him in discovering the guilt of the accused, in August, 1308, and a commis-

sion of ecclesiastics met at Paris to try the case Aug. 7, 1309. Cruel tortures extracted so-called confessions from the accused in France, many of whom were condemned to the flames in 1308. Fifty-four who had been entrapped by Philip IV. into making confes-

sions and afterwards retracted, were burned in a field behind the abbey of St. Antoine, May 13, 1310. Clement V., in a secret consistory at Vienne, abolished the order by his own authority, March 22, 1312. The bull was formally published May 2 following. On a small island of the Seine, near the site occupied by the statue of Henry IV., De Molay, grand mas-

ter, and Guy, grand prior of Normandy, were burned to death, March 18, 1314. The king of France seized most of their property. In England their landed possessions were transferred to the Hospitallers in 1324. In Portugal the society took the new name of the Order of Christ. In Spain their property was given to the knights of Our Lady of Montesa, a society founded in 1317. The chief seat of the order in England was the Temple, whither they removed from Holborn in 1355.

TEMPLE (London).—A house was founded here by the Knights Templars A.D. 1185. The church was built in 1240. The building was purchased and formed into inns of court after the suppression of the order in 1311. The outer court was founded in 1560, and the Middle Temple Hall was built in 1572. The library was founded by Robert Ashley in 1614. The building was erected in 1828. The new library of the Middle Temple was erected at a cost of £14,000, from designs by H. R. Abraharn, and was opened by the prince of Wales, who was, on the occasion, called to the bar and admitted as bencher, Oct. 31, 1861.

TEMPLE BAR (London) was erected by Sir Christopher Wren A.D. 1670—1672. A petition for its removal was presented by certain merchants and others of the city of London to the lord mayor and corporation in 1853.

TEMPLES.—The classical authors state that temples originated in the sepulchers built for the dead, and that they were first erected by the Egyptians. Constantine I. ordered the destruction of the heathen temples throughout the Roman empire A.D. 311. (See BAALBEK, DELPHI, EPHESUS, OLYM-

PIA, and SOLOMON'S TEMPLE.)

TEN ASSERIM (Hindostan) came into the possession of the Burmese A.D. 1760, and was ceded to the British by the treaty of Yanda-

boo, Feb. 24, 1826.

TENBY (Pembrokeshire) was built by Flemish settlers, who sought refuge from the inundations of the Low Countries about A.D. 1108. Its fortifications were strengthened on the approach of the Spanish Armada in 1588. It was garrisoned for Charles I. and besieged by the parliamentarian forces in 1643, and again in 1648. A new fish-mar-

ket was opened in 1847.

TENEDOS.—This island, originally called Leucophyris, from its white cliffs, an Aolian settlement, was sacked by Achilles and oc-

cupied by the Greeks after the siege of Troy, B.C. 1184. It became subject to Persia B.C. 493, and siding with Athens in the Pelopon-

nesian war, paid an annual tribute of 3,426 drachmai B.C. 431. The Lacedemonians invaded it B.C. 389. The island threw off the Persian yoke about 331.

TENERIFFE (Canary Isles), first dis-

covered by a French ship, driven among the group by stress of weather, about A.D. 1330, was taken formal possession of for the Spanish crown in 1461. At Santa Cruz, the chief town, Admiral Blake destroyed six richly-laden Spanish galleons April 20, 1657. Nelson failed in an attempt to take it July 24, 1797.

TENNESSEE (North America) was first settled about A.D. 1750. The settlements were destroyed by the Cherokee Indians, then possessors of the country, in 1760. They were in great part expelled in 1750. It was ceded by North Carolina to the United States and converted into a territory, Aug. 14, 1790. It constituted a state in 1796. The original constitution was amended in 1834.

TENNIS appears to have been imported from France about the middle of the 16th century. The game was revived and brought into fashion in England by Charles II.

TERRACINA (Italy), called by the Volscians, its ancient inhabitants, Anxur, was a de-

pendency of Rome B.C. 509. It was taken by N. Fabius Ambustus B.C. 406. The Vol-

scians recovered it B.C. 402. It was re-cap-

tured by the Romans B.C. 400, and a colony established B.C. 329. The town was occupied by the troops of Pompey in the civil war.
TEUTON. — This powerful German tribe, in alliance with the Cimbri, advanced into Illyria, and defeated the consul Cn. Papirius Carbo, b.c. 113. They afterwards forced their way into Roman Gaul, and defeated Manlius and Scipio, b.c. 106, and they invaded Spain b.c. 104. On their retreat from Spain, they were met by the Romans, under Marius, at Aquae Sextiae, the modern Aix, and totally defeated, b.c. 102.

TEUTONIC ORDER took its rise about A.D. 1189, during the crusades. Frederick I., on his arrival with his army before Acre, in 1191, under the sanction of a bull of Pope Celestine III., named it the order of the German House of the Holy Virgin of Jerusalem. After their return to Germany, they were, in 1226, invited by Conrad, duke of Masovia, to assist him in conquering the heathen Prussians. This they accomplished in 1233; but insurrections afterwards broke out, and they were defeated by the Poles and Lithuanians in a great battle near Tannenburg, in Germany, July 15, 1410, when the grand master and 40,000 of his followers were slain. The order, dissolved by the peace of Cracow in 1525, was finally abolished by Napoleon I. in 1809.

TETEKSBY (Gloucestershire).—A monastery was founded here about A.D. 725. A charter, confirming and extending the privileges of the burgesses, was granted by Edward III., Aug. 13, 1338. The celebrated battle of Tewkesbury, in which the Yorkites gained a victory over the Lancastrians, was fought at the Bloody Meadow, near this town, Saturday, May 4, 1471. Elizabeth granted a charter of incorporation in 1574, and the free grammar-school was founded in 1576. This town suffered greatly in the civil wars, and was captured by the Parliamentarians, June 5, 1644. Its present charter was granted by William III. in 1698. The town-hall was erected in 1795, the marketplace in 1798, and the theatre in 1832.

TEXAS (North America).—A French colony that had established itself here was expelled by the Spaniards, A.D. 1690. The Americans laid claim to portions of Texas in 1830, and it separated from Mexico in 1836, the first Texan congress having been held Oct. 3, 1836. War ensued, in which the Mexicans were defeated. The United States recognized the independence of Texas, March 3, 1837; France, Sept. 26, 1839; and England subscribed a treaty with Texas, Nov. 13, 1840. Texas was admitted into the Union in 1845.

TEXEL (German Ocean).—Several naval engagements have taken place off this island in the Zuider Zee. The English fleet, under Monk, gained a victory here over the Dutch, under Van Tromp, who fell in the action, July 31, 1653. Another was fought with doubtful results between the combined fleets of England and France and the Dutch in 1673. A Dutch fleet, in a state of insubordination, surrendered to the British fleet here, Aug. 30, 1799. Part of
Napoleon's immense army for the invasion of England occupied Texel in August, 1805. The sea broke down the dykes of the Texel, and laid the greater portion of the island under water in 1825.

Texts.—In the early church the text was most commonly taken from some paragraph of the Psalms or Lessons. Elfric, afterwards archbishop of Canterbury, required the priest on Sunday to explain the gospel of the day, the Creed, and the Lord's Prayer about A.D. 957. Preaching from a text in England again to have disappeared in 1234, with Stephen Langton, afterwards archbishop of Canterbury, though some continued to preach without texts as late as the 15th century.

Thames (England), the Roman Tamesa or Tamesis, was crossed by Caesar after he had routed the Britons under their king Cassivellaunus, B.C. 54. The Northmen entered it with 350 ships, took Canterbury and London by storm, and were afterwards defeated at Ockley by the West Saxons, A.D. 551. The first stone bridge across the river was commenced by Peter Coleman in 1760, and completed by John Rennie in 1826. A tunnel was opened March 17, 1861, and Feb. 16, 1738 (when counsel were carried out of Westminster Hall to their carriages in boats), June 4, 1767 (on which occasion the water reached Kennington Common); March 5, 1829; Nov. 2, 1833; and Jan. 29, 1834 (requiring watermen to convey people from street to street). The conservancy from Staines to Yenlade was assured to the city of London in 1480. It was frozen over and fairs held upon the ice in the winters of 1538-9, 1739-40, and 1813-14. Much damage was sustained by the shipping from the breaking up of the ice, Jan. 26, 1829. Navigation was resumed after a suspension of six weeks from the ice, Feb. 8, 1838. A tunnel from Gravesend to Tilbury Fort was proposed in 1798, and an effort made to carry it into execution in 1801. The tunnel at Rotherhithe was opened for traffic March 25, 1843 (see Thames Tunnel). A committee of the House of Commons was appointed to consider the question of an embankment from London bridge to Vauxhall, March 27, 1840; and with that object a survey was made, Nov. 8, 1841. By 20 & 21 Vict. c. 47 (Aug 17, 1857), the conservancy was vested in the corporation of the city of London. It came into operation Sept. 29, 1857.

Thames Embankment.—Plans for the embankment of the Thames at London were proposed by Sir Frederick Trench, A.D. 1828, and by John Martin, the painter, in 1856; but no measures were taken for carrying the work into effect. By 21 & 22 Vict. c. 104 (Aug. 2, 1858), the Metropolitan Board of Works received power to construct embankments; and in consequence of their representations a parliamentary committee was nominated in 1860, to consider the plans proposed by different architects. The committee held their first meeting April 30, 1861, and presented their report, in which they approved of the design of F. W. Shields, July 2, 1861.

Thames Tunnel (London) was designed by I. K. Brunel. By 4 & 5 Geo. IV. c. 156 (June 24, 1824) a company was empowered to make and maintain a tunnel under the Thames from Wapping, Middlesex, to Rotherhithe in Surrey. A shaft was sunk, and the first brick laid, March 2, 1825. The river broke in May 15, 1827, 544 feet of the tunnel being constructed. The second embankment took place Jan. 12, 1828, when six workmen perished, and the first and last embankment happened March 6, 1828. It was opened for passenger traffic March 25, 1843.

Thane, or Thanet.—This title of honour among the Anglo-Saxons, indicating probably the possession of a certain amount of landed property, gradually fell into disuse after the Conquest, A.D. 1066. In Scotland the title was recognized till near the end of the 15th century. A thane of Caithness is mentioned in 1462.

Thanet (Kent), the present Thanet or Thanetness, at which the Saxons under Hengist and Horsa first landed, A.D. 449. A band of Danes wintered here in 851. They invaded the island in 859; in the autumn of 865; in 980; and in 988; when they burnt a nunnery with the nuns, the clergy, and people who had taken refuge there. Ethelred II. levied an army to give the Danes battle in 1002, and some fled to the Isle of Thanet, where he could not follow them. The Danes again landed on this island in 1009, and after committing great ravages in Kent, retreated here to winter. Swyn, king of Denmark laid the Isle of Thanet waste in 1011. Edward III. ordered the island to be fortified in 1369.

Thapsacus, or Thapsacum (Syria), probably the Tippahsa mentioned as subject to Solomon, B.C. 1014 (1 Kings iv. 24). The Euphrates was forded here by the army of Cyrus the younger, the water reaching up to the waists of the troops, B.C. 401. It was also crossed by Darius when he was advancing against Alexander, B.C. 333, and by Alexander in pursuit of Darius, the same year.

Thasos (Aegean Sea).—This island was first inhabited by the Phoenicians, under Thasos,—hence its name. It was colonized B.C. 729 or B.C. 708 by settlers from Paros. The Thasians were compelled by Darius to pull down their fortifications and remove their ships of war to Abdera, B.C. 492. Disputes arose between the Thasians and the Athenians. The latter having defeated the Thasians at sea, B.C. 465, laid siege to their city, which, after a blockade of three years' duration, was taken, the fortifications raised, and the Thasians compelled to pay a large sum of money, B.C. 463. Thasos, which had submitted to Philip V., received its freedom from Rome B.C. 197.

Thatyre's Inn (London) is of great antiquity. In the reign of Edward III. it belonged to John Thatyre, from whose will it
appears to have been an inn for law-students as early as 1347. It was demised to Lincoln's Inn about 1549.

THEATRINES.—This religious order in the Roman Catholic church was founded by John Peter Caraffa, bishop of Theate, or Chieti, in Naples, A.D. 1524. He was afterwards pope, under the title of Paul IV.

THEATRE.—The earliest dramatic performances took place on wagons and temporary platforms, and there is no record of a permanent building until the erection of the stone theatre in the temple of Dionysius, at Athens, B.C. 500. The finest Greek theatre was that erected by Polylectes, at Epidaurus, about B.C. 436. A temporary theatre was built at Rome by M. Æmilus Scaurus, B.C. 58, which contained accommodation for 80,000 spectators, and was also remarkable for the splendour of its decorations; and the first permanent theatre at Rome was built by Pompey, B.C. 54. The theatre of Marcellus was completed by Augustus B.C. 11. The mystery plays of the Middle Ages were mostly performed in temporary structures in the open air. The stage for this purpose in England was erected at Dunstable in 1119. Stage scenery was introduced by Baldassari Peruzzi, of Siena, who died in 1536. The earliest theatrical license was granted to Burbage and others in 1574, and the first public theatre in London was the Blackfriars theatre (q.v.), which was built in 1576. In 1583 Palladio built a theatre on the classic model at Vicenza, and in 1588 Scamozzi attempted to revive the same system at Sabbioneta. The first play-bill was issued from Drury Lane theatre, April 8, 1663, and announced the performance of the "Humorous Lieutenant," to commence at 3 o'clock. Theatres are regulated by 6 & 7 Vict. c. 68 (Aug. 22, 1849). The most important theatres are separately treated. (See Drama.)

THEBES (Italy) was founded, according to tradition, by a colony of Phoenicians, under Cedomus, B.C. 1500 or B.C. 1400. They were driven out by the Boeotians B.C. 1124. Platea, one of the Boeotian cities, revolted from Thebes B.C. 510, and applied for help to Athens. A war ensued between Thebes and Athens, in which the latter was victorious. This caused serious animosity between Thebes and Athens; and in the Persian war, B.C. 490, the Thebans deserted the cause of Greece and fought against the Athenians at Platea, B.C. 479. The Athenians invaded Boeotia, and established a democratic government in Thebes, B.C. 466. The aristocratic leaders went into exile, but returned B.C. 447, defeated the king, and re-established the former government. The Thebans were allies of the Spartans in the Peloponnesian war, B.C. 431—404. Sparta, having claimed supremacy over the whole of Greece, the Thebans joined the Athenians, B.C. 395. The peace of Antalcidas put an end to the war, B.C. 357, and deprived Thebes of her supremacy over Boeotia. The Spartans treacherously seized the citadel of Thebes B.C. 382, and were defeated at Leuctra B.C. 371; and the Thebans regained their power in Greece. In the Sacred war, which lasted from B.C. 357 to B.C. 346, the Thebans, supported by Philip II. of Macedon, were opposed to Athens and Sparta. Thebes was razed to the ground by Alexander the Great B.C. 335, after which it never again formed an independent state. Cassander restored the city B.C. 315, and it was taken by Demetrius B.C. 283, and again B.C. 290. The Thebans were defeated in an attempt to expel the Bulgarians from Greece A.D. 1040, and their city was plundered by the Normans of Sicily in 1146. It was one of the most flourishing cities of Greece during the 10th and 11th centuries.

THEBES, or LUXOR (Egypt), called No (Ezekiel xxx. 14, and Nahum iii. 8), had its foundation ascribed by the Egyptians to Memes, the first king of Egypt, B.c. 2717. It reached its greatest splendour, having 100 gates, "as sung by Homer," and 20,000 war-chariots, and was the residence of the kings, whose tombs are still extant, B.C. 660. It was conquered by the Persians B.C. 525. Having revolted, it was taken, after a three years' siege, by Ptolemy Soter II., or Lathyrus, about B.C. 87. Strabo visited it, with the expedition of Ælius Gallus, B.C. 24. The city began to decline about B.C. 800. The great tablet of Karnak was shown and expounded by the priests to Caesar Germanicus, A.D. 16.

THEFT was forbidden by the eighth commandment of the decalogue, delivered to Moses by Jehovah on Mount Sinai (Exodus xx. 15). By the civil law the thief was required to make restitution of stolen property several fold, according to the nature of the object, or, failing in ability to do so, was to be sold into slavery (Exodus xxii. 3—4), B.C. 1491. The "Coffin Tablets" of Roman laws treated of this crime, B.C. 447. At common law, in former times, petty theft (i.e., not above twelve pence in value) was punished by whipping and imprisonment, and grand theft (i.e. over twelve pence in value) by death. Both were made punishable by transportation by 4 Geo. I. c. 11 (1717). The distinction between the two was abolished by 7 & 8 Geo. IV. c. 28 (1827).

THEODOLITE.—The first used was in the survey of Zealand made by Bugge, A.D. 1762—8. Ramsden finished his theodolite in 1787, for the use of General Bay, in the great trigonometrical survey of England and Wales.

THEODOSIA (Crimea), the modern Caffa (q.v.), named by Leucion, king of the Bosporus (B.C. 393—B.C. 353), after his wife Theodosia, was a flourishing colony. It was ruined before the beginning of the 2nd century.

THEODOSIAN CODE.—Theodosius II., A.D. 429, appointed a committee of eight persons, at the head of whom was Antiochus, to form a code from all the constitutions and laws which had been promulgated since the time of Constantine the Great. This committee was renewed in 435, and the code, consisting

3 x 2
of sixteen books, was published at Constantinople, Feb. 15, 438.

THEOLOGY.—The word was first employed in its present signification by Peter Abellard, who died A.D. 1142, and wrote a work entitled "De Logica Christiana." The scholastic theology was founded by Roscellin of Compiegne about 1100; and public schools for the study of the science were established in Italy soon after 1360. Lord Bacon's system of natural theology was embodied in the "De Augmentis Scientiarum," published in 1623, and Dr. William Paley's "Natural Theology" was published in 1802.

THEOPHILANTHROPISTS.—This sect sprang up during the French revolution A.D. 1794. They opened four temples in Paris, where a sort of liturgy was chanted, and, instead of an altar, they had an immense basket of flowers as an emblem of the creation. Lépaux, one of the first five directors in France, put himself at their head in 1797. They became extinct in 1802.

THEOSOPHISTS, OR FIRE-PHILOSOPHERS.—This sect of philosophers, which rose in the 16th century, followed the teaching of Theophrastus Paracelsus. They attributed very little to human reason and reflection, and ascribed everything to experience and divine illumination. In the beginning of the 17th century considerable animosity prevailed between the Theosophists and the Peripatetics. Great numbers of the Theosophists joined the Eomans.

THERA (Egean Sea).—This island is said to have received the name of Calliste when it emerged from the sea, and to have been first inhabited by the Phcenicians. It was colonized by the Lacedaemonians and Minyae, B.C. 1074, under Theras, from whom the island received the name of Thera. Another small island was thrown up by a submarine volcano near Thera, A.D. 726.

THERAPEUTIC.—This sect, a branch of the Essenes (q. e.), arose in Egypt in the 1st century. They were more rigid in their observances and frequent solitude.

THERESA (Order).—This female order was founded by Theresa, queen of Bavaria, Dec. 12, 1627, for unmarried noble ladies of all Christian sects.

THERMIDORIANS.—A name given to a large party in the republican convention of France, on account of their triumph in the counter-revolution of the 9th Thermidor, July 25, 1793. They chose Tallien as their chief, endeavored to put a stop to the revolutionary passion for bloodshed, and opposed the constitution of 1793. Their power soon declined.

THERMOMETER was invented about the beginning of the 17th century, though some attribute it to George, who was said to have constructed one prior to 1597. Santorio of Padua, in his Commentaries on Avicenna (1629), also claims the invention. Sir Isaac Newton used an oil thermometer in 1701. Römer's thermometer was known all over Europe in the beginning of the 18th century. The centigrade thermometer used in France was invented by Celsius, a Swedish astro-
nomer, in 1742. A self-registering thermometer, filled with alcohol, was invented in 1782. The scale generally used in this country was invented by Fahrenheit in 1724.

THERMOPOILY (Greece).—This narrow pass, leading from Thessaly into Locris, is celebrated as the scene of the battle in which Leonidas, king of Sparta, with 300 men, arrested the progress of the whole army of the Persians until they found another path over the mountains, Aug. 7-9, B.C. 480. The allied army of the Greeks assembled at the pass to oppose the Gauls under Brennus, B.C. 279. The invaders having been conducted across the mountains by the same path the Persians had followed, the Greeks retired to their ships. Philip V. of Macedon forced the fortifications which had been made by the Aetolians, B.C. 207. Antiochus, when at war with the Romans, fortified the pass, B.C. 181.

THERMUM, THERMUS, OR THERMA (Greece), was, on account of its strength, considered impregnable. It was surprised, B.C. 218, by Philip V. of Macedon, who carried off the most valuable portion of the spoil, and destroyed the remainder. A few years later, the Aetolians having sided with the Romans, Philip V. again surprised Thermum B.C. 206, and destroyed everything that had escaped his former invasion.

TETHYLE (Greece).—This city of Boeotia is said to have derived its name from Thelsa, a daughter of Asopus, or from Thespins, a son of Erechtheus, who migrated from Athens. It was burnt by Xerxes, was rebuilt, and the Thebians fought against the Athenians at the battle of Delium, B.C. 424. In the next year the Thebans destroyed the walls of Thespia. An ineffectual attempt was made to overthrow the government B.C. 414. The walls were again destroyed by the Thebans B.C. 372.

TETSSALONIANS (Epistles to).—These two epistles were written at Corinth by St. Paul to the church and brethren at Thessalonica, about A.D. 52.

TETSSALONICA, (See Salona.)

TETHSALY (Greece).—After the battle of Cenophyta, B.C. 436, the Athenians endeavored to extend their power over Thessaly. They marched into the country under the command of Myronides, B.C. 454, but were compelled to retreat. The Spartans under Brasidas marched through Thessaly B.C. 424. The Thessalonians joined the Boeotians against the Spartans B.C. 395. Jason, the son of Lycophon, was elected Tagus of Thessaly B.C. 374; and after the battle of Lenctra, B.C. 371, the Thebans invited him to join in an attack upon the Spartan camp; but he declined, and was shortly afterwards assassinated. Pelopidas invaded Thessaly B.C. 369, and again in B.C. 368. Philip II. of Macedon marched into Thessaly B.C. 353, but was defeated and driven out. He returned, and Thessaly fell entirely under his rule. Thessaly was declared a Roman province B.C. 197.

THETFORD (Norfolk).—A synod was held
at this place, the Sitomagus of the Romans, A.D. 609. The Danes wintered here in 866, and again in 870, when they sacked the town. Thetford was plundered and burned by the Danes in 1004, and again in 1010. Herfast removed the bishopric of the East Angles from Elmham to Thetford in 1073, where it remained till 1092, when it was removed to Norwich. The grammar-school was founded before 1328. Thetford was made the see of a suffragan bishopric by Henry VIII., March 19, 1536. Its first charter was granted by Elizabeth, March 12, 1573, and it was renewed by Charles II. March 6, 1683.

THIMBLE.—Bronze thimbles, similar to those still in use, were employed by the ancients, and thimbles open at the end were discovered among the ruins of Herculanenum, A.D. 79.

THIRTY-NINE ARTICLES.—Ten articles to establish Christian quietness and unity were adopted by the Reformed Church of England A.D. 1536, but owing to their unpopularity they were superseded, in 1537, by a formulary known as the "Instruction of a Christian Man." In 1538 a series of thirteen articles, proposed to Henry VIII. by the German reformers, was declined, and the following year six articles were enforced by the statute known as the Bloody Bill, 31 Hen. VIII. c. 14 (1539). In 1551 forty-two outlines were prepared, and, after several modifications, a mandate was published for their subscription, June 19, 1553. During the reign of Mary, Gardiner introduced a series of fifteen articles in 1555, and the houses of Convocation four articles in 1558, both of which systems favoured popery. In 1559 eleven Protestant articles were established, and in 1563 the forty-two articles of Edward VI. were revised by Convocation and reduced in number. In 1591 Archbishop Whitgift attempted to introduce a system of Calvinistic tenets known as the Lambeth articles (q.v.), but they were immediately suppressed in consequence of the royal disapprobation. A separate series of 104 articles was adopted in Ireland in 1615, and in 1635 the Irish church accepted the thirty-nine English articles. In 1643 the articles were revised by the assembly of divines, and in 1660 and 1689 they were the subject of violent popular agitation.

THIRTY TYRANTS.—When Athens surrendered to Lysander, B.C. 404, the supreme power was vested in thirty persons chosen by the Lacedaemonians. Thrasybulus, who had been sent into exile by them, collected a small company of followers, and, after gaining several victories over the troops sent against him, drove the "thirty" from Athens B.C. 403. In the Roman empire a series of usurpers rose and fell in rapid succession, A.D. 248—269, to whom this appellation has been applied, although, excluding women and children, the number did not exceed nineteen.

THIRTY YEARS' WAR, between the Protestants and Roman Catholics of Germany, was brought about by Matthias, king of Hungary and Bohemia, who, on account of his cruel treatment of the Protestants, caused a revolt of his Bohemian subjects. The first overt act of hostility occurred in Bohemia, where the two royal ministers, Slawata and Martinitz, with their secretary Fabricius, were thrown out of the window of the council-house at Prague, May 23, 1615. On the death of the emperor Matthias, the insurgents declared the throne vacant, and crowned Frederick V. elector-palatinate, son-in-law of James I. of England, at Prague, Nov. 4, 1619. The cause of Frederick II., archduke of Austria, who had succeeded his cousin Matthias, and claimed the Bohemian crown, was espoused by the Roman Catholic princes, while those of the Protestant states took the side of Ferdinand. The Bavarians, commanded by their duke and the celebrated Tilly, defeated the Bohemians at Prague, Nov. 9, 1620. Gustavus Adolphus, king of Sweden, and Wallenstein figured conspicuously in the long struggle that ensued, and which was brought to a close by the peace of "Westphalia," signed at Münster Oct. 24, 1648.

THISTLE (Order).—This order of knighthood is said to be of ancient date, though little is known respecting its origin. It was revived by James II., who issued letters patent under the great seal of Scotland, May 29, 1687. (See Andrew, St., Order of.)

THISTLEWOOD'S CONSPIRACY. (See CATO-STREET CONSPIRACY.)

THOMAS'S (St.) HOSPITAL (London) was founded A.D. 1213, by Richard, prior of Bermondsey. It was purchased at the dissolution of the religious houses by the citizens of London, and opened as an hospital in November, 1552. A large part of the edifice was rebuilt in 1693, and additions were made in 1732. The north wing was completed in 1836 and the south wing in 1842.

THOMISTS. (See SCOTISTS and MOLINISTS.)

THOMITES.—A lunatic named John Thom, a native of Cornwall, who resided at Canterbury, assumed the name of Sir William Courtenay, professed to be entitled to some of the finest estates in Kent, and having collected a number of the peasantry, persuaded them that he held a divine commission, May 28, 1838. They marched through several villages, and with an increased force returned to Bossenden farm May 31, where Thom shot a constable who had come to take him into custody. A party of military was thereupon brought from Canterbury. They found the madman and his followers sheltered in a sequestered part of Bossenden Wood. As they advanced, Lieutenant Bennet, of the 45th regiment, was shot dead by the soi-disant prophet. The soldiers fired a volley, when Thom and ten of his infatuated followers were killed, and the mob dispersed.

THORINUM, OR THORINA.—This metallic body was discovered by Berzelius A.D. 1829.

THORN (Prussia) was founded, A.D. 1231, by the Teutonic knights, who became feuda-
ories of Poland by the peace of Thorn, concluded Oct. 19, 1499. A conference was held here between the Polish Roman Catholics and the Dissidents in 1645. Thorn was taken after a siege of four months by Charles XII. of Sweden in 1703. The Protestants here were massacred in 1724. Thorn fell into the possession of the Prussians in 1793, and was captured by the French under Marshal Ney in November, 1806. The French garrisoned it in January, 1813, and it was blockaded by the Russians till it surrendered, April 17, 1813. Thorn was finally ceded to Prussia in 1815.

**Thrace (Turkey), the modern Roumelia, is said to have been peopled by a tribe of Pelasgians; but there is no authentic history of the country until the formation of the Greek settlements in the 6th century B.C.**

**Thrustmen (Battle).**—Hamibald defeated the Romans under the consul C. Flaminius Nepos, on the banks of this lake, in Etruria, B.C. 217.

**Threatening Letters.**—By 8 Hen. VI. c. 6 (1430), the sending or delivering of threatening letters was declared high treason, and by 9 Geo. L. c. 22 (1723), it was made a capital felony. By 4 Geo. IV. c. 54 (July 8, 1823), the sentence was commuted for transportation for life, or imprisonment not exceeding seven years. This act was repealed by 7 & 8 Geo. IV. c. 27 (June 21, 1827), and further provisions were enforced by 10 & 11 Vict. c. 66 (July 9, 1847).

**Threshing Machine,** invented A.D. 1758 by a farmer of Dunblane, in Perthshire, was improved by Meikle, a millwright of Haddingtonshire, in 1783.

**Thundering Legion.**—During the expedition of Marcus Antoninus against the Marcomanni, A.D. 174, a Christian legion in his army are said to have prayed for rain, whereupon a plentiful shower descended. At the same time a storm of thunder and lightning threw their enemies into confusion, and enabled Antoninus to obtain a decisive victory. The legion consequently received the name of the thundering legion.

**Thurgau, or Thurgovia (Switzerland).**—This canton, once governed by its own counts, came under the sway of the house of Habsburg A.D. 1264. It was conquered by the Swiss in 1460. It was admitted into the confederation as a distinct state in 1798, and received a constitution in 1831, which was revised in 1857.

**Thuringia (Germany).**—This kingdom of Central Germany, founded by the Thuringi, or Dorigi, a Gothic tribe, about A.D. 456, was annexed to the kingdom of the Franks, by Thierry, in 530. In 630 it was erected into a duchy, and in 843 it was incorporated with the German kingdom. It was again made a duchy in 849, and in 1025 it was united with Hesse into a landgraviate. The two countries were again separated in 1247, and in 1439 Thuringia was added to Saxony. By the treaties of 1814 and 1816 it was annexed to Prussia.

**Thurium, or Thurii (Italy),** was founded near the site of the ancient Sybaris by some Sybarite exiles, B.C. 443. The Thurians were defeated by the Lucanians in a great battle near Lauis, B.C. 390, when above 10,000 were cut to pieces. Thurium joined the Carthaginians, and again returned to its
alliance with Rome, B.C. 213, and received a Roman garrison. Hannibal gave up the city to plunder B.C. 204, having first removed 3,500 of its principal citizens to Crotona. A Roman colony was established here B.C. 194. It was taken by Spartacus, and subjected to a heavy fine, B.C. 72.

THURLES (Ireland).—In the 10th century a battle was fought here between the Irish and the Danes, in which the former were victorious. The castle, which is of ancient date, was besieged and taken, A.D. 1208, by Hugh de Lacey. A monastery of Carmelites was founded in 1300. St. Patrick's college was erected in 1836. A synod of the Roman Catholic clergy was held here Aug. 22, 1850, under the presidency of Dr. Cullen. It condemned the Queen's colleges, and recommended the foundation of a Roman Catholic university. The statutes of the synod were published Jan. 1, 1852.

THURSOT'S EXPEDITION.—Thurtot, an Irish adventurer in the French service, sailed from Dunkirk, Oct. 5, 1769, intending to make a diversion either in Scotland or Ireland. He landed at Carrickfergus, Feb. 21, 1760, took the town after a short blockade, and plundered it. Having sailed from Carrickfergus, he was pursued by Captain Elliot, with three ships, who came up with him in the Irish Channel. An engagement ensued, Feb. 28, Thurtot fell covered with wounds, and his ships were taken.

THURSDAY.—Among all the ancient nations of northern Europe, the fifth day of the week was consecrated to Thor, the king of heaven, and the thunderer. It is a remarkable coincidence that in the Roman week the same day was known as Dies Jovis, or the day of Jupiter, who occupied, in classical mythology, the same position as was assigned to Thor by the Teutons. (See MOUNT THOR.

TURATA (Battle).—Valens, the Roman emperor of the East, gained a victory over his rival Propocius at this town of Lydia, A.D. 366.

THYMBRA (Battle) was gained by the Persians, under Cyrus, over Cressus, king of Lydia, at this town of Lydia, B.C. 548. This victory made Cyrus the undisputed master of Asia.

TIRANA.—The first crown, or regnum, on the episcopal mitre of the popes, is said to have been the gift either of Constantine I., or of Clovis. The second was added, as an emblem of temporal power, by Boniface VIII. The triple crown was introduced by A.D. 1322, or by Benedict XII.

TREVISO (Italy).—An inundation of this river is said to have swept away all the houses and buildings at Rome, in the lower part of the city, B.C. 241. Another took place B.C. 54. Augustus first instituted magistrates whose duty it was to restrain the river within due bounds, and preserve the embankments, &c. This office was regarded as one of the most honourable in the state. An inundation caused such serious damage A.D. 15, that it was proposed in the senate to diminish the waters by diverting some of the chief tributaries of the stream. In ancient times the Tiber was occasionally frozen, but this was an event of extreme rarity. Livy notices its having been frozen over in the extraordinary winter of B.C. 398.

TIBERIAS (Palestine).—This town of Galilee, on the shore of Lake Tiberias, was built by Herod Antipas, before B.C. 44, and named in honour of the emperor Tiberius. It was taken and destroyed by the emperor Vespasian, but sprung up again after the destruction of Jerusalem, Sept. 8, A.D. 70, and was the seat of a succession of Hebrew judges and doctors till the 4th century. Euplianius, bishop of Salamis, in 367, states that a Hebrew translation of St. John and of the Acts of the Apostles was kept here. The modern town, called Tabariuch, was almost destroyed by an earthquake Jan. 1, 1837.

TIBET, OF THIBET (Central Asia).—This extensive region, chiefly comprised within the Chinese empire, was first erected into a kingdom B.C. 315. Buddhism was introduced A.D. 42, and Tibet was compelled to pay tribute to China in 521. It was conquered and ravaged by the Mongols, under Zenghis Khan, in 1206. The easternmost parts of Tibet were gradually conquered by the Chinese in 1125, 1362, and 1371, and the whole of the kingdom was made subject to them in 1720. The Ghoorkhas of Nepal invaded it 1790, but they were repulsed with great loss by the emperor Keen-lung.

TICINO, OR TESSIN (Switzerland).—Before the time of the Romans, this canton was inhabited by the Lepontii, and other aboriginal tribes of mountaineers, who were subdued by the emperor Augustus. It was conquered by the Longobards in the 6th century, and was subsequently occupied by the dukes of Milan, and the house of Sax and other Rhoanian lords, till the 16th century, when it was conquered by Switzerland. Its subjection was completed in the 16th century. It was not admitted into the Swiss confederation till 1815. Its government underwent a considerable modification in June, 1830.

TICKETS OF LEAVE.—In consequence of the difficulty experienced in transporting felons, an act (18 & 17 Vict. c. 99) was passed providing other punishment, Aug. 20, 1853. It empowered the sovereign, by an order in writing from the secretary of state, to grant licences—called tickets of leave—to convicts under sentence of transportation, or penal servitude, to be at large in the United Kingdom. These licences can be revoked if necessary, or the convict apprehended and committed to prison for the residue of his original sentence.

TICONDEROGA (North America).—The fortress of Ticonderoga was built by the French A.D. 1755. The English, under Abercromby, assaulted it unsuccessfully July 8, 1758. It was taken by them, under Amherst, July 26, 1759. The revolted Americans surprised it May 10, 1775, and they
evacuated it on the approach of the English, under Burgoyne, July 6, 1777. General Lincoln made a vain attempt to recover it, Sept. 13, 1777, and soon after the garrison destroyed their cannon and withdrew into Canada.

TIDES.—The earliest author who notices the tides is Homer, who probably flourished about B.C. 962, and the first who says anything of their cause is Pytheas of Marseille, who lived about the time of Alexander the Great. The theory of the tides was first satisfactorily explained by Kepler, and a more complete explanation was given by Sir Isaac Newton in his "Principia," published in 1687. It was still further improved by Bernoulli, Maclaurin, and Euler, in their treatises written when the subject was proposed as a prize by the French Academy of Sciences in 1738.

TIEN-TSIN (China).—A treaty was concluded at this town, with China, by Lord Elgin, on behalf of England, June 26, 1858, and at the same time separate treaties were made by the plenipotentiaries of France, Russia, and the United States. Tien-tsin was occupied by the French and English, Aug. 21, 1860.

TIFERNUM (Battle).—The Romans defeated the Sammites at this town of Umbria, B.C. 305.

TIGRANOCERTA (Asia), the capital of Armenia, built by Tigranes during the Mithridatic war, was besieged by the Roman consul Lucullus, and Tigranes marched to its relief with an army consisting of 150,000 infantry, 17,000 heavy and 33,000 light cavalry, 20,000 archers and slingers, besides a multitude of pioneers, &c. Lucullus, with 11,000 men, defeated this host with prodigious slaughter, and the city surrendered, B.C. 70.

TIGRIS (Asiatic Turkey).—Many famous cities, such as Nineveh, Seleucia, Ctesiphon, Bagdad, and Mosul, stood upon the banks of this river. In ancient times dams were constructed across the stream to irrigate the country; but these were cut through by Alexander to improve the navigation. The English steamer Enyprates ascended the Tigris to within twenty miles of Mosul in 1838.

TILBURY (Essex).—The fort was built as a block-house by Henry VIII., and Elizabeth lodged here, formed a camp, and reviewed the troops, on the apprehended Spanish invasion, A.D. 1588. It was regularly fortified in 1677.

TILES.—Marble tiles were introduced by Byzces of Naxos, B.C. 620. Wooden tiles were used in Rome till B.C. 284. Tiles were first used in England A.D. 1246, and pantiles were in general use in Europe in the 15th century. Decorative paving-tiles of baked pottery were much used in the Middle Ages, but their manufacture in England was almost lost until revived by Minton, and employed in the restoration of the Temple Church, London, in 1842. Tiles were taxed in 1754. This tax was abolished by 3 Will. IV. c. 11 (May 17, 1839).
eastern nations measured time by means of an instrument called Clepsydra (q.v.), or water-clock, the principle of which was a constant dropping of water through a small aperture out of one vessel into another. The ancients also measured time by means of the hour-glass and sundial. The Druids, at the period of the Roman invasion, B.C. 55, computed their time by nights, and not by days, and measured it by the motions of the moon. (See CLOCK.)

TIMOTHY (Epistles to).—The first epistle of the apostle Paul to Timothy appears to have filled an interval shortly after Paul left Ephesus to go into Macedonia, A.D. 57 or 58. The second epistle was written by Paul when a prisoner at Rome, according to Lardner, in May, 61.

TIN.—This metal, one of the most ancient known to man, is mentioned by Moses B.C. 1451 (Num. xxxi. 22), and was imported into Tyre from Britain as early as B.C. 583. (See Cassiterides.) Spain was also a tin-producing country visited by the ancients. The Cornish tin-mines were worked by the ancient Britons during the Roman occupation, but were neglected by the Saxons. The Norman sovereigns derived immense profit from exporting the metal, as during their reigns England was the only country in which it was found; but the discovery of tin-mines in Bohemia A.D. 1241, tended to diminish the British trade. Edward III. claimed a monopoly of the tin-mines of Devon and Cornwall, May 10, 1388, and in 1458 extensive supplies were discovered at Altenberg, in Saxony. In 1640 tin-mines were discovered in Barbary, in consequence of which the importation of the metal into this country was prohibited by a proclamation of Charles I. The tin-mines of Banca were discovered in 1710, and their produce was first imported into England in 1787. In 1665 an attempt was made to introduce the manufacture of tin plate into England from Germany, where it had been long established, and in 1681 some success was attained by Andrew Yarranton, who was compelled to relinquish the business by the interference of a courtier. The manufacture was permanently established about 1730, when Pontypool in Monmouthshire was made its chief seat. The composition known as Britannia metal, of which tin forms the principal ingredient, was first made at Sheffield about 1770. By 1 & 2 Vict. c. 120 (Aug. 16, 1838), the duties were settled at 1s. per hundredweight for tin ore, and 15s. for the manufactured metal.

TINCHBERRY (Battle).—Henry I. of England defeated his brother Robert, and took him prisoner before the castle of Tinchberry, in Normandy, Sept. 28, 1106.

TINTERN ABBEY (Monmouthshire) was founded for Cistercian monks by Walter de Clare A.D. 1212. The church was commenced by Roger de Bigod, earl of Norfolk, and mass was first celebrated within it in 1263. The site was granted to the earl of Worcester by Henry VIII. in 1536, and is now the property of the duke of Beaufort.

TIPPERMUR (Battle).—The marquis of Montrose defeated the Covenanters under Lord Elcho at this village near Perth, in Scotland, Sept. 1, 1644.

TIRLEMONT (Belgium).—This town was taken by the French A.D. 1635. They defeated the Austrians here in Nov. 1792, and again March 16, 1793. The Gothic church, founded towards the end of the 13th, was rebuilt in the 15th century.

TITAN, a metal first discovered by Gregor in the grains of a black mineral found in the bed of a rivulet in Cornwall, A.D. 1791. Klaproth found it in some other minerals in 1795, and gave it the name it now bears. Its properties were first satisfactorily determined by Wollaston in 1822.

TITCHFIELD, or TICHFIELD (Hampshire).—The marriage of Henry VI. with Margaret of Anjou is said to have taken place here April 18, 1445. Near the town are the ruins of Titchfield House, erected on the site and with the materials of the Premonstratensian abbey, founded in 1231. In this mansion Charles I. took refuge after making his escape from Hampton Court in 1647. The free school for boys and girls is supported by a fund bequeathed by Henry, earl of Southampton, in 1620.

TITHE, or TENTHS.—Abraham gave Melchizedek tithes of all the spoil he had taken from the five kings, B.C. 1913 (Gen. xiv. 20), and the Levitical law ordered the Jews to set apart a tenth of all their goods to the service of the Lord, B.C. 1491 (Lev. xxvii. 30—32). Among the early Christians, the payment of tithes was regarded as a matter of conscience, and no laws were passed for its enforcement until the council of Mâcon, Oct. 23, 585. The custom of devoting a tenth part of all property to the service of the clergy is mentioned in the canons of Egbert, archbishop of York, in 750, and in the ordinances of the council of Celchyth in 787. In 794, Offa, king of Mercis, endowed the church with tithes of all his kingdom, and Charlemagne made several laws regulating their payment about the year 800. The tithe system was sanctioned and amended by the general Lateran council of 1215. By 37 Hen. VIII. c. 12 (1545), the inhabitants of London were ordered to pay 2s. 9d. in the pound on rent as tithes. Numerous amendments in the tithe laws were made by 2 & 3 Edw. VI. c. 12 (1548), and subsequent statutes. By the Tithe Commutation Act, 6 & 7 Will. IV. c. 71 (Aug. 13, 1836), commissioners were appointed to effect a commutation of tithes for a rent-charge based upon the average prices of wheat, barley, and oats for seven years. This act was amended by 7 Will. IV. & 1 Vict. c. 69 (July 15, 1837), 1 & 2 Vict. c. 64 (Aug. 4, 1838), 2 & 3 Vict. c. 62 (Aug. 17, 1839), 3 & 4 Vict. c. 15 (June 4, 1840), 5 & 6 Vict. c. 54 (July 30, 1843), 9 & 10 Vict. c. 73 (Aug. 26, 1846), and 10 & 11 Vict. c. 104 (July 22, 1847).

TITLES. (See Nobility, Peers, &c.)

TITUS (Epistle).—The date of Paul's
epistle to Titus has been a subject of much controversy, some placing it as early as A.D. 52, and others as late as A.D. 65. From the striking verbal resemblances between it and the first epistle to Timothy, it is considered probable that they were written about the same time (A.D. 57 or 63).

TIVERTON (Devonshire), anciently called Twyford-ton and Two-ford-ton, from its situation between the rivers Exe and Lowman, was known as the village of Twyford as early as A.D. 872, and had a market and three annual fairs in 1200. The wool trade was introduced in 1353. Its prosperity was greatly checked by the plague in 1571, and the town was almost destroyed by fire in 1598. Tiverton was considered the chief manufacturing town in the west of England in 1612, about which time a second conflagration destroyed nearly all the property of the inhabitants. A third fire destroyed 300 houses in 1731, and a twelfth part of the population was cut off by an epidemic fever in 1741. The woollen trade was destroyed by the introduction of Norwich stuffs in 1745, and this was superseded by the patent net manufacture in 1815. The lace trade was introduced in 1816. The castle, erected in 1106, was stormed by Fairfax in 1645, and afterwards dismantled. Almshouses were founded by John Greenway in 1529, by John Walsden in 1579, and by George Sleaf in 1613. The free grammar-school was founded in 1604, and the free English school in 1611. A charitable fund for granting immunities to sixty-seven poor persons was established in 1687, and the charity school was founded in 1713. The town-hall and corn market were built in 1830.

TILBECEN, or TILBEN (Africa), is a place of considerable antiquity, and many Roman remains are to be found in the vicinity. The greater part of the town was destroyed by the day of Algiers as a punishment for the disaffection of its inhabitants, about A.D. 1670. The French took it in 1836, and evacuated it, by treaty with Abd-el-Kader, in 1837. It was again taken by the French in 1842, and forms part of their colony of Algeria.

TOBACCO.—The use of this plant by the American Indians was first discovered by the Spaniards, at Cuba, in November, 1492, when two of the companions of Columbus observed the natives puffing smoke from their mouths and noses. In 1494 the Indian habit of snuff-taking was remarked by the Spaniards, and in 1503 the natives of Paraguay astonished them by chewing the weed and spitting the juice towards them as a mode of repelling their invasion. Oviedo published an account of the use of the weed by the inhabitants of Hispaniola in 1526, and in 1650 Francesco Hernandez brought some plants to Europe, and presented them to Philip II. of Spain. In 1561 Jean Nicot presented some specimens to Catherine de Medici of France, and from him the plant received its scientific name of Nicotiana. It was first brought to England by Sir John Hawkins in 1565, and in 1586 Mr. Ralph Lane introduced the practice of smoking, which was adopted and rendered fashionable by Sir Walter Raleigh. In 1598 Paul Hentzner visited England and, speaking of the Bear Gardens, says, "At these spectacles, and everywhere else, the English are constantly smoking tobacco," and Decker, in his "Satiro-mastix," printed in 1602, mentions smoking as a habit of his lady contemporaries. In 1608 James I. published his celebrated "Counterblast to Tobacco," and in 1604 he issued a proclamation against its use, and charged a duty of 6s. 10d. per lb. on all that was sold. In 1624 he published a second document, prohibiting its importation except from British colonies, and forbidding its culture in England or Ireland, and Urban VIII. the same year denounced excommunication against such as should smoke in church. Tobacco was introduced into Java by the Dutch in 1601, was conveyed from Brazil to India in 1617, and it is now universally used in the eastern hemisphere. In 1634 Charles I. repeated the prohibitions of his father, and extended them to the importation of tobacco seed, and in 1652 the Long Parliament passed an act embodying these regulations, which were finally confirmed by 12 Charles II. c. 34 (1660). Cigars are first mentioned as a form of tobacco used by the Indians in 1699, and in 1796 they became fashionable at Hamburg, and thence were diffused throughout Europe. The growth of tobacco in Ireland was permitted by 19 Geo. III. c. 35 (1779), but it was again prohibited by 1 & 2 Will. IV. c. 18 (Aug. 23, 1831). The first duties imposed on tobacco by act of parliament were levied by 1 James II. c. 4 (1685), and after many changes, the duties on foreign and British tobacco were fixed at 3s. per lb. by 5 & 6 Vict. c. 47 (July 9, 1842).

TOBAGO (Atlantic Ocean), one of the West-Indian islands belonging to Great Britain, was discovered by Columbus A.D. 1496, and was first colonized by the Dutch in 1632. They were expelled by the Spaniards, and having returned to the island, abandoned it in 1688. By the treaty of Aix-lA-Chapelle, Oct. 18, 1748, Tobago was declared neutral, and by the peace of Paris, Feb. 10, 1763, it was assigned to Great Britain. It was taken by the French in 1781, and was ceded to them by the treaty of Versailles in 1783. The English captured it in 1795, and again July 17, 1803, and it was finally ceded to them by the congress of Vienna in 1814.

TOLBOSSE (Asiatic Russia), the capital of a government of the same name, was founded by the Russians A.D. 1587. Many of the Swedish officers who had been taken prisoners at the battle of Pultava in 1709 were sent here. Louis XV. of France sent the Abbé Chappe d'Auteroche here to observe the transit of Venus in 1756. The town was almost destroyed by fire in 1786.

TOKAY (Hungary).—This town of upper Hungary, on the river Theiss, celebrated for
its wines, is situated at the foot of the Hegylla hills. They are planted with vines which Bela IV. (A.D. 1235 to 1270) had brought into Hungary by Italian colonists. Tokay was taken from the Turks in 1685. The town was formerly defended by a castle, which was demolished in 1706. The Magyars were driven from their position here, on the Theiss, by the Cossacks, in July, 1849.

Tokens.—The use of private tokens to supply the want of small coin, prevailed in England at the beginning of the reign of Henry VIII. The issue of tokens for money, by inferior traders, caused many complaints A.D. 1574. They were made of lead, tin, latten, and leather, and caused great loss to the poor, as they were only taken at the shops where first issued. Private traders struck farthing tokens in lead for some years prior to 1613, in which year they were abolished. Silver tokens of the value of 5s. were issued by the Bank of England Jan. 1, 1798, and from the scarcity of small coin, the bank again issued a large quantity of silver tokens at 5s. 6d., 3s., and 1s. 6d., in 1811. The issue of gold and silver tokens, except by the banks of England and Ireland, was prohibited by 52 Geo. III. c. 157 (July 29, 1813).

TOLEMAIC (Battle).—On this plain of Germany, in the neighbourhood of Cologne, Clovis, king of the Franks, totally defeated the Allemanni, A.D. 496.

TOLEDO (Spain) is said to have been founded by some Jews who migrated to Spain during the period of the second temple in Jerusalem (finished B.C. 515). The Romans took it B.C. 103. Leovigild, king of the Visigoths, made it the seat of his empire A.D. 577. It was enlarged and surrounded by walls by King Wamba in the 7th century, and was taken by the Arabs in April, 712. Alphonso VI., of Castile and Leon, captured it, after a siege of three years, May 25, 1085, and built an outer wall to the town in 1109. During the civil wars between Peter the Cruel and his bastard brothers (1354 to 1369) the town was frequently taken and retaken, and the inhabitants—chiefly Jews—were ill-treated. Toledo was celebrated for the manufacture of sword-blades in the 16th and 17th centuries. The cathedral, standing on the site of an old Moorish mosque, was founded by Ferdinand III. of Castile, in 1258, and completed in 1492. The chapel, called Capilla Muzarabe, because mass is still said daily according to the Muzarabic ritual, was founded by Cardinal Ximenes in 1510. The royal palace, originally built by King Wamba in the 7th century, was almost entirely rebuilt by the emperor Charles V. (1519 to 1556). The convent and church of San Juan de los Reyes was erected by Ferdinand and Isabella in 1476, and the manacles and fetters worn by the Christian captives of Granada—liberated at the taking of that city in 1492—suspended to the outside of the walls of this building, remain there to the present time. The foundling hospital of Santa Cruz was founded by Cardinal Mendoza in 1304, and La Iglesia del Transito, formerly a Jewish synagogue, built in the reign of Peter the Cruel (1350 to 1369), is a curious specimen of Saracenic architecture. Toledo was taken by the French in Dec. 1808, and evacuated by them in 1813. Councils were held here, Sept. 7, 400; in 447; May 17, 527; in 531 or 532; 588; May 17, 597; Oct. 23, 610; Dec. 9, 633; Jan. 9, 636; Jan. 5, 683; in 685; Jan. 19, Nov. 2, 693; Dec. 1, 656; Nov. 7, 675; Jan. 9 to 25, 681; Nov. 4, 683; Nov. 14 to 20, 684; May 11, 688; May 2, 693; Nov. 9, 694; in 701; Nov. 21, 1324; May 19, 1339; in April, 1347; and Oct. 1, 1355.

TOLENTINO (Italy).—Alarmed at the progress of the French arms in the papal states, Pius VI. despatched Cardinal Mattei, who, at this place, concluded a treaty of neutrality, which granted to the conquerors a cession of territory, money contributions, together with some of the finest works of art in the world, Feb. 19, 1797. Murat, king of Naples, having taken up arms in the cause of Napoleon I., was totally defeated here by the Austrians, May 3, 1815.

TOLERATION. (See ACT OF TOLERATION.)

TOLIPIA (Italy).—John di Castro, convinced that a mineral, fit to yield alum, was to be had at this place, instituted experiments which proved successful, and he established the well-known manufactury about A.D. 1459.

TOLLS.—A grant of a penny for every wagon passing through a manor in Gloucestershire was made A.D. 1267. Edward III. granted permission to levy a toll on vehicles passing along the road from the hospital of St. Giles's in the Fields to Temple Bar in 1346, and another on all goods conveyed by land or water to the market at Westminster in 1358. (See REBECCA RINS.)

TOLOSA (Spain).—On the plains of Tolosa, Mohammed, caliph of Spain, was defeated by the Christians, July 16, 1212. The French gained a victory over the Spaniards here in July, 1794. The town, occupied by the French from 1808 to 1813, was captured by the English, under Sir Thomas Graham, in July, 1813.

TONGA (Pacific Ocean), the chief of the Friendly Isles (q.v.), was discovered by Tasman, A.D. 1643. An excellent roadstead was discovered by Cook, on the north side, when he visited it in 1773. Ten English missionaries, sent out by the London society, landed here in 1797.

TONGRES (Belgium).—A mineral spring in the neighbourhood was known in the time of Pliny, A.D. 72. A bishop's see was established here in 97, was transferred to Maastricht in 383. The church, said to be the first dedicated to the Virgin north of the Alps, was built in 1240. The town was wrested from the French by the archduke Charles in March, 1793, and evacuated by the allies July 15, 1794. On the road between Hasselt and this town the Belgians were defeated by the Dutch troops, under
the command of General Georges, Aug. 8, 1831.

TÖTTINGEN (Denmark) was surrendered by Steenbock, the Swedish general, to the Danes, A.D. 1712. The Holsteiners in an attempt to take it were repulsed, Sept. 30, 1850.

TÖQUIN (Anam).—This northern province of the kingdom of Anam was conquered by the Chinese A.D. 1406, and by the Anamese in 1790.

TÖTINE was so called from Lorenzo Tonti, a Neapolitan, who professed to raise loans on life annuities, with benefit of survivorship. The first was opened in France in 1653, another was tried in 1689, and the last in that country was opened in 1789.

TÖRESILLAS (Treaty), by which the line of demarcation drawn by Pope Alexander VI., dividing the territories in the New World between Portugal and Spain, was removed three hundred and seventy miles to the west of Cape Verde Islands. This was concluded June 7, 1494.

TORGAU (Prussia).—Here the landgraves of Hesse and the elector of Hesse entered into an agreement to support the reformed religion, A.D. 1526, and Luther presented the elector of Saxony with the leading articles of the faith in 1530. The "Book of Torgau," designed to end the crypto-Calvinistic controversy, was issued in 1576. An ejectment of divines took place for refusing subscription to the Visitation articles in 1592. Torgau was taken by the Austrians in 1760. They were defeated in the neighbourhood by the Prussians, commanded by Frederick II., Nov. 3, in the same year.

TORONTO (Canada), formerly called York, was surveyed by Governor Simcoe, A.D. 1793. The first houses were built in 1794, and it was raised to the rank of a city by Sir John Colborne, when it took its present name, in 1834. An insurrection which broke out was suppressed by the militia under Sir Francis Head, Jan. 5, 1838. The seat of government was transferred here from Kingston in 1844. The cathedral church of St. George was burned down in 1849.

TÖRES VEDRAS (Portugal).—Wellington commenced his famous "lines" here in December, 1809, and the whole army was collected between them Oct. 15, 1810.

TÖRTÖL (West Otago).—The group (Virgin Islands) to which the island belongs was discovered by Columbus A.D. 1494. A band of Dutch buccaneers settled here in 1648, and were expelled in 1666 by the English, who have since kept possession.

TÖRTONA (Italy), the ancient Dertona, a Roman colony, is mentioned by Strabo as one of the chief towns in that part, A.D. 14. It was taken by Frederick I. of Germany in 1155, and its fortifications were repaired in 1156. The papal legate captured it in 1232, the French and Piedmontese in 1734, and the Spaniards July 24, 1745. The citadel, built by Victor Amadeus III., was handed over to the French general Meynier in June, 1796. The town, after a lengthened siege, surrendered to the Russians, Aug. 25, 1799. West of the town is the plain of Marengo, where the Austrians were defeated by Napoleon Bonaparte, June 14, 1800.

TÖRTOSA (Spain), the ancient Dertosa, is shown to have been a Roman fort. It is believed to have broken the head of Julius Caesar, B.C. 45. Ten large barks filled with Mohammedan troops arrived here A.D. 768. The Wali of the town having rebelled, issued forth to meet the royal troops that were sent against him and defeated them with great slaughter in 788. It was besieged by the Christians, who were attacked by the Mohammedans under Prince Abderahman, and routed in 809. The harbour was repaired in 944. Tortosa was captured by the Genoese in 1148; by the French under the duke of Orleans, July 11, 1708; and again under Marshal Suchet, Jan. 2, 1811. It was held by the French till April 25, 1814.

TÖTTER was practised upon slaves at Athens B.C. 364, and among the Romans earlier than the time of Cicero, who speaks of it as an established practice, B.C. 70. It first received ecclesiastical sanction by a decree of Innocent IV. A.D. 1252. Through the influence of Clement V. a number of Templars, charged with heresy and other offences, were put to the torture in London in 1310. In the cities of Germany it was introduced about 1500, and continued till about 1750. In France it was abolished in 1789. It was abolished in Scotland by 7 Anne, c. 21, s. 5 (1708).

TÖSY.—Various derivations are given for the terms Töry and Whig, first applied to political parties in England about A.D. 1779. The court party reproached their antagonists with affinity to the fanatics in Scotland, known by the name of Whigs. They in return, pretending to find some resemblance between the court party and the popish banditti in Ireland, called them Tories.

TOTAL ABSTINENCE. (See Temperance.)

TÖULON (France), anciently known by the name of Telo Martius, was taken by the constable of Bourbon A.D. 1536; Admiral Parker blockaded the French fleet in the harbour in 1694. The siege commenced by the duke of Savoy and Prince Eugene, was abandoned Aug. 25, 1707. A Spanish squadron left the harbour to attack the British Mediterranean fleet under Admiral Maitland, but, having not gained wind when an engagement took place without any decisive results, Feb. 11, 1744. An unsuccessful attempt was made upon it by Admiral Boscawen in 1756. During the Revolution its inhabitants handed it over with the port to the English admiral Hood, to be held for the French monarchy, Aug. 27, 1793. It was taken by the republican army Dec. 19, when the artillery was directed by Napoleon Bonaparte. The Grosse-Tour, commenced by Louis XII., to protect it from the Barbary pirates, was completed by Francis I. Toulon was fortified after the plans of Vauban by Louis XIV.

TÖULOUSE (France), the ancient Tolosa,
an old town of the Voceae Tectosages, existed many centuries before it was conquered by the Romans, and appears to have had some kind of alliance with them when it was plundered of a vast amount of treasure by Q. Servilius Cepio, B.C. 106. Made the capital of the empire by the Visigoths, A.D. 418, it was captured by the Franks, under Clovis, in 508. Zama, the Saracen, was defeated here by the duke of Aquitaine in 721, and Charlemagne made it the capital of the new kingdom of Aquitaine in 781. Henry II., claiming the county, laid siege to the town, but without success, in 1159. The inhabitants revolted, refused to admit Simon de Montfort, and recalled Count Raymond in 1217. De Montfort, killed under the walls in 1218, was succeeded by his son Amaury, who ceded his claims on the city to Louis VIII. in 1224. Another crusade against the Albigenses of the town, to continue for five years, was decreed by the council of Bourges and accepted by Louis VIII. in 1225. A council held here prohibited laymen from reading the Scriptures, and firmly established the institution. A French garrison occupied it in 1229. Count Alfonso having died childless, the county, at that time the richest in France, fell to his nephew, Philip III., in 1271. A court of mistrels was held here by the duke of Lancaster in 1381. Jean Calas, a Protestant merchant, charged with murdering his son, who had committed suicide, was broken alive upon the wheel, and his body burnt to ashes March 9, 1762. The duke of Wellington defeated the French, under Marshal Soult, and compelled them to evacuate the town, April 10, 1814. The bridge across the Garonne was opened in 1600. In the court of the Capitole the duke of Montmorency was beheaded Oct. 30, 1632. The academy of the Floral Games was instituted in 1323. Councils were held here Sept. 13, 1093; about 1060; in 1068; 1079; 1080; about February, 1118; July 8, 1119; in 1161; and November, 1229.

TOURNAY (Belgium).—This city, the ancient capital of the Nervii, and known under the name of Tornacus, was seized A.D. 438 by the Frankish chieftain Clodion. In 880 it was pillaged by the Norsemen, and in 1192 it was placed under the protection of Philip Augustus. It was fortified by Philip the Fair in 1295, and was seized by Henry VIII. of England, Sept. 29, 1513. The proper administration of justice in the conquered towns of Ternouanne and Tournay was duly provided for by 5 Hen. VIII. c. 1 (1514). Francis I. purchased it from Henry VIII. by a treaty concluded at London in October, 1518. It was taken by the count of Nassau, the general of Charles V., in December, 1521, and annexed to Spanish Flanders. In 1631 the duke of Parma suppressed a rebellion of the inhabitants against the Spaniards. Louis XIV. captured Tournay in 1667, and reunited it to France, but in 1709 it was taken by the allies under Prince Eugene and the duke of Marlborough. By the treaty of Utrecht, April 11, 1713, Tournay was ceded to Austria. The Barrier treaty, signed at Antwerp Nov. 18, 1715, confirmed the custody of it to the Dutch, who were soon compelled to evacuate it. Louis XV. seized it in 1746, and demolished the fortifications, and the treaty of Aix-la-Chapelle, Oct. 18, 1748, restored it to Austria. It was again seized by the French, Nov. 8, 1792, but was retaken by the Austrians April 30, 1793. The French, under Generals Souham and Dandels, defeated the Austrians in a series of engagements before this city, May 11, 12, and 13, 1794. The allies won a battle May 23 (see Pont-a-Chin). General Pichegru seized it June 30, and annexed it to the French department of Jemmappe. It was finally relinquished by France by the treaty of Paris, May 30, 1814.

TOURS (France), the capital of the department of Indre-et-Loire, was anciently the principal town of the Turones, conquered by Julius Caesar B.C. 55. It was included in the kingdom of the Visigoths, from whom it was taken by Clovis, A.D. 507. The Saracens were defeated here by Charles Martel, Oct. 10, 732. It fell into the hands of the count of Blois about the middle of the 10th century. One of his successors ceded it to the count of Anjou in the 11th century, from whom it passed by inheritance to Henry II., and remained in the hands of the English, till finally ceded to France in 1259. It lost half of its inhabitants, and nearly all its trade, by the revocation of the edict of Nantes, Oct. 22, 1685, and from this blow it never completely recovered. The cathedral, said to have been founded in the 4th century, was burned down in the 6th, rebuilt by Gregory of Tours (born 544, died 595), and again burned in the 12th century. The present building, the west front of which was erected by Henry V. of England, was completed in 1431. An abbey of St. Martin, after flourishing for twelve centuries, was destroyed during the Revolution in 1793. The town suffered severely from an inundation in 1856.

TOWCESTER (Northamptonshire).—This town, anciently styled Tosteris, is very ancient, and was a place of great strength in the time of the Saxons. The Danes failed in an attack on Towcester in 917, and in 921 it was re-mortgaged by Edward the Elder. The grammar-school was founded in 1552.

TOWER OF LONDON.—According to a tradition, for which there is little authority, Julius Caesar founded this famous citadel, but no part of the existing structure is of earlier date than the White Tower, which was founded by William the Conqueror about A.D. 1078. The Tower was first used as a royal palace by Stephen in 1140. In 1235, Frederick II. of Germany presented Henry III. with three leopards, which were deposited here, and formed the basis of the celebrated menagerie. The regalia were also removed here during
the reign of Henry III. Colonel Blood's unsuccessful attempt to steal the crown jewels took place May 9, 1671. The last execution on Tower Hill, and the last decapitation in England, was that of Lord Lovat, April 9, 1747. The Horse Armoury was built in 1826, the menagerie was removed in November, 1834, and the Grand Storehouse, which had been founded by James II., was destroyed by fire Oct. 30, 1841. The moat was drained and converted into a garden in 1843, and the first stone of the Waterloo barracks was laid by the duke of Wellington June 14, 1845.

TOWERS.—The most ancient tower on record is that of Babel, built soon after the Flood (n.c. 2247), and generally considered to be identical with the tower of Belus at Babylon, which was in existence in the time of Xerxes (n.c. 485—465), who plundered, and then laid it in ruins. Towers to churches were first introduced in the age of Charlemagne (A.D. 768—814). A church is mentioned as having a tower in 897, and a chapel was built for the emperor having two towers for bells, in 873. The round towers of Ireland were erected at various periods between the 5th and the 13th centuries.

TOWN.—The ancient Britons had no walled towns before the invasion of the Romans, B.C. 55. Towns were answerable for felons' goods; but by 31 Edw. III. c. 3 (1357), if a town could allege anything in discharge of itself, and by which another became chargeable, it could be heard, and right administered. When a murderer escaped from a town, it was liable to a penalty by 3 Hen. VII. c. 1 (1487).

TOWNELEY MARBLES, a collection of Greek and Roman sculpture, &c., formed by Charles Townley in Rome between 1765 and 1772. After his death, which occurred in January, 1805, the collection of marbles and terracottas was exhibited to the public in the Townley Gallery in 1807. The trustees of the British Museum were authorized to purchase them for £20,000 by 45 Geo. III. c. 127 (July 12, 1805).

TOWTON (Battle).—This decisive battle was fought at the township of Towton, near Tadcaster, in the West Riding of Yorkshire, between 40,000 Yorkists under the great earl of Warwick, and 80,000 Lancastrians, under the commons, a Palm Sunday, March 29, 1461, and resulted in the complete defeat of the latter, and the establishment of Edward IV. on the English throne. It is calculated that no less than 37,000 men fell in this great battle, which lasted from nine in the morning till seven in the evening.

TOXOPHILITES.—The Toxophilite Society was first established at Leicester House, London, A.D. 1781; and their archery meetings were held in Bloomsbury Fields. They removed to Highbury Barn about 1826, and thence to Bayswater.

TRACHTANIES. (See PUSEYISM.)

TRADE MUSEUMS AND SCHOOLS.—Bacon and Descartes propounded the idea of forming museums of industrial produce, &c.; but the first establishment of such institutions was effected by Jacques Vaucanson, who died Nov. 21, 1782. In 1795 the French Conservatoire des Arts et Métiers was established, and in 1835 the system of trade museums was introduced with most satisfactory results into Germany. The first efforts to establish anything of the kind in England were made in 1837, and resulted in the formation of the Museum of Economic Geology. The Museum of Economic Botany at Kew was founded in 1848, and the Museum of Practical Geology and the School of Mines in 1851. The balance remaining on hand after the final settlement of the cash account of the Great Exhibition of 1851 was devoted to the establishment of a general museum of manufactures, &c., which was placed under the control of the department of Science and Art, and incorporated with the museum at South Kensington. A Museum of Irish Industry was established at Dublin in 1845, and the Edinburgh Scottish Industrial Museum was founded in 1853. Facilities for the establishment of museums and exhibitions were offered by the Public Libraries and Museums Act, 18 & 19 Vict. c. 70 (July 30, 1855).

TRADE UNIONS were illegal until the passing of 6 Geo. IV. c. 129 (A.D. 1829). The arrest of two members of a trade union caused a riot at Oldham, April 15, 1834, when the prisoners were rescued, and one rioter was shot. A meeting of 25,000 trade unionists took place in Copenhaghenfields, London, to petition for the pardon of the Dorchester labourers, April 21, 1834.

TRAFFALGAR (Sea-fight).—Lord Nelson's last and greatest victory over the combined fleets of France and Spain was gained off this coast of southern Spain, Oct. 21, 1805. The British fleet numbered thirty-three ships of the line and four frigates, and was divided into two squadrons headed by Nelson in the Victory, and Collingwood in the Royal Sovereign. The French fleet consisted of eighteen ships of the line, headed by Admiral Villeneuve, and the Spanish force of Admirals Alava and Gravina amounted to fifteen vessels of the line. The enemy had also five frigates. Immediately before the action Nelson exhibited the ever-memorable signal, "England expects that every man will do his duty," which was no sooner perceived than an excitement seized on from the entire fleet. The Victory came to action at one o'clock, and was engaging the Redoutable, when a ball from the mizen-top struck Nelson in the left shoulder and occasioned the wound of which he died, at half-past four in the afternoon. Nineteen of the enemy's ships surrendered during the battle, and one was sunk. The remnant of their fleet was encountered by Sir Richard Strachan, who took four more prizes, Nov. 4.

TRAFFALGAR SQUARE (London), commenced A.D. 1825, and finished in 1850, cost in granite-work alone upwards of £10,000. The Nelson column was erected Nov. 4, 1843.
Chartist riots commenced in this square with the destruction of the hoarding round the base of Nelson's monument, March 6, 1848.

TRAGEDY.—The origin of tragedy may be traced to the choral songs chanted in honour of Bacchus at the convivial meetings of the Greeks, which were first reduced to order by Arion, about B.C. 620, and which are mentioned as describing the sorrows of the god, and hence as partaking of the tragic element, as early as B.C. 600. Thespis added a single actor to the chorus, B.C. 536, and from this introduction of tragic dialogue is regarded as the founder of dramatic tragedy. Eschylus (B.C. 525—456) gained the first prize awarded by the Greeks for this species of composition, B.C. 484, and added a second actor to the one introduced by Thespis. Sophocles (B.C. 496—405) made his first public appearance in the competition of B.C. 468, in which he strove successfully with the veteran dramatist Eschylus, and B.C. 440 he produced his "Antigone," which is regarded as one of the finest monuments of the Greek tragic muse. He also introduced a third speaker, and one of his dramas, the "Edipus in Colonus," which was not performed till after his author's death, required a company of four actors, besides the chorus. This, we are told, was regarded as a most daring innovation. Euripides (B.C. 480—406) introduced the prologue, and concluded most of his plays by the intervention of the gods, who appeared in the sky supported by machines, and arranged the plot by supernatural agency. This expedient was known as the deus ex machina, and was made the vehicle for exhibiting considerable ingenuity of stage effect. His grandest performance, the "Medea," was first produced B.C. 431. After the death of Euripides, tragedy declined in Greece, and in Rome it never enjoyed a flourishing existence. Livius Andronicus, who flourished B.C. 240; Naevius, B.C. 235; and Ennius, B.C. 239—169, are the most celebrated Roman authors who attempted tragedy. Ten tragedies have been ascribed to Seneca, the philosopher (A.D. 25—68), and although their authorship is disputed, and the works are very defective as dramas, internal evidence strongly supports the supposition. The earliest modern tragedy was the "Rosmunda" of Rucellai, written in Italian, and performed before Leo X. at Florence in 1515. It was the earliest example of blank verse, although the first drama of the kind performed or published, was suggested by Trissino's MS. tragedy of "Sophonisba," which was published in 1524. Jodelle's "Cléopatre" was performed in 1552, and is the first French tragedy, and Sackville's "Gorboduc," which was performed at Whitehall, in the presence of Elizabeth, in 1562, is the earliest tragic drama in English. (See DRAMA, SHAKESPEARE'S WORKS, &c.)

TRANSLATION.—The patriarch Enoch was translated to heaven for his piety (Gen. v. 24), B.C. 3017; and the prophet Elijah was translated to heaven in a chariot of fire (2 Kings ii. 11), B.C. 985.

TRANSPORTATION derived its origin from banishment, which was first introduced by 39 Eliz. c. 4 (1596), and enacted that such rogues as were dangerous to the inferior people should be banished the realm. The first statute in which the word transportation is used is 13 & 14 Charles II. s. 23 (1682), by which justices were authorized to transport such rogues, vagabonds, and sturdy beggars as should be duly convicted and adjudged incorrigible, to any of the English plantations beyond the seas. It was followed by 18 Charles II. c. 3 (1686), which gave a power to the judges, at their discretion, either to execute or transport to America for life the most-troublesome felons of Cumberland and Northumberland. Until after the passing of 4 Geo. I. c. 2 (1717), continued by 6 Geo. I. c. 23 (1719), this mode of punishment was not brought into common operation. By these statutes the courts were allowed a discretionary power to order felons to be transported to America. The system of transportation to the American colonies lasted from 1718 to the commencement of the war in 1775. The great accumulation of convicts in 1776 led to the establishment of the system of the hulks, by 16 Geo. III. c. 43. This was followed by 19 Geo. III. c. 74 (1779), ordering the erection of penitentiaries. Transportation was resumed, and George III., by two

and forty-one were founded throughout the country by 1854.

TRAJAN'S PILLAR was erected on the Forum Trajani at Rome, by the architect Apollodorus, A.D. 114, to commemorate the triumph of the emperor Trajan over the Dacians. The column, 144 Roman feet high, is considered one of the finest monuments of ancient art that has descended to modern times.

TRANQUEBAR (Hindostan.)—The Danes formed a settlement in this part of the Coromandel coast A.D. 1617. It was purchased by the English Feb. 22, 1845.

TRANSALPINE GAVS entered Italy to assist the Cisalpine Gauls, B.C. 327, and were repulsed. The Romans invaded their country, and founded a colony, B.C. 122, and finally conquered them B.C. 51.

TRANSFIGURATION.—This miraculous event in the life of our Saviour, when he took Peter, James, and John up into an high mountain, supposed to be Mount Tabor, and was transfigured before them, appearing in his glory in company with Moses and Elias (Matt. xvi. 1—3; Mark ix. 2—4, &c. &c.), is supposed to have occurred May 26, A.D. 29.

TRAVEL.—The patriarch Enoch was translated to heaven for his piety (Gen. v. 24), B.C. 3017; and the prophet Elijah was translated to heaven in a chariot of fire (2 Kings ii. 11), B.C. 985.

TRAVEL:—The Danes formed a settlement in this part of the Coromandel coast A.D. 1617. It was purchased by the English Feb. 22, 1845.

TRAVEL.—The patriarch Enoch was translated to heaven for his piety (Gen. v. 24), B.C. 3017; and the prophet Elijah was translated to heaven in a chariot of fire (2 Kings ii. 11), B.C. 985.
Orders in council, dated Dec. 6, 1786, fixed upon the eastern coast of Australia and the adjacent islands. The first band of convicts left England in May, 1787, and in the succeeding year founded the colony of New South Wales. Return from transportation was punishable with death, until 14 & 15 W. IV. (1834) reduced the penalty to transportation for life. The discontinuance of transportation to Australia was announced by Lord John Russell in parliament, as determined upon by government, Feb. 10, 1853. By 16 & 17 Vict. c. 99 (Aug. 20, 1853), penal servitude was substituted for transportation, except for fourteen years or for life. By 20 & 21 Vict. c. 3 (June 26, 1857), persons under sentence of penal servitude may be transported.

Transubstantiation, the supposed change of the substance of the bread and wine in the eucharist into the body and blood of Jesus Christ, was maintained by Paschal, bishop of Rabat, in the 9th century, but was opposed by Rabanus Maurus, Ratramnus or Bertram, and Scutus Ergenes. It was supported by Pope Sylvester II. (999–1005). The doctrine was established under the term transubstantiation at the Lateran council in 1215, and this was confirmed by the council of Trent, Jan. 18, 1562. It was one of the articles of the Roman church rejected at the Reformation.

Transylvania (Austria), the most eastern province of the Austrian empire, known to the Romans under the name of Dacia, was conquered by the Hungarians under Stephen I. a.d. 1004. Having been almost depopulated, it was colonized by German immigrants in 1143. Protestant refugees from all parts of Germany settled here after the Reformation, and these were augmented when the archbishop of Salzburg expelled all his Protestant subjects in 1773. John Zapolya, with the assistance of the Turks, made it an independent principality in 1541, and Leopold I. conquered it in 1697. The Porte was compelled to renounce its supremacy over it by the peace of Carlowitz, Jan. 26, 1699, when it was united to Austria. It was erected into a grand principality by the empress Maria Theresa in 1765.

Trappists.—The first abbey of La Trappe in Normandy was founded by Rotrou, count of Perche, a.d. 1140. Its revenues were greatly increased in 1214, and it continued to grow in wealth and reputation till the 15th century, when it was given to be held in commendam, and from that time its domains were neglected, and the discipline of the monks relaxed. They had acquired the title of the brigands of La Trappe in the middle of the 17th century. The abbey was bestowed in 1636 on Bouthierier de la Ranéé, who, after leading a most luxurious life, subtly in 1662, renounced the world, gave up his rich benefices, and retired to La Trappe. He established a new rule, which bound the community to strict silence, hard labour, and total abstinence from wine, eggs, fish, and all seasoning to their simple diet of bread and vegetables. Ranée died Oct. 27, 1700, and the abbey continued to flourish till the Revolution, when it was suppressed. Some of the Trappists sought refuge in Switzerland, but returned to their dilapidated monastery on the restoration of the Bourbons in 1815. A new church and monastery were built and consecrated with great pomp, Aug. 30, 1833.

Travancore (Hindostan).—The East India Company established a factory at Anjengo, on the sea-coast of Travancore, a.d. 1673. Travancore was included as an ally of the English in the treaty with the sultan of Mysore in 1754, and was invaded and devastated in 1790 by Tipoo Sultan, who was compelled by the English to restore all that he had taken from the rajah. Treaties of alliance between the English and the rajah were made in 1755 and 1806. In consequence of some disputes between the English subduing the province in 1809, and at the request of the rajah left a resident to manage it. An unsuccessful attempt to destroy English authority was made in 1812, and their subsidiary force was withdrawn in 1832.

Travelling was generally performed, in England, on horseback, till the reign of Mary, when a kind of waggon was introduced. Elizabeth frequently travelled on state occasions seated on a pillow behind the chamberellor. A vehicle, described as the "Flying Coach," commenced running from Oxford to London, in one day, in 1669, and this was considered a most extraordinary performance. Flying coaches ran three times a week from London to the chief towns at the close of the reign of Charles II. (1685). They journeyed about fifty miles a day in summer, and thirty in winter. The passengers were seated inside the coach, it being too perilous, from the frequent accidents, to ride on the roof. The ordinary fares were 24d. the mile in summer, and more in winter. The coach between Edinburgh and London occupied from twelve to fourteen days on the journey in 1763. The greater part of the carrying trade of the country was performed by packhorses until the middle of the 18th century. Travelling was completely revolutionized by the introduction of railways in 1830.

Treadmill, invented by Sir William Cubitt, was introduced into our prisons a.d. 1817.

Treason.—This crime was first defined a.d. 1350, by the act known as the Statute of Treasons (25 Edw. III. st. 5, c. 2). Two kinds of treason were designated in it—viz. petit treason and high treason. The former was the murder of a husband by his wife, or a master by his servant, or a bishop by his subordinate in the church; and the latter consisted in an attack upon the sovereignty or person of the state. Petit treason was abolished by 9 Geo. IV. c. 31, s. 2 (June 27, 1828). (See High Treason.)

Treasurer of the Chamber, an officer...
of the king's household, first appointed a.d. 1541. The office was abolished in 1782. (See Lord High Treasurer.)

TREATIES. — The celebrated commercial treaty concluded between Rome and Carthage, B.C. 508, is the earliest example of a formal international treaty extant. The first treaty concluded by England was signed with the dauphin, Louis of France, at Kingston-on-Thames, Sept. 11, 1217. The first commercial treaty was concluded between Edward I. and Guy, earl of Flanders, in 1274. The most important treaties are mentioned under their title, or under the name of the places where they were concluded. A list is given in the Index, under "Treaties."

TREBIA, or TREBIA (Italy).—Near this river Hannibal gained his first decisive victory over the Romans, B.C. 218; and the French, under Macdonald, fought a desperate battle with the Austrians and Russians, under Suwarow, June 17, 18, and 19, 1799. Though the first day's conflict was indecisive, the allies were ultimately victorious.

TREVIZON (Asia Minor), anciently called Trapezus, existed in the time of Xenophon, who halted here for thirty days during the memorable retreat of the 10,000 Greeks, B.C. 400. It was taken by the Romans during the Mithridatic war (B.C. 88 to 63), and was a large and flourishing town in the reign of Valerian (a.d. 253 to 260). Having been partially destroyed by the Goths, it recovered in the reign of Justinian I., who restored the public buildings. Alexius Comnenus made it the capital of an independent principality in 1204; and it remained in the hands of his descendants till it was taken by the Turks in 1460.

TRECENTO, a flourishing period of Italian art and literature, which dates from the birth of Dante, A.D. 1265, to the death of Boccaccio, in 1375. These two authors, with Petrarch, are termed "the Triumvirate of the Trecento."

TRENT (Austria), in the Tyrol, anciently called Tridentum, was a Roman colony, and became an important city in the Middle Ages, when the bishops were independent princes, and it was united to the Tyrol in 1363. The cathedral was built in 1212, and the church of St. Maria Maggiore occupies the site of the council-chamber, where the celebrated council of Trent sat (Dec. 13, 1545 to 1563), and has a painting, with portraits of all the members. Trent was taken by the French, under Napoleon Bonaparte, Sept. 5, 1796, and again under Macdonald, in January, 1801. It was evacuated by them in April, 1809, and they were repulsed in an attempt upon it June 9, 1809. The Bavarians took Trent Oct. 17, 1809, and it was retaken by the Austrians Oct. 31, 1813.

TRETSCHIN (Battle).—The Hungarians were defeated at this place, the capital of a country of the same name in Hungary, by the Austrians, A.D. 1708.

TREVES, or TREVES (Prussia), the capital of a government of the same name, is con-

sidered the oldest city in Germany. An inscription on the Red-house, formerly the town-hall, states that it was built 1,300 years before Rome (n.c. 2053). It was a large and important town, and the capital of the Treviri, at the time of Caesar's expedition into Gaul, B.C. 58, and was made a Roman colony by Augustus, and named Augusta. The emperor Gallienus held his court here a.d. 255. It was stormed and pillaged by the Alamanii in 355, by the Franks in 420, and by Attila in 451. It recovered its ancient splendour under the archbishop of Treves. The English, under the duke of Marlborough, took it in 1704, and it was seized Aug. 9, 1794, by the French to whom it was ceded by the peace of Lunvile, Feb. 9, 1801. It was occupied by the allies in 1814, and was ceded to Prussia by the congress of Vienna, June 9, 1815. The church of St. Simeon, the most important Roman monument in Germany, was probably built between 314 and 322, and was consecrated and dedicated to St. Simeon in the 11th century. It was restored by the Prussians, and opened July 23, 1817. The university, founded in 1454, greatly enlarged in 1722, was suppressed in 1794, and converted by the French into a central school. The church of Our Lady was built between 1227 and 1246, and the same electoral palace stands on the site of an immense Roman edifice, of which some fragments still remain, said to have been the residence of Constantine the Great. The exhibition of the "Holy Cross" in the cathedral attracted 1,000,000 pilgrims here in 1844, and caused serious religious disputes, two of the leaders in which were formally excommunicated in 1845. Councils were held here in 385 ; 927; Sept. 6, 948; Oct. 20, 1037; March 1, 1227; in 1235; April 28, 1310; in 1337; and April 26, 1423.

TREVISO (Italy), anciently called Tarvisium, an important town under the Goths and Longobards, was the native place of Totila, the last king of the Goths, who was killed a.d. 552. When the neighbouring town of Spitergium was destroyed by Toraris, king of the Longobards, in 641, the inhabitants took refuge here. It was the capital of a border province which extended from the Alps to the Adige, under Charlemagne and his successors. It became an independent municipal community in the 11th century, and voluntarily submitted to the republic of Venice in 1344. The Austrians were defeated here by the French in January, 1797, and the town revolted against Venice in April of the same year. An armistice was concluded here between the French and Austrians, Jan. 10, 1801. It was invested by the Austrians June 10, 1848, and capitulated to them with its garrison of 4,185 men, June 13.

TREIa JUNCTA IN UNO, the motto of the knights of the military order of the Bath, adopted on the institution of the order by Henry IV. in 1386, and continued when the order was revived by George L., May 18, 1725.
TRIUNES OF THE PEOPLE.—Magistrates of Rome chosen from among the commons to represent the people, b.c. 493. C. Lici-
nius and L. Albinus were the first two, and they created three colleagues. The number was raised to ten b.c. 457.

TRICHINOPOLY (Hindostan), the capital of a district of the same name in the pres-
sidency of Madras, was the capital of a Hindu prince until a.d. 1732, when it was acquired by the nabob of Arcot, who relinquished it to the Mahrattas in 1741. It was taken from them by Nizam-ool-Mook in 1743, and was besieged by the French in 1757. It was relieved by the rapid march of an English force, under Captain Callaud, May 26.

TRIENIAL PARLIAMENTS were first established by 16 Charles I. c. 1 (Feb. 16, 1641). The act was passed for the purpose of prevent-
the sovereign from postponing at will, and frequently indefinitely, the assembling of the parliament. A statute of Edward III., pro-
viding that one should be held every year, or oftener if need be, had long fallen into neglect. The chief provisions of the Triennial Act were, that a parliament was to be ipso facto dis-
solved when it had lasted three years, and, if actually sitting at the time, on the first adjournment or prorogation; that writs for a new parliament were to be issued by the chancellor or keeper of the great seal within three years after the dissolution of the last; in case of his failure to perform this duty, the peers were enjoined to meet and issue writs to the sheriffs; in case of non-compliance with the law on the part of the peers, the duty devolved upon the sheriffs themselves; and in case of their failure, the electors, after a certain interval, had the right of choosing their representatives; and that no parliament was to be dissolved or adjourned, save by its own consent, in less than fifty days from the commencement of the session. It was violated by Crom-
well and the Long Parliament, and was repealed by 16 Charles II. c. 1, April 6, 1661. Another act of a similar character, providing that a parliament should be held at least once every three years, and that no parliament should last longer than three years, was as-
serted to with great reluctance by William III., Dec. 22, 1694; and it was repealed, on the passing of the Septennial Act, May 7, 1712.

TRIESTE (Illyria), the principal seaport of the Austrian empire on the Adriatic, ex-
isted in the time of the Romans, and is called by Pliny, Tergeste. It was a place of no importance till it was made a free port, a.d. 1719. Its privileges were greatly ex-
tended by the empress Maria Theresa in the middle of the 18th century. The town was captured by the French, March 22, 1797; again May 22, 1809; and was ceded to Italy by the treaty of Vienna, Oct. 14, 1810. The English and Austrians took it Oct. 31, 1813; and it returned to the dominion of Austria in 1814.

TRIPANUM (Battle).—The Romans de-
feated the Latins at this ancient town of central Italy, b.c. 339.

TRIGONOMETRICAL SURVEY.—The first application of trigonometry to surveying was made by Willebrod Snell, in his survey of Holland, commenced a.d. 1617. The first government survey in Great Britain was commenced in the Highlands of Scotland in 1747. It was stopped by the war of 1755, and the map was never published. The next undertaking was begun at Hounslow Heath in July, 1784. The triangulation was commenced in 1792. A base of verifi-
cation was measured at Salisbury Plain in 1794; at King's Sedgmoor, in Somerset-
shire, in 1798; at Misterton Carr, in North Lincolnshire, in 1801; at Rhuddlan Marsh, near St. Asaph, North Wales, in 1806; and the survey of nearly all England, South Wales, and part of Scotland, was completed by 1809. The survey was stopped by the war from 1811 to 1816. It was recom-
enced in Scotland in 1817; and was transferred to Ireland in 1824, the principal tri-
angular of which was completed in 1838, and then Great Britain was again taken up. England, with the exception of the six northern counties and a small part of Scot-
land, had been surveyed on a scale of two inches, and engraved on a scale of one inch, to the mile; but the survey of the remainder of England, and the whole of Scotland, was ordered to be taken on the Irish scale of six inches to the mile, by a Treasury mi-
ute, Oct. 5, 1840. A royal commission was appointed to inquire into the progress, &c., of the survey, Dec. 24, 1857. By their report the sums expended in the survey up to March 31, 1858, were:—England and Wales, £1,051,678; Scotland, £374,746; and Ireland, £179,166. In the estimated or 1859-
61, £90,000 were required for the survey, and the number of persons employed upon it was 1,627.

TRIMMERS.—A political party, of which Viscount Halifax was the chief, contemptu-
ously called trimmers by the Whigs and Tories, arose in the reign of Charles II.

TRINCOMALEE (Ceylon).—This town came into the possession of the Portuguese in the beginning of the 16th century, and was taken from them in 1609, by the Dutch, who retained it till 1792, when it was cap-
tured by the British. It was retaken by the French admiral Suffren, Aug. 31. Having been restored to the Dutch by the treaty of Versailles, the British retook it, after a siege of three weeks, in 1795; and it was finally ceded to them by the treaty of Amiens, March 25, 1802.

TRINIDAD (Atlantic Ocean), one of the West-India islands, discovered by Co-
lumbus in July, 1498, was first colonized by the Spaniards in 1588. It was captured by the French in 1676, but almost immediately restored; and it was taken by the English, under Abercromby, Feb. 13, 1797, and ceded to them by the treaty of Amiens, March 25, 1802.

TRINITARIANS, OF BRETHREN OF THE
HOLY TRINITY.—This order, principally for the redemption of captives, was founded by John of Matha and Felix of Valois A.D. 1198, and approved the same year by Pope Innocent III. They were also called Mathurini (because their church in Paris had for its tutelar saint St. Mathurinus) and Brethren of the Redemption of Captives.

TRINITY.—This term was first used by Theophilus, bishop of Antioch, to express the three sacred persons in the Godhead, about A.D. 180. The first statement of the doctrine of the Trinity was made in the Nicene creed, adopted in 325, and completed at the second general council held at Constantinople in 381. The doctrine was more minutely set forth in the creed of Athanasius, framed in the 5th century, and so named before 670, which was the one adopted by the Protestants in general at the Reformation. Penalties were imposed on persons denying the doctrine of the Trinity by 9 & 10 Will. III. c. 35 (1698), but these were removed by 53 Geo. III. c. 169 (1812).

TRINITY (Order of).—This religious society was founded at Rome by St. Philip Neri, A.D. 1548. They had charge of the pilgrims who resorted thither from all parts of the world.

TRINITY COLLEGE (Cambridge).—This college was formed of several smaller collegiate establishments, the chief of which were Michael House, dedicated to Michael the Archangel, founded by Hervey de Staunton, chancellor of the Exchequer to Edward II., A.D. 1324; King's Hall, founded by Edward III. in 1337; and Phiswick's Hostle, founded by William Phiswicke, or Fishwick, in 1393. Out of these three institutions, and the other smaller ones, Trinity College was founded by Henry VIII., by charter dated Dec. 19, 1546. He endowed it with lands, &c., of the annual value of £1,300, to maintain a master, sixty fellows, forty scholars, and ten almoners, reserving to the crown the right of choosing the master. Queen Mary commenced the building of the chapel, and added to the endowment lands to the value of £338 per annum. Elizabeth provided for the completion of the works commenced by her sister, by letters-patent dated Dec. 14, 1560.

TRINITY COLLEGE (Oxford) was originally founded by Richard de Hoton, prior of Durham, about A.D. 1290; rebuilt by Bishop Hatfield, of the same see; and dissolved by Henry VIII. about 1541. Sir Thomas Pope purchased the site and buildings from Dr. George Owen and William Martyn, to whom they belonged by grant of Edward VI. in 1553, and founded the present college for a president, twelve fellows, and eight scholars, in 1554. He founded four additional scholarships Sept. 10, 1557. There is also a scholarship nearly coeval with Sir T. Pope's foundation, which was founded by his relative, Richard Blount, of London. An exhibition, called the Tunton Pension, was given by Thomas Unton in 1693; another, called the Tylney Exhibition, was given by Frederick Tylney in 1720; and a third, for the advantage of superannuate scholars of Winchester College, was founded by the Rev. Edward Cobden in 1754. The hall was rebuilt in 1618. The library; though altered at various times, is in substance the most ancient part of the college, having been built in 1370. The chapel was founded July 9, 1691. The court was erected from the designs of Sir C. Wren, the north side being completed in 1667, the west side in 1682, and the south side in 1728.

TRINITY HALL (Cambridge) was founded for the study of the canon and the civil law by William Bateman, bishop of Norwich, A.D. 1350, for a master, three fellows, and three scholars. The foundation was augmented by Simon Dalling in 1443, by Dr. Hewke in 1517, Dr. Harvey in 1584, Dr. Mouse in 1586, and by other benefactors. The college was further incorporated in the reign of Elizabeth, and was governed by the statutes of the founder till 1699, when new statutes were enacted. The old hall, one of the most ancient in the university, was demolished in 1742.

TRINITY HOUSE (London).—This society was founded by Sir Thomas Spert, comptroller of the navy to Henry VIII., A.D. 1515, and incorporated by that king in the same year, for the promotion of commerce and navigation, by licensing and regulating pilots, and ordering and erecting beacons, light-houses, buoys, &c. The corporation was confirmed in the enjoyment of its privileges and possessions by letters patent of James II. (1653). At first it seems to have consisted of seamen only, but now noblemen and gentlemen are amongst its members or elder brethren. It is governed by a master, four wardens, eight assistants, and thirty-one elder brothers. By 52 Geo. III. c. 39 (April 20, 1812), the jurisdiction of the Trinity House was extended to light-houses round the coast of Ireland. The ancient hall of the corporation at Deptford was pulled down in 1787, and the present edifice, near the Tower, was commenced Sept. 12, 1793, and finished two years afterwards.

TRINITY SUNDAY is the Sunday next following the festival of Whitsunide. The festival of the Holy Trinity was first ordained to be held on this day by Pope John XXII. A.D. 1334.

TRINOBANTES, a British tribe which inhabited the counties of Essex and Middlesex at the time of Caesar's invasion of Britain, B.C. 55. Their prince, Cassivelaunus, unsuccessfully opposed Caesar's passage of the river Stour, B.C. 54; and, in chief town, the daywards taken, the tribe submitted to the Romans. They joined the Iceni under Boadicea in revolt, and destroyed the Roman colonies in their own country, but were defeated by Suetonius Paulinus, near Sunbury, on the Thames, A.D. 61.

TRIPLE ALLIANCE between the States-General and England, against France, for the protection of the Spanish Netherlands, was
ratified Jan. 28, 1668. Sweden joined the league April 25, and it then became known as the Triple Alliance. Another triple alliance between England, France, and Holland, to oppose the designs of Cardinal Alberoni, the Spanish minister, was signed by the English and French Nov. 28, 1716, and by the Dutch Jan. 4, 1717.

TIRPOLI (Africa), the most easterly of the Barbary states, became a Roman province after the destruction of Carthage, B.C. 146; and the three cities of Gaeta, Leptis, and Sabrata, constituted a kind of federal union, under the name of Tripoli. The present capital, Tripoli, is identical with the ancient city of Gaeta. It suffered greatly from the tyranny of Count Romanus A.D. 366; was conquered by the Vandals in the 5th century, and rescued by Belisarius in 534. Tripoli was taken by the Saracens in 638; besieged by the Egyptians in 877 and 1054; seized by Roger, king of Sicily, in 1146; and retaken in 1184 by the Saracens, who retained it till it was conquered by the Spaniards in 1510. It was ceded by Charles V. to the knights of St. John of Jerusalem in 1530; and was conquered by Simon, basha for the sultan Soliman II., in 1561, and became a Turkish pashalic. Dragut, the famous corsair, was appointed governor; and from this time it became one of those piratical powers which for centuries attacked the ships of Christian nations, and made slaves of their prisoners. The first treaty between Tripoli and England was concluded Oct. 19, 1662. Tripoli was bombarded by a French fleet in 1693. Hamet Caramandi, a Moorish chief, treacherously caused 300 Turkish officers to be strangled, in 1703, and thus threw off the Turkish yoke. Yusuf, the last basha of this family, was compelled by his subjects to abdicate in 1832; and a civil war ensued, which was put an end to by a Turkish force in 1836, and Tripoli was restored to the nominal sovereignty of the Turks. Piracy and slavery were abolished in 1816. Near the sea-gate of the town stands a magnificent triumphal arch erected to the emperors M. Aurelius Antoninus and L. Aurelius Verus, A.D. 164.

TRIPOLI, or TARABULUS (Asia Minor).—This seaport of Syria, the capital of the pashalic of the same name, was taken A.D. 1108 by the Crusaders, who destroyed the rare and valuable library of Persian and Arabic works, said to amount to 100,000 volumes. The Egyptians, under Ibrahim Pasha, defeated the Turks here April 7, 1832, and the government was granted to Mehemet Ali May 6, 1833. It was captured by the English in September, 1840.

TRIPOLITZIA (Greece) is said to derive its name from the three towns of Tegea, Mantinea, and Mukli, and was probably built soon after the capture of the last-named city by the Turks, A.D. 1458. Before the Revolution, Tripolitza was the capital of the Morea and the seat of a pasha. It was stormed by the Greeks Oct. 5, 1821, and nine thousand of the inhabitants of all ages and sexes were massacred on that and the following day. Ibrahim Pasha retook it in 1825, and razed it to the ground, in retaliation for the cruelties perpetrated by the Greeks. It has since been rebuilt.

TRIREMES, ancient Greek and Roman vessels of war invented by Ameinocles the Corinthian, B.C. 700. They were first built by the Athenians at the instance of Themistocles B.C. 481, and by the Romans B.C. 260.

TRIUMPHS.—The triumph was a public and solemn honour conferred by the ancient Romans on a victorious general, by allowing him a magnificent entry into the city, and it dates from the reign of Rhaesus. The triumph of the consuls Valerius and Horatius, B.C. 449, refused by the senate but granted by a vote of the people, was the first instance of a triumph without the authority of the senate. The triumph of Caecilius, for the taking of Veii after a siege of ten years, was celebrated with great pomp B.C. 395. There were two kinds of triumphs: the great, called the triumph; and the lesser, called the ovation (q.v.).

TRIUMVIRATES, so called from the number of men, three, constituting a board for the management of some public business among the Romans, one of which, the triumviri capites, for inquiring into capital offences, was instituted about B.C. 292. Caesar, Pompey, and Crassus, formed a triumvirate B.C. 60. Another was established at Metina by Octavianus, Antonius, and Lepidus, and afterwards sanctioned by a senatus consultum, B.C. 43. At the expiration of five years it was prolonged for five years more, B.C. 38. Augustus deprived Lepidus of his power B.C. 35. It legally expired on the last day of the year B.C. 33. One was appointed at Rome, consisting of Mazzini, Armellini, and Saffi, with the entire executive power placed in their hands, Feb. 27, 1848.

TROJA (Battle).—John, duke of Anjou, was defeated in an engagement near this town in Italy, by Ferdinand, king of Naples, Aug. 18, 1462.

TRON, or TROND, St. (Battles).—The Austrians were defeated at this town in Belgium, by the French, A.D. 1793. A division of General Maison's force was also defeated here, after an obstinate engagement, by the Russians under Bennendorf and Chernicheff, in 1814.

TRONDHEIM. (See Deontheim.)

TROPPAU (Austria).—A congress to consider the revolutionary excitement in Europe—the emperors of Austria and Russia, and the king of Prussia, being present, together with representatives from France and England—was opened here Oct. 20, and transferred to Laybach, in Styria, Nov. 20, 1820.

TROUBADOURS, the poets of the Romance language, or Langue d'Oc, are represented in the earliest extant specimens of that literature by the songs of William, duke of Guellen, written about A.D. 1096. "We do not," says Hallam, "meet with any

</table>
| other troubadour till after the middle of the 12th century." From that time they became numerous. Having turned their powers of satire against the hierarchy during the persecutions of the Albigensians, many of them perished, or were compelled to make their escape, and the art fell into decay about the end of the 13th century. The magistrates of Toulouse established an academy called Del Gai Saber,—of the gay science, with the object of reviving it, and held the first meeting of an annual festival, "Floral Games," which was attended by many poets from various parts of Languedoc, May 1, 1324. **Trouvères.**—The writers of romance and poetry in the French provinces north of the Loire began the production of those short tales known as the "Fabliaux" in the latter half of the 12th century. They continued to make their appearance down to the 14th century. The period most prolific in this literature was, however, from A.D. 1256 to 1270. **Troy.** (See Ilíum, or Ilión.) **Troyes (France).** The town of Augustobona was from Atila through the address of its bishop, St. Loup, A.D. 441. The Normans plundered and burned it in 869. It was taken by the duke of Burgundy in 1415. The marriage of Henry V. of England with Catherine of France, and the treaty securing the succession of Henry to the crown of Charles VI., were arranged here May 21, 1420. It was surrendered by the English to Joan of Arc in 1429. By a royal edict the French parliament was banished here Aug. 15, 1787, and recalled Sept. 20. Napoleon I. fell back upon Troyes after his defeat by the allies, Feb. 2, 1814, but withdrew on the 6th, and the allies entering on the 7th, established their head-quarters. Napoleon I. again obtruded the possession of the town Feb. 23, and it was occupied by the allies March 4. Councils were held here in 429; April 3, 1104; in 1107; and Jan. 13, 1125. **Troy Weight, so called from Troyes, in France, whence it was introduced into England, is mentioned as a known standard in 1414. The pond did not take the name till 1495. It was established in Scotland in 1618.**

**Truce, or Peace of God.**—This celebrated instrument for the suspension of hostilities between the feudal lords of the Middle Ages remounts as far back as A.D. 988. It provided that no conflicts should occur between Wednesday evening and Monday morning, or from Advent to Epiphany, or Quinquagesima Sunday to Easter. This truce received great authority from a vision stated to have been seen by a bishop of Aquitaine in 1032, when an angel was said to have appeared and delivered a writing enjoining men to cease from their hostilities, and become reconciled. It was confirmed by the council of Tuluje June 1, 1047, and by the tenth general council in 1189; but in consequence of its inefficiency, an association for carrying it into effect was formed about the end of the 12th century, under the title of the Brotherhood of God. Louis IX. of France published an ordinance in 1245, prohibiting any one from commencing a quarrel until forty days after the commission of the offence he wished to retaliate. This law, which was known as the Royal Truce, was confirmed by Philip IV., or the Fair, in 1296. **Trumpets.**—The invention is variously ascribed to the Tyrrhenians and to the Egyptians, but they were not used at the siege of Troy, B.C. 1184, although spoken of by Homer B.C. 922. Those used by the Israelites at the siege of Jericho, B.C. 1451, were made of rams' horns (Joshua vi. 20). The speaking-trumpet appears to have been known to the ancient Greeks, and was in use among the Peruvians A.D. 1595. Matthew Paris says that trumpeters preceded King Offa of Mercia in all his progresses (797—798).**

**Tuam (Bishopric).**—This Irish diocese was founded by St. Jarlaffa, at Cluain-fois, near Tuam, about A.D. 501. In 1150 it was made archiepiscopal, under Edan O'Hoeisin; and in 1559 it was enlarged by the addition of Mayo. The see of Enachdune was annexed to Tuam in 1573, and Killenora formed part of the archiepiscopal from 1661 to 1742. Ardagh was incorporated with Tuam in 1742, but was separated in 1839, when Tuam ceased to be a metropolitan diocese. By the Church Temporalities Act, 3 & 4 Will. IV. c. 37 (Aug. 14, 1838), the sees of Killala and Achonry were ordered to be annexed to Tuam on their next vacancy, which occurred in 1834. **Tübingen (Germany).**—The university was founded A.D. 1477. From the Reformation till 1803, Roman Catholics were excluded. The town-hall was built in 1435; and the church of St. George, with monuments of the princes of the house of Württemberg, was erected in the 15th century. In order to conciliate the aristocracy, Ulric, duke of Württemberg, agreed to a treaty here in July, 1803, which may be called the first German constitution, and continued to be the fundamental law of the duchy till 1819.**

**Tubular Bridges.**—The first tube of the Britannia bridge, across the Menai Straits, was floated and raised June 20, 1849. It was completed at a cost of £821,865, and opened March 6, 1850. The tubular bridge at Conway, also on the line of the Chester and Holyhead railway, constructed at a cost of £110,000, was finished in 1848. One at Chesterport, across the Wye, was opened in 1852. Two upon the line of the Egyptian railway,—one crossing the Nile, near Benha, the other the Karrimeen canal,—were commenced in May, 1853, and completed in October, 1855.**

**Tudela (Battle).**—The French, under Marshal Lannes, defeated the Spanish forces of Castanos and Palafox, near this town of Spain, Nov. 23, 1808. The loss of the Spaniards amounted to 5,000 men killed and wounded, and but for the delay of Marshal Ney in quitting Soria, their entire army would have been cut off. This battle is sometimes referred to as the battle of the 853
Tuesday.—The third day of the week was dedicated by the Saxons to their god Tuiscus, respecting whose attributes little is known with precision. The Romans held it sacred to Mars, and called it Dies Martis. (See SERVOS TUESDAY.)

Tulleries (Paris) takes its name from the tile-fields on which it stands, was founded as a royal residence by Catherine de Medici, A.D. 1564, and completed by Louis XIII. It was captured and sacked by the Paris mob, Aug. 10, 1792, and again in 1830. The insurrectionists sacked it, and threw the furniture from the windows, Feb. 25, 1848.

Tula (Russia), capital of a government of that name, the seat of the imperial manufactury of arms, established by Peter the Great A.D. 1712. A fire, which reduced a large portion of the inhabitants to beggary, occurred in 1834.

Tulip, which grows wild in the Levant, was brought in seed from Constantinople, or Cappadocia, to Augsburg, A.D. 1559. It had spread all over Germany by 1564 or 1565. It was first planted and grown in Europe on the ground of Peyres, in 1611. From Vienna it was introduced into England about the end of the 16th century. The tulip-tree was brought from North America to Europe about 1683.

Tunbridge, or Tunbridge Wells (Kent), was first brought into notice by Dudley, Lord North, who received much benefit from drinking the waters in the reign of James I.

Tungsten, from the Swedish tung sten, heavy stone, was first obtained in a pure metallic state by M. d'Elhuier, A.D. 1781.

Tunis (Africa), known at different periods as Tunes and Tuneta, capital of the regency of that name, founded either by the Phoenicians or Romans. Afars were taken by the Roman consul Regulus B.C. 256, and before it the mutinous Carthaginian army encamped when it left Sicca, B.C. 241. The Vandals, who acquired it A.D. 439, were dispossessed by Belisarius in 533. It was taken from the Greek emperors by the Moslems about the end of the 7th century, and after having been governed by viceroys, was made the capital of an independent state by Abu-Ferez in 1206. An expedition to put down the pirates that infested it was undertaken by Louis IX. of France in 1270. The noted pirate Barbarossa, whose the Turkish sultan had acknowledged chief of the country, deprived the ruler of his throne in 1531. He was, however, restored, on condition of being a tributary prince, by Charles V. in 1535. A large expedition, fitted out at Constantinople, reduced it in 1574. Admiral Blake destroyed two of the castles with artillery in 1655, and extorted a promise that English vessels should be exempt from attack; and with a similar object it was besieged by a French fleet in 1685. A boy was instituted in 1574, and he was replaced by a boy towards the end of the 17th century. The European powers enforced from Tunis the abolition, for ever, of Christian slavery, in 1816.

Tunnage and Poundage.—Tunnage was a duty of so much per ton on all wines imported; and poundage was a duty imposed ad valorem, at the rate of twelve pence in the pound on all merchandise. The origin of this tax, the first of our customs duties, raised, according to the old statutes, "for the defence of the realm and the safeguard of the seas," is unknown. It was imposed with the consent of the Lords, but against that of the Commons, by Edward III., A.D. 1348, and was granted for a term of two years to Richard II., in 1381. It was first granted by statute 12 Edw. IV. c. 3 (1473). Originally granted for a few years, it was given to Henry VI. in 1453 for the term of his life. It formed a constant subject of dissension between Charles I. and his parliaments, and was granted to his son Charles II. for life, June 24, 1660. The impost was made perpetual by 9 Anne, c. 6 (1711); 1 Geo. I. c. 12 (1715); and 3 Geo. I. c. 7 (1717).

Tunstall.—Two tunnels, constructed as outlets for the drainage of Lake Copais in Greece, by the tyrants of Orchomenus before historic times, were cleared of obstructions about B.C. 330. The tunnel at Samos, by Eupalinus of Megara, nearly a mile in length, eight feet in height and breadth, with an aqueduct in the middle thirty feet deep, was cut through a mountain 900 feet high, about B.C. 540. The Posilipo, near Naples, three quarters of a mile in length, was executed about A.D. 14. A tunnel three miles long, thirty feet in height, and twenty-eight feet wide, connecting Lake Fucinis with the river Siris, formed by the emperor Claudius, has been lately cleared out by the Neapolitan government. The Harecastle tunnel, on the Trent, was commenced by Pugin, was completed by a Dutchman, and is 1,439 yards in length, twelve feet wide, and nine high, was commenced by Brindley in 1796. It proved too small for the traffic, and a new one, running parallel with the old, was constructed by Telford in 1822.

Turcopole, of the order of the knights of St. John of Jerusalem, and third dignity in the convent, taking its name from the Turcopoles, a light horse used by the Christians in Palestine, is mentioned in a diploma of the Hospitalers, A.D. 1100. One was established in the convent at Rhodes, Giovanni de Dudralik being the first known English knight who held the dignity. The last Turcopole of England was Sir Richard Shelley, who died probably at Venice about 1582.

Turin (Italy), the ancient Augusta Taurinorum, was burned by the soldiers of Vitellius during the civil war, A.D. 69. On a plain near this city Constantine I. defeated Maxentius in 312. By an edict of Lothaire I., schools were ordered to be established here in 829. Philip of Savoy fixed his residence at Turin in 1280. Charles VIII., of France arrived here, after breaking through the allied forces, in 1498. It was captured by Francis I., who had, without a shadow of cause, declared
war against the duke of Savoy in 1536. Prince Thomas, in asserting his claim to the regency, made himself master of the town in 1639; but the French, under Count d'Harcourt, compelled him, after a short siege, to capitulate in 1640. The duke de la Feuillade invested it with 100 battalions and 140 pieces of cannon in the month of May. Prince Eugene came to its relief, and an engagement took place, in which the French were defeated, with a loss of 5,000 killed and 7,000 prisoners, Sept. 7, 1706. The allies took it from the French by surprise in 1709. It was again given up to them June 24, 1800. It was surrendered by the French May 30, 1814. An insurrection took place, and the Spanish constitution was proclaimed, March 12, 1821; the royal authority was, however, restored April 12. La Gran Madre de Dios, an imitation of the Pantheon at Rome, was erected to commemorate the restoration of the royal family in 1814. The university, with a library of above 100,000 volumes, was founded in 1412; the Royal academy of Sciences in 1783; and the Waldensian church Dec. 15, 1853.

TURKESTAN, or INDEPENDENT TARTARY (Asia), "the country of the Turks," was traversed by Alexander the Great, B.C. 331. The Grecian dynasty of Bactria obtained supreme power over the greater portion about B.C. 323. They were subverted B.C. 120 by the Scythians, who were in turn subdued by the Parthians about A.D. 1. It was visited by ambassadors from Justinian I. in 559, and subdued by Timour in 1388.

TURKEY, AND TURCS.—Dr. William Smith, who states that almost all the nomad Asiatic tribes that devastated Europe from the 4th to the 12th century, belonged to this race, gives, in a note to Gibbon, the following as the principal divisions of the Turks: 1. The Chorasan, on the west of the Mongol frontier, the most anciently civilized tribe of the Turkish race. 2. Turks of the Sandy Desert, conterminous with Mongolia and Tibet. 3. Turks of Khotan, Kashgar, and Yarkend, conterminous with Tibet. 4. The Kirghis, in Independent Tartary. 5. The Uzbeks, the Turks of Bokhara. 6. The Turkomans, inhabiting the Persian frontier of Independent Tartary, from Balk to the Caspian. 7. The Osmanli, or Ottoman Turks, the Turks of the Turkish empire. 8. The Nogays, dwelling north of the Caucasus, between the lower Don and the lower Volga. 9. The Turks of the Russian empire. 10. The isolated Yakuts of the Lena. The history of the country, which derives its name from the people, is given under OTTOMAN EMPIRE.

Turkeys were introduced into England from America about A.D. 1524, and served up at a great banquet in 1555. When Charles IX. passed through Amiens, the authorities of the town made him a present of a dozen in 1596, and the first served up in France was at the wedding dinner of that monarch in 1570. They were introduced into Germany about 1590.

Turnhout (Battle).—Prince Maurice of Nassau, assisted by English auxiliaries under Sir Francis Vere, gained a decided victory over the Spaniards at this place in Brabant A.D. 1597.

Turning.—This art is very ancient, as the lathe was in use as early as B.C. 600, and probably much earlier. (See LATHE.) Sir Mark Sambard Brunsch's block machine for turning ships' blocks was completed in 1306, and occasioned a saving of £24,000 the first year it was brought into operation.

Turnpikes.—The turnpike system was established in England by 15 Charles II. c. 1 (1663), which ordered places for the collection of toll to be established on the roads of Hertfordshire, Cambridge, and Huntingdon. It was afterwards extended to the whole kingdom by 7 Geo. III. c. 40 (1767). Twenty-seven turnpikes in London and its neighbourhood were abolished in one day by 7 & 8 Geo. IV. c. 24 (June 14, 1827).

Turfentine-tree—was introduced into England from Barbary before A.D. 1656. TURIN was introduced into England as an article of food between A.D. 1740 and 1750. It had been long in use in the West Indies before that period.

Tuscany (Italy), the ancient Etruria (q.v.), was called by the later Latin writers Tuscia, and its inhabitants Tusci, which were gradually corrupted into Tuscana, or Tuscany, and Tuscanas. During the Middle Ages its most important cities, such as Florence, Lucca, Pisa, Pistoja, and Siena (q.v.), became independent republics; but the majority were absorbed in the republic of Florence, which was made the capital of the grand duchy of Tuscany by Cosmo de Medici A.D. 1569.

A.D. 408. December. Alaric establishes his winter quarters at Tuscan.
568. Tuscany is annexed to the Lombard kingdom of Alboin.
774. It is incorporated with the empire of Charlemagne.
929. Tuscany is erected into a marquisate under Boniface I.
1115. Matilda, countess of Tuscany, dies and bequeaths her territories to the pope.
1160. Tuscany is ceded by the Guelphs to Frederick I.
1193. Florence (q.v.) becomes an independent republic.
1406. Nov. 8. Pisa is annexed to Tuscany.
1530. Aug. 12. Florence surrenders to Charles V.
1531. Alexander de Medici is made duke of Florence.
1537. Siena (q.v,) is annexed to Tuscany.
1559. Sep. 10. Cosmo de Medici is made grand duke of Tuscany.
1737. The Medici family becomes extinct, and Tuscany is conferred upon Francis of Lorraine.
1796. Tuscany is occupied by the French.
1803. Ferdinand III. is deposed by the French, who erect Tuscany into the kingdom of Etruria (q.v).
1807. It is annexed to the French kingdom of Italy.
Tuscany is bequeathed to the Holy See in 1115, and is split up into numerous small independent republics.

Tuscany is incorporated in the Italian kingdom of Victor Emanuel II, March 22, 1860. 

**TUSCULUM (Italy)** was founded, according to tradition, by Teleagus, about B.C. 1200. Having become a dependency of Alba, it recovered its liberty, and adopted a republican form of government about B.C. 461. It supplied a contingent to the confederated army of the Latin cities, which was defeated by the Romans B.C. 437. It was attacked by the Volsci and Equi B.C. 461, and received assistance from Rome against its assailants, in return for which the Tusculans aided the Romans in recovering the Capitol from the Sabines, B.C. 458. War having been declared against it by the Romans, an army was despatched, which, entering the city, found the people engaged in their ordinary occupations, and received a most friendly welcome (a proceeding that led to a closer alliance between the two powers), B.C. 378. With Roman aid, the Latins, who had besieged it, were defeated, B.C. 374. It suffered severely from the Gauls B.C. 357, and although it took part with the Latins against the Romans, at the close of the war was treated with great indulgence by the victors, B.C. 335. For several centuries its counts held such power in Rome that they could almost insure the elevation of their own nominee to the papal chair. Continued contests between the two cities in the 12th century led to the destruction of Tuscumela, according to Romualdus, in 1163, during the pontificate of Alexander III; or, following the account of Richard de Ste. Germano, by the German emperor in 1191. (See Tusculum.)

**TUSCUMELA (Staffordshire)** was the place of imprisonment selected for Mary Queen of Scots, A.D. 1568, after her removal from
Bolton. She was placed under charge of the earl of Shrewsbury, in the castle.

Twelfth-Day.—The feast of the Epiphany (q.v.) is so termed because it is celebrated twelve days after Christmas. The custom of holding feasts on this day, presided over by a king and queen, who are chosen by lot, is of great antiquity, and is regarded by some as a relic of the classical custom of appointing a rex convivii. Others state that it is derived from a practice among the Roman children of drawing lots with beans, to see who would be king; and as an old manner of deciding the question was for a cake to be made containing a bean and a pea, which, on the division of the cake, indicated the persons selected as king and queen, this supposition receives some confirmation. The festival of Twelfth-day and the appointment of a king and queen is common over nearly all Europe. In 1792 the French National Assembly ordered the name of the day to be changed from "La fête de Rois" to "La fête de Sans-Culottes."

Twelfth Tables.—The laws of the Twelve Tables, characterized by Cicero as containing the substance of all legislative wisdom, were completed by the decemvirs of Rome B.C. 451.

Týana (Asia Minor), also called Thiana and Thoana, said to have been founded by a Thracian king, became a Roman colony under Caracalla, A.D. 211—217. Having been incorporated with the empire of Palmyra, it was taken by Aurelian in 272. It was captured by the Turks in 769.

Tyburn (London).—This locality, at the west end of London, the site of which is said to be occupied by No. 49, Connaught Square, was the old place of execution for felons. It was used for this purpose as early as the reign of Henry IV. The first dying speeches, &c., printed in England were speeches of malefactors executed here in 1624. The bodies of Cromwell, Ireton, and Bradshaw, were exposed at Tyburn Jan. 30, 1661, and the last execution here took place Nov. 7, 1793. Tyburn Road is first mentioned in 1679, and in 1686 it is referred to as Tyburn Lane. It is the modern Oxford Street. (See Executions.)

Tyler's Insurrection. (See Watt Tyler's Insurrection.)

Tyndaris (Sicily), founded by Dionysius, B.C. 395, was one of the first cities that declared for Timoleon, after his landing in the island, B.C. 344. A naval engagement took place off the coast, B.C. 257, between the inhabitants and the Romans, under C. Attilius, without any decided advantage to either side. A Carthaginian garrison, which had been forced upon it, was expelled, and an alliance formed with Rome, B.C. 254. It took a conspicuous part in the war between Sextus Pompeius and Octavius, B.C. 36. Although its site is now deserted, it was a considerable place as late as the 4th century.

Tyndale was annexed to Northumberland by 11 Hen. VII. c. 9 (1497), on ac-

count of the marauding practices of the inhabitants in company with the Scots.

Tyne-mouth (Northumberland) was destroyed in an inroad of the Danes, under Healfedene, A.D. 875. The peninsula was inclosed by a wall and ditch, and the castle was erected under William I. The castle was taken from the royalists by the Scotch forces in 1644.

Tyre (Aera of).—This aera commenced Oct. 19, B.C. 125.

Tyre (Phoenicia), the Tsor of the Israelites, was called by its own populace Sor, or Sur. It is said to have been founded as early as B.C. 2750, and is mentioned in the book of Joshua as one of the boundaries of the tribe of Asher, B.C. 1443 (Josh. xix. 29). Tyre received a large accession of population in consequence of the expulsion of the Sidonians from their own city by the king of Ascalon, B.C. 1210, and some authorities even regard this circumstance as the origin of Tyre. Hiram, king of Tyre, assisted Solomon in the construction of his temple, B.C. 1014 (1 Kings v. 1 to 12), and the city successfully resisted a five years' siege by Shalmaneser, king of Assyria, B.C. 721 to 716. Nebuchadnezzar, king of Babylon, laid siege to Tyre B.C. 585, and maintained the attack for thirteen years, during which the Tyrians are said to have abandoned their old city, and removed to this island opposite, where they founded insular Tyre. The precise period at which this portion of the city was established, whether Insula or not, is a matter of conjecture. Alexander the Great took Tyre after a seven months' siege of extraordinary difficulty, during which he constructed a mole connecting the insular city with the mainland, in July, 332 B.C. Antigonus, of Syria, besieged Tyre B.C. 315, and took it after a siege of fifteen months, and it was treacherously surrendered to Antiochus the Great by Theodotus, lieutenant of Ptolemy Philopater, B.C. 218. Tyre was taken from the Saracens by the Crusaders, after a siege of five months and a half, A.D. 1124, when a third part of the city was bestowed upon the Venetian republic for its assistance in the capture. Salahdin sought in vain to retake it in 1187, and it was at length seized by Chalil, sultan of Cairo, in 1291. The prosperity of Tyre was not finally destroyed until the conquest of Syria by the Turks in 1516. In 1766 the Metalwich, a sect of Shites, settled here, and established a trade in grain and tobacco. Tyre surrendered to the allied fleet in 1841. A bishop of Tyre was ordained by St. Peter. Councils were held here in 335 and 518.

Tyrol (Austria).—This province of Austria was originally peopled by the Raetians, and after many changes, passed into the possession of Count Berthold, of Andechs, A.D. 1150, and was ceded to the house of Habsburg in 1363. In 1602 it was conferred upon the archduke Maximilian, and in 1665 it became an integral part of the Austrian empire. By the peace of Presburg, Dec. 26, 1806, the Tyrol was ceded to Bavaria.
The population being dissatisfied with their change of rulers, an insurrection broke out in April, 1809, headed by the patriotic innkeeper Andrew Hofer. Under his leadership the Tyrolese expelled the Bavarians, and defeated the French in several engagements, especially in the two battles of Berg and Isel, or Innspruck, May 29 and Aug. 12, 1809. The last-mentioned victory resulted in the expulsion of the French from the Tyrol, and the occupation of Innspruck by Hofer, Aug. 15. Austria regained all the advantages gained by the insurgents, by the treaty of Schönbrunn, or Vienna, Oct. 14, 1809, by which Bavaria regained her ascendency. The Tyrolese refused to lay down their arms, from an impression that the treaty was invalid, and the war continued till December, when they were finally subdued. Hofer was made prisoner by the French, Jan. 20, 1810, and was shot at Mantua Feb. 20. The Tyrol was retaken by Austria in 1814, and in 1848 an insurrection of the inhabitants was suppressed by Marshal Radetzky.

**U**

**UBEDA** (Spain) was built by the Moors from the materials of the Roman town Betulia, a.d. 886. It was destroyed in 1212 by Alfonso VIII., who, says the Moorish Chronicler, "did not leave a Moslem alive therein. May the curse of Allah rest upon him!" Having been rebuilt, it was taken by Ferdinand III. in 1235.

**UBIQARIANS**, or **UBQUITARIANS**, so named from their distinguishing doctrine, that the body of Christ is everywhere, were the followers of Brentius, a Lutheran, who first disseminated his views in his "Sententia de Libello Bullingeri," published at Tbingen a.d. 1561. James Andress held the same opinion, and Brentius published other works in which it was maintained.

**UDEVALLA** (Battle).—The Danes defeated the Swedes at this town of Sweden, a.d. 1678.

**UKRAINE** (Russia), denoting, in Polish, a frontier, was in possession of the Goths a.d. 263. After undergoing various changes, it was ceded by Poland to the Cossacks in 1672. Turkey having asserted some claim to the territory, abandoned it in favour of Russia in 1829. Charles XII., on his invasion of Russia, traversed it in order to effect a junction with Mazeppa in 1708. It was crossed by the emperor Alexander I., when he left Warsaw on his southern journey, April 30, 1813. An insurrection which broke out in the Ukraine April 25, 1831, was suppressed May 26.

**ULEARBOG** (Finland) was founded a.d. 1610, and ceded by Sweden to Russia Sept. 17, 1809. The town was destroyed by fire in 1822.

**ULLOA, ST. JUAN D'** (Mexico), the last fortress held by the Spaniards during the war of independence, was taken by the Mexicans Nov. 13, 1825. The fort was

bombed Nov. 27, 1839, by the French admiral Baudin with three line-of-battle ships, one frigate, and two bomb-vessels, and in four hours the white flag was hoisted, the walls having been reduced to ruins.

**ULM** (Württemberg).—An imperial diet was held here to terminate the wars of the German nobles, a.d. 1165. It was surprised during a fog, in June, 1702, and taken by Maximiian Emanuel, elector of Bavaria, who then declared in favour of the house of Bourbon. The Gallo-Bavarian garrison surrendered to General Thomgen in 1704, before the trenches for its siege were opened. Moreau fell back upon Ulm in his retreat, Sept. 27, 1796. It capitulated to Napoleon I., with its Austrian garrison of 28,000 men under General Mack, Oct. 20, 1805. The fortifications were restored by the confederation in 1814. The cathedral, commenced in 1377, was completed in 1494.

**ULSTER** (Ireland), one of the five provinces, was partly conquered in the Anglo-Norman invasion by John de Courcy, who assumed the title of earl of Ulster, a.d. 1177. Edward, brother of Robert Bruce of Scotland, landed in Ulster with an army in 1315.

**ULSTER KING OF ARMS** was appointed for Ireland Feb. 2, 1552.

**ULSTER REBELLION.**—Roger More, a gentleman of Kildare, Sir Phelim O'Neale, Lord Enniskillen, and other native Irish chieftains, formed a conspiracy for the purpose of surprising Dublin castle, and causing a general rising in Ulster, both of which were to be effected Oct. 23, 1641. Though the former miscarried, the rising in Ulster took place on the appointed day. The country was devastated, the towns captured, and many of the new settlers were put to death. The revolt, in the course of which many thousands of lives were sacrificed, was not finally quelled until 1649.

**ULSTER SETTLEMENT.**—James I. formed a scheme for the colonization of Ulster, a.d. 1611. The lands were divided into lots of 1,000, 1,500, and 2,000 acres, and only English settlers were admitted. The order of baronets was established in the same year, to provide a fund for the defence of the new English settlement of Ulster. The first patent to Nicholas Bacon bears date July 22, 1611.

**UMBRELLAS** were used among the ancient Greeks, being considered an evidence of rank; and also by the Romans. Michael Drayton, in one of his poems written a.d. 1630, mentions them as a fashionable article in England. Dr. Jamieson, who purchased one at Paris, is said to have first introduced it into notice in Glasgow in 1780. The first carried in the streets of Bristol was in 1782. Jonas Hanway, the eastern traveller, did much to render the umbrella fashionable, as he carried one in the streets of London about 1750, though it was considered effeminate to do so.

**UMBRIA** (Battle).—In a battle fought in Umbria, the Romans gained an important victory over the Gauls and Samnites; 25,000 of whom were left dead on the field,
and 80,000 made prisoners, b.c. 298. The Romans were inspired in the contest by the example of the younger Decius, who, devoting himself to the immortal gods, plunged into the thickest of the fight.

**UMMAPOORAH, or AMARAPURA (Burmah),** "the city of the immortals," founded A.D. 1783, was destroyed by fire in March, 1810. The court was removed from this city to Ava in 1819, and an earthquake laid it in ruins in 1839. Its celebrated temple, with 250 columns, contains a colossal bronze image of Guadama, said to be the last earthly representative of Buddha.

**UNION.** (See Extrem Unction.)

**UNDEAKTAKERS.**—Certain members of parliament who professed to understand the temper of the House of Commons, and to facilitate the king's dealings with it, received this name in the reign of James I., about 1610. In opening parliament, James I. refers to them as "a strange kind of beast called undertakers." Sir Henry Neville was their leader.

**UNICORN.**—Ctesias, the Greek historian, describes it as a native of India, b.c. 398. Aristotle speaks of it under the appellation of the Indian ass, b.c. 334. Since then the myth has been repeated, and embellished by writers innumerable. When James I. came to the throne of England in 1603, he adopted the figure of a unicorn to support with the lion the royal arms, the supporters of the Scottish arms being two unicorns.

**UNIFORMITY.** (See Act of Uniformity.)

**UNIFORMS.**—Harold II. clothed his soldiers in leather, a.d. 1066. Louis XIV. of France gave a uniform to his troops about 1662. In the English navy, uniforms are said to have originated with Admiral Mostyn before 1757.

**UNIGENITUS.**—The bull condemning the doctrines of the Jansenists, so called because it commences with this word, was issued by Pope Clement XI., at the instance of Louis XIV., in September, 1713. Beaumont, archbishop of Paris in 1732, ordained that no dying person should receive the eucharist unless it could be shown that he adhered to this principle of this bull.

**UNION.**—Commissioners were appointed (1 James I. c. 2) to treat with Scotland for the union of the two countries, a.d. 1603. Queen Anne, in her first speech to parliament recommended it, March 11, 1702. The queen was empowered to appoint commissioners to effect the object by 1 Anne, c. 8. They came to terms July 22, 1706, and twenty-five articles were drawn up and agreed to. The Scottish parliament passed the act Jan. 16, 1707, and in the English parliament a bill (6 Anne, c. 11), embodying the treaty, was passed, and received the royal assent March 6, 1707. It took effect May 1. The united kingdoms were named Great Britain.

**UNION (Repeal of the).** (See Repeal of the Union.)

**UNION Jack,** a national flag for Great Britain, composed of the cross of St. George and the saltire of St. Andrew, was announced by royal proclamation, April 12, 1606. Having fallen into disuse, it was revived by another proclamation, July 23, 1707. The saltire of St. Patrick was added Jan. 1, 1801.

**UNION of CALMAR.** (See Calmar.)

**UNION of GREAT BRITAIN and IRELAND** was alluded to by George III. in his speech at the opening of parliament Jan. 22, 1800. A bill (39 & 40 Geo. III. c. 47), embodying articles of union, was introduced by Pitt, and received the royal assent July 2, 1800. The statute (40 Geo. III. c. 39) passed the Irish parliament June 13, 1800, and the union took effect from Jan. 1, 1801.

**UNITARIANS,** received the name of Socians from Laelius Socinus, who founded a sect in Italy, a.d. 1546. They were established as distinct bodies at Plunket, Racow, and in several parts of Transylvania, in 1565. They condemned their own bishop, Davidis, as a heretic, and cast him into prison, a.d. 1578. Faustus Socinus settled their disputes, and introduced uniformity of worship amongst those in Poland in 1592. An edict, compelling them to quit Poland within three years, was issued in 1638. Theophilus Lindsey left the Church of England and advocated their tenets in 1774. In the presbyterian churches their doctrines spread considerably about 1793. Numerous societies were formed in England and America for the propagation of their doctrines in 1806. An act was passed for their relief in 1813.

**UNITED BRETHREN.**—This religious body, maintaining the principle of non-resistance against persecution, sprung from a schism amongst the Bohemian followers of John Huss many years after his death, July 6, 1415. Fleeing from the intolerance of the popish clergy, a number of them found refuge in Saxony, where they received a grant of waste land from Count Zinzendorf, and built the village of Herrnhut, "the watch of the Lord," in 1722. The count entered the clerical profession, and was ordained bishop of the church at Lissa in 1737. Some of its members came to England in 1738; and Archbishop Potter, interesting himself in their behalf, obtained the passing of two acts (20 Geo. II. c. 44 [1747], and 22 Geo. II. c. 30 [1748]) to relieve them from certain oaths, and to exempt them from certain political disabilities. After these measures they were acknowledged to be "an ancient Protestant episcopal church, which had been countenanced and relieved by the kings of England, his Majesty's predecessors." They are also called Moravians.

**UNITED IRISHMEN,** who had a project for establishing an independent republic, were formed into a society by a barrister named Theobald Wolfe Tone, a.d. 1791. An invasion of Ireland by the French was arranged under their auspices in December, 1796. An elaborate report of their proceedings was prepared by a secret committee of the House of Commons, and printed March 15, 1799.
United Provinces.—The deputies of Guelderland, Zutphen, Holland, Zeeland, Utrecht, and the Frisian provinces, assembled at Utrecht Jan. 23, 1579, and signed the celebrated treaty or union of Utrecht, which forms the basis of the Dutch republic. Count Renneberg, statholder of Friesland, Overysssel, Groningen, &c., assented to the union June 11, 1579. Owing to his treasonable practices, the final incorporation of Groningen was delayed two years. Besides these provinces, some cities were admitted, of which the chief were Ghent, Feb. 4, 1579; Antwerp, July 25, 1579; and Bruges, Feb. 6, 1580. (See Holland.)

United States (North America).—Thirteen states, forming part of the colonial empire of England, effected a separation, under the name of the United States, A.D. 1776.

A.D.

1776. March 15. The Stamp Act is repealed.

1776. June 18. General Washington obtains an act (7 Geo. III. c. 46) for taxing tea, glass, paper, &c., in the American colonies.

1776. March 5. A fatal affray takes place between the English soldiery and the people of Boston.

1776. May 16. A force of about 1,500 North Carolinians rebels are defeated by Governor Tryon in a battle at Alamance.

1776. Dec. 18. The inhabitants of Boston throw 342 chests of the taxed tea into the sea.

860

1815. Dec. 24. Napoleon (q.v.) is admitted into the Union.

1817. Mississippi (q.v.) is admitted into the Union.

1818. Illinois (q.v.) is admitted into the Union.

1819. March 1. The general embargo is repealed.

1820. March 23. Congress passes the nullification act of 1820, or 23d Cong., 4th sess., 3d Sect. This act is vetoed by President Monroe. April 5. Congress repeals the nullification act.

1822. March 19. The United States government acknowledges the independence of the South American governments.

1824. Aug. 2. General La Fayette visits the United States.

1825. May 28. A treaty of friendship and commerce is concluded with Colombia. Sept. 7. The United StatesAcquired

1828. A treaty is concluded with Brazil. Sept. 22. The United States recognizes the independence of the United States.

1830. May 7. A treaty is concluded with Turkey. The ports are again opened to English commerce.

1831. July 4. Death of the ex-president James Monroe. (See Monroe Doctrine.)

1835. Sept. Anti negro-emancipation riots are frequent.

1836. Apr. 8. Arkansas and Michigan (q.v.) are admitted into the Union. The national debt of the United States is paid off.

1837. Dec. 29. The U.S. steamer Caroline is burnt by an Englishman, near the coast of the United States, while en route for having brought assistance to the rebels.

1838. Jan. 5. The president prohibits American citizens from aiding Canadian rebels in arms against the British government.

A.D. June 22. The Hungarian Martin Kosuta, a citizen of the United States, is seized by the Austrian authorities at Smyrna as a rebel, in consequence of which several Hungarian officials are assassinated by political refugees. Capt. Ingraham, U.S. corvette St. Louis, demands the restoration of Kosuta, who is subsequently surrendered. July 14. Opening of the New York exhibition. The territory of Washington is erected this year.

May 2. Charles Bird Sumner is brutally assailed by Preston Brooks in the Senate House, Washington, for his strong expression of anti-slavery principles. May 28. Mr. Crampton, British envoy at the United States government, is ordered by his government to quit Washington. June 24. The president recognizes the filibuster general Walker as president of Nicaragua. July 4. General Scott is elected to be the candidate for the presidency. July 8. Genl. Schenck, the Democratic anti-slavery candidate, is elected to the presidency, after a severe contest with Colonel Fremont, the representative of the Republican, or anti-slavery party. Dec. The ship Resolute is formally presented to Queen Victoria by the United States government. Kansas (q.v.) is admitted into the Union this year.

1860. Feb. 1. Pennington is appointed speaker of the chamber of representatives after a stormy contest. March 30. Congress elects a committee of inquiry into the means employed by President Buchanan to secure his election, and all the charges of his administration. April 23. The president protests against this measure. May 19. A convention of unionists assembles at Charleston, and nominates Stephen Douglas as its candidate. June 18. A second democratic convention assembles at Baltimore, and divides into two parties, the northern delegates persisting in their nomination of Douglas, while the southern delegates propose Jefferson Davis as their candidate. Sept. 27. The filibuster, General Walker is shot at Honduras. Oct. 3. The prince of Wales is received by the president at Washington. Nov. 6. The electors in the state of Lincoln are declared elected, in consequence of which an intense political agitation commences in the Southern states. Dec. 20. South Carolina secedes from the Union. Dec. 29. Howell Cobb, Lewis Case, and John B. Floyd resign their appointments in the government.

PRESIDENTS OF THE UNITED STATES.

The president holds the office for a term of four years, but is eligible for re-election at the expiration of that period. The official year commences on the 4th of March.

George Washington 1789 William Henry Harrison 1841
John Adams 1797 John Tyler 1841
Thomas Jefferson 1801 James Knox Polk 1845
James Madison 1809 Zachary Taylor 1849
James Monroe 1817 Millard Fillmore 1850
John Quincy Adams 1825 Pierce Franklin 1853
Andrew Jackson 1829 James Buchanan 1857
Martin Van Buren 1837 Abraham Lincoln 1861

UNIVERSALISTS, who held the doctrine of the ultimate salvation of all mankind, existed at an early age in the Christian church. They are divided into Universalists, Hypothetical Universalists, and semi-Universalists. They formed several societies in America A.D. 1789.

UNIVERSAL SUFFRAGE.—This system of voting is practiced in the republics of ancient Greece and in Rome. It was established in France A.D. 1791, and was abolished on the fall of the empire. It formed one of the provisions of Daniel O'Connell's Reform Bill, which was rejected by the House of Commons May 28, 1830, and was adopted as the first point of the people's charter in 1838. It was again established in France March 5, 1848, and was modified May 31, 1850. It was adopted by the president, Louis Napoleon, Dec. 2, 1851, and again in the election of deputies by the new French constitution, Jan. 15, 1852. The voting of the Italian states for and against annexation to Sardinia in 1860 was also by universal suffrage.

UNIVERSITIES.—The ancient Romans applied the term university to any corporation of traders or professional men, and in ecclesiastical language it was used to denote a number of churches under the government of one archdeacon. An instance of

A.D. 688. Academically it signifies "a universal school, in which are taught all branches of learning, or the four faculties of theology, law, medicine, and the arts, and in which degrees are conferred in these faculties."

The university system of education originated in the schools attached to the churches and monasteries, and was established during the 11th century. The following is a list of the most important universities, with the dates of their foundation. Additional information is frequently given under the title of the town in which they are situated:—

Piotiers 1431
Alphonso III, king of Leon, in 874, but with such loss to himself that, according to the Arab chroniclers, the Christians were employed during more than eleven days in burying their dead.

Urbino (Italy), the ancient Urbanum Hortense, a municipal town where Fabius Valens, the general of Vitellius, was put to death A.D. 69, was besieged and taken by Belisarius in 588, and became the capital of a duchy about 1320. Cæsar Borgia treacherously obtained possession by requesting the duke, as a friend, to lend him his artillery, with which he entered the town as a conqueror in 1502. It was wrested from him by Pope Julius II. in 1503. Leo X. captured it in 1516. The efforts of the duke to recover it in 1517 proved ineffectual, and Leo X. annexed it to the States of the Church in 1519. It was recovered by the duke in 1522, and was finally incorporated with the papal states in 1632.

Urgel (Spain) was created a bishopric A.D. 820. It was captured by the Moorish king Abd er Rahman in 822, by the French in 1691, and again when the duke of Berwick commanded, Oct. 12, 1719. After a few days’ siege, the royalists took it by assault, putting the greater part of the garrison to the sword, June 21, 1822. A regency, which professed to administer the government in the name of Ferdinand VII., was formed here Sept. 14, 1822. On the approach of Mina, the regency fled from the town, Nov. 10.

Uri (Switzerland).—This canton was one of the three which revolted against Austria, A.D. 1307, and which contracted the federal compact of Brunn, Dec. 8, 1315. In 1775 the Val Levantina revolted against the jurisdiction of Uri, but was compelled to return to its allegiance.

URICONIUM, or WROXETER (Shropshire).—About A.D. 1700 a person digging in a field at Wroxeter, near Shrewsbury, discovered a Roman tessellated pavement and other interesting remains. Other discoveries were afterwards made, but no systematic plan of exploration was adopted until a committee of excavation was appointed at Shrewsbury, Nov. 11, 1858. Excavations were commenced Feb. 3, 1859; and the result was the discovery of the ruins of the Roman city of Uriconium, which has been called, in consequence, the British Pompeii.

Ur in and Thummi5, commanded by Jehovah to form part of the breastplate of judgment worn by the Jewish high priest on certain occasions, b.c. 1491 (Exod. xxviii. 30). It was consulted before entering upon any important enterprise, as by David when he inquired if he should go up against any of the cities of Judah (2 Sam. ii. 1), b.c. 1053. According to Josephus, it ceased to return responses about b.c. 110.

Ursuline Nuns, founded by Angela da Brescia about A.D. 1507. The order took its name from the English saint Ursula, when the institution was confirmed by Pope Paul III. in 1544. Madame de Sainte Bove estab-
lished the first house of the order at Paris in 1604.

Uruguay, of Banda Oriental (South America), formed part of the vice-royalty of Buenos Ayres, under the Spaniards, and was taken possession of by Brazil A.D. 1815. A war between the two countries ensued in consequence in 1825. A settlement was effected, by which a portion of Uruguay was erected into an independent republic in 1828; and a constitution was published August, 1830. Ships of war were sent by England and France into the Rio de la Plata, in consequence of the lawless state of the country, under Rosas, in 1845; and Monte Video was blockaded by the English till 1849; and by the French till 1849. Arrangements were made, and treaties formed with France and England at the conclusion of the blockade; but after the withdrawal of those powers the war was renewed with Brazil, and prosecuted till 1851.

Ushant (France).—An engagement took place off Ushant, July 27, 1778, between the English fleet, under Admiral Keppel, and the French, under d'Orvilliers. It was of an indecisive character, and Keppel was tried by court-martial. Off the island, Captain Williams, of the Flora, captured the Nymphe, commanded by Chevalier du Romain, after a severe struggle, Aug. 10, 1750. Lord Howe gained a signal victory over the French fleet off the coast, June 1, 1794.

Usipetes, or U شب. This German tribe, having crossed the lower Rhine, were treacherously attacked and defeated by Julius Caesar, B.C. 55. They opposed the progress of Germanicus on his return from the country of the Marsi, A.D. 14; and took part in the siege of Moguntiacum, about 70. A detachment of the nation served in the Roman army in Britain in 83; after which their name disappears from history.

Usury. — The Jews were prohibited by the Mosaic law to exact usury from those of the same nation, B.C. 1451 (Deut. xxiii. 20). In Greece it was not regulated by law, and ranged from ten to eighteen per cent. With the Romans the legal rate was twelve per cent., senators being allowed to recover one half of that rate by the Theodosian code, A.D. 438. In England usury was prohibited by 15 Edw. III. st. 1, c. 5 (1341). It was limited to ten per cent. by 37 Hen. VIII. c. 9 (1545); reduced to eight per cent. in 1624; to six in 1660; and by 12 Anne, st. 2, c. 16 (1703), was lowered to five per cent. By 5 & 3 Vict. c. 37 (July 29, 1839), all bills of exchange and promissory notes not having more than twelve months to run, and all contracts for sums above ten pounds, were exempted from the operation of the usury laws. All restrictions were repealed by 17 & 18 Vict. c. 90 (Aug. 10, 1854). In France the rate was fixed at five per cent. in 1665; but the laws affecting usury were abolished at the revolution of 1789.

Utah (North America) was acquired by the United States government from Mexico, A.D. 1848, and constituted a territory, with Brigham Young as governor, Sept. 9, 1850. Previous to the formal transfer, in 1847, the Mormons had established themselves here. A force was despatched against them by the federal government in 1857. Brigham Young submitted to authority, and received them peaceably in May, 1858.

Utica (Africa) was founded by the Tyrians about B.C. 1165, and is mentioned as an ally of Carthage B.C. 348. At the close of the third Punic war it concluded terms with the Roman conquerors, B.C. 147. Cato the younger committed suicide here, B.C. 46. It was presented by Augustus with the Roman civitas, B.C. 31. It appears to have fallen into the hands of the Vandals about A.D. 493; and, after undergoing various vicissitudes, was destroyed by the Saracens about 700.

Utrecht (Holland), the Trajectum of the Romans, capital of the province of that name, is mentioned in the Itinerary of Antoninus, A.D. 138. An independent bishopric was founded here in 696. It entered into the Dutch confederation in 1579, and was taken in 1672 by Louis XIV., who was compelled to abandon it in 1673. The French, under General Salm, occupied Utrecht Jan. 17, 1795. The cathedral of St. Martin, built in 1383, was much injured by a storm in 1674. The university was founded in 1634.

Utrecht (Treaty), which closed the war of the second Grand Alliance that broke out A.D. 1701, was signed at Utrecht between France, Great Britain, Spain, Prussia, Portugal, and the States-General, April 11, 1713 (N.S.). Gibraltar, Minorca, Nova Scotia, and St. Christopher, were ceded to England, Hudson's Bay was restored, and the French settlements in Newfoundland were abandoned. The emperor Charles VI., who refused to make peace, was given to June 1 to join in the treaty. His forces were defeated, and conferences were opened Nov. 26, which resulted in the peace of Alt-Ranstadt (q.v.).

Uttoxtter (Stafford).—The duke of Hamilton having entered Lancashire with a body of Scotch troops in support of the cause of Charles I., was defeated near Preston by Cromwell, who pursued him to this town, where he was captured, Aug. 20, 1648.

Uxbridge (Middlesex).—Commissioners met here to discuss terms of peace between Charles I. and his parliament, Jan. 30, 1645. The parliamentary party demanded the abdication of episcopacy and the liturgy, and that the absolute control of the army and navy should be vested in them. These conditions were rejected on behalf of the king, and the negotiations terminated without result, Feb. 22.

Uxellodunum (France).—This town of the Cadarici was the scene of Caesar's last great military exploit in Gaul. It was besieged by him, and only surrendered after a desperate resistance, from want of water, B.C. 51. The conqueror sullied his victory
by causing the hands of all the fighting men left alive to be cut off.

Uz, supposed to have been in the south of Arabia Deserta, is mentioned as the land where the patriarch Job lived (Job i. 1), b.c. 2150.

V.

VACCINATION.—Dr. Edward Jenner's attention was first directed to this subject a.d. 1769, and he tried it on a boy with matter procured from the hand of a milkmaid who had contracted cow-pox, May 14, 1796. The boy was inoculated with small-pox matter by way of experiment, July 1, 1796, and no disease followed. An act (3 & 4 Vict. c. 29) to extend its practice was passed July 23, 1840; and another (4 & 5 Vict. c. 24) provided for its gratuitous performance to the poor, June 21, 1841. An act to extend and enforce the practice of it (16 & 17 Vict. c. 100) was passed Aug. 20, 1853. The Royal Jennerian Institution was founded in 1806, and the National Vaccine Establishment in 1809. Jenner's services to the country were acknowledged by a grant of £10,000, voted by the House of Commons, June 3, 1802, and by another of £20,000 in 1807.

VACCILI (Battle), between the Pisans and the Luccans, in which the latter were defeated, was fought a.d. 1055.

VADIMONIAN LAKE (Battles).—The Etruscans were defeated, and their power first broken, near this lake, in Italy, in an engagement with the Romans, under Q. Fabius Maximus, b.c. 310. In alliance with the Gauls, they were defeated by the consul P. Cornelius Dolabella at the same place, b.c. 283.

VAGRANTS, or VAGABONDS.—This class of wanderers is referred to in the "Statute of Labourers" (23 Edw. III. c. 1), passed a.d. 1349. Numerous penal enactments were made to prevent the increase of vagrancy. By 1 & 2 Edw. VI. c. 3 (1547), any person who had offered them work which they refused, was authorized to brand them on the breast with a V, hold them in slavery for two years, feed them during that period on bread and water, and hire them out to others. Inoperative from its severity, this act was repealed in 1549. The privy council having issued circular letters to the sheriffs of counties to apprehend all vagabonds and sturdy beggars, commonly called Egyptians," 13,000 were taken up in 1569. All previous laws on the subject were remodelled by 17 Geo. II. c. 5 (1744), which distributed them into the three classes of—idle and disorderly persons, rogues and vagabonds, and incorrigible rogues. The law is at present regulated by 5 Geo. IV. c. 83 (1824), amended by 1 & 2 Vict. 38 (July 27, 1838).

VAILA (Battle), called by the French the Battle of Agnadello, was fought between the Venetians and the French on the banks of the Adda, May 14, 1509, when the latter, commanded by Louis XII. in person, gained a decided victory.

VALAIS (Switzerland), having been conquered by the Romans, was seized by the Burgundians on the decline of the empire. They were supplanted by the Franks, who engaged in a civil war; and the lower district was subjected by the upper, a.d. 1475. It was allied with Switzerland in 1495, and joined the confederacy in 1529. The two districts were formed into one canton in 1798. Napoleon Bonaparte constituted it a separate republic in 1802, and united it to the French empire Nov. 12, 1810. It became part of the new confederation, under the constitution framed by the congress of Vienna, May 27, 1815. Several political changes of a democratic character took place in 1830.

WALDENSE, or WALDENSES, also called Vallenses, Valdei, and Vaudois, Christians dwelling in the Cottian Alps, who, according to the best authorities, retained their faith unsullied during prevailing corruption, and form the connecting link between the primitive church of the apostolic age and the reformed church of modern times. They occupy the valleys of Lucerna, Pera, and San Martino, in Piedmont; and their ancestors are said to have possessed an ecclesiastical system of their own as early as a.d. 820. A confession of their faith, bearing date 1120, is extant; and the "Nobla Leyçon," an exposition of their principles, was written in 1100. They were ordered by Alphonso II. of Aragon to depart out of his dominions in 1194, and their first persecution commenced in 1210. A colony professing their tenets settled in Calabria, and founded several towns in the 14th century. In 1487. Commissioners, monks, and soldiers, were sent by the duke of Alcalà, vicerey of Naples, with instructions to convert or destroy them, in 1561. Instigated by the pope and the court of Spain, Duke Emanuel Philipbert sent troops into the quiet valleys in 1560. Neither women nor children were spared, and many, taken prisoners, were consigned to the flames. Terrible persecutions followed at different times. Charles Emanuel I. guaranteed them the exercise of their religion, under certain restrictions, in 1603 and 1620; and Charles I. of England sent two embassies to intercede for them in 1627 and in 1629. A merciless crusade was commenced against them by Charles Emanuel II. in 1665. His cruelties elicited protests from several European states. Cromwell induced Louis XIV. to mediate, and an amnesty was granted in August, 1666. Fresh persecutions followed in 1663 and 1694. Under the advice of Louis XIV. of France, Victor Amadeus II. issued an edict commanding them to abjure their tenets, in January, 1686. Numbers were put to the sword, their whole property confiscated; others were thrown into prison, where they died; and many families migrated into Switzerland. Eight hundred of these exiles, under their

3 x 2
pastor, Henri Arnaud, undertook a romantic expedition to their native valleys, where they arrived Sept. 16, 1888. In return for their bravery in defending the passes of the Alps against the French, Victor Amadeus II. of Sardinia, in June, 1791, published an ordinance redressing many of their grievances. They were placed by Napoleon Bonaparte on an equal footing with Roman Catholics in 1802; but again subjected to disabilities by their king in 1814. Charles Felix, however, showed them some degree of indulgence in 1821. Permission was granted them by Victor Emanuel II. to erect a church at Turin, Dec. 15, 1853.

VALENCE (France).—Napoleon I. imprisoned Ferdinand VII. of Spain in the palace at this town, May 9, 1808. An attempt to procure his liberation was made by the English government, but without success, in 1810. A treaty for the same object was concluded between Napoleon I. and the royal captive Dec. 11, 1813. The Cortes refused to ratify the treaty; the king, however, was set free, and arrived in Spain May 19, 1814.

VALENCIA (Spain), capital of the province of the same name, became a Roman colony about B.C. 138. It was taken and destroyed by Pompey about B.C. 77. Adolphus, king of the Goths, assaulted it a.d. 414; and the Saracens obtained possession by treaty with Theodemir of Murcia in 713. They erected the province into a kingdom in 1009. Ferdinand I. deposed the Moors here in 1238. It was taken by the king of Toledo, who deposed its sovereign in 1065. Prince Alacid perished, with his Christian allies, in defending it against the Almoravides in 1092. It was delivered from the Moors by the Cid in 1094, on which account it is sometimes called Valencia del Cid. The Moors regained possession in 1099. Incursions were made into the province by the Christians in 1224. The city was assailed by Gaycum of Aragon in 1236. He captured it and annexed it to his kingdom Sept. 29, 1238. The earl of Peterborough seized it in 1708; but it was restored for Philip V. by the duke of Berwick in 1707. The French, who failed in an attack upon it in 1808, succeeded in capturing it Jan. 9, 1812. They abandoned their conquest in June, 1813. A decree issued by Ferdinand VII. from this place annulled the acts of the Cortes, restoring absolute government over Spain, May 4, 1814. An insurrection, caused by the imposition of a coal-tax, broke out Jan. 17, 1817. Another, with the object of assassinating the governor-general, Elio, suppressed under circumstances of great cruelty, broke out Jan. 21, 1819. The civil war was carried on with great feroceness in the province in 1836. The cathedral was erected on the site of a Roman temple and a Moorish mosque in 1262, and received additions in 1432. The wall surrounding the city was built by Pedro IV. in 1356; the university was founded in 1410; and the Lonja de Seda, or hall of silk, was built in 1482. Councils were held here in July or August, 530, and Dec. 4, 546.

VALENCIENNES (France) was taken by Baldwin IV., count of Flanders, a.d. 1006, and by the French musqueteers in 1677. The allied troops, under the duke of York and the prince of Coburg, captured it, after an heroic defence extending over forty-three days, July 28, 1793. It capitulated to the French Aug. 27, 1794.

VALENTINE'S DAY, Feb. 14, "a Christian communion," says Fosbroke, "of the ceremony in the Lupercalia, in which the names of young women were put into a box, from which they were drawn by the men as chance directed. It was continued by ladies, who chose knights for a twelvemonth, mostly during carnival time." The earliest known poetical valentines were written by Charles duc d'Orleans, taken prisoner at the battle of Agincourt, Oct. 25, 1415. They are in the library of the British Museum. The saint who gives name to the day was martyred at Rome about a.d. 270.

VALENTINIANS, the followers of Valentinus, supposed to be of Jewish origin, who introduced a strange compound of Gnosticism and Judaism at Rome, in the 2nd century. Mosheim says this heresy grew to maturity in the island of Cyprus, and with wonderful celebrity traversed Asia, Africa, and Europe.

VALETTA. (See LA VALETTE.)

VALLADOLID (Spain), the Pintia of the Romans, the Beida Wald of the Moors, and capital of the province of the same name, was chosen as a royal residence by Juan II. of Aragon in the 15th century. Philip II., who was born here, induced Pope Clement VIII. to raise it to a bishopric in 1555. A French army under Dupont occupied it in January, 1808. The Spaniards captured a French detachment here in 1812, and it was taken by the English, June 4, 1813. The university was founded in 1346; the cathedral, commenced in 1383, is unfinished. One of its towers fell to the ground in 1841. Columbus died at Valladolid, May 20, 1506.

VALLS (Spain).—The French, commanded by St. Cyr, gained a complete victory over the Spanish troops at this town, in Catalonia, Nov. 18, 1809. Macdonald was defeated here by Sarsfield in 1811.

VALMY (Battle).—The Prussians were defeated by the French under Kellermann, at this town, in France, Sept. 20, 1792. For this success Napoleon I. conferred on this general the title of duke of Valmy, in 1808.

VALOIS (France).—The county was bestowed by Philip III. of France on his second son Charles, a.d. 1255. It fell to Louis, duke of Orleans, second son of Charles V. of France, in 1322. On the accession to the throne of the duke of
Orleans, under the title of Louis XII., in 1498, it was reunited to the royal domains.

Valletine (Italy).—This small district was ceded to the Grisons a.d. 1530, and was the scene of the cruelt massacre of the Protestantst by the Roman Catholic rebels, July 19, 1620. In 1624 the French resisted the attempts of the Spaniards to establish their authority here. Napoleon Bonaparte annexed the Valletine to the Cisalpine republic Oct. 10, 1797, and erected it into the department of the Adda, in the French kingdom of Italy, in 1807. In 1814 it was ceded to Austria.

Valvassor, or Vavassor.—Persons holding fiefs not immediately under the king, but under some intermediate lord, and having subordinate freeholders under them, existed in England, Scotland, France, Lombardy, and Aragon, and are twice mentioned in Domescay Book, a.d. 1086. A writ was issued in 1220 to the sheriff of Wiltshire, directing him to give seisin of three vavassories to the persons specified. In his deed of renunciation, Sept. 29, 1399, Richard II. absolves, amongst others, all vavassors from their oath of allegiance. It was proposed to revive the name in the new dignity created by James I. in 1611. It, however, took that of baronet.

Van, or Wan (Armenia).—Tradition refers the origin of this town to Semiramis, and it undoubtedly exhibits traces of extreme antiquity. It is said to have been rebuilt about the time of Alexander the Great, by an Armenian prince named Wan, from whom it is named, and Valarsaei I. (b.c. 149—127) made it the strongest place in his dominions. It was taken by Togru Beg a.d. 1032, by Tamerlane in 1392, and by Abbas the Great of Persia in 1585. In 1639 it was ceded to the Ottoman empire. M. Schulz examined the antiquities of this place in 1827, and in 1850 the inscriptions were copied by Mr. Layard.

Vanadium.—This metal was discovered by Del Rio, a.d. 1801, and received its present name from Seffström in 1830.

Vancouver Island (North America) was supposed to form part of the mainland till an American captain sailed round it, a.d. 1759. Captain Vancouver visited it and gave it the name of Quadra and Vancouver Island, the former in honour of the Spanish commandant at Nootka Sound, in 1792. It was made over to the Hudson Bay Company, on condition that they should colonize it, in 1846. Gold was discovered here in 1856.

Vancouver's Voyage.—Captain Vancouver having been ordered by the British government to proceed to Nootka Sound to receive a formal cession of the territory from Spain, set sail in the Discovery, April 1, 1791, accompanied by Captain Broughton in the Chatham, a small vessel of 135 tons burthen. He arrived on the coast of New Albion in April, 1792. On the outward voyage he surveyed the southern coast of New Holland, and part of New Zealand, while Broughton discovered Chatham Islands.

Broughton having been despatched home with intelligence of the evasive conduct of the Spaniards, Vancouver proceeded, in January, 1793, to winter in the Sandwich Islands. In the spring he resumed the survey of the American coast, and returned to the Sandwich Islands, where he obtained from the chiefs a formal cession of Owyhee to Great Britain, Feb. 25, 1794. The survey of the north-west coast of America was completed Aug. 22, 1794; and he entered the Shannon on his return, Sept. 13, 1796, with the loss of only two men out of both crews. The narrative of his labours, written by himself, was in course of preparation for the press when he died, May 1798.

Vandals, a Slavonic, or a Germanic tribe, existed on the banks of the Oder, and the sea-coast of Pomerania and Mecklenburg, about a.d. 250. A considerable number were transported into Britain by Probus in 279. With the Sarmatians in Hungary they formed a union in 331, and joined the forces of Radagaisus for the invasion of Italy in 405. Having separated from their allies, they were attacked by the Franks, 20,000 with their king falling on the field of battle. The Alani came to their aid, and they marched without opposition into the provinces of Gaul, Dec. 31, 405. They established themselves in Spain in 425; from which country, on the invitation of Count Boniface, they passed into Africa under their king Genseric, in May, 429. After a career of conquest on that continent, during which they embraced Christianity, Carthage fell under their victorious arms, Oct. 9, 439. Here they commenced the formation of a powerful navy, and having fitted out an expedition against Rome, they landed at the mouth of the Tiber, and sacked the capital of the empire, June 15—29, 465. The whole of the Mediterranean coast was subjected to their piratical depredations between the years 461 and 467. Having embraced the Arian heresy in 530, they carried on a cruel and relentless persecution against the members of the orthodox faith. They were converted from Arianism, and their rule in Africa destroyed by Belisarius, who was declared sole consul Jan. 1, 535. The entire nation had disappeared from Africa by 558.

Vandals, Kings of Africa.

A.D.
429. Genseric.
477. Husenric (son of Genseric).
484. Gundamund (nephew of Hunneric).
486. Thrasius (brother of Gundamund).
523. Hilderic (son of Hunneric).
590. Gelimer (son of Hilderic, and last of the Vandals).

Van Diemen’s Land. (See Tasmania.)

Vane.—The marble tower built at Athens by Andronicus Cypriostes was surmounted by a vane, and Varro had an apparatus at his farm to indicate the direction of the wind, B.C. 37. A costly pillar was erected at Constantinople for a similar purpose in the 8th century. A vane in the form of a horseman was placed on the top of a tower at Hems,
in Syria, in 1151. In Europe vanes are mentioned as early as the 9th century. In France none but noblemen were allowed to have them on their houses in the 12th century. The Danish fleet under Sweyn, in 1013, carried vanes in the shape of birds or dragons at their mastheads.

**VANES (France)** was besieged by Edward III. A.D. 1342. He failed in his enterprise, and concluded a three years' truce, through the intervention of the pope's legate, in 1343. An insurrection of peasants was put down by the national guard with great slaughter in February, 1790. The French emigrants, under the Chevalier de Siz, attempted to take Vanes by surprise, but were defeated by General Hoche in May, 1795. A tower in the centre of the town is the only remaining vestige of the Château de l'Hermine, built in 1357. Vanes is supposed by some to occupy the site of the ancient Dariorigum, the capital of the ancient Veneti, whence its modern appellation. The Bretons still call it Wenet or Guenet.

**VARENNES (France).**—Louis XVI, his queen, and their two children, were arrested here on their flight from Paris, during the night of June 21, 1791.

**VARNA (European Turkey)** was occupied by the Bulgarians A.D. 679, and plundered by them in 1193. Ladijslaus IV., king of Hungary, was defeated and slain in a battle fought here with the Turks, commanded by Amurath II., when 10,000 Christians fell, Nov. 10, 1444. The Russians failed in an attack upon it in 1773, but succeeded in capturing it, after a siege of three months, Oct. 11, 1828. It was restored to Turkey Sept. 14, 1829. A council of war was held at Varna by the Turkish minister of war, Richard Pasha, the Cossacks, Osman Pasha, and the allied generals and admirals, May 18, 1854. The troops from Scutari and other places arrived here in the early part of June, and by the end of the month a camp of 60,000 English, French, and Turkish soldiers had been formed. Sickness broke out and prevailed to an alarming extent in August. The French portion of the army began to embark for the Crimea, Sept. 5, the English, Sept. 7, and the combined fleets with their transports, amounting to 700 vessels, set sail Sept. 10.

**VARNISH.** The art of making varnish was imported into Europe from China and the East during the 16th century. Dr. Cattell proposed certain improvements in the method of preparing varnish in 1860.

**VASSALAGE.** (See Feudal Laws, Serfdom, and Slavery.)

**VASSY (France).**—The duke of Guise massacred a Protestant congregation here, Sunday, March 1, 1562.

**VATICAN, the modern II Borgo, and the ancient Mons Vaticanus, outside the walls of ancient Rome, gave name to the palace which was commenced near the church of St. Peter by Eugenius III. A.D. 1146, a pile of buildings which gradually increased, and now forms the Papal palace, the court and garden of the Belvidere, the library and the museum. Gregory XI. fixed his permanent residence here in 1376. It continued to be the papal abode till Paul III. built the palace on the Quirinal Mount about the middle of the 16th century. The new church of St. Peter's was projected by Nicolas V. in 1450; but no progress was made with it till the time of Julius II., who laid the foundation-stone April 15, 1506. The library was built by Sixtus V.

**VAUCHELLES (France).**—A treaty between Philip II. of Spain and Henry II. of France, the principal clause being a five years' truce, was signed here Feb. 5, 1556.

**VAUD (Switzerland)** formed part of the kingdom of Burgundy A.D. 857, was conquered by Peter, count of Savoy, and annexed to his dominions as a barony, in 1263, reverted to Amadeus VI. in 1539, and having been parcelled out into a number of petty lordships under the name of the Pays de Vaud, was conquered and in part annexed by the Bernese in 1476. They completed its subjugation in 1536. The French Directory determined that it should be made independent of Berne in 1798. It was constituted a sovereign canton by Napoleon I. in 1803; and entered the confederation in 1815. A new constitution was adopted in 1830.

**VAUDOIS, the inhabitants of three high valleys in Piedmont, on the eastern side of the Cottian Alps, formed a communion separate from the Romish church in the early ages of Christianity. They have been called the persevered Protestants of Savoy. (See Valdenses or Waldenses.)**

**VAUXHALL BRIDGE (London).**—This iron bridge was commenced May 9, 1811, and opened July 31, 1812.

**VAUXHALL GARDENS (London).—Fulke de Breauté built a hall in South Lambeth, about A.D. 1252, which was called Fulke's Hall, afterwards corrupted into Faukeeshall, Foxhall, and finally Vauxhall. The gardens, opened in 1661, under the title of the New Spring Gardens, were notorious for the licentiousness of the company by which they were frequented during the Stuart period. About the year 1712 they appear to have declined in popularity. They were purchased by Jonathan Tyers and re-opened with an **al fresco** entertainment, June 7, 1752, and under the management of the new proprietor proved successful. The name Spring Gardens was not finally abandoned till 1755, and the fireworks exhibitions, which for a long period constituted the chief feature of the place, were commenced in 1798. Vauxhall Gardens were sold by auction for £20,200, Sept. 9, 1841. They again passed under the hammer Aug. 20, 1859, when the ground was used for building.

**VAVERIO (Battle).—The combined Neapolitan and papal armies were defeated at this town of Italy by Galeazzo Visconte, A.D. 1324.**
VEDAS, the four principal sacred books of the Hindoos, ascribed to Brahma, having in the course of time become scattered, were arranged or edited by a sage about B.C. 3000. Such is the native tradition, but these writings are now generally assigned to B.C. 1300 or B.C. 1400.

VEHMIC or VEHMIC COURTS, also called the Vehm-Gericht, formed a secret tribunal of Westphalia. Its principal seat was in the town of Dortmund, and it possessed ramifications throughout Germany. It is said to have been formed on account of the severe laws respecting religion enacted by Charlemagne, A.D. 800. This tribunal reached its greatest prominence in the 13th century. Its members, who were bound by an oath of secrecy, numbered at one time 100,000 persons. It continued to exercise judicial functions till the end of the 15th century.

VEII (Etruria).—The inhabitants of this city are first mentioned in history as engaged in hostilities with Romulus, who gained a decisive victory over them, and, after exacting severe terms from the vanquished, concluded a treaty of peace for 100 years, B.C. 722. War, however, again broke out between them, in which the Romans under Tullus Hostilius gained the mastery, B.C. 673–641; and a like result followed hostilities in the reign of Ancus Martius, B.C. 541–517. Under L. Tarquiniius, Veii was again vanquished, together with eleven other Etruscan cities, its allies, a success which the victor commemorated, it is said, by the institution of the twelve dictors and their fasces, B.C. 535–510. Aided by a great number of volunteers, the Veientes again took the field against their old enemy, and a drawn battle ensued, when the Romans lost their consul, with many tribunes and centurions, B.C. 481. The Fabii having offered their services to the state, established a permanent camp to stop the marauding expeditions from Veii, but were drawn into an ambuscade and slain, July 16, B.C. 477. After much desultory warfare, the Romans resolved to besiege the town, and at length took it by means of a mine, slaughtered or sold into slavery the inhabitants, carried off the image of Juno, the tutelary deity, and divided the territory amongst Roman citizens, B.C. 396. After the burning of Rome by the Gauls, B.C. 390, it was proposed to convert Veii into a new capital. From this period Veii gradually fell into decay, and seems to have been divided by Caesar among his soldiers, B.C. 45. The castle, known by the name of Isola Farnese, was built on the south side of the city in the beginning of the 11th century. Many relics of Etruscan art have been found in the ruins.

VELLETRI (Italy).—The ancient Velitrae, included within the limits of Latium, was besieged and taken by the consul P. Virginius, B.C. 494. The population having been reduced by pestilence, a Roman colony was sent, B.C. 492, which was followed by another settlement B.C. 404. Velletri was taken by the Romans in consequence of a revolt, B.C. 380. It was occupied by Belisarius A.D. 538. Near the town Carlo Borbone defeated the Austrians, and was subsequently proclaimed king of Naples, May 25, 1734. The cathedral of San Clemente was erected in 1660, and the church of Santa Maria in 1353.

VELLORE (Hindostan).—Major Lawrence wrested this fort from the French, July 8, 1752. During the wars in India, it was frequently besieged. Sir Eyre Coote relieved it by a brilliant victory, Sept. 27, 1751, and it was selected by government as the residence of Tippoo's family, after the fall of Serimgapatam, May 4, 1799. A mutiny among the native troops broke out here July 10, 1806. It was speedily suppressed, and 800 of them were executed.

VELOCIPEDe, a kind of vehicle which the occupant moves by his feet, was introduced A.D. 1819.

VELVET, formerly called vellet, is mentioned by Joinville A.D. 1272; and in the will of Richard II. in 1399. Strutt names many varieties of the stuff in use in the reign of Edward IV.

VENDEE. (See La Vendee.)

VENETI, the inhabitants of the country called Venetia by Caesar. It nearly corresponds to the French department of Morbihan, and was the most powerful maritime state on the Atlantic. The Veneti rose against the Romans, and sent to Britain for assistance, B.C. 57. After a severe naval engagement they were utterly defeated, and surrendered unconditionally to Caesar, B.C. 56. He sold those who had escaped slaughter, and put to death all the members of the state assembly.

VENETIAN REPUBLIC.—This famous republic of Northern Italy derives its name from the Veneti, who regarded themselves as a tribe of Trojan origin, which settled at the head of the Adriatic under the leadership of Antenor, and dispossessed the Euganeans, the original possessors of the soil. (See Padua.) Other authorities regard them as a branch of the Slavonian race, and regard the name Veneti, or Venedi, as a corruption of the German Wends, which was applied to all Slavonian tribes. The Venetian territory was invaded by the Gauls B.C. 349, and in consequence of the repeated encroachments of that people, the inhabitants concluded an alliance with the Romans B.C. 215. Some Gauls attempted to settle here B.C. 156, but were compelled to return to their own country by the Romans. The Veneti were admitted to the privileges of Roman citizens about B.C. 49. Venetia and Istria were subsequently united into one Roman province, the capital of which was Aquileia. The city of Venice was founded by fugitives who escaped to the lagunes after the destruction of their own cities by Attila, A.D. 421–452. In this manner the inhabitants of Aquileia founded Grado (q.v.), and the Paduans Venice, or Venezia.

998. 

The Venetians elect Paul Luka Anastas of Heraclia to conduct the government as doge.

The Venetians assist the ex-arch Eutychius to recover Raveuna from the Lombards.

The tyrannical of the dogs Orso occasions an insurrection, in which he is murdered by the populace. The government is vested in a master of the militia.

Restoration of the ducal government in favour of Diodato Orso.

The doge Galbaio is associated with his father Maurizio in the dogehship.

The doge Galbaio II. murders the patriarch of Grado, in consequence of which a civil war commences.

Banishment of the Galbati.

Fepiu, son of the emperor Charlemagne, invades Venice, and is defeated in the battle of Albiola (p. 48).

The body of St. Mark is transferred from Alexandria to Venice.

The Venetians send a force of nearly 12,000 men to the Eastern empire against the Saracens.

Pope Benedict III. seeks shelter from his rival Anastasius in Venice.

The emperor Louis II. visits Venice.

Death of the doge Pietro Sanudo in a naval battle against the Narentine corsairs at Muco.

Death of the Hans at Albiola (p. 48).

The tyrannical and licentious doge Sanudo IV. is murdered by the populace.

Sept. I. Abdication of Orsolo I., the holy, by a vow for a monastic life.

July 19. A treaty with the emperor Otho III. is entered into at Mulhausen.

May 18. On the invitation of the inhabitants, the doge Orsolo II. embarks for the conquest of Illyria and Dalmata.

Orsolo II. assumes the title of doge of Venice and Dalmatia.

On the 15th Dandolo compels the Saracens to raise the siege of Bart.

The principles of association and hereditary succession, in reference to the dogehship, are abolished.

Nov. The Venetians sustain a terrible defeat from the Normans under Robert Guiscard in the naval battle of Corfu.

The emperor Alexius I. acknowledges the doge of Venice as lord of Dalmatia and Croatia.

Institution of the Magistrato del Proprio.

A league is concluded with Hungary.

Oct. 4. Victory of the Venetians over the Padauns in the naval battle of Brenta.

Aug. War is commenced with Hungary.

June 29. Tyre surrenders to the doge.

The Venetians sack all the Libyan isles and treat their inhabitants with great cruelty, on account of their allegiance to the Eastern empire.

Fano is annexed to the Venetian republic.

A short war breaks out with Padua.

Corfu and Sicily are ravaged by the Venetians.

An alliance is concluded with Sicily.

Sept. I. Michele III. embarks with a large fleet for the invasion of the Eastern empire. The plague breaks out among his crew, and the following year extends to the city.

May 27. Assassination of Michele III. in consequence of the failure of his enterprise and the public distress. Important political reforms are the result.

Nov. The Venetians raise the siege of Ancona.
VEN

A.D.

1355. April 4. The doge, irritated by the leniency of the sentence, conspires to assassinate all the patricians, and establish a despotate. April 12. The plot is revealed by Betranno di Bergamo. April 16. The doge is tried and executed. April 17. He is excuted. April 21. Giovanni Gradenigo is elected doge in his stead.

1358. Feb. 18. A treaty is concluded with Louis I. of Hungary and other princes, by which the republic cedes Salismita.

1360. May 21. A strict sumptuary law is passed.

1375. Nov. The Venetians invade the Paduan territory.

1376. May 12. They are defeated by the Hungarians and Carrarese at Narvea. July 1. The Venetians defeat the Hungarians and capture Stephen, the king's nephew, at Fossa Nuova. Sept. 22. Peace is concluded.

1375. Hungary, Genoa, and the Carrarese form a league against Venice.

1376. April 24. War is declared against Genoa.

1520. Victory of Pisto d'Anno (q.v.).

1381. Aug. 8. Peace is restored by the treaty of Nuova.

1385. Corfu (q.v.) is annexed to the republic.

1409. June 9. The republic again acquires Dalmatia by purchase from the king of Naples, and thus becomes involved in another war with Hungary.

1413. May 17. Five years' truce is agreed to.

1420. Corinth is annexed to the republic.

1420. Dec. 3. A league against Milan is concluded.

1426. April 29. Victory of Porto d'Anno (q.v.).

1427. Oct. Victory of Mantoa (q.v.).

1428. April 19. Peace is concluded with Milan, which cedes important territory to the republic. May 8. Bergamo is annexed to the republic.

1430. War is resumed.

1433. Aug. 25. Peace is again concluded.

1435. Aug. 17. The emperor Sigismund formally invests the republic with her possessions on the mainland, including Treviso, Passa, Brescia, Bergamo, &c.

1441. Nov. 20. By the treaty of Cavriana, Ravenna is ceded to the republic.

1454. April 9. By the treaty of Lod, Venice acquires Crema, Caravaggio, Rivolta, &c. April 18. The sultan concedes commercial privileges to the republic.

1463. War is undertaken against the Turks.

1465. The Venetians take Athens.

1473. Florence and Venice unite against the pope and the house of Savoy.

1479. Jan. 28. Peace is concluded with the Turks, who obtain Negropont, Suctari, Lemnos, and other eastern possessions of the republic.

A.D.

1484. Aug. 7. Peace is restored, and the republic acquires Polesine de Rovigo.

1489. Feb. 25. The republic acquires Cyprus.

1493. April 6. The league is concluded between Venice, Milan, and the pope.

1495. March 31. A league against Charles VIII. of France is concluded between the Venetians, and the emperor, the papa, the king of Spain, and the duke of Milan.

1499. War is re-umed against the Turks.

1501. Peace is restored by which the republic obtains the formal cessions of Cephalonia.

1504. Sept. 22. The treaty of Buda (q.v.) arranges the partition of the Venetian-Italian possessions between France, the emperor, and Julius II.

1508. Feb. War is commenced against the emperor. April 20. A three years' truce is signed with the emperor. Dec. 10. The celebrated league between France, the emperor, and the pope for the humiliation of Venice is signed at Cambrai (q.v.).

1511. Oct. 4. Venice unites with the pope and king of Spain in the Holy League (q.v.).

1513. March 6. The Venetians conclude an alliance with Louis XII.

1516. Aug. 12. The war of the League of Cambrai is concluded by the treaty of Noyon.

1523. June 21. The Venetians break their French alliance, and conclude a union with the emperor.

1526. May 22. Venice, France, Milan, and the pope form the League of Cognac (q.v.) against Charles V.

1538. Venice unites with the emperor and the pope against the Turks.

1541. The Venetians acquire Marano by purchase.

1576. War is declared against the Turks.

1577. Aug. Cyprus is taken by the Turks. Oct. 7. The Venetians assist at the naval battle of Lepanto (q.v.).

1596. April 17. Pope Paul V. places Venice under an interdict.

1616. Failure of the conspiracy of Jacques Pierre and his friends, the incidents of which form the basis of Otway's tragedy of "Venice Preserv'd."

1623. Venice and Savoy form a league against the king of Austria.

1644. War again breaks out with Turkey.

1651. July 10. The Turks sustain a severe naval defeat off Paros.

1659. June 26. Another great naval victory is gained by the republic in the Dardanelles.

1657. July 17. The Venetians gain another dearly bought victory in the Dardanelles.

1693. Sept. Candia is ceded to the Turks after a siege of twenty-four years.

1684. War is again declared against the Turks. Aug. 6. The forces of the republic seize Santa-Maura. Sept. 29. They take Preveza.

1685. The Venetians conquer part of the Morea.

1694. Sept. 8. Seio is taken by the Venetians but is speedily abandoned.

1699. Jan. Constanza is ceded by the Turks to the republic by the peace of Carlowitz (q.v.), by which the Morea is ceded to Venice.

1714. The Turks again attack the Morea.

1715. July 21. Venice relinquishes her Greek possessions by the treaty of Passarowitz (q.v.).

1733. The Venetian territory is overrun by the French and Austrian armies.

1741. The Turks compel the republic to pay a heavy compensation for alleged grievances.

1753. A treaty is concluded with the Barbary pirates.

1774. War is declared against Tuns.
VENEZUELA. (South America) was partly discovered by Columbus, A.D. 1498, and partly by Ojeda and Vespucci, in 1499. Cumaná was settled in 1523, and Coro in 1527. The Dutch took possession of the island of Curacoa in 1634. It formed a part of the government of New Granada till 1731. When Napoleon I. made his brother Joseph king of Spain, in 1808, it still adhered to the old dynasty, but asserted its independence in 1810. It returned to its allegiance to Spain in 1812. Bolivar commenced his struggles to liberate it from the mother country in 1813, and this was ultimately effected in 1823. It united with New Granada and Quito to form the republic of Colombia in 1819. This union was amicably dissolved in 1831. The constitution was remodelled in 1843, and Spain recognized its independence in 1845. A war between the native population and the whites, which broke out in 1846, lasted till 1849. Such was the state of its finances, that the expenditure was three times that of the receipts in 1853.

VENICE (Italy).—This city was founded by refugees from the fury of Attila, between A.D. 421, when a church was established in the Rialto island, and 452, when a consular government was adopted. The great Campanile was commenced in 902, and the cathedral of St. Mark was founded on the site of an earlier edifice in 977. A terrific fire which occurred in 1106 destroyed the greater part of the city, which was rebuilt in stone and marble. The celebrated columns were brought from the Holy Land in 1127, and were erected on their present site about 1180. The bank was established in 1157. A fire at the arsenal, Sept. 13, 1569, occasioned an explosion, which laid great part of the city in ruins. The bridge of the Rialto, founded in 1588, was built from the designs of Antonio da Ponte. The Dogana was erected in 1632. Venice, occupied by Napoleon Bonaparte, was ceded to Austria in 1797; and by the treaty of Presburg, Dec. 29, 1805, it was transferred to the French. The Academy of Arts was founded by Napoleon I. in 1807. On the dissolution of the French kingdom of Italy in 1814, Venice was ceded to Austria, and in 1839 it was declared a free port. An insurrection commenced under Daniel Manin, March 22, 1848, but the town was again brought under Austrian dominion Aug. 22, 1849. By the treaty of Villafranca, July 11, 1859, Venice was declared part of the Italian confederation subject to the emperor of Austria. The bishopric of Venice was founded in 733. Councils were held here in 940, and Aug. 14, 1177.

VENLO or VENLOO (Holland), was captured by Marlborough, who allowed the garrison to leave with the honours of war, Sept. 23, 1702. The French general Miranda bombarded it Feb. 11, 1783. It was invested by General Moreau Oct. 8, and surrendered Oct. 26, 1794.

VENNER'S INSURRECTION.—Thomas Venner, a wine-cooper and Anabaptist preacher, headed a rising of about eighty of his followers in London, Jan. 6, 1661. They fought desperately, and killed several of the soldiers. They were, however, taken prisoners, and the leader and sixteen others were hanged, Jan. 19 and 21.

VENUS (Italy), the ancient Venusia, was captured by the Roman consul L. Postumius, B.C. 262. T. Varro took refuge here after the defeat at Cannae, Aug. 2, B.C. 216.

VENTILATION.—Originally no means of ventilation existed except such as were afforded by the doors and windows, or by holes in the walls and ceilings. Dr. Desaguliers was employed in 1723 to improve the ventilation of the House of Commons, and in 1734 he invented his fan-ventilator. In 1741 Samuel Sutton was ordered by government to fix a ventilator of his own invention in the Norwich man-of-war. Deacon introduced ventilation by means of hot air in 1813; and a similar plan was adopted by the marquis of Chabannes in ventilating the London theatres in 1816, and the House of Commons in 1820. After the destruction of the House of Commons by fire in 1834 a temporary building was erected, provided with extensive ventilating apparatus designed by Dr. Reid, whose system possessed many advantages over those preceding it. Dr. Neil Arnott's work on Warming and Ventilating appeared in 1838, and directed considerable attention to the subject. A commission to examine the laws of ventilation was appointed in 1859 at the instance of the Board of Health.

VENTILATORE.—The allusion is probably made to this art by Isaiah: "And thou shalt be brought down, and shalt speak out of the ground, and thy speech shall be low out of the dust, and thy voice shall be, as of one that hath a familiar spirit, out of the ground, and thy speech shall whisper out of the dust." (Isaiah xxix. 4, b.c. 713.) It was practised by the Greeks, and probably by all ancient nations, and was held to be a supernatural gift. In modern times it is known to have been made use of to secure certain personal advantages by Louis Brabant, valet to Francis I. (A.D. 1515—1547). Baron Mengen, of Vienna, practised the art, and produced a complete illusion on his auditors, about 1770; and M. St. Gille, at Paris,
tested his own powers in the same line before the Academy of Sciences in 1771.

Venus, one of the planets known to the ancients, its occultation of Mercury having been observed by the Egyptians and in modern times, May 17, 1737. Her phases were discovered by Galileo in 1611. The application of her transits to determine the sun's distance was first pointed out by Halley, who announced those of 1761 and 1769. The disturbing influences of this planet on the orbits of the earth and the moon were investigated by Airy, and published in the Philosophical Transactions for 1832. The first observed transit was that of the close of the 16th century. The island on which the fortress stands was first visited by Juan de Grimalva A.D. 1518. Cortes landed an army in 1519, and founded a town, which was afterwards abandoned. The present town was incorporated in 1615. It was blockaded by the French in 1838, and captured by the Americans March 29, 1847.

Vercelli (Sardinia), capital of a province of the same name, the ancient Vercellae, and chief city of the Libici, in Galha Cisalpina, was the scene of an engagement between the Cimbrini and the Romans, under Marius, when the former were defeated, July 30, B.C. 101. It became a somewhat important Roman municipality, after the time of Strabo, who described it as only an unfortified village, A.D. 14. In the neighbourhood were gold mines so considerable that it was prohibited to have more than 5,000 men employed in them, a law to that effect being mentioned by Pliny in 72. Eusebius was bishop of the see in the 4th century. John Scot's book on the Eucharist was burned by a council held here Sept. 1, 1050. It joined the league of Lombardy against the emperor Frederick I. in 1175. A treaty, brought about through the mediation of the duchess of Savoy, between Venice and France, was signed at Vercei Oct. 10, 1495. The town was captured by the duke of Vendôme in 1704, and the French incorporated in the province with the Cisalpine republic in 1801. The cathedral, with a library containing one of the most ancient copies of the New Testament in Latin, said to be the work of Eusebius, was built in the 16th century.

Verde. (See Cape Verde.)

Verden (Hanover).—This place was the scene of the massacre of 3,500 Saxon rebels, by order of Charlemagne, A.D. 782. In 1715 it was ceded to the elector of Hanover by Frederick IV. of Denmark.

Verdun (France). By a treaty entered into here, a redistribution of empire was effected between the sons of Louis I. (le Débonnaire) Aug. 11, A.D. 843. Henry II. of France received it in 1552, on condition of aiding the German Protestant league, and it was ceded to France by the treaty of Westphalia, Oct. 24, 1648. The bishopric was seized by the council of Metz in 1680. The town and citadel surrendered to the Prussians Sept. 2, 1792. Fourteen beautiful young women, who had welcomed the Prussians with garlands, were sent by the French to Paris, where they were guillotined May 28, 1794. English residents and travellers in France, on the renewal of hostilities, were detained here by Napoleon I. May 22, 1803. Some English sailors detained in this manner, who lent important aid in extinguishing a fire which broke out in the town, were supplied with money by Napoleon I. out of his own purse, and sent home in 1805.

Vermont (North America), so called from its green mountains by the French, who settled here A.D. 1731. They ceded it to the English in 1763. A treaty between the United States of America and the British colonies in North America was signed in March 1775, and admitted a member of the Federal Union in 1791, and a constitution was formed in 1793.

Verneuil (Batttle).—The allied French and Scotch were completely defeated near this town, in France, by the English, under the duke of Bedford, Aug. 16, 1424.

Vernon Gallery.—In 1847 Robert Vernon presented to the nation his collection of 162 paintings by modern British artists. In 1850 they were removed from the cellars at the Royal Academy, Trafalgar Square, where they had been previously exhibited, to Marlborough House; and in 1859 they were transferred to South Kensington Museum.

Verona (Italy), under the Roman dominion, became a colony with the surname of Augusta. In its neighbourhood Marius completely overthrew the forces of the Cimbri, B.C. 101. (See Vercei.) The emperor Philip lost his life here A.D. 249. The city, walled during the reign of Gallienus, in 265, was besieged and captured by Constantine I. in 312. Odoacer was defeated by Theodoric near Verona, Sept. 27, 499. The city was captured by Charlemagne in 774. Schools were established by Lothaire I. in 829. Louis of Arles, defeated here by Berenger I., was made a prisoner, and had his eyes put out in 908. Berenger I., who had received the title of emperor from the pope, was assassinated by the inhabitants in 934. They were afterwards driven from the town, and returned in 932. The emperor Henry III. bestowed upon Guelph III. in 1047. It assumed a republican form of government in 1107, was engaged in hostilities with Padua in 1141, united in the league formed against Frederick I. with other towns of Lombardy in 1164, and submitted to Eccelino da Romano, the Ghibelline leader, in 1227. Delivered from its tyranny, it chose for its podesta Mastino della Scala in 1262. It was seized by Gian Galeazzo Visconte in 1387, and after an obstinate resistance surrendered to Francesco da Carrara in 1404. After a siege which reduced the inhabitants to a state of famine, it submitted to Venice in 1406, and delivered up its keys to the emperor Maximilian I. in 1509. Maximilian I. mortgaged it to Louis XII. for a sum of money in 1510. In 1516 it was besieged by the French, and restored to Venice by the peace of Brussel, Dec. 4, 1516. The confederate armies captured it
in 1745. The French general-in-chief established his head quarters here June 3, 1796. A complete defeat was sustained by the French in a battle with the Austrians, March 28, 29, 30, 1799. It was secured to Austria by the congress of Vienna in 1815. A European congress held here decided upon the evacuation of Paris and Naples by the Austrian troops, Dec. 14, 1822. Charles Albert, king of Sardinia, defeated the Austrians here May 6, 1848. A large portion of the amphitheatre erected by the Romans was overthrown by an earthquake in 1184.

V E R S A I L L E S (France).—A lazar-house was established at this place as early as A.D. 1350. In 1579, Alber de Gondi, archbishop of Paris, purchased an estate here, which was bought by Louis XIII. in 1632, and made the site of a royal hunting lodge. In 1661 Louis XIV. formed the project of establishing his court at Versailles, and commenced the work. The palace and gardens, which were sufficiently advanced to be occupied in 1672. In 1681 it became the royal residence. The chapel was completed in 1710, and the theatre in 1770. On the outbreak of the French revolution, the mob attacked Versailles and compelled the royal family to return to the Tuileries, Oct. 5 and 6, 1789. The national Museum was founded by Louis Philippe, and was inaugurated in 1837. The school of artillery for the Imperial Guard was established in 1836.

V E R S A I L L E S (Treaties).—The following are the most important alliances and treaties concluded at Versailles:—

A.D. 1675. April 25. An alliance between France and Sweden is concluded at Versailles.
1701. March 9. An alliance between France and Bavaria is concluded at Versailles.
1713. April 3. An alliance between France and Sweden is concluded at Versailles.
1744. June 5. An alliance is concluded between France and Prussia at Versailles.
1756. May 1. An alliance between France and Austria is concluded at Versailles.
1783. Sept. 3. Peace between Great Britain and France and Spain is concluded at Versailles. By this treaty the French recovered Pondicherry and other possessions in India, and Trincomalee was restored to the Dutch.
1784. July 19. A secret convention between France and Spain is signed at Versailles.

V E R S E .—The earliest kind of verse employed in Grecian poetry was the hexameter or dactylic metre, which was said to have been invented by the mythical Pythoness Phemone, and which remained the standard verse for epic poetry throughout the classic period. The elegiac metre, produced by using alternate hexameter and pentameter verses, originated about the beginning of the 7th century B.C. Archilochus, who flourished B.C. 688, is the reputed inventor of iambic and trochaic verse, and Alcaeus, B.C. 611, gave his name to the alcaic verse. Arion perfected the ancient dithyrambic metre, which had been previously employed in the choral songs to Bacchus about B.C. 555. Hipponax, who flourished B.C. 540, introduced a modification of the iambic verse, known as the choliambic metre, which was specially adapted for the expression of homely sentiments. The saturnian verse, the original metre of the Roman poets, was generally ascribed to an Etruscan origin. The ancient saccenitvre was introduced at a very early period in Latium, and was perverted into a vehicle for libel, in consequence of which it was prohibited by the laws of the Twelve Tables, B.C. 451. The other metres of the Romans were founded on those of the Greeks. The metres of the moderns were chiefly derived from the Latin, and the earliest example of verse in a modern language is a fragmentary poem of Shib Willi, B.C. 300, which has been referred to a.d. 1000. (See Blank, Leonine, and Macaronic Verse.)

V E R S I N S (France).—Philip II. of Spain concluded a treaty here, May 2, 1598, with Henry IV. of France, restoring all the places he had seized during the war.

V E S E R I S (Italy).—In an engagement on the banks of this river in Campania, the Romans under Manlius and Decius gained a great victory over the Latins, B.C. 340. The consul Decius, in the heat of the battle, seeing his troops waver, devoted himself to the infernal gods and rushed into the ranks of the enemy, where he fell covered with wounds. (See Vesuvius.)

V E S P E R S , or E V E N I N G S O N G .—The evening prayer of the Romish church, so named from Vesper, the evening star, is mentioned by the most ancient fathers, and was certainly celebrated in the eastern churches during the 3rd and 4th centuries.

V E S P R I M (Hungary).—The fortress at this place, seized by Soliman II. A.D. 1552, was recovered from the Turks in 1598. In 1702 it was dismantled.

V E S T A L S .—Virgin priestesses of Vesta existed in Etruria and among the Sabines before they were instituted at Rome. Classical tradition asserts that Romulus and Remus were the sons of the vestal Ilio, who was compelled to violate her oath of chastity, and suffered death by being buried alive, B.C. 770. Numa Pompilius is regarded as the founder of the order at Rome, as he instituted four virgin priestesses of Vesta (B.C. 715 to 673). Two more were added by Tarquinius Priscus (B.C. 616 to 578), or Servius Tullius (B.C. 578 to 534). The law of Numa inflicted death by stoning on vestals guilty of incontinence; but Tarquinius Priscus enforced the penalty of burying alive. The most celebrated instances of the infliction of this penalty, were those of Vestals Minucia, 337; Sextilia, 273; and Licinia, who, with several of her companions, was convicted of incest, B.C. 114. In every case the corruptor of a vestal's purity was
VESUVIUS (Battle).—The armies ofLatinum and Rome confronted each other in the plains of Campania, at the foot of Mount Vesuvius, A.C. 340. In accordance with an oracle which announced that victory should declare for whichever army first lost its generals, the plebian consul P. Calvis Mus, who, with his colleague, T. Manlius Torquatus, led the Roman legions, dashed into the Latin ranks before the commencement of the action, and was immediately slain. The superstitious of the Romans was thus enlisted on their behalf, and the energy with which they fought, joined to the good generalship of Manlius, secured them a complete victory, and materially conducd to the total subjection of the Latins, which followed soon after.

VESUVIUS (Naples).—The first recorded eruption of this celebrated volcano occurred Aug. 23, A.D. 79. It resulted in the destruction of Herculaneum and Pompeii (q.v.), and occasioned the death of about 20,000 persons including the elder Pliny. Other eruptions of less violent character occurred in 203, 472, 512, 685, 993, 1036, 1049, 1139, 1306, and 1500. An eruption which burst forth Sept. 29, 1538, resulted in the formation of Monte Nuovo. It was forced up by subterranean convulsions to a height of 413 feet in two days. A very violent eruption took place Dec. 16, 1831, and overwhelmed Torre del Greco and other villages at the foot of the mountain, besides causing the death of 18,000 persons. It was again violently active Aug. 12, 1862, when a conical projection was formed in the centre of the great crater, which was nearly filled up by a succession of small discharges in 1869. A series of violent eruptions commenced May 20, 1872, and continued till August 28, 1872, and the 2nd of August the ashes, &c., were thrown with much violence upon Naples, where they produced great consternation. A violent eruption took place May 20, 1737, and the mountain commenced pouring forth destructive torrents of lava, &c., Oct. 25, 1751, and continued active for twenty-five days, during which time the central cone sank, leaving an immense gap in its place. A terrible eruption took place from Aug. 8 to 11, 1779, and a new cone was thrown up between Oct. 12, 1784, and Dec. 20, 1785. A most violent eruption, which raged from Feb., 1793, till Midsummer, 1794, and which attained its height June 15, 1794, poured a torrent of lava through Torre del Greco, where the cathedral and several churches, with most of the houses, were destroyed. A new crater opened Sept. 4, 1809, and the mountain continued more or less active for about four years. On the 22nd of Oct., 1822, a series of violent disturbances commenced, during which the great cone fell in, and vast torrents of lava were poured over the adjacent country. The village of Capocecco was overwhelmed by an eruption in Aug., 1834. It commenced violent action Feb. 6, 1850, and remained disturbed till the end of the month, during which time a tract of nine square miles was covered by the lava. Eruptions took place from May 1 to 28, 1855; a grand one commenced May 21, 1858, and continued for some weeks, during which the crater again fell in. The mountain was again active in Aug., 1859, and a series of violent eruptions commenced Dec. 8, 1861.

VETERINARY SCIENCE.—The first school for the study of this branch of pathology was established at Lyons A.D. 1761. The Veterinary College of London was founded in 1792, and marks the introduction of the science into this country.

VIATICUM.—This term was applied to the Eucharist administered to persons at the point of death, by a canon in the first general council held at Nicaea in 325. St. Basil applied it to the rite of baptism, as constituting a provision for the journey to another world.

VIAZMA (Battle).—The Russians defeated the French at this town in Russia, a greater part of which was destroyed by fire, Oct. 22, 1812.

VIBORG, VYBOG, or WYBOG (Finland).—This city of European Russia was founded A.D. 1238 by Torkel Knutson, regent of Sweden, and became the capital of Carelia. It was besieged by the Russians in 1322, 1359, and 1496, and was taken by Peter the Great in 1710. By the peace of Nystadt, Aug. 30, 1721, Viborg was definitely ceded to Russia by the Swedes. A treaty of alliance between Sweden and Russia was concluded at this place Feb. 28, 1609. A severe naval engagement took place off the port, between the Russians and Swedes, July 3, 1790, when the latter were defeated with the loss of nine ships of the line and three frigates, besides several smaller vessels.

VICE.—This character in the Mediaeval mystery plays was originally introduced as an embodiment of vice, and is stated by Hallam (Lit. Hist., vol. i. part i. ch. viii. p. 45), to have gradually acquired a human individuality, in which he came very near to our well-known Punch. The devil was generally introduced in company with the Vice, and had to endure many blows from him." He was attired in a long jerkin, and wore a cap with ass's ears, and he was armed with a thin wooden dagger with which to belabour the devil. The Vice was especially popular about the beginning of the 16th century, and he ceased to be in fashion at the end of the century.

VICE-CHANCELLOR.—The vice-chancellor of England, a judge in equity, was first appointed by 53 Geo. III. c. 24 (March 23, 1813). By 5 & 6 Vict. c. 5 (Oct. 5, 1841), two additional vice-chancellors were created. Certain provisions of these acts were repealed by 13 & 14 Vict. c. 35, s. 29 (July 15, 1850). (See Lords Justices of Appeal.)

VICENZA (Italy), capital of a province of
Robert Stephenson and Alexander M. Ross, and was built by James Hodges for Messrs. Peto, Brasseys, & Betts. The first portion of the north abutment coffer dam was towed into its place May 24, 1854, and the first stone of the bridge was laid the following July 20. The stone piers sustained unharmed the violent movement of the ice Jan. 4, 1855, and the first train passed over the bridge Dec. 17, 1859. The formal inauguration by the prince of Wales took place Aug. 25, 1860. The total length of two feet, and of the bridge, was 9,144 feet, or nearly two miles. It stands sixty feet above the surface of the water, and is composed of 9,044 tons of iron, held together by 1,540,000 rivets. The iron-work was all completed at the Canada Works, Birkenhead. The spans of this splendid bridge are twenty-five in number, that in the middle being 330 feet.

**VICTORIA PARK (London).**—By 4 & 5 Vict. c. 27 (June 21, 1841), the commissioners of Woods and Forests were empowered to complete the Temple of York House to the duke of Sutherland for the sum of £72,000, and to lay the money out in the purchase of about 290 acres of land at Hackney for a royal park. It was opened to the public in 1845.

**VICTORIA REGIA.**—This aquatic plant, named after Queen Victoria, was discovered in the river Berbice, in Guiana, by Sir Robert Schomburgk, A.D. 1837.

**VICTORY, Nelson's flagship at Trafalgar (q.v.),** on the deck of which he received his mortal wound, and on board of which he died, Oct. 21, 1805, is kept at Portsmouth, where it is exhibited to visitors.

**VICTUALLERS.**—By 12 Edw. II. c. 6 (1318), officers of cities or boroughs were prohibited from selling wine or victuals during their time of office. The regulation of the provision-dealers of London was vested in the mayor and aldermen by 31 Edw. III. c. 10 (1357), and they were restrained from selling their goods at exorbitant prices by 13 Rich. II. stat. 1, c. 8 (1399). The prices of victuals were assessed and taxed by 3 Hen. VIII. c. 8 (1511), and the price was confined within certain limits, and the exportation of provisions without a license was prohibited by 25 Hen. VIII. c. 2 (1533). Further restrictions on the exportation were imposed by 1 & 2 Phill. & Mary, c. 5 (1554). The permanent fund of the licentiates of victuallers was founded in 1794. Their school in the Old Kent Road was instituted in 1803, and their asylum in 1827. (See ALE AND BEER, LICENSES, &c.)

**VICTUALLING OFFICE.**—The victualling office erected at Deptford, A.D. 1745, was destroyed by fire in 1749. In August, 1785, the department was removed to Towerhill, the clerks' offices being transferred to Somerset House and the workshops for the preparation of provisions to Deptford. The Royal Clarence Victualling-yard was transferred from Portsmouth to Gosport in 1838.

**VIENNA (Austria).**—This city is supposed to have been the same name, and the ancient Vicentia, or Vicetia, is first mentioned as having its limits fixed by the proconsul Sex. Attilus Saurus, B.C. 136; and afterwards as a municipal town, B.C. 43. It was plundered by Alaric A.D. 401, and wasted with fire and sword by Attila, in 452. It joined the famous Lombard league against the emperor Frederick I. in 1175; was captured by Frederick II. in 1238, and seized by Eccelino da Romano in 1256. It afterwards fell to Alberico, his brother, from whose tyranny it was delivered by Padua, and held in subjection in 1269. Alboino and Cane dalla Scala reduced it to the Ghibelline cause in 1311, and Gian Galeazzo Visconte seized it after murdering his uncle, in 1387. Ceded to Venice in 1409, it surrendered to the plenipotentiary of the emperor Maximilian I., and was retaken by the Venetians in 1509. The French captured it, and it was wrested from them by Venice in 1510. It was occupied by French troops, under General Victor, April 23, 1797. The Austrians assailed it immediately May 29, 1848; and it capitulated to Radetsky after a severe bombardment June 11, 1848.

**VICTORIA,** daughter of Edward, duke of Kent, and the princess Maria Louisa, of Saxe-Coburg, was born May 24, 1819. She succeeded to the English throne on the death of William IV., June 20, 1837; was proclaimed queen June 22; was crowned June 28, 1838; and married Prince Albert, of Saxe-Coburg and Gotha, Feb. 10, 1840. Four sons and five daughters were born of this marriage:—1. Victoria Adelaide Mary Louisa, born Nov. 21, 1840, married to Prince Frederick William of Prussia, Jan. 25, 1859. 2. Albert Edward, prince of Wales, born Nov. 9, 1841. 3. Alice Maud Mary, born April 25, 1843, married to Prince Louis, of Hesse-Darmstadt, July 1, 1862. 4. Alfred Ernest Albert, born Aug. 6, 1844. 5. Helena Augusta Victoria, born May 25, 1846. 6. Louisa Caroline Albertina, born March 18, 1848. 7. Arthur William Patrick Albert, born May 1, 1850. 8. Leopold George Duncan Albert, April 7, 1853; and, 9. Beatrice Mary Victoria Feodore, born April 14, 1857. Prince Albert died, after a short illness, at Windsor Castle, Dec. 14, 1861, and was buried Dec. 23.

**VICTORIA** (Hong-Kong) was founded by the English in August, 1841. Its bishopric was founded in 1848.

**VICTORIA CROSS** for distinguished gallantry on the part of officers or privates in the army and navy was established Feb. 5, 1856. The honour was conferred by Queen Victoria upon forty-eight military men and fourteen belonging to the royal navy, in Hyde Park, June 26, 1857. Another distribution took place on Southsea common, to men who had distinguished themselves in the Crimea and during the Indian mutiny, Aug. 2, 1858.

**VICTORIA BRIDGE** (Canada).—This magnificent iron railway tubular bridge over the St. Lawrence was designed by 579
to occupy the site of the Roman station Vindobona, which is memorable as the place where the emperor Marcus Aurelius expired, A.D. 180.

A.D.
791. Vienna is annexed to the empire of Charlemagne.
894. Vienna is made the capital of the margraviate of Austria.
1152. The modern town is founded. 1153. It is erected into a city. 1167. It is surrounded by walls. 1227. Frederick II. erects it into an imperial city. 1237. May 10. A council is held against the injustice committed by the people during the vacancy of the imperial throne. 1277. It is taken by Roldolph of Habsburg. 1336. The cathedral is founded. 1343. The university is founded. 1346. The Viennese revolt and besiege the emperor Frederick III. in his own quarter of the town.
1427. Matthias Corvinus, king of Hungary, falls in an attempt to besiege Vienna. 1433. Vienna surrenders to Matthias Corvinus. 1438. Sept. 26 to Oct. 14. The Turks, under Solomon II., besiege Vienna, and are compelled to retire by the emperor Charles V.
1518. Vienna is attacked by the Bohemians. 1533. July 14 to Sept. 12. The Turks are compelled to raise the siege of Vienna by John Sobieski, king of Poland, and Charles, duke of Lorraine.
1705. The Academy of Fine Arts is founded.
1748. The Josephine Medical Academy is founded.
1809. May 13. Vienna again surrenders to Napoleon I.
1813. March 18. The allies publish the declaration of Vienna, by which Napoleon I. is outlawed.
1830. Considerable injury is occasioned by an inundation of the Danube.
1852. May 8. Nicholas I. of Russia visits Vienna. Sept. 30. Funeral services are performed in honour of the duke of Wellington.
1857. Strangers are permitted to enter Vienna without passports.
1858. The fortifications are demolished preparatory to the extension of the city.
1860. March 5. The Reichsrath is re-established by patchwork.

VIENNA (Congress).—The first congress of Vienna was convened by the treaty of Paris, May 30, 1814, for the settlement of the affairs of Europe after the abdication of the emperor Napoleon I. The 1st of August was the day appointed for the opening of the congress; but it was afterwards resolved that the meeting should be postponed till October. The duke of Saxe-Weimar arrived at Vienna Sept. 17; the kings of Denmark and Württemberg, and the duke of Saxe-Coburg, Sept. 22; the emperor of Russia and the king of Prussia, Sept. 25; the king of Bavaria, Duke of Brunswick, Sept. 29; the elector of Hesse and the grand-duke of Baden, Oct. 2. Besides the sovereign princes, the congress was composed of plenipotentiaries from the courts of Austria (Prince Metternich and others), Spain, France (Prince Talleyrand, &c.), Great Britain (Lord Castlereagh, and afterwards the duke of Wellington, with others), Portugal, Prussia, Russia (Count Nesselrode, &c.), Sweden, Denmark, and other minor states. The first official declaration of the congress was issued Oct. 8, and announced the postponement of the formal opening till Nov. 1, when business commenced under the presidency of Prince Metternich. After the return of Napoleon I. from Elba, and the re-establishment of the monarchy of the Habeas, the Congress declared a declaration March 13, 1815, announcing that he had thereby broken all civil and social ties, and had rendered himself a political outlaw. The principal arrangements of the congress were collected in one grand act of 121 articles, which was signed by the ministers of Great Britain, Austria, France, Portugal, Prussia, Russia, and Sweden, June 9, 1815.—On the breaking out of the Russo-Turkish war, a conference of the representatives of the four great powers assembled at Vienna, for the purpose of adjusting the question peaceably, July 24, 1853. On the 31st of July the congress adopted the celebrated Vienna note. It was accepted by Russia Aug. 10, but the Turkish government demanded some alterations, Aug. 19, which were rejected by the czar Sept. 7. The result was the declaration of war by Turkey, Oct. 5. The congress addressed another note to the Porte, expressing the regret of the great powers at the war, and requesting information on the conditions on which Turkey would treat for peace, Dec. 5, and the Turkish government, in a reply dated Dec. 31, named the earliest possible evacuation of the principalities, the renewal of treaties, the maintenance of the religious privileges of all communities, and a definite regulation of the Holy Places, as the indispensable grounds of negotiation. These four points were admitted by the congress Jan. 13, 1854, and on the 16th the meeting was dissolved.—A third congress assembled March 15, 1855, composed of plenipotentiaries from Great Britain (Lord John Russell and the earl of Westmoreland), France, Austria, Turkey, and Russia (Prince Gortschakoff), and after agreeing on the questions relative to the principalities, and to the navigation of the Danube, a dispute commenced respecting the restriction of Russian power in the Black Sea, which resulted in an adjournment of the congress March 26. M. Drouyn de Lhuy and Aahi Pasha arrived at Vienna as additional ministers April 6, and negotiations were renewed April 17. Lord John Russell withdrew from Vienna April 23, in consequence of the dissatisfaction his policy had created in England, and Drouyn de Lhuy also left the congress in April 27. The congress terminated without producing any satisfactory results June 4.

VIENNA (Treaties).—The following is a list of the most important treaties that have been concluded at Vienna.

1725. A peace and an alliance are concluded at Vienna by Germany and Spain. Spain guaranteed the Pragmatic Sanction, and Germany agreed to furnish a force for restoring Gibraltar to Spain, and to endeavour to restore the Stuarts to the English throne.

1726. Aug. 6. An alliance between the emperor Charles VI. and Catharine I., empress of Russia, is concluded at Vienna.

1731. March 16. A treaty is concluded at Vienna between Great Britain, Germany, and Holland. This treaty between Great Britain guaranteed the Pragmatic Sanction. Spain acceded to it July 22.

1738. Nov. 18. A definitive peace between France and Austria is concluded at Vienna. By this treaty Lorraine is ceded to France, which agrees to the Pragmatic Sanction.

1757. Oct. 30. Maria Theresa guarantees the possession of Berg and Juliers to the Elector Palatine, by a treaty signed at Vienna.

1791. July 23. An alliance between the emperor Leopold II. and Prussia is signed at Vienna.

1809. Oct. 14. Peace between Napoleon I. and Austria is signed at Schönbrunn, an imperial palace in the suburbs of Vienna. Austria cedes Dalmatia, the Tyrol, &c., to France, and uniting with France and Russia in their prohibitory system with regard to England.

1815. March 25. Great Britain, Austria, Russia, and Prussia conclude an alliance at Vienna. May 31. A treaty is concluded between Holland on one side, and Great Britain, Austria, Prussia, and Russia on the other. The allies agree to an extension of the Dutch and Spanish galleons, and declare the lines of Orange the royal family of Holland. June 4. Denmark cedes Swedish Pomerania and Rügen to Prussia in exchange for Lauenburg, which was ceded by Sweden between the two powers at Vienna. June 8. An act vesting the administration of the German states in a general diet is signed at Vienna.

VIENNE, the Roman Vienna, a flourishing and an important town of the Albogres. The emperor Valentinian II. was murdered here May 15, A.D. 392. It was besieged by the German and French princes in 880, and surrendered to Carloman in 882. Servetus escaped from prison here, and was burned in 1531. June 17, 1553. A Roman temple still exists, which has been converted into a museum, and near the town is a pyramidal monument called Pontius Pilate’s Tomb. Councillors were held here in April, 870; in 902; Jan. 31, 1060; Sept. 16, 1112; in 1118; January, 1200; and the fifteenth general council, from Oct. 16, 1311, to May 6, 1312.

VIGO (Spain), was taken and burned by the expedition under Drake and Norris, despatched by Elizabeth to attempt to place Don Antonio on the throne of Portugal, A.D. 1579. Sir George Rooke destroyed a fleet of Spanish galleons in its harbour, capturing booty that was estimated at 6,000,000 dollars, Oct. 12, 1702. Its garrison surren-
in the cause of Henry of Navarre, was attacked here by the duke of Guise, and dispersed Oct. 27, 1587.

Vincennes (France).—Henry V. of England having fallen ill at Corbeuil, was removed to the Bois de Vincennes, where he expired, Aug. 31, 1422. In its state prison Condé was confined Jan. 16, 1650; the cardinal de Richelieu, Oct. 1652; and Mirabeau for three years and a half. The castle was attacked by a Parisian mob Feb. 28, 1791. The duke d'Enghien was shot here by order of Napoleon I., March 20, 1804. When the allies appeared before it in 1815, the governor-general Daumenil saved it by threatening to blow it up.

Vincent. (See Cape St. Vincent.)

Vincent, St. (West Indies), was discovered by Columbus A.D. 1493. Charles II. included it with the Barbadoes and several other islands under one government, in 1672; the French began to colonize the island in 1714; it was ceded to England in 1763; captured by the French, June 17, 1779; and restored to England in 1783. An insurrection of the Caribs was put down Oct. 1, 1795. Another, aided by the French republicans, terminated in the surrender of 5,000 blacks to General Carre. They were transported to the island of Rattan in November, 1796. An alarming eruption of the volcano Soufrière took place in 1812.

Vincy (Battle).—Charles Martel, son of Pepin d'Heristal, encountered the Neustrians under Raginfried at this place, near Cambrai, May 21, 717, and gained a victory which made him master of all Neustria.

Vindelecia (Germany), inhabited by a Celtic tribe, the Vindelici, was conquered by Tiberius I., and many of the people were transported into other countries, b.c. 15.

Vine and Vine Discharge.—Noah is said to have planted a vineyard, B.C. 2247 (Gen. ix. 20). It is supposed that the culture of the vine passed from Persia into Asia Minor, and thence into Greece and Southern Europe, and it is known to have been introduced into France by the Phoccean founders of Marseille, B.C. 690. It is supposed that vines were first brought to England by command of the emperor Probus, about A.D. 280, and the Venerable Bede speaks of vineyards as common objects in this country in 751. Vines were planted at Tokay, in Hungary, in the 13th century. They were introduced into Madeira about the year 1421, and were first planted at the Cape of Good Hope by the Dutch in 1650. The Catawba vine of America first attracted attention about 1826. The vine disease, Oidium Tuckeri, first appeared in an English hothouse in 1845. In 1847 it was noticed in France; and in 1851 its destructive ravages extended to Italy.

Vinegar Hill (Battle).—The Irish rebels were defeated at Vinegar Hill, Wexford, their principal camp or station, by General Lake, June 21, 1798.

Vintners' Company.—The vintners of London were incorporated by Edward III. A.D. 1365, and confirmed by Henry VI. in 1436. The site of their hall in Thames Street was granted by Sir John Stodie in 1357. The present building is of modern date.

Viol, Violin, &c.—The viol, a six-stringed fretted instrument played with a bow, existed as early as the 8th century A.D., and the violin, which differs in having only four strings, dates from the 16th century. During the Middle Ages the violin was regarded as a vulgar instrument unworthy the attention of musicians of refinement, and it was not till the Italian Baltazarini was sent as a leader of a band of violins to France, for the gratification of Catherine of Medicis, that it became fashionable. About the beginning of the 17th century it became an important instrument in concerted pieces, and the celebrated violins of the Amati family, of Cremona, were made in great quantities as early as 1620. Charles II. rendered the violin a fashionable English instrument soon after his restoration in 1660. Nicolo Paganini, the most eminent violinist of any age, was born at Genoa in 1784. He visited England in 1831, and died at Nice in 1840.

Virginia (North America) received its name from Queen Elizabeth after the return of Sir Walter Raleigh, A.D. 1584. James I. granted a patent of the southern part of the state to a London company in 1606; and the first colonists, one hundred and five in number, settled on the banks of the James river, calling the place James Town, in honour of the king, May 13, 1607. The colony met with many disasters, but was recruited by fresh emigrants, who arrived with Lord Delaware as governor June 10, 1610, and by another batch, under Sir Thomas Gates, in August, 1611. A constitution was given to the colony in July, 1621. A general slaughter of the settlers was committed March 22, 1622, by the Indians, who attempted a similar atrocity, but only partially succeeded, April 18, 1644. The first constitution was adopted for legislative purposes June 29, 1776. The importation of slaves was forbidden by the state legislature, under heavy penalties, in 1778. Its constitution was revised in 1830. Virginia seceded from the United States April 18, 1861.

Virgin Islands (Atlantic), called Las Virgenes, in honour of the virgins of the Romish ritual, by Columbus, who discovered them on his second voyage, A.D. 1494. Dutch buccaneers, who settled in Tortola in 1648, were expelled by the English in 1666. St. Thomas's was settled by the Danes in 1672. St. John's was also appropriated by the Danes, who were dispossessed of both islands by the English in 1801; they were, however, restored in 1802. This group, again captured by the English in 1807, was restored to Denmark in 1831. cholera raged the islands in 1853 and 1854. A new constitution was granted them in 1854.

Viscount.—The title, created by patent, was first conferred on John, Lord Beaumont,
accompanied with a grant of lands in France, by Henry VI., Feb. 19, 1440.

**Viseg (Portugal).**—Alfonso V. of Leon was killed while besieging this town, a.d. 1028. It was captured by Ferdinand I. of Castile in 1040.

**Visigoths, or Thervingi.**—The division of the great Gothic nation into the Eastern or Ostrogoths (q. v.), and Western, or Visigoths, took place about a.d. 330. In 365 the Visigoths assisted Procopius against the Romans. Valera permitted them to settle south of the Danube in 376, and in 382 they tendered their submission to the Romans, when Theodosius I. granted them permission to occupy Thrace. In 395 they ravaged Thessaly, under their leader Alaric, whom they elected king in 395, and in 400 they invaded Italy. They took Rome Aug. 24, 410, and established a kingdom in the south of Gaul in 412. They penetrated into Spain, and established a monarchy in that country in 419. Cloviis expelled them from France in 507, and the Moors overthrew their power in Spain in 711.

**Vitebsk, or Vittefsk (Russia).**—The Russians, to the number of 80,000, under Barclay de Tolly, retreated to this place on the left bank of the Dwina, July 25, 1812. They broke up their camp within sight of the French army, and commenced their march towards Smolensko to effect a junction with Bagrathion, July 27. The French, who had possessed it, were driven out by Wittgenstein, Nov. 7. An engagement between the troops in its neighbourhood, resulting in a loss on each side of 3,000 men, proved rather favourable to the Russians, Nov. 14, 1812.

**Viterbo (Italy), capital of a legation of the same name, supposed to occupy the site of the Panum Volturnum, where the ancient Etruscans held their confederate assemblies, is said to have been built or enclosed by Desiderius, the last of the Lombard kings (a.d. 757—774). Having maintained its independence as a free municipality, it was obliged to submit to Rome about 1200. The Romans marched against it and were ignominiously defeated by the Viterbans, led by the count of Toulon and the bishop of Winchester, in 1234. A treaty was concluded here in 1267, between Charles of Anjou and Baldwin II., who had fled to Italy after the fall of Constantinople. It was captured by Ladislaus, king of Naples, in 1413.

A defensive alliance was also formed here between Pope Leo X. and Francis I., king of France, in Oct. 1513. The town-hall was commenced in 1264, and the episcopal palace, containing the great hall, where several popes of the Middle Ages were elected, was built in the 13th century. There is at tradition that Prince Henry, son of the earl of Cornwall, was murdered at the high altar of the cathedral by Guy de Montfort, who fell at the battle of Evesham, Aug. 4, 1265. Pope Adrian IV., an Englishman, compelled the emperor Frederick I. (Barbarossa) to hold the stirrup of his mule while he dis-mounted at the piazza before the cathedral in 1155.

**Vitry (France).**—This town, formerly a place of considerable importance, was seized and burned by Louis VII. a.d. 1144, when 1,300 of the inhabitants perished from fire in a church. In expiation of this offence the king undertook the second crusade in 1146. Vitry, after having been gradually restored, was again destroyed by Charles V. in 1544, in consequence of which Francis I. founded Vitry-le-François at a little distance from the original town in 1545. The new city was seized by the allies in 1814.

**Vitoria (Spain) was so named by Sancho IV. of Navarre, to commemorate a victory over the Moors, about a.d. 1180. It was occupied by the French in 1808. A signal victory was gained here by Wellington over the French, under the command of Joseph Bonaparte and Jourdan, June 21, 1813. So complete was their rout, that of the 70,000 men who marched under the French standard, not one man remained on Spanish soil June 27.

**Vivarium.** (See Aquatint.)

**Vizier.**—'Who among you will be my vizier?' (i.e. burden-bearer) asked Mohammed among forty of his followers at the commencement of his career, a.d. 609. Among the Turks the office of grand vizier was created for Aladin, the brother of Orchan, in 1326. So precocious was their position, that three years and a half was the average tenure of 115 who had filled it down to 1883. The office of grand vizier was abolished in Turkey in 1838.

**Vladimir, or Wladimir (Russia).**—This city, founded a.d. 1158, is one of the most ancient in Russia. It was originally a place of great importance, and, until 1818, was the seat of the government, and the residence of the grand duke, but it is now sunk into insignificance.

**Vlissingen.** (See Flushing.)

**Voconian Law, abolishing the right of female inheritance, and restricting legacies to women to the sum of 100,000 sesterces, was enacted at Rome b.c. 169.**

**Voiron (Battle).—Clodomir having killed Sigismund, king of the Burgundians, was defeated and slain at this place, on the Rhone, by Gondemar, the brother of Sigismund, who was acknowledged king in his stead, a.d. 524.**

**Volcano.—Monte Nuovo, a Neapolitan volcano, was thrown up during an eruption of Vesuvius a.d. 1538. Jorullo, in Mexico, suddenly rose to a height of 1,600 feet in 1759, and has remained quiescent ever since; and the volcano of Izalco, in Central America, was thrown up Feb. 23, 1770, and has been in active conflict till the present. Graham's Island, or Ferdinanda, a volcanic island in the Mediterranean Sea, was heaved up from a depth of 100 fathoms to a height of 230 feet above the water, July 31, 1851, and remained visible for three months, when it again sank below the surface.** (See AINSA, HECLA, and VESUVIUS.)
Volsci, a branch of the same family as the Umbrians and Oscans, inhabiting a portion of ancient Latium, first appear in Roman history as a numerous and warlike people, whose capital city, Suessa Pometia, was captured by Tarquin II. The spoils taken from it were employed to build the Capitol. An army sent by them to besiege Rome was completely routed. The consul Virginius and Coriolanus defeated them in different engagements, B.C. 487. Coriolanus is said to have found refuge with them after his banishment from Rome, and to have led them against the Romans, who were compelled to sue for peace, as the city was about to be invested by his victorious troops, B.C. 490. Having leagues with the Eequi, both nations were defeated by the Romans, B.C. 431. Camillus routed them and took their capital, B.C. 388; and again at Satrium he took their camp by storm and captured a great number of prisoners, B.C. 381. A coalition of the Volsci and the Latins was subdued by the Romans B.C. 377. Valerius Corvus defeated them, storming and burning the town of Satrium, B.C. 166. The whole of the Volscian people having submitted to Rome, received the privilege of citizens before B.C. 304.

Volscians, or Volscians, an ancient Etrurian people, who made an incursion into Roman territory during a famine, B.C. 391. They were beaten, and lost five thousand in prisoners, and were finally subjugated by the Romans B.C. 290. The conquerors razed their town, and compelled the remaining inhabitants to migrate to another spot.

Voltaic Pile, Voltaic Electricity, or Galvanism (q.v.), was first erected into a science in consequence of Alessandro Volta's publication of the contact theory of galvanism, A.D. 1783. The pile was first constructed by Volta in 1800, and has undergone numerous improvements by Grove, Bunsen, and other men of science.

Volterra (Italy), on the site of Volterrae, one of the most ancient of the Etruscan cities, offered a brave resistance to the consul L. Scipio B.C. 298. It was afterwards admitted as a dependent ally of Rome, and furnished supplies for the fleet of Scipio in the second Punic war, B.C. 205. It opened its gates to Sylla after a two years' blockade, B.C. 88. Upon the fall of the empire, it passed successively under the power of the Vandals and the Lombards. The latter were driven out by Charlemagne in the 8th century. Its palace was constructed in the 10th century. The town-hall, with its museum of Etruscan remains, the most valuable in Italy, was built A.D. 1206-1257. The cathedral was built about 1254. The citadel was converted into a house of correction in 1818. A bed of alum discovered near the city was claimed by the Florentine government in 1472.

Voltri (Italy) was occupied by the allied Austrian and Sardinian forces A.D. 1795. A series of combats between them and the French, extending over fifteen days, took place in its neighbourhood in the month of April. Both sides suffered severe loss. The French, under Massena, sustained a complete defeat here from the Austrians, commanded by Melas, April 18, 1800.

Volunteers.—The oldest volunteer corps connected with the British army is the Honourable Artillery Company, which was first raised A.D. 1586, and restored in 1610.

A.D.
1778. Volunteer regiments for service in the American war are enrolled in some of the chief English cities.
1779. Oct. 12. A regiment of Irish volunteers under the earl of Leinster, musters 20,000 strong at Dublin to support the parliament in demand of bread.
1782. The earl of Shelburne proposes the formation of volunteer corps as a protection against French invasion.
1794. March. Volunteer corps are raised in England in consequence of an anticipated invasion by the French revolutionaries.
1804. June 5. The volunteer system is regulated by 44 Geo. III. c. 54.
1812. March 26. The Krater and South Devon Volunteer Rifle Battalion is formed.
1853. Aug. 3. The Victoria Rifles are enrolled.
1859. May 12. The Secretary of War publishes a circular announcing the intended establishment of volunteer rifle corps under the provisions of the act of 1803. June. Rifle corps are formed throughout the United Kingdom. Aug. 10. Rules for the government of rifle corps are in action. June 12. A committee of volunteers, formed by a committee of volunteers, are issued by the War Office. Nov. The National Rifle Association is formed at London under the presidency of Sir Sidney (afterwards Lord) Herbert, secretary for war, and with the Queen and Prince Albert for its patrons.
1861. Feb. 16. Lord Herbert of Lea resigns the presidency of the National Rifle Association. April 10. Easter Monday. Volunteers are inspected. July 4 to 14. The second meeting of the National Association takes place at Wimbledon, when the Queen's cup, worth £250, is won by Mr. Jopling, of the South Middlesex corps.
1862. April 21 (Easter Monday). Lord Clyde reviews about 20,000 volunteers at Brighton. July. The third meeting of the National Rifle Association is held at Wimbledon.
VOS

VOSSEM (Treaty).—A peace was concluded between France and the elector of Brandenburg at this town of Brabant, June 6, 1673.

VOUGLÉ (Battle).—Alaric II., king of the Visigoths, was defeated and slain by Clovis, king of the Franks, at this place, near Poitiers, in France, A.D. 507.

VOYAGES. (See Circumnavigation, &c.) VULGATE, the name of the Latin translation of the Bible sanctioned by the Romish church, was commenced by St. Jerome about A.D. 355. The Gospels were completed in 387, and the Old Testament about 405. The first printed edition of the Vulgate was that of Guttenberg, published at Mentz in 1462, and an attempt to restore the text to the state in which it was left by Jerome was made by Robert Stephens in 1528. The council of Trent declared the Vulgate authentic, April 8, 1546, and in 1589 an edition was printed at the Vatican, and sanctioned by a bull of Pope Sixtus V. This edition was superseded by another, which was printed by order of Clement VIII. in 1592, and this is the version still used by Roman Catholics.

W.

WAAL (Holland).—The French defeated the advanced posts of the English army on the banks of this river, Oct. 19, 1794, and were in turn defeated here by the English and Dutch towards the end of the same month. It was crossed by the French on the ice, to make a winter campaign in Holland, towards the end of December, 1794. A skirmish between the English, under Wellington, and the French, took place here Jan. 15, 1795.

WADHAM COLLEGE (Oxford) was founded by Nicholas Wadham and Dorothy his wife, A.D. 1613, for a warden, fifteen fellows, fifteen scholars, two chaplains, and two clerks. Dr. Humphrey Hody founded ten exhibitions—four for the study of Hebrew, and six for the study of Greek—in 1706. Richard Warner bequeathed an exhibition for the study of botany in 1775. John Goodridge left lands, &c., to the value of £60 a year to the college, Nov. 25, 1654; and Lord Wyndham bequeathed £2,000 in 1745. Its greatest benefactor was the Rev. John Wills, who, in 1806, bequeathed £90 a year for a law exhibition to a fellow, £18 a year for a law exhibition to a scholar, £90 a year for a medical exhibition to a fellow, and £18 a year for a medical exhibition to a scholar, besides bequests to a fund for the purchase of livings. The chapel was consecrated April 29, 1613. The altar was paved with black and white marble in 1677, and the rest of the chapel in 1678. An additional building was erected on the south side of the college in 1694.

WAFFER.—The bread used in the Eucharist by the Lutherans and Roman Catholics is called a wafer. It is in the shape of a denarius, or penny, to represent, according to some, the money for which Jesus was betrayed; and its use was first introduced in the 11th century. Bernoldus, in his "De Ordine Romano," written in 1089, condemns the substitution of the wafer for bread.

WAFFERS.—The oldest seal with red wafers, according to Beckmann, is dated A.D. 1624. A writer in Notes and Queries (ix. 410) mentions a letter, dated April, 1607, in his possession, sealed with a red wafer. Wafers were only used by private persons in the 17th century. Their use on public seals commenced in the 18th century.

WAGER OF BATTLE. (See Assize of Battle.)

WAGES.—The earliest attempts to regulate the price of labour in this country arose in consequence of the depopulation occasioned, A.D. 1346 and the following years, by the plague, which reduced the number of the working class to such an extent that the supply of labour proved inadequate to the demand, and an immediate rise of wages was the result. The consequence was, the passing of the Statute of Labourers, 25 Edw. III. stat. 1 (1350), which limited the rate of wages. Further regulations were imposed by 13 Rich. II. c. 8 (1388), 25 Hen. VI. c. 12 (1444), and 11 Hen. VII. c. 22 (1496). These statutes were amended by 5 Eliz. c. 4 (1562), and 1 James I. c. 6 (1604), which entrusted the decision of disputes respecting wages, to justices, sheriffs, mayors, &c. This jurisdiction was abolished by 53 Geo. III. c. 40 (April 15, 1813). By 1 & 2 Will. IV. c. 37 (Oct. 15, 1831), numerous statutes prohibiting the payment of wages in goods were repealed, and by 12 & 13 Vict. c. 106 (Aug. 1, 1849), clerks and servants of bankrupts are entitled to at least one quarter's wages in full, provided the amount does not exceed £50. The following table, extracted from Tooke's "History of Prices," vi. 350, exhibits the average daily wages of agricultural labourers in England during the periods stated:

<table>

(See Labourers, &c.)

WAGGONS.—Pharaoh sent waggons to convey Jacob and his family from Canaan to Egypt, r.c. 1706 (Gen. xlv. 19), and some rude vehicle existed among all the nations of antiquity, and was employed for agricultural purposes during the Middle Ages. Long waggons, for the conveyance of passengers and goods from London to some of the principal provincial towns, were started in 1605, but did not meet with much success. They were supplanted by waggon-coaches, which continued to be the chief means of conveyance until the establishment of stage-coaches (q. v.). Waggoners, or common carriers, were regulated by 3 Will. & Mary, c. 12
(1691), which was amended by 21 Geo. II. c. 23 (1748).

**Wagram, (Battle.)** fought at this village, near Vienna, between the French, under Napoleon I., and the Austrians, under the Archduke Charles, July 6, 1809. The former were victorious. This led to the peace of Schönbrunn (q. v.), and the marriage of Napoleon I. with the Archduchess Maria Louisa.

**Wahabees, a Mohammedan reforming sect, originated by Abul Wahab, in Arabia, about A.D. 1748. They made a successful campaign against Ghaleb, the grand sheik of Mecca, in 1792 and 1793; repelled an attack by Soliman, pasha of Bagdad, in 1797; and totally destroyed a Turkish army sent against them in 1801. They took Mecca in 1803, and Medina the same year; conquered the greater part of Arabia, and overran Syria. Mohammed Ali sent an army against them in 1818, but the Egyptians took that town in the same year. The Wahabees, defeated at Zohran, were victorious at Brissel, in 1815, when a peace was concluded. Ibrahim Pasha made war upon them in 1816, and, after an obstinate resistance, drove them into Derayeh in 1818, which he took in December of the same year, and sent Abdullah, their chief, and several of his family, to Constantinople, where they were beheaded. The greater part of the territories conquered by the Wahabees fell under the authority of Mohammed Ali; but they gave him much trouble, by fomenting insurrections, in 1827, 1834, 1858, and 1839.

**Wahlstatt (Battles).**—This Prussian village was the scene of a great victory gained by the duke of Silesia over the Mongol Tartars, A.D. 1241. Blucher defeated the French at the same place, Aug. 26, 1813, and received, in consequence, the title of Prince of Wahlstatt. The latter battle is frequently spoken of as the battle of Katzbach (q. v.), from a small stream that runs through the plain in which it was fought.

**Waistcoat.**—This term originally signified an under-garment, reaching to the waist. The waistcoat afterwards became the principal male garment, and superseded the doublet; but in the 17th century it resumed its original meaning, and acquired the same character which it still possesses. Pepys, in 1663, mentions seeing the queen in a white laced waistcoat. During the reign of Charles II. gentlemen wore waistcoats reaching to the knees, and this fashion continued till about 1772, when the members of the Macaroni club (q. v.) introduced short waistcoats.

**Wattzen (Hungary).**—The Hungarian insurgents took this town by storm April 9, 1849, and repulsed the Russians with great slaughter July 15. They were defeated the next day by the Russians, who entered the town.

**Wakefield (Yorkshire).** supposed to have existed in the time of the Romans, formed part of the royal demesne in the reign of Edward the Confessor. The manor was granted by Henry I., about A.D. 1107, to William, Earl Warren in whose family it remained till the middle of the 14th century, when it reverted to the crown. It was granted to the earl of Holland by Charles I., and was purchased by the duke of Leeds in 1700. A sanguinary battle was fought here Dec. 30, 1460, between the Lancastrians and the Yorkists, in which the latter were defeated, and Richard, duke of York, father of Edward IV., was slain. The Royalists were defeated here by Fairfax May 21, 1643. The parish church of All Saints was built in the reign of Henry III. The font bears the initials of Charles II., and the date is 1611. The bridge was built in the reign of Edward III. The Free Grammar school was founded by Queen Elizabeth in 1592. The Green-coat school was established in 1707. The church of St. John was built in the reign of Charles I. in 1615. The Court-house was erected in 1606, a corn-exchange in 1823, and a more commodious building in 1837. The Literary and Philosophical Society was founded in 1827; the Proprietary school was opened in 1834; and Trinity church was built in 1840.

**Walcheren Expedition.**—This expedition, for checking the growing influence of Napoleon I. in Holland, and preventing the consequent injury apprehended to English commerce, consisted of 30,000 men, under the command of Lord Chatham, brother of the great William Pitt. Lord Chatham received his instructions July 16, 1809. The expedition sailed from England, in a fleet of thirty-seven ships of the line and twenty-three frigates, besides numerous smaller vessels. July 28, 1809, and landed in Walcheren, the principal island of the Dutch province of Zeeland, July 30. Middleburg, the chief town of the island, and Goes, the capital of South Beveland, were immediately occupied, and Balitz was evacuated by the French Aug. 2, and seized the following day. Instead of proceeding to capture Antwerp, which was the grand object of the expedition, Lord Chatham next invested Flushing, which surrendered, after a vigorous bombardment, Aug. 16. In the mean time, however, the French forces had assembled around Antwerp; and as the marsh fever of the Low Countries began to appear among the English troops, it was decided, in the beginning of September, to withdraw into the island of Walcheren. As the mortality continued on the increase, orders were issued for the evacuation of the island Nov. 23; and before Christmas the entire force had embarked. The total number of deaths during the occupation amounted to 7,000, and the sick sent home at various times to 12,863. Considerable indignation having been felt at the failure of the expedition, a select committee of inquiry was nominated by the House of Commons Feb. 6, 1810. After a long adjourned debate, a majority of forty-eight declared in favour of the ministerial policy March 30.
WALDECK (Germany).—This small principality was created A.D. 1682. Its first prince was George Frederick, a celebrated imperial general, who was born in 1620, and died in 1692. Prince Christian Augustus, born in 1744, signalized himself in the wars against the French during the Revolution, and is said to have originated the plan of the successful attack on the French lines of Weissenburg, in Alsace, Oct. 13, 1793. The prince of Waldeck granted a constitution to his subjects in August, 1852.

WALDESIANS. (See WALDESIANS.)

Wales, the ancient Cambria, or Britannia Septentrionalis, or Secunda, was a distinct principality before the invasion of Caesar, and maintained its independence throughout the Roman, Saxon, and Danish invasions. The modern Welsh are said to be descendants of the ancient Britons, who fled to the fastnesses of Wales in order to escape from the Saxon tyrants.

A.D.
65. Suetonius Paulinus invades Wales.
66. Christianity is said to have been first preached in Wales about this year.
61. Paulinus takes Mona, or Anglesey (q.v.).
75. Julius Frontinus conquers the Silures, inhabitants of Monmouthshire and the adjacent country.
78. Julius Agricola invades Wales and takes Mona.
429. The Welsh Britons, under St. Germanus, defeat the Saxons at Mae-Garmon. (See HALLELUJAH.)
443. Caswallon establishes an independent monarchy in North Wales.
445. The Britons are driven into the mountainous regions of Wales by the Picts and Scots.
517. Arthur is elected king of the Britons in Wales, and commences war against the Saxons.
542. Arthur is slain at Camelford (q.v.).
560. Maelgwyn, king of North Wales, is acknowledged sovereign by the minor princes of the country.
603. Ethelfrith, king of Bernicia, invades Wales and massacres the monks of Bangor-Iscoed (q.v.).
607. St. David dies in Wales.
610. Tewdric, a Welsh chieftain, defeats Cadwulp, king of Wessex.
676. Cadwallader is elected king of the Welsh by the natives.
688. Cadwallader retires into Armorica, or Brittany.
703. Death of Cadwallader, whose throne is contested by his infant son Edwal, and Ivor, son of the king of Armorica.
776. The inhabitants of South Wales invade Mercia.
799. Offa, king of Mercia, constructs a dyke and turns his forces against the inhabitants and those of the Welsh. (See OFFA'S DYKE.)
833. The western parts of Wales are devastated by Egbert.
833. The Danes land in Wales and conclude an alliance with the inhabitants against the Saxons.
846. The Mercian prince Berthred ravages North Wales.
873. The Danes invade South Wales.
877. On the death of Roderick the Great, Wales is divided into the three principalities of North Wales, or Gwynedd, South Wales, or Deheubarth, and Powys.
885. Wales is ravaged by the Danes.
900. On the death of Mervyn, prince of Powys, his kingdom is annexed to South Wales.
913. The Irish invade North Wales.
915. The Danes again invade Wales.
836

A.D.
933. Athelstan invades Wales and exacts a heavy annual tribute.
940. Wales is reunited into one kingdom by Howel Dha the Good, the great lawyer.
948. On the death it is again divided by his sons, who commence a civil war.
952. The sons of Edval Vael defeat the sons of Howel Dha in the great battle of Llanrwst.
961. Edval invades North Wales.
965. North Wales is devastated by the Danes.
973. Edgar again ravages Wales.
981. Einion, son of Owen, king of South Wales, defeats the Danes in a great battle at Llancarfan.
984. Howel, king of North Wales, invades England and falls in battle.
990. Edwin, son of Einion, invades South Wales.
997. Wales is aged by the Danes.
1003. Edan ap Eligoreg usurps the sovereignty of North Wales.
1015. Llewelyn ap Seisyllt invades North Wales, defeats and slays Edwin, and annexes his kingdom to South Wales.
1020. Rhun, a Scot of low birth, usurps the throne of South Wales, and is vigorously supported by the inhabitants. He is defeated and slain by Llewelyn.
1021. Llewelyn is assassinated by the sons of Edwin.
1073. Llado, king of North Wales, is defeated and slain by Gryfydh, son of Llewelyn, who ascends the throne and gains a victory over an invading army of English and Danes at Crickhowell, on the Severn.
1083. Gryfydh defeats Howel, king of South Wales, in a great battle fought at Pencadaer, in Caernarvonshire.
1084. Howel, prince of South Wales, is defeated and slain by Gryfydh, king of North Wales, on the banks of the Towy.
1095. Harold, son of Earl Godwin, invades North Wales.
1096. It is again ravaged by Harold and his brother Tostig, who compel Gryfydh to leave the country for a time, and exact a tribute from the people.
1079. William I. of England invades Wales, and compels the native princes to take the oath of fealty.
1079. Rhys ap Edwr, king of South Wales, defeats a rebellion of the sons of Eldydd ap Cynwyn, in the battle of Lhechryd, in Radnorshire.
1088. The Welsh rebel against William II.
1091. Wales is invaded by an English army under Robert Fitzhammon, who defeats and slays Rhys ap Tewdwr near Brecknock.
1094. The English inhabitants of South Wales are by the natives.
1095. Wales is invaded by a large army under the earls of Chester and Shrewsbury.
1101. Henry I. invades Wales, and crushes a conspiracy of the native princes.
1105. Owen, son of Cadwgan ap Eledyn, king of Powys, forcibly abducts Nest, the wife of Gerald, governor of Pembroke Castle.
1109. Stephen, great-uncle of Strigill, seizes Cardigan.
1112. Henry I. establishes a colony of Flemings in South Wales.
1114. Wales is unsuccessfully invaded by a formidable army under Henry I. of England, Alexander I. of Scotland, and the earl of Pembroke.
1121. Henry I. again invades Wales.
1125. On the death of Henry I. a formidable revolt breaks out under Owen Gwynedd and his brother Cadwallader.
1136. Ranulph, earl of Chester, invades Wales, and maintains a severe defeat from the rebels.
1150. The earl of Chester is again defeated in an attempted invasion of Wales.
1155. After the death of Stephen, the Flemish mercenaries, who formed part of his army, settle in Wales.
A.D.

1187. Henry II invades North Wales with an immense army, and compels Owen Gwynedd to do homage.

1190. On the death of Madoc, prince of Powys, his kingdom is divided into minor principalities.

1193. Henry II invades South Wales, and exacts homage from Rhys ap Gryfydd.

1194. Rhys ap Gryfydd rebels, and is joined by all the native Welsh princes.

1196. Death of Owen Gwynedd, prince of North Wales; his son is succeeded by his son David. Another son, Madoc, embarks with a few ships, and is asserted by some to have reached America.

1217. Dissolution of the Welsh confederacy against Henry II, who makes a friendly progress through South Wales.

1217. William de Bruce, lord of Brecknock, massacres a large number of the Welsh nobility at Aberavon Castle.

1218. The children of the slain lords, having arrived at years of maturity, sack Aberavon and Monmouth castles, and murder their English garrisons.

1219. Rhys ap Gryfydd rebels against Richard I.

1220. On the death of Rhys ap Gryfydd, King of South Wales, his kingdom becomes extinct, though nominally governed by his descendants.

1222. A treaty of peace is concluded between King Henry and Prince David.

1224. King John gives his natural daughter in marriage to Llewelyn ap Iorwerth, prince of North Wales.

1221. John invades North Wales, and compels his son-in-law to surrender all his inland territories, and to pay heavy tribute.

1224. Llewelyn organizes a powerful confederacy against John, and seizes the English castles in Wales.

1225. The English barons form an alliance with the Welsh princes.

1226. Llewelyn does homage to Henry III at Gloucester.

1229. The Welsh Flemings revolt.

1230. Llewelyn ravages the English possessions in South Wales.

1232. Henry III invades Wales without success.

1233. William, earl of Pembroke, and other English lords, rebel against Henry III, and conclude an alliance with Llewelyn.

1234. He is made prisoner by the English.

1240. Death of Llewelyn ap Iorwerth, surnamed the Great.

1244. His successor, David, rebels against Henry III, and invades the English frontier.

1245. Aug. Henry III invades Wales at the head of a powerful army.

1255. A confederacy of Welsh princes against the English is headed by Llewelyn ap Gryfydd, who recovers the inland territories of North Wales.

1256. Llewelyn defeats a large English army in a great battle at Dinefwr.

A.D.

1293. June 21. Prince David, brother of the late king, is captured by the English. Sept. 20. He is condemned as a traitor, and is afterwards executed with shocking barbarity.

1294. April 25. Edward's eldest son is born in Caernarvon Castle, and receives the title of prince of Wales and the homage of the native Welsh. The statutes of Rhuddlan (12 Edw. 1. c. 5), for the government of Wales, are enacted.

1297. Rhys ap Meredyd rebels against Edward I. He is made prisoner and executed.

1298. A dangerous insurrection breaks out under Madoc, a natural son of Llewelyn, who is defeated and imprisoned in the Tower.

1315. Another rebellion is suppressed.

1354. By 25 Edw. III. c. 2, the Marches of Wales are annexed to the English crown.

1400. Owen Glendower, or Glendour, rebels in Wales, assumes the royal dignity, and is joined by Lord Glynrig and Edmund Mortimer, earl of March. Sept. 20. He burns the town of Ruthyn. Nov. 30. Henry IV offers pardon to the Welsh.

1401. Henry IV invades Wales, and compels Owen to retreat to the mountains.

1403. Glendower assists the Percys in their rebellion.

1405. A French force of 12,000 men lands in Wales to assist Glendower; but on the approach of the king they re-embark.

1406. Glendower is again in open rebellion with the earl of Northumberland.

1435. By 27 Henry VIII. c. 26, Wales is united to England, English laws are ordered to be used, and a commission is appointed for dividing the provinces into counties.

1453. Wales is divided into twelve counties by 34 & 35 Henry VIII. c. 26.

1530. June 23. The separate jurisdiction of the Welsh courts is abolished by 11 Geo. IV. & 1 Will. IV. c. 70.

1843. Wales is disturbed by Rebecca riots (q. v.).

WALLACHIA.—This edifice, which derives its name from the Hall of Woden, the paradise of the Scandinavian mythology, was built by Louis Charles, king of Bavaria, upon a hill on the north bank of the Danube, near Ratisbon, for the reception of the statues and memorials of the great men of Germany. Commenced Oct. 18, 1830, it was finished and solemnly inaugurated Oct. 18, 1842.

WALLACHIA (Europe) formed part of the kingdom of Dacia, when it was conquered and colonized by the Roman emperor Trajan, A.D. 106. The Wallachians are supposed by some to be the descendants of these colonists. They were, however, recalled from Dacia when that kingdom was ceded to the Goths by the emperor Aurelian, in 270. This name belonged to some people in Thrace, Macedonia, and Thessaly, in the 9th century, a portion of whom settled north of the Danube in the 12th century. The inhabitants of Dacia were nearly exterminated by the Mongols in the 13th century; and, after they had withdrawn, the Wallachians and other foreign colonists settled in Wallachia, and were governed by their own princes, who were called waiwodes, or despots. The kings of Hungary compelled them to pay tribute in the 14th century. The Turks greatly harassed them in 1391 and 1394, devastated the whole country in 1415, and obliged them to pay an annual tribute. They put themselves under the protection of the emperor of Germany in 1605, but were again resigned to Turkish dominion by the treaty of Carlowitz, Jan. 26, 1699. The country suffered from civil war and the plague in the beginning of the 17th century, and the western part was ceded to the empire by the treaty of Passarowitz, July 21, 1718: he lost it again in 1739. Turkey covenanted with Russia not to remove the waïwode for the space of seven years, by the treaty of Jassy, Jan. 9, 1792; and further stipulated not to do so without the consent of Russia, September 24, 1802. Through French influence, the sultan deprecated the waïwode, without the knowledge of Russia, Aug. 30, 1807, and, in consequence, a Russian army entered Wallachia, defeated the Turks, and occupied Bukarest in Dec. 1807. They remained in the country until it was formally annexed to Russia by an imperial ukase, Jan. 21, 1810. It was restored to Turkey by the peace of Bucharest, May 28, 1812. The principalities of Wallachia and Moldavia were united, with the privilege of self-government, under the suzerainty of the sultan, by a convention signed by the principal European powers at Paris, Aug. 19, 1853.

WALLER'S PLOT, contrived by Edmund Waller, the poet, to deliver London into the power of Charles I., was discovered May 31, 1648. His principal confederates, Tomkins, his brother-in-law, and the wealthy citizen, were hanged, July 5, 1643, but Waller escaped with banishment and a fine of £10,000.

WALLINGFORD (Berkshire), supposed to have existed in the time of the Romans, was taken and burned by the Danes A.D. 1006. In Doomsday Book it is called Walingefore, and is described as a borough with 276 houses. William I. received the homage of Archbishop Stigand and the principal nobles here in 1068. A strong castle was built in 1067, which was held for the empress Maud in the civil war with Stephen, who unsuccessfully besieged it several times. It was taken by the Parliamentarians in 1646, and the castle was completely demolished in 1653. Wallingford received its first charter in the reign of Henry I., and has returned two members to parliament since 1294. A Benedictine priory, founded here in the reign of William I., was suppressed in 1535. St. Leonard's church, much damaged in the siege of 1646, was afterwards rebuilt. St. Peter's, also ruined in the same siege, was rebuilt in 1799, and the tower was erected in 1777. The free school was founded in 1699, the almshouses in 1651, and a school for 20 boys and 30 girls was established in 1819.

WALLIS'S VOYAGE.—Captain Wallis sailed from Plymouth in the Dolphin, Aug. 22, 1766. He visited Tahiti, which he named King George's Island, June 19, 1767; reached Batavia Nov. 30, the Cape of Good Hope Feb. 4, 1768, and returned to the Downs May 20, 1768; having accomplished the circumnavigation of the globe in one year and nine months.

WALLOWS, the name given to the ancient Celtic inhabitants of Pandurers, and also to the Flemish refugees who settled in England in consequence of the persecutions of the duke of Alva, A.D. 1567. A Wallow church was established in Threadneedle Street, London, in the building of the hospital of St. Anthony, erected in 1321. This building was destroyed in the great fire of 1666, and the Wallow erected their present church.
About fifty Walloons who wrought and dyed fine woollen cloths were brought over to instruct the English in their manufacture, May 4, 1668.

WALLS.—The great wall in Egypt to prevent the incursions of the Syrians and Arabs was built by Sesostris. The ancient cities of Greece were surrounded by massive walls in the time of Homer, b.c. 962. The great wall of China was completed about b.c. 211; Caesar’s wall between Geneva and Mount Jura, b.c. 58; and the long wall of Constantinople, a.d. 507. (See Roman Walls.)

WALNUT-TREE was cultivated in Europe by the Romans before b.c. 37. The black walnut-tree was introduced into England from North America before a.d. 1629.

WALPOLE ADMINISTRATIONS.—Robert Walpole was appointed first lord of the treasury and chancellor of the exchequer, Oct. 10, 1715. The other members of the ministry remained the same as in the Halifax and Carlisle administrations (q.v.), the earl of Lincoln being appointed paymaster-general in place of Mr. Walpole, Oct. 17, and Joseph Addison one of the commissioners for trade and plantations, Dec. 15, 1715. The earl of Nottingham, president of the council, resigned Feb. 28, 1716. The duke of Argyll was removed from all his offices June 30; the duke of Devonshire was appointed president of the council July 6; Lord Townshend resigned Dec. 11; and the duke of Kingston vacated Lord General, in place of the earl of Sunderland, Dec. 14, 1716. This administration was dissolved April 10, 1717. (See Stanhope, or German Administration.) Walpole’s second administration was formed April 4, 1721. It was thus constituted:

First Lord of the Treasury and Chancellor of the Exchequer Sir Robert Walpole, afterwards earl of Orford.

Lord Chancellor Lord Parker.

President of the Council Lord Colton.

Privy Seal Duke of Kingston.

Principal Secretaries of State Viscount Townshend and Lord Admixture Earl of Berkeley.

Secretary at War Mr. Treby.

Ordinance Duke of Marlborough.

Lord Parker, created earl of Maclesfield, resigned the lord-chancellorship Jan. 4, 1725, and his office was filled by Lord King, June 1. He resigned in November, 1723, and was succeeded, Nov. 29, by Lord Talbot, who died in February, 1737, and Lord Hardwicke was appointed Feb. 21. The duke of Devonshire, who succeeded Lord Colton as president of the council, March 27, 1725, was followed by Lord Trevor, May 8, 1730, and he was succeeded by the earl of Wilmington, Dec. 31, 1730. Lord Trevor became privy seal March 11, 1728, and was succeeded by the earl of Wilmington, May 8, 1730. The duke of Devonshire took the office June 12, 1731; Viscount Lowsdale, May 5, 1735; and Lord Hervey, April 7, 1740. Lord Carteret was succeeded as one of the principal secretaries of state, by the duke of Newcastle, April 14, 1734; and Viscount Townshend was replaced by Lord Harrington, June 27, 1730. The earl of Berkeley was succeeded at the Admiralty, Aug. 2, 1727, by Viscount Torrington, who was succeeded by Sir Charles Wager, Jan. 25, 1733. The office of secretary at war was filled by Mr. Henry Pelham, from April 1, 1724; by Sir W. Strickland, Bart., from Jan. 11, 1730; and by Sir W. Yonge, Bart., from May 9, 1735. The earl of Cadogan succeeded the duke of Marlborough at the Ordnance, July 1, 1722. He was replaced by the duke of Argyll July 1, 1725; and the duke of Montagu took the office July 1, 1740. Sir Robert Walpole resigned Feb. 3, 1742, and was created earl of Orford Feb. 6. (See WILMINGTON ADMINISTRATION.)

WALTHAM ABBEY, or HOLY CROSS (Essex), originally founded in the reign of Canute, derives its name from the celebrated abbey founded by Harold, son of Earl Godwin, a.d. 1062. This abbey had a yearly revenue of £1,079. 12s. 1d. when it was surrendered to Henry VIII., March 23, 1540. There are few remains of the abbey left. The church, formerly the nave of the church of the monastery, has an embattled tower bearing the date of 1558. The government gunpowder-mills were established at Waltham Abbey in 1767.

WALTZ.—This dance, of German origin, was introduced into England a.d. 1813.

WANDERWASH (Hindostan).—This town in the Carnatic was attacked by the English without success in Sept. 1715, and was taken by Colonel Coote after a siege of three days, Nov. 29. M. Lally afterwards made considerable efforts to take it, and a great battle was fought between his French force and the English army under Coote, July 22, 1760. The English forces comprised 1,700 Europeans and 3,000 sepoys, and the French, 2,200 Europeans and 10,000 sepoys; but, in spite of their superior numbers, the French sustained a severe defeat, and were compelled to retreat to Pondicherry.

WANDSWORTH (Surrey) is called Wandelforde and Wendeforde in Domesday Book (1086). All Saints Church was restored in 1790. A bridge over the Wandle, built by order of Queen Elizabeth in July, 1602, was rebuilt in 1757. The first tithes of Wandlebury was formed here in 1572. (See NONCONFORMISTS.) Garrett, a hamlet within this parish, was formerly the scene of a mock election on the meeting of every new parliament. This was made famous by Foote’s play of “The Mayor of Garrett” (1763).

WANTAGE (Berkshire).—This town is celebrated as the birthplace of Alfred the Great, Oct. 25, 849. The 1000th anniversary of this event was celebrated here by a public banquet Oct. 25, 1849.

WARBECK’S INSURRECTION.—Perkin Warbeck, said to have been the son of John Osbeck, or Obeck, a converted Jew of Tour- nay, was a godson of Edward IV., and a young man of great personal attractions and good manners. He was instructed by Margaret,
dowager duchess of Burgundy, and sister of Edward IV., to pass himself off as the young duke of York, who was supposed to have been murdered in the Tower by Richard III. She first sent him to Portugal, where he remained for a year; but on the commencement of war between France and England, A.D. 1492, she despatched him to Ireland, where he was received with welcome by the inhabitants of Cork. Charles VIII. of France next invited him to his court, and received him as the young duke and the rightful heir to the English crown; but whom people became probable he dismissed him, Nov. 3. Perkin repaired to Flanders, where his cause was openly espoused by the dowager Margaret, who acknowledged him as her nephew, and gave him the cognomen of the White Rose of England. News of this arrived in England in the early part of 1493, and was eagerly believed by many who were discontented with the avaricious government of Henry VII., and a conspiracy in favour of Perkin was formed by the lord chamberlain, Sir William Stale, Sir Robert Clifford, and others. Henry VII. sent spies into Flanders, who obtained a knowledge of Warbeck's antecedents, and by dint of bribes he induced Clifford to betray his companions and to reveal all he knew of the conspiracy. Sir Simon Mountford, Sir Thomas Thwaite, and Robert Ratcliff were immediately executed; but the others received a commutation of sentence. Sir William Stanley was executed Feb. 16, 1495. Warbeck, who attempted to land at Deal July 3, 1495, was repulsed, and 169 of his adherents were made prisoners, and hanged by order of the king. Having subsequently besieged Waterford, in Ireland, he was compelled to flee by Sir Edward Poyning, July 23. After this failure he again retired to Flanders, where he remained till March, 1496, when he visited Scotland, and was favourably received by James IV. who gave him in marriage his kinswoman, the lady Catherine Gordon, and invaded the northern counties of England in his behalf. A war breaking out in consequence between the two countries, Warbeck was obliged to retire to Ireland July 26, 1497, and subsequently to Whitsand Bay, Cornwall, where he landed Sept. 7, and was placed at the head of a large body of Cornish rebels. He retired to Taunton Sept. 20. Being apprised of the approach of Lord Daubeney with a numerous army, he fled during the night to the sanctuary of Beaulieu, in Hampshire, Sept. 21. His wife, Lady Catherine Gordon, fell into the hands of the royal troops, and became an attendant on the queen. Warbeck surrendered to Henry VII. Oct. 5, and was led in triumph through London Nov. 27. He was subsequently kept prisoner in the royal palace, and afterwards in the Tower, whence he escaped June 8, 1498, and took shelter with the prior of Shene. He again surrendered on the promise that his life should be spared, and was exhibited in the stocks at Westminster Hall, June 14, and the following day in Cheapside; after which he was again removed to the Tower. Here he formed an intimacy with his fellow prisoner the imbecile young earl of Warwick, son of George, duke of Clarence, with whom he planned an escape and a renewal of his claims. The attempt failed, Aug. 2, 1499, and Warbeck was tried at Westminster Hall Nov. 16, and hanged Nov. 23. Warwick was tried Nov. 21, and executed Nov. 28. The account of Perkin (Piers or Peter) Warbeck's parentage is derived from his enemies. By some authorities he is believed to have been, if not Richard, duke of York, at any rate a son of Edward IV.

WARWICK (Battle).—The French were defeated by the English and their allies, under the prince of Brunswick, at this town, in Prussia, Aug. 7, 1760.

WAR-CHARIOTS are said to have been invented by Ninus, king of Assyria, B.C. 2059, and are mentioned Exod. xiv. 7 (b.c. 1491); Josh. xi. 4 (b.c. 1444); 1 Sam. xii. 5 (b.c. 1093); and in other passages of the Old Testament. Cassivellaunus, the commander-in-chief of the ancient Britons, had 4,000 war-chariots in his army, B.C. 54. The Chinese used chariots of war armed with cannon A.D. 1453.

WARS AND LIVERIES (Court of).—This court, erected by 32 Hen. VIII. c. 46 (1549), was abolished by 12 Charles II. c. 24 (1660).

WAREHAM (Dorsetshire) existed in the time of the Britons, and, subsequently occupied by the Romans, was taken by the Danes, the inhabitants massacred, and the town reduced to ruins, A.D. 800. It was again ravaged by them in 998. The castle and town were seized for the empress Maud in 1138, and were retaken and burned by Stephen. The town, almost destroyed by fire in 1762, was completely rebuilt within two years. A priory was founded here in the 12th century.

WAR OFFICE.—The department of the Secretary of War was established A.D. 1666, for the management of the finance business of the army. The Secretary of State for War was made a distinct office in 1854.

WARRANTS. (See General Warrants.)

WARRINGTON (Lancashire) is supposed to have been a Roman station A.D. 79. After its occupation by the Saxons it obtained the name of Werington, from the Saxon weiring, a fortification, and run, a town, from which its present name is derived. It was besieged and taken by the Parliamentarians in May or June, 1643. General Lambert defeated the Scots here in 1648, and Prince, afterwards Charles II. repulsed the Parliamentarians here in 1651. The bridge was cut down to intercept the passage of the Jacobite army under Charles Edward, and part of the rebel force captured it in 1745. The duke of Cumberland passed through the town in his march to the north in 1746. A wooden bridge, erected in the end of the 14th century, was replaced by a bridge of stone by Thomas, first earl of Derby, in compliment to Henry VII., on his visit to
Latham and Knowle, in 1498. A new bridge of wood on stone piers was erected in 1512. The parish church of St. Helen's is of Saxon origin, and existed at the time of the Conquest. The tower was rebuilt in 1696. The free grammar-school was founded in 1536; the Blue-coat school in 1677; the subscription library was established in 1758, the dispensary in 1810, and a building was erected for it in 1818. The town-hall was built in 1820.

Warsaw, the principal city of Russian Poland, became the capital of Poland A.D. 1566; was taken by the Swedes in the middle of the 17th century, and was retaken by the Poles in 1656. It fell again into the hands of the Swedes in the same year, when they destroyed the fortifications. It was taken by Charles XII. in 1703. The Poles rose against the Russians and expelled them from the city April 17, 1704. Unhappy was the fate of the Poles delivered by the Prussians in July and August, it was taken by the Russians with great slaughter, Nov. 4, 1794. It was evacuated by the Russians Nov. 28, 1806, and occupied by the French two days afterwards. Napoleon I. arrived here Dec. 18, 1806, and received embassies from Turkey and Persia in the beginning of March, 1807. It was captured by the Austrians April 23, 1809, and was retaken by the Poles in the following month. Napoleon I. arrived here, on his retreat from Russia, Dec. 10, 1812. The town was evacuated by the Austrians in the beginning of February, 1813, and was occupied by the Russians. The Polish insurrection broke out Nov. 29, 1830, and the Russian grand-duke Constantine having retired from the city Nov. 30, a provisional government was formed. The Polish army withdrew into the town after the battle of Praga, Feb. 24 and 25, 1831. The prisons were broken into and all the state prisoners, Russian prisoners and others, were murdered by the mob, Aug. 15 and 16, 1831. After a sanguinary battle, which lasted two days, the town was taken by the Russians, Sept. 7, 1831. A strong citadel was erected by them after the close of the revolution. A royal palace was built here by Sigismund III. The church of the Holy Cross was erected 1696, the beautiful Lutheran church in 1751, the church of St. Alexander in 1814, and the Dominican church in 1823. The university was abolished in 1834, and the library of 150,000 volumes and other valuable collections were removed to St. Petersburg. Disturbances broke out at Warsaw Feb. 21, 1861. (See Poland.)

Warsaw (Battle).—The Poles were defeated here by the Swedes in a battle which lasted three days, A.D. 1656. The Russian and Prussian troops were beaten by the Polish guards and the populace in the town, April 17, 1794. The Poles under Kosciusko were defeated by the Russians, Oct, 4, 1794, and again with a loss of 10,000 slain and 9,000 in prisoners, Nov. 4, 1794. In the battle between the Poles and the Russians at the village of Grochow near Warsaw, Feb. 19 and 20, 1831, the former were victorious; and in the contest at the suburb of Praga, Feb. 24 and 25, 1831, the result was indecisive. The Poles gained a victory over the Russians at Warsaw, March 31, 1831, but were defeated by them here in a great battle Sept. 6 and 7, 1831.

Wassail (Warwickshire), supposed by some to have been a town of importance prior to the Roman invasion, having been destroyed by the Danes, was restored, and a fort erected by Ethelfleda, daughter of Alfred the Great, A.D. 913. Queen Elizabeth visited it on her way to Kenilworth Castle in 1572. More than half the town was destroyed by an accidental fire in 1694, and it was rebuilt by a national contribution, which amounted to £110,000, of which Queen Anne gave £1,000. William III. visited it in 1695. Its earliest charter dates from 1230, but it was with the public incorporated till 1553. Warwick Castle, one of the most splendid and entire specimens of feudal grandeur in the kingdom, is supposed to have been founded by Ethelfleda (913), but no authentic trace of the original building remains. Cesar's Town, built at least 700 years ago, and Guy's Tower, built in 1394, are both in fine preservation. St. Mary's church, which stands on the site of an older structure, was built in the 14th century. Having been nearly destroyed by fire in 1694, it was rebuilt in 1704. The tower, 130 feet high, was designed by Sir Christopher Wren. The Beauchamp chapel was erected in 1464.

Washington (North America), surveyed and laid out by three commissioners A.D. 1791, was founded by the laying of the corner-stone of the Capitol, Jan. I, 1800. The seat of the federal government was transferred from Philadelphia to this place in 1800, and the president and the other chief officers of the government have since resided here. It was captured by a small English force under Ross, Aug. 23, 1814, and a proposition to ransom the public buildings having been rejected by the American authorities, they were fired, and the English withdrew Aug. 25. A destructive fire in which part of the Capitol and the whole of the library were destroyed, occurred Dec. 24, 1851. The prince of Wales visited the president here in September, 1860. The Capitol, commenced in 1793, was finished in 1827, at a cost of £400,000. Columbia College was incorporated by Congress in 1821.

Wassail Bowl.—The term wassail is derived from the Anglo-Saxon was-hal, be in health, and the wassail bowl was compounded of ale, nutmeg, sugar, toast, and roasted crabs or apples, which formed an aggregate, sometimes called lamb's wool. The custom of wassailing on New Year's eve is derived by some antiquaries from the presentation of a loving cup to Vortigern by Rowena, A.D. 499; but others assert, and with greater probability, that it is of earlier origin.
WASTE LANDS were first inclosed in England in order to promote agriculture, A.D. 1547. This caused an insurrection in various parts of England in June, July, and August, 1549. (See Ket's Insurrection.) Inclosures of commons and waste lands are generally made by local statutes, which are regulated by the General Inclosure Act, 41 Geo. III. c. 109 (1800), amended by 1 & 2 Geo. IV. c. 23 (1821).

WATCH (London) was established in accordance with an order issued by Henry III. A.D. 1253. The duty was performed by the citizens themselves, and they had statutary processions yearly. Henry VIII. came into the city disguised as a yeoman of the guard to see this nocturnal pomp on the eve of St. John, 1510, and was so well pleased that he brought his queen, attended by the principal nobility, into Cheapside to see it on the eve of St. Peter following. The cavalcade of the city watch was abolished, and a stated watch appointed at the charge of each ward, in the summer of 1570. An armed watch of the inhabitants of London during the civil war was appointed by the common council Oct. 2, 1643. The regulation of the city watch was vested in the common council by 10 Geo. II. (1736). The watch of London was superseded by the police by 10 Geo. IV. c. 44 (June 19, 1829).

WATCHES are said to have been first invented at Nuremberg, in Germany, towards the end of the 15th century. Robert I., king of Scotland (1306 to 1329), is said to have possessed a watch. The earliest known watch was in Sir Ashton Lever's museum; it bears the date of 1541. Watches were common in France before 1544. Henry VIII. is said to have had a watch; and one, set in an armlet, was presented to Queen Elizabeth in 1572. They were not in general request in England till the end of her reign. The invention of spring watches has been ascribed to Dr. Hook, and by some to Huyghens, about 1658. The anchor escapement was invented by Clement, a London clockmaker, in 1680, and the horizontal watch by Graham in 1724. Harrison finished his longitude watch in 1736, for which he received a government reward of £20,000. Repeaters were invented in the reign of Charles II., and the smallest one of this kind ever known— it was the size of a silver twopence—and its weight that of a sixpence—was made by Arnold for Geo. III., and was presented to him on his birthday, June 4, 1764. The duties on wrought gold and silver watch-cases were abolished by 33 Geo. III. c. 24 (March 8, 1798).

WATCHET (Somersetshire), anciently called Weced-poort, was plundered by the Danes A.D. 886. Having been defeated in the vicinity in 918, they took and plundered the town in 986. The pier, erected by the Wyndham family, was repaired previously to 1740.

WATER.—The composition of water was discovered by Mr. Henry Cavendish in 1754. (See Hydrostatics.)

WATER-CLOCK. (See Clepsydra.)

WATER-COLOURS.—All the ancient modes of painting, as fresco-painting (q.v.), &c., were systems of water-colour; but the existing mode of water-colour painting did not become a popular branch of art until about the latter part of the 18th century. The Society of Painters in Water-Colours was instituted in 1805, and the New Society in 1832. Both these associations have held exhibitions since the date of their institution. Paul Sandby (1732—1808), Thomas Gainsborough (1727—1811), Joseph Mallord William Turner (1775—1851), and Samuel Pratt (1789—1852), are regarded as the founders of the art of water-colour painting.

WATER CURE. (See Hydropathy.)

WATERFORD (Ireland), capital of the county of Waterford, is said to have been founded by the Danes about A.D. 850. Strongbow, earl of Pembroke, took it by assault in 1170. Henry II. landed here on his invasion of Ireland, Oct. 18, 1171. King John granted its first charter, and resided here for some months, in 1210. The citizens, led by the mayor, were defeated by the Poers and O'Driscolls in 1348. Waterford was visited by Richard II. in 1394, and again when he went to redress some disorders consequent on the death of the lord-lieutenant, earl of March, who had fallen in a skirmish with the natives, in 1399. The motto of the city, "Urbs intacta manet," was bestowed upon it in consequence of having successfully resisted Perkin Warbeck in 1495. It was unsuccessfully besieged by Cromwell in 1649, and submitted to Ireton in 1650. It sided with James II., who embarked here for France, after the battle of the Boyne, July 2, 1690. General Kirk compelled it to surrender July 25, 1690. The cathedral, founded in 1076, has been since altogether rebuilt. The chamber of commerce was incorporated in 1818.

WATER-GLASS, or OIL OF FLINT.—Stereochromy, or the process of painting with this mixture, which is a soluble alkaline silicate, was invented by Dr. Johann N. Von Fuchs, who published an account of it A.D. 1825. It has recently been employed by Messrs. Macise and Herbert, R.A., in the frescoes at the new palace of Westminster. In 1840 Professor F. Kuhlmann, of Lille, directed his attention to the material, with a view to its employment as a preservative for stone; and in 1859 a translation of a report on its application to the fine arts was privately printed by order of Prince Albert. F. Ransome asserts the identity of Kuhlmann's process with his own inventions for preserving stone, and claims the merit of priority. (See Stone.)

WATERLOO (Cape of Good Hope).—The camp of the Caffre chief Macomo, at this place, was destroyed by an expedition under Major-General Somerset, Oct. 16, 1851.

WATERLOO (Battle).—This great battle, which proved the death-blow to the ambitious
schemes of Napoleon I., was commenced near Waterloo, in Belgium, at half-past eleven o’clock in the morning, June 18, 1815, by an attack of the French, under Prince Jerome, upon the château Hougomont, which was set on fire about two o’clock. The French cavalry, under Ney, was repeatedly driven back by the English infantry, but the farm of La Haye Sainte was compelled to surrender, owing to the scanty ammunition of its brave defenders. Late in the afternoon, Marshal Blücher arrived with the Prussian army, and attacked the French right flank. The grand attack of the Imperial Guard commenced at a quarter past seven, and was defeated by the English foot-guards, under Major-General Maitland. Just as the sun vanished below the horizon, Wellington gave the order for the whole of the English line to advance, which occasioned a panic and general flight in the French army. The Old Guard still stood firm, but at length yielded to the attack of Adam’s brigade and the Osnaburg battalion of Colonel Halket; and at half-past eight the duke relinquished the pursuit and returned to the village of Waterloo. At the hamlet of La Belle Alliance he met Blücher, who, after mutual congratulations, continued the pursuit. The following table, taken from Captain Siborne’s history of the Waterloo campaign, exhibits the effective force of the allied army in this memorable battle:

The Dutch-Belgian forces acted with great lukewarmness, and were of but slight service during the battle. The Prussian forces engaged amounted to 41,283 infantry, 8,579 cavalry, and 1,803 artillery, making a total of 51,964 men, with 144 guns. The effective French army consisted of 47,579 infantry, 13,792 cavalry, and 7,559 artillery, forming a force of 68,900 men, with 246 guns. The following table exhibits the English loss:

Among the killed were Generals Sir William Ponsonby and Sir Thomas Picton, who fell pierced by a musket-ball at the beginning of the battle. Lord Uxbridge, afterwards the earl of Uxbridge, and Lord Fitzroy Somerset, afterwards Lord Raglan, were both severely wounded. The total loss of the allies exceeded 22,000 men; and the French are said to have lost no less than 40,000 men. The battle was called by the Prussians the battle of La Belle Alliance, and by the French the battle of Mont St. Jean. It has received its English name from the adjoining village of Waterloo, where Wellington fixed his head-quarters, and reposed after the fatigues of the day.

Waterloo Bridge (London).—The first stone was laid Oct. 11, 1811, and the bridge was opened to the public June 18, 1817. It was built by John Rennie, at a cost of upwards of a million sterling. The toll for foot passengers was reduced from a penny to a halfpenny Feb. 29, 1841. A committee of the House of Commons was appointed to consider the expediency of abolishing the toll April 26, 1841.

Watermill. (See Mill.)

Waterspout.—These remarkable meteorological phenomena are regarded as belonging to the same class as the moving sand-pillars of the desert, but their cause and nature are imperfectly understood. One burst in Lancashire in 1718, and occasioned considerable damage. Another, at Bracken-thwaite, in Cumberland, Sept. 9, 1760, tore away the gravel and soil from a field. A great waterspout descended upon Dungavel Hill, in Scotland, July 2, 1768, and made an opening about twenty-four yards broad and three feet deep. A similar phenomenon occurred at Clapham Common, during a violent thunderstorm, June 18, 1752; and at Ramsgate, where it produced a depth of four feet of water in several cellars, July 14, 1798. One burst over the Wool Abraham and Crewe mines, in Cornwall, in Nov. 1806, and choked up the shaft, causing the death of several miners and considerable destruction of property. The town of Silkstone, in Yorkshire, was similarly visited May 9, 1807, when a torrent of water, nearly six feet in diameter, descended on the town and drowned several of the inhabitants. The appearance of the temporary island Sabrina, in the Azores, Jan. 12, 1811, was attended with numerous waterspouts and volcanic phenomena. A waterspout of very destructive character overwhelmed the village of Kingscourt, county Cavan, Ireland, Sept. 12, 1838; and
much injury was occasioned in Provence, France, by a similar cause, May 30, 1841. A ship was struck by one near Gozo, Oct. 14, 1850, when she foundered, and all on board perished, with the exception of one man. The island of Sicily was visited by two waterports, attended by a hurricane, Dec. 8, 1851. Five vessels were sunk in Tunis harbour by similar means Nov. 18, 1855. Major Sherwill made numerous observations on waterports in India, where they are frequent. One which fell at Dum-Dum, near Calcutta, Oct. 7, 1859, measured 1,500 feet in height, and covered half a square mile with about six inches of water.

Water Tofana, or Aqua Tofana, so named from its inventor, Tofana, the secret poisoner, an Italian woman, who resided at Palermo, and afterwards at Naples, about the middle of the 17th century. Many husbands died suddenly at Rome in 1659, and suspicion having been excited, a society of young wives was discovered. An old woman named Spara was the president, and she supplied them with small phials, bearing the inscription "Manna of St. Nicholas of Barri," by the use of which husbands were removed. Spara and four others were executed; and Tofana, who manufactured the poison, was dragged from a monastery where she had taken sanctuary, and put to the torture. She confessed to having been instrumental in the deaths of six hundred persons.

Walling Street, extending from Kent to Cardigan Bay, or probably to the Firth of Forth, one of the four great roads in South Britain, was constructed by the Romans during their occupation, B.C. 57—A.D. 418.

Wattignies (Battle), between the troops under the duke of Coburg and the French commanded by General Jourdan, commenced in an affair between the outposts near Avesnes, Oct. 14, 1793. It resulted in the triumph of the republican army, after a loss on each side of about 3,000 men, Oct. 15.

Wat Tyler's Insurrection. — One of the collectors of the poll-tax, who had insulted the daughter of a man called Wat the Tyler, at Deptford, was killed by her father on the spot: this took place early in June, 1381. A rising ensued, and the insurgents met on Blackheath June 12. They proceeded to London, burned the duke of Lancaster's palace, and committed many atrocities, June 13. The Tower was seized; the archbishop of Canterbury and Sir Robert Hales were executed by them June 14; and some of the authorities met them in Smithfield, June 15, when the leader, Wat, was killed by William Walworth, the lord mayor. A body of armed men, under Sir Robert Knollys, suddenly attacked the malcontents, who were quickly dispersed.

Wave-line Principle. — The system of building ships with contours scientifically adapted to the curves of the waves of the sea was originated by Scott Russell, who commenced a series of experiments on the subject in 1834. His theory attracted considerable attention, and in 1836 the British Association appointed a Committee on Waves, who presented their first report the following year, and continued their labours for several years. The victory of the United States schooner America over Mr. R. Stephenson's iron yacht Titanic in the grand race of Aug. 25, 1851, established the superiority of the principle, which has since been applied in the Great Eastern and other vessels.
times. Weavers settled in England A.D. 1132 and 1331, and were much encouraged by Edward III. (See Calico, Cloth, Cotton, Linen, Silk, Wool, &c.)

Wedgewood ware was invented by Josiah Wedgewood, of Burslem, potter to Queen Charlotte, and patented A.D. 1762. His imitation of the Portland vase, fifty copies of which were produced and sold at fifty guineas each, was executed in 1797.

Wednesdays received its name from the ancient Saxons, who called it Wodnes-daeg, or Woden's day, after their conversion to Christianity, about A.D. 735. It was appointed a fast-day by the primitive church, on account of its having been the day on which our Saviour was betrayed.

Week.—According to Dion Cassius, this division of time was first made by the Egyptians, from whom other nations borrowed it. The Jews had a week of days, reckoned from sabbath to sabbath; a week of years, consisting of seven years; and a week of seven times seven years, reckoned from one jubilee to another. Among the ancient Greeks and Romans the week was unknown. It was only gradually introduced with Christianity, under the later emperors.

Weights.—A national standard of weight was first established in England A.D. 1197, and a uniformity of weight throughout the kingdom was ordered by 9 Hen. III. c. 25 (1225). By 51 Hen. III. st. 1, c. 3 (1269), an English penny, weighing thirty-two wheat corns from the midst of the ear, was made the standard weight. The weight of the pound (g.e.) was regulated by 51 Edw. I. c. 1 (1303), and a uniform weight throughout the realm was ordered by 27 Edw. III. st. 2, c. 10 (1353). By 8 Hen. VI. c. 5 (1429), every city was ordered to have a common balance and weights, for the free use of the inhabitants. Standard weights of brass were ordered to be made and sent to every city and borough by 7 Hen. VII. c. 4 (1490), which was extended and confirmed by 11 Hen. VII. c. 4 (1494). Avoirdupois weight is first mentioned by 24 Hen. VIII. c. 3 (1532), where it is ordered to be used in the sale of butchers' meat. Uniformity of weights and measures was again enjoined by 16 Charles I. c. 19 (1645). The House of Commons appointed committees in 1759, 1793, and 1796, to examine the best means of securing an adequate standard of weights and measures. By 35 Geo. III. c. 102 (June 22, 1795), the justices at quarter sessions were empowered to appoint examiners of weights and scales, and in 1814 parliament appointed another committee to consider the question of standard. The prince regent instituted a commission for the same purpose in 1819, which presented reports in 1819, 1820, and 1821, and procured the act 3 Geo. IV. c. 74 (June 17, 1824), for establishing uniformity of weights and measures. This was amended by 5 & 6 Will. IV. c. 49 (Aug. 12, 1834), and both acts were repealed by 5 & 6 Will. IV. c. 63 (Sept. 9, 1835). Troy weight is ordered to be used in sales of bullion and precious stones by 18 & 17 Vict. c. 29 (June 14, 1853). Further provisions for legalizing and preserving the standard were made by 19 & 19 Vict. c. 72 (July 30, 1855), and 22 & 23 Vict. c. 58 (Aug. 13, 1859). (See Measures and Pound.)

Weimar, capital of the grand-duchy of Saxo-Weimar-Eisenach, was taken by the French Oct. 14, 1806. The emperors Alexander I. of Russia and Napoleon I. were entertained here by the grand-duke Oct. 6—14, 1808. The city church was built in 1400, the court theatre in 1825, and the Falk's Institution, for public education, in 1829. The colossal bronze statue to Herder was erected Aug. 25, 1850.

Wien (Vienna).—Duke Guelph was defeated here in defending his castle in Swabia against the emperor Conrad III., 1130. The famous Guelph and Ghibeline factions originated at this battle.

Wiessenburg (Battle).—Matthias Corvinus, king of Hungary, defeated the Turks at this town of Transylvania, A.D. 1479.

Wiesseburg (Alsace).—Würmser forced the French lines at this place Oct. 13, 1793. It was recovered by the French Dec. 27 the same year.

Wellington (Somersetshire).—The manor, bestowed upon Asser, bishop of Sherborne, by Alfred the Great, was transferred to the diocese of Wells A.D. 910. It occurs as "Walmone" in Domesday Book of 1066. From it the duke of Wellington received his title, May 3, 1814. A lofty column, raised on Blackdown Hill by public subscription, commemorates the battle of Waterloo.

Wellington Administration was formed on the dissolution of the Goderich administration (g.e.), Jan. 8, 1829. The cabinet was thus constituted:

President of the Council: Earl Bathurst.
Privy Seal: Lord Eldenborough.
Chancellor of the Exchequer: Mr. Henry Goulburn.
Home Secretary: Sir Robert Peel, Bart.
Foreign Secretary: Earl of Dudley.
Colonial Secretary: Mr. William Huskisson.
Board of Control: Viscount Melbourne.
Secretary at War: Viscount Palmerston.
Duchy of Lancaster: Earl of Aberdeen.
Master of the Mint: Mr. J. C. Herries.
Treasurer of the Navy: The Earl of Goderich, and President of the Board of Trade: Mr. Charles Grant.

Mr. Huskisson resigned May 20, and was followed by the earl of Dudley, Lord Palmerston, and Mr. Charles Grant. Their places were supplied as follows:

Foreign Secretary: Earl of Aberdeen.
Colonial Secretary: Sir George Murray.
Treasurer of the Navy and President of the Board of Trade: Mr. W. V. Fitzgerald.

The secretary at war, Sir Henry Hardinge, and the chancellor of the duchy of Lancaster, Mr. Charles Arbuthnot, did not receive seats in the cabinet. The duke of Clarence,
who remained lord high admiral on the formation of the ministry, resigned office Aug. 12, 1828, when Lord Melville left the Board of Control and became first lord of the Admiralty, and Lord Ellenborough took the Board of Control. Earl Rosalyn became privy seal June 4, 1829, Lord Ellenborough retaining only the Board of Control. Parliament was dissolved July 24, 1830. The new parliament met Oct. 26, and William IV. delivered his first speech from the throne Nov. 2. Ministers were beaten by a majority of 233 to 204, on a motion for a select committee on the civil list, Nov. 15, and their resignation was announced in both houses of parliament Nov. 16. (See Grey Administration.)

Wellington College (Hampshire), for the support and education of the orphan children of soldiers, was erected at Sandhurst in honour of the illustrious duke whose name it bears, the funds for the purpose—upwards of £109,000—having been raised by private subscription. The foundation-stone was laid July 2, 1856, by her Majesty Queen Victoria, who also performed the inauguration ceremony Jan. 29, 1859.

Wells.—The art of boring wells was practised in the East at least 4,000 years ago. Abraham's servant encountered Rebekah beside a well, b.c. 1859 (Gen. xxiv.). Damascus is stated by Pliny to have introduced wells into Greece from Egypt about b.c. 1500. The superstitious veneration of wells and fountains was prohibited by Athelstan in 960, and the immemorial custom of decorating wells with garlands and flowers on Holy Thursday, or at Whitsuntide, is still preserved at Tissington, Wirksworth, and other villages in Derbyshire.

Wells (Somersetshire).—This city and borough originated in a collegiate church founded by Ina, king of Wessex, towards the end of the 7th century. It became the seat of a bishopric a.d. 909 (see Bath and Wells), and is chiefly remarkable for its beautiful cathedral, which was founded by Bishop Wulfhelm, or Wyffeline (923 to 928), and restored or refounded by Bishop Oceline (1206 to 1244). The two west towers were added about the end of the 14th century. The Vicar's Close was founded by Walter de Hull, sub-dean, in 1335, and was much enlarged by Ralph de Salopia in 1348. Bishop Beckington erected a fine cross in 1450, which was replaced by another in 1750.

Wenlock (Shropshire), the first town in England the charter of incorporation of which expressly gave it a right to return members to parliament, a privilege conferred by Edward IV. The abbey was founded by Millburga, related to the kings of Mercia, about a.d. 680. The ruins belong to the 13th century.

Westleyans. (See Methodists.)

Wessex, or the kingdom of the West Saxons, was founded by Cerdic A.D. 519.

Western Australia, comprising nearly one fourth of the entire continent, was established under the name of the Swan River settlement, a.d. 1829. An extensive bed of coal was discovered here by Dr. Van Sommer in 1847. At the request of the colonists, convicts were sent out to supply the labour market in 1848. The colony received a representative constitution Aug. 5, 1850.

Western Church was also called the Latin or Roman church. Milman (Lat. Christ. vol. ii. book iv. ch. 9, p. 203) remarks: "In the 1st century Rome suddenly, as it were, burst the bonds of her connection with the older state of things, disjoined herself for ever from the effete and hopeless East, and placed herself at the head of the rude as yet, and dimly described and remote, but more promising and vigorous civilization of the West. The Byzantine empire became a separate world, Greek Christianity a separate religion. The West, after some struggle, created its own empire, its natives formed an independent system, either of warring or of confederate nations. Latin Christianity was the life, the principle of union, of all the West; its centre, papal Rome." Differences of opinion between the Church of Rome and the church at Constantinople (see Greek Church) existed from a very early period. The Arian controversy in the 4th century; the disputes concerning the Filioque in the 6th century; the Monothelite controversy in the 7th century; and the Iconoclast controversy early in the 8th century, paved the way for the final separation which occurred a.d. 876. (For the list of bishops, see Popes; and for its history, see Roman Catholics, Rome, etc.)

Western Empire.—The division of the Roman territory into the Eastern and Western empires was first effected by Constantine I., A.D. 334, and was completed by Arcadius and Honorius in 395.

A.D. 378. May. The Alamanii invade the Western empire and are defeated by Gratian, near Argentaric, or Colmar, in Alsace.

384. Aug. 25. Gratian is assassinated at Lyons by Andragathius, general of the usurper Maximus.

388. Maximus invades Italy and expels Valentinian II., who is in consequence assisted by Theodosius I.

391. Maximus is defeated by Theodosius I. at Aquileia, and is beheaded by the army.

392. May 15. Argobastes the Frank murders Valentinian II., and bestows the purple on the rhetorician Eugenius, son of Honorius, aged eleven years, who governs under the regency of his uncle Stilicho. The seat of government is removed to Milan.

400. Alaric invades Italy.

402. He expels Honorius from Milan. March 29. He sustains a severe defeat from Stilicho at Tolbiac (q.v.).

404. Honorius celebrates a pompous triumph at Rome, and removes his court to Ravenna.
known as Thorny Island, and received its present name from the Benedictine monastery of Sebert. (See Westminster Abbey.) The palace, which was the principal residence of the English sovereigns from Edward the Confessor to Edward VI., was destroyed by fire A.D. 1512. St. Stephen's chapel, founded by King Stephen in 1150, and rebuilt between 1520 and 1532, was, until its destruction by fire, Oct. 16, 1554, the seat of the English parliament. (See Houses of Parliament.) Westminster was first represented in parliament in 1547. A proclamation for cleansing its streets was published March 29, 1672. The Westminster Hospital was founded in 1719. Councils were held at Westminster, Dec. 7, 1141; May 26, 1162; in 1173; and April 29, 1229.

Westminster (Bishopric).—Henry VIII. erected the see of Westminster by letters patent, dated Dec. 17, 1540, and appointed Thomas Thirlby the first bishop. Thirlby resigned the office March 29, 1550, when the see was dissolved and re-united to London by Edward VI. Pius IX.'s bull for establishing a Roman Catholic hierarchy in Great Britain, dated Sept. 30, 1850, erected Westminster into an archbishopric under Cardinal Wiseman, who issued his first pastoral letter Oct. 7.

Westminster (Treaties).—One was concluded between Henry VIII. and Francis I., April 30, 1527. It provided for carrying on the war in the Netherlands against the emperor, the liberation of the French princes, and the payment of the debt due to England. Henry VIII. renounced his claim to the French throne, on condition of receiving a pension of 50,000 gold crowns. It was modified by another treaty signed May 29, 1528. Wolsey went to France in July, and concluded the treaty of Amiens Aug. 18. This confirmed and extended the treaty of Westminster. A treaty was concluded at Westminster with France, Feb. 6, 1554, with Holland, Feb. 10, 1674, and an alliance was formed with Prussia Nov. 29, 1742.

Westminster Abbey.—According to tradition, St. Peter visited Britain A.D. 65, and founded a church on Thorny Isle, which formed the origin of Westminster Abbey. Another account is that it occupies the site of a Roman temple of Apollo, destroyed by an earthquake during the reign of Antoninus Pius; but no authentic record places its erection earlier than about 604, when Sebert, king of Essex, embraced Christianity, and founded a church in honour of God and St. Peter, to the west of London. This church having fallen into decay, was restored by Edgar, soon after his accession, in 967, at the request of St. Dunstan, and was further added to, and largely altered by Edward the Confessor between 1050 and Dec. 23, 1065, when the new building was consecrated. Henry III. commenced the erection of additional buildings May 16, 1220, and continued the enlargement until nearly the end of his long reign, the new abbey being opened Oct. 13, 1269. Edward I. deposited the celebrated Scotch coronation

WEST INDIES, or COLUMBIAN ARCHIPELAGO (Atlantic Ocean).—These islands were for the most part discovered by Columbus, who sighted American land at San Salvador, one of the Bahamas, Oct. 11, 1492, and are consequently termed the Columbian Archipelago. Columbus called them the West Indies, because he believed that he had simply discovered a western passage to Hindostan, and for the same reason the name was originally applied to the whole of America. (See Antilles, Bahamas, Cuba, Domingo, St. Guadaloupe, Jamaica, Porto Rico, Trinidad, &c.)

Westmeath (Ireland) originally formed part of the kingdom of Meath, was included in the county palatine granted by Henry II. to Hugh de Lacy, A.D. 1173. It was separated from Eastmeath in 1549, and Longford was added, king of it in 1569. The abbey of Mullifernan near Tristernach was in the possession of the Franciscan friars till 1561, notwithstanding the suppression of monasteries by Henry VIII. An old Danish fort at Ballymore was fortified by the rebels and held in the wars of 1641 and 1688.

Westminster (Middlesex).—This city, which now joins London, was anciently

897

A.D. 468. Radegnus invades Italy at the head of an immense army of German barbarians, and is defeated by Stilicho.

A.D. 408. Aug. 23. Fall and execution of Stilicho. Alaric besieges Rome (q. e.).

A.D. 469. The Goths and Romans elect Attilus emperor.

A.D. 411. He is degraded by Alaric.

A.D. 412. A peace is concluded between Honorius and Alaric.

A.D. 423. On the death of Honorius, his throne is usurped by the state secretary, John.

A.D. 431. A rebellion in Africa under Boniface is suppressed.

A.D. 451. The Huns under Attila invade the Western empire.

A.D. 455. March 15. Valentinian III. is assassinated by the partisans of the senator Maximus, whose wife he had deposed. June 12. The Vandals under Genseric invade Italy at the invitation of the empress Eudoxia, widow of Valentinian III., and wife of Maximus. Maximus is stoned to death by the infuriated Romans.

A.D. 451. Majorian is deposed by Ricimer, general of the barbarians, who elevates Luitpold Severus to the throne, and governs in his name.

A.D. 476. Odencrus takes Rome and compels Augustus to abdicate, thus terminating the Western empire.

EMPERORS OF THE WEST.

stone and other trophies of the Scottish kingdom in the abbey in 1597; and it was partially destroyed by fire March 29, 1298. A subsequent fire occurred in the dormitory at Westminster, Sept. 7, 1556. Elizabeth again removed the monks, July 12, 1559, and made the abbey a collegiate church, May 21, 1560. The puritan parliament appointed a committee to demolish all monuments of superstition and idolatry in this church, April 24, 1643, and it is said to have been used as a military barrack the same year. The House of Commons voted a sum of money for the repair and restoration of Westminster Abbey in 1697, and employed Sir Christopher Wren to carry out the proposed reparation. The erection of the west front was commenced in 1725, the great rose window was finished in 1722, and the towers were completed in 1735. A fire which broke out in the roof of the tower July 9, 1803, occasioned serious injury to the woodwork of the choir. Henry the Seventh's Chapel was restored between 1599 and 1822 by Benjamin Wyatt. Another fire occurred April 27, 1839, but was extinguished before it had had time to do much damage. The woodwork of the choir was restored in 1847. Evening services were first celebrated in Westminster Abbey in January, 1555.

Westminster Assembly. (See Assembly of Divines.)

Westminster Bridge. — The first bridge at Westminster, founded Jan. 29, 1293, was built from the designs of Charles Labelye, a Swiss. It was opened Nov. 18, 1750, and consisted of fifteen arches, containing, according to the architect's report, twice the amount of stone used in St. Paul's cathedral. Owing to the sinking of the piles, the bridge was closed to carriages Aug. 16, 1846, and to foot-passengers Aug. 27, and it was lightened of much of its stonework and reduced in height before it was again opened. These measures having proved ineffectual, a local act of parliament was passed in 1850 for the construction of a temporary bridge, but was never carried into effect. By 16 & 17 Vict. c. 46 (Aug. 4, 1853), the management of the bridge was transferred to the Commissioners of Works and Public Buildings, who were authorized to remove it and erect a new one. The design of Thomas Page was accepted; and in May, 1854, the works commenced under an agreement that they should be completed in three years. Owing to the proposed erection of new government offices at Westminster, and the consequent alterations of plan that might be necessary, they were suspended.

March 20, 1856. They were, however, renewed the following year, and in 1860 a portion of the bridge was opened for traffic. The erection of the bridge up to July, 1861, was £316,936, and a further outlay of £60,692 was voted by parliament. It consists of seven iron arches, and is eighty-five feet wide. It was formally opened throughout May 24, 1862.

Westminster Hall. — This fine hall, said to be, with the single exception of the hall of justice at Padua, the largest room in Europe which is not supported by pillars, was founded by William Rufus, A.D. 1097. In 1224 it was made the permanent seat of the English law courts, and in 1387 it was repaired by Richard II. A fire which broke out Feb. 20, 1661, was checked before it had time to extend its ravages. The hall was repaired at a cost of £13,000 in 1802.

Westminster School, or St. Peter's College (Westminster). — Henry VIII. founded an educational establishment in connection with the abbey of Westminster about A.D. 1540. The present institution was founded by Queen Elizabeth in 1560. The dormitory was built by the earl of Burlington in 1722. William Camden, the antiquary, was master of this school from 1593 to 1599, and Dr. Richard Busby from 1639 to 1685.

Westmoreland (England), partly occupied by the Brantinates, was comprised in the Maxima Casariana of the Romans, after the subjugation of South Britain, about A.D. 43. It was conquered by the Angles of Northumbria about 685. William I. divided it between two of his vassals in 1068. It had long been an object of contention between England and Scotland; and the king of Scotland, in consideration of a grant of lands in Cumberland and Northumberland, abandoned his claim to the county in 1237.

Westphalia (Germany). — The ancient duchy of Westphalia was separated from western Saxony by Frederick I., A.D. 1180. In 1613 Prussia obtained possession of part of the country, and in 1801 it was ceded to the duke of Hesse-Darmstadt. Napoleon I. erected Westphalia into a kingdom, under his brother Jerome, Aug. 18, 1806. Brunswick-Wolfenbüttel, Hesse-Cassel, and Magdeburg were annexed by the treaty of Tilsit, July 9, 1807; and Hanover, March 16, 1810. This kingdom was overthrown by the battle of Leipsie, Oct. 16, 18, and 19, 1813; and the following year its constituent provinces were restored to their former possessors.

Westphalia (Treaty). — The name of Public Peace of Westphalia was given to a compact made A.D. 1571, between the emperor Charles IV., and the States of the empire, for maintaining the peace of Germany. The celebrated treaty of Westphalia, which terminated the Thirty Years' War, was signed at Münster and Osnaburg by the plenipotentiaries of France, Germany, and Sweden, Oct. 24, 1648. By this treaty France acquired Alsace, and Sweden Pomerania, Rügen, Bremen, and Verden; and the inde-
pendence of Holland and Switzerland was formally recognised.

WEXFORD (Ireland), chief town of the county of the same name, was founded by the Danes, and surrendered to Fitzstephen, the English adventurer, A.D. 1169. It obtained a charter in 1318. A parliament was held here by the earl of Desmond in 1463. James I. confirmed and extended its charter in 1608. The town was seized by the insurgents, who received their principal foreign supplies at its port, in 1641. Cromwell having reduced it, military execution was inflicted upon the inhabitants in 1649. It was garrisoned by the troops of William III. in 1688, and was taken by the rebels in 1798. St. Selsker Abbey was founded about 1190.

WEXMOUTH (Dorsetshire), an important commercial place in the 14th century, was united with the borough of Melcombe Regis A.D. 1571. Ralph Allen, of Bath, brought it into repute as a bathing-place about 1768. George III. paid his first visit to the place July 16, 1789. A naval fête and Dutch fair were got up for the entertainment of the king and queen, Sept. 29, 1804.

WHALEBONE.—Bracton and Britton, who flourished during the 12th century, state that it was an ancient feudal right of the queen of England to claim the tail of every whale caught on the British coast; but the earliest mention of whalebone, which is contained in the head of the animal, occurs A.D. 1598, when some English sailors brought a large number of fins, as the pieces of baleen are erroneously called, from Cape Breton. A riding-whip of whalebone, possessed by Queen Elizabeth, is mentioned as a valuable article. The first instance of the bone being systematically sought for as an article of commerce occurs in 1617; and by 9 & 10 Will. III. c. 23 (1699), the importation of ready-cut whalebone was prohibited. Laurence Kortwright patented certain improvements in the preparation of this useful material in March, 1841.

WHALE-FISHERY.—The capture of the whale was practised by the Norwegians as early as A.D. 887, and was systematically pursued as a calling by the Biscayans during the 12th, 13th, and 14th centuries. By 17 Edw. II. c. 11 (1324), the king was entitled to all whales and great sturgeons taken in British seas; and in 1388 Edward III. rewarded Peter Bayune for his expense in providing a fleet for the royal use, by granting him a tax of £6 on every whale carried into the port of Bariitz. The Dutch discovered the abundance of whales in the neighbourhood of Spitzbergen in 1596, and thus opened the way for a profitable fishery by the merchants of Holland in the northern seas. In 1611 the first English whaling expedition sailed from Hull, which remained for a long period the centre of the English whale-fishery. In 1614 the Dutch trade was monopolized by a single company, but in 1642 it was thrown open, with immense benefit to the national commerce of Holland. The American whale-fishery commenced in 1690, and the fishery of the English South-Sea Company in 1724. The harpoon-gun was invented in 1731. Several acts of parliament have been passed for the encouragement of the whale-fisheries, the chief being 22 Geo. II. c. 45 (1749). Louis XVI. revived the French fishery in 1784. Owing to the decreasing demand for whale oil, in consequence of the use of gas and the scarcity of fish, the whaling trade is declining.

WHEAT. (See Bread, Corn, &c.)

WHEATBARROW.—This simple vehicle is said to have been invented by Blaise Pascal, the geometrical (1623—1662).

WHEELS.—The first wheels were, doubtless, plain disks of wood, probably composed of segments of the circular boles of trees. The custom of using an iron tire was practised by the Romans, and wheels entirely of metal were sometimes employed in classic war-chariots. The wheel has been variously applied by different nations as an instrument of punishment. The Greeks bound the criminal to the circumference, and whirled him round until death was the result. Breaking on the wheel was introduced in Germany, and was legally adopted in France by Francis I. in 1534.

WHIG. (See Tory.)

WHIST.—This game originated in England, and is mentioned as a common pastime A.D. 1680, though no regular science was usual in playing it till about 1730, when it was studied by a card-party that met at the Crown coffee-house, in Bedford Row. Hoyle's celebrated work first appeared in 1748, when he taught the game at a guinea a lesson. The name is said to have originated in the silence which the intricacy of the game renders indispensable.

WHITBY (Yorkshire) probably took its rise from the abbey founded by Oswy, king of Northumbria, A.D. 658. The abbey and town were both destroyed by the Danes about 867. They were restored after the Norman conquest, but alum-works in the neighbourhood raised the port to some distinction in the reign of Elizabeth. The chapel of ease was erected in 1788. The central tower of the abbey ruins fell to the ground in 1830.

WHITEBAIT DINNER.—The annual ministerial whitebait dinner is said to have originated about A.D. 1721, when Captain Perry was employed in repairing Dagenham Breach, in Essex, and a body of parliamentary commissioners was appointed to superintend his labours. These gentlemen held a board meeting every year at the Breach House, and concluded their business proceedings by a fish dinner, to which, on one occasion, they invited the great commoner William Pitt. The experiment proved very successful, and became a precedent for a similar annual festival, the scene of which was afterwards removed to Greenwich.

WHITBOYS, OR BOWHALEEN RAVNS.—This Irish party derives its name from the white shirt which its members wore over 899
their dress during their depredations. The society was formed in October, 1761, and in 1762 a military force under Lord Drogheda was sent for its suppression. Father Nicholas Sheehy, one of their most violent leaders, was executed at Clonmel, March 15, 1766. In 1786 another Roman Catholic party appeared, known as the Right-boys, who also proved very dangerous. The White-boys were again in insurrection in 1822, when they committed many shocking outrages.

WHITEFRIARS (London).—This precinct of London, situated between Fleet Street and the Thames, derived its name from the White Friars church of the Carmelites (q.v.), which was founded here by Sir Richard Grey a.d. 1241. It was one of the most notorious of the old London sanctuaries, and, under the slang name Alsatia, was the resort of the lowest dregs of society. Its privileges as a sanctuary were confirmed and enlarged by a special charter in 1608. Whitefriars Theatre was built about 1580, and was pulled down in 1613. Salisbury-court Theatre was erected near the original site in 1629, and was destroyed by the Puritans March 24, 1649; and the Duke's Theatre, in Dorset Gardens, which supplied the place of the two former edifices, was opened Nov. 9, 1671, and finally removed soon after 1720.

WHITEHALL (London).—The first palace on the site of the modern Whitehall was erected by Hubert de Burgh, the celebrated chamberlain of King John and chief justice of England under Henry III., who bequeathed it on his death, in 1243, to the convent of the Black Friars in Holborn. In 1248 it was purchased by Walter de Grey, archbishop of York, who made it the town palace of that see, on which account it was called York Place. Its magnificence was greatly increased by Cardinal Wolsey, who resigned it to Henry VIII. by a charter dated Feb. 7, 1530, when its name was changed to Whitehall, and the building became the regular winter palace of the English sovereigns. The old banqueting-house was destroyed by fire Tuesday, Jan. 12, 1619, and the present edifice, commenced by Inigo Jones June 1, 1619, was completed March 31, 1622. The ceiling was painted abroad by Rubens in 1635. Whitehall is chiefly famous in history as the scene of the execution of Charles I., Jan. 30, 1649. The scaffold was erected in the street, and, according to some contemporary authors, a passage was opened through the wall of the palace for the egress of the king. Grinning Gibbons' statue of James II. was erected Dec. 3, 1686. A considerable portion of the old palace was destroyed by a fire which broke out April 10, 1691, and it was at length completely destroyed by a fire which commenced Tuesday, Jan. 4, 1698, and lasted seventeen hours. The Banqueting-house was converted into a chapel by George I. in 1724, and Holbein's Gate was removed to make room for Parliament Street, in August, 1759. The fine façade of the Treasury, Whitehall, opposite the Banqueting-house, was erected by Sir Charles Barry in 1847.

WHITE HATS.—The name given to some extreme democrats who formed a party at Ghent, a.d. 1837. Headed by Hyons, they revolted against Count Louis in 1837, and took Bruges. Hyons was poisoned at Damme the same year, and through the mediation of Philip II., duke of Burgundy, a peace was concluded in December, 1839. The struggle, renewed in 1839, was not finally terminated until Philip II. of Burgundy obtained power in 1834.

WHITEHAVEN (Cumberland) consisted of half a dozen fishermen's huts a.d. 1586. It was attacked by the pirate Paul Jones in 1778.

WHITE PENITENTS. (See Bianchi.)

WHITE PLAINS (Battle).—The Americans were defeated at this place, near New York, by the English under General Howe, Oct. 28, 1776.

WHITE SHEEP.—A tribe of Turkomans, so called from the figure on their banner, led by their chief Azan Hasoun, acquired possession of western Persia a.d. 1468. They were conquered by Shah Ismail in 1501.

WHITE TOWER.—This most celebrated portion of the Tower of London (q.v.) was erected by William I. about a.d. 1078, and designed by Gundulphe, bishop of Rochester. It measures 116 feet by 96, and is 92 feet in height.

WHITFIELDIET, or LADY HUNTINGDON'S CONNECTION, the followers of the Rev. George Whitfield, or Whitefield, who was born at the Bell inn, Gloucester, Dec. 16, 1714. In 1732 he was entered at Pembroke College, Oxford, as a servitor, and here he formed an intimacy with the brothers John and Charles Wesley, who were attracting attention from the strictness of their life. In 1736 he was ordained a deacon of the established church, and in a short time his eloquence created intense excitement in London and the principal provincial cities in the south of England. In December, 1737, he accompanied the Wesleys on a missionary tour to Georgia; and in 1738 he returned for the purpose of being admitted to priest's orders, and to collect funds for the support of the religious efforts being made in America. During this visit the orthodox clergy excluded him from their pulpits, in consequence of which he commenced preaching in the open air to the Bristol colliers, and in August, 1739, he returned to Georgia, where he remained two years. On his return he separated from the Wesleys, in consequence of their rejection of Calvinism, and in June, 1741, his admirers built him a large temporary shed in Moorfields, which he called the Tabernacle. In August, 1744, he made a third voyage to America, where he remained nearly four years, after which he was appointed chaplain to the countess of Huntingdon, at whose suggestion the Tabernacle was rebuilt, and opened in June, 1755. The Tabernacle in the Tottenham Court Road
was opened in Nov., 1756; and in 1767 Lady Huntingdon established a college for the education of young ministers in the doctrines of Calvinistic Methodism at Trevecca, in South Wales. Whitfield’s life was devoted to long and arduous preaching excursions through England, Scotland, and Ireland. He made seven voyages to America, and died at Newbury, in New England, Sept. 29, 1770. The first ordination of Whitfieldite ministers took place in 1783, when the connection seceded from the Church of England, of which, however, it retained the forms and most of the doctrines, the chief difference being the absence of episcopacy. Rules for the government of the sect were prepared in 1785. The countess of Huntingdon, from whom the followers of Whitfield derive the name by which they are best known, died June 17, 1791.

Whitsuntide.—The feast of Whitsunday, or Whitsunday, is celebrated in the Christian churches as commemorative of the day of Pentecost (g. v.), in which the apostles received the Holy Ghost. It was devoted in the primitive church to the solemnization of baptisms, and derives its name from the white linen with which the recipients of that ordinance were clad.

Whittington College.—Whittington’s College, or God’s House, was originally founded on College Hill, Thames Street, by Sir Richard Whittington, A.D. 1421, for the maintenance of twenty-nine free mercers of London, of six or seven years of age. It was removed to Highgate in 1806.

Whitbundane (Battle).—Ceculin, king of Wessex, defeated Ethelbert, king of Kent, at this place, supposed to be Wimbledon, A.D. 568.

Wickliffites. (See Wycliffites.)

Wicklow (Ireland), the chief town of the county of that name, supposed to have been a naval station of the Danes, is built on the site of a castle erected by the Anglo-Norman invader Maurice Fitzgerald, about A.D. 1169. The town was burned by the Irish in 1310, and was fortified by Fitzwilliam in 1375. Its corporate rights were confirmed by a charter of James I, in 1613. A Franciscan friary, the ruins of which remain, was founded in the reign of Henry III. The church of the Wicklow union has a tower and a copper cupola, erected in 1777.

Widdin (Turkey), taken from the Turks by John Huniades, the Hungarian captain-general, A.D. 1454, was captured by Prince Louis of Baden in 1689, and was recovered by the vizier Mustapha Kiopril in 1690. It was invested in 1737 by the Austrians, who soon abandoned the siege; and it was similarly threatened and abandoned in 1790. The pasha, Osman-Paswan-Ogli, revolted and declared himself independent in 1792. The fortifications were greatly strengthened by the Turks in 1853 and 1854.

Widows and Widowers.—It appears to have been customary in the East for a man to marry the widow of his deceased brother, in the event of his dying childless, as early as B.C. 1727, when Onan married the wife of his brother Er (Gen. xxxviii. 8), and it was afterwards made a law by Moses, n.c. 1461 (Deut. xxxv. 5—10). Kindness to widows formed an important part of the good deeds required from the Jews. Their rights were regulated in England by 9 Hen. III. c. 7 (1225); and by 22 & 23 Charles II. c. 10 (1670), the widow of an intestate husband receiving half of his personal property, unless she have children by him surviving, in which case her portion is one-third. By 6 & 7 Will. III. c. 6 (1699), various taxes were imposed upon childless widowers, according to their rank in life, the rates being the same as were demanded from bachelors (g. v.). The Widows’ Fund, for the widows of Protestant dissenting ministers, was established in 1738, the Widows’ Friend Society in 1808, and the Society for the Relief of Distressed Widows in 1828. The Hindoo custom of sutteeism, or burning the widow with the body of her dead husband, which is of great antiquity, and is referred to by the Greek writers of the age of Alexander, was declared illegal by the governor-general, Lord William Bentinck, Dec. 14, 1829. (See Dower.)

Wiesbaden, or Wiesbaden (Germany), believed to be the Aquis Mattiacae or Fontes Mattiaci of the Romans, was made the residence of the dukes of Nassau A.D. 1820. In compliance with popular demand, feudal rights were abolished March 6, 1848. The fine Greek statue of Minerva, given by the duke, with a statue to his wife, in 1855.

Wiesloch (Battle).—The allied army, under Count Mansfeldt, defeated the Imperialists, commanded by Tilly, at this place in Germany, April 29, 1622.

Wigan (Lancashire) received a royal charter A.D. 1246, and returned members to parliament in 1295. The earl of Derby was defeated here by the parliamentarian colonel Robert Lilburne, Aug. 25, 1651. It was visited by the Pretender on his southward march in 1745. The town-hall was built in 1720, St. George’s Church in 1781, the Commercial Hall in 1816, and St. Catherine’s Church in 1841.

Wigt, Isle of (Hampshire).—This island, known to the Romans as Vecta or Vectis, and to the ancient Britons as Guith or Guict, was conquered by Titus Vetelianus, A.D. 43, and was seized by Cerdic, king of Wessex, in 530. Wulfhere, king of Mercia, subdued it in 661; but in 686 it was reunited to Wessex by Ceadwalla, who compelled the inhabitants to embrace Christianity, which they had not previously received, and disgraced his victory by many acts of cruelty. The Danes took it in 787, during their first invasion of Britain, and converted it into a magazine for the spoils taken from the Saxons. They frequently ravaged the island, especially in 897, 998, 1001, and 1049. In 1052 it was devastated by Godwin, earl of Kent, in revenge for his banishment by Edward the Confessor, and in 1066 it was invaded by Tostig, earl of Northumber-
land, at the instigation of William I. Edward I. purchased the island in 1293, and in 1340 it was attacked by the French, who were driven to their ships by the islanders. They returned in 1377, and committed great devastations. Baldwin IV., duke of Normandy, was captured at Cardif Castle, which was gallantly defended by Sir Hugh Tyrrel. In 1445 Henry VI. crowned Henry Beauchamp, duke of Warwick, king of the Isle of Wight. The dignity was merely titular, and conveyed no regal authority, and on the duke's death without issue, soon after his coronation, the title was discontinued. In 1545 the French made another unsuccessful attempt on the island, which was the last occasion of its suffering from foreign invasion. The Isle of Wight suffered considerably during the civil wars of Charles I., who was imprisoned at Carisbrook Castle (g.v.). In 1672 Charles II. visited the island, and it is a favourite resort of Queen Victoria. (See Osborne House.) The house of industry, for the indigent poor of the island, was established in 1770. Parkhurst prison was founded as a military hospital and barracks in 1778, and received its first convicts Dec. 26, 1838. The salary of £1,300 per annum, formerly attached to the governorship of the Isle of Wight, ceased in 1841.

Wigs.—The Egyptians, Greeks, and Romans were all familiar with the use of wigs, either covering the whole head, or merely the front, and made of wool, goats' hair, and other materials. Periwigs were introduced at Rome during the imperial era. Wigs are said to have been first worn in England during the reign of Stephen. Long periwigs were introduced in France about A.D. 1529, and in 1595 it was unsafe for children to walk out alone in this country, as they were liable to be robbed of their hair for the wig-makers. Ladies' wigs are mentioned in 1608. Charles II. introduced enormous perukes, which it was fashionable to comb in public, as mentioned by Killigrew in 1663. Wigs with immense toupées are first alluded to in 1731, and were rendered popular by the Macaroni Club in 1772. After undergoing various modifications, the fashion of wearing wigs in preference to the natural hair was abandoned about the end of the 18th century.

Wild Beagars. (See Guerix.)

William and Mary.—This vessel, plying regularly between Bristol and Waterford, struck on the rocks called the Willeys, near the Holmes lighthouse, about eleven o'clock at night, Oct. 26, 1817, and sunk in a quarter of an hour, carrying down with her, of sixty souls on board, all save nine persons, who escaped in a boat and landed a few miles from Cardiff.

William the First, the illegitimate son of Robert I., duke of Normandy, was born at Falaise A.D. 1029. He succeeded his father as William II., duke of Normandy, in 1035, and married Matilda, daughter of Baldwin V., count of Flanders, in 1054. They had four sons and five or six daughters. Robert, the eldest, born in 1056, was surmounted Curthose, and became duke of Normandy in 1087. His brother, William II. of England, waged war against him, and imprisoned him at Christ Church, where he died Feb. 10, 1135. Of William the First's other children, William (see William II.) and Henry (see Henry II.) became kings of England. Richard died young; and of his daughters, Cecilia, Adeliza, Matilda, Constance, Adela, and probably Gunderud, but little is known. William I., having laid claim to the English crown, landed on the coast of Sussex, defeated Harold II. at the battle of Hastings (g.v.), Oct. 14, 1066, and was crowned king at Westminster Dec. 25. His queen, Matilda, arrived in England in 1068, and was crowned on Whitsunday, May 11. She died Nov. 2, 1083, and was buried at Caen. William II. died at Rouen Sept. 8 or 9, 1087, and was buried at Caen. He was named the Conqueror.

William the Second, the third son of William I. and his wife Matilda, was born about A.D. 1060; succeeded on the death of his father, and was crowned Sunday, Sept. 26, 1087. He was killed in the New Forest, Aug. 2, 1100, and was buried at Winchester. William II., who never married, was surmounted Rufus, from the colour of his hair.

William the Third, son of William II., stadtholder of Holland and Zealand, and Mary, daughter of Charles I. of England, was born at the Hague, Nov. 4, 1650. He was made stadtholder of Holland and Zealand in July, 1672. William married Mary, daughter of James, duke of York, afterwards James II. of England, Nov. 4, 1677. At the Revolution the crown was offered by the Convention to William and Mary, who became king and queen of England Feb. 13, 1689, and were crowned April 11. They reigned jointly until the death of Mary, which took place Dec. 28, 1694. She was buried at Westminster, March 5, 1695. William III. died at Kensington, March 8, 1702, and was buried at Westminster April 12. William and Mary left no children.

William the Fourth, duke of Clarence, the third son of George III., was born Aug. 21, 1768. He married the princess Amelia Adelaide Theresa of Saxe-Meningen, July 11, 1818, and succeeded his brother, George IV., as king of England, June 26, 1830. The coronation took place Sept. 8, 1831. William IV. died at Windsor, June 20, 1837, and was buried there July 8. His queen, who survived him, died Dec. 2, 1849. They but had one child, a daughter (born March 27, 1819), who died in infancy.

Wills. — Testamentary arrangements of property are of immemorial antiquity, and appear to be referred to by Moses, who states that Jacob bequeathed to Joseph a portion of his possessions, b.c. 1657 (Gen. xlvii. 22). Solomon is said to have introduced wills into Greece b.c. 594; and they were first regulated at Rome by the laws of the Twelve Tables, b.c. 450. Codicils were in-
troduced by Tertullian. Testa. B.C. 31. Roman wills were required by law to be in Latin until A.D. 439, when they were allowed in Greek; and the practice of making wills was established by the Romans among the Teutonic nations. Lands were devisable by wills in this country before the Conquest; and the privilege of making wills was specially sanctioned by Henry I. in 1100. Richard II. made a will in 1399, which is regarded as the first royal will on record, though it is asserted that similar documents were prepared by previous sovereigns. Testamentary power of freehold land was established by the Statute of Wills, 32 Hen. VIII. c. 1 (1540), which was explained and confirmed by 34 & 35 Hen. VIII. c. 5 (1543). By 29 Charles II. c. 3, s. 5 (1676), wills of land are required to be in writing, signed by the testator, and attested and subscribed by three or four witnesses. The royal power to make wills is defined by 39 & 40 Geo. III. c. 88, s. 10 (July 28, 1800). All the laws respecting wills and testaments were amended and consolidated by 7 Will. IV. & 1 Vict. c. 26 (July 3, 1837), which was amended by 15 & 16 Vict. c. 24 (June 17, 1852). (See Execut. Mortmain, Probate Court, &c.)

WILMINGTON ADMINISTRATION.—The earl of Wilmington succeeded Sir Robert Walpole as first lord of the treasury Feb. 16, 1742. The cabinet was thus constituted:—

<table>

</table>

The earl of Wilmington died July 26, 1743, and a new ministry was formed by Mr. Pelham. (See Pelham Administration.)

WILNA. (See Vilna.)

WILTON (Wilts.), formerly capital of the Saxon kingdom of Wessex, was the scene of a victory gained over the Danes by Alfred, A.D. 871. It was plundered and burned by the Danes in 1006. By the dismemberment of Sherborne, in 909, it became the seat of a bishopric, which continued till about 1045. A new church was erected in 1844.

WIMBLEDON (Battle). (See Wimbr.)

WINCHELSEA (Sussex).—It is not known whether this town existed in the time of the Romans, though it is mentioned as an important place under the Saxons. Under the Norman sovereigns, Winchelsea became one of the chief ports for communication with France, and it was added to the Cinque Ports March 27, 1191. Much injury was done to the town by severe storms and inundations in 1236, and Oct. 1, 1290; and in 1296 it was almost ruined by the severity with which Prince Edward suppressed the frequent piracies of which the inhabitants were guilty.

The old town was finally destroyed by an inundation in 1257, in consequence of which the king granted a charter for the erection of a new port in the adjacent manor of Iham. Edward III. and the Black Prince defeated the Spanish in a sea-fight off the modern town of Winchelsea, Aug. 29, 1380. The town was burned by the French in 1377, and March 15, 1580. In 1404 the walls were repaired, and in 1449 the French again landed, and burned the place. Camber Castle, two miles north-east of Winchelsea, was built by Henry VIII. in 1539. In 1582 the town is mentioned as already in a state of decay, and it has lost all trace of its former importance.

WINCHESTER (Bishopric).—Birinus was appointed first bishop of the West Saxons at Dorchester, by Cynegils, king of Wessex, A.D. 635. In 650 the diocese was divided into two sees, one of which was located at Winchester, and in 678 the sees were reunited and settled in Winchester. In 705 another division occurred, part of the diocese being erected into a new bishopric centred at Sherborne (q.v.), and the remainder being entrusted to Daniel, who thus became the first bishop of Winchester.

WINCHESTER (Hampshire), the Venta Belgarum of the Romans. Mythical tradition ascribes the origin of this fine old city to Ludor Roux Huddraks, king of the Britons, b.c. 932, and there is sufficient reason for believing that it really was founded by the first Celtic inhabitants of the island, by whom it was called Caer Gwent, or White City. It subsequently passed into the hands of the Belge, by whom it was occupied at the period of Caesar's invasion, B.C. 55. The Christian king Lucius, who flourished A.D. 181, is reported to have erected a church or cathedral at Winchester, which was destroyed during the persecution of 304, but was afterwards rebuilt. In 516 the city was taken by Cerdic, who converted the church into a temple of the Saxon gods, and in 519 erected the city into the capital of his new kingdom of Wessex, under the name of Winchester. Cynegils founded the cathedral in 635, and it was consecrated by St. Birinus, apostle of the West Saxons, and their first bishop, in 648. Egbert erected Winchester into the capital of England in 827, and it maintained the distinction throughout the Saxon period. In 871 the Danes ravaged the city and massacred the inhabitants. It was restored by Alfred the Great. St. Ethelwold completed a restoration of the cathedral in 950; and in 1013 the city surrendered to Sweyn. William I. founded the castle before 1070, and in 1079 Bishop Walkelin commenced the rebuilding of the cathedral, which was completed in 1093. Winchester attained its greatest prosperity during the reign of Henry I., when it extended a mile in every direction beyond its present limits. The hospital of St. Cross was founded in 1182 by Henry de Blois, bishop of the diocese, and Wolvesey Castle in 1138. The treaty of Winchester, between Stephen and Matilda, was
signed Nov. 7, 1153. (See England.) The college of St. Mary at Winchester was commenced by William of Wykeham, March 26, 1387, and completed in 1393. The establishment of London as the capital of England in 1156, and the suppression of the monasteries by Henry VIII. in 1536 and 1539, proved fatal to the ancient glory of this city. It was taken by Oliver Cromwell in September, 1645, and was much favoured by Charles II., who founded a royal palace, which was intended to be built by Sir Christopher Wren, March 23, 1683, but which was discontinued on the death of the king. The cathedral was renovated during the reign of Queen Anne, and the guildhall was founded in 1711. The unfinished palace of Charles II. was converted into military barracks in 1810. Councils were held at Winchester in November, 855; 1070; April 1, 1076; Aug. 25, 1139; and April 7, 1141.

WINDING-UP ACTS, to facilitate the dissolution of joint-stock companies and other partnerships, were amended by 11 & 12 Vict. c. 45 (Aug. 14, 1848). This act was amended by 12 & 13 Vict. c. 108 (Aug. 1, 1849). They were repealed, and the laws regarding such associations were codellated by 19 & 20 Vict. c. 47 (July 14, 1856), which was amended by 20 & 21 Vict. c. 14 (July 13, 1857).

WINDDMILLS are of oriental origin, and are said to have been used in Hungary before A.D. 718. They were introduced into England and France about 1040, and were used for drainage purposes in Holland soon after 1089. The earliest windmills were constructed to turn completely round, the moveable top being a Flemish improvement of the 16th century.

WINDS.—The Egyptians, Greeks, and Romans seldom used windows in the construction of their houses and temples, the principal rooms of which were mostly lighted from above. There were, but the doors were small, being originally mere openings in the wall, closed by shutters. Sometimes they were covered with lattice or net-work, and sometimes by plates or transparent stone. Glass windows were found at Pompeii, which was overwhelmed A.D. 79, and were re-invented about the 3rd century, and introduced into England by Benedict Biscop in 674. (See Glass.) The form of the windows is one of the most characteristic features of Gothic architecture. Windows were first taxed in this country by 8 & 7 Will. III. c. 18 (1695). The duty was increased by 20 Geo. II. c. 3 (1746), amended by 21 Geo. II. c. 19 (1748), and further increased by the Tea-commutation Act, 24 Geo. III. sess. 2, c. 38 (1784). It was again raised by 37 Geo. III. c. 105 (July 19, 1797); by 42 Geo. III. c. 34 (April 15, 1802); and by 48 Geo. III. c. 55 (June 1, 1808). It was reduced by 4 Geo. IV. c. 11 (March 19, 1823), and was finally repealed by 14 & 15 Vict. c. 36 (July 24, 1851).

WINDS.—The existence of the trade winds was first ascertained by Columbus at the end of the 15th century; and they were first correctly explained on scientific principles by George Hadley, in the “Philosophical Transactions” for 1735. (See Storms.) WINDSOR CASTLE (Berkshire).—Windsor derives its name from the Saxon town of Windleshora, which was situated about two miles from the present town, and was granted by Edward the Confessor to the monks of Westminster. William the Conqueror received it in exchange for Wokendune, in Essex, soon after his accession, A.D. 1066, and commenced the erection of the castle, where he held his court at Whitsuntide, 1070. A council was held at Windsor April 26, 1114. The fortifications and buildings were greatly increased by Henry I., and in 1216 King John successfully defended the castle against the barons. Henry III. founded a chapel, the original of St. George’s chapel, in 1240. Edward I. erected the town into a free borough in 1276, and the castle was refounded by Edward III., who obtained a papal bull sanctioning the act, Nov. 30, 1351. The same monarch caused William of Wykeham to rebuild the castle about 1360, and made it the seat of his newly-founded order of the Garter. Edward IV. commenced the rebuilding of the chapel in 1474, which was continued by succeeding sovereigns, and finally completed by Henry VIII. Elizabeth constructed the terrace, and, in 1572, erected the gate on the hill next the town; and a new gallery and banqueting-house were added soon after 1576. The park and forest were surveyed in 1605, and various improvements were made by Charles I. in 1635. The chapel was entered by a parliamentary force Oct. 23, 1642, and was afterwards much injured by the bigotry of the Puritans; and the castle was the prison of Charles I. from Dec. 12, 1648, to Jan. 19, 1649. Sir Christopher Wren made several improvements during the reign of Charles II., who refaced the terrace with stone in 1676, and erected an equestrian statue of himself in 1686. The Queen’s Walk was formed in 1707, and the drive along the Long Walk in 1710. The Queen’s Lodge was completed in 1752, and in 1787 the interior of St. George’s chapel was newly decorated. The royal vault was constructed in 1810. George IV. laid the first stone of several important alterations Aug. 12, 1824, and resumed his residence in the improved building Dec. 9, 1828. The royal stables were erected in 1859, at an expense of £70,000. A fire which broke out in the Prince of Wales’s Tower March 19, 1853, in consequence of the heat of the flues, was quenched without causing much damage. The Prince Consort died at Windsor Castle, Saturday, Dec. 14, 1861, and was interred in the vaults of St. George’s chapel.

WINE.—Noah made wine as early as B.C. 2347 (Gen. ix. 20 and 21), and commentators believe that the art was known to the antediluvians. The Egyptians ascribed the invention to Osiris, whose worship was instituted about B.C. 2100, and the Chinese state that rice wine was manufactured by their king Ching Nung B.c. 2498. The Greeks and other classical nations regarded
Bacchus, or Dionysius, who was reputed to have flourished about B.C. 1457, as the earliest wine-maker. The Jews esteemed the wines of Lebanon and Helbon; the Greeks those of Lesbos, Chios, and the other islands of the archipelago; and the Romans the celebrated Falernian and Cucuban. The classics mixed their wine with sea-water, asafetida, tar, and other substances at variance with modern taste, and exhibited great discrimination in their preference of the vintages of certain years. The production of wine commenced in France soon after B.C. 600, when the culture of the vine (q.v.) was introduced at Marseilles; and Provence, Dauphiny, Languedoc, and Auvergne, were celebrated for their vintage as early as B.C. 120. In the time of the Romans and Saxons, wine was made in England; but the manufacture was gradually relinquished, and, about the year 1554, the importation of French wines from Bordeaux commenced. Hippocrea, a mixture of wine and spices, was much admired during the Plantagenet period. Wine was exported from Madeira before 1460, and Ratafia wine was introduced into France from Italy in 1533. Sack, or sherry, from Xeres in Spain, Canary, and Malaga, formed the popular wine of the 16th and 17th centuries. The wines of Portugal were first imported about 1600, and Champagne attained its present quality and repute about 1610. The art of making raisin wine was introduced into France in 1603, and port wine was manufactured in 1635, and port came into use about 1690. The practice of importing this wine qualified with brandy commenced in 1715, and led to many abuses in the wine-trade, which were much increased by the monopoly established in favour of the Oporto company, Sept. 10, 1756. The Catawba wine of the United States came into repute about 1826, and unsuccessful attempts to introduce Muscatel as a substitute for port were made in 1832. The original Oporto company, abolished by Don Pedro in 1833, was re-established April 7, 1838. It was finally abolished in October, 1852. Australian wine of excellent quality received medals from the Society of Arts in 1856. Many statutes have been enacted for regulating the duties on wine, one of the earliest of which is 7 Hen. VII. c. 8 (1490). Wine-dealers were compelled to take out a license by 12 Charles II. c. 25 (1660). The policy of taxing the produce of French vineyards more highly than the wines of other countries was commenced by 4 Will. & Mary. c. 5 (1692), when an additional duty of £3 per tun was imposed. This discrimination was carried to much greater length by subsequent acts, and was rendered permanent in 1703 by the Methuen treaty (q.v.). William Pitt reduced the duties on French wines nearly one-half, and on other wines nearly a third, by 26 Geo. III. c. 59 (1786). They were again increased 10s. 6d. per gallon on French wines, and 8d. 1s. 6d. on Spanish and Portuguese, by 36 Geo. III. c. 123 (May 19, 1796). Mr. Robinson, afterwards Lord Ripon, reduced them to 7s. 3d. and 3s. 10d. per gallon on French and other foreign wines, and 2s. 5d. on the produce of the Cape of Good Hope, by 6 Geo. IV. c. 104 (July 5, 1825); and by the Equalization Act, 1 & 2 Will. IV. c. 30 (Oct. 5, 1831), all foreign wines were rated at 5s. 6d. per gallon, and Cape wines at 2s. 9d. By the commercial treaty concluded with France Jan. 23, 1860, the duties on wines were reduced to 3s. per gallon until Jan. 1, 1861, when a scale of 1s., 1s. 6d., and 2s. per gallon, according to the amount of proof spirit contained in the wine, and of 3s. per gallon on wine in bottles, came into operation. Wine licenses were granted to refreshment-houses by 23 Vict. c. 27 (June 14, 1860).

**WINWIDFIELD (Battle).—**Penda, king of Mercia, was defeated and slain at this place, near Leeds, by Osyf, king of Northumberland, a.d. 655.

**WIPPEDSLEEFT (Battle).—**Hengist, the Saxon, gained his first victory over the Britons, led by Vortimer, a.d. 466. He named the field after Wipped, one of his principal officers, who fell in the engagement.

Wire was originally formed by hammering the metal on an anvil, and its manufacture by drawing is mentioned in the history of Augsburg, a.d. 1351, and in that of Nuremberg in 1360. A large drawing-machine driven by water, believed to have been the invention of a person named Rodolph, was constructed at Nuremberg about 1400. Anthony Fournier, a Frenchman, much improved the art in 1570. Fine gold and silver wire, for spinning round silk and for weaving, was made by Frederick Held at Nuremberg in 1592, and after the patent for securing his process had been several times renewed, it was converted into a fief for the heirs male of the family, Sept. 26, 1622. In England, wire was manufactured by the hand till the art of drawing it was introduced by foreigners in 1565. The first flattening-mill was erected at Sheen, near Richmond, by a Dutchman, in 1663.

**WRITEMBERG. (**See WÜRTZMANN.)

Wisconsin (North America) was visited by the French about a.d. 1660, and continued nominally in their possession till ceded to England in 1763. It was erected into a territorial government in 1836, and admitted into the Union as a state in 1848. Its constitution was confirmed by a popular convention in April, 1848.

**WISMAR (Germany).—**An alliance between France and Sweden against Austria was concluded at this town of Mecklenburg-Schwerin, March 20, 1636. The town was granted to Sweden by the peace of Westphalia, Oct. 24, 1648, and purchased from Sweden by Schwerin, for a sum of 1,200,000 dollars, in 1693.

**WISSEHBURG (Battle).—**The emperor Sigismund having abandoned the siege of Prague, held by the Hussites, was attacked at this place, in the vicinity, by Ziska, their leader, and totally defeated, July 14, 1420.
WITCHCRAFT.—The Mosaic law strictly enjoined death as the penalty of witchcraft, B.C. 1491 (Exod. xxii. 18); but commentators are of opinion that the offence thus denounced was united with idolatry and also with the crime of poisoning. The earliest example of a witch is that of Endor, whom Saul employed to raise the spirit of Samuel B.C. 1055 (1 Sam. xxviii. 7—25). Dr. Mackay, in his "Memoirs of Extraordinary Popular Delusions," says, "Europe, for a period of two centuries and a half, brooded upon the idea, not only that partial spirits walked the earth to meddle in the affairs of men, but that men had power to summon evil spirits to their aid, to work woe upon their fellows . . . . Thousands upon thousands of unhappy persons fell victims to this cruel and absurd delusion. In many cities of Germany, the average number of executions for this pretended crime was 600 annually, or two every day, if we leave out the Sundays, when it is to be supposed that even this madness refrained from its work."

A.D.
1394. The Stedingers, a tribe of Frieslanders, are exterminated by order of the pope and Frederick II. of Germany, as a nation of witches.
1397. The Moors are suppressed throughout France on a charge of sorcery.
1431. May 30. Joan of Arc is burnt at Rouen as a witch.
1459. The Valenusse are cruelly persecuted at Arras as witches.
1487. Two old women are burnt at Constance, on a charge of having raised a storm which had occasioned much loss of property.
1488. Innocent VIII. issues a bull appointing inquisitors for the suppression of witchcraft.
1494. Alexander VI. nominates a commission against witches.
1515. About 200 persons are burnt in Geneva as witches.
1520. Leo X. issues a commission.
1524. A thousand victims to the witch mania is burnt at Como.
1541. Witchcraft employed against the lives of others is declared felony in England, by 36 Hen. VIII. c. 8.
1561. Five poor women are burnt at Verneuil on a charge of having changed themselves into cats.
1562. All witchcraft is declared a crime of the highest magnitude in the eye of the English law, by 5 Eliz. c. 16.
1571. Trois Echelles is burnt at Paris, for having, on his own confession, sold himself to the devil. This man stated that he had 1,500 accomplices, and accused many persons, who were tried and executed.
1572. Jan. 18. Gilles Garnier is condemned to be burnt at Dôle, as a loup-garou, or man-wolf, in which capacity he was accused of canibalism.
1558. April 7. Execution of the Warbois witches, an old woman and her husband and daughter, for witchcraft. Their property was confiscated, a portion being devoted to endow an annual lecture, by a doctor of Queen's College, Cambridge, on the enormity of witchcraft. This lecture was still delivered as late as 1759.
1597. James of Scotland publishes his work on Demonology at Edinburgh.
1604. Further measures are taken for suppressing witchcraft by 1 or 2 James I. c. 12.

A.D.
1617. The marche de d'Ancre suffers at Paris in consequence of the machinations of Mary of Modics, who is fearful of her influence over the mind of Louis XIII.
1634. The celebrated Lancashire witches, viz., eight people, are executed on the evidence of Mary Robinson, resident at Pendle Forest, Lancashire.
1644. Matthew Hopkins, the celebrated witch-finder general, flourishes.
1652. The persecution for witchcraft in Protestant Switzerland takes place at Geneva.
1654. The elector of Brandenburg forbids the torture of supposed witches, and denounces the madness of the tormenting as unjust and cruel.
1655. Sir Matthew Hale condemns two women to the stake as witches.
1669. Sweden is the theatre of a violent anti-witch mania.
1716. A woman and her daughter, aged nine years, are hanged at Huntington for selling their souls to Satan. This is the last judicial execution in England for witchcraft.
1729. The last execution for witchcraft in Scotland takes place this year.
1736. The capital sentence against witchcraft is abolished by 9 Geo. II. c. 5.
1749. A cruel persecution of supposed witches rages at Wurzburg, in Germany.
1751. July 30. An old woman named Osborne is drowned at Tring by the people as a witch.

WITNAGERMOT, OR Assembly of the Wise Men.—This was the great council of our Anglo-Saxon kings. Instances of its meeting are recorded in the reign of Ina, king of Wessex (A.D. 688—727). King Alfred ordained that it should meet twice in the year, or oftener if needful. The witenagemot outlawed the family of Godwin, earl of Kent, in 1043, and restored them in 1052.

WITIPSK. (See VITEBSK.)

WITHAM (Essex), believed to have been a Roman station, was fortified by Edward the Elder A.D. 913.

WITNESSES.—By the law of Moses, two, at least, were required to establish a question of fact. A false witness was to suffer the same punishment due to the offence of which he made accusation (Deut. xix. 15—19), B.C. 1451. Amongst the Romans and some other nations, it was the custom to cuff them and pull their ears, in order to make them remember their evidence. Witnesses were seldom called at trials in this country, the jurors usually deciding from their own knowledge of the prisoner, and of the facts of the case. The first traces of the present practice in that respect occur about 1349. It was fully established by the middle of the 15th century. By the ancient practice of most European countries, the evidence of women was inadmissible, and in Switzerland the testimony of two women was only considered equivalent to that of one man so late as 1824. Disqualification arising from criminal conviction was removed by Lord Denman's act (6 & 7 Vict. c. 85), Aug. 22, 1843. By 16 & 17 Vict. c. 83 (Aug. 20, 1853), husbands and wives are compellable to give evidence for or against each other, except in criminal cases.

WITTENBERG (Prussia) surrendered to
the Imperial army Aug. 21, 1759, and having been bombaraded by the Imperialists capitulated Oct. 14, 1760. The French took possession, making it a depot for ammunition and provisions, in October, 1806. It refused to surrender on the summons of Colonel Schill in 1809; was besieged Sept. 15, 1813, by the allies, who were compelled to raise the siege in October. Again besieged by the allies, it was taken by assault Jan. 15, 1814, and was ceded to Prussia May 18, 1815. The university, in which Luther and Melancthon held professorships, was established in 1502, and incorporated with that of Halle in 1815. The colossal statue of Luther in the market-place was erected in 1821.

WITTSROCK (Battle.)—In this engagement the imperial troops in Brandenburg, commanded by the elector of Saxony, were attacked and routed by the Swedes, under General Banner, Sept. 24, 1636. Five thousand Austrians and Saxons fell on the field, seven thousand were taken prisoners, and an immense amount of ammunition and baggage was captured.

WOLLIN (Prussia).—This seaport town of Stettin was in a flourishing condition as early as A.D. 776. In 805 it received the people of Wineta, which was destroyed that year; and in 1125 its bishopric was founded by Otho, bishop of Bamberg. Waldemar I. of Denmark destroyed Wollin in 1127.

WOLODOMIR. (See SIRIUS.)

Wolves.—WOLFRUN (Staffordshire) was called Wolfrune's Hampton, from Wolfrunia, sister of King Edgar, who founded a monastery here A.D. 996. It received a charter of incorporation in 1847. The free grammar-school was founded by Sir Stephen Jenyns in 1513, and the Bluecoat school about 1710. St. John's church was erected in 1755; St. George's church was built in 1830; the South Staffordshire Hospital, at a cost of £18,000, in 1848; and the Orphan Asylum, at a cost of £9,000, in 1854.

Wolves were so numerous in some parts of England that a retreat for passing travellers was erected at a place called Flixton, in the reign of Ethelstan (A.D. 925—941). They were nearly extirpated in the reign of King Edgar, who imposed an annual tribute of three hundred wolves' heads upon Ludwal, prince of Wales. Sir Ewen Cameron killed the last seen in Scotland in 1680. They were extirpated in Ireland about 1710.

Woman.—From the circumstance that the chapters of the Bible which treat of the incidents immediately after the Fall contain scarcely any allusions to women, it is inferred that the female character was then held in very low estimation. Among the pastoral nations of the primitive ages, women tended the flocks and herds, drew water, and performed other menial offices. The Egyptians treated them with considerable kindness, and employed them in weaving and spinning; and the Jewish law, though severe in the case of female offences, afforded them ample protection, and assigned them an important position in the national and social economy. The subsequent demoralization of the Hebrew race was in nothing exemplified more clearly than in the sordid treatment and the low character of its women. Among the Greeks they were secluded in private apartments, and were compelled to wear a veil when out of doors. The Romans treated women with great consideration, intrusting to them the education of the young and the control of their household affairs; but in the latter days of the Republic and of the Empire, when morals became corrupt, measures were taken for their restraint. Thus the Lex Oppia imposed sumptuary restrictions; Augustus prohibited their appearance at the public games; and, by a law passed A.D. 225, they were formally excluded from the senate. The ancient Germans allotted a very high position to the female sex; and Tacitus commemorates the excellence of character which their women exhibited. During the Dark Ages the female lot was of course a hard one, the right of free choice in marriage and the advantages of education being totally denied them. The romantic chivalry of the 11th and following centuries introduced a better order of things, and laid the foundation for that recognition of female rights and respect for female excellence which is at once the most powerful agent and the clearest evidence of modern civilization. The public whipping of women was abolished by 57 Geo. III. c. 75 (July 7, 1817), and the punishment was altogether prohibited in the case of female offenders by 1 Geo. IV. c. 57 (July 15, 1820). By 5 & 6 Vict. c. 99 (Aug. 10, 1842), the employment of women in mines was declared illegal. (See AMAZONS, LADY, MARRIAGE, &c.)

Wonders of the World.—The seven wonders of the world which excited the marvel of the ancients were,—the Colossus of Rhodes (q. v.); the temple of Diana at Ephesus (q. v.); the tomb of Mausolus (see MAUSOLEUM); the Egyptian pyramids (q. v.); the lighthouse on the Pharos (q. v.); the hanging gardens, constructed at Babylon by Queen Semiramis about B.C. 2017; and the celebrated colossal statue of Jupiter Olympus, constructed in ivory and gold by Phidias, who flourished B.C. 440.

Woodcuts.—The ancient Egyptians practised the art of engraving on wood for the purpose of producing an impression upon soft clay. In China woodcuts were employed in literature about the 12th century. The earliest in Europe were probably executed at Nuremberg about A.D. 1340, and seem to have been first applied to the production of playing-cards. The first woodcut with a date (1423) represents St. Christopher carrying our Saviour across a river on his shoulders. The improvement known as "cross-hatching" was shown in a work printed at Mentz in 1486. In Germany woodcuts were used for illustrating books, although the style of workmanship became much deteriorated between 1546 and 1580. (See ENGRAVING AND ENGRAVING ON WOOD.)
Woods and Forests.—The demesne lands of the crown, *tergo dominicales regis*, whence is derived one branch of the ordinary revenue of the sovereign, were either reserved to the crown at the original distribution of landed property, or came to it afterwards in various ways. William III. had so reduced their extent by the exercise of his power of alienation, that a civil list was passed by which Queen Anne, in 1702, placed them at the disposal of the parliament, in return for £700,000 a year (Anne, s. 1, c. 7). The like arrangement has been made at the commencement of each succeeding reign. The office of surveyor-general of his majesty's works was created by 46 Geo. III. c. 142 (1805), and altered by 50 Geo. III. c. 65 (June 9, 1810). The woods and forests are now managed by the Commissioners of Woods and Forests, a board formed and regulated by 10 Geo. IV. c. 50 (1829), and 2 Will. IV. c. 1, s. 1 (Feb. 13, 1832).

Wood's Halffence. (See Draper's Letters.)

Woodstock (Oxfordshire).—This ancient town derives its name from the forests by which it was anciently surrounded, and was a place of considerable importance during the Saxon period. Ethelred I. (866—871) is said to have held a parliament at Woodstock; and it is believed that Alfred the Great (871—901) resided here while engaged in his translation of Boetius. Henry I. resided much at this town, and it was the scene of Henry the Second's amour with the fair Rosamond Clifford in 1184. (See Rosamond's Bower.) The same monarch received the homage of Malcolm of Scotland at Woodstock in 1164, and in 1275 it was the scene of a parliament summoned by Edward I. The renowned Edward the Black Prince was born at Woodstock June 15, 1330. The town received its first charter from Henry VI. in 1453, and was the prison of the Princess Elizabeth in 1555. In 1649 the Rump Parliament appointed a commission for surveying the royal property at Woodstock. Blenheim Palace, the magnificent seat of the duke of Marlborough, was erected at Woodstock by Sir John Vanbrugh in 1705, and was presented to the duke by the nation. Woodstock-town Hall was built from the designs of Sir William Chambers in 1766.

Wool-combers.—The septennial festival to their patron St. Blaise was celebrated at Bradford with great rejoicing, Feb. 3, 1825. This saint, who holds a place in the Church of England calendar, was bishop of Sebaste, in Armenia. He was tormented with iron combs and martyred under Licinius in 316.

Woolen trade and manufacture.—The woolen manufacture, one of the most ancient on the face of the globe, is stated to have originated in Babylonia. The fable of Jason and the Golden Fleece points to its existence in Greece as early as B.C. 1263. Moses prohibited the Jews from wearing clothes woven of wool and linen together, B.C. 1451 (Deut. xxvii. 11). England has been celebrated for its woolen goods from the earliest periods, and Winchester was a noted manufacturing town for this species of industry during the Roman occupation. It is said to have been practised in France as early as A.D. 960. The worsted manufacture was established at Worstead, in Norfolk, by a colony of Flemish settlers, in 1327, and in 1331 Edward III. greatly encouraged the woolen trade by receiving John Kemp, and seventy families of Walloon weavers, from Flanders. The exportation was first prohibited by 11 Edw. III. c. 1 (1337). Many improvements in the manufacture of woolen goods were introduced by refugees from Holland in 1420, and in 1646 English sheep were exported to Spain. In 1493 the marts of English cloths was established at Calais. In 1568 a large number of woolen-workers from France and Flanders settled in England, and further measures were taken for the prohibition of the export of wool, and in 1636 a number of English manufacturers emigrated, and established an important trade at Leyden and Alkmaar. In order to encourage the woolen trade of England, it was ordered by 18 Charles II. c. 4 (1666), that all corpses should be buried in woollen shrouds. (See Burial.) The exportation of English wool was again prohibited, and the importation of Irish wool into this country was permitted by 7 & 8 Will. III. c. 18 (1696). The first machine for spinning wool was invented by John Wyatt about 1733. Lewis Paul's carding-machine was patented Aug. 30, 1748, and Hargreaves made his first spinning-jenny in 1767. Arkwright's machine was invented about 1768. The first importation of wool into England took place in 1770, and merino sheep (q.v.) were first brought into the country in 1791. Dr. Edmund Cartwright's combining-machine received its first charter in 1799. The sequence of the number of wool-combers thus thrown out of employment, measures were adopted by 35 Geo. III. c. 124 (June 26, 1796), for enabling them to exercise other trades. The first Alpaca sheep exhibited in this country were shown in 1811. (See Alpaca.) Several teazling-machines, composed of metallic wires, were patented in France in 1818. All the acts prohibiting the exportation of wool were repealed by 5 Geo. IV. c. 47 (June 3, 1824). John Platt's combing-machine was patented in November, 1827, James Noble's in February, 1834, and Ross's improvements March 15, 1831. Customs duties on wool are mentioned by 51 Hen. III. st. 5, c. 6 (1266). A tax was imposed on exported woolen goods by 12 Charles II. c. 4 (1666). It was removed by 11 & 12 Will. III. c. 20 (1700).

Woolwich (Kent).—The Henry Grace à Dieu, the largest ship of the period, named after Henry VIII., was built here a.d. 1515; she was burned in 1553. The Sovereign of the Seas, of 100 guns, called the Golden Devil by the Dutch, was also built here in 1637. The arsenal was established in 1716; the Royal Military Academy was founded in 1719; and the present building was erected.
from the plans of Sir Jeffrey Wyatville, at a cost of £150,000, in 1805. The church of St. Mary Magdalen was built in 1740, and St. John’s church in 1740.

Worcester (Biograph.).—This diocese was separated from Lichfield about a.d. 680. By an order in council of Dec. 22, 1836, the archdeaconry of Coventry was transferred from Coventry and Lichfield to Worcester, and the parish of Shenington, in Gloucestershire, was also annexed July 19, 1837.

Worcester (Worcestershire), the chief town of the county, founded by the Saxons a.d. 680, was destroyed by the Danes, and rebuilt in 894. It was plundered by Hardicanute in 1064. The town was recovered from the Danes by King William I. in 1074. Bernard Neumarch failed in an attempt to take it in 1088. It was plundered by the troops of Henry III. in 1216, on account of a revolt of the inhabitants. A grand tournament held here in 1225 drew down upon the jousters an excommunication from Bishop Blois. The city was captured by the rebel barons in 1263. In the civil war it was taken by Prince Rupert, who defeated a party of parliamentary horse under Colonel Sandys, Sept. 25, 1642. The earl of Essex recovered it the same year. Charles II. entered the city Aug. 22, 1651, and Cromwell stormed the forts and totally defeated the royalists Sept. 3. The last of the six gates of the city was removed in 1787. The cathedral was rebuilt by Bishop Owstald in 1583, and by Bishop Wulfsatan in 1604. It was repaired and re-consecrated in January, 1281, and underwent alterations and repairs in 1830. The bridge across the Severn was built in 1780. The remains of a Franciscan monastery were removed in 1823. A council was held here July 23, 1240.

Worcester College (Oxford) was founded by Sir Thomas Cookes, Bart., a.d. 1714. The chapel, hall, and library were commenced in 1720. The new buildings on the north side of the inner court were completed in 1776, and the hall in 1794.

Workhouse.—By 27 Geo. III. c. 25 (1826), the able-bodied poor were directed to be kept to constant labour. Edward VI. founded the royal hospital of Bridewell in 1553, for the punishment and employment of the vigorous and idle. By 43 Eliz. c. 2 (1601), work was ordered to be provided by the overseers for the poor. By 59 Geo. III. c. 12 (1819), known as Sturges Bourne’s act, parishes were empowered to enlarge or build workhouses where none existed before. Their government was vested in a board of guardians, subject to the control of the Poor-Law Board, by 4 & 5 Will. IV. c. 76 (Aug. 14, 1834).

World.—The era of its creation is fixed by the Jews b.c. 3761. According to the chronology of the English Bible, that event took place B.C. 4004, and according to the Grecian era, B.C. 5508.

Worms (Germany), occupying the site of the Roman Borbetomagus, or Augusta Vangionum, was plundered by the Allemauri A.D. 354, and destroyed by Attila in 451. Clovis rebuilt it about 476. The legislative assemblies of Charlemagne, called Mai Lager from the month when they met, were held here. A council elected Leo IX. pope in December, 1049, and another deposed Gregory VII. in January, 1076. By a concordat, signed at another council, Sept. 8, 1122, the emperor lost some of his influence over ecclesiastical appointments. The marriage of Isabella, sister of Henry III. of England, with Frederick II. emperor of Germany, was solemnized here July 20, 1255. Between this town and Spoleto, at Rome, the Emperor Adolphus of Nassau was slain, in an engagement with Albert of Austria, July 2, 1298. Luther appeared before the diet of Worms, April 4, 1521. By order of Louis XIV., Worms was burned in 1689. George II. of England fixed his head-quarters in the episcopal palace Aug. 27, 1743. The city was taken by the French, under Custine, in Oct. 1792, and again in 1793. The cathedral, commenced in the 8th century, was completed 1110. Councils were held here in Lent, 858; May 16, 865; in December, 1048; January, 1076; Sept. 3, 1122; in April, 1127; and at Pentecost, 1153.

Worsted acquired its name from the town of Worstead, in Norfolk, where the settlement of Flemings introduced woollen manufactures in the 14th century. The trade was moved to Norwich in the reign of Richard II.

Wounding. (See Maiming.)

Wrecks.—Among the early Greeks and Romans, shipwrecked mariners, of whatever nation, were regarded as enemies, and as such were usually put to death or sold into slavery; but the Pandects (q.v.), published in Dec. a.d. 533, made the murder of them a capital crime, and imposed severe penalties on thefts from wrecks. On the subversion of the Roman power, the old barbarous customs were restored, and the majority of such as suffered shipwreck consummated their misfortunes by a life of slavery. Goods washed on shore were adjudged to belong to the king or the lord of the manor; and it was an uncommon circumstance for pilots and landowners to enter into collusion, whereby ships were purposely run ashore for the sake of their plunder; and for the sailors to be barbarously murdered on the beach to prevent the assertion of their rights. The Oleron Laws (q.v.) enacted that in such case the pilot should suffer as a robber; that the lord should be bound in the centre of his house, which was to be ignited at its four corners, and be left to perish; and that common wreckers, after being haledowned in the sea, should suffer death by stoning. The English law regarded wrecks as royal property. In the time of Henry I. it was enacted, that when any passenger
or seaman survived the loss of the ship, it should not be regarded as a wreck; and in the reign of Henry III. it was ruled, that goods so marked as to be clearly identified might be recovered by their owners within a year and a day after the wreck. By 27 Edw. III. c. 13 (1353), goods washed ashore from wrecks were to be delivered to the merchants, who were to pay a reasonable salvage for their preservation. These regulations, however, proved futile, and wrecking continued a frequent crime on the English coasts until a comparatively recent period. By 12 Anne, stat. 2, c. 18 (1719), the chief authorities of seaside towns were ordered to assist ships in distress under forfeiture of £100; and by 26 Geo. III. c. 19 (1755), the prevention of the escape of shipwrecked persons, the wounding of such as had attained the shore, or the exhibition of false lights in order to decoy vessels into danger, were made capital felonies. The laws relating to shipwrecks were consolidated by 9 & 10 Vict. c. 99 (Aug. 28, 1846), and by 17 & 18 Vict. c. 104 (Aug. 10, 1854). A list of the disasters at sea, described in this work, is given in the index, under "Wrecks."

Writing.—Some traditions attribute the origin of writing to Seth, the son of Adam, and others to Ennoch; but there appears sufficient proof that it was invented in the ante-diluvian period. Other authorities consider the system of hieroglyphics (q. v.), which was invented by Athothes, or Thoth, about B.C. 2122, as the most ancient mode of writing. Cadmus carried a knowledge of letters from Phoenicia to Greece, B.C. 1550, and the Pelasgi introduced writing into Italy about B.C. 1476. The Romans practised running-hand as early as the 4th century, and introduced a knowledge of writing into their provinces; but it was not much known in Britain until about the year 596. Writing became an ordinary branch of education during the 14th century. (See Alphabet, Calligraphy, and Illumination.)

Wroxteth. (See Wirconium.)

Württemberg (Germany) was overrun in the 4th century by the Alemanni, who occupied that part afterwards called Swabia, and were conquered by the Franks under Clovis, A.D. 496. Eberhard V. was created duke by the emperor Maximilian I., July 21, 1494. It underwent various vicissitudes during the Thirty Years' war, from 1618, till the peace of Westphalia restored the reigning family, Oct. 24, 1648. It was entered by the armies of France, when the duke was obliged to purchase peace by the payment of 5,000,000 of francs and the cession of territory, Feb. 6, 1801. It was raised to an electorate by the German diet in 1803, and it assumed the title of king Jan. 1, 1806. Censorship of the press was abolished March 1, 1848. National assemblies convoked to revise the constitution of 1819 were dissolved without effecting their object in 1849 and 1850.

Würzchen (Germany).—A collision between the French army, under Napoleon I., and that of the allies, commanded by the sovereigns of Russia and Prussia, occurred in the neighbourhood of this town, May 19, 1813. A general engagement at the village of Bautzen terminated favourably for the French, May 21, and the conflict having been renewed at Würzchen, the allies were forced to retire, May 22.

Würzburg (Bavaria).—St. Kilian is said to have suffered martyrdom here A.D. 657, and it was created a bishopric A.D. 741. The emperor Henry II. wishing to found another bishopric at Bamberg in 1006, was opposed by the bishop of this city. The duke of Bavaria besieged it in 1086. A council was held here in 1086. A confederation of the Roman Catholic princes of Germany met here, and elected Maximilian, duke of Bavaria, as their leader, in 1609. The town was surrendered by the prince-bishop to the French, July 25, 1796. Under Jourdan they sustained a severe defeat from the archduke Charles in the neighbourhood, and the place afterwards surrendered to the Austrians, Sept. 3, 1796. It was besieged by the French in 1800; secularized and ceded to Bavaria Feb. 5, 1803; surrendered to the allies March 21, 1814; and restored to Bavaria in 1815. The cathedral was founded in the 8th century, dedicated in 1159, and much altered in 1240. The Neunmünster church was founded in the 11th century, and the Marien-Kirche was built between 1377 and 1479. The university, established in 1403, was renewed in 1582. The royal, formerly the episcopal palace, was built between 1720 and 1744.

Wyatt's Insurrection.—Sir Thomas Wyatt, a Kentish gentleman, joined with others, A.D. 1553, to prevent the marriage of Queen Mary with Philip of Spain. The duke of Suffolk failed in an attempt to raise troops in Leicester Jan. 29, 1554. Wyatt fortified himself at Rochester Jan. 28, and a number of the troops brought by the duke of Norfolk to attack him went over to his side Jan. 29. He reached Deptford Feb. 1, and entered Southwark, plundered the palace of the bishop of Winchester, but could not effect the passage of London Bridge, Feb. 3. Having withdrawn from Southwark Feb. 6, he marched to Kingston, and crossing the Thames there, reached London. He was deserted by many of his followers, and surrendered, after a skirmish at Temple Bar, to Sir Maurice Berkeley. He was conveyed to the Tower, pleaded guilty to his indictment March 15, and was beheaded April 11. About fifty of his followers were executed between Feb. 13 and 26. Upwards of 400 were brought with halters round their necks to the queen at Westminster Feb. 20, and set at liberty.

Wycliffe, the followers of John Wycliffe, who began to write against the Mendicant Friars A.D. 1360, and was summoned to answer a charge of heresy before the convocation at St. Paul's, Feb. 19, 1377. Having translated the whole of the Scriptures from the Latin vulgate into English,
and employed “poor priests” to travel over the country and disseminate his opinions, he died at Lutterworth, Dec. 31, 1384. The new doctrines and propositions were condemned by the council of London, Feb. 19, 1397. Jerome of Prague returned to that city from Oxford, and in 1402 began to spread the views of Wycliffe, which were formally condemned by the university of Prague in 1404. They were again condemned by the council of London, July 23, 1408, and a papal bull issued in 1409 ordered his writings to be seized, and all persons who professed the heretical opinions to be tried. John Huss persisted in preaching, notwithstanding a prohibition, and was excommunicated by the pope in 1411. A Romish council (1412 to June 18, 1413) condemned Wycliffe’s writings; and another at Constance condemned Huss to the flame, demanded the recantation of Jerome, and denounced the innovations as pernicious. Reginald Pecock, bishop of Chichester, was deposed in 1458 for professing these opinions.

Wyth.—A massive iron bridge was built over this river at Chesport a.d. 1816, and a tubular bridge for the South Wales Railway, erected by I. K. Brunel, was finished April 2, 1852.

Wyoming (North America) was attacked and destroyed by a party of Americans, assisted by a number of Indians, under Colonel Butler, in July, 1778. The incident forms the subject of Campbell’s well-known poem.

Xanthica.—This festival, which was observed during the month Xanthicus, the sixth of the Macedonian year, corresponding to our April, was the annual occasion for the illustration or purification of the Macedonian army, and comprised a sham fight and other solemnities.

Xanthus (Greece), a celebrated city of Lycia, was besieged by Harpagus in the reign of Cyrus, when the inhabitants perished, with all that they possessed, in the ruins of their city. It was rebuilt, and during the Roman civil war was taken by Brutus, b.c. 42. The inhabitants refused to submit, and perished in the flames.

Xativa (Spain) was taken from the Almavives by Abu Abdelmek, a.d. 1145, and surrendered to James I. of Aragon in 1246.

Xerxes (Battle).—A Saracen army of 90,000 or 100,000 men encountered the Christians near this town in Spain, and, after several minor skirmishes, a grand engagement took place, in which Roderick was slain, and his Visigothic kingdom destroyed, July 19–26, a.d. 711.

Xeres, or Jerez, de la Frontera (Spain), from which sherry derives its name, was taken by Alfonso X. of Castile, a.d. 1254. He subdued a revolt of its inhabitants in 1263.

Xerxes’ Expedition.—The Persian monarch having resolved to subdue Greece, commenced his preparations b.c. 483. Three years were occupied in collecting troops and provisions, and a canal was ordered to be cut through Mount Athos for the passage of the ships, and a bridge for the army to be thrown across the Hellespont. This immense force set out from Sardis, where it had wintered, b.c. 480. The army, according to Herodotus, numbered 1,500,000 men. Various cities gave in their submission to the invader. The pass of Thermopylae was defended by Leonidas and 300 Spartans, who perished to a man, Aug. 7–9, b.c. 480. Bootia and Attica were ravaged, Athens was sacked, and Delphos attacked. The Persians were defeated at Arbemiion (q.v.) and at Salamis (q.v.). Xerxes with the remnant of his shattered army returned into Asia.

Ximena (Spain) was taken from the Moors by Don Henry, who put all the inhabitants to the sword, a.d. 1456. The French, commanded by Regnier, were defeated near this town by the Spaniards under Ballasteros, Sept. 10, 1611.

Yandaboo (Burmah).—A treaty was signed at this town at the close of the first Burmese war, Feb. 24, 1826. Assam, Arrakan, Tavoy, Mergui, and Tenasserim were ceded to England, and the Burmese agreed to pay one crore of rupees.

Yankee.—This term, applied to the people of the States of North America, is considered to be a corruption of the Indian pronunciation of “English.” They called them Yengees, and the term Yankee began to be used about a.d. 1775.

Yarmouth (Norfolk) was, according to Domesday Book, a royal demesne a.d. 1086. A charter of Henry III. gave permission to fortify the town, which was done by constructing a moat, and a wall with ten gates and sixteen towers. The town was attacked by the insurgents during Ket’s rebellion in 1549. A fortress with four towers was erected in anticipation of the Spanish invasion in 1588. William III., on his return from Holland, landed here Oct. 18, 1692. The suspension bridge across the Yare gave way, and seventy-nine persons were drowned, May 2, 1845. St. Nicholas’s church was founded in the beginning of the 12th century, St. George’s was built in 1716, and St. Peter’s in 1833. Nelson’s monument, 140 feet high, was erected in 1817.

Yassy. (See Jassy.)

Year.—Nicolas (the Chronology of History) remarks: “The days on which the year commenced in most countries have been as follow:—Christmas-day, the 25th of December; the day of the Circumcision, the
YEA
1st of January; the day of the Conception, the 25th of March; and Easter-day, the day of the resurrection of our Lord. In England, in the 7th, and so late as the 13th century, the year was reckoned from Christmas-day; but in the 12th century, the Anglican church began the year on the 25th of March; which practice was also adopted by civilians in the 14th century. This style continued until the reformation of the calendar by 24 Geo. II. c. 23 (1751), by which the legal year was ordered to commence on the 1st of January, in 1752. It appears, therefore, that two calculations have generally existed in England for the commencement of the year; viz.—1. The Historical year, which has, for a very long time, begun on the 1st of January; and 2. the Civil, Ecclesiastical, and Legal year, which was used by the Church, and in all public instruments, until the end of the 13th century, began at Christmas. In and after the 14th century, it commenced on the 25th of March, and so continued until the 1st of January, 1752. This led to great confusion. Charles I. is said by those authorities who use the Historical year to have been beheaded Jan. 30, 1649, whilst by those writers who computed by the Civil, Ecclesiastical, or Legal year, the date is assigned to Jan. 30, 1648. The date of any event that happened between Jan. 1 and March 25 was, in order to avoid confusion, frequently written thus:—
8 i.e., the Civil, Ecclesiastical, January 30, 164—; and Legal year.
9 i.e., the Historical year.
or
January 30, 1648-9.

The lower, or last figure always indicates the year according to the system of computation now in use. (See New Style and Old Style.)

YEAST, or LEAVEN, was employed in the manufacture of bread as early as B.C. 1897 (Gen. xix. 3). The absence of leaven constituted the peculiarity of the bread used in the passover, B.C. 1491 (Exod. xii. 15); and it was always omitted in bread intended for immediate use. The Faculty of Medicine of Paris reported against the use of yeast, as prejudicial to health, March 24, 1688.

YEDDO. (See Jeddo.)

YEKATERINBURG. (See Ekaterinburg.)

YELLOW FEVER.—The history of this scourge of the southern parts of North America is enveloped in considerable obscurity. Dr. Bascombe, in his treatise on the "Nature and Cause of Yellow Fever," denies that it is of modern origin, and states that it raged in Spain as early as B.C. 1100. He also regards the pestilence which ravaged England A.D. 664 as the true yellow fever; and he mentions a deadly outbreak of the same disease which occurred in the fleet of Sir Thomas Gates and Sir George Somers during its voyage to Virginia in 1608. It appears that an epidemic fever of fatal character raged in the Antilles in 1636, and that somewhat similar diseases appeared at Martinico in 1655, at St. Lucia in 1665, and at Brazil in 1685; and it is asserted by some that these attacks were all recurrences of the tropical yellow fever. Other authors state that it originated in Siam, and that it was carried thence by the French to the West Indies in 1690. In 1699 it first appeared at Philadelphia, which has since been one of its chief seats. It broke out at Charleston, South Carolina, in 1728, at New York in 1791, at New Haven in 1794, and at Boston in 1798; and it has frequently renewed its visitations in these and other large cities of the United States. In 1800 it broke out with great violence at Cadiz, and devastated Spain for four years; and in 1804 it raged in Italy. Gibraltar was violently attacked in 1810, and has been the scene of frequent subsequent visitations.

YEMBO (Arabia).—An expedition against the Wahabees of this place was dispatched by Mehemet Ali, viceroy of Egypt, in August, 1811.

YEMEN (Arabia Felix) was restored to the Homerites and made tributary to Persia A.D. 570. A brother of Saladin conquered it, and established the dynasty of the Curda, or Ayoubites, in 1173. It was taken by the lieutenant of Soliman I. in 1538, and again by Selim II. in 1568. The Turks were expelled from Yemen in 1630. Abou Nokta plundered a number of its towns in 1804.

YEOMANRY, YEOMANRY CAVALRY, &c.—The yeomen of the Middle Ages constituted the greatest body of farmers and small freeholders. Hallam terms them "a very numerous and respectable body, some occupying their own estates, some those of landlords." Henry VII. founded the yeomen of the guard in 1485, for fifty men upwards of six feet in height and a captain. The number was, however, immediately raised to one hundred; but no settled standard existed till 1668, when Charles II. fixed it at one hundred, of whom six were called yeomen-hangers, because it was their business to superintend the hanging of the tapestry in the royal apartments; and two yeomen-bedgoers, because to them was intrusted the arrangements of the beds during royal progress. The offices of lieutenant and ensign of the yeomen of the guard were also added in 1668. Volunteer cavalry corps were formed by the yeomen of England on the outbreak of the war with France in 1793, and became very frequent when Mr. Dundas recommended the enrolment of volunteers in 1797.

YEOMEN OF THE GUARD, vulgarly called "beef-eaters," a corruption of buff'tiers, from their having been stationed at the buffet, or sideboard, during state banquets, were formed as a body-guard, fifty in number, by Henry VII., A.D. 1485.

YERMUK (Battle).—Heracleus, the Roman emperor, was totally routed by the Saracens, after a bloody engagement on the banks of this Syrian stream (the Hieromax), Aug. 23, A.D. 634.

YEW-TREE.—The wood of this tree was
employed in the manufacture of bows by the ancient Greeks and Romans, who were also acquainted with the poisonous nature of the juice of the yew. The custom of planting the tree in churchyards is variously explained as a remnant of Druidical superstition; as a means of sheltering the church from winds, &c. as affording a supply of the evergreens so frequently used by our forefathers in ecclesiastical festivals; and for the sake of the wood, which was the best adapted for making bows. Caxton, in his "Directory for the Festivals," published in 1483, refers to the yew as a substitute used in England for palms on Palm Sunday. Shakespeare, in his comedy of "Twelfth Night" (act ii. sc. 4), written in 1600, alludes to "My shroud of white, stuck all with yew." The custom of clipping the yew into fantastic forms as a garden tree was at its height between the reigns of Charles I. and William III. The Canada or North-American yew was introduced into this country in 1800.

YEZDEGIRD, or PERSIAN ERA, commenced on the accession of Yezdegerd to the throne of Persia, June 16, A.D. 632. The error in the calendar was rectified by Sultan Jaleh- ledin in 1075.

YORKE.—Yokes of iron are mentioned by Moses b.c. 1451 (Deut. xxvii. 48), and it is believed that such were actually used by slaves during the Scriptural period. The ancients regarded the yoke as a symbol of slavery, and it was customary for vanquished armies to pass under a yoke, formed like a gallows, of two upright spars, and a third fixed transversely at top. The Sammites exacted this mark of submission from the Romans after their victory at the Caudine Forks, b.c. 321; and were themselves compelled to undergo the same humiliation b.c. 307 and b.c. 294.

YORK (Archbishopric).—St. Lucius, king of the Britons, is said to have established an archbishopric at York as early as A.D. 150. The names of only four of the ancient bishops are recorded, and the see subsequently became extinct. It was revived by Edwin, king of Northumbria, about 622, and conferred upon Paulinus April 27, 627. On the death of this primate, the Northumbrians relapsed into idolatry, and the see remained vacant for about thirty years, until 664, from which year the succession remains unbroken. The supremacy of Canterbury to York was decreed by the Anglican council of 1072. The metropolitan see of York originally exercisedjurisdiction over the Scotch bishops; but this power was abolished in 1466. By an order in council Aug. 21, 1837, the entire county of Nottingham was separated from York, and annexed to Canterbury. The province now comprises the sees of York, Carlisle, Chester, Durham, Manchester, Ripon, and Sodor and Man.

YORK (England), the Roman Eboracum, the Altera Roma, belonged originally to the Brigantes. It was made a Roman station about A.D. 79. The emperor Septimius Severus died here Feb. 4, 2011. A Danish force captured the city in 867, and occupied it during the year 869. The inhabitants made a treaty with Ethelfleda, sister of Edward the Elder, in 918. A witenagemot was held here by Edgar in 966. The castle was taken by the Norwegians, Sunday, Sept. 24, 1066. It was seized by Edgar Atheling, and the garrison of 3,000 persons put to the sword, in 1069. A massacre of the Jews took place March 17, 1190, when upwards of 1,000 were put to death, and many who were besieged in the castle destroyed themselves. It was besieged in 1216 by the insurgent barons, when the inhabitants paid a ransom of 1,000 marks. The marriage of Alexander II. of Scotland and Joan, sister of Henry III., was celebrated here June 25, 1221; and that of Alexander III. of Scotland, and Margaret, daughter of Henry III., Dec. 26, 1251. A parliament was summoned to meet at York by Edward I. in 1298. The courts of King's Bench and Exchequer were removed to this city in 1299, where they remained for seven years. Edward II. made it his headquarters in 1311, and was married in the cathedral toMargaret, daughter of Henry III., Dec. 26, 1251. A parliament was summoned to meet at York by Edward I. in 1298. The courts of King's Bench and Exchequer were removed to this city in 1299, where they remained for seven years. Edward II. made it his headquarters in 1311, and was married in the cathedral to
Philippa of Hainault, Jan. 24, 1328. A pestilence carried off 11,000 of the inhabitants in 1390. The city was taken by the Lancastrians in 1460. On the suppression of monasteries by Henry VIII. in 1536, an insurrection took place, styled the "Pilgrimage of Grace" (q.v.), when the insurgents entered the city, and compelled the archbishop to join them. Conferences before the duke of Norfolk and the earl of Sussex were held here in 1563, to inquire into the charges against Mary, queen of Scots. Charles I. visited York on his way to Scotland in 1665; and a pacification was concluded with the Scottish commissioners, June 18, 1630. The king summoned the peers to meet him here Sept. 24, 1640; and again, when he took a solemn pledge to exercise a legal government, June 13, 1642. It was besieged by the parliamentary army, and surrendered after the defeat of Prince Rupert at Marston Moor, July 16, 1644. The parliamentary generals, Fairfax and Monk, occupied it in 1669. A meeting of the gentry was held at York, and £40,000 subscribed for the suppression of the rebellion, Sept. 24, 1745. Eleven of the rebels were executed here in 1746. A petition respecting extravagance and abuse in the expenditure of the public money, adopted at a monster meeting, was presented to parliament Feb. 8, 1780. Fourteen of the rioters termed Luddites were executed here Jan. 10, 1813. A grand banquet was given in the Guildhall by the lord mayor to Prince Albert, the lord mayor of London, and the chief municipal officers in the kingdom, Oct. 25, 1850. Its first charter was granted by Henry II., and the title of lord was given to the mayor by Richard II. The Guildhall was erected in 1446, and the church of St. Michael-le-Belfrey was built in 1545. St. Olave, Marygate, was raised out of the ruins of the abbey that was founded on the spot by Siward, earl of Northumbria, in 1072. St. Peter's school was founded by Queen Mary in 1557, and the Blue-coat boys' school was established in 1705. The Mansion-house was built in 1726, and the Assembly-room, the finest in the kingdom, in 1736. The county hospital was endowed by Lady Hastings in 1749, and the retreat for lunatics was erected by the Quakers in 1796. The building of the Philosophical Society was opened in 1830.

York (Upper Canada).—The name of this town was changed to Toronto (q.v.) A.D. 1834.

Yorkists. (See Lancastrians and Yorkists.)

York Minster, originally founded by Edwin, king of Northumberland, A.D. 627, was destroyed by fire April 23, 741. A new church was built during the episcopate of Ethelbert, who was elected to the see in 767. It was rebuilt by Archbishop Thomas, who came to the see in 1070, and was burned down in 1137. Of the present building the nave was founded by John le Romaine, the archbishop, in 1291. The edifice was completed by Archbishop Melton about 1331. Archbishop Thoresby rebuilt the choir in 1361; and the central tower was taken down in 1370, and rebuilt soon afterwards, Jonathan Martin, a lunatic, set fire to the cathedral Feb. 2, 1829. Another conflagration ensued, through the carelessness of a workman who left his candle burning in the clock-tower, May 20, 1840.

York Missal.—Perhaps the only perfect copy of this ritual is that preserved in the library of St. John's College, Cambridge, bearing the title, "Missale ad usum Ecclesiae Ephrorum suppositus Francisci Regnault, Parisii, A.D. 1538."

York Town (North America).—Lord Cornwallis, on taking the command in Virginia, concentrated his forces here Aug. 22, 1781. The American batteries were opened upon it Oct. 9, and Cornwallis surrendered Oct. 19.

Ypres, or Ieperen (Belgium), took its rise from a fortress which was built by a count of Flanders a.d. 960. The town was enlarged and walled by Philip the Bold in 1388. The Spaniards wrested it from the inhabitants, who had revolted, in 1649, and it was taken by the English and French in 1658. The French captured it in 1744, bombarded it ineffectually in 1793, and reduced it, after a thirteen days' siege, June 17, 1794. Linen, called "diaper," was originally made here, taking its name from a mispronunciation of d'Iperen.

Yttrium was discovered in the state of oxide called yttria, by Professor Gadolin, of Ytterby, in Sweden, A.D. 1794. The metal, of a dark grey colour, was first procured by Wöhler in 1828.

Yucatán (Mexico) was discovered by Hernandez Cordova, A.D. 1517, and conquered by the Spaniards, under Bernal Diaz, in 1522. It remained subject to Spain till the declaration of independence in 1813. The change of the federal into a central government in Mexico in 1833 raised a spirit of discontent in this state. This led to a repudiation of the central power in 1839; and after a lengthened contest the establishment of its independence in 1841. The ruins of many extensive cities have been discovered. They were described by the North American traveller Stephens in 1838 and 1842.

Yust, St. (See Just, St.)

Yvres, or Ivrey (France), belonged to Raoul, half-brother of Richard I., duke of Normandy, who built a strong fortress, round which the town sprung up, A.D. 943—966. Roger de Beaumont, who had received the domain from William the Bastard, founded the Benedictine monastery in 1071. Henry I. of England threw a garrison into the castle in 1119. An interview took place near the town between Henry II. of England and Louis VII. of France in 1176. The upper town was taken by the English, under Talbot, in 1418, and by the duke of Bedford in 1424. It was recovered by the French in 1449. (See Ivrey, Battle.)
ZAANDAM. (See Saardam.)

Zaan (Battle).—Merwan II., the fourteenth and last caliph of the Ommiades, was defeated A.D. 750 in a sanguinary conflict on the banks of this river, in Assyria, by the Abbasid caliph, who established his dynasty. Merwan II. took refuge in a mosque at Busir, in Egypt, where he was slain Feb. 10, 760.

ZACYPHUS. (See Zante.)

Zadock (Battle).—The insurgent Hungarians collected by Bertzeny were defeated at this place, on the frontiers of Poland, by the Austrian general Seckingen, Jan. 22, 1710.

Zagraf (Battle).—Charles Martel, having entered Hungary to claim the crown, was defeated in an engagement at this place, A.D. 1292, by Andrew III.

Zaire River (Africa).—This river was discovered by Diego Cam, A.D. 1484. In 1518 it was stated that it flowed from a lake in the interior of Africa, and in 1818 it was partially explored by Tuckey. Its actual source and course are still very imperfectly known. This river is also called the Congo, which name it gives to the country through which it flows. (See Congo.)

Zalacca (Battle).—The Almoravides of Africa defeated Alfonso VI. of Castile in this plain, near Badajos, Oct. 2 and 3, 1086.

Zama (Numidia), at one time strongly fortified, and the residence of the ancient kings of the country, was the scene of a signal defeat of Hannibal by P. Cornelius Scipio, when twenty thousand Carthaginians were slain, and as many taken prisoners, B.C. 202. It refused admittance to Juba when a fugitive from Casmarr, after the battle of Thapsus, B.C. 46.

Zante (Ionian Islands), the ancient Zacynthus, was founded by a colony of Achaenians about B.C. 1390. It was unsuccessfully attacked by the Lacedaemonians B.C. 430, and assisted the Syracusan expedition of Dion against Dionysius, B.C. 387. It was taken by the Roman praetor Valerius B.C. 211. Philip V. of Macedon having obtained possession, restored it to the Romans B.C. 191. The town suffered from an earthquake in October, 1841. The pitch-wells of the island, which still exist, were described by Herodotus and Pliny.

Zanzaliens. —The followers of Jacob Zanzalee, better known as Baradeus, who died A.D. 578, were so called. (See Jacobites.)

Zanzibar (Africa).—This island was discovered by the Portuguese Albuquerque A.D. 1505.

Zara (Austria) occupies the site of the ancient Jadera, the capital of Liburnia, in Illyria. It became a Roman colony under Augustus. Under the name of Dioctera it paid a tribute of a hundred and ten pieces of gold to the Eastern empire, and was transferred to the Slavonic princes by Basil I. (A.D. 867—886). Zara afterwards became the capital of Dalmatia. Having revolted from Venice, and implored the aid of Hungary, it was besieged by the French and Venetian crusaders, and yielded after a five days' resistance, Nov. 10, 1202.

Zatmar (Treaty).—A convention by which peace was restored to Hungary,—the emperor, Joseph I., granting a general amnesty, restitution of confiscated property, liberation of prisoners, and the exercise of the Protestant religion, was signed in January, 1711.

Zealand (Saxony).—This island was anciently of great importance as a resort for the fleets for which Denmark was so justly famous. Its castle of Wordingborg was founded by Valdemar I. A.D. 1106.

Zealand (Holland).—The islands composing this province were first unitcd under one government by Florence V. A.D. 1256. In 1304 Zealand was seized by Guy of Flanders, who was, however, speedily expelled; and, in 1579, it participated in the celebrated Union of Utrecht. Under the French domination, from 1810 to 1814, Zealand formed the department of Bouches-de-l'Escaut.

Zernegue. (See Rammekens.)

Zegers. (See Adencrages.)

Zeilan. (See Ceylon.)

Zeitz (Battle).—Rodolph, duke of Swabia, having accepted the crown of Germany, and having been recognized by the pope, encountered the emperor Henry IV. in a pitched battle at this place, near Merseburg, on the banks of the Elster, in Germany, in which he was defeated and slain, Oct. 15, 1090.

Zela (Asia Minor), said to have been built on a mound constructed by Semiramis, was raised to the rank of a city by Pompey about B.C. 66. Julius Cesar defeated Pharamaces here B.C. 47, and recovered the province of Pontus; on which occasion he is said to have sent his laconic despatch to Rome, “Veni, vidi, vici.”

Zell, Zelle, of Celle (Hanover).—This town was erected into a duchy A.D. 1398. Its castle was built in 1485, and is chiefly celebrated as the prison of the unfortunate Caroline Matilda, queen of Denmark and sister of George III., who was immured here on a false charge of incontinence. (See Denmark.) She was arrested at Copenhagen Jan. 16, 1772, and immediately conveyed to the castle of Cronenburgh, whence she was removed to this place on the intercession of her brother, the king of England, May 30. After living in retirement for three years, she died May 10, 1775, in her twenty-fourth year, and was interred in the sepulchre of her maternal ancestors, the dukes of Zell. A treaty between the duke of Brunswick, Germany, Spain, and Holland, was concluded at Zell June 20, 1674, and another between Brunswick and Sweden Feb. 5, 1679.
ZENDRGAN (Battle).—The Gazevides were defeated by the Turkomans at this place, in Khorassan, and the dynasty of the shepherd kings founded in Persia, A.D. 1038.

Zenta. (See Senta.)

ZINC was unknown to the Greeks, Romans, or Arabians, although the ore calamine was probably employed in making brass in the 5th century. Albertus Magnus showed that furnace calamine might be used for this purpose in the 13th century. This application was also pointed out by Erasmas Liber, of Nuremberg, about 1548. Artificial white vitriol was an article of commerce about 1570, before it was known that it was procured from zinc. The name zinc first occurs in Paracelsus, who described it in 1530. Henkel procured it from calamine, and published his success in 1741. In England it was probably manufactured in that way as early as 1737. Work for its manufacture was established at Bristol by Champion in 1743. The greater part of the metal used in Europe was brought from the East Indies, the Commercial Company of the Netherlands having sold nearly 1,000,000 lb. between 1775 and 1779.

Zirconium.—This rare metal, which has at present resisted all attempts at fusion, was discovered by Berzelius A.D. 1824.

Zodiac.—It is believed that the ancient Babylonians divided the zodiac into twelve signs, distinguished by the names of different animals; and a similar arrangement was adopted by the Egyptians, Greeks, and orientals. Anaximander of Miletus is said to have constructed a dial representing the signs of the zodiac about B.C. 600, and Aratus, who wrote an astronomical poem about B.C. 270, describes the zodiac. The practice of decorating ceilings, &c., with representations of the zodiacal signs was common in ancient Egypt and Rome. The phenomenon of the zodical light was first observed by Desortes and Childrey, and was named by the elder Cassini in 1683. It was first observed in England in Essex, by Derham, April 3, 1707.

Zollverein.—The idea of a uniform system of customs for the German states was first suggested at the Congress of Vienna, A.D. 1815, and was acted upon by the government of Prussia, which abolished all distinctions of customs throughout its territories, May 26, 1818, and invited other governments to unite for a similar purpose. The invitation was generally accepted, and the result was the formation of the Zollverein, or customs union of the German states, by a treaty signed March 22, 1833. Saxony joined the union March 30, and Thuringia May 11, and the uniformity of customs thus introduced commenced Jan. 1, 1834.

Zoological Gardens.—The Zoological Gardens, Regent's Park, were laid out A.D. 1825, and the Surrey Gardens in 1832.

Zoological Society.—The Zoological Society of London was founded by Sir Humphry Davy, Sir Stamford Raffles, and other eminent gentlemen, A.D. 1826. The Cuvierian Society of Paris was instituted in 1738.

Zoology.—Aristotle wrote his "History of Animals" about B.C. 334. The first European work in any department of this science worthy of notice is Turner's "History of Birds," published at Cologne A.D. 1548. Conrad Gesner's "History of Animals," considered by Cuvier as the basis of all modern zoology, was published between 1551 and 1567. A history of fishes in Latin, from the pen of Belon, the traveller, appeared in 1553. Leibnitz's Ideas of a system of zoology was announced by Salviani in 1558, and by Rondelot in 1554. Aldrovandus, professor of natural history at Bologna, produced a work on the subject in thirteen volumes, nine of which were published after his death, which occurred in 1605. The last, on cloven-hoofed quadrupeds, was issued from the press in 1642. The animals of Brazil were described by Marecgraf in 1649. Johnston, a Pole, produced a natural history 1648—1652. A work on insects, by Moufet, an English physician, appeared in 1634. Ray, the first zoologist who made use of comparative anatomy, wrote on the subject in various depart-ments between 1676 and 1693. Swammerdam, a Dutch naturalist, published a general history of insects in 1669. Baron Cuvier, conjointly with M. Geoffroy, issued a new classification of mammiferous animals in 1797, and published his "Animal Kingdom" in 1817. (See Linnean System and Natural History.)

Zorndorf (Battle).—The Russians, 50,000 strong, commanded by Marshal Fennor, were attacked Aug. 25, 1758, at this village in Prussia, by the Prussians under Frederick II., and suffered a severe defeat, having lost upwards of 20,000 men and nearly 1,000 officers.

Zouaves.—A Kabyle and primitive Berber people, inhabiting a mountainous district between Bougie and Delli, in Algeria, known as the Gouaoua, or D'All-Goua, are also called Zouaouas; whence the term Zouave. Max Müller says they are called Shawi in Algiers, that is, Nomads; and that at Tunis the name has been corrupted to Souv; whence the French Zouave. The lieutenant-general of police attached to the French expedition to Algeria addressed a communication to Marshal Bourmont containing an offer of an auxiliary corps of 2,000 of these people, Aug. 14, 1830. The offer was accepted, and a decree issued for its formation, Oct. 1, 1830. A royal ordinance divided them into two battalions, composed of four companies of indig.énes and two of French, Dec. 5, 1835. Gradually the enlistment of natives ceased; and the force now consists almost exclusively of Frenchmen.

Zug (Switzerland), the smallest of the cantons, joined the confederation A.D. 1352, became a member of the new confederacy in 1815, and formed one of the seven Roman Catholic cantons which associated, under the name of the Sonderbund, against the
Free Corps in 1846. The arsenal contains the bloody banner borne by Peter Kollin, who fell fighting against the Milanese in 1422.

ZÜLLICH (Battle).—The Prussians, under General Wedel, were defeated by the Russians, with a loss of 9,000 men, near this town of Prussia, July 23, 1759.

ZURICH.—The name sometimes given to the battle of Tolbiac (q.v.).

ZURICH (Switzerland), capital of the canton, and an ancient Roman station, was burned by the Helvetii when about to invade Gaul, B.C. 61. The Alemanii rebuilt it A.D. 266. It received the jus monetae from Charles the Bald, and was walled round under Otho I. Arnold of Brescia found refuge here in 1140, when he fled from Italy on a charge of heresy. The canton joined the confederacy in 1351, and was engaged in 1436 in a civil war with the other cantons, which besieged it in 1444. Peace was concluded between them in 1446. The town of Winterthur was mortgaged to the canton in 1452. The reformed faith was adopted in 1523, and the sacrifice of the mass replaced by the celebration of the Lord's Supper in 1525. The French general Massena retreated from the town, leaving it in the hands of the Austrians, June 5, 1799. He defeated the Russian general Korsakoff, when the celebrated Lavater, wishing to act as a minister of peace, stepped between the combatants, and fell dead in the street, Sept. 26. The Protestant pastors of the town, opposed to the system of education independent of the clergy, put themselves at the head of a body of peasants, and effected the dissolution of the government in 1839. The Münsterhoff, or cathedral, in the Byzantine style, was built in the 11th century; the Frauenmünster, formerly a nunnery, was founded in the 13th century; and the university, an ancient convent, was founded in 1384.

ZURICH (Treaty).—Plenipotentiaries from Austria, France, and Sardinia, for the definite settlement of the preliminary treaty of Villarfranca (q.v.), assembled at Zurich Aug. 5, 1556, and concluded a definite treaty Nov. 10, which was ratified Nov. 21. By this treaty, the whole of Lombardy, except Peschiera and Mantua, was ceded by Austria to France, on condition that it should immediately be transferred to Sardinia, and a perpetual peace was established between the three contracting powers.

ZUTPHEN (Holland).—This fortified town was acquired with the province of Guelderland, in which it is situated, by Charles I. (the Bold), duke of Burgundy, A.D. 1472. Sir Philip Sydney lost his life in a skirmish under its walls, when his uncle, the earl of Leicester, made an unsuccessful attempt to take it, Sept. 22, 1686.

ZUTTEN ZEER, or SOUTH SEA (Holland), originally a lake known by the name of Flevo, was enlarged by an inundation of the sea, which separated Holland from Friesland, A.D. 1294. A body of French cavalry and artillery crossed it upon the ice in 1794, when the novel enterprise was executed of the capture of a fleet by a land force, a portion of the Dutch navy having been frozen in at the Texel. The Dutch fleet surrendered to the English admiral Mitchell here, Aug. 30, 1799.

ZWICKAU (Saxony).—The fine Gothic church at this place was commenced A.D. 1453.

ZWINGLIANS, the followers of Ulrich Zwingli, or Zwinglius, who was born at Wildhausen, Toggenburg, in the Swiss canton of St. Gall, in January, 1484. He was ordained priest in 1506, and appointed to the parish of Glarus, where he preached against the corruptions of the church of Rome. The court of Rome charged him with heresy, and threatened him and his disciples with excommunication, when he opposed the sale of indulgences as preacher to the monastery of Einsiedlen, an appointment which he received in 1516. Zwinglius was appointed, in 1517, to a vacancy in the cathedral of Zurich. The Zwinglians formed a majority in the two great councils at Zurich, in January and October, 1523. They ordered the removal of all images and ornaments from churches in 1524, and put an end to the celebration of the mass in January, 1525. The popish cantons having sent a force against them, defeated them at Cappel (q.v.), where Zwinglius himself led them to the field, and fell at their head, mortally wounded, Oct. 11, 1531.

ZWOLLE (Holland).—This town was taken by the French A.D. 1672, and again Jan. 31, 1795. The Russians occupied it Nov. 12, 1813. It was much injured in 1825 by an inundation of the river Yssel.

ZYP (Battle).—Sir Ralph Abercrombie repulsed an attack of 16,000 French, under Dandaels, at this place, also called Zuyper-Sluyts, in Holland, Sept. 9, 1799.
